It was interesting to me. People who know my history, know that to be elected Governor 30 years ago, I walked across the State of Tennessee. Instead of going to a Republican meeting or a rotary club, I would visit with random people during my walk. It took me 6 months and I would see 1,000 people a day. These random phone calls kind of reminded me of that. It was as if the people were randomly selected. They were not on any Republican list or Democratic list or list of doctors or patients. They were just in the phonebook. They talked and acted like they were normal citizens who I had interrupted after dinner, probably because it was 6:30 to 7:30 in that part of Tennessee. I was able to ask those citizens three questions. I am not about to say this is a Gallup poll of Tennessee, because I know that surveys like that have to be done in a scientific way, but after being here for 21 straight days, not able to go home because we have been debating this bill, these opinions are straws in the wind.

The first question was: Do you believe the Senate should rush to pass this health care bill before Christmas? In this case, 943 people, 83 percent, said no, and 108 said yes; that is 9 percent.

Second question: Do you support the health care bill moving through the Senate? On this one, 1,496 said no, or 75 percent. 352 said I don't know, which is 18 percent, and 154 said yes, that is 8 percent.

No. 3: Do you agree that Congress doesn't do comprehensive legislation well and ought to go step by step to bring health care costs under control? On this question, 1,285 said yes, that is 80 percent, 14 percent said I don't know and 7 percent disagreed.

I have often heard our friends on the other side say: Where is the Republican bill? My response has been, day after day, if you are looking forward to seeing the Republican leader role a wheelbarrow in here with a 2,700-page Republican comprehensive bill, you will be waiting forever. We have a different approach. Our approach is to set a clear goal—reducing cost. The bill we are voting on increases costs. Our goal is to find five or six steps to go in the direction to reducing costs.

Without going into detail, although the Senators from South Dakota or Wyoming may want to, we focus on five or six steps that would clearly reduce health care costs. By that, I mean your premium, the cost of your government. And once we do those five or six steps, we could go on. We could do that without taxes, without mandates, without running up the debt, without a big bill with lots of surprises. Just to take one example—and then I will yield to my friends from Wyoming and South Dakota—one of those examples is the small business health care plan. The current bill, the Democratic bill, has in it a credit for small businesses, but we would argue that by the time small business men and women get through paying the mandates and the taxes the bill also imposes, it is not going to be much help to them.

What we have is a bill that would allow small businesses to pool their resources. In other words, if you are a small business man or woman and you have 60 employees and 2 get cancer, suddenly the costs of those 2 employees prohibit you from providing insurance to the other employees. But if you could pool your resources with small businesses all around the country, then the pool would be large enough that you could offer insurance.

That proposal has been made by Senator ENZI. It has been through the HELP Committee. The Congressional Budget Office said it did not add to the deficit. In fact, it reduces the deficit, and it would permit 750,000 more employees of small businesses to be insured and their premiums would be lower than they otherwise would be. That is a single step to moving toward

reducing health care costs, but if we took that step and the other steps we have proposed, that would be a good way to start. We could do that together, and we would not have this partisan bill with so many questions and so many concerns.

So I wonder if my friends from South Dakota and Wyoming—I know they have thought a good deal about this step-by-step approach toward actually solving the real problem of health care costs.

Mr. THUNE. If the Senator will yield on that suggestion of small business health plans, doesn't that enjoy wide support among small businesses in this country?

Mr. ALEXANDER. It clearly does. It enjoys widespread support everywhere, except the Senate. When Senator ENZI brought it up, it was rejected by our friends on the other side.

Mr. THUNE. If I might continue, the one thing that strikes me about this proposal that, as I said before, now is, in totality, 2,700 pages, is that it does not enjoy any support from any small business organization that I know of. Maybe there are some out there I cannot speak to. But I do know the organizations that represent small businesses that we are all well acquainted with—National Federation of Independent Business, the Chamber of Commerce, the National Association of Manufacturers, the National Association of Wholesalers and Distributors, builders and contractors, electric contractors, franchise associations—I can go right down the list—all say this does nothing to lower their costs. In fact, it increases the cost of doing business, increases the cost of doing health care.

What they have argued repeatedly is one of the suggestions the Senator from Tennessee mentioned, that small business health plans would drive their health care costs down, which is why they have been such strong advocates for this over the years.

I guess the other question I would ask of my colleague from Tennessee is, would an approach, a suggestion like small business health plans require tax increases that would hit small businesses?

Incidentally, the latest version with the managers' amendment, which we just received Saturday, increases the tax increases in the bill that were previously \$493 billion and are now \$518 billion. As the Senator mentioned, with the tax credit businesses get, they up that a little bit but not enough to help most small businesses in light of the \$518 billion in tax increases in the first 10 years, and when it is fully implemented it will be about \$1 trillion. But the payroll tax that is going to hit a lot of small businesses was increased dramatically in the managers' amendment. The individual mandate was almost doubled in the managers' amendment. So the taxes in the bill go up with this proposal.

I guess my question is, with all these tax increases that are going to have a crushing impact on small businesses, does a suggestion such as the one made by the Senator from Tennessee for small business health plans require tax increases or Medicare cuts, which is what is going to be necessary to finance this 2,700-page behemoth?

Mr. ALEXANDER. I thank the Senator from South Dakota. The answer is no. The difficulty with a big, comprehensive plan is it sounds good but has lots of unintended consequences. If our real concern right now is reducing costs in health care, then the idea of a small business health care plan that has no new taxes and no new mandates but creates opportunities for small businesses to pool their resources and offer more insurance at a lower cost to their employees would seem a logical place to start.

Mr. THUNE. I appreciate the Senator for his work on that issue. It is a view I share, a proposal I have been a big advocate of going back to my days in the House of Representatives and one which, as the Senator from Tennessee noted, has tremendous support among small businesses across the country. About the only place it does not have majority support is here in the U.S. Congress because maybe it makes too much sense.

But it seems to me there are suggestions and solutions out there which do not require $\frac{1}{2}$ trillion of tax increases on small businesses, which every small business organization has come out and said: It is going to drive up our cost of doing business, and at the end of the day, it is going to raise our health care costs—and does not require these steep Medicare cuts that the Senator from Wyoming has alluded to over and over again and the impacts those will have on the delivery of health care to seniors across this country but, rather, it would bend the cost curve down without tax increases and Medicare cuts.

Another example of that, I would argue, would be allowing for interstate competition, allowing people to buy their insurance across State lines, which is a suggestion we have made over and over on our side of the aisle. According to the Congressional Budget Office, both small business health plans and buying insurance across State lines actually would reduce health care costs and would do it without raising taxes or cutting Medicare, which, to me, would make a lot of sense, especially when you have an economy in recession, 10-percent unemployment, a \$1.5 trillion deficit last year and another \$1.5 trillion deficit this coming year, and when you are talking about a \$2.5 trillion cost in the growth of government here in Washington, DC, to implement these 2,700 pages.

Some suggestions along the lines of the one mentioned by the Senator from Tennessee and some of these others

would make a lot of sense, and I think they would enjoy tremendous support among small businesses, which create the jobs in this country, as well as among the American public.

So I thank the Senator from Tennessee for pointing out one of the many things Republicans are for and which we have tried to get in the debate.

I know the Senator from Wyoming has advocated for many of these same types of initiatives and solutions. As he mentioned earlier, he was prepared to offer an amendment to address the issue of premiums, but it looks as if we are going to be prevented from doing that.

Mr. BARRASSO. Our friends at the University of Minnesota said that if people were allowed to shop across State lines, shop around for insurance that is better for them and their family and their personal situation, we would have 12 million more Americans insured today than we have now, without a single page of legislation. That is all we need to do: allow people to shop across State lines. But when we talk about and look at this bill, which has mandates, there is going to be a mandate for people to buy insurance.

One of the amendments I tried to offer yesterday that I thought made a lot of sense for young people was that for individuals under the age of 30 or for those making less than \$30,000 a year, they would be exempted from the mandate, the individual mandate that they have to buy insurance.

I was involved in a discussion on a college campus in a debate on this topic, and in talking to the students, they were astonished to learn—because they were not focused on this; they were focused on their studies and working—they were astonished that they are all going to have to buy, as a matter of law, if this passes, health insurance immediately, and if they do not, they are going to have to start paying a tax or a fine, depending on how you describe it.

So in my amendment, I said, for those up to the age of 30 and making under \$30,000 a year, let's exempt them from the mandate. That amendment was rejected.

Then I said, well, if they are going to do this and force these people to buy insurance, and if they do not buy insurance, they have to pay these excessive fines or taxes—or however you want to define it—I said, how about that the penalties these people would have to pay, if they choose not to buy insurance—because it is going to be a lot cheaper to not buy insurance and to just pay the tax—what if that money could go into a personal account so that person can then use the money to then buy insurance? So it would be kind of like a savings account, so the money would be there for them to buy insurance. So individual mandate penalties would accrue not to the govern-

ment but in a personal account, so they could purchase health insurance within a 3-year period. The money would accumulate. That amendment was rejected as well.

So we have lots of ideas, good ideas, to help people with affordable care, available care, and yet one after another they have been rejected in a step-by-step process to try to find ways to solve the health care crisis we know faces the country. All 100 Members of the Senate know we need to find ways to make health care more affordable and to work on high-quality care.

It has been fascinating to see the dean of the Johns Hopkins Medical Center and the dean of Harvard and those who have looked at this bill closely say that the people who are supporting this are living in collective denial, that this bill is doomed to fail, that it will raise the cost of care, not lower the cost of care, and will do nothing to improve quality.

Mr. THUNE. If the Senator from Wyoming would yield on that point, that is why I think day after day after day—and I have said—there is a pattern emerging here in the Senate where the majority comes down and establishes the need for health care reform, which we all acknowledge, and illustrates examples of those who have fallen through the cracks, which we all know examples exist—all of us have dealt with those in our individual States—and then proceeds to attack Republicans for not having their own ideas, which we have just mentioned there are lots of good Republican ideas which do not raise taxes, which do not cut Medicare, and actually do something to reduce premiums. But that seems to be the strategy employed and the pattern that emerges in the rhetoric day after day down here from the other side.

The one thing I do not hear is them coming down here and talking about what this 2,700-page bill is going to do to reduce health care costs, because if we all submit to the experts on this—which, as I said earlier, the Congressional Budget Office is sort of the referee. They do not have a political agenda, or at least they are not supposed to. The Actuary at the Centers for Medicare and Medicaid Services does not have a political agenda, or at least they are not supposed to. They are sort of considered to be an umpire on this. The Joint Committee on Taxation, which looks at the distributional impacts of tax policy, is a referee and is not supposed to have a political agenda in all this. They all come to the same conclusions with regard to premium increases in this bill.

So if the overall objective is to reduce the cost of health care, and if, in fact, your legislation, according to all the referees, all the umpires, all the experts, not only increases premiums for most Americans but increases the overall cost of health care, which is what

they all conclude, it is pretty hard to come down and defend this product. That is why I think day after day they try to create distractions and counterattacks as opposed to actually coming down and talking about the substance of the bill because the substance of the bill does not accomplish the stated objective, which is to reduce the overall cost of health care and get premiums under control for families and small businesses in this country.

It is also hard, I would argue, because of the \$518 billion of tax increases that are in here and the unified opposition of the entire small business community, which creates 70 percent of the jobs in this country, to talk about how this can be anything but detrimental to job creation. This is going to cost us jobs. I think every business organization has made that abundantly clear. And all the analysis of this legislation that has been done comes to the same conclusion.

Mr. BARRASSO. When you take a look at what the Centers for Medicare and Medicaid Services has done, which is the group that oversees Medicare, they have said that 10 years from now, if this goes through, you are still going to have 24 million uninsured, you are going to have 18 million more on Medicaid, the program the Senator from Tennessee appropriately referred to as having a bus ticket for a bus that is not going to come, because that is what has happened. Half the doctors in the country do not take care of patients on Medicaid because the reimbursement is so low that they cannot afford to continue to care for those people. Five million people will lose the insurance they get through work, and health care costs will go up. The cost curve will go up instead of going down. But the whole purpose of this was to help drive the cost down.

Then, additionally, they said that 20 percent of providers—20 percent of the providers—of health care in this country—and that includes physicians, nurse practitioners, medical clinics, hospitals—20 percent of the providers in this country, under this plan, 10 years from now, will be unprofitable, unable to keep their doors open.

So we have heard about sweetheart deals. We have heard about taxes going up. We have heard about Medicare cuts. And what we have seen is one promise after another made by the President that has been unfulfilled and actually reversed by the bill we see ahead of us.

So I ask my friend from Tennessee, wouldn't he agree that in the next 2 days, the best thing for the country would be to have this bill not pass the Senate and instead go back in a step-by-step way and regain the trust of the American people?

Mr. ALEXANDER. I certainly do agree with that.

I think most Americans, when presented with a problem, would not try

to change it all at once but would say: Let's identify the goal which is reducing costs and go step by step.

Madam President, I ask unanimous consent to have printed in the RECORD a column by David Brooks in the New York Times on December 18.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 18, 2009]

THE HARDEST CALL

The first reason to support the Senate health care bill is that it would provide insurance to 30 million more Americans.

The second reason to support the bill is that its authors took the deficit issue seriously. Compared with, say, the prescription drug benefit from a few years ago, this bill is a model of fiscal rectitude. It spends a lot of money to cover the uninsured, but to help pay for it, it also includes serious Medicare cuts and whopping tax increases—the tax on high-cost insurance plans alone will raise \$1.1 trillion in the second decade.

The bill is not really deficit-neutral. It's politically inconceivable that Congress will really make all the spending cuts that are there on paper. But the bill won't explode the deficit, and that's an accomplishment.

The third reason to support the bill is that the authors have thrown in a million little ideas in an effort to reduce health care inflation. The fact is, nobody knows how to reduce cost growth within the current system. The authors of this bill are willing to try anything. You might even call this a Burkean approach. They are not fundamentally disrupting the status quo, but they are experimenting with dozens of gradual programs that might bend the cost curve.

If you've ever heard about it, it's in there—improved insurance exchanges, payment innovations, an independent commission to cap Medicare payment rates, an innovation center, comparative effectiveness research. There's at least a pilot program for every promising idea.

The fourth reason to support the bill is that if this fails, it will take a long time to get back to health reform. Clinton failed. Obama will have failed. No one will touch this. Meanwhile, health costs will continue their inexorable march upward, strangling the nation.

The first reason to oppose this bill is that it does not fundamentally reform health care. The current system is rotten to the bone with opaque pricing and insane incentives. Consumers are insulated from the costs of their decisions and providers are punished for efficiency. Burkean gradualism is fine if you've got a cold. But if you've got cancer, you want surgery, not nasal spray.

If this bill passes, you'll have 500 experts in Washington trying to hold down costs and 300 million Americans with the same old incentives to get more and more care. The Congressional Budget Office and most of the experts I talk to (including many who support the bill) do not believe it will seriously bend the cost curve.

The second reason to oppose this bill is that, according to the chief actuary for Medicare, it will cause national health care spending to increase faster. Health care spending is already zooming past 17 percent of G.D.P. to 22 percent and beyond. If these pressures mount even faster, health care will squeeze out everything else, especially on the state level. We'll shovel more money into insurance companies and you can kiss

goodbye programs like expanded preschool that would have a bigger social impact.

Third, if passed, the bill sets up a politically unsustainable situation. Over its first several years, the demand for health care will rise sharply. The supply will not. Providers will have the same perverse incentives. As a result, prices will skyrocket while efficiencies will not. There will be a bipartisan rush to gut reform.

This country has reduced health inflation in short bursts, but it has not sustained cost control over the long term because the deep flaws in the system produce horrific political pressures that gut restraint.

Fourth, you can't centrally regulate 17 percent of the U.S. economy without a raft of unintended consequences.

Fifth, it will slow innovation. Government regulators don't do well with disruptive new technologies.

Sixth, if this passes, we will never get back to cost control. The basic political deal was, we get to have dessert (expanding coverage) but we have to eat our spinach (cost control), too. If we eat dessert now, we'll never come back to the spinach.

So what's my verdict? I have to confess, I flip-flop week to week and day to day. It's a guess. Does this put us on a path toward the real reform, or does it head us down a valley in which real reform will be less likely?

If I were a senator forced to vote today, I'd vote no. If you pass a health care bill without systemic incentives reform, you set up a political vortex in which the few good parts of the bill will get stripped out and the expensive and wasteful parts will be entrenched.

Defenders say we can't do real reform because the politics won't allow it. The truth is the reverse. Unless you get the fundamental incentives right, the politics will be terrible forever and ever.

Mr. ALEXANDER. Most of us—we are pretty split up here: 60 there, 40 here. They are for it, and we are against it, this bill anyway.

The PRESIDING OFFICER. The minority time has expired.

Mr. ALEXANDER. I thank the Presiding Officer and I yield the floor.

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. Madam President, we heard our Republican friends say it is very hard to defend our bill. Maybe it is hard for them, but it is not hard for the American Medical Association, the AMA, which has endorsed our bill. It is not hard for the American Heart Association, which has endorsed our bill. It is not hard for the American Cancer Society Action Network, which has endorsed our bill. The American Hospital Association has endorsed our bill. Families USA, the Business Roundtable, the Small Business Majority—we hear colleagues say small business opposes our bill. The Small Business Majority Organization supports it. And how about the AARP, which represents our seniors, millions of seniors. Those are a few. They not only defend our bill, they support our bill.

This is indeed an important moment in our Nation's history as we approach a final vote on major health care reform legislation. I think whenever you are trying to change something, you

have to take a look at how things are at the moment. So why is it we voted to change our current system? There are certain numbers that I think explain it. The first number is 14,000. We know that every single day 14,000 of our neighbors lose their health insurance through no fault of their own. They either lose their job, they can't afford to keep up the health insurance or they have a condition and the insurance company walks away from them or they are priced out of the market. Fourteen thousand a day. That is cruel, and we need to change it.

Sixty-two percent of bankruptcies are linked to health care crises. We are the only nation in the world where people go broke because they get sick.

If we do nothing, 45 percent of an average family's income will go for premiums in 2016. I ask everyone to think about it, paying 45 percent of your income for premiums. It is not sustainable. What about food? What about clothing? What about shelter? Can't do it.

We are 29th in the world in infant mortality. We come in behind Cuba. We come in behind Singapore. We come in behind South Korea. We are 29th in the world on infant mortality because people don't have good insurance or they don't have any insurance.

Fifty-two percent of women—fifty-two percent of women—don't seek the health care they need. They either put it off or they never get it because they may not be insured or they are afraid of the copays. They are afraid of what it would cost. They may have limits on their policies. We need to change that.

The United States spends twice as much on health care as most other industrialized nations. So what is the message here? We spend a huge amount. We are not doing very well in outcomes. By the way, I think we are 24th in life expectancy in the world—24th. We must do better.

I wish to share with my colleagues some of the letters and e-mails that have been sent to me from Californians that personalize the statistics I spoke about.

Mr. William Robinson wrote:

I am about to be laid off from the job I have had for 19 years. My biggest fear is not being employed, but being able to find and get affordable health care. I am 60 years old. I have a preexisting condition that will for certain make it impossible for me to buy health insurance.

Mr. and Mrs. Gilbert De La Cruz wrote:

We are at the point of losing our home because we have spent our savings on medical and prescription drugs. I am 67, retired, and my wife is 62. Because of the Medicare gap in prescription drug coverage, we have had to pay \$600 a month on prescription drugs. It's a huge portion of our monthly income. We will be selling our home shortly and perhaps moving in with one of our children because there doesn't seem to be any option.

Well, I want to say to Mr. De La Cruz: Help is on the way. If we get the

60 votes we are forced to get—not 51, a majority, but 60 votes because of a Republican filibuster—if we get those 60 votes each time, there is hope for you because we are going to fix that entire problem.

Mr. Ronald Kim says:

I am in the construction industry and my work is very slow.

He says he is in the design industry.

I am in danger of becoming financially ill and I am looking for ways to stay healthy, and one way may be to eliminate my medical insurance. It is a significant part of my budget. This may, heaven forbid, lead me to financial ruin if I get injured or sick. This is my situation.

I want to say to Mr. Kim: Help is on the way.

Ms. Madeleine Foot wrote—these are all Californians, my constituents:

I recently turned 25 and I lost my health coverage under my parents. I attempted to get coverage under a Blue Cross plan created for young people my age, but because I had taken medications, I was denied. I applied again for another plan, was offered a plan with a \$3,000 deductible, and it was \$300 a month on top of that. As a young person working in a restaurant, repaying student loans and trying to make it on my own, this is a huge financial burden. I cannot afford an insurance that charges me so much and won't be any benefit for me until I have shelled out a huge portion of my income.

To Madeleine Foot I say: Help is on the way, if we can break the Republican filibuster.

Mr. John Higdon wrote:

As a self-employed person, I had a pacemaker implanted. The cost was borne entirely by me at prices much higher than any insurance company would have had to pay. That was a wakeup call to get health insurance. I am told by every health insurance company I have contacted that no one will offer me health insurance at any price with a "preexisting heart condition."

I wish to say to Mr. Higdon: Help is on the way.

Dr. Robert Meagher, a pediatrician with Kaiser Permanente for over 30 years, do you know what he wrote and told me? That he has to fake—he is pressured to fake a diagnosis because when a parent comes in with a young child with asthma, they beg him not to write down asthma but write down bronchitis, because if he writes down asthma, that child will have a preexisting condition and when she turns 21 she won't be able to get insurance. Imagine, in America, a physician being pressured to lie on a form because of a health care system that is so cruel.

So, Dr. Meagher, we are going to change things here if we can break this filibuster.

Mr. Douglas Ingoldsby wrote:

I own a small business. I employ 11 people. I have been in business in California since 1972.

He says:

I used to provide health care for all my employees and all the members of their families, and if I want to remain profitable enough to stay in business now, I can't do it anymore.

He can only cover the employees, not their families. He feels terrible about it, and he says he may have to cut off his employees if prices keep going up.

I want to say to this fine small business owner: Douglas, help is on the way.

Mrs. Linda Schumacher wrote—and this is the one I will close with in this series of stories:

I am a Republican.

Let me repeat what she writes:

I am a Republican, and my husband and I are small business owners. The Senators and Congressmen of both parties who are against President Obama's plan have their own insurance, and it is my understanding that it does not cost what we pay. They do not understand what a huge expense this is. Please listen to the middle class who are in our position or who no longer have insurance. It keeps me up at night worrying. This time the Republicans have it wrong, and they need to know. Please push the health plan. The insurance companies only care about the bottom line, not people.

I wish to say to Mrs. Schumacher: Thank you for putting aside party politics, because this isn't about Republicans and it isn't about Democrats and it isn't about Independents. It is about all of us together.

What happens now? We are hearing the polls, and the polls show Americans don't want us to act. I understand why. There has been so much misinformation. Senator DURBIN, our assistant majority leader, and I were talking about the misinformation that is on this floor from the other side day in and day out, and I believe much of it, if I might say, is purposeful. If you listened to my Republican colleagues over the past few days and weeks, they have trashed this bill and they have trashed the process. Over the weekend the Republican leader said health reform is a legislative train wreck of historic proportions. That is a direct quote.

Earlier this month Senator COBURN used more inflammatory language when he said to seniors—I am quoting Senator COBURN: I have a message for you. You are going to die soon.

If you want to know what fearmongering is, that is the best example I can give you.

I decided to go back and look at the past CONGRESSIONAL RECORDS. I thought: Have Republicans spoken like this over the years every time we have tried to do some health care, every time we have tried to make life better for people, such as Social Security? I will let you be the judge.

In 1935, on the floor of the House of Representatives during the debate on Social Security, Republican Congressman Jenkins of Ohio said—a Social Security bill, remember, which hadn't passed:

This is compulsion of the rankest kind. Do not be misled by the title. The title says "Old-Age Benefits." Shame on you for putting such a misleading and unfair title on

such a nefarious bill. Old age benefits? Think of it. Oh, what a travesty! . . . Mr. Chairman, what is the hurry? Nobody is going to get a dime out of this until 1942 . . . what is the hurry about crowding an unconstitutional proposition like this through the House today?

If you listen to some of my colleagues, you will hear the same thing. What is the rush? As a matter of fact, they had four or five amendments to send it back to committee. What is the rush?

The rush is that 14,000 people are losing their health care every day. The rush is that 62 percent of bankruptcies are linked to a health care crisis, and in 2016 our people will be paying almost half of their income for premiums. Yes. We have to do this, and we started it 7 months ago, and 100 years ago Teddy Roosevelt, a Republican President, put it in his platform. What is the rush? What is the rush?

I wish to tell my colleagues about another Republican Congressman, J. William Ditter of Pennsylvania. This is what he said during the debate on Social Security:

. . . security for the individual, whether worker or aged, will be a mockery and a sham.

This is what he said about Social Security.

And it will allot to our people the role of puppets in a socialistic State.

That is what he said back then. I tell you, if you ask Republicans who are getting Social Security, Democrats who are getting Social Security, Independents who are getting Social Security, they will all tell you the same thing: Keep your hands off it. It works. It is good. It is fair. It is insurance.

It is what we did way back then.

In 1965, when Medicare passed, health care for those 65 and up, Republican Senator Carl Curtis said:

It is socialism. It moves the country in a direction which is not good for anyone.

Years later, we know Newt Gingrich when he was Speaker of the House said he wanted to see Medicare "wither on the vine," his words.

In 1995, while seeking the Republican nomination for President, Senator Bob Dole said:

I was there in 1965 fighting the fight, voting against Medicare, because we knew it wouldn't work in 1965.

So when you hear our Republican friends say, Oh, my goodness, they are making a lot of savings in Medicare; this is bad for the seniors, please, please, which party has stood for protecting our seniors? It is not a matter of being partisan; it is just the fact.

The echoes of the past fill this Chamber.

I am convinced now in 2009 that hope and reason and determination and good policy will triumph over fear and obstruction and the status quo.

Let's look at the immediate and near-term changes for the better that

people are going to have, because our colleagues say: Oh, we are raising revenues but there are no benefits right away.

Let's talk about what the benefits are. There will be a \$5 billion high-risk pool immediately for people with pre-existing conditions who cannot find insurance. There will be reinsurance for retirees, so if you are retired and you are getting your health care benefit and something happens to your company, there will be reinsurance so you can still get your benefits. We close that doughnut hole for the Medicare recipients who fall into it and suddenly they cannot afford their prescription drugs. There will be billions of tax credits—billions—up to 50 percent tax credits for small businesses. That is why we have the support of so many small businesses. For new policies, no discrimination against children with preexisting conditions, and children can stay on their family's policy until they are 26 years of age.

What else are the immediate and near-term changes for the better? For new policies, no lifetime limits, no more rescissions. They cannot walk away from you when you get sick. They are required to cover essential preventive health benefits such as mammograms. It prohibits discrimination by employers based on salary of their employees. An employer cannot say: If you earn over \$250,000, you get these great benefits, but if you earn under \$50,000, you get a worse array.

By 2011, standards for insurance overhead costs go into place. If your insurance company spends too much on overhead and too much on executive pay, let me tell you what happens. They have to rebate to you, the policyholder. We also see increased funding for community health care centers. This is going to make a huge difference. There will be a national Web site to shop for affordable insurance. There will be a long-term care program that is voluntary into which you can buy. Insurance companies with unreasonable premium increases can be barred from the exchanges that will be set up in 2014. So they will be making sure they do not increase your premiums beyond a reasonable amount.

This bill will benefit the insured in one way—I do not think people understand this—by 2014, 62 percent of families will no longer face unsustainable premium costs. If you are a family of four and make less than \$88,000 a year, you will never have to pay more than 9.8 percent of your income on health insurance premiums. This is an amazing thing most people do not focus on. I just explained that the nonpartisan studies show—and this is important—that they will be paying, the average family, 45 percent of their income for health care. In 2014, people in this country will not have to pay more than 9.8 percent of their income on health

insurance; otherwise, they will get tax credits. That is very important.

This bill is going to benefit our seniors. That is why it is endorsed by the AARP. We eliminate the prescription drug coverage gap. That is the doughnut hole. We extend the life of the Medicare trust fund by 9 years. We reduce waste and fraud in Medicare. We provide for free yearly wellness visits for seniors. This bill saves Medicare. This bill makes our seniors stronger. They will have more benefits, and they can never lose their guaranteed benefits.

Small businesses will be able to reduce their costs, again, by getting immediate tax credits. In 2014, they will be able to access the exchange, as will self-employed people. They will have the power of big business behind them as they go into those exchanges.

I want to talk about public interest provisions. I wanted a public option, let me be clear, because I felt it would keep the insurance companies honest. But let me tell you what we have in here that are definitely public interest provisions. We expand Medicaid. That is a public plan to cover an additional 14 million people, and that starts in 2014. That is 1.5 million Californians. In my State, the Federal Government will pay the full fare for those added people for 3 years, and after that, far more than we get paid now. HHS will set the initial rules for the State exchanges. So those getting into the exchanges have to be fair. The OPM plan—that is the plan that will be part of the exchange—will be set up by the government, the Office of Personnel Management.

Again, community health centers. A basic plan can be created by the States, which I think is very important. I thank MARIA CANTWELL for working so hard on that issue.

If people tell you we do not have anything to do with public options, they are really not right. You have to look carefully at this bill.

I want to talk about the deficit. We reduce the deficit between 2010 and 2019 by \$132 billion, and between 2020 and 2029, there is up to a \$1.3 trillion deficit reduction, according to the Congressional Budget Office. That is a nonpartisan office. This bill reduces the deficit. I am going to say it one more time. This bill reduces the deficit. And the reason is, we invest in prevention, and that pays off. We finally will be able to say to the insurance companies: Stop your gouging. And that pays off. We do have competition now because we will have that special plan run by OPM, the State option MARIA CANTWELL put in there. This is why we see the reduction, including taking the fraud and the waste out of Medicare. We do not need fraud and waste.

Here is how I want to close. Health care coverage for all Americans has been such an elusive goal for nearly a

century. If you look at Republican Presidents, Democratic Presidents, Republican Congresses, and Democratic Congresses, we have tried it over and over again, and the status quo has always prevailed.

Our beloved friend, Senator Ted Kennedy, whom we miss so much, particularly during a time such as this, fought for health care right here on the floor from the moment he became a Senator in 1962 to the moment he died. In an op-ed in the Washington Post this past Friday, Ted Kennedy's wife Vicki wrote:

Ted often said that we can't let the perfect be the enemy of the good.

I want to say to Vicki, she is exactly right. Each of us could write this bill our way. Believe me, if I wrote a bill, to me it would be perfect. But to my friend in the chair, she would say: I can make it better. And all of us could. This is the legislative process. This is a good bill.

Vicki goes on to say:

The bill before the Senate, while imperfect, would achieve many of the goals Ted fought for during the 40 years he championed access to quality, affordable health care for all Americans.

He is not here to urge us not to let this chance slip through our fingers.

And she says:

So I humbly ask his colleagues to finish the work of his life, the work of generations, to allow the vote to go forward and to pass health-care reform now. As Ted always said, when it's finally done, the people will wonder what took so long.

I thank Vicki, not only for writing that wonderful editorial but for actually being in the Chamber when we took that first vote to break down this filibuster.

I say to my colleagues, I am so proud that today we are moving closer to fulfilling the promise of health care for all Americans, including the 40 million Californians I am so privileged to represent. I thank my colleagues for all the work they put into this bill. I spent a lot of time on it myself, and this moment is very poignant. I hope we pass it.

I yield the floor.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Madam President, let me begin by commending the Senator from California for an outstanding presentation regarding this legislation. I was listening to her in my office before I came over to the Chamber. I listened to her over here. She laid out in a very careful, deliberate, and thoughtful way the realities about this legislation before us. I thank her for a terrific presentation.

I wish to pick up a little bit where she has left off. But let me inquire so I understand where we are. How much time is remaining on the majority side?

The PRESIDING OFFICER. The majority side has 34½ minutes remaining.

Mr. KERRY. I thank the Chair.

Let me begin by saying I also listened to our colleagues on the other side of the aisle, particularly the Senator from South Dakota, just a little while ago. I was really struck by the chart they put up showing Medicare going up and up and up, and then they talk to Americans, basically scaring them, trying to say: If you pass this bill, it is not going to do anything to reduce the crisis in Medicare down the road.

The reality is, that is all they present, is the scary picture of a future which they are not even describing accurately. They have had a year and a half—a year and a half—that we have been working on this legislation, since it was announced in the Finance Committee, on which I serve, and we held a day-long—I think a 2-day long conference over at the Library of Congress and within the committee where we began the work, laying the groundwork and foundation for a new Presidency and for the work that has gone on this year. Many of their Members took part in that. So there is no secret here as to where we are.

This is a debate that has gone on in the United States of America since Harry Truman was President of the United States and before. We all know that President Teddy Roosevelt, a Republican, put before the country the notion that every American should be able to have their sickness dealt with.

Nobody has ever contemplated that you ought to go bankrupt in order to have health care. But, as we know, we have more bankruptcies in America—health care bankruptcies—every year than any other nation on the planet. I think we are the only nation that really knows health care bankruptcy. The stories we have heard—countless stories.

Earlier this morning—I guess to get my times correct—when we were here at 1 in the morning, we heard the majority leader talk about those very poignant, moving situations of individuals in Nevada. We heard the Senator from California. There are stories from every Senator, from every State. Yet it is only this dividing line, right here down the center of this Chamber—it is only the Senators on this side of that dividing line who seem to be prepared to try to address this issue. The fact is, the managers' amendment, which is now the pending business before the Senate, brings us even closer to being able to address many of the major concerns we have.

Senator after Senator has come to the floor and described the way in which this bill does not do everything we want it to do. I have been a passionate supporter, as was Ted Kennedy and a lot of our colleagues, of a public component of this plan. Why? Because I believe that is the best way to create the kind of competitive pressure that

will restrain a group of insurance companies that have shown no predilection to restraining themselves over these past years.

If you are for the status quo, then you will vote no, the way our colleagues have voted. But the American people are not satisfied with the status quo. People in America understand that health care costs are breaking the backs of families. They are breaking the backs of businesses. They are a huge albatross around the neck of American competitiveness.

Many of our companies have a harder time competing because there is a health care premium tax, if you will, for the uneven distribution of being sick in America. Obviously, if you are sick in America, you get care at some point in time. It may well be that point in time is when you are on your deathbed or when you are so sick that you finally go into the hospital, into an emergency room, and the emergency room becomes your first contact with the medical system or it becomes your primary care facility. We have almost 50 million Americans for whom that is true—50 million Americans who don't have health care. So they do not get an early screening, they do not get an early determination of what may be wrong with them. They do not get what somebody who has a health care plan gets, which may be a mammogram or a Pap smear or a PSA test for prostate cancer, or any number of evaluations, perhaps early detection of diabetes.

We spend almost \$100 billion in the United States for unnecessary dialysis and/or amputations that take place because people weren't able to go to a doctor earlier and learn that they had a type of diabetes that might have been able to be treated in a far less expensive and dramatic and personally costly way.

The word "history" gets thrown around in the Senate probably more than it ought to. We often refer to something as being historic, where sometimes it is a reach. There is no question that we are on the threshold of an unbelievably historic moment in the Senate. This is history we are living here now.

When I think of what we tried to do in 1993 and 1994, when President Clinton was in office and we tried to pass health care—we got beaten back by false advertisements—Harry and Louise—scare tactics, and I might add a plan that didn't quite pull the pieces together as effectively as we have. We have learned a lot of lessons since then. We have had many fits and starts, with children's health care, portability, and trying to deal with certain gender discrimination or other discrimination within the systems. We have gotten little pieces done. But all the time, the basics of the system have been without the reform necessary to bring down costs and make health care more accessible to more Americans.

So I have no doubt we are reaching a moment of historic importance here. This is a moment where we are going to finally provide access to almost all Americans. Thirty-one million Americans are going to gain health care coverage through this legislation when we pass it, and that will bring us up to 94 percent.

To give an example, in Massachusetts, where we passed health care reform a couple of years ago, we mandated that everybody be covered and we created a penalty for companies that don't offer the insurance, but we have a pool that helps provide coverage to people who can't afford it. We now have 97.6 percent of all our citizens covered in the State of Massachusetts. The fact is the premiums in the individual market, which is where it is most expensive for Americans to go out and buy health insurance, went down by 40 percent. The premiums went down by 40 percent in Massachusetts for a quality of care that people love. The premiums in the rest of the country went up 14 percent. That is a 54-percent spread in the cost of premiums between those who got health care reform and those who did not.

That is precisely what we are going to be able to provide Americans—beginning to provide Americans with this. One of the reasons we can't provide it as effectively as in Massachusetts is because there are certain things we do in Massachusetts that the other side, or some folks, have prevented us from being able to do here.

Let me sort of lay it out here. There are a couple of things that bother me about this. We keep hearing from our colleagues—and I heard this from the Senator from South Dakota—that we are not going to be able to save money in the legislation we are going to pass. In fact, nothing could be farther from the truth. All of us know, as a matter of common sense, that many of the measures in this legislation are going to reduce the cost of health care, and one of the reasons is that the CBO analysis is generally limited to the Federal budget. It doesn't attempt to account for savings in the health care system that come from policies that are implemented through reforms.

For example: The CBO found only \$19 billion in government savings from transitioning toward post-acute bundled payments in Medicare. But recent research in the *New England Journal of Medicine* suggests that bundled payments—bundled payment, for somebody listening who doesn't understand, is when you take all the payments that come to a hospital or to the providers who provide the care, and the payments are all put together for the various services that you get and they have to decide how to provide you those services in a cost-effective way based on the whole universe of money that has been put on the table. It is dif-

ferent from what we do today, where we don't bundle it and say: Take care of this patient, and all of your various parts have to fit into a whole. Today, we pay each of the separate parts without relationship to what their connection is to the total care of a patient. It is unbelievably wasteful, ineffective, sometimes redundant, it is noncommunicative, and that is one of the reasons why in America we don't get the same outcomes for less money that people get in Europe or in some other countries.

But we have learned from the *New England Journal of Medicine*, which is a highly respected medical journal, that the bundled payments for chronic diseases and for elective surgeries could reduce health care spending by as much as 5.4 percent from 2010 to 2019. Yet we don't credit for that savings. They do not talk about it. But common sense tells us, because we have seen it where they have done these bundled payments, that you are going to reduce the costs.

In addition, even if such savings only applied to half of the spending in the health care sector, the result would be more than \$900 billion of savings over the next 10 years. If bundled payments get expanded beyond the post-acute care, and even half of the potential savings from bundled payments were realized in the Medicare Program during the upcoming decade, these savings would translate to an additional .2 percent of savings per year or reduction in program expenditures, and that would be more than \$190 billion between 2010 and 2019.

I have talked about \$1 trillion—\$1 trillion—of savings that does not even get formally presented to the American people as part of this process because of bureaucratic technical rules about what the budget applies to. Everybody on the other side of this aisle knows, as a matter of common sense, if you look at the experience, the way it has already been proven in the marketplace, and if you apply your thinking to this, we are going to reduce the cost of health care.

Similarly, large reductions in Federal health care expenditures are plausible from the combination of other delivery system reforms. A lot of Americans aren't aware of this, but here is what we have. Accountable care organizations. We don't have that today. Suddenly, we are going to have an accountability in the care organizations delivering service. That is going to provide savings.

We have incentives to reduce hospital-acquired infections. One of the biggest single fears people have today in America when they go to the hospital is that they are actually going to get an infection in the hospital, and the chances of coming up with a staph infection or some other kind of infection are very real and very high. There

are actually different practices between different hospital operations. I happen to know this on a personal basis because my wife recently had an operation in one hospital system and they had a certain procedure to try to deal with the MRSA infection, and a certain washing and disinfection process you went through, and I know other hospitals where they do not do the same thing.

In addition, we are going to have health information technology reform adoption. There is going to be administrative simplification that would standardize and streamline insurance paperwork. I mean, if you go to the ATM machine and pull out some money, it is about a penny or half a penny per transaction. If you go to the hospital, where they do not have technology managing the records and people are doing it, it is about \$20 to \$25 per transaction to pull the records. In the age of computerization and information technology, it doesn't make sense, and all of us know that. But we also know that because we are putting money on the table and incentives in place to help do that, we are going to be able to get additional savings; all of the savings that are on top of the \$1 trillion of savings I have already talked about, and none of which gets measured when our colleagues come to the floor to say what a terrible bill this is.

CBO has also grossly underestimated savings in the past. I am not picking on CBO. They have had an incredibly hard job, and they have done an incredible job. They have been completely overworked on any number of efforts, where we have been asking for models and analyses. But it is automatic in a process that you are going to lose some things.

According to the Generic Pharmaceutical Association:

In 1984, it was predicted that the Hatch-Waxman Act would save our country \$1 billion in the first decade. Now, generic medicines save more than that every three days.

Every 3 days we do what was predicted to happen in savings every 10 years. In the mid 1990s, the Congressional Budget Office released an analysis showing that in 1994—the tenth anniversary of the Hatch-Waxman Act—annual savings of generics had reached approximately \$8 billion to \$10 billion. The new data released showed that by 1999—15 years after Hatch-Waxman became law—generics were generating \$49 billion in annual savings. In the last decade alone, generics have saved consumers, businesses, State and Federal governments \$734 billion.

I haven't even talked about the wellness provisions or the prevention provisions that are in here. When we start getting all of America more tuned in to the things we can do to prevent diseases by taking actions in our lives, our lifestyles, in our diet, and

any other number of things, we can bring the cost of health care down in America.

We keep hearing about the secrecy and how this legislation has been hidden from folks for a long period of time. Again, that is not true. There is nothing in this legislation that we haven't been working on or talking about or wrestling with in committee, out of committee, in hearings, in the public debate for over a year now. If the minority had taken a little less time to have press conferences and spending their time doing news conferences denouncing what they hadn't analyzed, they would have a better sense they might have been able to read the managers' amendment on the Internet for over a month—excuse me, the managers' amendment was on the Internet on Saturday, and many of us looked at it, because many of us have worked on provisions and we wanted to make sure they were in there. It wasn't hard to read it to see what was and wasn't included in it. In addition, the underlying bill has been posted on the Web for over 1 month.

But the fact is the minority has made a fundamental political calculation here. They do not want to work with us. In all the time we were in the Finance Committee trying to mark it up, we never had people come to us—as I often have here in the 25 years I have been here when you are legislating seriously—and say, hey, if you include this or if you work this a little or if you tweak this, I think I could support this bill. There is just a fundamental political divide, a fundamental philosophical divide. We are looking at a party whose opposition to health care for Americans is not new. My colleague from California talked about it a few minutes ago. In 1935, they tried to kill Social Security and succeeded in preventing health care from being included in the bill at that time. They argued in 1935 the same thing they argue now.

Madam President, may I ask how much time we have?

The PRESIDING OFFICER. The Senator has consumed 20 minutes.

Mr. KERRY. How much time do I have?

The PRESIDING OFFICER. The majority has 15 minutes remaining.

Mr. KERRY. And is that predesignated? Is the 15 minutes remaining predesignated, Madam President?

The PRESIDING OFFICER. Not by order.

Mr. KERRY. Madam President, in fairness, I was not aware; I thought I had the full amount of time, but I do not. I want the Senator from Connecticut to be able to share his thoughts also. Let me just say, and I will wrap it up here, that the insurance industry, which they sought to protect, survived the passage of the Social Se-

curity Act. In 1965, we passed Medicare. Medicaid came afterward. They opposed it. They opposed Medicare, one of the most important programs in the United States of America, that lifted countless numbers of seniors out of poverty. They said no. The insurance industry survived Medicare and Medicaid. They are doing very well.

According to CBO, the gross cost of the managers' amendment is, over the next 10 years, \$871 billion—less than the \$1 trillion we started with in our committee. But it buys a lot. I will talk at some time, perhaps tomorrow or afterward, about what this bill provides in addition. But I think it is critical for people to follow the truth, to look for the facts, and to measure the reality of the positive ways in which this legislation will provide additional help to seniors, will reduce premiums for many Americans, will help people afford coverage who do not have it today, will spread risks throughout the system more effectively, will improve care and delivery within the hospitals, will prevent people from being denied insurance if they have a preexisting condition, will prevent them from being kicked off insurance they paid for and thought they had when they get sick and they suddenly get that letter that says: Sorry, you are not covered anymore, and families go bankrupt—that is over. That alone is an enormous step forward for this country.

CBO has underestimated savings before.

According to the Generic Pharmaceutical Association . . . “In 1984, it was predicted that the Hatch-Waxman Act would save our country \$1 billion in the first decade. Now, generic medicines save more than that every three days.”

In the mid 1990s, the Congressional Budget Office released an analysis showing that in 1994, the 10th anniversary of the enactment of Hatch-Waxman, annual savings from generics had reached approximately \$8 billion to \$10 billion.

The new data released showed that by 1999—15 years after Hatch-Waxman became law—generics were generating \$49 billion in annual savings.

In the last decade alone, generics have saved consumers, businesses, and State and Federal Governments \$734 billion.

According to a December 14 report by the President's Council of Economic Advisors: CBO's analysis is generally limited to the Federal budget, and does not attempt to account for savings in the health care system more broadly from policies implemented through reform. For example, the CBO found only \$19 billion in Federal Government savings from transitioning toward post-acute bundled payments in Medicare. However, recent research published in the New England Journal of Medicine

suggests that bundled payments for chronic diseases and elective surgeries could reduce health care spending by as much as 5.4 percent from 2010 to 2019. Even if such savings applied to only half of spending in the health care sector, the result would be more than \$900 billion of savings over the decade. If bundled payments were expanded beyond post-acute care and even half of the potential savings from bundled payments were realized in the Medicare program during the upcoming decade, these savings would translate to an additional 0.2 percent per year reduction in program expenditures, or more than \$190 billion between 2010 and 2019.

Similarly large reductions in Federal health care expenditures are plausible from the combination of other delivery system reforms, including: Accountable care organizations, incentives to reduce hospital-acquired infections, health information technology adoption, and administrative simplification that would standardize and streamline insurance paperwork. This will help cut down on the \$23–\$31 billion time cost to medical practices of interacting with health plans and their administrators.

Another potentially significant cost saver within the Senate bill is the Independent Medicare Advisory Board—IMAB. The IMAB would recommend changes to the Medicare program that would both improve the quality of care and also reduce the growth rate of program spending. The CBO score of the Senate bill estimates that the IMAB would reduce Medicare spending by \$23 billion from 2015 to 2019, with the savings likely to continue in the subsequent decade. The IMAB has the potential to increase the savings from many of the delivery system reforms described above, which may not be fully captured by the CBO estimates for the reasons previously mentioned.

Taken together, the combination of Medicare- and Medicaid-related provisions in the Senate's Patient Protection and Affordable Care Act are estimated to reduce the annual growth rate of Federal spending on both programs by 1.0 percentage point in the upcoming decade and by an even greater amount in the subsequent decade. These savings would increase national savings and improve the long-run performance of the U.S. economy.

The PRESIDING OFFICER. The Senator from Connecticut is recognized.

Mr. LIEBERMAN. Madam President, I rise to declare and explain my support for the Patient Protection and Affordable Care Act. First, I commend Senator REID and all those who worked so long and hard, including my friend and colleague from Connecticut, Senator DODD, for all they have achieved in this legislation. The truth is, no piece of legislation, as significant and

complicated as this is, could possibly be totally satisfying to every one of us. In the end, each one of us has to ask ourselves: Do the positives in this legislation substantially outweigh the negatives? Are the things we like in the bill greater than the things that worry us? For me, the answer to both these questions is yes, because this bill makes real progress on the three important goals I have had, and I think most people have had, for health care reform.

First, most of us have wanted to stop the continuous increases in the cost of health care that burden every individual, family, business, our Government, and our economy. Second, we have wanted to regulate insurance companies to provide better protections for consumers and patients. Third, we have wanted to find a way to make it easier for millions of Americans who cannot afford health insurance today to be able to buy it tomorrow. I believe this bill makes real progress in achieving each of these three goals. Most importantly, it does so in a fiscally responsible way.

The Patient Protection and Affordable Care Act not only does not add to our national debt, through new health care delivery reforms it will help reduce the debt by \$130 billion over the first 10 years, according to the independent Congressional Budget Office. That figure could multiply many times over during the second 10 years, thanks, in part, to the managers' amendment that incorporated stronger cost-containment proposals that several of us, across party lines, made to Senator REID.

In addition, it is very significant that, according to the Actuary at the Center for Medicare & Medicaid Services, this bill will extend the solvency of the Medicare trust fund for an additional 9 years. This act will also take substantial steps toward creating a health care delivery system that pays for the quality of the care patients receive rather than the quantity of care. I am proud to have worked with Members of both sides of the aisle to include amendments that would do that.

For instance, Senator COLLINS and I introduced an amendment, parts of which were included in the managers' package, that will enhance transparency for consumers so they can make more informed decisions in choosing their health care providers and insurers. In fact, our amendment will create Physician Compare, a new Web site where physician quality measures that exist now but are not known by the rest of us will be posted for everyone to see and to use in the choice of physicians. This will also create incentives, we believe, for doctors to provide high-quality, more efficient care.

I also cosponsored an amendment introduced by Senator WARNER and some other freshman Senators that will con-

tain costs even more. This amendment creates prevention programs to help us understand how to effectively manage chronic diseases such as diabetes, and it requires prescription drug plans under Medicare Part D to offer medication therapy management services to beneficiaries so they can better adhere to their prescription treatments. All that is progress on the first goal that I and most others had, which is to reduce the cost of health care without compromising—in fact, improving—its quality.

The second goal. If this bill passes, insurance companies, as Senator KERRY said, will not only not be able to deny coverage if an individual has a preexisting condition, they will not be allowed to rescind coverage if you become sick, which is the outrageous reality today. Thanks to changes made by the managers' amendment, insurance companies will also be required to spend more of the premiums they collect on medical expenses for patients rather than on administrative costs and profits. That is real progress on the second goal I mentioned.

As for the third goal, the fact is attested to by the CMS Actuary and CBO, 31 million more Americans will be able to have health insurance as a result of this legislation. We say that so often I think we forget the power of it—31 million people who do not have health insurance today will have it after this bill passes. That is a giant step forward for our society. It is not only the right thing to do, but it will also eliminate the so-called hidden tax that each of us who has health insurance today pays in higher premiums when someone who has no health insurance gets sick and goes to the hospital to be treated. That is real progress on the third fundamental goal of health care reform that I mentioned.

Is there anything in the bill that worries me? Of course, there is. I would say, most of all, I worry that we, and future Congresses, will not have the discipline to keep many of the promises we have made in this bill to control costs by transforming the way health care is delivered because some of these reforms are controversial and they are going to be opposed by some health care providers and health care beneficiaries. Without the kind of discipline I have just mentioned, this bill will add to our national debt or increase taxes. Neither of those results is acceptable. If we stick to the contents of the bill, this bill will cut health care costs and it will reduce our national debt.

In my opinion, our exploding national debt is the biggest domestic threat to our country's future. That is why I have said this bill must reduce that debt, not increase it. Accumulated debt is currently over \$12 trillion, with our budget office estimating an additional \$9 trillion added in the next 10

years. That is unprecedented in our history. We are running up to the time when we can see a moment possible that we never thought would be possible, when our capacity as a nation to borrow will be imperiled, when we will have to raise interest rates so high it will constrict our economy and send us back into a recession, worse than the one we are coming out of now.

We cannot bring the fiscal books of our Government back into balance by only making the health care system more cost efficient, but we will never control our national debt without doing so. Medicare is in a particularly perilous condition today. Without reform, the Medicare trust fund will be broke in 8 years—broke. With tens of millions of baby boomers reaching the age of eligibility, we simply must protect Medicare so it remains a viable program for both current and future generations.

This leads me to my firm opposition to the creation of a new government-run insurance program and to lowering the age of eligibility for Medicare to 55 years. That opposition was rooted in my very serious concerns about our long-term national debt and the fragile fiscal condition of Medicare. For any new government-run insurance program, including the Medicare extension-expansion idea, the moment premiums do not cover costs the Federal Government—that is Federal taxpayers, the American people—would have to pay the difference. That could easily put our Federal Government and the taxpayers on the hook for billions and billions of dollars in future liabilities and further jeopardize the solvency of Medicare.

Because of the insurance market reforms in this bill and other measures—the creation of a new system of tax credits and subsidies for people making up to 400 percent of poverty—the creation of a new government-run health care, the so-called public option or the expansion of Medicare to people under 65 is not necessary. Neither proposal would extend coverage to one person who will not be benefited by the new provisions of this bill, neither the public option nor the expansion of Medicare. Yet both proposals would, in my opinion, lead to higher premiums for the 180 million people who have insurance today and are struggling to afford the health insurance they have now because of cost shifting.

According to studies by the CBO, a new government-run insurance program, a public option, would actually likely charge higher premiums than competing private plans on the exchange, and expanding Medicare to cover people 55 years or older would lead to additional cost shifting.

I know the removal of the public option from the bill in the Senate disappointed and angered many Members of the Senate and the House, while I

know it pleased and reassured others. I wish to say to those who were not happy about the removal of the public option from this bill that I believe President Obama never said a public option was essential to the reform goals he set out to achieve and that most of us have. When the President spoke earlier this year to the Joint Session of Congress, he said a public option is "an additional step we can take." An additional step, he said, but not an essential one. Then, he added, "The public option is only a means to that end." He concluded that we should remain "open to other ideas that accomplish our ultimate goal."

I am confident this bill accomplishes the goal the President and most of us set out to achieve without the creation of a brand-new government-run insurance company or the further weakening of Medicare. This bill, as it appears it will emerge from the Senate, is delicately balanced. I understand the normal inclination in a conference committee with our colleagues in the House is to split the difference. But splitting the difference on this bill runs a real risk of breaking the fragile 60-vote Senate consensus we have now and preventing us from adopting health care reform in this Congress.

That would be a very sad ending. Rather than splitting our differences, I hope the conferees will adopt our agreements so we can enact health care reform this year. The rules of the Senate require 60 votes to end debate on a conference report.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. LIEBERMAN. I ask unanimous consent for an additional moment, maybe 2 moments, to complete my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LIEBERMAN. Each Member of the Senate will have to decide once again when this bill emerges from the conference whether he or she wants to be one of the 60 votes necessary to take up and pass the conference report. In this case my own sense of the Senate is the same as that expressed in the last few days by Senators CONRAD, NELSON, and others. If significant changes are made to the Senate bill in conference, it will be difficult to hold the 60 votes we now have. I have two priorities that will matter a lot to me. The first is to continue and maintain the health care reforms that will improve the cost-effectiveness of our health care system and help reduce the national debt. Second, I hope there will be no attempt to reinsert a so-called public option in any form in the conference report. That would mean I will not be able to support the report.

I want to support it. I believe I am not alone in that opinion among the 60 who supported the bill last night. Our exploding national debt is the biggest

threat to our Nation's future. That means we must begin to make politically difficult decisions to reduce our debt. That means saying no to some groups and some ideas, including some we would otherwise support, because we simply cannot afford them.

A final hope about the conference report. Perhaps some will say it is naive. I hope the conferees will find a way to produce a report that can be supported by some Republican Members of the Senate and House. It is a sad commentary on this moment in our political history that so major a reform will be adopted with no bipartisan support. Hopefully the conference will find a way, difficult as I know it might be, to conclude this long legislative journey with a bill that is not only worth supporting, as I believe the Senate bill now surely is, but also engages the support of Members of both parties.

I yield the floor.

Mr. ENZI. I ask unanimous consent that our time be extended in the same amount as their time was extended.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ENZI. I yield myself 15 minutes.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. ENZI. Mr. President, the majority has voted to cut off further amendments to this bill. Senator REID has used a procedural tool that prevents Republicans from offering amendments. Several of my Democratic colleagues have come to the floor to argue that Republicans don't have any ideas on how to improve the bill. Nothing could be further from the truth. Republicans have filed over 200 separate amendments. Yet the majority is refusing to allow us to vote on any. On a bill that will affect the health care of every American and one sixth of the Nation's economy, the majority has not allowed us to have more than 10 votes to try to improve the bill.

This bill needs to be fixed. We know this bill currently will cut Medicare, raise taxes, and increase insurance premiums. If we had the chance to offer amendments, I believe we could make changes to fix the problems. I filed nine amendments, but I have not been allowed to offer any. I believe any reform should reflect the following core principles: reducing health care costs so that all Americans get the quality, affordable care they need, ending discrimination based on preexisting conditions, ensuring everyone has access to at least catastrophic care, preserving the right of patients to choose the doctors and health insurance plans that meet their needs, eliminating junk lawsuits and reforming our medical liability system, reducing health care costs for all Americans, improving patient safety, encouraging incentives for healthy behaviors by allowing insurers to charge low premiums to people who eat healthy, exercise regularly,

and abstain from tobacco use, protecting Medicare for seniors by ensuring that any savings found in Medicare, a program that is going broke, are used to strengthen that program, not to create new entitlements, and helping all Americans afford health care coverage by fixing the flawed Tax Code so that all Americans can get tax benefits for purchasing health insurance.

Unfortunately, the bill fails to do these things. I know most Members agree on those principles for reform. The hard part is making the principles come to life by translating them into bill language. I did that a few years ago when I introduced 10 steps to transform health care. Once the bill was introduced, I went on a tour of Wyoming in March of 2008 and hosted town meetings to talk about health care to my constituents. Some of the ideas I included in my 10 steps plan I also filed as amendments to the Reid bill. We need to end discrimination based on preexisting conditions. No one that has at least catastrophic coverage should be denied coverage for a preexisting condition. Everyone should have catastrophic coverage, but no one should be forced to buy anything. If someone does not at least have catastrophic coverage, then they should have to pay more if they want coverage in the future.

Everyone should get the choices for health care that Senators get. Senators get to choose between competing private plans. So should all Americans. Senators get the same choices as any other Federal employee. No more, no less. The janitor in the building, the mailman, the forest ranger, we all get the same choices. All choices are from private insurance. The Federal Government does not have its own plan. Like other employers, the Federal Government does pay part of our health care, but not all of it. Our choices allow us to pick a plan with a higher premium at a lower deductible or a plan with a lower premium and a higher deductible. Everyone should have these same choices, but they would have to work for a company willing to make a contribution to be personally willing to make that contribution and pay the remaining premium and deductible.

No matter how the health care reform bill comes out, there will not be free insurance. Everyone will pay something. The amount we pay should have a relationship to the choices we make. Insurance costs will only come down if we are encouraged to make the best choices.

Speaking of choices, there is no reason shopping for health insurance should be any more complicated than purchasing an airline ticket. Everyone should be able to fire up their computer and look up health insurance options as they look up airline flights. Each State should set up a Web site or an exchange where consumers can find

the listing of all the health insurance plans sold in their State. The public should be able to pick their health insurance using the information on the Web site. Each health plan would list what is covered, the premium, the deductible, and the copay, not what Washington says they have to put on there. Every insurance company should be allowed to list their plan on any exchange, and the State could certify whether the plans meet the minimum requirements and whether subsidies could be used for those plans. There could also be ratings for how well the company provides for its insured customers, but people could buy from any company, having been warned.

Everyone could use the transparencies of the exchange to find the insurance that best suits them. Transparency would also bring the costs down. Another thing that will bring down cost is changing the system from one that provides sick care to one that provides health care. One way to do this is to focus more on preventing preventable diseases. We know that incentives to encourage changes in behavior can result in lower costs for patients and employers. We know this because 70 percent of all health care costs are driven by behaviors. If you provide incentives to change those behaviors, you have a potential decrease in cost of 70 percent of all of the health care costs for an organization.

Companies such as Safeway have designed plans that focus on personal responsibility and provide targeted incentives that lead to behavior changes that can reduce the risk of developing four of the most costly chronic conditions. Safeway's model, focused on four chronic conditions, can be attributed to 75 percent of all health care costs: Cardiovascular disease, which is 80 percent preventable; cancer, some types are 60 percent preventable; type 2 diabetes, which is 80 percent preventable; and obesity. As a result, Safeway has seen their health care costs remain flat over the past 4 years, while other employers experience annual cost increases as high as 6.3 percent. This is a huge accomplishment for Safeway and its employees, and the employee satisfaction is fantastic. Senator HARKIN and I had an amendment that would do that. It was inserted into the HELP Committee bill and then pulled out without talking to us before it was printed in September. Never heard of that being done to Senators before.

Health care reform legislation should include the necessary provisions to ensure that companies can continue to provide successful prevention programs that lead to better health and lower costs but also allow those programs to be replicated across public and private health programs. We should encourage these programs and allow people to reap the benefits of better health outcomes and lower health costs. Addi-

tionally, people who smoke should have to pay more. People who don't smoke should pay less. People should be encouraged to quit smoking, start exercising, and eat healthy. To put it simply, allow folks who follow healthy practices to pay less for their health insurance.

People should be able to buy insurance across State lines. Companies should be able to sell insurance anywhere in the United States. Policies should be listed on the State exchanges with a disclaimer stating the policy is an out-of-State policy. The exchanges would also say whether the policy meets minimum credible standards according to Washington and the State. Insurance commissioners in both the insurance company's State and consumer's State, each get their usual amount for the sale—originators, because they can be consulted, and purchaser State, as they have to handle complaints.

We need to help small businesses. I have been working on health care reform for some time. Small business owners are seeing their insurance premiums go up and up every year. They need real help. What they don't need is for the Federal Government to make their insurance even more expensive. CBO says the Reid bill will drive up insurance costs for small businesses. I have proposed a bill that CBO scored as saving small businesses money by lowering their health insurance premiums by up to 6 percent.

Small business health plans allow businesses to join together through their trade association across State lines even nationwide so they can form big enough purchasing pools to effectively negotiate with the insurance companies and providers. Ohio has enough people they were able to do this within their State. It is effective. It brought down the cost of health care. They were able to save 23 percent just on administrative costs. They were sure if I could get my bill through, they would save even more by going across State borders. That is one that has been in the lab. It has been proven to work. Not in the bill.

Small Business Health Plans, which was S. 1955, drafted by myself and Senator NELSON of Nebraska, former Governor and insurance commissioner, was voted out of the committee in March 2006. On May 2006, cloture on the bill was not allowed in the Senate by a vote of 55 to 43. I know how tough health care reform is to pass. I had a majority of the votes but not enough to begin debate. At the same time, Senator SNOWE was poised to do a single amendment that would have solved the objection for 80 percent of those who voted against it. Without cloture, that amendment could not be offered. The Snowe amendment would have solved the question of what health plan mandates would be required. The desire for

mandate clarification was the objection that had the disease groups working against the bill. The insurance companies worked against the bill and successfully defeated other versions called associated health plans for over a decade. I was able to neutralize much of the insurance lobby.

By creating Small Business Health Plans, we can put small business owners in the driver's seat instead of the Federal Government or insurance companies. Through their associations, small business owners will have the kind of clout in the marketplace needed to negotiate high-value and high-quality health insurance for their members on a regional or even national basis.

Additionally, throughout the health care debate, we have heard Democrats say we need a public option in order to keep insurers honest and to have more choices for Americans. However, the only place where we don't currently have competition is for the millions of Americans who are currently trapped in the Medicaid Program. Democrats believe it is OK to lock 54 million poor American people into Medicaid and have them languish in a system that is broken and they are unwilling fix. Their solution is to keep adding more Americans to this broken system. A 2007 Wall Street Journal article stated that Medicaid beneficiaries have poorer health than their peers with private insurance. A study published in the Journal of the American College of Cardiology found that Medicaid patients were almost 50 percent more likely to die after coronary artery bypass surgery than patients with private coverage. Merritt Hawkins found that in 15 major metropolitan areas and in seven particular cities, including Washington, DC, Medicaid acceptance was below 50 percent.

A 2002 MedPAC report stated that 40 percent of physicians—let me repeat that: 40 percent of physicians—will not treat Medicaid patients because of their concerns about reimbursement and the time and added cost of completing the billing paperwork. Even the Office of the Actuary at the Centers for Medicare and Medicaid Services has stated that providers will accept more patients with private insurance than government-run health care due to the more attractive private physician payment rates. If you cannot see a doctor, you do not have insurance, no matter what the special name.

As we increase dramatically the number of people eligible, we should find a way to offer them regular insurance so they do not have the stigma of being on Medicaid. They should be able to choose between the usual Medicaid and a private policy with a subsidy.

Unfortunately, the Reid bill expands Medicaid, and the reason is because it is cheap. According to the Congressional Budget Office, it costs 20 percent

more to cover a person in the exchange, funded by Federal dollars, than through Medicaid, which is shared between Federal and State governments.

One of my amendments would change all of this. Senators and their staffs all have the ability to choose between competing private plans, and I believe we should give that same kind of choice to low-income Americans. Instead of trapping people in a broken Medicaid Program, my amendment would provide individuals who would otherwise be enrolled in Medicaid through the expansion in this bill the right to choose to be covered by Medicaid or a qualified private health plan offered through their State exchange. Every American should be able to choose to enroll in private insurance, and my amendment would provide real choice access to a network of physicians and fix this problem. It would also assure them they would have coverage for an entire year, not just while their income fluctuates.

On the topic of expanding government programs, I would also like to mention that if you save money in Medicare, it should only be used to help Medicare because it is already going broke. The current bill takes money from Medicare and uses it for other government programs. This bill takes \$466 billion from Medicare and uses it to start new entitlements that have nothing to do with Medicare. Yet they start a new commission to figure out where to make additional Medicare cuts in order to keep the system going—doesn't that seem counterproductive—after limiting where the cuts can come from because of hidden deals to get support for the bill.

Whatever we do has to reduce costs for all individuals and be deficit neutral. It has to truly be paid for. Why does it have to be paid for? Because America is going broke. We have maxed out the credit cards, and now we are driving down the value of our money. We have to use honest cost, not gimmicks such as the doc fix delay or collecting revenues before the benefits kick in and showing years of revenue for a shorter time benefit.

What ways can the government pay for anything? Unfortunately, they can cut benefits, cut payments to doctors and other providers, increase taxes, or cut waste, fraud, and abuse—which government seldom does and even more seldom does effectively—or, more honestly, allow a checkoff for donations to other people's insurance—perhaps even a tax-free donation—so people who want a bigger role in seeing that everybody has insurance could directly participate. People who argue that it is imperative we extend health benefits to everyone should put their money where their mouth is. People should have an opportunity on their income taxes to make an instantly deductible gift to the health care of others. If the

deductible size of the gift is a refund, then they would not have to include a check.

On the subject of taxes, taxes have to be fair to everyone. Right now, big companies can write off the health care they provide their employees, so those employees are getting health care with zero income tax. Individuals who buy insurance pay income tax on all the money they use to buy insurance. That is not fair.

I have covered just a few of the ideas I have. I have several more ideas I have been talking about time and time again, none of which show up in the bill. These meet the promises that were made. The bill does not meet the promises that were made.

Health care is too complicated and encompassing to be done by a single bill. I have never worked on a bill that affects 100 percent of America. Adequately done, rather than assigning details to agencies, a comprehensive bill has to contain details. Assigning the tough parts to the Secretary of Health and Human Services makes it easier to legislate, but you don't know what the final outcome will be. Done in smaller incremental steps, the bill would be more understandable. More importantly, with the huge, more comprehensive bill, the more people who each don't like a particular part will defeat the whole bill over a few parts.

We need to start over. We need to pursue a step by step, bipartisan, approach. We need to match up a Republican idea with a Democrat idea. We need to leave out a Republican idea and leave out a Democrat idea. Pursuing this type of strategy, what I call the 80-percent rule, would likely mean broad support from both sides. This would mean that the rigid ideologies of both sides would oppose such a bill, but I am confident that majority of the American people would support a bill like this.

We need health care reform, but it has to be done the right way. The best way to reform our health care system is to do it step by step. We need to start by focusing on the issues where we already have broad, bipartisan agreement.

I know how to pass bipartisan legislation. Since I came to the Senate 13 years ago, I have worked with both Democrats and Republicans to reform our Nation's health care system. Over my years in the Senate, there have been several times when I have worked across the aisle to get health care bills signed into law.

When I joined the Senate, the Health, Education, Labor, and Pensions Committee was one of the more contentious committees. I believe that people can agree on 80 percent of the issues 80 percent of the time and, if they leave the other 20 percent out, they can get a lot done. With that in mind, Senator Kennedy and I worked to make it one of

the most productive and bipartisan committees, with a substantial number of bipartisan bills signed into law each year.

Whether it is the reauthorization of the National Institutes of Health or the renewal of the Ryan White and PEPFAR programs for people with HIV/AIDS here and abroad, I am committed to working across the aisle on issues of importance. Working together, we got patient safety, mental health parity, and genetic non-discrimination legislation over the finish line. These proposals had been pending for years. We were also able to have a strong bipartisan bill to overhaul the drug safety functions at the FDA. By working together, instead of against each other, we can achieve passage of many more pieces of critical legislation.

Everyone agrees we need real changes that will allow every American to purchase high-quality, affordable health insurance. Not a single one of my Senate colleagues on either side of the aisle supports the status quo. The argument that Republicans support the status quo is simply false. We understand that the current system fails too many Americans. We want to support reforms that will provide real insurance options to all Americans and help lower the cost of that insurance.

But I have said from the start of this year, and frankly throughout my 13 years in the Senate, true reform should be developed on a bipartisan basis, so that the legislation will incorporate the best ideas from both sides and will have the broad support of the America. That should be a prerequisite for any proposal that will affect the nearly 20 percent of our Nation's economy and the health care of every American.

We have only had 10 votes on Republican amendments. It is not because Republicans agree the status quo is acceptable or because we think the health care system works fantastically; quite the opposite. Republican Members have filed 223 amendments to this bill. Unfortunately the majority leader has blocked us from offering our amendments.

This bill is too important to get wrong. We need the opportunity to improve this bill, and I would urge my colleagues in the Democrat leadership to allow us the opportunity to do so.

Madam President, I ask unanimous consent that an editorial by David Broder, "One Is the Loneliest Number for President Obama," be printed in the RECORD. It mentions some of the editorials and key points of editorials that I put in my speech last night.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ONE IS THE LONELIEST NUMBER FOR
PRESIDENT OBAMA
(By David Broder)

In the last year or so of George W. Bush's second term, commentators used to talk a

lot about the conspicuous scarcity of other Republicans willing to stand up and defend him. I never thought we'd see Barack Obama face the same problem before his first year was over.

But as Obama's approval scores (50 percent in the latest Washington Post-ABC News poll) sink, it is getting harder and harder to find a full-throated supporter of the president.

You need go no further from here than the op-ed page of Thursday's Washington Post to see what I mean. Time was, and not all that long ago, when the Post was thought of as the "liberal paper" in Washington, a reliable advocate for the kind of policies pursued by Democratic presidents.

Well, in the lead article on the op-ed page, a well-known member of the president's party said that Obama's prize piece of domestic legislation, the health care reform bill, has been so compromised that as it stands, "this bill would do more harm than good to the future of America."

"If I were a senator," wrote Howard Dean, former governor of Vermont and the chairman of the Democratic National Committee during Obama's run for the White House, "I would not vote for the current health-care bill."

Dean, who had been signaling his apostasy for some time, was far from alone in clobbering Obama, just as the president and Senate leaders were struggling to line up the 60 votes needed to pass the ever-changing legislation.

Across the Post's prized real estate, conservative columnist George F. Will gloated that the more Obama argued for the bill, the less the public supported it. And from across the aisle, Matthew Dowd, a former Democrat who served as chief strategist for the younger President Bush, offered congressional Democrats the free advice that they would be better off themselves if the Republicans managed to block Obama's bill.

It was left to my friend, E.J. Dionne, Jr., one of Obama's most passionate journalistic advocates, to tell the Democrats that they ought to mind their manners—and their words. The increasing flak between moderate and liberal Democrats "is a recipe for political catastrophe," Dionne warned, his tone suggesting that he thinks the Democrats are too far gone to heed him.

But this wasn't the worst I saw that day. The worst came in a news report of the year-end news conference by House Speaker Nancy Pelosi. Asked how she would deal with next year's looming tests of congressional Democratic support for Obama's decision to send 30,000 more U.S. troops into the Afghanistan struggle, she said, "the president's going to have to make his case" himself. Reminding reporters that she had told lawmakers in June, when funding was approved for 17,000 additional troops, that it would be the last time she would ever lobby her members to back such a step, she made it absolutely clear she felt no obligation of party loyalty to support Obama on the most important national security decision he has made.

The liberal legislator from San Francisco could not have been plainer if she had added, "You're on your own, buster."

With this as an example from the No. 1 Democrat on Capitol Hill, one has to wonder why liberal Democrats are so furious about senators such as Joe Lieberman and Ben Nelson negotiating their own deals with the White House on the health care bill.

I think Obama deserves more help than he is getting from his fellow Democrats in Con-

gress, given the boost he provided them in the last election, the difficulty of the problems he inherited, and the stiff-arm he has received from the Republicans.

But the reality is that, the closer the midterm election comes, when they will be on the ballot and he will not, the more members of Congress—and not just Pelosi—will judge what is best for themselves and the less they'll be swayed by Obama.

He may feel lonely now, but he ain't seen nothing yet.

Mr. ENZI. Madam President, I also ask unanimous consent that an editorial by George Will from the Washington Post titled "The Indispensable Dispenser Opens Up" be printed in the RECORD. It shows how Medicare is left up in the air after the Reid bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE INDISPENSABLE DISPENSER OPENS UP

(By George Will)

Ryan Bingham has a unique way of describing his life.

"Last year," he says, "I spent 322 days on the road, which means that I had to spend 43 miserable days at home." Home is an Omaha rental unit less furnished than a hotel room. He likes it that way.

Today he is where he feels at home, in an airport—glass walls and glistening steel, synthetic sincerity and antiseptic hospitality. Today he is showing Natalie, a ferocious young colleague, how an expert road warrior deals with lines at security screening:

Avoid, he says, getting behind travelers with infants ("I've never seen a stroller collapse in less than 20 minutes"). Or behind elderly people ("Their bodies are littered with hidden metal and they never seem to appreciate how little time they have left on earth"). Do get behind Asians: "They're light packers, treasure efficiency, and have a thing for slip-on shoes."

Natalie: "That's racist."

Bingham: "I stereotype. It's faster."

Played with seemingly effortless perfection by the preternaturally smooth George Clooney, Bingham is the cool porcelain heart of the movie "Up in the Air." It is a romantic comedy, although Bingham begins immune to romance. And the comedy is about pain—about administering it somewhat humanely to people who are losing their jobs.

Bingham is a "termination engineer." He fires people for companies that want to outsource the awkward, and occasionally dangerous, unpleasantness of downsizing. His pitter-patter for the fired—"Anybody who ever built an empire, or changed the world, sat where you are now"—rarely consoles. But with his surgeon's detachment, he is more humane than Natalie, who says this:

"This is the first step of a process that will end with you in a new job that fulfills you. I'd appreciate it if you didn't spread the news just yet. Panic doesn't help anybody."

A confident young cost-cutter from Cornell, her brainstorm is to fire people by videoconferencing. She tells one desolated man:

"Perhaps you're underestimating the positive effect your career transition may have on your children. Tests have shown that children under moderate trauma have a tendency to apply themselves academically as a method of coping."

Bingham considers his low emotional metabolism an achievement, and in motiva-

tional speeches he urges his audiences to cultivate it: "Your relationships are the heaviest components of your life. The slower we move, the faster we die. We are not swans. We're sharks."

The movie begins and ends with everyday people talking to the camera, making remarkably sensitive statements about the trauma of being declared dispensable. Some, however, recall that the consequences included being reminded that things they retained, such as their human connections, are truly indispensable.

The opening soundtrack is a weird version of Woody Guthrie's "This Land Is Your Land." This hymn to Depression-era radicalism is catnip for people eager to tickle a political manifesto from any movie that has a contemporary social setting.

But although "Up in the Air" might look like a meditation on the Great Recession, it is based on a novel published in 2001, during the mildest recession since the Depression, and written before that.

You must remember: In 2006, the last full year before this downturn, when the economy grew 2.7 percent and the unemployment rate was just 4.6 percent, 3.3 million people lost their jobs to the normal churning of a dynamic economy. This "creative destruction" has human costs, but no longer is optional.

America has an aging population, and has chosen to have a welfare state that siphons increasing amounts of wealth from the economy to give to the elderly. Having willed this end, America must will the means to it—sometimes severe economic efficiency to generate revenues to finance the entitlement culture. So "Up in the Air" is sobering entertainment for a nation contemplating a giant addition to the entitlement menu.

"Up in the Air" is two mature themes subtly braided and nuanced for grown-ups. One is the sometimes shattering sense of failure, desperation and worthlessness that overwhelms middle-aged people who lose their livelihoods. The other is that such shocks can be reminders that there is more to life than livelihoods.

But not for Bingham. He is, in his fashion, content. In E.M. Forster's novel "Howards End," Margaret famously exhorted, "Only connect!" Bingham would rather not.

Mr. ENZI. Madam President, I yield the floor and reserve the remainder of our time.

The PRESIDING OFFICER (Mrs. SHAHEEN). The Senator from South Carolina.

Mr. DEMINT. Madam President, we have heard a lot about the unsustainable mountain of government debt, bureaucracy, and spending the Democratic majority intends to create in rushing their health care proposal through this Chamber. We have also heard a lot about how much of this they inherited. We need to remember that this Congress—both Houses of Congress—has been controlled by the Democratic Party for 3 years now. The President does not write legislation or spend money; the Congress does. The only thing the Democratic majority has inherited is its own irresponsible spending.

Saturday's release of the final Democratic bill only increases America's concern with this Congress, its shadow negotiations, and our growing debt.

Early this morning, all 60 Democrats voted to force all the taxpayers of this country to pay for bailouts and special favors for several States. Rather than actually taking the time to put forth real health care reform proposals that would increase Americans' ability to buy and own health care plans they could really afford, this plan forces over 15 million Americans onto yet another bankrupt entitlement program, Medicaid.

While Medicaid is a State and Federal shared program, the Democratic majority saw fit for the Federal Government to pay 100 percent of the Medicaid Program in the State of Nebraska under this legislation at the expense of taxpayers in the other 49 States, who will now be forced not only to deal with the loss of their freedoms under this huge government takeover but to pay for special favors in other States.

This State bailout is not the only downside of the majority's health care proposal; there is a laundry list we could go through. Just a few include that the working American taxpayers and their employers will be taxed \$500 billion over the next 10 years, and the Congressional Budget Office has confirmed that nothing in this bill decreases the premiums for Main Street Americans.

Seniors will see their Medicare benefits changed as a result of the \$500 billion in Medicare cuts included in this bill, not to mention that this bill turns a blind eye to the physician payment system that is woefully underfunded and vitally necessary to maintain the Medicare Program and physician access for seniors. It does not matter how good the insurance is we give our seniors if they cannot find a doctor who will see them.

Another alarming part of this bill is it will, for the first time in decades, force every American taxpayer to pay for abortion services.

Frankly, after reading this bill, it seems the only Americans who are not going to be affected by the bill are Members of Congress, pharmaceutical companies, and insurance companies.

Madam President, for all the mind-boggling numbers and devastating facts we have heard about the majority's government takeover of health care, this debate is about much more than health care. It is about how we find ourselves in a situation where we are debating the best way to give the government control over another big part of our lives and our economy.

In the children's story of "Hansel and Gretel," the children drop a trail of breadcrumbs as they walk through the forest so they will be able to find their way out of the woods. But when the birds eat the breadcrumbs, the children find they are lost in the dark and frightening woods.

Well, lost in the woods is exactly where we find ourselves as a country

right now. We know we are in trouble, but there is no clearly marked path to get us back to where we were, and it is plenty frightening.

In the past year alone, this Federal Government has taken over two of our largest automakers, our largest insurance companies, the largest mortgage company, and hundreds of banks. It has bailed out Wall Street and attempted to stimulate the economy by taking \$1 trillion out of the private sector and spending it on wasteful government programs. It has thrown taxpayer money at people to encourage them to buy new cars and houses. And it is looking at imposing massive new job-killing taxes on businesses in the name of reducing global warming—all in the middle of a snowstorm.

One of the problems we have now in this country is, instead of asking if we should solve it, we are asking, how should we solve it? It is now considered a sign of admirable restraint to occasionally ask here in this Senate and in this Congress, how much should we spend? And somehow we started thinking that anything less than \$1 trillion is a good deal. There is not a pothole in America that most Members of the Congress do not believe should be filled with an earmark from the Federal Government. There is not a bridge to nowhere, a flat tire, a skinned knee—there is nothing off limits for this Congress today.

This matters not just because of our unsustainable debt and the huge amount of money we waste; it matters because every time we give a job to the government, we take away some control people have over their own lives, and we take away a little bit more of their freedom. In return for letting government try its hand at solving a problem, we as citizens cede our ability to try for ourselves to find a better way.

It is awkward to admit it, but my colleagues in Congress have led this country into the woods, despite our oath of office. We swore to protect and defend the Constitution of the United States and to bear true and faithful allegiance to it. The Constitution prescribes a very limited role for the Federal Government. There is not a word in our oath or in the Constitution about most of what we do. As we have wandered off the path of liberty, there are few crumbs left of the Constitution in the Halls of Congress to lead us out of the woods.

There is not a word in the Constitution about the government deciding what medical test private health insurers should pay for, nothing about the government deciding how much executives on Wall Street should earn or what kind of lightbulbs or cars we should buy. There is nothing about the thousands of parochial earmarks that fund local bridges to nowhere, golf courses, bike paths, sewer plants, and

teapot museums. There is nothing about these or many other things in the Constitution because they have nothing to do with the proper role of the Federal Government in a free society. But these are exactly the kinds of things our government spends its time and money on, and we do not even question anymore why that is.

Instead, it has gotten to the point where if we oppose the government doing anything, we are accused of being opposed to getting it done. That is patently absurd. If you really want to get something done and get it done right, the government is absolutely the last place we should turn.

The tea parties, townhalls, and rallies affirm that the American people are rethinking the appropriate role of the government in a free society. Hopefully, their discontent will be demonstrated in the 2010 elections. Only the American people can hold our elected Federal representatives accountable for fulfilling their oath of office. In the health care debate, this means deciding exactly what role the government should play to help people in the private sector find solutions, instead of creating a monstrous new bureaucracy that puts the government in charge of every decision.

But this debate is about much more than health care. It is a battle for the heart and soul of America. It is a struggle between freedom and socialism, between free markets and a centrally planned economy, and between "we the people" and an entrenched class of elite politicians.

The current debate over health care reform is a symptom of a bigger problem in Washington. But it can be the catalyst for a wider debate about the proper role of government in our lives. The same debate can lead us to a moment when Americans finally take a stand to return government to its proper place—and we can all start finding our way out of the woods.

Madam President, I yield the floor.

THE PRESIDING OFFICER. The Senator from North Carolina.

MR. BURR. Madam President, I am going to be joined by a number of my colleagues, so I ask unanimous consent that we be able to have a colloquy during the remainder of our time.

THE PRESIDING OFFICER. Without objection, it is so ordered.

MR. BURR. Madam President, I think many Members have to ask: Why are we here? We are here because at 1 a.m. this morning, there was a cloture vote on the consideration of the Reid managers' amendment. I think it is important that we discuss what that means. It means there are going to be no more amendments, no opportunity for any Senator from any State to propose a change to the bill. At some point, we will have an up-or-down vote on exactly what Senator REID has presented to us.

But here is what we do know. We are going to steal \$466 billion from Medicare. We are going to take that \$466 billion away from hospitals, from hospice, from nursing homes, from home care, and, yes, a popular target up here—the insurance product many Americans have chosen, 20 percent of the seniors, Medicare Advantage. We are going to eliminate that option. So this is one case where if you like your health care, you are going to lose it.

The bill that we are considering and that will be voted on later this week raises \$519 billion in new taxes and fees—\$519 billion in new taxes. I might add for my colleagues, we are taxing tanning salons at 10 percent. What in the hell does that have to do with health care? Well, the reason it is in there is because we dropped taxing Botox. Hollywood saw this was not advantageous to have Botox taxed, so when they dropped that, they had to find something else: poor tanning salons, small businesses in every community across this country. We are going to actually tax the majority of Americans the President said he would never tax: those under \$200,000, the ones who can't afford to go to the beach every weekend; the ones who don't have a beach house. They are going to pay a 10-percent tax when they go to get a little bit of a tan. Well, when they do that, how far off are we from fining parents because we don't put a high enough SPF on our children, or are we going to start charging when we go to the beach because we get exposure to the Sun? That is what happens when the government becomes a more dominant role in health care.

I might add: No doctor fix, something many of us have highlighted. In the bill, there was a 1-year fix. Doctors are going to be faced with a 21-percent cut in their reimbursements after this next 2 months. There was a 1-year fix to it. It didn't do away with the problem. It didn't fix the whole problem. But now there is no 1-year fix. We have said in 60 days doctors will be on their own.

Yes, there were some special deals—the cornhusker kickback, the windfall for Nebraska. I have to admit that I was proud of my colleague, Senator JOHANNES, who came to the floor and said: Let me assure you, the people in Nebraska have never asked for something different than everybody else. They are willing to pay their share of the way there. They haven't asked for it to be free for them and cost everybody else.

Yes, it will cost my constituents in North Carolina, and it will cost the constituents in Nevada—well, it won't in Nevada. I think maybe there is even a deal that affects them to some degree.

Is it fair? No, it is not fair. The fact that it wasn't fair was called: "That is compromise."

That is not compromise. We are here under an obligation to make this fair

to all of the American people. But in this case, it is not.

Yes, there are 31 million Americans who are going to have health insurance, 15 million of whom are delegated into Medicaid, the most dysfunctional delivery system that exists in the American health care system.

Yes, there is, for many States, an unfunded mandate to those States because after 5 years, for most States, except for those who got these special deals, the States are going to be responsible for some portion, an average of 10 percent of the cost of Medicaid.

Let me tell you what my Governor, Governor Bev Perdue of North Carolina, said earlier:

The absolute dealbreaker for me as governor is a Federal plan that shifts costs to the States.

Well, we are shifting costs to the States, and she is nowhere to be found now. But the people in North Carolina, the taxpayers of North Carolina are going to continue to be charged for this expansion of Medicaid when that is the most inefficient place for us to have put these 15 million Americans who were promised health care.

While we do all this, according to the Chief Actuary of the Centers for Medicare and Medicaid Services, CMS, 20 percent of our hospitals and nursing homes are going to go bankrupt. They are going to go out of business because as the Chief Actuary said:

They would be unprofitable within the next 10 years as a result of these cuts.

Hospitals, nursing homes, at a time that our senior population is getting ready to explode as the baby boomers hit it, we are cutting \$466 billion from Medicare, and we are starving the infrastructure of hospitals and nursing homes and hospice and home care.

What is going to happen to the providers? The Chief Actuary, again, said if we pass this plan, the result is providers will be unwilling to see Medicare and Medicaid patients.

Today, 40 percent of providers don't see Medicaid patients. Does that mean it is going to be 50 percent or 60 percent or 70 percent? We are ballooning a system that today is having a hard time finding providers. To most of us that doesn't make sense, but that is what the Senate is going to do.

I might also add that the attempt was to expand coverage; and, yes, sure, in numbers, we are expanding coverage. But, if passed, the Congressional Budget Office says 8 million to 9 million individuals who currently have employer-based health care will lose that health care. Eight million to nine million who currently have their health care will lose their health care with the passage of this bill. The net-net is not real pretty, and when you look at the \$2.3 trillion that health care costs, you have to ask yourself, where is the beef? Where is the value in this?

As hospitals close, as nursing homes close, as providers don't see Medicare

and Medicaid, ask yourself, have we really done something good? Chances are, you will find out if we do nothing, if we do nothing, we will actually save money in the health care system.

The last fact: The Chief Actuary of Medicare said: If you pass this bill, the cost of health care will be \$¼ trillion more than if we did nothing.

The President talked about bending the cost curve down. We are bending that cost curve up in this bill. We are bankrupting hospitals and nursing homes. We are chasing providers from seeing Medicare and Medicaid patients.

There are not too many things we can point to that are great about this bill. That is every reason we should start over.

I know my colleagues are here to join in and to offer some perspectives, and I would ask them to chime in.

Mr. ENSIGN. Madam President, let me just summarize a few problems I see in the bill, and maybe even offer a few suggestions about what I think we can do in a bipartisan fashion—kind of this step-by-step approach many of us have been talking about—instead of this massive government takeover of our health care system.

This is a—I have lost track—I think somewhere around a 2,700-page bill with incredibly complex legal language. In the 400-page amendment offered the other day, when I was sitting there listening to the reading of it, I can't tell my colleagues how many times I was listening to this and I thought: When the regulations are written to that particular small part of the amendment, it could be incredibly complex with all kinds of unintended consequences. I thought about the burdens on small business and the record keeping that small businesses are going to have in this bill.

I think what is going to also happen with small business, there is going to be a great incentive—if you are a small business owner, the complexities are so much and you can get yourself in so much trouble, you know what, I am just going to pay the fine. I will write a check to each one of my employees, but I am getting out of the health care business. I am going to let them go out and find their own health care, whether through the government exchanges or whatever it is, but I am getting out. That is one of those unintended consequences that a lot of people haven't focused on.

We talked a lot about this \$500 billion-plus cut in Medicare. My colleague from North Carolina mentioned that. Some of the biggest places—I had two grandmothers who were in hospice. Hospice care is the most compassionate care we have today, and we are going to cut hospice care. That actually puts dignity back into dying. That is just unconscionable. The Congressional Budget Office says these cuts actually will be cuts in service because you

can't just take money out of the system unless you make them more efficient. These cuts don't make the system more efficient, they just take money out of the system, whether it is out of hospice or nursing homes or the home care, but also out of Medicare cuts.

We know there is \$120 billion in cuts to Medicare Advantage. The Congressional Budget Office said by 2016, 64 percent of the extra benefits, whether those are prescription drugs or dental coverage or vision coverage, the seniors covered under Medicare Advantage are going to be cut 64 percent because of this legislation.

We also know there is around \$500 billion in new taxes, and this is a complete violation of the President's promise during the campaign when he said not one dime in new taxes will be raised on those individuals making less than \$200,000 or families making less than \$250,000. Yet in this bill, of the \$500 billion, 84 percent is paid by those people the President said wouldn't have their taxes raised by one dime.

We also know, because the Senator from North Carolina talked about it, this massive Medicaid expansion—I think it was the Democratic Governor from Tennessee who said it was the mother of all unfunded mandates. Well, we have to look at this one way. If the sweetheart deal that was made by the Senator from Nebraska—and, by the way, I agree with you. Senator JOHANNIS, who came to the floor, it takes a lot of courage to say it isn't about just helping my State; it is about thinking about the whole country as well. He isn't asking for something—which most Senators do around here, ask for something just special for the State that the rest of the States have to pay for—but he stood up with courage, and I think he deserves a lot of credit for that.

But if all the other States now come back and say: We want the Federal Government to pay for our States and Medicaid, this bill is going to do one thing. It is either going to be a massive unfunded mandate on our States or this bill is going to massively balloon the Federal debt.

Mr. COBURN. Madam President, I have a question for both the Senator from North Carolina and the Senator from Nevada. Can the State of Nevada or the State of North Carolina or the State of Nebraska or the State of Oklahoma be healthy if our country doesn't flourish? So no matter what we do for our own States, if, in fact, we are not thinking about the country as a whole, the best right thing for the country as a whole, none of our States can flourish.

Mr. ENSIGN. I think the Senator from Oklahoma has made a wonderful point. Right now, my State is suffering terribly, not because of anything individually, such as we didn't get our fair

share of something; my State is suffering because the whole economy is in the doldrums and because we are such a tourist economy, construction oriented, the housing industry, all of those things, and because the general economy went down, my State is suffering.

So the Senator is exactly right. We should be looking at what is best for the entire country. As John F. Kennedy said: A rising tide raises all boats. Well, if the whole country is doing better, whether it is on health care or whatever it is, instead of looking for something individual for our States, you are exactly right. I think our individual States will do better if the whole country does well.

Mr. COBURN. Madam President, I ask unanimous consent to have printed in the RECORD an article that appeared today. It is a quotation from the founder from the Daily Kos Web site. I will give it to the clerk in a moment. I wish to read a quote from it:

I don't think this is a reform bill. I mean, I think it is very clear this is not insurance or health care reform. What it is is allowing more people, 30 million people, to buy into an existing broken system. It is very important to keep in mind that health insurance is not the same as health care. If you go up to Massachusetts, they have a mandate as well. Last year, in Massachusetts, 21 percent of the people who are insured could not get health care because they could not afford it.

That is somebody who is very well respected on the majority side, and it is something we have been saying, and they are saying the same thing. The fact is, what we are going to do is put 15 million people into Medicaid that we know has worse outcomes, we know is an unfunded mandate on the States, and we know 40 percent of the doctors refuse to see them. So you are not going to get to choose the doctor you want to see. You are going to have State mandates in terms of what is available to you and what is not. So we have violated two of the key promises with which to reform health care.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MOULITSAS: WE'LL GET KILLED IN 2010

Markos Moulitsas, founder of the Daily Kos and an influential leader of the Web-based political left, said Sunday that Democrats are facing huge defeats in the 2010 elections because the Obama administration has alienated the Democratic Party's liberal political base with its escalating involvement in Afghanistan, and its failure to push for universal healthcare.

Speaking on NBC's "Meet the Press," Moulitsas offered a bleak scenario for House and Senate races next year.

Excerpts:

Mr. GREGORY: Markos Moulitsas, I want to start with you. You heard David Axelrod say this in keeping with the president's principles; it is in keeping, the compromise on health care, with the way the president campaigned on this. And this is the bill, essentially, the reform that Americans deserve. What do you say?

Mr. MARKOS MOULITSAS: Yeah, I don't think this is a reform bill. I mean, I think it's very clear, this is not insurance or healthcare reform. What it is, it's allowing more people, 30 million people, to buy into the existing broken system. It's very important to keep in mind that healthcare insurance is not the same as health care. Insurance, not the same as care, if you go up to Massachusetts, they have a mandate as well, and last year 21 percent of people in Massachusetts could not get health care because they could not afford it. Even though they had insurance, the premiums—not the premiums, the deductibles, copays and out-of-pocket expenses were too high. So really, this isn't reform. It's expanding the system, it's almost rewarding the existing system. Now, what is important about this is that it actually puts the federal government, plus America on the place to say health care is a right, it's not a privilege to just those who are—who can afford it or who are lucky enough to have a good job that has good benefits. But as far as reform goes, I think this is a long battle that we have ahead of us.

Mr. MOULITSAS: Well, you can't talk about health care and Afghanistan being distractions. They're the reasons that Obama won the White House and Democrats won control of Congress, including big, massive support from independents. Independents know what they were voting for when they voted for Obama and the Democrats. I think the problem with Obama's numbers and, and Congress' numbers is that people voted for a Congress and a president that was going to take on entrenched interests. Now, Republicans had jumped off the Obama bandwagon from day one. They were never on board. Independents have sort of been unhappy because I think independents really want results, and we haven't seen a lot of results. We've seen a log of bickering, and most of it has been internally within the Democratic Party, and I think that's why they're turning off. And a lot of Democrats are becoming disenchanted.

Mr. GREGORY: . . . What does the president need to address to keep his own party in line? Should there be personnel changes in the White House? What do you think the left is going to demand?

Mr. MOULITSAS: Well, 2006 is going to be a base year. It's going to be a base election.

MR. GREGORY: 2010, you mean.

Mr. COBURN. Madam President, I wish to also quote from what I think is a brilliant letter by a Dr. Robert Geist from St. Paul, MN, that was written as a letter to the editor in the Wall Street Journal today. The title of his letter to the editor is, "The First Cost Controller Will Be Your Own Doctor." It is something I have been talking about since we started this. The last thing we want to do in health care in America is to make it where the doctor is not a 100-percent advocate for the patient's best interest.

He quotes very directly the transfer. He said a previous article written:

. . . doesn't emphasize a potential stealth cost-control aspect proposed in the bill. It will start pilot programs that would transfer the gatekeeper role to doctors at the bedside, a role currently held by "payers" (HMOs and government-agency insurers, including Medicare and Medicaid).

The transfer will be via capitation fee payments, making clinics "responsible" for the cost of care of "insured lives" for one year.

... The illusion of many pundits and policy makers is that mini provider gatekeepers can control costs after the very powerful payer gatekeepers—

That is, Medicare, Medicaid, and the large insurance companies—

have failed for decades. The problem for patients is the dilemma of all managed-care gatekeepers: cost, quality, access; pick any two. It is not pleasant to think that one's gatekeeper doctor will have to decide whether to order surgery for your painful [worn out] hip or only to increase the dose of—

Anti-inflammatories because they are worried about costs.

That is the key point. We are going to now separate physicians in this country for doing what is best for the patient to meet the demands of the government.

Mr. ENSIGN. If the Senator will yield.

Mr. COBURN. I will be happy to yield.

Mr. ENSIGN. As a practicing physician, isn't this what the Senator saw in his practice with HMOs?

Mr. COBURN. That is exactly why I am not a member of any HMOs.

Mr. ENSIGN. Because we have kind of an insurance center system today, to a large degree, and now we are going to make that worse. Instead of going more toward a patient center, we are going to go from an insurance center to a government center to where these government bureaucrats now start being in control of eventually what kind of care you are going to get, what is paid for, and all that. We need to put the doctor and the patient back at the center of our health care system.

Mr. COBURN. Let me finish this for a minute, if I might. Here is the summarizing paragraph:

The economic reality is that no rationing of care supply will ever control costs, when the problem is demand inflation driven by popular insurance tax subsidies too sacred to repeal. Consider that when federal fiscal "necessity" overwhelms empty slogans,—

Our empty slogans—

scores of new bureaucracies created in [this bill] would be able to implement Draconian rationing in collusion with subservient insurance and "provider" corporations. The high costs, as well as the rationing powers included in the more than 2,000 pages of the ObamaCare Senate legislation are very real.

Which is the point I have been making all along. I am going to spend 30 minutes tomorrow talking about the rationing aspects of what we are about to do as we pass this bill.

Mr. BURR. If I can comment to my good friend, who started on a quest with me several years ago to try to put together a health care reform bill, I might say it was the first one introduced in the Congress in May of this year on comprehensive health care reform—not that it is better than anybody else's, but I can honestly say today it was true reform. I think that is what Dr. COBURN is trying to say.

In this bill, it lacks reform. What do I mean by that? Their reform is to set

up an advisory panel that if we exceed the costs we have designated for health care, they are going to cut the scope of coverage or the reimbursement. So either the array of coverage for a senior or for an American is "skinnied down" or we cut the reimbursement to the doctor or the hospital, and they call that reform.

What Dr. COBURN and I found out, as many other Members have, is if you look at the successful companies across this country that have held down their health care costs through doing real reform—paying for prevention and wellness in work, changing the lifestyles of the employees—we saw companies that, for 4 years, had a 45-percent increase in their health care. Where is any of that in this bill? Out of 2,700-plus pages, there is no attempt to do that. There is no attempt to try to affect the lifestyles through supporting chronic disease management, prevention, and wellness, but we set up a lot of independent advisory boards.

As a matter of fact, they were so scared that in the managers' amendment, it is no longer called the Medicare independent advisory board. It is called the independent advisory board. So the word "Medicare" was dropped, not to signify that they are going to cut Medicare, but that is exactly what CBO and CMS have said. These will kick in. The question is, Are they sustainable or will Congress legislatively override their authority to cut the spending?

Mr. ENSIGN. If my friend will yield, there is one part—actually one of the best parts in this bill—but there are so many other bad parts of this bill and the Senator from North Carolina mentioned them, and we have talked about a lot of them. The one place they actually have improved our health care system is the part that allows people to have larger discounts for healthier behaviors. Safeway was the model for this. They have done the most work on this in the last 4 years. Today, they can discount up to 20 percent of their health care premiums for people who engage in healthier behaviors—for not smoking, for being the proper body weight compared to their height, doing things such as that. If they are a non-smoker, they get a lower premium, and if they even quit smoking, Safeway pays for the cessation products. To be fair, that is in the bill. Senator CARPER and I got that in the Finance Committee. We were able to get that amendment drafted.

The problem is, that is a tiny part of this bill. That should be a major focus of the bill. We should be able to buy insurance across State lines. Many of us have supported that—small business health plans, where small businesses can join together and take advantage of purchasing power. We all, on this side, almost everybody on this side of the aisle agrees with medical liability

reform. The Congressional Budget Office said that would save \$100 billion.

The bottom line is, what we have been focused on—and I appreciate the efforts Senator BURR and Senator COBURN made in their bill last year—is trying to address the No. 1 problem we have in health care in the United States, which is costs. This bill does not address costs.

As a matter of fact, you said it in your opening remarks. Total health care costs actually, according to President Obama's CMS, go up \$234 billion if nothing is done. If nothing is done, we actually save money on total health care spending. But with this bill, it actually goes up by \$234 billion.

Mr. COBURN. What we also know from the Congressional Budget Office is that between 9 and 10 million people who today have insurance through their employer will actually lose it. They are going to lose their insurance. That may be good or bad for them. But if you look at the incentives, the subsidy for people who do not get insurance through their employer, if you make \$42,000 a year, today with your health insurance through your employer you get a benefit of about \$5,749 from the tax system. But under this bill, you will be eligible for \$12,500 worth of subsidy.

What do you think an employer is going to do? They are going to look at their employees and they are going to say: I have to pay this penalty if I don't offer this, but it is a significantly smaller amount than what I am paying today. Therefore, I am going to make a decision to no longer offer health insurance, give my employees a small raise because the government is going to come in with \$12,500 worth of subsidies to put them in a "private" plan inside the parameters of what is in the exchange. How many people do you think it is going to shift?

What we are going to get is adverse selection. So the individual—let's say I am working and I am making \$42,000 a year and my employer decides to do that and let's say I am 35 years old and I know available to me is \$12,500. Even though my earnings may go up, I am still 2½ times better off.

I also know I will have to pay \$3,000 or \$4,000 of my own money to get that benefit. I will not cover myself because I know I can cover my little incidentals. If I get sick, they have to cover me in the exchange.

So we are going to see adverse selection in the insurance market, people who are between 40 and 64 who are sick are going to pay far more for their health insurance and people who are sick who are younger than 40 are going to pay far more for their health insurance and everybody who is healthy under 40 is going to say: This is an economic bonanza for me. I am not going to buy insurance.

Mr. ENSIGN. I see our friend from South Carolina has joined us. He has

spoken eloquently about some of the sweetheart deals that have been made in this plan to “buy” votes. Could the Senator from South Carolina address those?

Mr. GRAHAM. I don't know if you could call it a sweetheart deal more than it is just repugnant. The campaign in 2008 was about change we could believe in. I do believe one of the reasons President Obama won is because he convinced young people in this country that if he got to be President, this country was going to change for the better; we were going to do things differently, and that resonated with people.

Quite frankly, when we were in charge, as Republicans, we let people down. We let things get out of control on our watch. Some of our people wound up going to jail. The Iraq war was not popular. So you had this new, young, exciting, articulate figure come along and promise a new way of doing business. That is what hurts so much about this bill. The special deals the Senator just mentioned remind us all why Congress is in such low standing.

The 60th vote—how did they get it? Did they negotiate the 60th vote on C-SPAN in a transparent manner promised in the campaign that we would have negotiations on C-SPAN so that you, the American people, could watch what was being given and what was being taken and there will be no more backroom deals?

Here is what happened. They took one Senator who was the key guy and they put him in a room. We had no access to that room and no Democrat did either. After it is all said and done, here is what resulted from those negotiations that were not on C-SPAN.

Nebraska is going to be the only State in the Union, ladies and gentlemen, that new Medicaid enrollees will be covered by the Federal Government. Every other State in the Union, when you sign up a new person on Medicaid, because you are expanding the number of people eligible for Medicaid, your State is going to have to make a matching contribution.

In my State of South Carolina, with 12 percent unemployment, there is going to be one-half million more people eligible for Medicaid under this bill than exists today. It will cost my State of South Carolina \$1 billion. But if you live in Nebraska, it doesn't cost you a damn dime because that is what it took to get a vote.

If that is change we can believe in, count me out. If that is OK with the American people, I can tell you our best days are behind us. The insurance companies in Nebraska got a deal that no other insurance company in the Nation got. Physician-owned hospitals in Nebraska got a deal that nobody else got. Louisiana got \$300 million to help with their Medicaid problems that nobody else got.

If you want your country to be run in a more businesslike fashion, then you need to speak up. You have a chance between now and sometime in January, when this goes back to the House, to let your voice be heard.

To my good friend from Nevada, the special deals in this bill are not special. They are the same old crap we have been putting up with for decades up here and that people thought was going to come to an end. It is going to hurt your children's ability to have half of what you have because they cannot make it because you are about to pass on a bill to them they cannot pay.

What I hope will happen, I say to my good friend, the Senator from Nevada, is that the people will take their government back. If you think this deal from Nebraska is unacceptable, speak up and speak out and let the House Members know you want it changed.

Mr. BURR. I thank our colleague from South Carolina. I know we are about to run out of time, but I wanted to go back to the Chief Actuary at Medicare because I think the way they analyzed the bill is absolutely essential for the American people to understand what is in it.

The Chief Actuary, the President's Actuary, said:

The Reid bill funds \$930 billion in new spending by relying on Medicare payment cuts which are unlikely to be sustainable on a permanent basis.

It gets to what Dr. COBURN said. By design, maybe this could work, but there is not a will because there is not reform. We have spent a lot of money, and at the end of the day, it looks as if the only thing we have done is tried to address waste, fraud, and abuse. For \$2.3 trillion, it seems as if you could bring more bacon to the table. It seems as if there would be a little more meat.

It seems as if there would be some substance there we could look at and say: Look at the improvements our health care system makes.

I know Dr. COBURN has said many times: If we do this wrong, what we do is we chase innovation out of this country, out of our system, the breakthroughs that go from maintenance to cure, the research on a bench that finds us new ways to address diabetes where amputation and blindness are not in somebody's future. If we go backward, if we chase that innovation out, we lock ourselves into not only the most costly health care but health care that achieves the least amount of quality for future generations.

Mr. ENSIGN. I wish to ask Senator COBURN to address, in the last couple of minutes here—because he has spoken so eloquently about debt and the Congressional Budget Office saying this helps the deficit by some \$100 billion—how the taxes go into effect right away and that the spending doesn't go into effect, and how that kind of smoke and

mirrors happens all the time around here; how they try to hide various expenses, and what this is going to do to our debt.

Mr. COBURN. Well, the disappointing thing—and I have worked on this for 5 years, since I have been here—is we are not honest with the American people about how we account for things, and this bill is another example of that. Let me give you the quantifications.

If you read the CBO report on this bill, they talk about it is highly unlikely we will ever actually make the Medicare cuts, because they have never seen it done, and every time we have said it in the past, we haven't done it, like the sustainable growth rate formula in the Balanced Budget Act of 1997. So if you match up revenues and expenses, what you see is a \$1 trillion tax increase, a \$1 trillion cut in Medicare, and an increasing cost to the economy.

But because there is not the sustainable growth rate—the doctor fix in the bill—that is \$247 billion not accounted for, and that is if you keep physician wages frozen over the next 10 years. That is \$247 billion, probably closer to \$300 billion. So that is \$300 billion. The fact is we know the taxes that are going to be collected, people are going to pull down the cost, which is one of their hopes, and they are going to pay for it out of their pocket.

So we are going to see that insurance plans not reach the Cadillac level, and we are counting on revenues from that in terms of billions and billions of dollars. But what they will do is change the deductibles—and that is a hidden tax. Because if your deductible goes up to keep your insurance from going too high, your tax goes up in actual expenditures. So your ability to invest and create additional jobs—in other words, it cascades. The honest accounting for this is that there is no way this saves any money. It will cost money.

The final point I will make is they won't put forward the cuts in Medicare that they are claiming in this bill. Because they know if they truly do put forth the cuts, and patients feel it, they won't be back here. So it won't happen.

I will go back to what Senator BURR started this out with. If you are going to start tomorrow and fix health care, what would you do? You would attack costs. Why are things so costly? One is because there is no transparency in markets. There is no real connectedness to your pocket. No. 3, there is no incentive for prevention of chronic disease or the management of it. In other words, we don't pay people to have less expensive outcomes. We won't incentivize better care in that way. We won't incentivize prevention.

We have done a lot of this on Medicare—and I will talk about it tomorrow—but they have three different

agencies within this bill that are going to ration care. They are going to make the decisions for you, and not just on Medicare and Medicaid. Everybody needs to understand that. It doesn't just apply to Medicare and Medicaid, it applies to your choice of your private insurance. The government is going to ration your care.

We know that is true because they wouldn't allow an amendment to prohibit rationing. They all voted against the amendments in committees when we offered amendments to limit rationing. So we know the intention is to ration care. If that is how we are going to control costs, then Bernie Sanders is right—go to a single-payer, government-run system. Bernie Sanders' system is far better than this one—far better than this one—if that is what we are going to do. If we are going to ration care, let everybody know it upfront. Let's be absolutely honest about it.

If you are 75 years of age and need a hip replacement but the quality of your life is not all that great, we are going to say you can't have it. That is what we are going to do, because that is exactly what they do in England. They have the National Institute of Comparative Effectiveness which makes an evaluation of what your worth is. And no matter what your history, no matter what your family situation, no matter your income, you can't have it.

Canada is getting around that, because they have said you get the right to buy what you want. Their Supreme Court ruled on that 2½ years ago. So we are seeing a two-tiered system developing in Canada, which ultimately will happen in this country—worse than what we have today.

Mr. ENSIGN. If the Senator will yield, though, if America does this with our health care system, where will the Canadians come for their health care when they need it? When they get it rationed up there, they usually come to the United States.

Mr. COBURN. They will go to Thailand or India.

Mr. ENSIGN. But where will Americans go?

Mr. COBURN. I thank the Senator for holding this colloquy, and I will make one final point before I stop.

I don't doubt the motivation of our colleagues on the other side of the aisle. They want us to fix this problem—the problem in health care. But the problem is cost. If you don't fix cost, and you expand the same broken system, you haven't fixed anything. You have added to the cost.

Mr. BURR. I thank the good doctor, and I thank the Presiding Officer, and I yield the floor.

The PRESIDING OFFICER (Mr. MERKLEY). The Senator from New Jersey is recognized.

Mr. MENENDEZ. Mr. President, I rise to speak to the great debate we are

having on historic health care reform, and I am reminded of the words of a great Republican, President Abraham Lincoln. He said:

We cannot escape history. The fiery trial through which we pass will light us down in honor or dishonor of the latest generation. The occasion is piled high with difficulty and we must rise with the occasion.

That is what Abraham Lincoln said. It is time to rise to the occasion because our friends on the other side of the aisle have chosen to sit on their hands and do nothing. They have no plan. They have chosen to delay and obfuscate.

If you look back in history, during the great debates on Social Security in 1935 and Medicare in 1965, our friends across the aisle were on the wrong side of history. But in the end, there was a minority that chose to stand up for historic social legislation and vote their conscience. They were not driven by the far rightwing of their party or by radio talk show hosts who demand ideological purity and see any attempt to support health care reform as an abandonment of principle.

Each of us is rarely called to act on such significant legislation, and when we are, it is our solemn duty to put aside our ideology—turn off Rush Limbaugh—and leave politics in the cloakroom. Our vote on this groundbreaking legislation—comparable to Social Security and Medicare—will be one of the most significant votes in American history. It should not be driven by the hope of failure that the other side prays for, rather by the will to succeed for the American people. This Congress will be remembered for this vote for generations to come, and our friends across the aisle will once again be on the wrong side of history.

We have heard the same tired arguments over and over. We heard those arguments in 1935 against Social Security. We heard them again in 1965 against Medicare—the same arguments we hear today. History has a way of repeating itself. If past is prologue, historic health care reform legislation will be signed into law despite the naysayers, the fearmongers, the panders to those who see any attempt at compromise as defeat.

To our friends on the other side, this is no longer about legislating, it is simply about obstructing. It is no longer about doing what is right for the American people but about stopping us from doing anything. It is not about finding common ground but drawing lines in the sand.

My friends on the other side have set up an army of straw men, as they did on Social Security and Medicare, manipulating the facts to create the illusion of refuting the false claims they created in an attempt to score political points.

They stand up the socialist straw man, call the bill a government take-

over of health care, and make Americans fear it. Well, we say: Let's make sure the Bernie Madoffs of the world, and people like him, are not selling health insurance.

They wave the flag, stand up the un-American straw man, saying the bill is against old-fashioned American values and denounce it. We say: Don't you dare question our patriotism. Do not dare question our commitment to doing what is right for the American people.

They stand up the death panel straw man, claiming the legislation would kill grandma, and denounce it as inhumane. We say: Stop the outrageous misinformation and tell the truth to the American people.

They stand up the taxing straw man, and say health care reform will increase taxes. We say: We are making health care entities, such as insurance companies, pay their fair share.

They set up the spending straw man, and say the bill will indebt the next generation, despite Congressional Budget Office estimates to the contrary. We say: You can't pick and choose when to believe the Congressional Budget Office and stand by their numbers only when it is convenient to your cause.

For instance, my friend Senator GREGG, the ranking member on the Budget Committee, touts CBO numbers even on his specific bill, when they benefit his arguments, for example, on malpractice provisions. But now my friends on the other side conveniently dismiss the Congressional Budget Office numbers showing our health care plan reduces the deficit. So you can't have it both ways.

They bring along their partisan straw man, accusing us of drafting a bill or having votes in the middle of the night. We say: How quickly you forget the 4 months that we waited for Republicans in the bipartisan Gang of 6, three Democratic Members, three Republican Members, working, supposedly, to achieve a bipartisan effort in health care reform. Four months. Four months we waited for them to work with us in a constructive way, and then they all walked away. So don't come back now and say you had no input in the process when you chose that course.

And, by the way, these votes that take place at the time they take place are because the Republicans insist on stopping the process and delaying it and drawing it out. So under the procedures, once we start the process to finish that delay, it ends up at certain hours—30 hours each time from the moment we file a motion to say that is enough of the delay, let us move forward. Whenever those 30 hours end, that is when we have to have the vote. But they could consent to have that vote in the fullness of the day and light. But no, they want to have the

vote as late as possible, hoping that 60 Members who want to see progress on this reform don't come to this Chamber and, therefore, cannot stop the filibuster. They want failure, and then they clamor about the time these votes take place.

Straw man after straw man. They have done nothing but block this legislation, as they have throughout the year on other legislation. They will do anything, say anything to delay, deny, and defeat health care reform.

They are on the wrong side of history now, as they were in 1935 and 1965. But the difference between 1935 and Social Security and 1965 and Medicare and today is that when the debates ended in 1935 and 1965, when the legislation was weighed on its merits, there were those few Republicans who voted their conscience, those who did not march in lockstep to the demands of rightwing talk show hosts or in fear of tea party anarchists.

In 1935 and 1965, there were a few on the other side, a few who voted for Social Security and Medicare because they knew it was right for America. But in 2009 it appears there will be no votes for health care reform—not one, not a single vote from the other side of the aisle.

The ideological differences were as intense then as they are now but pure obstinate ideology did not prevail then as it will in this Chamber when we vote. Before Social Security was debated, President Roosevelt laid out the changes in society and the reasons why we needed Social Security legislation before the Congress. He said then:

Security was attained in the early days through the interdependence of members of families upon each other and of the families within a small community upon each other.

The complexities of great communities and of organized industry make less real the simple means of security. Therefore, we are compelled to employ the active interests of the nation as a whole, through government, in order to encourage a greater security for each individual who composes it.

That is what he said about Social Security. That is why we needed Social Security and why we realize today that without Social Security more than half of our seniors in this country would be living in poverty—more than half—if the voices then in opposition had succeeded.

Then the debate began. There is no mention of death panels but there were those Republicans who raised similar straw men to the voices we hear today. A member of the New York delegation, a Republican, Daniel Reed said:

The lash of the dictator will be felt, and 25 million Americans will for the first time submit themselves to a fingerprint test.

Another said:

The bill . . . invites the entrance into the political field of a power so vast, so powerful as to threaten the integrity of our institutions and pull the pillars of the temple down upon the heads of our descendants.

John Taber, another member of the New York delegation, a Republican, raised the antibusiness straw man, saying:

Never in the history of the world has any measure been brought here so insidiously designed as to prevent business recovery, to enslave workers.

In this Chamber, in the Senate, Senator Daniel Hastings of Delaware, a Republican, raised the death-of-a-nation straw man, saying that Social Security would “end the progress of a great country.”

In this debate we have seen the same army of straw men standing against us. They have claimed that health care reform is a government takeover that will threaten the integrity of our institutions, when in fact we create an exchange of private insurance companies that people will be able to pursue.

They say it will “pull down the pillars of the temple on our descendants” and leave them in debt, that it will drive private health insurers out of business and put a bureaucrat between doctors and patients.

We already have bureaucrats between doctors and patients. They are health insurance company bureaucrats between doctors and patients. The difference is when the debate ended on Social Security in 1935, when the shouts of socialism and un-Americanism had faded, a few, a minority on the other side, had the political courage to cross the line and vote yes.

But there will not be a single vote from the Republicans in favor of this bill, not a single vote. Our colleagues on the other side want nothing more than to stop this bill, period, pure and simple. It is their intention to stand en bloc for insurance companies and against any health reform that would protect American families from losing everything if they get sick. Their plan is just to say no; and once again they will squarely be on the wrong side of history.

When President Kennedy and later Lyndon Johnson fought for Medicare, those on the other side raised the same army of straw men they raised 30 years earlier. They played the same game they are playing again now. Senator Curtis of Nebraska at that time voiced opposition in this Chamber saying, “Medicare is not needed.” He was a Republican Senator of the time, Mr. Curtis of Nebraska, who said:

[Medicare] is not needed. It is socialism. It moves the country in a direction which is not good for anyone, whether they be young or old. It charts a course from which there will be no turning back. It is not only socialism, it is brazen socialism.

In the other body, Congressman Hall of Missouri called it “an ill-conceived adventure in government medicine.”

Those were the Republican voices of the past on Medicare. What senior in this country today—which one of our parents or grandparents—believes

those words of the past as they relate to their health care today? More straw men, more fear, more naysaying—all of it wrong then, all of it wrong now.

They said bureaucrats would come between doctors and patients. They are wrong. That is why it is interesting to see that today the American Medical Association, the Nation's doctors—the people who take care of you when you are ill, the ones who follow your progress when you have, maybe, a debilitating disease or a lifetime health challenge, your doctor, the voice of your doctor, not any Members of the Senate, the voice of your doctor in support of this historic reform—said:

This is a time of great opportunity for the American health care system. We have the chance to substantially expand health insurance coverage, implement insurance market reforms that promote greater choice, affordability and security, improve [this is the doctors speaking] the quality of the care and help Americans live longer, healthier, happier and more productive lives. To that end [the doctors of the nation say] we urge all Senators to support passage of the Patient Protection and Affordable Care Act as amended.

This is the Nation's doctors. This is your doctor who is telling the Members of the Senate: Vote for it. They do not believe the line that bureaucrats are going to come between doctors and patients. They are wrong, those who are saying that.

They called Medicare unpatriotic and un-American. They were wrong again. They said it would mean the rationing of health care. They were wrong. They made the same argument they have been making for 74 years, and they are still wrong.

In 1965, the champion of my conservative friends, Ronald Reagan, issued a 19-minute-long LP, for those of us who still remember that, a long-playing vinyl recording at the time. It is past—gone. They are like antiques now. But it was entitled “Ronald Reagan Speaks Out Against Socialized Medicine.”

It featured an impassioned 2,000-word speech intended to get people to write to their Congressman against the idea of Medicare that was beginning to make its way through the Congress. That was 1965. It was referred to as Operation Coffee Cup, something of a precursor to today's tea parties. In his record message, Ronald Reagan said:

One of the traditional methods of imposing socialism on people has been by way of medicine. . . .

Does it sound familiar, in the year 2009, in the debates we have heard here on the floor? When he became President, one of the pillars of his health policy was cutting benefits, in particular through increased cost sharing for Medicare and Medicaid recipients. He was wrong then, just as our conservative friends are wrong now.

In the face of yet another landmark piece of legislation, is it possible there is not one of my friends on the other

side who does not in their heart believe we need to pass this legislation for the good of the American people, regardless of ideology? Is there not one of my friends on the other side who will vote yes to help Americans who have lost their jobs and their health care and stand to lose everything if they or a member of their family becomes ill?

My friends, saying no to accessible, affordable health care for the American people is too big a price to pay for ideological purity. When I think of what this legislation will do, I cannot believe there will not be one vote on the other side to provide competition and affordable choices for every American, as this bill does; not one vote for greater accountability for health insurance companies; not a vote for more choice and competition for consumers, for programs that will rein in health costs and make policies more affordable.

Is this bill perfect? No. But it is a great and historic foundation of reform. Yet there will not be one vote on the other side to improve access to quality care for children, as this bill provides for, and the most vulnerable among us, which the bill does. Not a single vote for tougher accountability policies, for health insurance companies that are included in this legislation? Not one vote to require insurers to spend more of the premium revenues on health care rather than on administrative costs, executive compensation, and boosting the bottom line? Not a vote to hold health insurers accountable for excessive rate increases? Not a single vote on the other side to immediately ban insurance companies from denying children—we hear a lot about the sanctity of life—coverage for a pre-existing condition? Not one vote for expanding eligibility for tax credits for small businesses and starting the health insurance tax credit next year? That is why it is interesting to note that among the many supporters of this, the Business Roundtable, they are quoted as saying:

The proposed legislation is a step towards our shared goal of providing high quality, affordable health care for all Americans.

It is why the Small Business Majority says the managers' amendment, Senator REID's amendment, "includes new provisions essential for small business protection and survival." That is the voice of business.

Not one vote for a bill that promotes competition for insurers and choice for workers? Or to test alternatives to civil tort legislation that emphasize patient safety, disclosure of health care errors, and resolutions of disputes? Not one vote.

Not one vote for people in my home State of New Jersey and every State who will see direct and immediate benefits from this legislation? Not a vote for every uninsured Jerseyan who has a preexisting condition and has been un-

able to find affordable health insurance in the marketplace? The health of our families is not a commodity. It is not a privilege for the wealthy. It is something everyone should be able to be protected from without going broke.

Under this legislation, 1.3 million seniors in my home State will be eligible for free preventive care for recommended services. Seniors will also be eligible for free annual wellness visits to their doctors, and will be provided with a personalized prevention plan so they can stay healthy.

When this legislation is signed, we will have lived up to our promise to fill the doughnut hole, that gap in coverage under Medicare Part D, to provide affordable prescription drugs to over 227,000 seniors in New Jersey and millions across the country so they will no longer have to choose between paying their bills and taking the medication.

When this legislation is signed, over 850,000 New Jerseyans will qualify for tax credits to help them pay for health insurance, easing the burdens, premiums, deductibles, and copayments. It will make tax credits for up to 50 percent of health care premiums available to over 100,000 small businesses in New Jersey. It will also put an end to the hidden tax that is passed along to everyone in my State through increased premiums and costs to pay for the over \$1 billion spent on uncompensated care in New Jersey.

This legislation includes a health insurance exchange that would provide portability, security, and choice for 1.3 million New Jersey residents who presently do not have any health insurance whatsoever. It will increase the number of doctors, nurses, and dentists for the 150,000 New Jerseyans, 2 percent of the population who live in areas where they do not have access to primary care because of a shortage of health care providers in their communities, yet there will not be one single vote for this legislation on the other side, not a single vote for any of these health reforms to help hard-working families in my State and in States across the country.

This is the politics of no, pure and simple. I suppose it is nice to say no to health care reform when you have the full protection of health care yourself. But it is wrong to say you are unwilling to afford the same protections to others. It is nice to say no to health care reform when you and your family will not be denied coverage because of the privileged position you hold but wrong to let even one mother, one father hear that their child has been denied the medical treatment they desperately need.

I say to my friends, how dare you stand in unison on the other side of the aisle and deny to others that which you so fully enjoy yourselves. How can you deny to others that which you so fully

enjoy yourselves. It is inconceivable to me that when all is said and done, when our differences have been aired and debate has ended, that not one of my colleagues on the other side will see the historic nature of this legislation. We can be proud of this legislation. I know when the dust settles and the provisions of the bill become clear, America will be proud of it as well.

This landmark reform legislation includes State-based insurance exchanges, creating a fair, open, competitive marketplace for affordable coverage. It includes an amendment I proposed for long overdue consumer protections for emergency services. When you are getting sent to a hospital, you are not thinking about calling your company and saying: Is this the right hospital? Am I going to be covered without regard to prior authorization?

It requires insurance plans to provide behavioral health treatments, such as those for children who are autistic, as part of the minimum benefits standard. It encourages investments in new therapy to prevent, diagnose, and treat acute and chronic disease with a tax credit for innovative biotechnology research. It ensures that minor children qualify as exchange-eligible and provides for the availability of child-only health insurance coverage in the exchanges. It stops insurance companies from denying coverage for preexisting conditions, health status, or gender, and it ends the medical benefits shell game that insurers have played with people's lives.

The bottom line is this legislation helps New Jersey and America. It is fair, balanced, and fixes a badly broken system. It is truly a historic piece of legislation and will be remembered as such. Yet every one of my colleagues on the other side will vote no. They will stand against all of it, all I have talked about, firmly, once again, on the wrong side of history.

Let me conclude by saying, as I have said before, and I will say again, history calls on us to stand up on rare occasions for what is fair and just and right for the American people. This is one of those occasions. This is a time to look into your heart, a time to see beyond your own political interests, your own hard ideology, and look at the lives of millions of Americans. Think about the millions of families on Main Street, in every community, where a child wakes up in the middle of the night to a parent who cannot afford to get them the basic care they need. Ask yourself: What is the right thing to do?

This is a time to do what is right for America. It requires more than parliamentary maneuvers to slow the process. It requires more than shrill voices raised under the banner of free market values at the expense of fundamental human values. It requires doing what is right for the millions of American families who have lost their jobs

and their health care, those who have suffered from the economic policies of the last 8 years and now find themselves hurting. This is a time to remember them, a time to remember every mother who cries herself to sleep at night because she lost her job, lost her health care for herself and her infant and could lose everything she struggled for in her life, if she gets sick.

I say again to my friends, how dare you deny to her the protections that you so fully enjoy yourself. How dare you turn this into a parliamentary game of delay, deny, and defeat. Those who have continuously said no to any attempt at health care reform and yes to the needs of the insurance industry believe that the business of government is business. But for all of us who know the business of government, what it really is, it is about people. It is about those who send us here. It is their lives, their hopes, their dreams for a better life for themselves and their families. This is an opportunity to stand up for them. This is an opportunity to take care of their health care. This is an opportunity to show whose side you are on.

Are you on the side of those families or are you on the side of the special interests that would have you vote no, or the ideological interests that would have you vote no against these families? This is historic legislation. I am afraid our friends on the other side will once again, as they did in Social Security and Medicare, find themselves on the wrong side of history.

I intend to be on the right side of history and to vote yes on this legislation.

I yield the floor.

Mr. JOHNSON. Mr. President, I wish today to recognize the progress made on health care reform, as well as stress the fact that we must press forward. Americans face out-of-control health care costs, great inequalities in access to care, eroding benefits, and the ever-increasing threat of losing their health insurance. While it has not been an easy task to reach a consensus, we find ourselves very close to fixing our health care system and extending access to health insurance to over 31 million Americans.

I have heard from countless South Dakotans whose stories illustrate the urgent need for reform. Just as the diseases and health care emergencies they face cannot be postponed, it is imperative we forge ahead and deliver reforms that will improve their health and security.

I would like to share the story of Susan from Rapid City, SD, a 57-year-old woman who has nearly depleted her savings and plans to sell her home in order to pay her bills and medical expenses. Her husband passed away several years ago and she now survives on his modest pension. After exhausting COBRA health insurance, she bought

the only private health insurance policy she could afford. She was forced to accept several riders for her pre-existing conditions, arthritis and hay fever, so her insurance "won't cover the problems that will soon need attention." She also has to pay out-of-pocket for most her preventative screenings and primary care because she has not reached her \$5,000 deductible. She writes, "I feel I am paying \$250 a month for unreliable health insurance." Until she reaches Medicare age or can qualify for Medicaid, her only option is to sell down her assets to pay the bills.

Like millions of Americans, Susan is vulnerable in the non-group health insurance market, where coverage is often expensive, inadequate and certainly not guaranteed. "Without the security of group coverage," she notes, "I am very vulnerable and am one illness away from a catastrophe." Several provisions in the Patient Protection and Affordable Care Act will help Americans like Susan gain access to quality, affordable health insurance.

Under the Senate reform bill, all health insurers will be prohibited from using preexisting conditions to deny health care and it will be illegal for them to drop coverage when illness strikes. Health insurance exchanges will create an accessible marketplace for Americans to shop for the best plan to meet their needs. Health insurers will offer national plans to all Americans under the supervision of the Office of Personnel Management, the same entity that oversees health plans for Members of Congress. Tax credits will be available to make insurance more affordable for those who need assistance, and the choice of doctor will be protected. These health insurance market reforms demand greater accountability from insurance companies while creating more choice and competition for consumers.

Despite a commitment by some to kill reform and defend the status quo, I am confident the strong consensus on the urgent need for reform will prevail. The cost of inaction is too great.

Mr. LEVIN. Mr. President, the health insurance provider annual fee in the so-called merged Senate health care reform bill did not distinguish between nonprofits and for-profit insurance companies in this country, although our current tax law properly does make the distinction.

I urged that the managers' package modify the fee to continue to recognize the distinction.

Imposing the annual fee on true nonprofits, particularly those with high pay-out rates to beneficiaries, would have pushed many of those true nonprofits into deep financial difficulties and would have caused significant hardships on the families who rely on their services.

Some nonprofit insurers have not maximized the amount they pay out in

medical expenses to beneficiaries. That is why I urged the managers to include in the managers' package a provision exempting from the tax only those nonprofits with very high payout rates. Those good performers are committed to their policyholders rather than to profits for stockholders, which is the goal of the for-profits. Those good performing nonprofits are unable, as a result, to absorb the fees.

The managers' amendment specifies two ways for nonprofits to be exempt from the fee.

The first way for a nonprofit insurer to be exempt from the fee: one, it can not refuse to insure anyone in the State and is the State's insurer of last resort; two, its premium prices are regulated by its State insurance regulator; and three, it must pay out in medical expenses 100 percent or more of its premium revenues in the individual market.

The second way for a nonprofit to be exempt: the nonprofit insurer must pay out a very high percentage of its premium dollars—at least 90 percent—in medical expenses in each of the three major market segments: individual market, small group market, and the large group market; and it also must have an even higher overall payout rate of at least 92 percent. A nonprofit that compresses its margins that far beyond its peers for the benefit of its policyholders also warrants the exemption.

These exemptions continue the distinction that our tax law has recognized—that true nonprofit insurance providers should not be treated the same as their for-profit counterparts.

Mr. LEAHY. Mr. President, after months of arduous work, the Senate will finally take the first significant step toward bringing needed reforms to health care in this Nation. Opponents of reform have wasted much of the public's time by provoking arguments over their distortions about what health reform means. Opponents have tried to demonize the plan, and have claimed it will never work. We have overcome weeks of delay tactics employed by the minority—inexplicably, the most recent delay due to a filibuster against a bill to provide funding for our troops. These are the tactics of obstruction, and further demonstrate Republicans' efforts to maintain the status quo.

Is this the exact bill that any one of us would have written? Probably not. I remain disappointed that the managers' amendment before us today strips the bill of a public insurance option to compete with private plans and does not include a provision I have sponsored to repeal the antitrust exemption for health insurers and medical malpractice insurers. I believe both of these provisions would go far in providing fair competition into the health insurance market.

But in looking at this bill as a whole, I believe it stands by the core principles I sought at the beginning of this debate. It gives Americans affordable access to health care coverage, it reduces costs for families, businesses and government, and it protects consumers' ability to choose doctors, hospitals and insurance plans.

The managers' amendment introduced by the majority leader incorporates many important changes to the underlying legislation that will improve the bill. It includes several provisions that I have long supported and promoted.

Vermont has always been a national leader in expanding access to health insurance. In coordinating care, offering comprehensive coverage to children, and developing a system of electronic health records, Vermont has been at the forefront of reform. It is no surprise that for the third year in a row Vermont has been ranked the healthiest State in the Nation.

Unfortunately, a provision included in the underlying bill to expand Medicaid coverage nationwide threatened to penalize Vermont by excluding the State from increased Federal funding, solely because Vermont acted early to do the right thing. We can all share the goal of increasing access to essential medical services by expanding Medicaid coverage nationwide, but we should not penalize States such as Vermont, which demonstrated the initiative to expand its Medicaid Program early.

Senator REID's amendment, however, remedies the anomaly in the underlying bill, and will allow Vermont to access additional Federal funding when the Medicaid expansion goes into effect. I thank Senators REID and BAUCUS for working with me to ensure that Vermont's efforts to expand coverage to low income individuals is not set back by inequities in the underlying legislation.

The managers' amendment also incorporates a vital antifraud amendment Senator KAUFMAN and I, as well as Senators SPECTER, KOHL, SCHUMER, and KLOBUCHAR, introduced, derived from the Health Care Fraud Enforcement Act which we introduced earlier this fall.

This antifraud initiative builds on the impressive steps the administration has already taken to step up health care fraud prevention and enforcement, and on the real progress represented by the antifraud provisions adopted by the Finance and HELP Committees and incorporated into the leader's health care reform bill. I was glad to contribute to those efforts, and I am glad we are now going even further.

The Kaufman-Leahy provision will provide prosecutors with needed tools for the effective investigation, prosecution, and punishment of health care

fraud. By making modest but important changes to the law, it ensures that those who drain our health care system of billions of dollars each year, driving up costs and risking patient lives, will go to jail, and that their fraudulent gains will be returned to American taxpayers and health care beneficiaries.

For more than three decades, I have fought in Congress to combat fraud and protect taxpayer dollars. This spring, I introduced with Senator GRASSLEY and Senator KAUFMAN the Fraud Enforcement and Recovery Act, the most significant antifraud legislation in more than a decade. When that legislation was enacted, it provided law enforcement with new tools to detect and prosecute financial and mortgage fraud. Now, as health care reform moves through the Senate, I am glad we are taking steps to do all we can to tackle the fraud that has contributed greatly to the skyrocketing cost of health care.

The scale of health care fraud in America today is staggering. According to even the most conservative estimates, at least 3 percent of the funds spent on health care are lost to fraud—more than \$60 billion a year. In the Medicare Program alone, the General Accountability Office estimates that more than \$10 billion was lost to fraud just last year. While Medicare and Medicaid fraud is significant, it is important to remember that health care fraud does not occur solely in the public sector. Private health insurers also see billions of dollars lost to fraud. That fraud is often harder for the government to track. Private companies have less incentive to report it, and in some cases, are responsible for the fraudulent practices themselves. Reining in private sector fraud must be a part of any comprehensive health care reform.

The Kaufman-Leahy provision makes a number of straightforward, important improvements to existing statutes to strengthen prosecutors' ability to combat health care fraud. The bill would increase the Federal sentencing guidelines for health care fraud offenses. Despite the enormous losses in many health care fraud cases, offenders often receive shorter sentences than other white-collar criminals. This lower risk is one reason criminals are drawn to health care fraud. By increasing the Federal sentencing guidelines for health care fraud offenses, we send a clear message that those who steal from the Nation's health care system will face swift prosecution and substantial punishment.

The provision provides for a number of statutory changes to strengthen fraud enforcement. For example, it would expand the definition of a "Federal health care fraud offense" to include violations of the antikickback statute and several other key health care-related criminal statutes, which

will allow for more vigorous enforcement of those offenses, including making their proceeds subject to criminal forfeiture. It also clarifies the intent requirement of another key health care fraud statute in order to facilitate effective, fair, and vigorous enforcement.

The managers' amendment also includes our provision amending the antikickback statute to ensure that all claims resulting from illegal kickbacks are considered false claims for the purpose of civil action under the False Claims Act, even when the claims are not submitted directly by the wrongdoers themselves. All too often, health care providers secure business by paying illegal kickbacks, which needlessly increases health care risks and costs. This change will help ensure that the government is able to recoup from wrongdoers the losses resulting from these kickbacks.

The Kaufman-Leahy measure gives the Department of Justice limited subpoena authority for civil rights investigations conducted pursuant to the Civil Rights for Institutionalized Persons Act. This provision allows the government to more effectively investigate conditions in publicly operated institutions, such as nursing homes, mental health institutions, and residential schools for children with disabilities, where there have been allegations of civil rights violations.

These changes will strengthen our ability to crack down on fraud and will ultimately result in significant savings that will make health care more efficient and more affordable.

I am also pleased Senator REID's amendment includes a key reform to the False Claims Act that Senator SANDERS, Senator GRASSLEY, and I have proposed. By fixing the False Claims Act's public disclosure provision, we can ensure that we fairly and appropriately empower whistleblowers to come forward to expose fraud, which is a crucial way to save the government money and ensure the health and well-being of Americans.

We all agree that reducing the cost of health care for American citizens is a critical goal of health care reform. We in Congress must do our part by ensuring that, when we pass a health care reform bill, it includes all the tools and resources needed to crack down on the scourge of health care fraud. This provision is an important part of that effort.

I am also very encouraged that the amendment before us includes a measure I proposed with Senator BROWN to expand Federal Tort Claims Act medical malpractice coverage for free medical clinics. This expanded coverage will help free clinics across the Nation continue to provide and improve a critical safety net for many Americans.

In 1996, Congress enacted legislation to cover volunteer medical professionals in free clinics with medical

malpractice liability insurance through the Federal Tort Claims Act. This coverage protects volunteer medical staff against liability by substituting the Federal Government for an individual defendant. But without any explanation in the legislative history, the coverage enacted in 1996 failed to provide coverage for others who are essential to the operation of free clinics, such as nonmedical staff, contractors, board members, and the clinic itself. As a result, free clinics must use scarce funding to purchase insurance on the private market to fill this gap. This lack of comprehensive coverage for free clinics is inconsistent with the coverage provided to community health centers, which benefit from coverage for all employees. This provision will remedy this discrepancy.

This measure will have no impact on the legal rights of a patient injured by a medical error; any victim of medical malpractice will still be able to pursue a remedy for an injury under the Federal Tort Claims Act. Instead, this amendment will free up scarce resources that are currently being used to purchase liability insurance on the private market. Informal estimates indicate that this amendment could save free clinics across the country \$15 to \$20 million a year. These are funds that will be redirected to providing essential medical services to low-income and other Americans in need. For example, as a result of this amendment, the Viola Startzman Free Clinic in Wooster, OH, will save \$17,000 a year. The Americares Clinic in Stamford, CT, will save \$31,000 each year. Our hard-working free clinics in Vermont will save \$12,000 each year and will be able to put those savings toward helping Vermonters in need of health care services. For free clinics operating through volunteerism and private donations and in a difficult economy, these are substantial sums that if devoted to the care of Americans in need will have a significant positive impact.

And the savings realized through this amendment will cost the taxpayers little if anything. Free clinics do not perform high-risk procedures such as obstetrics or surgeries, and thus are subject to a lesser risk of liability. Since 2004, when funds were first appropriated and set aside to cover any claims against free clinic doctors, no claims have been filed. The bottom line is that this amendment represents significant value to Americans in need of health care services at little cost to the government and the taxpayer.

I thank Senator BROWN for his support as a cosponsor, and I thank the majority leader, Senator HARKIN, and Senator BAUCUS for working with me to make this amendment part of the historic legislation before the Senate.

Over the course of the past month, I have listened to many of my friends on the other side of the aisle. It is not sur-

prising that frequently they have argued for one of their pet proposals—medical malpractice reform. For as long as I have served in this Chamber, I have fought against court-stripping measures that limit American's access to their justice system. I have also fought to protect the sovereignty of States to make rules for their own justice systems. Medical malpractice claims are based on State law and for the most part take place in State courts. I find it curious that some of the same Senators who pledge loyalty to federalism and the sovereignty of the States under the tenth amendment are some of the same Senators who are so aggressively pushing for a Federal "one-size-fits-all solution" for the justice systems in our 50 States.

The managers' amendment includes a provision addressing malpractice liability that has been introduced on a bipartisan basis several times over the past few years. I support this provision because it respects the States' primary role in adjudicating the claims of patients injured or killed by medical errors. I also support this provision because it resists the notion that "one-size-fits-all" when it comes to litigation issues and it includes the necessary safeguards for patients. I note for the RECORD that several States' efforts to reform medical malpractice liability have been struck down as unconstitutional. For example, Alabama, Florida, Georgia, Illinois, Kansas, New Hampshire, Ohio, Oregon, South Dakota, Washington, and Wisconsin have all enacted caps on damages associated with medical malpractice claims. And all of those State laws were struck down as unconstitutional for good reason. I am heartened that no such amendment was seriously considered in this Chamber because such arcane measures hurt our children, our senior citizens, and stay-at-home moms. The Wall Street Journal has reported on this clear fact when it pointed out that these caps deprive these groups of access to justice. If we create Federal caps on their ability to recover from serious injuries we are telling them that they are worth less because they are retired or they choose to stay home and raise a family or are young children. This is not fair. I know that no doctor wants to harm a patient, but the solution is not to take away the rights of patients who are seriously injured.

The provision in the managers' amendment does not encourage draconian damages caps and does not dictate what reforms States must consider. Importantly, however, it does include specific patient protections that must be in place before a State can receive a grant for liability reform measures. To the extent that States can pass measures that improve patient safety as well as expedite damages recovery for victims, those reforms will truly improve our health care system.

I am disappointed, however, that the Health Insurance Antitrust Enforcement Act, which I introduced in September, was not part of the managers' amendment, and will not be part of the Senate's health reform legislation. That legislation would repeal the antitrust exemption for health insurers and medical malpractice insurers, and is an integral part of injecting competition into the health insurance market.

While there are differing views on the best way to inject competition into the health insurance market, we can all agree that health and medical malpractice insurers should not be allowed to engage in blatantly anticompetitive practices, such as colluding to set prices and allocating markets. My repeal would ensure that basic rules of fair competition will apply to insurers, and is nonpartisan.

My amendment was cosponsored by 23 Senators, and has support from a cross-section of consumer rights organization. I look forward to working to include this repeal when the Senate and House conference to reconcile their versions of the legislation.

The managers' amendment will improve the underlying bill, and I hope my fellow Senators will support its passage so we can move toward final passage of the bill. Each day that passes without reform, 30 more Vermonters lose their health insurance. We know our current health system is unsustainable. That threatens not only our health security, but also our economic security. Doing nothing has been seen as an option before, but it simply is not an option now.

I hope now we can work together to pass a bill that will give millions more Americans access to quality, affordable health care. We should reject the tactics of delay and the efforts to obstruct, and remember that the Senate should be the conscience of the Nation. With the Christmas season upon us, our constituents are looking to us to do the right thing. We should adopt this amendment, advance this legislation, and work to send it to the President without undue delay.

Mr. GRASSLEY. Mr. President, one longstanding priority of mine has been to improve Medicare payments for hospitals known as tweekers. They tend to have too many beds, so they can't qualify as critical access hospitals, but they do not have sufficient volume to operate viably under Medicare's prospective payment systems. There are a number of these tweeker hospitals in Iowa.

Working closely with the Iowa Hospital Association and individual Iowa hospitals over the years, I introduced, last Congress, the Rural Hospital Assistance Act of 2008, S. 3300, which would improve the low-volume adjustment for hospitals under Medicare's hospital inpatient prospective payment

system. This improvement would enable twener hospitals to benefit from this adjustment.

In fact, the low volume adjustment provision in the Finance Committee's health reform bill, S. 1796, and the Reid substitute to H.R. 3590 is the language that I crafted. This language was crafted with the intention of benefiting all Iowa twener hospitals. I was assured by the Iowa Hospital Association that this language would do so, and they supported it.

Unfortunately, after the Finance Committee markup of S. 1796, I learned from the Iowa Hospital Association that the language they originally supported would not benefit all Iowa twener hospitals. I was informed that several Iowa twener hospitals had Medicare discharges in excess of the maximum in the provision, which was 1,500.

In an attempt to make sure that all Iowa twener hospitals benefit from this provision, I filed an amendment that would increase the maximum number of Medicare discharges from 1,500 to 1,600. This amendment was also offset. My staff was successful in working with the majority staff to include my amendment in the manager's amendment to the Reid substitute.

Mr. INHOFE. Mr. President, on Monday morning at 1 a.m., I voted no on the cloture motion to the latest Reid managers' package, which was only made available Saturday, because I am adamantly opposed to this \$2.5 trillion government-run health care system with its $\frac{1}{2}$ trillion increase in taxes on Americans and nearly $\frac{1}{2}$ trillion in cuts to Medicare to help pay for it. I am opposed to public financing of abortion this bill allows. I am opposed to a façade of health care reform that in no way seriously addresses tort reform and will only increase premiums and the cost of health care for all Americans. I am opposed to the special deals for only certain States in this bill to buy off votes. I am opposed to the special deals for only certain States in this bill to buy off votes. I am opposed to the increased burden of at least \$26 billion on States including Oklahoma mandated under this bill. I am opposed to no serious effort at all to include any amendments from Republicans. Republican amendments to block tax increases, block cuts to Medicare, impose tort reforms, try to impose some kind of discipline on the government take-over of health care in this country, among other amendments and motions have failed by nearly party-line votes. I am opposed to this bill, and most importantly, the American people are opposed to this bill. They know this bill is a complete disaster. The next few votes leading up to the final vote on this package are all procedural votes, and I will be opposed to them all. But all 60 Democrats will vote for them. Democrats do what they are

told. The votes include accepting this new Reid managers' package, cloture on the original Reid substitute, accepting the original Reid substitute, cloture on the underlying bill, and finally the final passage of his colossal mistake. Since I am opposed to each one of these votes, I will not remain in Washington to vote against these procedural maneuvers since that will have the same effect as voting no, and will return to vote against final passage of this bill.

MORNING BUSINESS

Mr. DURBIN. Mr. President, I ask unanimous consent that the Senate proceed to a period of morning business with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE IMPORTANCE OF RENEWING THE BIODIESEL TAX CREDIT

Mr. MCCONNELL. Mr. President, on December 31, 2009, the current biodiesel tax credit will expire. This tax credit increases domestic demand and provides an incentive for U.S. producers to increase investment and output. It is essential in producing biodiesel and allowing it to compete with petroleum diesel. Without the tax credit, petroleum marketers will be unwilling to purchase the more expensive biodiesel, and demand will be heavily reduced.

As all of my colleagues know, the biodiesel tax credit provides a \$1-per-gallon credit for biodiesel made from soybean oil or yellow grease and animal fats. The original version of this tax credit was passed in 2004 and has been extended twice, most recently in October 2008.

As a result, the U.S. biodiesel industry has grown significantly over the past several years, providing not just jobs but also the green jobs this administration and many of my friends on the other side of the aisle have so adamantly supported. However, the combination of volatile commodity prices and weak motor fuel demand caused by the current recession has severely affected the biodiesel industry for the worse and therefore increases our urgency to extend the credit today.

In Kentucky, public school districts, universities, National and State parks, local governments, and the Transportation Cabinet are using biodiesel blends. These institutions and many Kentucky employers, including manufacturers in Kentucky, will be hurt beginning on January 1 if we allow this tax credit to expire. One executive of a biofuel manufacturing facility wrote to me to say:

The \$1-per-gallon tax incentive is truly the difference between the survival and collapse of this important industry. Without this tax incentive, thousands of jobs will be lost with

plants closing down almost immediately after January 1. And the nation will lose a vital link in its effort to reduce our dependence on foreign oil.

As we continue our important business, I implore my colleagues on the other side of the aisle to work to get the extenders finished this year and to include the renewal of the biodiesel tax credit.

LIU XIAOBO

Mr. LEAHY. Mr. President, I want to speak briefly about the indictment and trial by Chinese authorities of Mr. Liu Xiaobo for "incitement of state subversion." The evidence cited in support of the charges were Mr. Liu's essays and association with Charter 08, a framework for democracy, human rights and the rule of law that was made public a year ago this month.

That document was signed by Mr. Liu and some 300 other intellectuals and activists. Thousands more people have since added their names, most of them from inside China. I am told that Charter 08 is widely regarded as the most significant democratic reform movement in China in a decade.

The charges against Mr. Liu are very disappointing. They illustrate how little has improved in China regarding tolerance for freedom of expression. I am informed that the Chinese Government has decided to bring Mr. Liu to trial, that international observers are permitted under Chinese law, and this is consistent with international legal standards on the openness and transparency of legal proceedings. I mention this because I am aware that former Governor of Pennsylvania and U.S. Attorney General Richard Thornburgh has expressed a strong interest in attending the trial as an observer, to show support for Mr. Liu and to convey the concern that he and others around the world have for the larger implications of this case.

The arrest of Mr. Liu demonstrates a continuing, disturbing trend in China. As Governor Thornburgh has written:

in recent years, China's leaders seemed to be tolerating changes in the legal system. The number of private lawyers and law firms has grown exponentially. Lawyers and citizens energetically began pursuing rights in court. A "wei quan," or "rights defense" movement, grew up around lawyers and activists seeking to use the laws on the books, and the institutions allowed by law, to assert and defend human rights without challenging the underpinnings of China's communist system. Such efforts were tolerated at first, and there were even modest signs of greater professionalism in the communist judicial system.

Unfortunately, initial signs of progress have given way to serious setbacks. Many lawyers who take on politically-sensitive cases have been subject to a kind of backdoor disbarment, finding it impossible to renew their licenses. Some lawyers have been the target of surveillance, confined to house arrest, the victims of physical attacks,

raids and confiscation of their property. Law firms and other groups pursuing law in the public interest have been shut down.

Moreover, there has been an alarming increase in the use of "subversion" or state security charges leveled against activists. These cases have become a substitute for the old "counter-revolutionary" crimes. Others convicted on such grounds include Hu Jia, the AIDS activist who also criticized abuses surrounding the staging of the Summer 2008 Olympic Games and Huang Qi, who posted public information on his website about the government's response to the Sichuan earthquake.

Liu's prosecution requires a serious response from the United States. Cooperating with China on other issues like the environment or North Korea does not mean we must silence ourselves when it comes to the rights and freedoms of China's citizens. Indeed, we are unlikely to get meaningful cooperation on any issue when we appear weak in defense of our principles, which as President Obama has said many times—most recently in his speech accepting the Nobel Peace Prize—are universal principles.

I agree, and hope the Chinese authorities reconsider this case, release Mr. Liu, and dismiss the charges against him. There are so many issues on which we want to expand our cooperation with China, but the persecution of courageous Chinese citizens who are guilty of nothing more than exercising rights guaranteed by the Universal Declaration of Human Rights hinders that cooperation and China's own development.

If the charges are not dismissed, and Mr. Liu is brought to trial, his trial should be attended by outside observers including top officials of the U.S. Embassy and Governor Thornburgh. I hope the Department of State and our diplomats in Beijing will assist Governor Thornburgh, including in obtaining a visa and access to the trial. It is important that the Chinese Government, and the Chinese people, know how strongly we deplore what is being done to Mr. Liu, and what it says about the need for China to meet its own commitments to respect internationally recognized human rights.

NATIVE AMERICAN APOLOGY RESOLUTION

Mr. AKAKA. Mr. President, today, I want to speak about a matter of significance to our Nation. As part of the Defense appropriations bill, Congress has enacted an apology to our Native Peoples for the historical wrongs that our Nation has committed against them. I am proud to have served as a cosponsor of the stand-alone apology resolution, S.J. Res 14, and commend Senators BROWNBACK, DORGAN, and INOUE for ensuring this needed apology will be made.

From the beginning, Native peoples welcomed early colonists at Plymouth Rock and in Virginia, and in my home State of Hawaii, the Kingdom of Hawaii extended the aloha spirit to our visitors. During the American Revolution,

the United States entered into military alliances with Indian nations to secure assistance in winning our independence. As a nation, we pledged to respect the rights of Indian nations to self-government, self-determination and territorial integrity.

Our Constitution recognizes native nations as prior sovereigns, with a continuing right to self-government in the Indian commerce, apportionment, treaty and supremacy clauses. The United States entered into 370 treaties with Indian nations and treaties of peace, friendship and commerce with the Kingdom of Hawaii. In many ways, the United States broke these treaties and engaged in acts of war against our Native peoples, taking lands by force, displacing Native peoples and leaving them in poverty and suffering. At times, the United States informed indigenous, Native peoples that their continued residence on their original lands would be considered an act of war against the U.S. and if they did not leave, U.S. military forces commenced wars, imprisoned and killed Native leaders and people, and tragically, at places like Sand Creek and Wounded Knee massacred Native men, women, and children.

Congress and the executive branch enacted laws and policies that took Native children out of their homes and forced them to attend boarding schools, far from their families in an effort to suppress Native cultures and languages. Our Nation denied Indian nations religious freedom. And these wrongs did not end in the 19th century. The United States continued to take Native lands for various purposes, and in many cases has failed to safeguard Native lands, waters, and resources.

For these things, our Nation should and now does apologize. I commend my colleagues, Senator BROWNBACK, Senator DORGAN and our Senate Appropriations chairman, Senator INOUE, for leadership on this important and historic apology. I know from experience that an apology can bring healing and reconciliation. Congress passed the Native Hawaiian Apology Resolution, Public Law 103-150, in 1993 and it has had a profound impact.

I encourage President Obama to issue an apology to our Native peoples that truly reflects the many wrongs that we should apologize for to Native peoples. The strength and resilience of our indigenous people, America's first people must be acknowledged. Despite the many transgressions made against our Nation's first people, American Indians, Alaska Natives, and Native Hawaiians continue to make meaningful contributions to the United States. This apology will be a historic act that can bring reconciliation and healing between our Native peoples and the American people as a whole.

Mr. BROWNBACK. Mr. President, I would also like to highlight a section

of this conference report that means a great deal to many American Indian tribal leaders in this country, to several of my colleagues and to me personally, the Native American apology resolution.

I am very pleased to report that with the addition of this language in the defense appropriations conference report, we—the United States of America—will officially apologize for the past ill-conceived policies and maltreatment by the United States toward the Native peoples of this land.

With the passage of this language, we, as a Nation, will reaffirm our commitment toward healing our Nation's wounds rooted in a difficult past of Federal-tribal relations and work toward establishing better relationships rooted in reconciliation and forgiveness.

Native Americans have a vast and proud legacy on this continent. Long before 1776 and the establishment of the United States of America, native peoples inhabited this land and maintained a powerful physical and spiritual connection to it. In service to the Creator, Native peoples sowed the land, journeyed it, and protected it. The people from my State of Kansas have a similar strong attachment to the land.

Like many in my State, I was raised on the land. I grew up farming and caring for the land. I and many in my State established a connection to this land as well. We care for our Nation and the land of our forefathers so greatly that we too are willing to serve and protect it, as faithful stewards of the creation with which God has blessed us. I believe without a doubt citizens across this great Nation share this sentiment and know its unifying power. Americans have stood side by side for centuries to defend this land we love.

Both the Founding Fathers of the United States and the indigenous tribes that lived here were attached to this land. Both sought to steward and protect it. There were several instances of collegiality and cooperation between our forbears—for example, in Jamestown, VA, Plymouth, MA, and in aid to explorers Lewis and Clark.

Yet, sadly, since the formation of the American Republic, numerous conflicts have ensued between our government, the Federal Government, and many of these tribes, conflicts in which warriors on all sides fought courageously and which all sides suffered. Even from the earliest days of our Republic there existed a sentiment that honorable dealings and a peaceful coexistence were clearly preferable to bloodshed. Indeed, our predecessors in congress in 1787 stated in the northwest ordinance: "The utmost good faith shall always be observed toward the Indians."

Today we live up to this goal, today, we right a wrong that has been committed in this Nation.

This amendment extends a formal apology from the United States to tribal governments and Native peoples nationwide—something we have never done; something we should have done years and years ago.

Further, this resolution will not resolve the many challenges still facing Native Americans, nor will it authorize, support or settle any claims against the United States. It doesn't have anything to do with any property claims against the United States. That is specifically set aside and not in this bill.

What this amendment achieves is recognition, honor, and the importance of Native Americans to this land and to the United States in the past and today and offers an official apology for the poor and painful path the U.S. Government sometimes made in relation to our Native brothers and sisters by disregarding our solemn word to Native peoples. It recognizes the negative impact of numerous destructive Federal acts and policies on Native Americans and their culture, and it begins—begins—the effort of reconciliation.

Apologies are oftentimes difficult, but like treaties, go beyond mere words and usher in a true spirit of reconciling past differences and help to pave the way toward a united future—a future that transcends the individual but strives to reach into eternity. The notion of the creation of the “Beloved Community” that Dr. King spoke of . . . that my good friend representative JOHN LEWIS speaks of is very appropriate at this moment for this time. “The end is reconciliation, the end is redemption, the end is the creation of the beloved community.” This is our goal; this is my hope for our Nation united as one people.

AUNT ANNE IS 100 YEARS OLD TODAY

Mr. SPECTER. Mr. President, today is a momentous day in the history of the Specter/Shanin family. My aunt Anne Shanin Kleiman is 100 years old.

My Tante Annie, that's the Jewish name for Aunt Annie, is the younger sister of my mother, Lillie Shanin Specter. Annie is an outstanding scholar who published a book on Hebrew poetry.

She was the first person who taught me about Israel. She traveled to Israel before Israel was declared a state, when it was called Palestine. She sent me a beautiful wooden camel as a starting point to describe Biblical Canaan which later was called Palestine and is now Israel.

Annie married a distinguished scientist/chemist, Dr. Morton Kleiman, and had two brilliant children, Dr. Adina Sue Kensky and Dr. Jay Kleiman who has two accomplished children and two adorable grandchildren.

During the Depression when times were very tough and my family was struggling, Annie loaned my father \$500, an act of real generosity in tough times. Over the years, I have visited her many times, sought her advice, savored her excellent cooking, and enjoyed her company.

My first visit was to Chicago, where she has lived for many years. There I saw the marvels of the World's Fair. I rode in a scary cable car over Lake Michigan and was hoisted on to the stage by my father on a sideshow with an Indian chief. This occurred in the midst of the Depression when my family was en route from Wichita, KS, where we had lived, to Philadelphia, PA, to live with my father's sister because my father could not earn a living in Kansas.

Recently, not unexpectedly, Annie has become infirm. When I have visited in recent years, it has been difficult to talk to her, but last night we had a nice conversation over the phone.

Her longevity has set a remarkable family record evidencing good genes and setting a Strom Thurmond-like target to emulate. She is a wonderful woman, a wonderful aunt, and a wonderful role model.

Happy Birthday, Tante Annie!

ADDITIONAL STATEMENTS

RECOGNIZING ESTABROOK'S

• Ms. SNOWE. Mr. President, with Christmas just a few short days away, we have all witnessed the signs of the season popping up in our neighborhoods. From vibrant wreaths and Christmas trees to wind-blown snow banks, these peaceful symbols provide many of us with a comforting feeling of home. Today I recognize a small Maine nursery that grows its own beautiful poinsettias, and supplies many other seasonal flora, to accentuate the beauty of the Christmas season.

Estabrook's has been a reliable family-owned, full service garden center for more than 50 years. Located in the coastal town of Yarmouth, Estabrook's grows fresh plants in its over 20 greenhouses and outdoor growing areas. The company also operates seasonal locations in Scarborough and, beginning earlier this year, in Kennebunk. Home to an abundance of trees and shrubs, perennial and annual flowers, and seeds for growing vegetables, Estabrook's also carries a variety of gardening supplies, such as chemicals, fertilizers and tools. In an effort to better inform its customers about the wonders of gardening, Estabrook's user-friendly website offers a variety of tips and best practices regarding caring for flowers and plants.

To properly celebrate the holidays, Estabrook's provides its clients with an abundance of seasonal items. For

example, during the Christmas season the nursery creates stunning fresh centerpieces and grows its own brilliant red poinsettias. Additionally, aside from Christmas trees and wreaths, the company stocks a variety of garlands, roping, and other timely decorating supplies and ornaments to bring home the memorable sights and smells of the season.

Beyond its role as a stellar nursery, Estabrook's prides itself as being an extraordinarily active member of the local community. The company has widely promoted the Herbie Project, an undertaking to save New England's largest American Elm Tree, known to locals as Herbie. This initiative is particularly noteworthy given that Yarmouth has lost roughly 800 American Elm trees to Dutch Elm Disease over the past fifty years. Additionally, Estabrook's has donated its gift certificates, cleverly known as “Estabucks,” to community efforts, including the Holiday Boast N Toast Auction to benefit the Yarmouth Chamber of Commerce's Scholarship Fund and YarmouthCAN, a nonprofit that assists those needing a helping hand. The nursery has also taken great strides toward creating the Yarmouth Community Garden, which raises vegetables that are then donated to the area's disadvantaged individuals and families.

A well-known and trusted name in the community for over half a century, Estabrook's is a valued business in the town of Yarmouth because of its longstanding dedication to quality greenery and its visible presence in civic endeavors townwide. I thank everyone at Estabrook's for their caring and kind commitment to others, and wish them a happy and safe holiday season. •

SOUTH DAKOTA SCHOOL OF MINES AND TECHNOLOGY

• Mr. THUNE. Mr. President, today I recognize the South Dakota School of Mines and Technology, which will celebrate their 125th anniversary in 2010.

Located in Rapid City, the South Dakota School of Mines and Technology has been a national leader in preparing world-class engineers and scientists since 1885. Graduates design, construct, and operate the most modern technology to meet complex challenges such as climate change, bioenergy, mineral extraction and processing, advanced materials, environmental quality, and national defense. School of Mines alumni are held in the highest regard by their fellow leaders in industry, consulting, government, health, research, and education.

The School of Mines is proud to be a leading partner in bringing the Deep Underground Science and Engineering Laboratory, DUSEL, from an extraordinary vision to a phenomenal reality. The longstanding connections between the School of Mines and the Homestake

Mine began in 1885 when the university was established to meet the growing research needs of the mining industry, led by Homestake. These connections continued when nearly a decade ago, the School of Mines helped champion the conversion of the mine into a national laboratory. Today, as we continue to prepare leaders in engineering and science, we are collaborating with our colleagues to transform Homestake into a world-class laboratory to further exceptional research and discoveries not yet imagined.

Rugged individuals and pioneers in engineering and science founded the School of Mines' intellectual environment more than a century ago. The university's faculty, staff, students, and alumni carry on that tradition today. In 2010, the School of Mines celebrates 125 years of award-winning faculty, staff, and students collaborating to solve issues of critical importance to South Dakota, the nation, and the world. Please join me as we celebrate their legacy of educating the leaders of tomorrow.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Neiman, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-4126. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Revisions to the California State Implementation Plan, South Coast Air Quality Management District" (FRL No. 9087-3) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Environment and Public Works.

EC-4127. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Virginia; Update to Materials Incorporated by Reference; Correction" (FRL No. 9093-6) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Environment and Public Works.

EC-4128. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Change of Address for Submission of Certain Reports; Technical Corrections" (FRL No. 9093-5) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Environment and Public Works.

EC-4129. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; California; Monterey Bay Region 8-Hour Ozone Maintenance Plan" (FRL No. 8983-4) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Environment and Public Works.

EC-4130. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Maintenance Plan for Carbon Monoxide; State of Arizona; Tucson Air Planning Area" (FRL No. 8982-4) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Environment and Public Works.

EC-4131. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report entitled "National Coverage Determinations"; to the Committee on Finance.

EC-4132. A communication from the Chief of the Trade and Commercial Regulations Branch, Customs and Border Protection, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Countries Whose Pleasure Vessels May Be Issued Cruising Licenses" (CPB Dec. 08-27) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Finance.

EC-4133. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Permitted Disparity in Employer-Provided Contributions or Benefits" (Rev. Rul. 2009-40) received in the Office of the President of the Senate on December 10, 2009; to the Committee on Finance.

EC-4134. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Unpaid Loss Discount Factors for 2009" (Rev. Proc. 2009-55) received in the Office of the President of the Senate on December 10, 2009; to the Committee on Finance.

EC-4135. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report entitled "Report to Congress on Head Start Efforts to Prevent and Reduce Obesity in Children"; to the Committee on Health, Education, Labor, and Pensions.

EC-4136. A communication from the Chairman, Securities and Exchange Commission, transmitting, pursuant to law, a report relative to the inventory of activities for fiscal year 2009 under the FAIR Act; to the Committee on Homeland Security and Governmental Affairs.

EC-4137. A communication from the Inspector General, General Services Adminis-

tration, transmitting, pursuant to law, the General Services Administration's Office of Inspector General's Semiannual Report for the period of April 1, 2009 through September 30, 2009; to the Committee on Homeland Security and Governmental Affairs.

EC-4138. A communication from the Deputy Secretary of Defense, transmitting, pursuant to law, the Department's Office of Inspector General's Semiannual Report for the period of April 1, 2009 through September 30, 2009; to the Committee on Homeland Security and Governmental Affairs.

EC-4139. A communication from the Staff Director, United States Commission on Civil Rights, transmitting, pursuant to law, the report of the appointment of members to the Iowa Advisory Committee; to the Committee on the Judiciary.

EC-4140. A communication from the Acting Chief of the Border Security Regulations Branch, Office of the Secretary, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Administrative Process for Seizures and Forfeitures Under the Immigration and Nationality Act and Other Authorities" (RIN1651-AA58) received in the Office of the President of the Senate on December 15, 2009; to the Committee on the Judiciary.

EC-4141. A communication from the Department of State, transmitting, pursuant to law, a report relative to the transfer of detainees (OSS Control No. 2009-2057); to the Committee on the Judiciary.

EC-4142. A communication from the Assistant Attorney General, Office of Legislative Affairs, Department of Justice, transmitting, pursuant to law, the Fourth Quarterly Report from the Attorney General to Congress; to the Committee on Veterans' Affairs.

EC-4143. A communication from the Secretary of the Federal Trade Commission, transmitting, pursuant to law, a report entitled "Federal Trade Commission Report to Congress on The U.S. SAFE WEB Act: The First Three Years"; to the Committee on Commerce, Science, and Transportation.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mrs. BOXER, from the Committee on Environment and Public Works, without amendment:

H.R. 2188. A bill to authorize the Secretary of the Interior, through the United States Fish and Wildlife Service, to conduct a Joint Venture Program to protect, restore, enhance, and manage migratory bird populations, their habitats, and the ecosystems they rely on, through voluntary actions on public and private lands, and for other purposes (Rept. No. 111-111).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. SPECTER:

S. 2918. A bill to make improvements to certain loan programs under the Small Business Act and the Small Business Investment Act of 1958, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. UDALL of Colorado (for himself, Mr. SCHUMER, Mr. LIEBERMAN,

Ms. SNOWE, Mrs. BOXER, Ms. COLLINS, and Mrs. GILLIBRAND):

S. 2919. A bill to amend the Federal Credit Union Act to advance the ability of credit unions to promote small business growth and economic development opportunities, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. LAUTENBERG (for himself and Mr. UDALL of New Mexico):

S. 2920. A bill to amend chapter 1 of title 23, United States Code, to condition the receipt of certain highway funding by States on the enactment and enforcement by States of certain laws to prevent repeat intoxicated driving; to the Committee on Environment and Public Works.

By Mrs. FEINSTEIN:

S. 2921. A bill to provide for the conservation, enhanced recreation opportunities, and development of renewable energy in the California Desert Conservation Area, to require the Secretary of the Interior to designate certain offices to serve as Renewable Energy Coordination Offices for coordination of Federal permits for renewable energy projects and transmission lines to integrate renewable energy development, and for other purposes; to the Committee on Energy and Natural Resources.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mrs. FEINSTEIN (for herself, Mr. CORNYN, Mr. CARDIN, and Mr. BROWNBACK):

S. Res. 382. A resolution supporting the goals and ideals of observing the National Slavery and Trafficking Prevention Month from January 1 through February 1, 2010, to raise awareness of, and opposition to, modern slavery; considered and agreed to.

By Mr. MCCAIN (for himself, Mr. KERRY, Mrs. LINCOLN, Mr. INOUE, Mr. BEGICH, Mr. FEINGOLD, Mr. SPECTER, Mr. GRASSLEY, Mr. BURR, Ms. COLLINS, Ms. MURKOWSKI, and Mr. COCHRAN):

S. Res. 383. A resolution designating January 2010 as "National Mentoring Month"; considered and agreed to.

ADDITIONAL COSPONSORS

S. 583

At the request of Mr. PRYOR, the name of the Senator from Louisiana (Ms. LANDRIEU) was added as a cosponsor of S. 583, a bill to provide grants and loan guarantees for the development and construction of science parks to promote the clustering of innovation through high technology activities.

S. 619

At the request of Mr. MENENDEZ, his name was added as a cosponsor of S. 619, a bill to amend the Federal Food, Drug, and Cosmetic Act to preserve the effectiveness of medically important antibiotics used in the treatment of human and animal diseases.

S. 1798

At the request of Mr. SANDERS, the name of the Senator from Alaska (Mr.

BEGICH) was added as a cosponsor of S. 1798, a bill to provide for the automatic enrollment of demobilizing members of the National Guard and Reserve in health care and dental care programs of the Department of Veterans Affairs, and for other purposes.

S. 1810

At the request of Mr. HARKIN, the name of the Senator from Illinois (Mr. DURBIN) was added as a cosponsor of S. 1810, a bill to direct the Secretary of Health and Human Services to publish physical activity guidelines for the general public, and for other purposes.

S. 2736

At the request of Mr. FRANKEN, the name of the Senator from Colorado (Mr. BENNET) was added as a cosponsor of S. 2736, a bill to reduce the rape kit backlog and for other purposes.

S. 2781

At the request of Ms. MIKULSKI, the names of the Senator from New York (Mrs. GILLIBRAND), the Senator from Minnesota (Ms. KLOBUCHAR), the Senator from Michigan (Ms. STABENOW) and the Senator from North Carolina (Mrs. HAGAN) were added as cosponsors of S. 2781, a bill to change references in Federal law to mental retardation to references to an intellectual disability, and to change references to a mentally retarded individual to references to an individual with an intellectual disability.

S. 2796

At the request of Mr. BARRASSO, his name was added as a cosponsor of S. 2796, a bill to extend the authority of the Secretary of Education to purchase guaranteed student loans for an additional year, and for other purposes.

S. 2917

At the request of Mr. BAUCUS, the name of the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 2917, a bill to amend the Internal Revenue Code of 1986 to modify the penalty for failure to disclose certain reportable transactions and the penalty for submitting a bad check to the Internal Revenue Service, to modify certain rules relating to Federal vendors, and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SPECTER:

S. 2918. A bill to make improvements to certain loan programs under the Small Business Act and the Small Business Investment Act of 1958, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

Mr. SPECTER. Mr. President, I have sought recognition to introduce the Helping Small Business Succeed Act of 2009. My legislation will make it easier for small businesses to access credit, credit which they desperately need to be able to cover their costs, grow their businesses, and create jobs.

Small businesses are the engine of economic growth in this country, responsible for 60 percent of new jobs created. The Commonwealth of Pennsylvania alone has 978,831 small businesses, which bring economic opportunities to diverse groups of people, innovate new technologies, and provide valuable services to their communities. Of these small businesses, 236,775 are small employers who represent 98.4 percent of Pennsylvania's employers and 49.9 percent of its private-sector employment. It is not an understatement to say that small businesses and their ability to grow are vital to the health of Pennsylvania and of the Nation.

Earlier this month, the Labor Department released jobs figures indicating that unemployment has dropped from 10.2 percent in October to 10 percent in November, and that the economy shed only 11,000 jobs, which was well below analysts' expectations. While these numbers are encouraging, leading economists such as Joseph Stiglitz have stated that recovery will be slow unless we continue to take strong measures.

When I voted for the stimulus, we were facing a recession that could well have developed into a full-fledged depression like we faced in 1929. The stimulus provided \$630 million to the Small Business Administration, SBA, to guarantee private sector loans to small businesses, which allowed the SBA to raise its loan caps, and increased SBA guarantees from 75–80 percent to 90 percent in its two major business loan programs. These provisions have proven effective in providing credit to small business, but more needs to be done. My legislation permanently increases the loan limit from \$2 million to \$5 million on 7(a) loans, from \$1.5 million to \$5.5 million on 504 loans, and from \$35,000 to \$50,000 on microloans.

Simply raising loan limits is not enough, however. Raising the SBA's guarantee will increase commercial lenders' willingness to provide loans because it reduces the risk undertaken by lenders. My legislation raises the maximum loan guarantee percentage to 97.5 percent, which will quickly and efficiently incentivize the existing network of financial institutions to make affordable loans to small business. Additionally, my legislation extends the waivers for the 7(a) borrower fees and the 504 borrower and bank fees, which were enacted as part of the stimulus package, until 2011.

Finally, my legislation authorizes the SBA to declare certain communities "economic disaster areas" and to provide further assistance to small businesses within these areas. The economic situation in many towns across America has risen to emergency levels. Unemployment in some counties in Pennsylvania has risen as high as 12 and 14 percent. My legislation will provide the SBA with greater flexibility to

use its funds to target areas of the country where the level of unemployment exceeds the national level and where small businesses have been hit the hardest.

According to the October 2009 Special Inspector General Report to Congress, taxpayers have seen \$73 billion in TARP funds returned so far with a 10 percent return on their investment. As of September 30, 2009, \$9.5 billion in interest, dividends, and other income has had been received by the federal government. My legislation uses this revenue, derived from investments made through TARP, to pay for these urgently needed adjustments.

Small businesses need access to credit and they need it now more than ever, if they are to weather current economic conditions. I look forward to working with my colleagues to provide further assistance to the small business community and to help restore their ability to create jobs and stimulate our economy.

By Mrs. FEINSTEIN:

S. 2921. A bill to provide for the conservation, enhanced recreation opportunities, and development of renewable energy in the California Desert Conservation Area, to require the Secretary of the Interior to designate certain offices to serve as Renewable Energy Coordination Offices for coordination of Federal permits for renewable energy projects and transmission lines to integrate renewable energy development, and for other purposes; to the Committee on Energy and Natural Resources.

Mrs. FEINSTEIN. Mr. President, I rise today to introduce the California Desert Protection Act of 2010.

I strongly believe that conservation, renewable energy development, and recreation can and must coexist in the California Desert—and this legislation strikes a carefully conceived balance between these sometimes competing concerns.

The key provisions of this bill would designate two new national monuments—the Mojave Trails and the Sand to Snow National Monuments.

It would add adjacent lands to the Joshua Tree and Death Valley National Parks and the Mojave National Preserve; designate 5 new BLM wilderness areas and protect 4 important waterways, such as the Amargosa River and Deep Creek, as Wild and Scenic Rivers; improve the process to permit large-scale wind and solar development on suitable public and private lands in the California desert; and enhance recreational opportunities in the desert, while ensuring that the training needs of the military are met.

This bill is the product of painstaking discussions with key stakeholders—including environmental groups, local and State government, off-highway recreation enthusiasts,

hunters, cattle ranchers, mining interests, the Department of Defense, wind and solar energy companies, California's public utility companies, and many others. I am grateful for all of their efforts.

The bill is divided into two titles.

The first title primarily covers conservation, recreation, and other purposes.

The second title of the bill covers renewable energy development on suitable lands.

Taken together, this bill will shape the future of the Southern California Desert, and I believe it can serve as a model for future efforts to balance renewable energy development and conservation.

As of today, this bill has been endorsed by: the California Wilderness Coalition; the Wildlands Conservancy; the Wilderness Society; the National Parks Conservation Association; Friends of the River; Cogentrix Energy; Edison International, parent company of Southern California Edison; Friends of Big Morongo Canyon Preserve; Friends of the Desert Mountains; Mojave Desert Land Trust; Desert Protective Council; Amargosa Conservancy; Death Valley Conservancy; the Cities of Barstow, Desert Hot Springs, Hesperia, Indio, Palm Springs, San Bernardino and Yucaipa; Riverside County Supervisor Marion Ashley; San Bernardino County Supervisor Neil Derry; Imperial County Supervisor Wally Leimgruber; Coachella Valley Association of Governments; SummerTree Institute; and Route 66 Preservation Foundation.

The California Desert Protection Act, which was enacted in 1994, was a sweeping piece of legislation aimed at conserving some of the most beautiful and ecologically significant lands in my home State.

The law created Death Valley National Park, Joshua Tree National Park and the Mojave National Preserve, as well as 69 desert wilderness areas managed by the Bureau of Land Management, BLM.

Collectively, it protected over 7 million acres of desert lands, making it the largest land conservation bill in the lower 48 States in U.S. history.

To this day, it remains one of my proudest accomplishments since joining this body.

Much has changed since the passage of the California Desert Protection Act. Many of the impediments that prevented conservation of other pristine desert lands in the area no longer exist.

Department of Defense concerns with designating some wilderness areas near Fort Irwin have been resolved.

Many mining areas inside national parks and potential wilderness have closed.

Grazing allotments on both BLM and National Park Service land have been retired by willing sellers.

Hundreds of thousands of acres of privately owned land has been donated to or acquired by the Federal Government.

Yet even as these issues were resolved, new challenges have emerged. There are now competing demands over how best to manage hundreds of thousands of acres of public lands in the desert.

Some believe the lands should be used for large-scale solar and wind facilities and transmission lines. Others would like to conserve critical habitat for threatened and endangered species.

Some would like more acreage available for grazing or for off-road recreation.

Finally, some would like to see additional lands made available for military training and base expansion.

Earlier this year, I learned that BLM had accepted applications to build vast solar and wind energy projects on former railroad lands previously owned by the Catellus Corporation. These lands had been donated to the Federal Government or acquired with taxpayer funds for conservation.

I believe the development of these new cleaner energy sources is vital to addressing climate change, yet we must be careful about selecting where these facilities are located. The current process doesn't work because it allows energy firms to propose the sites for renewable energy development, including land donated or acquired specifically for conservation.

Approximately \$45 million of private donations—including a \$5 million land discount from Catellus Corporation—and \$18 million in Federal Land and Water Conservation grants was spent to purchase these lands, with the intent of conserving them in perpetuity.

As the sponsor of the legislative provisions that helped secure the deal to acquire the roughly 600,000 acres of former private land, I found the BLM's actions unacceptable.

We have an obligation to honor our commitment to conserve these lands—and I believe we can still accomplish that goal while also fulfilling California's commitment to develop a clean energy portfolio.

That is the purpose of this legislation.

The first title of the legislation is geared towards the goal of conserving the Desert's sensitive ecosystem.

First, this bill will ensure that hundreds of thousands of acres of land donated to the federal government for conservation will be protected by creating the Mojave Trails National Monument. This new monument would cover approximately 941,000 acres of Federal land, which includes approximately 266,000 acres of the former Catellus-owned railroad lands along historic Route 66. I visited the area earlier this year and was amazed by the beauty of the massive valleys, pristine dry lakes, and rugged mountains.

In addition to its iconic sweeping desert vistas and majestic mountain ranges, this area of the Eastern Mojave also contains critical wildlife corridors linking Joshua Tree National Park and the Mojave National Preserve. It also encompasses hundreds of thousands of acres designated as areas of critical environmental concern, critical habitat for the threatened desert tortoise, and ancient lava bed flows and craters. It is surrounded by more than a dozen BLM wilderness areas.

The BLM would be given the authority to both conserve the monument lands, and also to maintain existing recreational uses, including hunting, vehicular travel on open roads and trails, camping, horseback riding and rockhounding.

The bill also creates an advisory committee to help develop and oversee the implementation of the monument management plan. It would be comprised of representatives from local, State and Federal Government, conservation and recreation groups, and local Native American tribes.

Before I go on to the other conservation provisions in the bill, I would like to address one important issue—and that is what should be done about some of the proposed renewable energy development projects proposed for lands included in this monument.

Although it is true that the monument will prevent further consideration of some applications to develop solar and wind energy projects on former Catellus lands or adjoining lands in the monument, it is important to note that of the proposals in question, not a single one has been granted a permit nor is a single one under review at the California Energy Commission or under formal NEPA, National Environmental Policy Act, review at BLM.

To ensure that creation of the monument does not unnecessarily harm the firms that worked in good faith and invested substantial time and resources to produce renewable energy in California, the legislation will offer these companies an opportunity to relocate their projects to federal renewable energy zones currently being developed by the Department of the Interior.

Additionally, the monument would not prevent the construction or expansion of necessary transmission lines critical to linking renewable energy generation facilities with the electricity grid.

Second, the bill would establish the "Sand to Snow National Monument," encompassing 134,000 acres of land from the desert floor in the Coachella Valley up to the top of Mount San Gorgonio, the highest peak in Southern California.

The boundaries of this second, smaller new monument would include two Areas of Critical Environmental Concern: Big Morongo Canyon and White-

water Canyon, the BLM and U.S. Forest Service San Gorgonio Wilderness, the Wildlands Conservancy's Pipe's Canyon and Mission Creek Preserves, and additional public and private conservation lands, including two wildlife movement corridor areas connecting the Peninsular Ranges with the Transverse Ranges.

This area is truly remarkable, and would arguably be the most environmentally diverse national monument in the country. It serves as the intersection of three converging ecological systems—the Mojave Desert, the Colorado Desert, and the San Bernardino mountains—and is one of the most important wildlife corridors in Southern California.

This monument designation would protect 23.6 miles of the Pacific Crest Trail and the habitat for approximately 240 species of migrating and breeding birds, the second highest density of nesting birds in the U.S. It also serves as a home and a crucial migration corridor for animals traveling between Joshua Tree National Park, the oasis at Big Morongo, and the higher elevations of the San Bernardino Mountains.

I would like to make one additional point, and that is that despite its ecological significance, this area is not particularly well-known—largely because it is managed by a number of distinct entities, including the BLM, Forest Service, National Park Service and private preserves and conservation agencies. So, the monument designation would help to attract more attention to one of California's natural gems.

Third, the bill establishes new wilderness and allows more appropriate use of lands currently designated as Wilderness Study Areas.

The 1994 California Desert Protection Act extended wilderness protection to many areas in the desert, yet several areas near Fort Irwin were designated as wilderness study areas in order to allow the base to expand.

Now that Fort Irwin's expansion is complete, it is time to consider these areas for permanent wilderness designation.

The bill protects approximately 250,000 acres of BLM land as wilderness in five areas. These areas contain some of the most pristine and rugged landscapes in the California desert.

Beyond Fort Irwin, the bill also expands wilderness areas in Death Valley National Park, 90,000 acres, and the San Bernardino National Forest, 4,300 acres, inside the Sand to Snow National Monument created by this bill.

The bill also releases 126,000 acres of land from their existing wilderness study area designation in response to requests from local government and recreation users. This will allow the land to be made available for other purposes, including recreational off-

highway vehicle use on designated routes.

Fourth, this bill would create the Vinagre Wash Special Management Area.

The agreed-upon designation for this area in Imperial County, near the Colorado River, was reached after careful discussion with key stakeholders.

Although the land possesses some wilderness characteristics, there are also competing interests. The Navy Seals currently use some of this area for occasional training. Additionally, many local residents enjoy touring the rolling hills in the area by jeep.

Through the combined efforts of conservation groups, local residents and county government, and the Department of Defense, a compromise conservation designation was developed.

For the land known as the Vinagre Wash, the bill will create a "special management area" covering 76,000 acres, including 12,000 acres of former railroad lands donated to the Federal Government.

Of these, 49,000 acres are designated as potential wilderness and only become permanent wilderness if and when the Department of Defense determines these lands are no longer needed for Navy Seal training.

This designation will permit the area to continue to be accessed by vehicles and be used for camping, hiking, mountain biking, sightseeing, and off-highway vehicle use on designated routes and protect tribal cultural assets in the area.

Fifth, the bill adds to or designates four new Wild and Scenic Rivers, totaling 76 miles in length. This designation will ensure they remain clean and free-flowing and that their immediate environments are preserved. These beautiful waterways are Deep Creek and the Whitewater River in and near the San Bernardino National Forest, as well as the Amargosa River and Surprise Canyon Creek near Death Valley National Park.

Sixth, the bill includes adds approximately 74,000 acres of adjacent lands to the three National Parks established by the 1994 California Desert Protection Act.

The bill adds 41,000 acres in Death Valley National Park. This includes former mining areas where the claims have been retired and a narrow strip of BLM land between National Park and Defense Department boundaries that has made BLM management difficult.

The bill adds 30,000 acres in the Mojave National Preserve. This land was not included in the original Monument because of the former Viceroy gold mine. However, the mining operations ceased several years ago, and the reclamation process is nearly complete. Additionally, a 2007 analysis by the Interior Department recommended that this area would be suitable to add to the Preserve.

The bill adds 2,900 acres in Joshua Tree National Park. This includes multiple small parcels of BLM land identified for disposal on its periphery. Transferring this land to the Park Service would help protect Joshua Tree by preserving these undeveloped areas that border residential communities.

Seventh, the bill designates new lands as Off-Highway Vehicle Recreation Areas.

One of the key goals I have strived for in this bill is to find balance to ensure that the many different needs and uses in the desert are accommodated with the least possible conflict. Some of the most frequent visitors to the desert are the off-highway recreation enthusiasts.

In California alone, there are over 1 million registered off-highway vehicles, many of which can be found exploring thousands of miles of desert trails or BLM designated open areas.

However, in order to meet military training needs, the Marine Corps is studying the potential expansion of Marine Corps Air Ground Combat Center at Twentynine Palms into Johnson Valley, the largest OHV area in the country. I strongly support providing our troops with the best possible training, but if the Marines need to expand the base into Johnson Valley, this could have potentially resulted in the loss of tens of thousands of acres of OHV recreation lands.

But over the past year I met with Major General Eugene Payne, Assistant Deputy Commandant for Installations and Logistics, and Brigadier General Melvin Spiess, Commanding General, Training and Education Command, to discuss this issue, and I am very grateful for their efforts to consider base expansion options that would preserve much of Johnson Valley for recreation.

As the result of those meetings, the Marine Corps has committed to studying an alternative that would allow for a portion of Johnson Valley to be used exclusively for military training, a portion exclusively for continued OHV recreation and a third area for joint use. While the environmental review process must first be completed, I am hopeful that this option will prevail for the benefit of the Marines and recreational users of Johnson Valley.

The lesson learned from Johnson Valley is that, despite the vast size of the California desert, there are relatively few areas dedicated to OHV recreation, and even those areas face increasing competition from other types of uses. These areas are important not only to the hundreds of thousands of visitors who enjoy them, but also to the local economy that depends on their tourist dollars. Additionally, by protecting these areas, we also protect conservation areas by providing appropriate places for OHV recreation.

So, this bill will designate five existing OHV areas in the Mojave desert as

permanent OHV areas, providing off-highway groups some certainty that these uses will be protected as much as conservation areas. Collectively, these areas could be as much as 314,000 acres, depending on what, if any, of Johnson Valley is ultimately needed by the Marines.

This section of the bill also requires the Secretary of the Interior to conduct a study to determine what, if any, lands adjacent to these recreation areas would be suitable for addition. This will help make up for some of the lost acres in Johnson Valley should the Marines decide to expand there.

Finally, this title of the bill includes other key provisions that address various challenges and opportunities in the California desert, including: state land exchanges.

There are currently about 370,000 acres of state lands spread across the California desert in isolated 640 acre parcels. Because many of these acres are inside national parks, wilderness, the proposed monuments or conservation areas, they are largely unusable. The bill seeks to remedy that problem by requiring the Department of the Interior to develop and implement a plan with the state to complete the exchange of these lands for other BLM or GSA owned property in the next ten years. These land exchanges will help consolidate the state lands into larger, more usable areas that could potentially provide the state with viable sites for renewable energy development, off-highway vehicle recreation or other commercial purposes.

The bill ensures the right of the Department of Defense to conduct low-level overflights over wilderness, national parks and national monuments.

The bill requires the Department of the Interior to study the impact of climate change on California desert species migration, incorporate the study's results and recommendations into land use management plans, and consider the study's findings when making decisions granting rights of way for projects on public lands.

The bill requires the Secretary to ensure access for tribal cultural activities within national parks, monuments, wilderness and other areas designated within the bill. It also requires the Secretary to develop a cultural resources management plan to protect a sacred tribal trail along the Colorado River between southern Nevada and the California-Baja border.

In order to ensure that donated and acquired Catellus lands outside the Mojave Trails National Monument are maintained for conservation, the bill prohibits their use for development, mining, off-highway vehicle use, except designated routes, grazing, military training and other surface disturbing activities. The Secretary of the Interior is authorized to make limited exceptions in cases where it is deemed in

the public interest, but comparable lands would have to be purchased and donated to the Federal Government as mitigation for lost acreage.

So, all of these provisions, when taken together, would serve to complement the lasting conservation established by the California Desert Protection Act—while ensuring that other important local uses are maintained in appropriate areas.

The Mojave Desert is a spectacular national treasure worthy of protection, but it is also a unique national solar resource.

The Mojave has more than 350 sunny days per year; has large flat valleys and mesas; is close to major transmission lines and millions of electricity consumers in Southern California; and lies above 4,000 feet in elevation, where the sun is strongest.

There is no question that we need to harness the desert's plentiful solar energy—but in order to do that, we need to cut through a bureaucratic backlog of stalled permits, and ensure that development occurs on the most appropriate lands.

That is exactly what the second title of this legislation is intended to do.

For too many years the promise of utilizing desert lands to produce clean, renewable solar power was out of reach. The up-front technology costs were too expensive, while coal was deemed to be cheap and plentiful.

But the economics of solar power began to shift in the right direction in 2005, when Congress established a 30 percent investment tax credit for solar power facilities, a provision I championed. I was proud to work with Senator SNOWE and other members of the Senate Finance Committee to extend this tax credit through 2016 during the last Congress.

On December 17, I introduced new legislation with Senator MERKLEY to make sure solar companies can fully realize the benefits of these tax incentives.

The other chief roadblock to developing solar in the desert has been the broken permitting process.

The Federal Government has failed to focus wind and solar development on appropriate lands where it can be readily permitted.

There are currently more than 110 applications to develop more than 42,000 megawatts of renewable energy capacity on BLM land in the California desert.

Until very recently, nothing was done to evaluate these development proposals.

All but a few proposals have not even begun the formal environmental review process required by the National Environmental Policy Act, NEPA. The BLM has been slow to direct development towards disturbed lands or to discourage proposals on lands acquired for the purpose of conservation.

Wind developers have had to wait more than three years to receive permission to measure the wind above public lands.

The Fish and Wildlife Service has told renewable energy developers seeking to use disturbed private lands that they would need to develop complex habitat conservation plans for their projects, a process expected to take nine years.

Contrast that with the recent announcement from Interior Secretary Ken Salazar, who has pledged that the BLM will complete permitting of 10 "fast track" solar projects on public lands by December 2010.

So, the good news is that this administration has taken steps in the right direction to encourage this important shift to renewable energy.

But it is critical, nonetheless, that this legislation is enacted in order to codify and build upon these improvements to the permitting process and help establish the transmission lines needed to carry cleaner energy from the desert to consumers.

Key provisions of the bill: first, the bill will require BLM to put personnel in place focused exclusively on renewable energy development in the desert, make the staff accountable to Congress, and provide a reliable stream of funding to expedite the review of applications.

The BLM began establishing renewable energy permitting offices earlier this year, but this legislation would codify this new administrative policy, establish that the offices have a clear Congressional mandate, and ensure that they will focus specifically on renewable energy development in each state with significant wind and solar resources on public land.

These offices would be funded from the existing BLM permit improvement fund—a fund which is currently only available to supervise the permitting for oil and natural gas development.

It makes sense that this fund should go towards providing cleaner energy sources as well.

Second, the bill would help cut through the backlog of pending renewable development applications with a "use it or lose it" approach.

This would replace the "first come, first serve" approach the BLM currently employs.

The legislation would establish strict deadlines for developers to conduct necessary biological and cultural studies, ensure connection to the grid, and develop a plan for water. This would ensure that serious development proposals are moved to the front of the line—and help put an end to unfettered speculation on desert lands.

Third, this legislation will expedite the application process for solar development on private lands.

When I toured the desert last spring, I asked developers why they wanted to

develop pristine public lands, instead of using private lands.

The answer shocked me: they told me it was easier to permit a project on pristine public land than on private lands.

We need to ensure that it takes no longer to review an application to develop private lands than it does to develop public lands—without infringing upon important environmental regulations.

So, the bill would establish a pilot mitigation bank program—a new idea based on successful desert protection efforts in Nevada, wolf protection efforts in New Mexico, and Coral Reef protection efforts in the Caribbean.

The mitigation bank program would be a win-win, both accelerating permitting and coordinating endangered species protection efforts.

Developers seeking to utilize private lands would be able to contribute to a mitigation fund, instead of negotiating the terms of endangered species mitigation, which the Fish and Wildlife Service recently predicted would take nine years.

The interest from the funds contributed by developers would be used to better manage endangered species habitat in specific mitigation zones of federal land that would be permanently set aside for species protection.

The principal in this fund would be used to purchase new pristine habitat when it became available.

This Mitigation bank program would be run by BLM, and the Fish and Wildlife Service would consult with the BLM on renewable energy project review, just as they do now for renewable energy proposals on public land.

This would help level the playing field between public and private lands, and it could cut down the time it takes to permit projects for private lands considerably.

Fourth, the legislation would require the BLM, the Forest Service, and the military to complete Environmental Impact Statements to develop renewable energy on the lands they oversee.

This has two benefits.

First, it ensures that Federal land managers will proactively plan the use of public lands—instead of allowing private industry to make these de facto decisions.

Federal land managers will be required to identify renewable energy development areas where development is in the public interest through the programmatic EIS process. This will help avoid the sort of site-specific environmental conflicts that can delay projects for years.

The second benefit of this provision is that it will result in a formal evaluation of whether public land currently managed by the military will also be considered for solar development, instead of concentrating this development only on BLM land. There are cur-

rently approximately 3 million acres of California desert that are managed by the military, and much of this land could be developed for renewable energy consistent with the military mission.

By requiring the military to evaluate the impacts of a program to develop its solar resource, the legislation ensures that all available public lands are properly considered for renewable energy development in California.

Fifth, this legislation expedites the permitting of temporary meteorological measurement devices.

In California, it sometimes takes a wind developer three years to get a permit simply to measure wind speed. Such barriers to research are unnecessary and unwise, and this legislation assures that this type of research qualifies for existing categorical exclusions from complex environmental reviews.

Sixth, the legislation would provide grants and loan guarantees to innovative electricity transmission technologies that will reduce the need to build massive, visually and environmentally disruptive transmission lines in the desert.

Finally, the legislation would return 25 percent of the revenue generated by new renewable energy projects to the State, and 25 percent to local county governments. This would ensure that these entities have the resources to support permitting, public lands protection, and local conservation efforts.

Bottom line: The permitting process is broken. It is not facilitating solar and wind development where it belongs. This legislation intends to fix that.

It may surprise my colleagues that I am introducing such comprehensive legislation to ensure the protection of California's desert heritage, the development of our renewable resources, and the continued enjoyment of desert recreation.

After all, I am not from the desert. I have lived in or near San Francisco for most of my life.

But over the years I have come to truly appreciate California's sweeping desert landscapes.

I remember my first visits to the desert years ago. It was treated like a waste dump. It was full of abandoned cars. Old appliances littered the landscape.

But we have worked very hard to clean it up.

We have worked to make sure that the vast vistas and pristine desert habitat are respected by humanity, and that we give to our children a healthier, more beautiful desert than we inherited.

But if we are to remain successful in the long run, we must not only protect the desert land itself, we must also protect the broader environment from the ravages of climate change, and we

must offer economic opportunity to those who live in these areas.

That is the purpose of this legislation. There are many places in the California desert where development and employment are essential and appropriate.

But there are also places that future generations will thank us for setting aside.

I have worked painstakingly with stakeholders to ensure that this legislation balances sometimes competing needs.

This bill, if enacted, will have a positive and enduring impact on the landscape of the Southern California desert, and I hope it will stand as a model for how to balance renewable energy development and conservation.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 382—SUPPORTING THE GOALS AND IDEALS OF OBSERVING THE NATIONAL SLAVERY AND TRAFFICKING PREVENTION MONTH FROM JANUARY 1 THROUGH FEBRUARY 1, 2010, TO RAISE AWARENESS OF, AND OPPOSITION TO MODERN SLAVERY

Mrs. FEINSTEIN (for herself, Mr. CORNYN, Mr. CARDIN, and Mr. BROWNBACK) submitted the following resolution; which was considered and agreed to:

S. RES. 382

Whereas the United States has a tradition of advancing fundamental human rights, having abolished the Transatlantic Slave Trade in 1808 and having abolished chattel slavery and prohibited involuntary servitude in 1865;

Whereas because the people of the United States remain committed to protecting individual freedom, there is a national imperative to eliminate human trafficking, which is the recruitment, harboring, transportation, provision, or obtaining of persons for labor or services through the use of force, fraud, or coercion for the purpose of subjection to involuntary servitude, peonage, debt bondage, or slavery, and the inducement of a commercial sex act by force, fraud, or coercion, or in which the person induced to perform such act has not attained 18 years of age;

Whereas to combat human trafficking in the United States and globally, the people of the United States, the Federal Government, and State and local governments must be aware of the realities of human trafficking and must be dedicated to stopping this contemporary manifestation of slavery;

Whereas beyond all differences of race, creed, or political persuasion, the people of the United States face national threats together and refuse to let modern slavery exist in the United States and around the world;

Whereas the United States should actively oppose all individuals, groups, organizations, and nations who support, advance, or commit acts of human trafficking;

Whereas the United States must also work to end slavery in all of its forms around the world through education;

Whereas victims of modern slavery need support in order to escape and to recover from the physical, mental, emotional, and spiritual trauma associated with their victimization;

Whereas human traffickers use many physical and psychological techniques to control their victims, including the use of violence or threats of violence against the victim or the victim's family, isolation from the public, isolation from the victim's family and religious or ethnic communities, language and cultural barriers, shame, control of the victim's possessions, confiscation of passports and other identification documents, and threats of arrest, deportation, or imprisonment if the victim attempts to reach out for assistance or to leave;

Whereas although laws to prosecute perpetrators of modern slavery and to assist and protect victims of human trafficking, such as the Trafficking Victims Protection Act of 2000 (division A of Public Law 106-386; 114 Stat. 1466) and the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (Public Law 110-457; 122 Stat. 5044), have been enacted in the United States, awareness of the issues surrounding slavery and trafficking by those people most likely to come into contact with victims is essential for effective enforcement because the techniques that traffickers use to keep their victims enslaved severely limit self-reporting;

Whereas January 1 is the anniversary of the effective date of the Emancipation Proclamation;

Whereas February 1 is the anniversary of the date that President Abraham Lincoln signed the joint resolution sending the 13th Amendment to the States for ratification, to forever declare that "Neither slavery nor involuntary servitude . . . shall exist within the United States, or any place subject to their jurisdiction" and is a date which has long been celebrated as National Freedom Day, as described in section 124 of title 36, United States Code;

Whereas, under its authority to enforce the 13th Amendment "by appropriate legislation," Congress in the Trafficking Victims Protection Act of 2000 updated the post-Civil War involuntary servitude and slavery statutes and adopted an approach known as the "3P" approach of victim protection, vigorous prosecution, and prevention of human trafficking; and

Whereas the effort by individuals, businesses, organizations, and governing bodies to commemorate January 11 as Human Trafficking Awareness Day represents one of the many positive examples of the commitment in the United States to raise awareness of and to actively oppose modern slavery: Now, therefore, be it

Resolved, That the Senate supports—

(1) the goals and ideals of observing the National Slavery and Trafficking Prevention Month from January 1 through February 1, 2010, to recognize the vital role that the people of the United States have in ending modern slavery;

(2) marking this observance with appropriate programs and activities culminating in the observance on February 1 of National Freedom Day, as described in section 124 of title 36, United States Code; and

(3) all other efforts to raise awareness of and opposition to human trafficking.

SENATE RESOLUTION 383—DESIGNATING JANUARY 2010 AS "NATIONAL MENTORING MONTH"

Mr. MCCAIN (for himself, Mr. KERRY, Mrs. LINCOLN, Mr. INOUE, Mr. BEGICH, Mr. FEINGOLD, Mr. SPECTER, Mr. GRASSLEY, Mr. BURR, Ms. COLLINS, Ms. MURKOWSKI, and Mr. COCHRAN) submitted the following resolution; which was considered and agreed to:

S. RES. 383

Whereas mentoring is a longstanding tradition in which a dependable, caring adult provides guidance, support, and encouragement to facilitate a young person's social, emotional, and cognitive development;

Whereas continued research on mentoring shows that formal, high-quality mentoring focused on developing the competence and character of the mentee promotes positive outcomes, such as improved academic achievement, self-esteem, social skills, and career development;

Whereas further research on mentoring provides strong evidence that mentoring successfully reduces substance use and abuse, academic failure, and delinquency;

Whereas mentoring, in addition to preparing young people for school, work, and life, is extremely rewarding for those serving as mentors;

Whereas more than 4,700 mentoring programs in communities of all sizes across the United States focus on building strong, effective relationships between mentors and mentees;

Whereas approximately 3,000,000 young people in the United States are in solid mentoring relationships due to the remarkable vigor, creativity, and resourcefulness of the thousands of mentoring programs in communities throughout the Nation;

Whereas in spite of the progress made to increase mentoring, the United States has a serious "mentoring gap", with nearly 15,000,000 young people in need of mentors;

Whereas mentoring partnerships between the public and private sectors bring State and local leaders together to support mentoring programs by preventing duplication of efforts, offering training in industry best practices, and making the most of limited resources to benefit young people in the United States;

Whereas the designation of January 2010 as "National Mentoring Month" will help call attention to the critical role mentors play in helping young people realize their potential;

Whereas a month-long celebration of mentoring will encourage more individuals and organizations, including schools, businesses, nonprofit organizations, faith institutions, and foundations, to become engaged in mentoring across the United States; and

Whereas National Mentoring Month will, most significantly, build awareness of mentoring and encourage more people to become mentors and help close the mentoring gap in the United States: Now, therefore, be it

Resolved, That the Senate—

(1) designates the month of January 2010 as "National Mentoring Month";

(2) recognizes with gratitude the contributions of the millions of caring adults and students who are already volunteering as mentors and encourages more adults and students to volunteer as mentors; and

(3) encourages the people of the United States to observe National Mentoring Month with appropriate ceremonies and activities that promote awareness of, and volunteer involvement with, youth mentoring.

PRIVILEGES OF THE FLOOR

Mr. BAUCUS. Mr. President, I ask unanimous consent that Daniel Barlava, an intern in Senator DODD's office, be granted the privilege of the floor for the remainder of today's session.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUPPORTING NATIONAL SLAVERY AND TRAFFICKING PREVENTION MONTH

Mr. DURBIN. I ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 382 submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The bill clerk read as follows:

A resolution (S. Res. 382) supporting the goals and ideals of observing National Slavery and Trafficking Prevention Month from January 1 through February 1, 2010, to raise awareness of, and opposition to, modern slavery.

There being no objection, the Senate proceeded to consider the resolution.

Mrs. FEINSTEIN. Mr. President, today the Senate will take an important step to raise awareness of human trafficking, a form of modern-day slavery. The resolution, introduced by myself and Senators CORNYN, CARDIN, and BROWNBACK, observes National Slavery and Trafficking Prevention Month from January 1 through February 1 to raise awareness of, and opposition to, modern slavery and human trafficking. This bipartisan resolution was passed unanimously today by the Senate.

Human trafficking is a crime in which persons are forced to work against their will in sweatshops, prostitution rings, farm labor, private homes, and other enterprises. The traffickers use force, threats of force, and coercion to ensure that their victims believe they have no other choice but to work for their captors.

The resolution resolves that Congress supports (1) the goals and ideals of observing the National Slavery and Trafficking Prevention Month from January 1 through February 1 to recognize the vital role that the people of the United States have in ending modern slavery; (2) marking this observance with appropriate programs and activities culminating in the observance on February 1 of National Freedom Day; and (3) all other efforts to raise awareness of and opposition to human trafficking.

This resolution recognizes the month of January as significant for modern slavery and human trafficking. January 1 is the anniversary of the effective date of the Emancipation Proclamation and February 1 is the anniversary of the date that President Abraham Lincoln signed the joint resolution sending the 13th amendment to the States for ratification.

In addition, it recognizes that January 11 is a day that many have chosen to commemorate human trafficking. In the 110th Congress, I sponsored a concurrent resolution that passed the Senate supporting January 11 as a National Day of Human Trafficking Awareness.

In 2007, California passed a resolution, signed into law by Governor Schwarzenegger, designating January 11 as National Day of Human Trafficking Awareness. The Los Angeles City Council and the Los Angeles County Board of Supervisors did the same for the county of Los Angeles.

The issue of human trafficking has become particularly problematic in California. San Diego is an international trafficking gateway city used to traffic foreign children into the U.S. The United Nations has listed Mexico as the No. 1 exporter of exploited children into North America.

From 1998 to 2003, more than 500 people from 18 countries were ensnared in 57 forced labor operations throughout California. These statistics only represent the cases that were discovered. Frequently, human trafficking goes undetected because the victims are not only afraid of their traffickers, but they have been taught by their traffickers to fear U.S. law enforcement.

Congress has acted to broaden the tools available to prosecute perpetrators of modern slavery and to assist and protect victims of human trafficking. It has enacted the Trafficking Victims Protection Act of 2000 and the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008.

California has taken a leadership role in identifying and prosecuting human trafficking cases. For example, San Diego received one of the first grants to train local law enforcement on identifying and prosecuting human trafficking. The U.S. attorneys offices in Oakland, Los Angeles, and San Diego have all created antitrafficking task forces.

Using these tools, this August five people in California were sentenced to Federal prison, all receiving multi-decade sentences for their roles in an international sex trafficking ring that lured young Guatemalan women and girls into the Los Angeles area and forced them into prostitution.

In this distressing case, the defendants intimidated and controlled their victims by threatening to beat them and kill their loved ones in Guatemala if they tried to escape. At least three of the defendants restrained the victims by locking them in at night and blocking windows and doors to prevent their escape.

In another recent case in Walnut Creek, CA, a woman was found guilty of trafficking a nanny from Peru. For nearly 2 years, the victim was forced to cook, clean, and take care of the fam-

ily's children through false promises of pay. The victim was eventually able to escape, with the assistance of local residents and officials and parents at a local elementary school.

Human trafficking is a pervasive global crime, with nearly 1 million people trafficked across international borders every year. According to the State Department, roughly 80 percent of the victims are women and children.

I believe that it is vital that we work together as a nation to eliminate human trafficking and prevent the victimization of the most vulnerable members of society.

Awareness of the issues surrounding slavery and trafficking by those people most likely to come into contact with vulnerable populations is essential for effective prevention and prosecution of this frequently hidden crime.

I thank my colleagues for their support of this resolution to help raise awareness of modern day slavery.

Mr. DURBIN. I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and any statements related to the resolution be printed in the RECORD at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 382) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 382

Whereas the United States has a tradition of advancing fundamental human rights, having abolished the Transatlantic Slave Trade in 1808 and having abolished chattel slavery and prohibited involuntary servitude in 1865;

Whereas because the people of the United States remain committed to protecting individual freedom, there is a national imperative to eliminate human trafficking, which is the recruitment, harboring, transportation, provision, or obtaining of persons for labor or services through the use of force, fraud, or coercion for the purpose of subjection to involuntary servitude, peonage, debt bondage, or slavery, and the inducement of a commercial sex act by force, fraud, or coercion, or in which the person induced to perform such act has not attained 18 years of age;

Whereas to combat human trafficking in the United States and globally, the people of the United States, the Federal Government, and State and local governments must be aware of the realities of human trafficking and must be dedicated to stopping this contemporary manifestation of slavery;

Whereas beyond all differences of race, creed, or political persuasion, the people of the United States face national threats together and refuse to let modern slavery exist in the United States and around the world;

Whereas the United States should actively oppose all individuals, groups, organizations, and nations who support, advance, or commit acts of human trafficking;

Whereas the United States must also work to end slavery in all of its forms around the world through education;

Whereas victims of modern slavery need support in order to escape and to recover from the physical, mental, emotional, and spiritual trauma associated with their victimization;

Whereas human traffickers use many physical and psychological techniques to control their victims, including the use of violence or threats of violence against the victim or the victim's family, isolation from the public, isolation from the victim's family and religious or ethnic communities, language and cultural barriers, shame, control of the victim's possessions, confiscation of passports and other identification documents, and threats of arrest, deportation, or imprisonment if the victim attempts to reach out for assistance or to leave;

Whereas although laws to prosecute perpetrators of modern slavery and to assist and protect victims of human trafficking, such as the Trafficking Victims Protection Act of 2000 (division A of Public Law 106-386; 114 Stat. 1466) and the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (Public Law 110-457; 122 Stat. 5044), have been enacted in the United States, awareness of the issues surrounding slavery and trafficking by those people most likely to come into contact with victims is essential for effective enforcement because the techniques that traffickers use to keep their victims enslaved severely limit self-reporting;

Whereas January 1 is the anniversary of the effective date of the Emancipation Proclamation;

Whereas February 1 is the anniversary of the date that President Abraham Lincoln signed the joint resolution sending the 13th Amendment to the States for ratification, to forever declare that "Neither slavery nor involuntary servitude . . . shall exist within the United States, or any place subject to their jurisdiction" and is a date which has long been celebrated as National Freedom Day, as described in section 124 of title 36, United States Code;

Whereas, under its authority to enforce the 13th Amendment "by appropriate legislation," Congress in the Trafficking Victims Protection Act of 2000 updated the post-Civil War involuntary servitude and slavery statutes and adopted an approach known as the "3P" approach of victim protection, vigorous prosecution, and prevention of human trafficking; and

Whereas the effort by individuals, businesses, organizations, and governing bodies to commemorate January 11 as Human Trafficking Awareness Day represents one of the many positive examples of the commitment in the United States to raise awareness of and to actively oppose modern slavery: Now, therefore, be it

Resolved, That the Senate supports—

(1) the goals and ideals of observing the National Slavery and Trafficking Prevention Month from January 1 through February 1, 2010, to recognize the vital role that the people of the United States have in ending modern slavery;

(2) marking this observance with appropriate programs and activities culminating in the observance on February 1 of National Freedom Day, as described in section 124 of title 36, United States Code; and

(3) all other efforts to raise awareness of and opposition to human trafficking.

NATIONAL MENTORING MONTH

Mr. DURBIN. I ask unanimous consent that the Senate proceed to the im-

mediate consideration of S. Res. 383 submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The bill clerk read as follows:

A resolution (S. Res. 383) designating January 2010 as "National Mentoring Month."

There being no objection, the Senate proceeded to consider the resolution.

Mr. McCAIN. Mr. President, I am pleased today to join many of my colleagues in supporting a resolution designating January 2010 as "National Mentoring Month."

We all agree that young people need a supportive environment based on structured and trusting relationships with adults. The world is more complicated for children today than it ever was when I was growing up. Mentors can help young people through the difficult periods, help them see the difference between right and wrong, alleviate their doubts and concerns, and answer their questions frankly. Mentors can dramatically impact a young person's life by providing the support and encouragement that children need in order to grow into responsible, caring adults.

This resolution recognizes the value of volunteering time to make a difference in the life of a child. A growing body of research has shown that high-quality programs can make all the difference and help students in need achieve the type of future they might never have thought possible. Children with mentors are shown to improve in school performance and attendance. Also, they are more self-confident, have good social skills, and above all else, they are motivated to reach their full potential. Unfortunately, a severe shortage of volunteers has left over 15 million young people without mentors.

National Mentoring Month highlights the needs and goals of mentoring in this country and honors the contributions of the many volunteers across the country that are currently connecting with youth in such programs. Next month, nonprofit organizations, schools, businesses, faith communities, and government agencies—led by the National Mentoring Partnership and the Harvard School of Public Health—will join together to encourage adults to serve as mentors for our young people. Programs must be expanded to recruit more volunteers to help fill the mentoring gap. Mentoring has successfully helped many children in this country and we must work together to expand such valuable programs. I urge the Senate to approve this resolution.

Mr. DURBIN. I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table with no intervening action or debate, and any statements related to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 383) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 383

Whereas mentoring is a longstanding tradition in which a dependable, caring adult provides guidance, support, and encouragement to facilitate a young person's social, emotional, and cognitive development;

Whereas continued research on mentoring shows that formal, high-quality mentoring focused on developing the competence and character of the mentee promotes positive outcomes, such as improved academic achievement, self-esteem, social skills, and career development;

Whereas further research on mentoring provides strong evidence that mentoring successfully reduces substance use and abuse, academic failure, and delinquency;

Whereas mentoring, in addition to preparing young people for school, work, and life, is extremely rewarding for those serving as mentors;

Whereas more than 4,700 mentoring programs in communities of all sizes across the United States focus on building strong, effective relationships between mentors and mentees;

Whereas approximately 3,000,000 young people in the United States are in solid mentoring relationships due to the remarkable vigor, creativity, and resourcefulness of the thousands of mentoring programs in communities throughout the Nation;

Whereas in spite of the progress made to increase mentoring, the United States has a serious "mentoring gap", with nearly 15,000,000 young people in need of mentors;

Whereas mentoring partnerships between the public and private sectors bring State and local leaders together to support mentoring programs by preventing duplication of efforts, offering training in industry best practices, and making the most of limited resources to benefit young people in the United States;

Whereas the designation of January 2010 as "National Mentoring Month" will help call attention to the critical role mentors play in helping young people realize their potential;

Whereas a month-long celebration of mentoring will encourage more individuals and organizations, including schools, businesses, nonprofit organizations, faith institutions, and foundations, to become engaged in mentoring across the United States; and

Whereas National Mentoring Month will, most significantly, build awareness of mentoring and encourage more people to become mentors and help close the mentoring gap in the United States: Now, therefore, be it

Resolved, That the Senate—

(1) designates the month of January 2010 as "National Mentoring Month";

(2) recognizes with gratitude the contributions of the millions of caring adults and students who are already volunteering as mentors and encourages more adults and students to volunteer as mentors; and

(3) encourages the people of the United States to observe National Mentoring Month with appropriate ceremonies and activities that promote awareness of, and volunteer involvement with, youth mentoring.

ORDER OF PROCEDURE

Mr. DURBIN. Mr. President, I ask unanimous consent that the controlled time be extended for an additional 30 minutes under the control of the Republican side, and that all additional time, including that already utilized by Senator MENENDEZ, with postcloture time continue to run during this period.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR TUESDAY,
DECEMBER 22, 2003

Mr. DURBIN. I ask unanimous consent that when the Senate completes its business today, it stand adjourned until 7 a.m., Tuesday, December 22; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, and the time for the two leaders be reserved for their use later in the day; that the Senate then resume consideration of H.R. 3590, with postcloture time continuing to run during the overnight adjournment, and that the time until the expiration of postcloture time be equally divided and controlled between the leaders or their designees; that upon the expiration of the time, the majority leader be recognized to move to table amendment No. 3278; that upon disposition of amendment No. 3278, amendment No. 3277 be withdrawn; that the Senate then proceed to vote on adoption of amendment No. 3276; that upon disposition of amendment No. 3276, the Senate then proceed to vote on the motion to invoke cloture on amendment No. 2786; that if cloture is invoked, the majority leader then be recognized and that the time until 9:30 a.m. then be equally divided and controlled between the leaders or their designees; further, that the Senate begin alternating one-hour blocks of time beginning at 9:30 a.m. until 5:30 p.m., with the Republicans controlling the first hour; that at 12:30 p.m., the Senate stand in recess until 2:30 p.m., and that upon reconvening, the Senate resume the alternating blocks until 5:30 p.m., with all postcloture time counting during any recess period and until 5:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT

Mr. DURBIN. Mr. President, I ask unanimous consent that the Senate adjourn following the remarks of Senator VOINOVICH of Ohio and Senator DEMINT, if he chooses to speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Ohio.

HEALTH CARE REFORM

Mr. VOINOVICH. Mr. President, I wanted to take some time to talk

about the health care bill before the Senate which the majority leader is anxious to get passed before Christmas. I suspect that he knows if this bill sees too much light of day, he could lose 1 or 2 of his 60 votes, and that is why his managers' amendment was kept under wraps so that no one knew anything about it until the last minute.

On our side of the aisle, we would like to hold off until after Christmas to give all Members of the Senate and the American people a chance to review this legislation. Obviously, this is not going to happen. I think that is unfortunate.

When you compare the number of days we spent debating this bill to other major pieces of legislation that have come before this body in recent years, the Democrats' haste is obvious.

For example, in 2002, I was very much involved in the legislation that created the Department of Homeland Security. We spent 19 days over 7 weeks on the floor debating that bill. We took 20 votes on amendments during the debate. The final result was bipartisan. Ninety Members of the Senate voted for it.

Tragically, for the American people, unlike other important health care-related bills such as the Medicare Modernization Act that garnered wide bipartisan support, this bill is nowhere near bipartisan and did not receive a single Republican vote for cloture at 1 this morning, and only one Republican in the House of Representatives supported it.

In my humble opinion, the way this bill was negotiated behind closed doors, and without the input of Members from both sides, will sour relations and bipartisan discussion on other major issues to come before the Senate, such as debt and deficit reduction—notably bipartisan legislation that I have been working on very closely with Senators GREGG and CONRAD, a comprehensive energy bill, reauthorization of the surface transportation bill, climate change legislation, and—very important—a jobs bill.

The problems facing our country are too serious for business as usual, each side one-upping the other for political advantage, with the 2010 elections casting shadows on what we should be doing for the benefit of our country, at a time when this Nation is as fragile as I have seen it in my entire life.

Our future and the future of our children and grandchildren is in our hands. Our constituents and the world are watching. Our credibility and credit are on the line, and so is our economic and national security, and, quite frankly, our leadership position in the world. We need fewer partisans in this body and more statesmen.

Last week I came to the floor to remind my colleagues and the American people about the fiscal realities that face our Nation and explained how this

health reform legislation, which is now likely to pass based on this morning's cloture vote, would make an unsustainable fiscal situation even worse.

Let me remind you as we stand right now that our Nation's debt has exceeded \$12 trillion for the first time in our history. In fact, from 2008 to 2009 alone, the Federal debt increased 19 percent, boosting national debt as a percentage of GDP from 70 percent last year to 84 percent this year. We have not seen this kind of debt-to-GDP ratio since the end of the Second World War.

We have amassed a staggering \$70 trillion in unfunded obligations over the next 75 years or an estimated \$600,000 per American household.

Our Medicare Program is already on shaky footing with \$37 trillion in unfunded future Medicare costs, and the Medicare trust fund is expected to be insolvent by 2017. Frankly, this is why I am disappointed the Senate failed to support Senator GREGG's amendment we considered earlier in this debate to ensure that the savings achieved by Medicare cuts would be used to ensure the viability of the program, and not new entitlements.

I ask my colleagues, can our Nation take on new programs and costs when we cannot pay for what we are doing right now? Our Nation's fiscal picture is not pretty. Our obligations to our entitlement programs are exploding. If we keep going the way we are, our debt will double in 5 years and triple in 10.

Our budgets are unbalanced as far as the eye can see. Last year we borrowed \$1.4 trillion, and 50 percent of our debt is in the hands of foreign countries. The American people get it. They already know the Federal Government is the worst credit card abuser in the world, and we are putting everything on the tab of our children and grandchildren.

They are not the only ones. Internationally, our creditors are concerned. Chinese Premier Wen Jiabao has noted:

We have lent a huge amount of money to the United States and of course we're concerned about the security of our assets and, to be honest, I am a little bit worried. That's why here I would like to urge the US to keep its commitment and promise to ensure the safety of Chinese assets.

That is what he said to the President—anybody who goes to China today. They are worried about the fact they have lent us a lot of money and maybe they might not get it back.

While the international community understands our crisis, somehow Congress does not get it. Here we are considering a bill that, when fully implemented, spends more than \$2 trillion over 10 years to restructure our health care system.

I respect my friends on the other side of the aisle, but the assumptions they make are optimistic about the cuts in

this bill, especially when one considers this body's propensity for acting in a fiscally irresponsible manner.

Frankly, our history on the so-called doc fix is illustrative. We continue to kick the cost of fixing Medicare payments for physicians down the road, instead of dealing with its more than \$200 billion cost.

The bill before us does not even have the 1-year fix that the original bill had included. My friends on the other side of the aisle have decided to put it off and deal with it in a separate measure because it would make this bill even more expensive.

As congressional observers have noted, we continue to put off the difficult choices. The fact is, Congress is not willing to take short-term pain for long-term gain. This is my 11th year, and it is the same old story year after year.

This brings me back to the health care bill. I have heard all the arguments of why health care reform is needed, and—do you know something—I agree with most of them. Frankly, there are a number of incremental things we could do today to make real improvements in our system in a bipartisan way. In fact, I encourage my colleagues to take a look at some of the proposals contained in the alternatives offered by my colleagues, including Senators WYDEN and BENNETT.

These and other legislative proposals include things we can do on an incremental basis to improve our system, such as making it easier for small business to group together to reduce their health care costs; passing medical liability reform, where we have more tests being taken because doctors are afraid of being sued; increasing flexibility in the private market so people have more options and can choose insurance products that best meet their needs; implementing policies that encourage wellness and prevention; eliminating the fraud and abuse that have and will continue to plague our public health care programs; eliminating the ability of insurance companies to deny people insurance coverage because of preexisting conditions; or eliminating the caps that insurance companies put once an individual reaches a certain amount.

Instead, we are going to pass a massive new spending bill that does little to fix our problems in the long run. What too many of my colleagues do not understand is there are limits to what government can do. There are limits on what government can do. When I was mayor of the city of Cleveland, Governor of Ohio, people would come to me with ideas to expand programs and services. Often, even though I saw the merit of these proposals, just like I see the merit of a lot of the suggestions we need to have in terms of health care, I knew we did not have the money to pay for these proposals, especially because

we had to balance our budgets. In those situations, I had to be honest and say no.

It is the same thing here. I am sure the Presiding Officer has people coming into his office every day saying: I want you to help with this worthy cause. I sit, I listen patiently, and I say to them: If what you are asking me to do means we are going to have to borrow money, and it is going to be paid for by our children and grandchildren, what do you have to say? Nine times out of 10, they say: No. Thank you very much, Senator. And they go out the door. They get it. They understand that.

Unfortunately, Congress does not get it. It is not just my colleagues on the other side of the aisle, folks. No one's hands are completely clean. That is the way it is. We just keep on going the way we are, keep going down the road.

Here we are in the worst recession since the Great Depression. Millions of Americans are out of work. Others lucky enough to have a job are wondering if they will be next to be laid off or fired. In my State of Ohio, the unemployment rate is 10.6 percent. Yet we are talking about health care reform, cap and trade, which will put unsustainable burdens on doing business in this country and make it more difficult to get this economy going again.

What people in this country want is to go back to work and have some assurance that their jobs are safe. The best way to give them security and access to health insurance is to get them back to work.

We should not be asking our Nation's businesses to take on new tax burdens in the current recession. Yet this bill before us would impose \$28 billion in new taxes on employers—\$28 billion. Furthermore, the legislation creates a new Medicare payroll tax that will likely hit approximately one-third of the small businesses in this country, which employ some 30 million Americans. These new taxes are likely to significantly hinder these engines of job growth.

Another troubling tax that will impact businesses in my State is the tax on device manufacturers. I have heard from one of our Ohio companies that this tax could force it to move its operations overseas to keep its doors open. In fact—this is unbelievable—according to the company's own calculations, the new device tax will exceed 100 percent of its domestic earnings and research and development budget. It has nothing to do with their profitability. They say: You are this business. You have a percentage of it, and we are going to lay the tax right on your back.

Ohio cannot afford to lose these jobs to another country at any time but certainly not right now in this struggling economy. But this is just the beginning for businesses, large and small.

The bill will add a whole new, never seen before, layer of bureaucracy on our businesses. Think about that. Small and even large businesses are already overwhelmed with management and paperwork demands as a result of government mandates. Many of them have to hire multiple tax attorneys and accountants to help them navigate the Federal laws and their tax obligations.

I cannot help but wonder how many businesses, both large and small, will have to hire new "benefit managers." There is an area where we will create some new jobs. We are going to hire benefit managers to help them keep track of the new requirements to ensure they are offering the appropriate benefits or paying the appropriate fine. What a nightmare.

No one has mentioned the thousands of additional Federal workers. Nobody has talked about it. When we did Part D of Medicare, they had to hire over 500 people at CMS. So we will have to hire all kinds of people, including—listen to this—at the Internal Revenue Service. I bet you would have a hard time finding an American who thinks it is a good idea to get the IRS involved in delivering our Nation's health care.

The worst thing we can do is borrow another \$2.3 trillion, create additional Federal programs, and put a bigger burden on the engine of job creation. I find this especially troublesome after hearing the Chief Actuary at the Centers for Medicare & Medicaid Services last week report that under the original Reid health care bill costs would go up, not down. In fact, according to his analysis, the Federal Government would spend \$234 billion more on health care if this legislation became law than without it—\$234 billion more with this legislation than what we are spending right now.

It is not just the Federal Government. As I discussed in some detail last week, most States will have new fiscal obligations of about \$26 billion under this bill. If you are not lucky enough to be from one of the States, such as the Cornhusker State or another State that got a special deal in this legislation to get the Democratic leadership's 60 votes, your Governor is going to be hit with a portion of the cost of expanding the Medicaid Program to cover all individuals up to 133 percent of the Federal poverty level.

In the State of Ohio, we have had 154,000 more people come on Medicaid just with the current extent of poverty, and to go to 133 percent, it is going to be incredible.

As a former Governor of Ohio, former chairman of the National Governors Association, and past chairman of the National League of Cities, I am very familiar with what unfunded mandates can do to State and local governments.

By the way, there is a point of order that lies against this bill as an unfunded mandate in terms of local and

State government, and also business. The American people should understand that the new State obligations under the Medicare expansion will mean less funding, OK, less funding for primary and secondary education, higher education programs, roads and bridges, county and local government projects, and safety service programs run by their States. In fact, I used to call Medicaid the Pacman that gobbled up our State budget dollars.

So let's look at this. You take the side over here of Medicaid, but then what you do is you expand that, and it is going to be more expensive, and then you look around and you say: We have great needs with secondary and primary education. The kids are complaining about the fact that tuition is going up for our institutions of higher education. Our local government officials are complaining because the State and local government funds that are going to them are not available to them because all of this money is flowing in this direction. In other words, under the Reid bill, we will put more stress and further unfunded mandates on the States, making our health care fiscal picture even worse than it would be without doing anything at all. This doesn't make any sense.

As I have often said—in fact, when I was Governor, I said—Gone are the days when public officials will be judged by how much they spend on a problem; the new realities dictate that we work harder and smarter and more with less. In fact, I remember giving my state of the union addresses or state of the State addresses in Ohio, and they used to take a pool about how many times I would say “harder and smarter and more with less.” That is what our States are doing but not the Federal Government—not the Federal Government, oh, no. States are raising taxes and cutting but not the Federal Government. We are just in there borrowing and borrowing and borrowing as if there will be no tomorrow.

The costs incurred by our children and grandchildren as a result of this bill will be a crushing blow to their futures—a future that is already ominous because of this body. In other words, what we are saying to them is we are putting the cost on their credit card.

You are in a new world where the competition is going to be keener than ever. We have all kinds of competitors that we didn't have when I was growing up, so they are going to have to work harder. Then we are going to say to them: By the way, your taxes are going up. We are going to put a burden on your back because we weren't willing to pay for or do without during the time we were in a position of responsibility.

Another legacy I am upset about leaving for our children and grandchildren is the public funding of abortion. The other day, I explained to an

individual that since *Roe v. Wade*, we have had over 40 million abortions—40 million abortions. Yet I have friends of mine who are wanting children, and they are going to China, they are going to Russia, they are going to other places to find those children, but here in the United States over 40 million abortions. Unfortunately, the language that was inserted in the managers' amendment does not protect taxpayer dollars from being used to fund abortion. In fact, the U.S. Conference of Catholic Bishops and National Right to Life have said the language, and thus the bill, is unacceptable and should not move forward.

Turning back to the fiscal arguments against this bill, one of my colleagues said yesterday that those of us on this side of the aisle who argue we cannot afford this bill are being disingenuous and we are engaging in scare tactics, even asking when the “lying time”—from a colleague on the other side—the “lying time” for this side of the aisle will stop. Well, we will see. We will see. I am not going to be a Member of the U.S. Senate in 2012, but if God gives me the health and the energy, I will certainly be around to remind people who was telling the truth and who was not.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. DEMINT. I ask unanimous consent to speak for 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DEMINT. Parliamentary inquiry, Mr. President:

Does rule XXII of the Standing Rules of the Senate provide that on a measure or motion to amend the Senate rules, the necessary affirmative vote shall be two-thirds of the Senators present and voting?

The PRESIDING OFFICER. It does.

Mr. DEMINT. Further parliamentary inquiry: Is it also the case that on numerous occasions, the Senate has required a two-thirds cloture vote on bills that combine amendments to the Senate rules with other legislative provisions that do not amend the rules?

The PRESIDING OFFICER. That would require a two-thirds vote.

Mr. DEMINT. I have numerous examples here. We did it twice this year on S. 2349, and I could read those, but I will spare the Chair all of these. I am just trying to get at a concern we have.

Am I correct that with respect to these bills, there was a combination of legislative provision and rules changes, and the Chair ruled that because there—and I am referring to earlier this year, those I referred to where we required the two-thirds cloture. Am I correct on these previous bills that with respect to the bills, there was a combination of legislative provisions and rules changes, and the Chair ruled that because there were rules changes, a two-thirds vote was required?

The PRESIDING OFFICER. If there were changes to the Standing Rules of the Senate, a two-thirds vote would have been required to invoke cloture.

Mr. DEMINT. I thank the Chair.

Am I also correct that the Senate has required a two-thirds cloture on amendments to bills, where the amendments combine legislative provisions and rules changes? I have a number of references to bills when this was done, if there is any question, and I have given them to the Parliamentarian for consideration. Is there an answer? I mean, I know there have been amendments to bills that we required two-thirds because they include rule changes. I just wanted to get a confirmation from our Parliamentarian.

Is that, in fact, the case, where two-thirds cloture on amendments to bills have been required to have a two-thirds vote because of the rules changes included in them?

The PRESIDING OFFICER. The Chair would have to check that for a future answer.

Mr. DEMINT. I believe the Parliamentarian does have references for when this has been done. I am quite certain it has.

But as the Chair has confirmed, rule XXII, paragraph 2, of the Standing Rules of the Senate states that on a measure or motion to amend the Senate rules, the necessary affirmative vote shall be two-thirds of the Senators present and voting.

Let me go to the bill before us because buried deep within the over 2,000 pages of this bill we find a rather substantial change to the Standing Rules of the Senate. It is section 3403, and it begins on page 1,000 of the Reid substitute. These provisions not only amend certain rules, they waive certain rules and create entirely new rules out of whole cloth.

Again, I will skip over some examples, but let me read a few of these provisions that amend the Senate rules which are contained in section 3403 of the Reid substitute.

Section D titled “Referral:”

The legislation introduced under this paragraph shall be referred by the Presiding Officers of the respective Houses to the Committee on Finance in the Senate and to the Committee on Energy and Commerce and the Committee on Ways and Means in the House of Representatives.

The bill creates out of whole cloth a new rule that this specific bill must be referred to the Senate Finance Committee.

Another example under section C, titled “Committee Jurisdiction:”

Notwithstanding rule 15 of the Standing Rules of the Senate, a committee amendment described in subparagraph (A) may include matter not within the jurisdiction of the Committee on Finance if that matter is relevant to a proposal contained in the bill submitted under subsection (c)(3).

Clearly a rule change.

So there is no pretense that this bill is being referred under the rules to the

committee of jurisdiction. Now it is allowing the Finance Committee to add whatever matter it wants to the bill regardless of any rules regarding committee jurisdiction. And for a good measure, the bill even specifically states that it is amending rule XV.

Let me just skip over a number of other examples referring to rules just to try to get to the point here because it goes on and on, and I have pages here.

There is one provision that I found particularly troubling, and it is under a section C titled "Limitation on Changes to This Subsection:"

It shall not be in order in the Senate or in the House of Representatives to consider any bill, resolution, amendment, or conference report that would repeal or otherwise change this subsection.

This is not legislation. This is not law. This is a rule change. It is a pretty big deal. We will be passing a new law and at the same time creating a Senate rule that makes it out of order to amend or even repeal the law. I am not even sure it is constitutional, but if it is, it most certainly is a Senate rule. I don't see why the majority party wouldn't put this in every bill. If you like your law, you most certainly would want it to have force for future Senates. I mean, we want to bind future Congresses.

This goes to the fundamental purpose of Senate rules, to prevent a tyrannical majority from trampling on the rights of the minority or of future Congresses.

Therefore, I would like to propound a parliamentary inquiry to the Chair. Does section 3403 of this bill propose amendments to the Standing Rules of the Senate? Further parliamentary inquiry: Does the inclusion of these proposed amendments to the Senate rules mean that the bill requires two-thirds present and voting to invoke cloture?

The PRESIDING OFFICER. The section of the proposed legislation addressed by the Senator does not amend the Standing Rules of the Senate, and therefore its inclusion does not affect the number of votes required to invoke cloture.

Mr. DEMINT. Is the Chair aware of any precedent where the Senate created a law and in doing so created a new rule that—and I am quoting from our bill:

It shall not be in order in the Senate or in the House of Representatives to consider any bill, resolution, amendment, or conference report that would repeal or otherwise change—

Such law?

Is the Chair aware that we have ever put this type of binding legislation on future Congresses in a bill?

The PRESIDING OFFICER. It is quite common to do that.

Mr. DEMINT. I would ask the Chair to get those references, if the Parliamentarian would, to us.

Mr. President, another parliamentary inquiry: If this new law will oper-

ate as a Senate rule, making it out of order for Senators to propose amendments to repeal or amend it—I have been in Congress 11 years. I have never heard of an amendment being called out of order because it changes something that was done before. How is that different than the types of Senate rule-making for which our predecessors in their wisdom provided a two-thirds cloture vote? This seems to be a redefinition of words, in my mind.

Mr. President, it is clear that the Parliamentarian is going to redefine words, as I am afraid he has done as part of this process before. But this is truly historic that we have included rules changes in legislation, and yet we are ignoring a rule that requires a two-thirds cloture vote to pass it. I believe it is unconstitutional. I believe it subverts the principle we have operated under, and it is very obvious to anyone that it does change a rule. It is clear that our rules mean nothing if we can redefine the words we use in them.

I yield the floor.

The PRESIDING OFFICER. The Chair will note that it is quite common to include provisions affecting Senate procedure in legislation.

Mr. DEMINT. Is there a difference between Senate procedures and rules?

The PRESIDING OFFICER. Yes.

Mr. DEMINT. So the language you see in this bill that specifically refers to a change in a rule is not a rule change, it is a procedure change?

The PRESIDING OFFICER. That is correct.

Mr. DEMINT. Then I guess our rules mean nothing, do they, if we can redefine them.

I thank the Chair. I yield the floor.

ADJOURNMENT UNTIL 7 A.M. TOMORROW

The PRESIDING OFFICER. The Senate stands adjourned until 7 a.m. tomorrow.

Thereupon, the Senate, at 7:41 p.m., adjourned until Tuesday, December 22, 2009, at 7 a.m.

NOMINATIONS

Executive nominations received by the Senate:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

THEODORE W. TOZER, OF OHIO, TO BE PRESIDENT, GOVERNMENT NATIONAL MORTGAGE ASSOCIATION, VICE JOSEPH J. MURIN, RESIGNED.

DEPARTMENT OF COMMERCE

KEVIN WOLF, OF VIRGINIA, TO BE AN ASSISTANT SECRETARY OF COMMERCE, VICE CHRISTOPHER R. WALL, RESIGNED.

TIMOTHY MCGEE, OF LOUISIANA, TO BE AN ASSISTANT SECRETARY OF COMMERCE, VICE PHILLIP A. SINGERMAN.

LEGAL SERVICES CORPORATION

SHARON L. BROWNE, OF CALIFORNIA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE LEGAL SERVICES CORPORATION FOR A TERM EXPIRING JULY 13, 2010, VICE MICHAEL MCKAY, TERM EXPIRED.

CHARLES NORMAN WILTSE KECKLER, OF VIRGINIA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE

LEGAL SERVICES CORPORATION FOR A TERM EXPIRING JULY 13, 2010, VICE FRANK B. STRICKLAND, TERM EXPIRED.

VICTOR B. MADDOX, OF KENTUCKY, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE LEGAL SERVICES CORPORATION FOR A TERM EXPIRING JULY 13, 2010, VICE LILLIAN R. BEVIER, TERM EXPIRED.

IN THE AIR FORCE

THE FOLLOWING NAMED AIR NATIONAL GUARD OF THE UNITED STATES OFFICERS FOR APPOINTMENT TO THE GRADE INDICATED IN THE RESERVE OF THE AIR FORCE UNDER TITLE 10, U.S.C., SECTIONS 12203 AND 12212:

To be colonel

FRANK R. AFLAGUE
CHRISTOPHER R. ALDERDICE
BORIS R. ARMSTRONG
CLARENCE ATTERBURY III
RICHARD T. BENNETT
JOHN E. BLICKENSDECKER
GARY D. BREWER, JR.
WILLIAM D. BUNCH

EXTENSIONS OF REMARKS

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD

on Monday and Wednesday of each week.

Meetings scheduled for Tuesday, December 22, 2009 may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED DECEMBER 24

10 a.m.

Judiciary

Business meeting to consider S. 714, to establish the National Criminal Justice Commission, S. 1624, to amend title 11 of the United States Code, to provide protection for medical debt homeowners, to restore bankruptcy protections for individuals experiencing economic distress as caregivers to ill, injured, or disabled family members, and to exempt from means testing debtors whose financial problems were caused by serious medical problems, S. 1765, to

amend the Hate Crime Statistics Act to include crimes against the homeless, S. 1554, to amend the Juvenile Justice and Delinquency Prevention Act of 1974 to prevent later delinquency and improve the health and well-being of maltreated infants and toddlers through the development of local Court Teams for Maltreated Infants and Toddlers and the creation of a National Court Teams Resource Center to assist such Court Teams, S. 1789, to restore fairness to Federal cocaine sentencing, H.R. 1741, to require the Attorney General to make competitive grants to eligible State, tribal, and local governments to establish and maintain certain protection and witness assistance programs, and the nomination of O. Rogerie Thompson, of Rhode Island, to be United States Circuit Judge for the First Circuit.

SD-226

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

SENATE—Tuesday, December 22, 2009

The Senate met at 7 a.m. and was called to order by the Honorable EDWARD E. KAUFMAN, a Senator from the State of Delaware.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Eternal Spirit, whom we seek in vain without unless first we find You within, may the hush of Your presence fall upon our spirits, quiet our minds, and allay the irritations that threaten our peace. Breathe through the heat of our desires Your coolness and balm.

Strengthen the Members of this body. Take their spirits from strain and stress, and let their ordered lives confess the beauty of Your peace. Fill them so full of Your goodness that they will know how to discern Your best for their decisions. Make them faithful leaders by Your standard of righteousness.

We pray in Your Holy Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable EDWARD E. KAUFMAN led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, December 22, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable EDWARD E. KAUFMAN, a Senator from the State of Delaware, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. KAUFMAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Mr. President, following leader remarks, the Senate will resume

consideration of the health care legislation. The time until 7:18 this morning is equally divided and controlled between the two leaders or their designees. The Senate will then proceed to a series of three rollcall votes—they will be stacked—in relation to the Reid motion to table the Reid amendment No. 3278, the Reid-Baucus-Dodd-Harkin amendment No. 3276, and a motion to invoke cloture on the Reid substitute No. 2786. If cloture is invoked, the majority leader will then be recognized, and then the time until 9:30 will be equally divided and controlled between the two leaders or their designees. Beginning at 9:30 a.m. and until 5:30 p.m. today, the time will be controlled in alternating 1-hour blocks of time, with the Republicans controlling the first hour. The Senate will recess from 12:30 until 2:30 p.m. today for the weekly conferences.

CHRISTMAS PEACE

Mr. REID. Mr. President, tensions have been high because of this legislation which has been on the floor for a considerable period of time. I hope everyone understands that this part of the session is winding down, and I hope everyone will go out of their way to be thoughtful and considerate to those on both sides of the aisle. This is not the time for any personal attacks or anything that is acrimonious. It is time to figure out a way to leave here in a peaceful nature. We have the Christmas holiday coming, and we know how important that is to families. I hope everyone will work toward getting us out of here and back to our families as quickly as we can.

I designate the time the Democrats have remaining to Senator DURBIN, the majority whip.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

SERVICE MEMBERS HOME OWNERSHIP TAX ACT OF 2009

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of H.R. 3590, which the clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3590) to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

Pending:

Reid amendment No. 2786, in the nature of a substitute.

Reid amendment No. 3276 (to amendment No. 2786), of a perfecting nature.

Reid amendment No. 3277 (to amendment No. 3276), to change the enactment date.

Reid amendment No. 3278 (to the language proposed to be stricken by amendment No. 2786), to change the enactment date.

Reid amendment No. 3279 (to amendment No. 3278), to change the enactment date.

The ACTING PRESIDENT pro tempore. Under the previous order, the time until expiration of cloture on amendment No. 3276 shall be equally divided and controlled between the two leaders or their designees.

The Senator from Texas is recognized.

Mrs. HUTCHISON. Mr. President, I will be taking the leader time on our side. How much time is there?

The ACTING PRESIDENT pro tempore. Six minutes.

Mrs. HUTCHISON. I thank the Chair.

Mr. President, today we are taking another step toward passing a bill that has not seen the light of day for very long. It is a bill that is going to change health care policy in this country forever if it is finally coming to enactment. It will take effect in 2014. The reason we are talking about this bill and trying to let people know what is in it is because we hope there is still a chance this bill will not become law.

This bill was drafted behind closed doors without Republican input. The votes are 60 to 40. Sixty Democrats and 40 Republicans make up the Senate, and that is what is providing cloture on this bill.

This bill increases taxes by over \$½ trillion over a 10-year period—that is over \$500 billion—and \$½ trillion in cuts to Medicare. This is a time when we should not be increasing taxes. Small businesses are burdened already. This adds to their burden. Families are trying to make ends meet. They are trying to pay their mortgage so they will not be thrown out of their homes. They are trying to pay their bills. They are trying to find jobs in the highest level of unemployment in our country since World War II, and we are going to heap taxes and burdens on them starting as early as next year—in 2 weeks. This is not a time to raise taxes. We don't need a tax burden increase, we don't need Medicare cuts, and we do need health care reform that would lower the cost of health care. This is going to do the opposite. We are going to increase taxes and lower the service for Medicare in our country.

I remember reading some of the history and the anecdotes about the vote on the constitutional amendment to

allow women the right to vote. There was a Congressman from Tennessee who was wavering. He said what finally made up his mind—and he was the Congressman who made the difference—was that his mother wrote him a letter and said: Vote for ratification.

What is going to be said about this bill that changes health care policy for every American? What is going to be written about how the votes were brought together to have a bill that would tax our American people $\frac{1}{2}$ trillion and take Medicare as the pay-for for this program is that there will be essential protection for seniors in Florida and New York to prevent them from suffering the cuts to Medicare Advantage but no other State. Insurance companies in only two States, Nebraska and Michigan, are exempt from the taxes that will take effect on insurance companies, raising the premiums for every insured person in this country. Changes to the language restricting physician ownership of medical facilities appear only to benefit a single medical center in Nebraska, and additional Federal payments to Louisiana, Massachusetts, Nebraska, and Vermont to expand Medicaid will cost taxpayers in every other State in America over \$1 billion. This is part of the deal that was brokered to make sure 60 votes would pass this bill. The people of Nebraska will never pay a dime for Medicaid increases, whereas my State of Texas will carry a new burden of over \$9 billion, and every other State in America will eventually take the burden of the Medicaid increases but not Nebraska, not ever. Even the Governor of Nebraska has said he does not think that is fair.

So I think we can do better. We can do better in this country than having the history of the overhaul of our health care system that is going to affect the quality of life and the tax burden on every American. I think we should have a better history.

So I am asking my colleagues to think about this vote. We could change one vote, one person who says: I don't want the Senate to do something this way. I want the Senate to rise to the level that we know has been the tradition of this Senate for all of the years of our Republic, and that is that we would have an open, transparent process; that we would have bipartisan input; that a Republican amendment—one might have passed; that what we offer is what we promised the American people: lower costs in health care—

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

Mrs. HUTCHISON.—and a way for people to have more affordable access.

We still have a chance. That is why we are here today. And I hope we can turn away from this process and share the light of day with our colleagues and with America.

Thank you, Mr. President. I yield the floor.

The ACTING PRESIDENT pro tempore. The deputy majority leader is recognized.

Mr. DURBIN. Mr. President, a famous Washington figure once wrote a book entitled "Slouching Towards Gomorrah." If you were to describe what is happening in the Senate procedurally, we would call it lurching toward cloture. The cloture rules in the Senate require 30 hours between votes, and as a consequence we find ourselves in the early morning hours trying to finish this bill before the Christmas holiday, and it calls for the Senate to convene at extraordinary times, as we did this morning, but it is for a good purpose.

This is to bring to a close a debate which has gone on for more than 3 weeks. You have noticed more and more Republican Senators now coming to the floor with ideas and amendments, and the obvious question we have to ask is, Where have you been? For the first 21 days of debate on this bill, the Republicans offered four substantive amendments. They offered six motions to take the bill off the floor, send it back to committee, and quit the deliberations, but only four substantive amendments. Now they say they are just brimming with all of these notions and ideas that can improve this bill. They had the chance. In fact, they had more than a chance. They were invited into this process early on.

I would say to the Senator from Texas, she knows that 3 of her colleagues met over 61 times with their Democratic counterparts trying to come up with a bipartisan approach, and they couldn't. We also know that in the Health, Education, Labor, and Pensions Committee, the Republicans came and engaged in more than 50 days of deliberations in that committee and offered and had accepted more than 150 Republican amendments to this bill. We were not excluding Republicans from the process; they excluded themselves. When it came time for a final vote in the Health, Education, Labor, and Pensions Committee, not a single Republican Senator would vote for it. Senator COBURN of Oklahoma offered and had accepted 38 amendments to this bill and wouldn't vote for it. Other Senators were the same. They had their chance, and they didn't use their chance. In fact, the record shows now that after almost a year of deliberations, we have one Republican Congressman from New Orleans, LA, who voted for the House health care reform proposal, and one Republican Senator, Ms. SNOWE of Maine, who voted for the Finance Committee proposal. To say the Republicans have been actively engaged in this process is a misstatement.

Here is why we have to go forward, even if we have to meet at 7 in the

morning or even if we have to meet this Christmas week. When this bill is passed, we know from the CBO several things will occur. First, 30 million Americans who currently don't have health insurance will have the peace of mind of knowing they have health insurance. Secondly, we know 94 percent of the American people will finally be insured—the highest percentage in the history of the United States. We know the rates for health insurance premiums will start to come down, as they must, so businesses and individuals can afford it. We know that, finally, consumers across America will be able to stand and fight back when health insurance companies turn them down in their moments of need.

We say in this new amendment we are going to say to health insurance companies: You cannot deny coverage to anybody under 18, any child, for a preexisting condition. That is going to bring peace of mind to millions of American families who understand that without this they couldn't get the health insurance they absolutely need for their children.

Let me address quickly this notion that this is somehow a mystery amendment. This amendment has now been before the American public for at least 70 hours on the Internet. The bill itself has been before the American public now for more than 3 weeks on the Internet. You can find it not only on the Democratic Senate Web site, you can find it on the Republican Web site. They put our bill on their Web site because they don't have a comprehensive health care reform bill. They put ours up for people to read. There has been ample opportunity for people to read, dissect, and to be critical of it and raise questions about it. Before our final vote, America will have had its chance to read and understand the import of this effort and this effort is substantial.

This is something we have built up to for decades. To finally put the Senate on record as to whether we are endorsing the current health care system in America that is unaffordable, discriminates against people, and leaves so many behind, a system that currently rations care and says to 50 million Americans you have no coverage, and to millions of others that you have coverage that will not be there when you need it—we have to bring that to an end.

As Senator HARKIN said the other day in closing the debate, this is a real debate over whether health care will be a right or a privilege in America. If you believe it is a privilege for those who are wealthy and well off, then, of course, you will vote against this. If you believe it is a right that should be extended to more Americans, I hope you will join us in supporting it.

I yield the floor.

Mr. REID. Mr. President, has all time expired?

The ACTING PRESIDENT pro tempore. Forty seconds remain.

Mr. REID. I yield back that time.

The ACTING PRESIDENT pro tempore. The time is yielded back.

Mr. REID. Mr. President, I move to table amendment No. 3278, and I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. Is there a sufficient second? There is a sufficient second.

The question is on agreeing to the amendment.

The clerk will call the roll.

Mr. KYL. The following Senator is necessarily absent: the Senator from Oklahoma (Mr. INHOFE).

The PRESIDING OFFICER (Mr. WHITEHOUSE). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 60, nays 39, as follows:

[Rollcall Vote No. 386 Leg.]

YEAS—60

Akaka	Franken	Mikulski
Baucus	Gillibrand	Murray
Bayh	Hagan	Nelson (NE)
Begich	Harkin	Nelson (FL)
Bennet	Inouye	Pryor
Bingaman	Johnson	Reed

Inhofe

The motion was agreed to.

The PRESIDING OFFICER. The majority leader.

AMENDMENT NO. 3277 WITHDRAWN

Mr. REID. Mr. President, it is my understanding that the second-degree amendment has been withdrawn; is that right?

The PRESIDING OFFICER. Under previous order, amendment No. 3277 is withdrawn.

AMENDMENT NO. 3276

Mr. REID. Mr. President, I ask for the yeas and nays on amendment No. 3276.

The PRESIDING OFFICER. The yeas and nays were previously ordered.

The question is on agreeing to amendment No. 3276.

The clerk will call the roll.

The assistant legislative clerk called the role.

Mr. KYL. The following Senator is necessarily absent: the Senator from Oklahoma (Mr. INHOFE).

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 60, nays 39, as follows:

[Rollcall Vote No. 387 Leg.]

YEAS—60

NOT VOTING—1

Inhofe

The amendment (No. 3276) was agreed to.

CLOTURE MOTION

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair lays before the Senate the following cloture motion which the clerk will report.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the Reid substitute amendment No. 2786 to H.R. 3590, the Service Members Home Ownership Tax Act of 2009.

Christopher J. Dodd, Richard Durbin, Paul G. Kirk, Jr., Max Baucus, Claire McCaskill, Jon Tester, Maria Cantwell, Barbara A. Mikulski, Mark Udall, Sherrod Brown, Arlen Specter, Bill Nelson, Mark Begich, Sheldon Whitehouse, Roland W. Burris, Kirsten E. Gillibrand, Ron Wyden.

The PRESIDING OFFICER. By unanimous consent, the mandatory quorum call has been waived.

The question is, Is it the sense of the Senate that debate on amendment No. 2786, as amended, offered by the Senator from Nevada, Mr. REID, to H.R. 3590, the Service Members Home Own-

ership Tax Act of 2009, shall be brought to a close?

The yeas and nays are mandatory under the rule.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. KYL. The following Senator is necessarily absent: the Senator from Oklahoma (Mr. INHOFE).

The PRESIDING OFFICER (Mr. DURBIN). Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 60, nays 39, as follows:

[Rollcall Vote No. 388 Leg.]

YEAS—60

NOT VOTING—1

Inhofe

The PRESIDING OFFICER. On this vote the yeas are 60, the nays are 39. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

The majority leader is recognized.

AMENDMENT NO. 2878

Mr. REID. Mr. President, I ask the clerk to call and report amendment No. 2878.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID], for Mr. CARDIN, proposes an amendment No. 2878.

Mr. REID. I ask unanimous consent the reading of the amendment be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in the RECORD of Thursday, December 3, 2009 under "Text of Amendments.")

Mr. REID. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.
The yeas and nays were ordered.

AMENDMENT NO. 3292 TO AMENDMENT NO. 2878

Mr. REID. I now ask the clerk to report amendment No. 3292.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID] proposes an amendment numbered 3292 to amendment No. 2878.

The amendment is as follows:

(Purpose: To change the effective date)

At the end of the amendment, insert the following:

This section shall become effective 5 days after enactment.

Mr. REID. Mr. President, it is my understanding—Senator McConnell and I have agreed—I should not say I understand—we have agreed that the time until 9:30 will be equally divided and controlled between the two leaders, and at 9:30 we will go, as we have worked in recent days, into having blocks of time until our caucuses, until 12:30.

The PRESIDING OFFICER. The majority leader is correct. Under the previous order, until 9:30 the time is equally divided and controlled between the leaders or their designees, and under the previous order the time until 5:30 today will be divided into 1-hour alternating blocks of time, the majority controlling the first block.

Mr. REID. Mr. President, I ask everyone to acknowledge that we have our regular weekly caucuses at 12:30. We will come back at 2:30, and we will be going back to blocks of time until 5:30 this evening.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I said when the Senate opened today and I will say again, because of the long hours we have spent here for weeks now, there is a lot of tension in the Senate. Feelings are high, and that is fine. Everybody has very strong concerns about everything we have done and have to do. But I hope everyone would go back to their gentlemanly ways. I was trying to figure out how to say this—gentlemanly ways. We used to say in the House gentlemen, so I guess it is the same here.

Anyway I hope everyone has—I have said to a number of people—Rodney King—let's all just try to get along. That is the only way; we need to do it. This is a very difficult time in the next day or so. Let's try to work through this.

For those of the Christian faith we have the most important holiday, and that is Christmas.

I would hope everyone would keep in mind that this is a time when we reflect on peace and the good things in life. I would hope everyone would kind of set aside all the personal animosity, if they have any in the next little bit, and focus on the holiday.

The PRESIDING OFFICER. The minority leader.

Mr. McConnell. Mr. President, let me add, to my good friend the majority leader, he and I have an excellent relationship. We speak a number of times in the course of every day and have no animosity whatsoever. We are working on an agreement that will give certainty to the way to end this session. Hopefully, the two of us together can be recommending something that makes sense for both sides in the not-too-distant future.

The PRESIDING OFFICER. Who yields time?

The Senator from Montana.

Mr. BAUCUS. What is the regular order?

The PRESIDING OFFICER. The time until 9:30 is equally divided between the leaders or their designees.

The Senator from Montana.

Mr. BAUCUS. Mr. President, it has been more than a month since the majority leader moved to proceed to the health care reform bill before us today. At long last, the Senate is now in the final throes of passing this historic legislation.

From the beginning, this Senator has sought out what Abraham Lincoln called "the better angels of our nature." That is the way this Senator has always sought to legislate.

A year and a half ago, I convened a bipartisan retreat at the Library of Congress. Half a year ago, I convened three bipartisan roundtables with health care experts. Half a year ago, the Finance Committee conducted three bipartisan walk-throughs of the major concepts behind the bill before us today.

We went the extra mile. I reached out to my good friend, the ranking Republican member of the Finance Committee. I reached out to the ranking Republican member of the HELP Committee.

We sought to craft a bill that would appeal to the broad middle. We sought to craft a bill that could win the support of Republicans and Democrats alike.

We met, a group of six of us, three Democrats and three Republicans. We met more than 30 times. We met for months, encouraged by the President to do so. Our group met with the President several times. The President encouraged us to keep pursuing our negotiations, hoping to reach bipartisan agreements.

No, we did not reach a formal agreement. The leadership on the other side of the aisle went to great lengths to stop us from doing so.

But even though we did not reach a formal agreement, we came very close to doing so. The principles that we discussed are very much the principles upon which the Finance Committee built its bill. The principles that we discussed are very much the principles

reflected in the bill before us today. Our work began much earlier than I have indicated. We met all the preceding year, held about ten hearings in the Finance Committee working toward health care reform. We also finished a white paper in November 2008. I say with trepidation that basically that is the foundation from which almost all ideas in health care reform emanated. To be fair, the ideas in that paper had been floating around, principles from the Massachusetts health care reform, for example. Most policy experts and health care economists who had been working on reform published their ideas. We sought the best, compiled them, and put together that white paper published in November of last year.

From the debate that the Senate has conducted this past month, you would not know it. During this debate, some on the other side of the aisle have mischaracterized the bill before us. Some on the other side of the aisle have set about a systematic campaign to demonize this bill.

Through bare assertion alone, with the thinnest connection to fact, they have sought to vilify our work. If one listened to their assertions alone, one would not recognize the bill before us.

And so, let me, quite simply, state the facts.

Some on the other side of the aisle assert that this bill is a government takeover of health care.

The fact is that the nonpartisan Congressional Budget Office says that this bill would reduce the government's fiscal role in health care. Just 3 days ago, CBO wrote, and I quote:

CBO expects that the proposal would generate a reduction in the federal budgetary commitment to health care during the decade following the 10-year budget window.

Some on the other side of the aisle assert that this bill would add to our Nation's burden of debt.

The fact is that the nonpartisan Congressional Budget Office says that this bill would reduce the deficit by \$132 billion in the first 10 years and by between \$650 billion and \$1.3 trillion in the second 10 years. The fact is that this is the most serious deficit reduction effort in more than a decade.

Some on the other side of the aisle assert that this bill would harm Medicare.

The fact is that Medicare's independent actuary says that this bill would extend the life of Medicare by 9 years. The fact is that this is the most responsible effort to shore up Medicare in more than a decade.

Some on the other side of the aisle assert that this bill does not do enough to ensure the uninsured.

The fact is that the nonpartisan Congressional Budget Office says that this bill would extend access to health care to 31 million Americans who otherwise would have to go without. The fact is that CBO says, and I quote:

The share of legal nonelderly residents with insurance coverage would rise from about 83 percent currently to about 94 percent.

Nothing that Senators on the other side of the aisle have proposed would come close. CBO estimated that the Republican substitute offered in the House of Representatives would have extended coverage to just 3 million people. The fact is that CBO says of that plan, and I quote:

The share of legal nonelderly residents with insurance coverage in 2019 would be about 83 percent, roughly in line with the current share.

I would cite the facts about the Republican substitute in the Senate. But the fact is that there is no Republican substitute.

Some on the other side of the aisle assert that they simply prefer a more modest reform of health care.

The fact is that the Republicans controlled the Senate from 1995 to 2001 and from 2003 to 2006. The fact is that before they took control, in 1994, 36 million Americans, 15.8 percent of non-elderly Americans were without health insurance coverage. In the last year of their control, in 2006, nearly 47 million Americans, 17.8 percent of non-elderly Americans were without health insurance coverage. The legacy of Republican control was 10 million more Americans uninsured.

Some on the other side of the aisle say that we are moving too fast.

The fact is that it was 1912, when former President Theodore Roosevelt first made national health insurance part of the Progressive Party's campaign platform. The fact is that people of good will have been working at this for nearly a century.

The fact is, health care reform for America is now within reach. The fact is, the most serious effort to control health care costs is now within reach. The fact is, life-saving health care coverage for 31 million Americans is now within reach.

Let us, at long last, grasp that result. Let us, this time, not let this good thing slip through our hands. And let us, at long last, enact health care reform for all.

I suggest the absence of a quorum and ask unanimous consent that the time be charged equally to each side.

The PRESIDING OFFICER (Mr. WHITEHOUSE). Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mrs. HUTCHISON. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. HUTCHISON. Mr. President, are we now in a period where we go back and forth without limit?

The PRESIDING OFFICER. We are.

Mrs. HUTCHISON. Mr. President, I ask to be notified after 5 minutes, after which Senator VITTER is going to speak.

The PRESIDING OFFICER. The Chair will so notify.

Mrs. HUTCHISON. Mr. President, we have talked a lot about what is in this bill, the massive tax increases, the massive cuts in Medicare. But there is another issue I think, looking down the road, we are going to need to pursue. We have talked about how groundbreaking this bill is. In fact, the majority calls it historic, and it is historic. We believe it is historic in the bad precedents it is setting, both in process and in substance. I think some of these precedents are going to be tested under the Constitution of the United States.

I wish to start by talking about a couple of those. No. 1, in the effort to get the last vote, clearly there were deals made. There were deals that affect individual States and even one that affects two insurance companies that will have a different treatment from all the other insurance companies in America. It is said there will be two Nebraska insurance companies that will not have to pay the tax increases of the insurance companies that will be levied on all the other health insurance companies. This is an issue that must be raised under the Constitution, the equal protection clause of the Constitution. To take a set of companies in an industry, competitors—and we value the free market system and the free enterprise system—to pluck out two competitors and say: You will be treated differently because we need your vote to pass this bill should be tested under the Constitution of the United States.

It is my hope some insurance company that has standing to bring this suit will be able to test this precedent. It is a very bad precedent, and it is certainly bad policy to start passing laws that distinguish some parts of an industry versus other parts of an industry that would be treated in a different way. I hope we will do that.

No. 2, I believe there is a 10th amendment issue. Here is my concern. Many States, including my State of Texas, have self-insurance plans for State employees. States with large numbers of State employees find that self-insurance is a better way to go than private insurance programs. In this bill, every insurance company that plans to increase its premiums must get approval from the Department of Health and Human Services first.

Now, my State of Texas, with its self-insurance plan, then, has to go to the Secretary of Health and Human Services to ask permission to increase the premiums on their State self-insured insurance plan. That is a violation of the 10th amendment, as I see it.

I am very concerned that a State that has State employees who accept a

self-insurance plan would then be able to be told by the Federal Government that they cannot increase their premiums to cover the cost and keep the sound system that they have in place.

Now, other States have self-insurance plans, so I believe they would also be very affected by this, and I believe there will be a standing for a State with this type of plan to be able to challenge this part of this bill and, hopefully, bring it down if it is a violation of the 10th amendment.

I want to talk about another area that I think is a stretch in this bill; that is, apparently the individual mandate is being justified by the commerce clause of our Constitution. Now, the commerce clause basically says no State may impede interstate commerce. You may say, out in America: I don't see the connection. I am going to be mandated to buy health insurance or be fined if I don't because States cannot impede interstate commerce?

Well, I would agree with people out there that seems like a disconnect because, apparently, using the commerce clause, the majority is saying the Federal Government has the right to manage insurance, and that a requirement of an individual mandate is part of the Federal capability to manage insurance in this country, and you cannot impede that right by the Federal Government because you cannot impede interstate commerce.

I think this whole individual mandate issue is going to be a center for discussion, debate, and opposition to the bill that is clearly moving down a track that we are trying to stop, but that train is moving. I think we are going to have to talk about the individual mandate. People are saying to me: How can the Federal Government tell me I have to buy insurance? I think they have a point.

You have to buy automobile insurance because, but that comes with the right to drive. So you get the right, licensed by the State, to drive your car, and in exchange for that a State may require that you have collision insurance on your automobile, and many States do. But when you say you have to buy an insurance policy, I think that crosses a line where a person has a right to say: I am not going to buy insurance if I guarantee that I am not going to be a burden to the Federal Government or to the State government or to any other taxpayer. I think you should have that right, but that is not the way this bill is written.

The bill is a Federal mandate that every person in America has to have health insurance or be fined if they do not. So at least if we were going to write such a provision, to keep the right of an individual not to have a mandate under the commerce clause of the Constitution, at least you ought to say that a person would have to sign something that says: I will give you a

promissory note if I do not choose to buy insurance. But that is not the way this bill is written.

So I think this, along with the State mandate on Medicaid—which, again, I think is an equal protection issue, and maybe that is a stretch—but that one State will not have to ever pay the State's share of the increase in Medicaid that is in this bill but the other 49 States in America will is certainly a violation of our responsibility to treat all States equally or to have formulas that have some ability to say there is a standard that has been set that should prevail. But not in this bill.

My State of Texas will have almost a \$10 billion increase in its State's share of Medicaid because of the expansion in this bill. But there are States that are exempted from the increases and one State that is exempted forever because of a deal made to get that 60th vote to pass this bill.

I think people are looking at this issue in America today and saying: What has gotten into the people in Congress who are voting for this bill?

So, Mr. President—

The PRESIDING OFFICER. The Chair apologizes. The Chair did not notify the Senator at 5 minutes. The Chair forgot. The Senator's 5 minutes has passed.

Mrs. HUTCHISON. Mr. President, thank you for the notification.

I think there are issues now that will be raised going forward in the future, and there is still time for one Senator in the 60 to change the vote. Therefore, I hope one will hear from his or her constituents enough that that person will say: It is time to slow this bill down. I am going to change my vote so people can see all the effects that we have not talked about yet, and let's do this right.

We can lower the cost of health care, we can provide more access to more people to have health care coverage, which should be the goal of this legislation, this massive reform of a health care system that is working for many and has provided the best quality of health care in the world. We have a chance to keep it by slowing this bill down. That is why we are fighting. That is why we are still here talking 3 days before Christmas. We want to stop this bill and do it right. Doing it right is more important than doing it fast, and I think the American people believe that too.

Thank you, Mr. President. I yield the floor.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. VITTER. Mr. President, how much time remains on the minority side before 9:30 a.m.?

The PRESIDING OFFICER. There is 24 minutes remaining on the minority side.

Mr. VITTER. Thank you, Mr. President.

Mr. President, since this latest version of comprehensive health care reform was unveiled a few days ago—a 2,733-page bill—I have been looking at it very carefully, particularly, of course, with the Louisiana perspective, and I want to share my strong concerns with that Louisiana perspective with my colleagues today.

Of course, we have all heard this Senate health care reform bill referred to as the “Louisiana purchase” because of the special \$300 million provision in it related to our Medicaid match rate.

Quite frankly, I do not much like that nickname for two reasons. First of all, the fact that we in Louisiana have to pay a higher Medicaid match rate under present law because of the hurricanes is a real inequity, which I support fixing. It is a shame the merits of that fix, which are very real, have been completely lost in this debate because of the way this Louisiana fix has been used and abused, quite frankly, in trying to pass this megabill.

But, secondly, I do not like the phrase because it suggests that Louisiana in general would fare very well under the bill overall, and nothing could be further from the truth. This bill overall sells Louisiana short. It sells Louisiana out. In fact, rather than the “Louisiana purchase,” I think the bill could be very accurately called the “Louisiana sellout.”

What are those costs and those serious problems for Louisiana I am talking about?

Let's start with Medicaid, the program for the poor. Let's start with that \$300 million fix. It is certainly true that fix is there—a \$300 million benefit to the State under our Medicaid Program—but that is not all of the picture. It is not even all of the Medicaid picture because besides that fix, in the bill overall there is a dramatic expansion of Medicaid—a huge expansion—and the Louisiana State government and Louisiana taxpayers have to help pay for that expansion. That extra cost to the State government, to the State taxpayer, is way more than the \$300 million benefit.

By very conservative estimates by the Louisiana Department of Health and Hospitals, it is at least \$1.3 billion over 10 years of full implementation. So, sure, a \$300 million benefit but, at least, minimum, a \$1.3 billion cost—extra cost—to the State.

Now, three things are important about these figures. One is obvious: \$300 million is a whole lot less than \$1.3 billion. But, secondly, this \$1.3 billion over 10 years of full implementation is a very conservative estimate from the Louisiana Department of Health and Hospitals. And, No. 3, while this money, the \$300 million, is one time, this other goes on forever. This \$1.3 billion is the first decade cost, but it goes on forever from there; and every 10 years, this grows and is repeated.

So what does that mean? That means in the first 10 years of full implementation, the net impact on the State is very negative, at least \$1 billion, and it goes on from there.

I am very concerned about a lot of other groups in Louisiana, not just the State government and State budget. I am particularly concerned about Louisiana seniors. Of course, Louisiana seniors, like seniors everywhere, depend on Medicare. They have paid into it their whole lives. This bill—it is a simple fact; it is confirmed by the Congressional Budget Office, nonpartisan—this bill cuts Medicare \$466 billion. Medicare now is already facing insolvency by 2017. So instead of fixing that in a real way, the bill steals almost \$½ trillion from Medicare and uses it not within Medicare but to help pay for a brand-new entitlement.

Mr. BAUCUS. Mr. President, will the Senator yield for a question?

Mr. VITTER. I will not at this time. I will be happy to yield after my presentation.

That means real cuts in terms of hospitals, home and hospice, nursing homes, and Medicare Advantage. There are over 151,000 Louisiana seniors on Medicare Advantage. They are going to be particularly hard hit. They like that choice now. They will not have that choice as it exists now under this bill.

How about Louisiana taxpayers? I am also very concerned about Louisiana taxpayers. Again, according to the nonpartisan Congressional Budget Office, the bill contains \$518 billion of tax increases nationwide—over \$½ trillion of tax increases. As for that oft repeated promise that no one who earns under \$200,000 will be affected, well, again, think again. The Joint Committee on Taxation—nonpartisan—has said 42.1 million Americans earning below \$200,000 will get a tax increase over the next several years—42.1 million. That means hundreds of thousands of Louisiana taxpayers will be hit, will get a tax increase—I am talking about folks who earn well below \$200,000—will also pay more in the form of higher insurance premiums because, again, the nonpartisan Congressional Budget Office has said this bill increases overall health care costs. It does not decrease those costs.

Well, what about Louisiana small businesses? Surely, this bill protects them in the midst of this serious recession. Well, not exactly. The biggest impact on businesses is a brandnew mandate in the bill. Most businesses have to either provide a government-defined health insurance benefit or they have to pay a new tax to the government. NFIB, the National Federation of Small Business, says that is going to cost the Nation 1.6 million jobs. Translated to Louisiana, that is tens of thousands of additional lost jobs on top of our current high unemployment. Again, we are in the middle of a serious

recession. This will cost us jobs on top of that.

There is also another big problem, which is an incentive for businesses to drop coverage. I mentioned that brandnew mandate: Either you provide a government-defined health benefit or you pay a new tax to the Federal Government. The other problem with that is, for a lot of business, it is going to be cheaper to drop coverage and pay the new tax. So many employees who have coverage now that they are reasonably satisfied with are going to lose it, and that is a big concern as well.

Just for good measure, the bill forces pro-life taxpayers to, in many very meaningful ways, subsidize abortion. Louisiana is one of the most proudly pro-life States in the Nation, so that is particularly offensive. Everyone who cares about life, who has followed this issue, whether it is the Catholic Bishops, National Right to Life, and other organizations have said, clearly, the language in this bill doesn't protect against taxpayer-funded abortion. The language in this bill does not honor the Hyde amendment, which has been Federal law since 1977. The language in this bill crosses an important line, does not offer the conscience protections we have depended on for years. So this sets radical new precedent in terms of taxpayer and Federal Government support of abortion. That is a big Louisiana concern as well.

So what do we have? We have a 2,733-page bill, mega health care reform, with all these very serious problems for Louisiana and important Louisiana groups and important Louisiana citizens, including seniors, small business, taxpayers, and the State budget, which is already facing serious cuts and challenges.

If we want to put Louisiana first considering all these costs, we have to say no to this bill. If we want to put America first considering all these unsustainable costs, we have to say no to this bill. But we can and we should say yes to the right kind of health care reform. This isn't a debate about yes or no, health care reform or not; this is a debate about what the right kind of health care reform is.

To me, we need to start over with that right kind of reform. To me, that would mean something such as starting by passing five bills. Each one doesn't need to be longer than 25 pages. Each one would be focused like a laser beam on a real problem that affects real Louisianans, real Americans, offering a real, concrete, focused solution. My five bills would be this: Cover pre-existing conditions. That is a real problem in Louisiana. That is a real problem in America. Let's have a focused bill that does that.

Secondly, allow buying insurance across State lines. That would dramatically expand competition in the marketplace. That would lower pre-

miums. That would give all folks wanting health insurance dramatically decreased costs than they have now.

Third: Let's do something real about prescription drug prices. Let's not sell out to PhRMA and cut a special deal with the pharmaceutical industry, as the White House has. Let's pass re-importation and pass real generics reform.

Fourth: Let's pass tort reform and take all that unnecessary cost out of the system. That doesn't provide better health care for anyone. It doesn't do anything positive for anyone except wealthy trial lawyers. Let's pass tort reform.

And fifth: Let's allow small business to pool across State lines to form larger pools of insurance across State lines and gain from that extra buying power. Why shouldn't a restaurant in Baton Rouge that may only have seven or eight people to cover in health insurance, why shouldn't they be able to pool through the National Restaurant Association, create a pool of millions nationwide and enjoy the same buying power Apple Computers or Toyota has and get the same benefit in the insurance marketplace through that increased buying power and increased competition?

So I urge all my colleagues to put their State first and vote no, to put our Nation first and vote no, and to start anew with the right sort of focused reform as I have outlined.

I thank the Chair. I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I just have a couple statements to make, points to make, in view of the last statement, to correct some misimpressions given by the last statement.

The last speaker said Medicare cuts apply and this is going to cut Medicare. The fact is—I wish the previous speaker would stay on the floor, but he is fleeing the floor because he knows I am going to mention facts in total refutation to the assertions he is making. He leaves the floor. He will not stay with me to talk about what is going on. He makes statements that are misrepresentations and then he leaves the floor.

Let me talk about some of the things he said which are incorrect. One, he basically says Medicare is going to be hurt by these huge cuts to Medicare. The fact is, we are helping the Medicare trust fund with this legislation. The fact is, the Chief Actuary at HHS has said this legislation before us will increase the solvency of the Medicare trust fund another 9 years. That is a fact.

Second, he is trying to say there are a lot of big tax increases here. He is trying to direct the public away from what the fact is. The fact is, the Joint Committee on Taxation says there are \$436 billion of tax cuts in this legisla-

tion, reductions in taxes; \$436 billion in tax cuts in the form of tax credits for people who purchase insurance in the exchange. It is a tax cut of \$436 billion of tax cuts in the exchange. I might say \$40 billion of that is small business tax cuts. They are not increases, they are tax cuts for small business and the tax cuts for individuals is \$436 billion.

Frankly, I wish I had a lot of the data before me. I don't have it right now to refute other points he made. He talked about premiums going up. The Congressional Budget Office basically says 93 percent of Americans will find their premiums will come down because of this legislation, and for a certain class of individuals—those in the individual market and the small group market will get very significant reductions in premiums on account of this bill.

It irritates me, frankly, when Senators come to the floor and make all these misstatements and they are not based at all on fact.

In fact, what we need to do around here is get more and more institutions to objectively analyze policy so we know what the facts are. It is pretty hard to argue the facts. The CBO does a pretty good job. The Joint Committee on Taxation does a pretty good job. But if somehow this country could turn to an organization or organizations to find the facts—just the facts—I think it would help a little bit because it is hard to argue the facts. If you have good facts, you generally can create good policy.

Back to premiums. CBO says 93 percent of premiums go down. Actually, for about five-sixths of those insured—that is, those who work for larger companies, it is called the large group markets—premiums will go down not a lot but a little. According to CBO, it is up to a 3-percent reduction in premiums. They look at the year 2016 as a benchmark year, so CBO says that for those, about 70 percent of Americans who work for large markets, premiums will actually go down 3 percent.

What about 13 percent of Americans who work for small groups, small companies? Basically, CBO and the Joint Committee on Taxation say those could go up 1 percentage point as well as down 2 percentage points. It is about even. It is difficult to tell. But those who get credits in the small group market will find their premiums down by about 8 to 11 percent. Those who work for small companies will find their premiums go down 8 to 11 percent.

What about the nongroup market—individuals. Well, basically, if you compare today's insurance premiums with what it might be in the future, the premiums will go down 14 to 20 percent, but because of better benefits, premiums could go up 10 to 13 percent for 7 percent of Americans. As I mentioned earlier, 93 percent will find their premiums go down. For 7 percent they will

go up, but for those 7 percent, they are going to have a lot better coverage, a lot better insurance in 2016. All the insurance market reforms will have kicked in: denial of preexisting conditions, market status, health status and so on and so forth.

Get this: For the nongroup market, 17 percent of Americans who buy insurance through the nongroup market, 10 percent of that 17 percent, because of tax credits, will find their premiums go down by—guess how much—56 to 59 percent. Once more: 17 percent of Americans buy insurance individually. Of those 17 percent, 10 percent of them will find their premiums will be reduced 56 to 59 percent. That is according to the Joint Committee on Taxation. Only one small group, according to the Joint Committee on Taxation, will find an increase in 2016. That is 7 percent of Americans in 2016, but that will be compensated with a lot better insurance, high-quality insurance. No more rescissions. No more denial based on preexisting conditions. The rating reforms will have kicked in and the annual limits, the lifetime limits will have been repealed. It will be a heck of a lot better insurance. So maybe their premiums will go up a little bit, but they will get a heck of a lot better buy for what they are getting. It is similar to buying a new car instead of a used car—hopefully, a good new car. All in all, in a very real sense, all Americans are going to find his or her premiums will go down. Seven percent will find them go up a little bit, but they will get a heck of a lot better insurance for the premiums they will be paying.

The previous speaker is wrong when he says it will increase premiums. The Joint Committee on Taxation says it will not. I didn't hear him quote the Joint Committee on Taxation saying premiums will go up. If you look at the actual analysis by the Joint Committee on Taxation, they find the premiums will go down.

Seeing nobody who wishes to speak, I wish to address the question of the constitutionality of the individual mandate. Let me read into the RECORD an analysis by Mark Hall, prepared by the O'Neill Institute. Basically, he says the following:

Health insurance mandates have been a component of many recent health care reform proposals. Because a Federal requirement that individuals transfer money to a private party is unprecedented, a number of legal issues must be examined. This paper analyzes whether Congress can legislate a health insurance mandate and the potential legal challenges that might arise given such a mandate. The analysis of legal challenges to health insurance mandates applies to federal individual mandates, but can also apply to a federal mandate requiring employers to purchase health insurance for their employees. There are no constitutional barriers for Congress to legislate a health insurance mandate as long as the mandate is properly designed and executed as discussed below. This paper also considers the likelihood of

any change in the current judicial approach to these legal questions.

Potential solutions. Congress's Authority to Regulate Commerce: The federal government has the authority to legislate a health insurance mandate under the Commerce Clause of the United States Constitution. A federal mandate to purchase health insurance is well within the breadth of Congress's power to regulate interstate commerce. Congress can avoid legal challenges related to the 10th Amendment and states' rights by preempting state insurance laws and implementing the mandate on a Federal level. If Congress wants states to implement a federal mandate, it has the following two options:

Conditional Spending: Congress may condition federal funding, such as that for Medicaid or public health, on state compliance with federal initiatives. **Conditional Preemption:** Congress may allow states to opt out of complying with direct federal regulation as long as states implement a similar regulation that meets Federal requirements.

Congress's Authority to Tax and Spend for the General Welfare: Congress also has the authority to legislate a health insurance mandate under its Constitutional authority to tax and spend.

There are no plausible Tenth Amendment and states' rights issues arising from Congress's taxing and spending power. However, Congress's taxation power cannot be used in a way that burdens a fundamental right recognized in the Constitution's Bill of Rights and judicial interpretations by the U.S. Supreme Court. Since there is no fundamental right to be uninsured, no fundamental right challenge exists.

Other Relevant Constitutional Rights: Challenges under the First and Fifth Amendments relating to individual rights may rise, but are unlikely to succeed. The federal government should include an exemption on religious grounds to a health insurance mandate as an added measure of protection from legal challenges based on religious freedom. In the alternative, the federal government can simply exempt a federal insurance mandate from existing federal legislation protecting religious freedom.

Considerations: To avoid a heightened level of security in any judicial review, the federal government should articulate its substantive rationale for mandating health insurance during the legislative process.

It goes on, and it is probably too lengthy to read. Professor Hall wrote this. He is a professor at Wake Forest University.

I will read the conclusion:

The Constitution permits Congress to legislate a health insurance mandate. Congress can use its Commerce Clause powers or its taxing and spending powers to create such a mandate. Congress can impose a tax on those who do not purchase insurance, or provide tax benefits to those that do purchase insurance. . . . If Congress would like the States to implement an insurance mandate, it can avoid conflicts with the anti-commandeering principle by either preempting state insurance laws or by conditioning federal funds on State compliance. A federal employer mandate for state and local government workers may be subject to a challenge; however, such a challenge is unlikely to be successful. Individual rights challenges under the First Amendment's Free Exercise Clause or RFRA are unlikely to succeed, although a federal insurance mandate should include a statement that RFRA does not apply or provide

for a religious exemption. Fifth Amendment Due Process and Takings Clause challenges are also unlikely to be successful. A legal analysis presented is likely to endure, as the Supreme Court's current position and approach to interpreting relevant constitutional issues appear to be stable.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. BURRIS. Mr. President, as this debate draws to a close and my colleagues and I prepare to vote on a health care reform bill, I recognize that long hours and tense negotiations have left some nerves and tempers frayed. That is why I come to the floor.

Although our work keeps us away from our family and friends for much of this holiday season, I see no reason why we cannot share good cheer with one another right here in Washington.

So in the spirit of the season, I would like to share my own version of a classic holiday story with my good friends on both sides of the aisle.

It goes something like this:

"Twas the night before Christmas and all through the Senate
The Right held up our health bill, no matter what was in it.
The people had voted—they mandated reform—
But Republicans blew off the gathering storm.
"We'll clog up the Senate!" they cried with a grin,
"And in midterm elections, we'll get voted in!"
They knew regular folks need help right this second—
But fundraisers, lobbyists and politics beckoned.
So, try as they might, Democrats could not win
Because their majority was simply too thin.
Then, across every State there arose such a clatter
The whole Senate rushed out to see what was the matter!
All sprang up from their desks and ran from the floor
Straight through the cloakroom, and right out the door.
And what in the world could be quite this raucous?
But a mandate for change! From the Democratic caucus!
The President, the Speaker, and of course Leader Reid
Had answered the call in our hour of need.
More rapid than eagles the provisions they came,
And they whistled, and shouted, and called them by name:
"Better coverage! Cost savings! A strong public plan!
Accountable options? We said 'yes we can!' "No exclusions or changes for pre-existing conditions! Let's pass a bill that restores competition!"
The Democrats all came together to fight for the American people, that Christmas Eve night.
And then, in a twinkling, I heard under the dome—the rollcall was closed! It was time to go home.
Despite the obstructionist tactics of some, the filibuster had broken—the people had won!
A good bill was ready for President Obama, ready to sign, and end health care drama.

And Democrats explained, as they drove out of sight: "Better coverage for all, even our friends on the right!"

And I say to all of my colleagues: In this season, Merry Christmas and a happy, happy New Year.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. ENSIGN. Mr. President, in a little while, I will be making a constitutional point of order against the substitute amendment. I won't make that now because we are working on an agreement on when we can have that vote.

I want to start talking about the reason I believe this substitute amendment is unconstitutional—the individual mandate contained in it. I will be speaking for about 10 minutes now, and then I will resume my remarks at 9:30, after one of the Democrats comes down and uses their 15 minutes.

If this constitutional point of order is rejected and the health care reform bill is passed, I believe the Court should reject it on constitutional grounds.

Some of my colleagues may not be aware of the Finance Committee's debate on the constitutionality of this health care reform bill. During the committee markup of its version of the bill, Senator HATCH raised some thought-provoking constitutional questions. He offered an amendment, which I supported, to provide a process for the courts to promptly consider any constitutional challenge to the Finance Committee bill. He chose the same language that was put into the bipartisan Campaign Reform Act. Unfortunately, the amendment was deemed nongermane.

I am seriously concerned that the Democrats' health care reform bill violates the Constitution of these United States. As part of comprehensive health care reform, the Democrats would require every single American citizen to purchase health insurance. Americans who fail to buy health insurance that meets the minimum requirements would be subject to a financial penalty. This provision can be found in section 1501 of the Democrats' health care reform bill. It is called the "requirement to maintain minimal essential coverage."

While this is a constitutional point of order, I feel it is important to note that in the Declaration of Independence, America's Founding Fathers provided that:

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness.

What happened to life, liberty, and the pursuit of happiness? I guess Americans can only have them if they comply with this new bill and buy a bronze, silver, gold, or platinum health insurance program.

America's Founders and subsequent generations fought dearly for the freedoms we have today.

I question the appropriateness of this bill and specifically the constitutionality of this individual mandate. Is it really constitutional for this body to tell all Americans they must buy health insurance coverage? If so, what is next? What personal liberty or property will Congress seek to take away from Americans next? Will we consider legislation in the future requiring every American to buy a car, to buy a house, or to do something else the Federal Government wants?

My friend and colleague, Senator HATCH, raised similar questions during the debate in the Finance Committee. In fact, he raised the following question:

If we have the power simply to order Americans to buy certain products, why did we need a cash for clunkers program, or the upcoming program providing rebates for purchasing energy efficient appliances? We can simply require Americans to buy certain cars, dishwashers, or refrigerators.

Where do we draw the line? Will we even draw one at all? The Constitution draws that line. It is called the enumerated powers. I don't think Congress has ever required Americans to buy a product or service, such as health insurance, under penalty of law. I doubt Congress has the power to do that in the first place.

As the CBO explained during the 1990s:

A mandate requiring all individuals to purchase health insurance would be an unprecedented form of Federal action. The government has never required people to buy any good or service as a condition of lawful residence in the United States.

Yet that is exactly what this health care bill would do. This bill would require Americans to buy a product many of them do not want or simply cannot afford.

Some individuals have raised the example of car insurance in the context of this debate. But requiring someone to have car insurance for the privilege of being able to drive is much different from requiring someone to have health insurance. As Senator HATCH pointed out, people who do not drive do not have to buy car insurance. Senator HATCH is right. If you live in New York City, you probably rely on subways or some other form of mass transit. You probably do not own a car, so you have no reason to buy car insurance and you are not forced to do so. Yet this health care reform bill requires Americans to buy health insurance whether or not they ever visit a doctor, get a prescription, or have an operation.

Under this bill, if you do not buy health insurance coverage, you will be subject to a penalty. Let's call this penalty what it really is—a tax. Even worse, this penalty operates more like a taking than an ordinary tax. If an American chooses not to buy minimal

essential health coverage, he or she will face rapidly increasing taxes—up to \$750 or 2 percent of taxable income, whichever is greater, by the year 2016. There is no penalty for Americans who qualify for hardship or religious exemptions. There is also no penalty for illegal immigrants or prisoners.

Americans typically pay taxes on a product or service they buy or on income they earn. For example, if you fill up your car at the pump, you pay a gas tax. If you earn income, you pay an income tax. Yet this bill creates a new tax on Americans who choose not to buy a service. It is very counterintuitive. This bill taxes Americans for not doing anything at all, other than just existing. This penalty is assessed through the Internal Revenue Code.

Senator HATCH made the following statement:

If this is a tax at all, it is certainly not an excise tax. Instead, it is a direct tax. While the Constitution requires that excise taxes must be uniform throughout the United States, it requires that direct taxes must be apportioned among the States by population. Just as the excise tax on high premiums is not uniform, this direct tax on individuals who do not purchase health insurance is not apportioned.

I recognize that the authors of this health reform bill included an individual mandate in this bill based on the idea that health care costs would be spread among all Americans and would ultimately reduce their health insurance costs. The claim is, insurance costs will be lowered because cost shifting will be reduced. This cost shift arguably takes place because health care providers—doctors and hospitals—who provide free or uncompensated care to the uninsured, shift the cost to the insured or paying patients. The hospital or doctor then shifts the cost of that unpaid care to the insured patient in the form of higher charges in order to cover the cost of uninsured patients.

I understand this concept, but I am incredibly concerned that the individual mandate provision takes away too much freedom and choice from Nevadans and from Americans across the country.

I have read and studied multiple articles by scholars on the constitutionality of the individual mandate. I believe the individual mandate provision in this health care reform bill calls into question several provisions of the Constitution. I think the Congress does not have the authority, under the enumerated powers, to enact such a mandate.

I know the supporters of the individual mandate have claimed the commerce clause and the taxes and general welfare clause in article I, section 8 of the Constitution provide authority for Congress to enact such a mandate. I wholeheartedly disagree with that assessment.

According to the Constitution, the Federal Government only has limited

powers. Although the Supreme Court has upheld some far-reaching regulations of economic activity—most notably in *Wickard v. Filburn* and *Gonzales v. Raich*—neither case supports enacting the independent health insurance mandate based on the commerce clause. In these cases, the court held that Congress was allowed to regulate intrastate economic activity as a means to regulate interstate commerce in fungible goods. The mandate to purchase health insurance, however, is not proposed as a means to regulate interstate commerce, nor does it regulate or prohibit activity in either the health insurance or the health care industry.

The mandate to purchase health insurance does not purport to regulate or prohibit activity of any kind, whether economic or noneconomic. Instead, the individual mandate provision regulates no action. It purports to regulate inactivity by converting the inactivity of not buying insurance into commercial activity. In effect, advocates of the individual mandate contend that under congressional power to “regulate commerce . . . among the several states” Congress may reach the doing of nothing at all.

In recent years, the Supreme Court has invalidated two congressional statutes that attempted to regulate noneconomic activities. To uphold the individual mandate based on the commerce clause, the Supreme Court would have to concede that the commerce clause provides unlimited authority to regulate. This is a position that the Supreme Court has never affirmed and that it rejected in recent cases.

Congress lacks the authority to regulate the individual’s decision not to purchase a service or enter into a contract. Similarly, Congress cannot rely on its power to tax to justify imposing the individual mandate.

In addition to being beyond the scope of Congress’ enumerated powers, this individual mandate also amounts to a taking under the fifth amendment takings clause. I would like to take a moment to read the relevant parts of the fifth amendment. It says in part:

No person shall be . . . deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

Let me repeat the part of the fifth amendment that applies to the issue at hand. It says:

. . . nor shall private property be taken for public use, without just compensation.

The bill before us today would require an American citizen to devote a portion of income—his or her private property—to health insurance coverage. There is an exception, of course, for religious reasons and for financial hardships.

If one of my constituents in Nevada does not want to spend his or her hard-earned income on health insurance coverage and would prefer to spend it on

something else, such as rent or a car payment, this requirement could be a taking of private property under the fifth amendment.

As noted in a recent article coauthored by Dennis Smith and the former Deputy General Counsel of the Department of Health and Human Services, Peter Urbanowicz, requiring a citizen to purchase health insurance “could be considered an arbitrary and capricious ‘taking’ no matter how many hardship exemptions the federal government might dispense.”

Some of my colleagues may also be familiar with David B. Rivkin and Lee A. Casey. They are attorneys, based in Washington, DC, who served in the Department of Justice during the Reagan and Bush administrations. In September, Rivkin and Casey published an op-ed in the *Wall Street Journal* entitled: “Mandatory Insurance is Unconstitutional.” I urge my colleagues to read this article and many others I will be submitting for the *RECORD*.

Mr. President, I ask unanimous consent to have printed in the *RECORD* at the conclusion of my remarks this *Wall Street Journal* by David B. Rivkin, Jr., and Lee A. Casey.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. ENSIGN. In the op-ed, Rivkin and Casey argue that the health insurance mandate:

. . . would expand the federal government’s authority over individual Americans to an unprecedented degree. It is also profoundly unconstitutional.

Continuing the quote:

Making healthy young adults pay billions of dollars in premiums into the national health-care market is the only way to fund universal coverage without raising substantial new taxes.

In effect, this mandate would be one more giant, cross-generational subsidy—imposed on generations who are already stuck with the bill for the federal government’s prior spending sprees.

A “tax” that falls exclusively on anyone who is uninsured is a penalty beyond Congress’s authority. If the rule were otherwise, Congress could evade all constitutional limits by “taxing” anyone who doesn’t follow an order of any kind.

As the fourth Chief Justice of the Supreme Court, John Marshall, stated:

The power to tax involves the power to destroy.

Unfortunately, this could certainly be true in the context of this health bill.

We in Congress must zealously defend our citizens’ rights and prevent this from happening. I believe the legislation before us violates the greatest political document in the history of the world, the Constitution of the United States.

I urge my colleagues to think very carefully about the constitutional issues I have raised. I know most people around here do not like to talk

about whether something is constitutional. We just want to do what feels good because we think we are helping people. But our Founders set forth in the enumerated powers limits on what this body and this Federal Government could do.

As Members of Congress, one of our most important responsibilities is to protect, to defend, and preserve the Constitution of the United States. In that light, it is not only appropriate but essential for this body to question whether it is constitutional for the Federal Government to require Americans to buy health insurance coverage.

We should also question whether it is constitutional for the Federal Government to tell Americans what kind of health insurance coverage they have to purchase. So not only does this bill tell them they have to buy health insurance, it tells Americans what kind of health insurance must be purchased.

Americans also deserve to know how the bill will impact their ability to choose the health insurance coverage that best fits their needs. That is exactly why I will raise this constitutional point of order. Freedom and choice are very precious rights. Let’s not bury our heads in the sand and take away freedom and choice from American citizens. We need to think about this individual mandate very carefully.

I have several articles, and I would like to read a couple of quotes from these articles. The first one is from the *Washington Post*. The article is entitled, “Illegal Health Reform.” It is written by David Rivkin and Lee A. Casey. It says:

The otherwise uninsured would be required to buy coverage, not because they were even tangentially engaged in the “production, distribution or consumption of commodities,” but for no other reason than people without health insurance exist. The federal government does not have the power to regulate Americans simply because they are there. Significantly, in two cases, *United States v. Lopez* (1995) and *United States v. Morrison* (2000), the Supreme Court specifically rejected the proposition that the commerce clause allowed Congress to regulate noneconomic activities merely because, through a chain of causal effects, they might have an economic impact. These decisions reflect judicial recognition that the commerce clause is not infinitely elastic and that, by enumerating its powers, the framers denied Congress the type of general police power that is freely exercised by the states.

Mr. President, to read further from the article in the *Washington Post*:

Like the commerce power, the power to tax is the Federal Government’s vast authority over the public, and it is well settled that Congress can impose a tax for regulatory rather than purely revenue-raising purposes. Yet Congress cannot use its power to tax solely as a means of controlling conduct that it could not otherwise reach through the commerce clause or any other constitutional provision. In the 1922 case *Bailey v. Drexel Furniture*, the Supreme Court ruled that Congress could not impose a “tax” to penalize conduct (the utilization of child labor) it

could not also regulate under the commerce clause. Although the court's interpretation of the commerce power's breadth has changed since that time, it has not repudiated the fundamental principle that Congress cannot use a tax to regulate conduct that is otherwise indisputably beyond its regulatory power.

Of course, these constitutional impediments can be avoided if Congress is willing to raise corporate and/or income taxes enough to fund fully a new national health system. Absent this politically dangerous—and therefore unlikely—scenario, advocates of universal health coverage must accept Congress' power, like that of the other branches, has limits. These limits apply regardless of how important the issue may be, and neither Congress nor the president can take constitutional short cuts. The genius of our system is that, no matter how convinced our elected officials may be that certain measures are in the public interest, their goals can be accomplished only in accord with the powers and processes the Constitution mandates, processes that inevitably make them accountable to the American people.

I want to read from another article that was written by Randy Barnett, Nathaniel Stewart, and Todd Gaziano. This article is entitled, "Why the Personal Mandate to Buy Health Insurance is Unprecedented and Unconstitutional."

Members of Congress have the responsibility, pursuant to their oath, to determine the constitutionality of legislation independently of how the Supreme Court has ruled or may rule in the future. But Senators and Representatives also should know that, despite what they have been told, the health insurance mandate is highly vulnerable to challenge because it is, in truth, unconstitutional. And all other considerations aside, the highest obligation of each Member of Congress is fidelity to the Constitution.

I ask unanimous consent to have printed in the RECORD, following my remarks, the articles I have before me.

THE PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit No. 2.)

Mr. ENSIGN. Continuing to quote, Mr. President, from the Barnett, Stewart, and Gaziano article:

A long line of Supreme Court cases establishes that Congress may regulate three categories of activity pursuant to the commerce power. These categories were first summarized in *Perez v. United States*, and most recently reaffirmed in *Gonzalez v. Raich*. First, Congress may regulate the channels of interstate or foreign commerce such as the regulation of steamship, railroad, highway or aircraft transportation or prevent them from being misused, as, for example, the shipment of stolen goods or of persons who have been kidnapped. Second, the commerce power extends to protecting "the instrumentalities of interstate commerce," as, for example, the destruction of an aircraft, or persons or things in commerce, as, for example, thefts from interstate shipments. Third, Congress may regulate economic activities that "substantially affect interstate commerce."

Under the first prong of its Commerce Clause analysis, the Court asks whether the class of activities regulated by the statute falls within one or more of these categories. Since an individual health insurance man-

date is not even arguably a regulation of a channel or instrumentality of interstate commerce, it must either fit in the third category or none at all. . . . The Senate bill asserts (erroneously) that: "[t]he individual responsibility requirement . . . is commercial and economic in nature, and substantially affects interstate commerce. . . . The requirement regulates activity that is commercial and economic in nature: economic and financial decisions about how and when health care is paid for, and when health insurance is purchased."

That is within the bill.

Continuing to quote:

The second prong of the Court's Commerce Clause analysis requires a determination that a petitioner has in fact engaged in the regulated activity, making him or her a member of the regulated class. In its modern Commerce Clause cases, the Supreme Court rejects the argument that a petitioner's own conduct or participation in the activity is, by itself, either too local or too trivial to have a substantial effect on interstate commerce. Rather, the Court has made clear that, "where the class of activities is regulated and that class is within the reach of federal power, the courts have no powers 'to excise, as trivial, individual instances' of the class." Thus, for example, a potential challenger of the proposed mandate could not argue that because her own decision not to purchase the required insurance would have little or no effect on the broader market, the regulation could not be constitutionally applied to her. The Court will consider the effect of the relevant "class of activity," not that of any individual member of the class.

To assess the constitutionality of a claim of power under the Commerce Clause, the primary question becomes, "what class of activity is Congress seeking to regulate?" Only when this question is answered can the Court assess whether that class of activity substantially affects interstate commerce. Significantly, the mandate imposed by the pending bills does not regulate or prohibit the economic activity of providing or administering health insurance. Nor does it regulate or prohibit the economic activity of providing health care, whether by doctors, hospitals, pharmaceutical companies, or other entities engaged in the business of providing a medical good or service. Indeed, the health care mandate does not purport to regulate or prohibit activity of any kind, whether economic or noneconomic. To the contrary, it purports to "regulate" inactivity.

In other words, not buying health insurance. Continuing once again:

Proponents of the individual mandate are contending that, under its power to "regulate commerce . . . among the several states," Congress may regulate the doing of nothing at all! In other words, the statute purports to convert inactivity into a class of activity. By its own plain terms, the individual mandate provision regulates the absence of action. To uphold this power under its existing doctrine, the Court must conclude that an individual's failure to enter into a contract for health insurance is an activity that is "economic" in nature—that is, it is part of a "class of activity" that "substantially affects interstate commerce."

Never in this Nation's history has the commerce power been used to require a person who does nothing to engage in economic activity.

Let me repeat that. "Never in this Nation's history has the commerce

power been used to require a person who does nothing to engage in economic activity."

Let me close with this because I see the senior Senator from Utah is on the Senate floor, and he has argued eloquently on the unconstitutionality of this particular provision.

Again, I am quoting:

Today, even voting is not constitutionally mandated. But if this precedent is established—

That is the precedent in this bill is established—

Congress would have the unlimited power to regulate, prohibit, or mandate any or all activities in the United States. Such a doctrine would abolish any limit on federal power and alter the fundamental relationship of the national government to the states and the people. For this reason it is highly doubtful that the Supreme Court will uphold this assertion of power.

Mr. President, I reserve the remainder of my time, and I yield to the senior Senator from Utah.

EXHIBIT 1

[From the Wall Street Journal, Sept. 18, 2009]

MANDATORY INSURANCE IS UNCONSTITUTIONAL
(By David B. Rivkin, Jr. and Lee A. Casey)

Federal legislation requiring that every American have health insurance is part of all the major health-care reform plans now being considered in Washington. Such a mandate, however, would expand the federal government's authority over individual Americans to an unprecedented degree. It is also profoundly unconstitutional.

An individual mandate has been a hardy perennial of health-care reform proposals since *HillaryCare* in the early 1990s. President Barack Obama defended its merits before Congress last week, claiming that uninsured people still use medical services and impose the costs on everyone else. But the reality is far different. Certainly some uninsured use emergency rooms in lieu of primary care physicians, but the majority are young people who forgo insurance precisely because they do not expect to need much medical care. When they do, these uninsured pay full freight, often at premium rates, thereby actually subsidizing insured Americans.

The mandate's real justifications are far more cynical and political. Making healthy young adults pay billions of dollars in premiums into the national health-care market is the only way to fund universal coverage without raising substantial new taxes. In effect, this mandate would be one more giant, cross-generational subsidy—imposed on generations who are already stuck with the bill for the federal government's prior spending sprees.

Politically, of course, the mandate is essential to winning insurance industry support for the legislation and acceptance of heavy federal regulations. Millions of new customers will be driven into insurance-company arms. Moreover, without the mandate, the entire thrust of the new regulatory scheme—requiring insurance companies to cover pre-existing conditions and to accept standardized premiums—would produce dysfunctional consequences. It would make little sense for anyone, young or old, to buy insurance before he actually got sick. Such a socialization of costs also happens to be an

essential step toward the single payer, national health system, still stridently supported by large parts of the president's base.

The elephant in the room is the Constitution. As every civics class once taught, the federal government is a government of limited, enumerated powers, with the states retaining broad regulatory authority. As James Madison explained in the *Federalist Papers*: "[I]n the first place it is to be remembered that the general government is not to be charged with the whole power of making and administering laws. Its jurisdiction is limited to certain enumerated objects." Congress, in other words, cannot regulate simply because it sees a problem to be fixed. Federal law must be grounded in one of the specific grants of authority found in the Constitution.

These are mostly found in Article I, Section 8, which among other things gives Congress the power to tax, borrow and spend money, raise and support armies, declare war, establish post offices and regulate commerce. It is the authority to regulate foreign and interstate commerce that—in one way or another—supports most of the elaborate federal regulatory system. If the federal government has any right to reform, revise or remake the American health-care system, it must be found in this all-important provision. This is especially true of any mandate that every American obtain health-care insurance or face a penalty.

The Supreme Court construes the commerce power broadly. In the most recent Commerce Clause case, *Gonzales v. Raich* (2005), the court ruled that Congress can even regulate the cultivation of marijuana for personal use so long as there is a rational basis to believe that such "activities, taken in the aggregate, substantially affect interstate commerce."

But there are important limits. In *United States v. Lopez* (1995), for example, the Court invalidated the Gun Free School Zones Act because that law made it a crime simply to possess a gun near a school. It did not "regulate any economic activity and did not contain any requirement that the possession of a gun have any connection to past interstate activity or a predictable impact on future commercial activity." Of course, a health-care mandate would not regulate any "activity," such as employment or growing pot in the bathroom, at all. Simply being an American would trigger it.

Health-care backers understand this and—like Lewis Carroll's Red Queen insisting that some hills are valleys—have framed the mandate as a "tax" rather than a regulation. Under Sen. Max Baucus's (D., Mont.) most recent plan, people who do not maintain health insurance for themselves and their families would be forced to pay an "excise tax" of up to \$1,500 per year—roughly comparable to the cost of insurance coverage under the new plan.

But Congress cannot so simply avoid the constitutional limits on its power. Taxation can favor one industry or course of action over another, but a "tax" that falls exclusively on anyone who is uninsured is a penalty beyond Congress's authority. If the rule were otherwise, Congress could evade all constitutional limits by "taxing" anyone who doesn't follow an order of any kind—whether to obtain health-care insurance, or to join a health club, or exercise regularly, or even eat your vegetables.

This type of congressional trickery is bad for our democracy and has implications far beyond the health-care debate. The Constitution's Framers divided power between the

federal government and states—just as they did among the three federal branches of government—for a reason. They viewed these structural limitations on governmental power as the most reliable means of protecting individual liberty—more important even than the Bill of Rights.

Yet if that imperative is insufficient to prompt reconsideration of the mandate (and the approach to reform it supports), then the inevitable judicial challenges should. Since the 1930s, the Supreme Court has been reluctant to invalidate "regulatory" taxes. However, a tax that is so clearly a penalty for failing to comply with requirements otherwise beyond Congress's constitutional power will present the question whether there are any limits on Congress's power to regulate individual Americans. The Supreme Court has never accepted such a proposition, and it is unlikely to accept it now, even in an area as important as health care.

EXHIBIT 2

[From the Washington Post, Aug. 22, 2009]

ILLEGAL HEALTH REFORM

(By David B. Rivkin, Jr. and Lee A. Casey)

President Obama has called for a serious and reasoned debate about his plans to overhaul the health-care system. Any such debate must include the question of whether it is constitutional for the federal government to adopt and implement the president's proposals. Consider one element known as the "individual mandate," which would require every American to have health insurance, if not through an employer then by individual purchase. This requirement would particularly affect young adults, who often choose to save the expense and go without coverage. Without the young to subsidize the old, a comprehensive national health system will not work. But can Congress require every American to buy health insurance?

In short, no. The Constitution assigns only limited, enumerated powers to Congress and none, including the power to regulate interstate commerce or to impose taxes, would support a federal mandate requiring anyone who is otherwise without health insurance to buy it.

Although the Supreme Court has interpreted Congress's commerce power expansively, this type of mandate would not pass muster even under the most aggressive commerce clause cases. In *Wickard v. Filburn* (1942), the court upheld a federal law regulating the national wheat markets. The law was drawn so broadly that wheat grown for consumption on individual farms also was regulated. Even though this rule reached purely local (rather than interstate) activity, the court reasoned that the consumption of homegrown wheat by individual farms would, in the aggregate, have a substantial economic effect on interstate commerce, and so was within Congress's reach.

The court reaffirmed this rationale in 2005 in *Gonzales v. Raich*, when it validated Congress's authority to regulate the home cultivation of marijuana for personal use. In doing so, however, the justices emphasized that—as in the wheat case—"the activities regulated by the [Controlled Substances Act] are quintessentially economic." That simply would not be true with regard to an individual health insurance mandate.

The otherwise uninsured would be required to buy coverage, not because they were even tangentially engaged in the "production, distribution or consumption of commodities," but for no other reason than that people without health insurance exist. The federal government does not have the power to regu-

late Americans simply because they are there. Significantly, in two key cases, *United States v. Lopez* (1995) and *United States v. Morrison* (2000), the Supreme Court specifically rejected the proposition that the commerce clause allowed Congress to regulate noneconomic activities merely because, through a chain of causal effects, they might have an economic impact. These decisions reflect judicial recognition that the commerce clause is not infinitely elastic and that, by enumerating its powers, the framers denied Congress the type of general police power that is freely exercised by the states.

This leaves mandate supporters with few palatable options. Congress could attempt to condition some federal benefit on the acquisition of insurance. States, for example, usually condition issuance of a car registration on proof of automobile insurance, or on a sizable payment into an uninsured motorist fund. Even this, however, cannot achieve universal health coverage. No federal program or entitlement applies to the entire population, and it is difficult to conceive of a "benefit" that some part of the population would not choose to eschew.

The other obvious alternative is to use Congress's power to tax and spend. In an effort, perhaps, to anchor this mandate in that power, the Senate version of the individual mandate envisions that failure to comply would be met with a penalty, to be collected by the IRS. This arrangement, however, is not constitutional either.

Like the commerce power, the power to tax gives the federal government vast authority over the public, and it is well settled that Congress can impose a tax for regulatory rather than purely revenue-raising purposes. Yet Congress cannot use its power to tax solely as a means of controlling conduct that it could not otherwise reach through the commerce clause or any other constitutional provision. In the 1922 case *Bailey v. Drexel Furniture*, the Supreme Court ruled that Congress could not impose a "tax" to penalize conduct (the utilization of child labor) it could not also regulate under the commerce clause. Although the court's interpretation of the commerce power's breadth has changed since that time, it has not repudiated the fundamental principle that Congress cannot use a tax to regulate conduct that is otherwise indisputably beyond its regulatory power.

Of course, these constitutional impediments can be avoided if Congress is willing to raise corporate and/or income taxes enough to fund fully a new national health system. Absent this politically dangerous—and therefore unlikely—scenario, advocates of universal health coverage must accept that Congress's power, like that of the other branches, has limits. These limits apply regardless of how important the issue may be, and neither Congress nor the president can take constitutional short cuts. The genius of our system is that, no matter how convinced our elected officials may be that certain measures are in the public interest, their goals can be accomplished only in accord with the powers and processes the Constitution mandates, processes that inevitably make them accountable to the American people.

EXECUTIVE SUMMARY: WHY THE PERSONAL MANDATE TO BUY HEALTH INSURANCE IS UNPRECEDENTED AND UNCONSTITUTIONAL

(By Randy Barnett, Nathaniel Stewart, and Todd F. Gaziano)

As the Congressional Budget Office explained: "A mandate requiring all individuals to purchase health insurance would be

an unprecedented form of federal action. The government has never required people to buy any good or service as a condition of lawful residence in the United States." Yet, all of the House and Senate health-care bills being debated require Americans to either obtain or purchase expensive health insurance, estimated to cost up to \$15,000 per year for a typical family, or pay substantial tax penalties for not doing so.

The purpose of this compulsory contract, coupled with the arbitrary price ratios and controls, is to require some people to buy artificially high-priced policies as a way of subsidizing coverage for others and an industry saddled with the costs of other government regulations. Rather than appropriate funds for higher federal health-care spending, the sponsors of the current bills are attempting, through the personal mandate, to keep the forced wealth transfers entirely off budget.

This takes congressional power and control to a strikingly new level. An individual mandate to enter into a contract with or buy a particular product from a private party is literally unprecedented, not just in scope but in kind, and unconstitutional either as a matter of first principles or under any reasonable reading of judicial precedents.

THE COMMERCE CLAUSE

Advocates of the individual mandate have claimed that the Supreme Court's Commerce Clause jurisprudence leaves "no doubt" that the insurance requirement is a constitutional exercise of that power. They are wrong.

Although the Supreme Court has upheld some far-reaching regulations of economic activity, most notably in *Wickard v. Filburn* and *Gonzales v. Raich*, neither case supports the individual health insurance mandate. In these cases, the Court held that Congress's power to regulate the interstate commerce in a fungible good—for example, wheat or marijuana—as part of a comprehensive regulatory scheme included the power to regulate or prohibit the intrastate possession and production of this good. In both cases, Congress was allowed to reach intrastate economic activity as a means to the regulation of interstate commerce in goods.

Yet, the mandate to purchase health insurance is not proposed as a means to the regulation of interstate commerce; nor does it regulate or prohibit activity in either the health insurance or health care industry. Indeed, the health care mandate does not purport to regulate or prohibit activity of any kind, whether economic or noneconomic. By its own plain terms, the individual mandate provision regulates no action. To the contrary, it purports to "regulate" inactivity by converting the inactivity of not buying insurance into commercial activity. Proponents of the individual mandate are contending that, under its power to "regulate commerce . . . among the several states," Congress may reach the doing of nothing at all!

In recent years, the Court invalidated two congressional statutes that attempted to regulate non-economic activities. In *United States v. Lopez* (1995), it struck down the Gun-Free School Zones Act, which attempted to reach the activity of possessing a gun within a thousand feet of a school. In *United States v. Morrison* (2000), it invalidated part of the Violence Against Women Act, which regulated gender-motivated violence. Because the Court found the regulated activity in each case to be noneconomic, it was outside the reach of Congress's Commerce power, regardless of its effect on interstate commerce.

To uphold the insurance purchase mandate, the Supreme Court would have to concede that the Commerce Clause has no limits, a proposition that it has never affirmed, that it rejected in *Lopez* and *Morrison*, and from which it did not retreat in *Raich*. Although Congress may possibly regulate the operations of health care or health insurance companies directly, given that they are economic activities with a substantial effect on interstate commerce, it may not regulate the individual's decision not to purchase a service or enter into a contract.

If Congress can mandate this, then it can mandate anything. Congress could require every American to buy a new Chevy Impala every year, or a pay a "tax" equivalent to its blue book value, because such purchases would stimulate commerce and help repay government loans. Congress could also require all Americans to buy a certain amount of wheat bread annually to subsidize farmers.

Even during wartime, when war production is vital to national survival, Congress has never claimed such a power, nor could it. No farmer was ever forced to grow food for the troops; no worker was forced to build tanks. And what Congress cannot do during wartime, with national survival at stake, it cannot do in peacetime simply to avoid the political cost of raising taxes to pay for desired government programs.

OTHER CONSTITUTIONAL PROBLEMS

Senators and Representatives should also know that:

There are four constitutionally relevant differences between a universal federal mandate to obtain health insurance and the state requirements that automobile drivers carry liability insurance for their injuries to others on public roads:

A review of the tax provisions in the House and Senate bills raises serious questions about the constitutionality of using the taxing power in this manner; and

Since there literally is no legal precedent for this decidedly unprecedented assertion of federal power, it is highly unlikely that the Supreme Court would break new constitutional ground to save an unpopular personal mandate.

Members of Congress have a responsibility, pursuant to their oath, to determine the constitutionality of legislation independently of how the Supreme Court has ruled or may rule in the future. But Senators and Representatives also should know that, despite what they have been told, the health insurance mandate is highly vulnerable to challenge because it is, in truth, unconstitutional. And all other considerations aside, the highest obligation of each Member of Congress is fidelity to the Constitution.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. HATCH. Mr. President, I rise to support the constitutional point of order raised against the legislation before us by the distinguished Senator from Nevada. I applaud the senior Senator from Nevada for taking this step so that all Senators can take a position on whether this legislation is constitutional, or whether this legislation is consistent with the Constitution each of us is sworn to protect and defend.

The Senator from Nevada serves with me on the Senate Finance Committee, and he will remember that I started raising constitutional questions and objections against this legislation

more than 3 months ago during the committee markup, and so has he.

This body has spent its time debating the policy of this legislation. This is a terrible piece of legislation that will raise insurance premiums, raise taxes, and limit access to care.

Mr. President, I ask unanimous consent that an editorial from yesterday's Wall Street Journal, titled "Change Nobody Believes In," be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

Mr. HATCH. From the standpoint of policy, Mr. President, we should not pass this bill. Perhaps more importantly, from the standpoint of the Constitution, we may not pass it.

Much has changed since the founding of this great country, but one thing has not: The liberty we love requires limits on government. It requires limits on government. It always has and it always will. America's founders knew that and built limits into the system of government they established. Those limits come primarily from a written Constitution that delegates enumerated powers to the Federal Government. We must point to at least one—at least one—of those powers as the basis for any legislation we pass.

The Constitution and the limits it imposes do not mean whatever we want them to mean.

This legislation brings America into completely uncharted political and legal waters and I will not be at all surprised if there is litigation challenging it on constitutional and other grounds. In the Finance Committee, I offered an amendment to add a procedure for the courts to handle constitutional challenges in an expedited fashion. The Finance Committee chairman ruled that amendment out of order so that it could not even be considered. That was his decision, but that means that any future challenges will be handled the old fashioned way, even if that means an extended, rather than an expedited, process.

I ask unanimous consent that a memo prepared by the Conservative Action Project be printed in the RECORD following my remarks. Its signatories include former U.S. Attorney General Edwin Meese; former Congressman David McIntosh; Karen Kerrigan, President of the Small Business and Entrepreneurship Council; and Brian McManus of the Council for Affordable Health Insurance.

The PRESIDING OFFICER. Without objection it is so ordered. (See exhibit 2.)

Mr. HATCH. Let me briefly repeat the constitution objections I have been raising for the past few months and which the Senator from Nevada carefully raised this morning. First, the only enumerated power that conceivably can support the mandate for individuals to purchase health insurance is

the power to regulate interstate commerce. Since the 1930s, the Supreme Court has expanded this to include regulation of activities that substantially affect interstate commerce. But the key word is activities. Congress has never crossed the line between regulating what people choose to do and ordering them to do it. The difference between regulating and requiring is liberty. I agree with the 75 percent of Americans who believe that the insurance mandate is unconstitutional because Congress's power to regulate interstate commerce does not include telling Americans what they must buy.

Second, the financial penalty enforcing the insurance mandate is just that, a penalty. It is not a tax and, therefore, it is constitutional only if the insurance mandate it enforces is constitutional. If it is a tax, it is a direct tax on individuals rather than an excise tax on transactions and, therefore, it violates article I, section 9, of the Constitution which requires that direct taxes be apportioned according to population.

Third, the excise tax on high-cost insurance plans, which applies differently in some states than in others, is unconstitutional because it is not uniform throughout the United States as required by article I, section 8. The Supreme Court has said that to be uniform as the Constitution requires, an excise tax must have the same force and effect wherever the subject of the tax is found. Not only is this not the case with this tax, which makes it plainly unconstitutional, but that is exactly the design and intention of those who drafted this legislation.

Fourth, the legislation orders states to establish health benefit exchanges which will require states to pass legislation and regulations. If they do not, or even if the Secretary of Health and Human Services believes they will not by a certain date, the Secretary will literally step into each state and establish and operate this exchange for them. This is a direct violation of the division between federal and state government power. The Supreme Court could not have been clearer on this point, ruling over and over that Congress may regulate individuals but may not regulate states. Congress has no authority to order states, in their capacity as states to pass legislation. We have encouraged states to pass legislation, we have bribed them, we have even extorted them by threatening to withhold federal funds. But this legislation simply commandeers states and makes them little more than subdivisions of the federal government. In 1997, the Supreme Court held "state legislatures are not subject to Federal direction" and reaffirmed "categorically" its earlier holding that "the federal government may not compel the states to enact or administer a federal regulatory program." That should be

clear enough for Senators to understand here in this body.

I was amazed to learn that when President Franklin D. Roosevelt chose Frances Perkins as his Secretary of Labor, they discussed social policy legislation including health insurance. As Secretary Perkins later described it, they agreed that such legislation would pose "very severe constitutional problems," including fundamentally altering federal-state relationships. That is why the Social Security Act relies on the payroll tax. Even the Roosevelt administration, which oversaw the most dramatic expansion of Federal power in our Nation's history, would not go as far as the legislation before us today would go.

Should this legislation become law, there would be nothing that the federal government could not do. Congress would be remaking the Constitution in its image, rather than abiding by the Constitution's limits as liberty requires. There must come a time when we say that the political ends cannot justify the constitutional means, that the Constitution and the liberty it protects are more important than we wonderful Members of Congress are. That time is now, and that is why we will vote to sustain this constitutional point of order.

I wish to personally thank and congratulate the distinguished Senator from Nevada for his work on this issue, for his work on the committee, because he was one of the more energetic and more capable people on the committee in raising some of these very important issues such as this constitutional set of issues we have been discussing over this short period of time today. I am grateful for him, I am grateful he has raised it, and I am grateful to be able to be here on the floor to support him in his raising of this constitutional point of order when he chooses to do so.

I yield the floor.

EXHIBIT 1

[From the Wall Street Journal, Dec. 21, 2009]

CHANGE NOBODY BELIEVES IN

And tidings of comfort and joy from Harry Reid too. The Senate Majority Leader has decided that the last few days before Christmas are the opportune moment for a narrow majority of Democrats to stuff ObamaCare through the Senate to meet an arbitrary White House deadline. Barring some extraordinary reversal, it now seems as if they have the 60 votes they need to jump off this cliff, with one-seventh of the economy in tow.

Mr. Obama promised a new era of transparent good government, yet on Saturday morning Mr. Reid threw out the 2,100-page bill that the world's greatest deliberative body spent just 17 days debating and replaced it with a new "manager's amendment" that was stapled together in covert partisan negotiations. Democrats are barely even bothering to pretend to care what's in it, not that any Senator had the chance to digest it in the 38 hours before the first cloture vote at 1 a. m. this morning. After procedural motions that allow for no amend-

ments, the final vote could come at 9 p.m. on December 24.

Even in World War I there was a Christmas truce.

The rushed, secretive way that a bill this destructive and unpopular is being forced on the country shows that "reform" has devolved into the raw exercise of political power for the single purpose of permanently expanding the American entitlement state. An increasing roll of leaders in health care and business are looking on aghast at a bill that is so large and convoluted that no one can truly understand it, as Finance Chairman Max Baucus admitted on the floor last week. The only goal is to ram it into law while the political window is still open, and clean up the mess later.

Health costs. From the outset, the White House's core claim was that reform would reduce health costs for individuals and businesses, and they're sticking to that story. "Anyone who says otherwise simply hasn't read the bills," Mr. Obama said over the weekend. This is so utterly disingenuous that we doubt the President really believes it.

The best and most rigorous cost analysis was recently released by the insurer WellPoint, which mined its actuarial data in various regional markets to model the Senate bill. WellPoint found that a healthy 25-year-old in Milwaukee buying coverage on the individual market will see his costs rise by 178%. A small business based in Richmond with eight employees in average health will see a 23% increase. Insurance costs for a 40-year-old family, with two kids living in Indianapolis will pay 106% more. And on and on.

These increases are solely the result of ObamaCare—above and far beyond the status quo—because its strict restrictions on underwriting and risk-pooling would distort insurance markets. All but a handful of states have rejected regulations like "community rating" because they encourage younger and healthier buyers to wait until they need expensive care, increasing costs for everyone. Benefits and pricing will now be determined by politics.

As for the White House's line about cutting costs by eliminating supposed "waste," even Victor Fuchs, an eminent economist generally supportive of ObamaCare, warned last week that these political theories are overly simplistic. "The oft-heard promise 'we will find out what works and what does not' scarcely does justice to the complexity of medical practice," the Stanford professor wrote.

Steep declines in choice and quality. This is all of a piece with the hubris of an Administration that thinks it can substitute government planning for market forces in determining where the \$33 trillion the U.S. will spend on medicine over the next decade should go.

This centralized system means above all fewer choices; what works for the political class must work for everyone. With formerly private insurers converted into public utilities, for instance, they'll inevitably be banned from selling products like health savings accounts that encourage more cost-conscious decisions.

Unnoticed by the press corps, the Congressional Budget Office argued recently that the Senate bill would so "substantially reduce flexibility in terms of the types, prices, and number of private sellers of health insurance" that companies like WellPoint might need to "be considered part of the federal budget."

With so large a chunk of the economy and medical practice itself in Washington's

hands, quality will decline. Ultimately, “our capacity to innovate and develop new therapies would suffer most of all,” as Harvard Medical School Dean Jeffrey Flier recently wrote in our pages. Take the \$2 billion annual tax—rising to \$3 billion in 2018—that will be leveled against medical device makers, among the most innovative U.S. industries. Democrats believe that more advanced health technologies like MRI machines and drug-coated stents are driving costs too high, though patients and their physicians might disagree.

“The Senate isn’t hearing those of us who are closest to the patient and work in the system every day,” Brent Eastman, the chairman of the American College of Surgeons, said in a statement for his organization and 18 other specialty societies opposing ObamaCare. For no other reason than ideological animus, doctor-owned hospitals will face harsh new limits on their growth and who they’re allowed to treat. Physician Hospitals of America says that ObamaCare will “destroy over 200 of America’s best and safest hospitals.”

Blowing up the federal fisc. Even though Medicare’s unfunded liabilities are already about 2.6 times larger than the entire U.S. economy in 2008, Democrats are crowing that ObamaCare will cost “only” \$871 billion over the next decade while fantastically reducing the deficit by \$132 billion, according to CBO.

Yet some 98% of the total cost comes after 2014—remind us why there must absolutely be a vote this week—and most of the taxes start in 2010. That includes the payroll tax increase for individuals earning more than \$200,000 that rose to 0.9 from 0.5 percentage points in Mr. Reid’s final machinations. Job creation, here we come.

Other deceptions include a new entitlement for long-term care that starts collecting premiums tomorrow but doesn’t start paying benefits until late in the decade. But the worst is not accounting for a formula that automatically slashes Medicare payments to doctors by 21.5% next year and deeper after that. Everyone knows the payment cuts won’t happen but they remain in the bill to make the cost look lower. The American Medical Association’s priority was eliminating this “sustainable growth rate” but all they got in return for their year of ObamaCare cheerleading was a two-month patch snuck into the defense bill that passed over the weekend.

The truth is that no one really knows how much ObamaCare will cost because its assumptions on paper are so unrealistic. To hide the cost increases created by other parts of the bill and transfer them onto the federal balance sheet, the Senate sets up government-run “exchanges” that will subsidize insurance for those earning up to 400% of the poverty level, or \$96,000 for a family of four in 2016. Supposedly they would only be offered to those whose employers don’t provide insurance or work for small businesses.

As Eugene Steuerle of the left-leaning Urban Institute points out, this system would treat two workers with the same total compensation—whatever the mix of cash wages and benefits—very differently. Under the Senate bill, someone who earned \$42,000 would get \$5,749 from the current tax exclusion for employer-sponsored coverage but \$12,750 in the exchange. A worker making \$60,000 would get \$8,310 in the exchanges but only \$3,758 in the current system.

For this reason Mr. Steuerle concludes that the Senate bill is not just a new health system but also “a new welfare and tax system” that will warp the labor market. Given

the incentives of these two-tier subsidies, employers with large numbers of lower-wage workers like Wal-Mart may well convert them into “contractors” or do more outsourcing. As more and more people flood into “free” health care, taxpayer costs will explode.

Political intimidation. The experts who have pointed out such complications have been ignored or dismissed as “ideologues” by the White House. Those parts of the health-care industry that couldn’t be bribed outright, like Big Pharma, were coerced into acceding to this agenda. The White House was able to, er, persuade the likes of the AMA and the hospital lobbies because the Federal government will control 55% of total U.S. health spending under ObamaCare, according to the Administration’s own Medicare actuaries.

Others got hush money, namely Nebraska’s Ben Nelson. Even liberal Governors have been howling for months about ObamaCare’s unfunded spending mandates: Other budget priorities like education will be crowded out when about 21% of the U.S. population is on Medicaid, the joint state-federal program intended for the poor. Nebraska Governor Dave Heineman calculates that ObamaCare will result in \$2.5 billion in new costs for his state that “will be passed on to citizens through direct or indirect taxes and fees,” as he put it in a letter to his state’s junior Senator.

So in addition to abortion restrictions, Mr. Nelson won the concession that Congress will pay for 100% of Nebraska Medicaid expansions into perpetuity. His capitulation ought to cost him his political career, but more to the point, what about the other states that don’t have a Senator who’s the 60th vote for ObamaCare?

“After a nearly century-long struggle we are on the cusp of making health-care reform a reality in the United States of America,” Mr. Obama said on Saturday. He’s forced to claim the mandate of “history” because he can’t claim the mandate of voters. Some 51% of the public is now opposed, according to National Journal’s composite of all health polling. The more people know about ObamaCare, the more unpopular it becomes.

The tragedy is that Mr. Obama inherited a consensus that the health-care status quo needs serious reform, and a popular President might have crafted a durable compromise that blended the best ideas from both parties. A more honest and more thoughtful approach might have even done some good. But as Mr. Obama suggested, the Democratic old guard sees this plan as the culmination of 20th-century liberalism.

So instead we have this vast expansion of federal control. Never in our memory has so unpopular a bill been on the verge of passing Congress, never has social and economic legislation of this magnitude been forced through on a purely partisan vote, and never has a party exhibited more sheer political willfulness that is reckless even for Washington or had more warning about the consequences of its actions.

These 60 Democrats are creating a future of epic increases in spending, taxes and command-and-control regulation, in which bureaucracy trumps innovation and transfer payments are more important than private investment and individual decisions. In short, the Obama Democrats have chosen change nobody believes in—outside of themselves—and when it passes America will be paying for it for decades to come.

EXHIBIT 2

CONSERVATIVE ACTION PROJECT

The Conservative Action Project, chaired by former Attorney General Edwin Meese, is

designed to facilitate conservative leaders working together on behalf of common goals. Participation is extended to leaders of groups representing all major elements of the conservative movement—economic, social and national security.

Edwin Meese, former Attorney General; Steven G. Calabresi, Professor, Northwestern Law School; Mathew D. Staver, Founder & Chairman, Liberty Counsel; Curt Levey, Executive Director, Committee for Justice; Marion Edwyn Harrison, Past President, Free Congress Foundation; Kenneth Klukowski, Senior Legal Analyst, American Civil Rights Union; Wendy Wright, President, Concerned Women for America; J. Kenneth Blackwell, Visiting Professor, Liberty School of Law; Grover Norquist, President, Americans for Tax Reform; William Wilson, President, Americans for Limited Government; Matt Kibbe, President, Freedom Works; Jim Martin, President, 60 Plus Association; David McIntosh, former Member of Congress, Indiana; Colin A. Hanna, President, Let Freedom Ring; Tony Perkins, President, Family Research Council; Brent Bozell, President, Media Research Center; Brian McManus, Council for Affordable Health Insurance; Karen Kerrigan, President, Small Business & Entrepreneurship Council; T. Kenneth Cribb, former Counselor to the U.S. Attorney General; Richard Viguerie, Chairman, ConservativeHQ.com; Alfred Regnery, Publisher, American Spectator.

MEMO FOR THE MOVEMENT

The Individual Mandate in “Obamacare” is Unconstitutional

Re: The mandate under the Obama-Pelosi-Reid healthcare legislation requiring American citizens to purchase health insurance violates the U.S. Constitution.

Action: We urge you to make this point to members of the U.S. Senate—and if a bill passes the Senate to impress upon members of both chambers of Congress—that the key provision in the healthcare legislation violates the U.S. Constitution.

Issue: Mandating that individuals must obtain health insurance, and imposing any penalty—civil or criminal—on any private citizen for not purchasing health insurance is not authorized by any provision of the U.S. Constitution. As such, it is unconstitutional, and should not survive a court challenge on that issue. Supporters of the legislation have incorrectly contended that the legal justification for the mandate is authorized by the Commerce Clause, the General Welfare Clause, or the Taxing and Spending Clause. Given that this mandate provision is essential to Obamacare; its unconstitutionality renders the entire program untenable.

The individual mandate is unconstitutional unless there is a specific constitutional provision that authorizes it. The federal government is a government of limited jurisdiction. It has only enumerated powers. Therefore unless a specific provision of the Constitution empowers a particular law, then that law is unconstitutional. There is no such authorization for the mandate.

The individual mandate is not authorized by the Commerce Clause. Most of those advocating the Democrats’ bill say that Congress can pass this legislation pursuant to its power to regulate interstate commerce. That argument is incorrect, because there is no interstate commerce when private citizens do not purchase health insurance.

The Commerce Clause only covers matters where citizens engage in economic activity. The last time the Supreme Court struck down a law for violating the Commerce

Clause, in *United States v. Morrison* (2000), the Court did so on the grounds that the activity in question was not an economic activity.

The Commerce Clause only extends to persons or organizations voluntarily engaging in commercial activity. Government can only regulate economic action; it cannot coerce action on the part of private citizens who do not wish to participate in commerce. In the most expansive case for Congress' power to regulate interstate commerce, *Wickard v. Filburn* (1942), the Court upheld the agricultural regulation in question against a wheat farmer who earned his entire living from growing and selling wheat, making him a willing participant in interstate commerce.

The Commerce Clause requires an actual economic effect, not merely a congressional finding of an economic effect. When the Court struck down the Violence Against Women Act in *United States v. Morrison* (2000), the Court noted that although the statute made numerous findings regarding the link between such violence and interstate commerce, it held that those findings did not actually establish an economic effect. Therefore the various interstate-commerce findings in the Senate version of the "Obamacare" legislation do not make the bill constitutional.

The individual mandate is not authorized under the General Welfare Clause. The Supreme Court made clear in *United States v. Butler* (1936) and *Helvering v. Davis* (1937) that the General Welfare Clause only applies to congressional spending. It applies to money going out from the government; it does not confer or concern any government power to take in money, such as would happen with the individual mandate. Therefore the mandate is outside the scope of the General Welfare Clause.

The individual mandate is not authorized under the Taxing and Spending Clause or Income Tax. The Constitution only allows certain types of taxation from the federal government.

The Article I Taxing and Spending Clause permits duties, imposts, excises and capitation taxes—duties, imposts and excises are taxes on purchases. A capitation tax is a tax that every person must pay, and the Constitution's apportionment rule requires that every person in each state must pay exactly the same amount. The Obamacare mandate is imposed on people who are making no purchase, and is a tax that some people in a state would pay, but others do not.

The Sixteenth Amendment allows an income tax. An income tax is imposed only on earnings, but people would have to pay this tax even if they had no income.

Therefore it cannot be any of these constitutionally-permitted taxes.

The individual mandate is unconstitutional regardless of whether there are criminal penalties involved. There is no distinction between criminal and civil penalties for determining the constitutionality of legislation, and the penalty imposed in *Wickard v. Filburn* (1942) was not a criminal penalty. Therefore even if the criminal sanctions were removed from the legislation, the imposition of any penalty or consequence for not purchasing insurance renders the mandate unconstitutional.

The individual mandate cannot be properly compared to requiring auto insurance. President Obama said in a Nov. 9 interview on ABC television that requiring people to buy health insurance and penalizing those that do not buy is acceptable because people are

required to buy car insurance. That statement is untrue.

Only state governments can require people to get car insurance. While the federal government is limited to the powers enumerated in the Constitution, the states have a general police power. The police power enables state governments to pass laws for public safety and public health. The federal government has no general police power, and therefore could not require car insurance.

States do not require people to purchase car insurance. Driving a car is a privilege, not a right. States require people to get insurance only as a condition for those people who voluntarily choose to drive on the public roads. If a person chooses to use public transportation, or use a bicycle instead of a car, or operate a car only on their own property, they are not required to have car insurance, and cannot be penalized for lacking insurance.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

Mr. ENSIGN. Mr. President, I know we are waiting for the chairman of the Finance Committee to come. I ask unanimous consent to speak in the meantime, in these few seconds.

I thank the senior Senator from Utah. He is one of the best constitutional scholars we have here in the Senate. I appreciate his words and analysis on why this bill is unconstitutional. I think his words this morning were eloquent. I appreciate his support as I raise this constitutional point of order.

I yield to the Senator from Montana, the chairman of the Finance Committee.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I have a unanimous consent request that I understand has been cleared by both sides.

I ask unanimous consent that after Senator ENSIGN raises the point of order that the Reid substitute amendment No. 2786 is in violation of the Constitution, the point of order be set aside to recur on Wednesday, December

23, at a time to be determined by the majority and Republican leaders.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Nevada is recognized.

Mr. ENSIGN. Mr. President, I rise to make a constitutional point of order against this bill on the grounds that it violates Congress' enumerated powers in article I, section 8 and that it violates the fifth amendment of the Constitution. I ask for the yeas and nays.

The PRESIDING OFFICER. Pursuant to the unanimous consent, the point of order shall be set aside until a time tomorrow to be determined by the majority leader and the minority leader.

Is there a sufficient second? There appears to be a sufficient second. The yeas and nays are ordered on the point of order.

Mr. ENSIGN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SESSIONS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SESSIONS. Mr. President, I would like to share some thoughts on a central issue to this health care reform legislation. It is something that has gotten away from us. I do not believe we fully comprehended it. It is a critical issue.

It seems to me we are double-counting the money. We are counting money twice—maybe the largest amount of money ever having been counted twice in the history of the world. It is very dangerous with regard to the financial viability of the legislation we are looking at today.

It was promised by the President that this legislation would not add one dime to the national debt. He said yesterday that this legislation would strengthen Medicare. This is his quote: . . . and Medicare will be stronger and its solvency extended by nearly a decade.

I don't think that is accurate. We have had other Members of the Democratic leadership say that.

What we know is we have, I think it is about \$460 billion in tax increases and \$490 billion in tax increases and a little less than that, \$400-and-some-odd billion in savings to Medicare, and that accounts for the \$871 billion the bill is supposed to cost in the first 10 years. Of course, that is not an accurate ultimate cost since most of the benefits in the bill do not start until the fifth year. So when you go the first full 10 years of the bill, it costs \$2.5 trillion. But, regardless, let's take this first 10 years. The assertion is that Medicare can be improved and that we can take money from it and that this is going to

make Medicare stronger and that somehow this is going to extend the solvency of Medicare, which is going insolvent by 2017. That is because more and more people are retiring and people are living longer, among other reasons. So the cost of Medicare goes up.

I guess what I am framing now is what I believe to be a matter of the greatest importance. The argument is that somehow, by cutting benefits in Medicare by almost $\frac{3}{2}$ trillion, we are somehow strengthening Medicare. That would be true if the money that was taken out of Medicare Programs and benefits and providers who are providing the benefits—if that money were maintained in Medicare.

They go to the CMS, the institution that keeps up with Medicare costs, the Center for Medicare and Medicaid Services, the Chief Actuary there, Mr. Richard Foster, and they ask him: Won't these reductions in Medicare expenses extend the life of Medicare? And he said yes. OK. He said yes. He writes this:

We estimate that the aggregate net savings to the Part A trust fund under the PPACA—

That is the health care reform bill—would postpone the exhaustion of the trust fund assets by 9 years—that is from 2017 under current law to 2026 under the proposed legislation.

Great. That is not a bad result. But then he goes on. I think he was simply asked: If you reduce spending in Medicare by effecting these cuts and reductions in Medicare, will it extend the life? And he said it would. However, I think he felt he might have been used, and so he didn't leave it right there. I think he believed there was something else afoot in this deal. He goes on to say this:

In practice, the improved Part A financing—

That is what he is talking about, these cuts—

... the improved Part A financing cannot be simultaneously used to finance other Federal outlays (such as the coverage expansions under the PPACA)—

The health care bill—

and to extend the trust fund, despite the appearance of this result from the respective accounting conventions.

Maybe I am wrong about this. I am happy to have a lot of people look at it. Wait a minute, we have the President of the United States yesterday saying that Medicare will be stronger and its solvency extended for nearly a decade. We have Senator DURBIN and I think Senator BAUCUS and others saying the same thing. We are talking about \$400 billion.

So I would think this Congress can get a straight answer somewhere. Don't you? Well, I have been asking staff, and they say it is double counting.

I said: What do you mean it is double counting?

Well, Senator GREGG, the ranking Republican on the Budget Committee—former chairman of the Budget Committee—said it is double accounting. He offered an amendment, a simple amendment that said any money that is saved in Medicare stays in Medicare. Did that pass? No. They voted that down. That should be a signal, I submit. That should be a red flag.

So now I am looking at this really, really hard because the way I see the financial accounting of the bill, perhaps the largest bogus part of it is to say that the money that is being saved from Medicare is going to create this new program and, at the same time, saying the savings in Medicare are going to be used to extend the life of Medicare. You cannot do both.

That is what Mr. FOSTER said in his letter of December 10:

In practice, the improved Part A financing—

He is talking about the improved Part A financing of Medicare by these cuts—

the improved Part A financing cannot be simultaneously used to finance other Federal outlays (such as the coverage expansions under the PPACA) and to extend the trust fund. . . .

All right. You got it? Let's go back and leave out the parentheses:

... the improved Part A financing cannot be simultaneously used to finance other Federal outlays . . . and to extend the trust fund, despite the appearance of this result from the respective accounting conventions.

So they got CBO to score it as if the money is going into the new health care reform, and they got CMS to score it as if it is saving Medicare.

Now, I was a Federal prosecutor for a long time. I know the responsibilities placed on presidents of corporations. If the president of a corporation were to issue a prospectus and ask people to invest money in his company and support his program, his agenda, and he said: I have \$400 billion or \$400,000 I am going to spend in it, and he knew the money was being spent on something else and he did not really have that money, that is a criminal offense, and people would go to jail for it.

I am worried about it; I really am. This is unbelievable. So we are going to get to the bottom of this. If I am wrong, I would like to see where the money is coming from. So my question to my colleagues is—and apparently this has been asked by staff for weeks and they have never gotten a straight answer—where do you get this \$871 billion? How much of that are you counting coming from savings in Medicare; and where, precisely, are you getting it from Medicare? If you are going to spend it on the new program, how are you going to say it is going to strengthen Medicare as to its insolvency problem?

You cannot count the money twice, and I believe that is what Mr. FOSTER

was suggesting; that you cannot simultaneously count the money "despite the appearance of this result from the respective accounting conventions." What he is saying is, CBO is following proper accounting conventions for their scoring and CMS is doing it their way and it gives the appearance that you have some money that can be spent twice. But he said you cannot simultaneously use the same money. Now, isn't that true? But in this body, I do not know.

What is another fundamental matter of budgetary importance that goes with it? The President has repeatedly said that not one dime will be added to the national debt, and it should not be. We cannot continue to do that. So when this legislation started, the idea was we needed to reform a lot of problems in our health care situation.

One of the problems everybody recognized was that the doctors are not getting paid in a proper fashion for the work they do. Under the Balanced Budget Act of 1997, we effected rules on how much doctors should be paid, and if those rules went into effect today, doctors would have a 21-percent pay cut on all Medicare work. Already Medicare physicians are leaving the practice because they get paid much less from the Federal Medicare Program than they do from private health insurance. So they would rather do private work than Medicare. But they do Medicare—most doctors do—but if you took them another 21 percent down, they would not.

Every year, they come here and ask the Congress to waive this cut, and Congress—as part of the duplicity of this body that has gone on under both parties, but each year it gets worse and worse—we fix it, and we do not execute the cut. But we only do it for 1 year. So when we have a budget, it assumes a 10-year budget. As President Obama submitted it to us, it assumes in the first year you pay the physicians and you do not cut their pay. Then for 9 years you assume they get a 21-percent reduction. It is a gimmick because you cannot cut the physicians 21 percent; and we know that. If we budgeted for the full amount, we are going to have to pay physicians, and we are going to pay physicians, then there would be a big hole because we do not have the money and we either have to cut something else, raise taxes, or raise the debt. What we have been doing is paying for it with more debt.

Well, each year, the doctors get all upset because they are staring at a 21-percent pay cut. All their representatives in the AMA and everybody come up every year and tell us: Don't cut our pay, and we do not—1 year at a time.

This is a misrepresentation. It hides the financial precariousness of our position. It is not good. It should never continue. It needs to be permanently fixed, and that was supposed to be part

of health care reform from the beginning. The President said that is what he was going to do. The leadership on the other side said that is what they were going to do.

But what happened—when they met in their secret rooms, and they all wheeled and dealt and tried to add up these numbers and see how they could manipulate numbers and scores and accounting to make it add up so they could say it would not add one penny to the debt—they could not get around the \$250 billion it takes to pay the doctors. They could not do it.

They say, under this bill, there is a \$130 billion surplus over the first 10 years. But it does not fix the doctor payments for Medicare in health care work, Medicaid. It does not fix it. So when you fix it, it costs \$250 billion. There is no dispute about that. We have analyzed that. The accounting numbers are clear: \$250 billion.

So what the Democrats tried to do—it was a clever—Senator ENSIGN referred to it the other day as a shell game. They moved the doctor fix out of the health care reform—just took it out—and so, therefore, you do not have the \$250 billion hole and you just put it over here. They thought they would be clever, they would just pass it, and we would add it all to the debt. They tried to do so, so they could tell the doctors they tried to vote to have a permanent fix of their payments. “Doctors, we are going to take care of it. We’ll just pass it, and every penny of this will add to the debt.”

Well, 13 Democrats would not swallow that, and I think every Republican opposed it, and it went down. So now I think we have a 2-month fix. Two months is where we are working from today, so we would not have a slashing of payments to physicians by failure to fix it.

So they just took it out, and I assume we are going to have some other gimmick to hide that \$250 billion. So if you put the \$250 billion cost into health care reform, you end up with a \$120 billion deficit right off the bat. Then, when you get into this double accounting of \$450 billion, you have really got a mess. They are estimating \$871 billion in income for the first 10 years of this plan. As I analyze it, you have a \$250 billion hole from not paying the doctors, and then you have a \$400-plus billion double accounting—the savings from Medicare.

So it is just not good. I am telling you, we only have one President. He has a lot of things on his mind, and it is very frustrating. But I will say one more thing he said at that press conference. He said, and he has repeatedly stated: It is going to reduce health care premiums for your insurance. Right? This was yesterday, after this bill passed. He says he is tired of people carping about the cost of the bill. Remember him saying that—tired of

these carpers? I guess he is talking about me because I have been carping about the cost of it for some time because the numbers do not add up.

All right. They claim the legislation will reduce insurance costs. This is the score of the CBO about small businesses. What about insurance premiums? If you are small businesses, the average premiums today for a family is \$13,300. If the Reid bill passes, by 2016 the premiums will be \$19,200. Is that cutting premiums? Well, yes, it is because under the Reid bill it would increase, on average, 5.38 percent. But if we did not pass any bill at all, it would increase it 5.46 percent. So it saved money; it reduced your premium. It will be \$19,200 instead of \$19,300. That is for small businesses.

What about for large businesses? Does it cut insurance premiums there? For large business plans, under the Reid bill, the increase, if we pass this legislation, would be 5.41 percent per year in your premiums. If you do not pass the bill at all, it would be 5.56 percent. Is that a savings? Very little. Instead of \$21,100, under the Reid bill you would pay \$20,300.

Then, finally, the individual market—this is the people who already are the ones who are getting hurt because they are not in group plans; they don’t have employers paying a third, a half, or whatever, for insurance; they don’t get the same tax breaks. They are getting killed. Barbers, individual people who can’t get into group plans, it is horrible for them. What happens to the individual market? Under the Reid bill, their premiums would go up 7.77 percent per year. They would go up more than the others. What about if we didn’t do anything? How much would their bills go up then, their insurance bills? Only 5.51 percent. Theirs go up more than 2 percent.

So I am just saying this legislation may have a great vision, it may have a great idea about trying to make the system work better, but it doesn’t. These are huge costs. It is not financially sound. It is not going to reduce our premiums. It is going to increase the percentage of wealth in America going to health care instead of reducing it as I thought we were supposed to do from the beginning.

I see my colleague, Senator KYL, here. I would just leave it at that. I thank my colleagues. But if I am correct about these numbers, we shouldn’t vote for the bill. People should change their vote. If I am in error, I would like to be informed of how I am in error.

I yield the floor.

The PRESIDING OFFICER (Mr. BURRIS). The Senator from Arizona.

Mr. KYL. Mr. President, I listened carefully to what my colleague said, and as a member of the Finance Committee, I can tell him that he is not in error. What he said about premiums going up under this legislation is true.

The promise was that premiums would not go up. Well, they continue to go up. In fact, in the case of the individual market, the legislation itself causes them to go up between 10 and 13 percent. My colleague is not in error.

If the Reid bill has a motto, it is “in government we trust.” With the turn of every page, it is no exaggeration to say the Reid bill creates a Washington takeover of health care, to wit, \$2.5 trillion in new government spending; \$494 billion in new taxes; \$465 billion in Medicare cuts; 70 new government programs; and higher health insurance premiums for individuals, families, and businesses. It is packed with new Federal requirements and mandates that amount to a stunning assault on liberty. Even in the absence of a government-run insurance plan, this bill would give the government virtually total control over health care. The bill itself is the government option.

Michael Cannon, a health policy expert at the Cato Institute, warns that the bill’s linchpin, the requirement that all individuals buy a government-approved insurance plan, would be “the most sweeping and dangerous measure in any of the bills before Congress.”

Of course, if Congress mandates that every American purchase health insurance, then Congress gets to define exactly what that health insurance entails. Welcome to the future, where bureaucrats and politicians know what is best for families, small businesses, and seniors. For example, under this legislation the government would set new Federal rating rules. Rating rules dictate how insurers may calculate premiums, which experts estimate would increase premiums by a whopping 72 percent in my home State of Arizona. They would determine the coverage benefits for all plans regardless of consumer preferences or health care needs. The government would limit insurers to offering only four plans. You have to offer two; you can’t offer any more than four. They would prohibit individuals over the age of 30 from enrolling in a catastrophic health care plan. And to highlight the magnitude of government interference and micromanagement, the bill even dictates the number of pages—by the way, it is no more than 4—and the font size—no smaller than 12 point—of the summary of benefits. These are just a few examples of the heavyhanded government controls. Indeed, the word “shall” appears 3,607 times in the Reid bill. I haven’t had a chance yet to count how many more times it appears in the almost 400-page amendment that has been now filed.

In my view, however, the most dangerous consequence of the Washington takeover of health care is the inevitable rationing that will result in the delay and denial of care. Ensuring access to the highest quality care and protecting the sacred doctor-patient relationship should be the fundamental

goals of any health reform effort. These intangibles are the cornerstones of U.S. health care, the very things Americans value most, that the Reid bill puts in jeopardy. Don't look for the words "ration" or "withhold coverage" or "delay access to care" in the bill. Obviously, they are not there. Instead, contemplate the inevitable result of new Federal rules that aim to reduce health care costs but will inevitably result in delayed or denied tests, treatments, and procedures deemed to be too expensive. For example, the Reid bill would establish a Medicare Commission. This is an unelected body of bureaucrats with the task of finding, and I am quoting here, "sources of excess cost growth," meaning, of course, tests and treatments that are allegedly too expensive or whose coverage would mean too much government spending on seniors. The Commission's decisions will result in the delay and denial of care.

Medicare already delays more medical claims than private insurers do, but this bill would redistribute Medicare payments to physicians based on how much they spend treating seniors. It would rely on recommendations from the U.S. Preventive Services Task Force—the entity, by the way, that recently recommended against mammograms for women under the age of 50—to set preventive health care benefits, and it would authorize the Federal Government to use comparative effectiveness research when making coverage determinations. It is this last issue—comparative effectiveness research—that I wish to discuss in more detail.

The Reid bill would create a new entity called the Patient-Centered Outcomes Research Institute to conduct comparative effectiveness research. This research, which is already done in the private sector, compares the effectiveness of two or more health care services or treatments, and, of course, it is used to provide doctors with information as to what works best in most cases. The goal is to provide patients and doctors with better information regarding the risks and benefits of a drug, let's say, for example, versus surgery in a particular kind of case. The question before us is not as to the merits of the research but, rather, whether the research should be used by the government to determine the treatments and services covered by insurance.

In a recent interview, President Obama said:

What I think the government could do effectively is to be an honest broker in assessing and evaluating treatment options.

The President believes the government should assess and evaluate health care treatments, and certainly that is how health care works in other countries such as Great Britain. For example, there, they have the National Institute for Health and Clinical Excel-

lence; the acronym is NIHCE. NIHCE routinely uses comparative effectiveness research to make cost-benefit calculations. They don't even attempt to hide it. On its Web site, NIHCE says:

With the rapid advancement in modern medicine, most people accept that no publicly funded health care system, including the National Health Service, can possibly pay for every new medical treatment which becomes available. The enormous costs involved mean that choices have to be made.

Choices are made, and this is the key: They are made by the government, not by patients and doctors.

The National Health Service, which runs Britain's health care system, has issued guidance known as the Liverpool Care Pathway whereby a doctor can withdraw fluids and drugs from a patient if the medical team diagnoses that the patient is close to death. Many are then put on continuous sedation so that they die free of pain. Doctors warn that some patients are being wrongly put on the pathway, which is creating a self-fulfilling prophecy that they would die because sedation often masks the signs of improvement.

Also, due to excessively long waiting periods, the National Health Service launched what they call an End Waiting, Change Lives campaign. The goal here was to reduce patients' waiting times to 18 weeks from referral to treatment—18 weeks. That is supposed to be a good thing? That is 4½ months for an appointment. This is why many Europeans and Canadians visit the United States each year, places such as the Mayo Clinic in Arizona, for access to the treatments that are denied to them in their own countries.

These are the dangers of a government-run health care system. The government, not the patients and doctors, makes the health care decisions. The government decides if your health care is an effective use of government resources, and the government inevitably interferes in your ability to access care. That is rationing, and it is wrong. This is not what Americans want or expected from health care reform. Yet it is precisely the path Congress is taking. Perhaps that is why 61 percent of Americans disapprove of this bill.

Nothing in the Reid bill would prohibit the Federal Government from using comparative effectiveness research, just as it has done in Britain, as a tool to delay or deny coverage of a health care treatment or service. The bill actually empowers the Secretary of Health and Human Services to use comparative effectiveness research when making coverage determinations. For example, on page 1,684 of the original bill, it says:

The Secretary may only use evidence and findings from research conducted under section 1181 to make a determination regarding coverage . . .

And so on.

As the Washington Examiner notes:

Health and Human Services Secretary Kathleen Sebelius would be awarded unprecedented new powers under the proposal, including the authority to decide what medical care should be covered by insurers as well as the terms and conditions of coverage and who should receive it. The Reid legislation lists 1,697 times where the Secretary is given the authority to create, determine, or define things in the bill.

I know my colleagues will point to language that says: Well, the Secretary can't make these decisions on rationing care solely on the basis of comparative effectiveness research. Whoopee. I am not sure if that is a word we can use on the Senate floor, but big deal. You can't make it solely on that basis, but you can use comparative effectiveness research to ration care. That is wrong, and that is what this bill permits. And despite numerous times to get a simple amendment I offered to say no comparative effectiveness research can be used by a Federal agency to deny care or treatment—simple—the other side says: No, we already have it covered. It is good enough. Our language is fine. You don't need that simple statement that would prevent this research from being used in that fashion. I think it is pretty clear that the attempt here is to be able to do it.

During the Finance Committee, I asked the majority counsel why they didn't bar the Federal Government from using comparative effectiveness research as a tool to ration care. The staff replied:

The reason why we did not include an express prohibition is we did not want to limit the institute from considering areas of science that have a budgetary impact, if you will.

That is, of course, precisely the problem. Americans do not want the Federal Government using this research as a cost-cutting tool.

Regina Herzlinger, a professor at Harvard Business School, warns: CER could easily morph into an instrument of health care rationing by the Federal Government without the appropriate safeguards.

That is why earlier this year I joined Senator MCCONNELL and Senator ROBERTS and Senator CRAPO in introducing the PATIENTS Act, and it creates this firewall to prevent the use of research for rationing. We filed it as an amendment, but, of course, we are not going to be able to vote on it now that cloture has been invoked. This is the third time this year we have tried to institute this pro-patient firewall, but obviously we are not going to be able to vote on it, as I said.

From the very beginning of the health care reform debate, I have believed that any bill should be rooted in a simple yet fundamental principle: that very American should be able to choose the doctor, hospital, and health plan of his or her choice. No Washington bureaucrat should interfere

with that right or substitute the government's judgment for that of a physician. There is nothing more important to Americans, other than maybe their freedom, than the health of their family—and that does, by the way, include an element of freedom, obviously, the freedom to do what you think is best for your family. We would all do anything we could to help a loved one. We don't want Washington impeding our ability to do so.

Maybe that is why this new Washington Post-ABC poll "finds the public generally fearful that a revamped system would bring higher costs while worsening the quality of their care." Even, they say, those without insurance are evenly divided on the question of whether their care would be better if the system were overhauled.

The American people get it. The bill itself is the government option, but in government, they do not trust.

The PRESIDING OFFICER. The Senator from Louisiana is recognized.

Ms. LANDRIEU. Mr. President, I come to the floor today in support of the Patient Protection and Affordability Act, and I wish to give some of the reasons why I am supporting this important piece of legislation.

Before my colleague leaves the floor, I would like to respond to his last comment. One of the reasons the American people are having difficulty believing the government can do anything right is that he and his colleagues have spent the last several decades convincing them that the government is the problem and that the government can't do anything right.

Even in the face of strong evidence that suggests otherwise, they continue that worn-out, tired mantra. People in my State and around the Nation are getting tired of it because they know that government must stand sometimes to protect them from abusive practices in the private marketplace, abusive practices of insurance companies, to try to level the playing field and set the rules. Of course, those on the other side don't believe in a level playing field and rules. They believe citizens in our country should be at the whim and mercy of the private market. That has been their philosophy for decades. That is not the philosophy of the Democratic Party. We believe in a public-private partnership. We believe in a level playing field. We believe in giving people the opportunity to earn their way, with fair rules in place. That party has never believed that, and that is at great issue in the underlying debate. They can continue to fabricate myths and lies about this bill, but those of us who support it will proudly continue to tell the truth about it.

I have served in public office for 30 years as a State legislator, State treasurer, and now as a United States Senator. But it doesn't take 30 years to know the health care system our citi-

zens live under and live with today is expensive, wasteful, and painfully inefficient.

From my visits with doctors and nurses, to seniors on Medicare, to recent college graduates struggling to afford coverage, to dozens and dozens of small business owners who are frightened to death that they are not going to be able to continue in their business because of the rising cost of health care, it has become clear to me that the time for reform is now.

In Louisiana, the average family spends more than \$12,000 each year for health insurance. That is almost 100 percent of the earnings of a person who is working 40 hours a week at the minimum wage. Think about that. Only in one developed country in the world would we have a system that says if you go to work 40 or 50 hours a week, you have the privilege of taking all that money and having to purchase health care in the system that my colleagues on the other side want to advocate for. That is wrong. We must drive down the cost to the government, to businesses, and to families. This bill will begin to do that.

Since 2000, the amount that working families are charged for health insurance has increased by 91 percent. That doesn't seem to concern my colleagues on the other side of the aisle. If this Congress stood by and did nothing, those costs would nearly double in the next 6 years, with economists predicting that families in my State will pay a whopping \$23,000 for insurance in 2016—an 85-percent increase. To say that a different way, that means that if we do nothing, the average family in Louisiana will be paying 60 percent of their income for health care—if they can find it and if they can get around a preexisting condition—leaving only 40 percent of their wages to cover food, education, children, housing, transportation, and everything else families need their funds for.

These skyrocketing costs are burdening families not just in Louisiana but in every State. We don't have a choice but to change. We cannot continue to rely just on the private market without reform, without guidelines, and without incentives to change. Our people will be priced out of the market. Maybe that is what my colleagues on the other side of the aisle want. That is not what I want.

Small businesses are struggling to remain competitive and to turn a profit. In the face of highly unstable and unpredictable health care costs this is getting harder and harder. As chair of the Small Business Committee, I have held 23 hearings and roundtables just this year, and several of them have been focused on how the current health care system and volatile health care costs are hurting our Nation's small businesses.

Today, small businesses are seeing their health care costs increase faster

than the prices of the products and services they sell four times faster than the rate of inflation since 2001. Premiums for single policies increased by 74 percent for small businesses in the last eight years, according to a 2009 Kaiser Family Foundation survey. Nationally, 40 percent of small businesses say that health care costs have had a negative impact on other parts of their business.

What are we supposed to do, stand here and do nothing? No—that is why acting now is so important. That is why this bill is so important, because the status quo is unsustainable. It is unsustainable for our government and it is unsustainable for small businesses.

Even though families, businesses, and government budgets are being squeezed by unsustainable costs, Senate Republicans are doing everything they can to argue for the status quo. Why? I don't know. Each day, they find a new excuse for their obstruction. I wish they had put the same amount of passion, energy, and creative thinking into contributing policies and ideas to this debate as they have into their delaying tactics. Every amendment they offered was to send the bill backward, not forward. They seem hell-bent on defeating and not improving this bill, contrary to their statements on the floor.

The Republicans have charged that we are rushing in to vote for this bill. That is simply not true. We have been debating this issue on and off for the last 87 years.

Republican President, Theodore Roosevelt, made national health insurance a plank in his party platform when he sought the Presidency in 1912. President Harry Truman, in 1945 and then again in 1948, called on Congress to pass reform legislation to expand quality health care coverage to more Americans. President Truman believed we needed a stronger system and that the federal government must play a role in establishing a more robust system of care. His critics called his approach "socialized medicine." Sound familiar?

Only in Washington would 87 years be considered rushing!

This has been a debate that has gone on with particular intensity for the last 2 years, as our Presidential candidates took to the airwaves in debate after debate—Republican and Democratic—outlining their ideas for reform. This hasn't sprung up in the last 2 weeks. This hasn't sprung up in the last 2 months.

Millions of Americans went to the polls, understanding, in large measure, what we needed to do to change the system. Despite the rhetoric from the other side, that is the reality, and the record will reflect that. Instead of coming to the table and working with Democrats to write a bipartisan bill, Republicans chose to put partisan party politics first. I listened to my

friend, MAX BAUCUS, this morning. I, myself, who thought I had followed carefully the work of the Senate Finance Committee, was actually moved to hear the number of meetings—dozens and dozens, maybe hundreds and hundreds of meetings—he attempted to have in a bipartisan way months ago, years ago, with Republicans. Then, at some point, they decided they thought that politics was more important than policy. I think they made the wrong choice.

They fabricated death panels, distorted Medicare cuts, and undermined and disrespected the role of government in protecting its citizens. They have engaged in a relentless misinformation campaign, aimed solely at using fear to sway public opinion against this bill.

Recently—just yesterday—Senator JOHN MCCAIN, our colleague from Arizona, claimed that the American people are opposed to reform, and he speaks about the will of the majority. I remind my colleague from Arizona that the will of the majority spoke loud and clear last year when they elected President Obama to be President and decided not to elect him. The President is carrying out the will of the majority of the people by trying to provide for them hope and opportunity in an area that has eluded us for 87 years.

This is a good effort, a strong effort, and I most certainly believe that the will of the American people is being heard. The other side has tried to paint a picture of a nation opposed to health care reform. Recent polls show otherwise. When we cut through the misinformation and scare tactics, when Americans hear what is in the bill, they overwhelmingly support it.

According to a recent CNN poll, 73 percent of Americans support expanding Medicaid for the poor. Americans know what most of us know: Most people on Medicaid are the working poor. These are people who wake up early in the morning, work hard all day, and they go back home at night, often by taking public transportation because they don't have an automobile. They work hard. They are American citizens. But they don't have enough money to spend 60 percent or 80 percent of their income on health insurance in a broken, unbridled, unfixed private market. So we join together with our States to provide them access to care through the Medicaid system. I support that. And in this bill, the Federal Government will pick up a large share of the cost of expanding coverage.

That same poll showed that providing subsidies for families that make up to \$88,000 a year is favored by 67 percent of Americans. Additional regulations on insurance companies, such as banning denial of coverage for those with preexisting conditions are favored by 60 percent of the American people.

I am one of the Democrats who didn't want to eliminate insurance companies. I believe in private markets. But there have to be certain rules and regulations in order for the private market to work for everyone, and not just for those with wealth or those with the inside scoop on how private markets work.

So we are incentivizing a healthier insurance industry—not coddling it but encouraging it to be competitive and to provide services and coverage for more people in our country.

A recent poll by the Mellman Group shows that support for this bill exists in all States. In my home State of Louisiana, when the provisions of the bill were actually read to voters, 57 percent of Louisianians supported the bill, with 43 percent strongly supporting the reform effort. And most importantly, 62 percent of Louisianians oppose using the filibuster to stop health care reform.

I will read the language used in the poll because people say you can say anything in polls, which is true. If pollsters are not reputable, they can twist and distort. I will read the language used by the poll to describe the plan:

The plan would require every American citizen to have health insurance and require large employers to provide coverage to their employees. It would require insurance companies to cover those with pre-existing conditions and prevent them from dropping coverage for people who get sick, while providing incentives for affordable preventive care. Individuals and small businesses that do not have coverage would be able to select a private insurance plan from a range of options sold on a National Insurance Exchange. Lower and middle income people would receive subsidies to help them afford this insurance, while those individuals who like the coverage they already have will be able to keep their current plan.

This is a very accurate description of this bill before us—the Patient Protection and Affordable Care Act. It is not a government takeover. There is no public option. There is a national plan available now to every American, just like the Members of Congress and the Federal employees have. There will be exchanges—similar to shopping centers—and Americans will be able to go to the exchanges and choose from a number of insurance options. The prices will be more transparent. Administrative costs will be lowered. You will not need a Ph.D. to be able to read these policies—they will be written in plain English.

Again, this is not a government takeover, as the other side claims. That is why 57 percent of people in Louisiana, when given the right information, without the rhetoric, without the railing, without the distortions, say: Absolutely, I am for a public-private partnership.

The American people elected President Obama to bring about change. A big part of the change President Obama and Democrats promised during the

campaign was improving health care for all Americans. Thanks to the President's leadership and the leadership of Senator REID and many others, we are taking several meaningful steps toward fulfilling that promise.

With the exception of two colleagues, Republicans have failed to negotiate in good faith. I want to say how much I respect our two colleagues from Maine, Senator SNOWE and Senator COLLINS. I have been in dozens of meetings with both of them and know that they struggled mightily to find a way to work with us and to support this bill. I have not spoken with them in the last few days, so I will not discuss their reasons for withholding their support. I am sure they will express those on the floor. But I can say that they are the exception to the rule. I know Senator GRASSLEY, Senator GRAHAM, Senator BENNETT, and a few others engaged early on. I want to acknowledge them and I appreciate their good will. But, unfortunately, the leadership of the Republican Party chose politics over policy. I am disappointed that not a single Republican could support an end to the filibuster. I suppose it is easy to stay unified when the only word in your vocabulary is NO. Although Democrats did not initially agree on exactly how to get there, we were united in saying yes to the common goal of delivering meaningful health care reform to America's families and small businesses. It has been difficult. Some of us come from very conservative States. Some of us come from liberal States. We have diverse populations in our States that have different needs and different views. It has not been pretty, but it has been a practical and hopefully a positive exercise that will bring comfort, support, and strength to the American people and to our economy.

I do hold out hope that when we take our vote on final passage, Republicans will recognize this historic opportunity and vote in favor of this bill that will reduce costs and increase access to health care for millions of Americans.

Last month, I stood here on the floor of the Senate to announce my intention to vote in favor of bringing Senator REID's melded bill to the floor. At the time, I was very clear that my vote was not an indication that I supported that particular version of the bill. My vote was to bring that bill to the floor so that we could do the legislative work the American people sent us here to do.

After weeks of floor debate and amendments and round-the-clock negotiations, that work has been completed. We produced a health care bill that is significantly improved from the one that came to the floor. I would like to share a few thoughts about why, in my view, it is improved.

Through tough negotiations, Senate Democrats have developed a consensus

that blends the best of public and private approaches to reduce costs, expand coverage, and increase choice and competition for Americans and have done so without a government-run public option.

Since I continue to hear distortions from my colleagues on the other side, let me be clear: there is no government-run public option in this bill. Instead, we reached an agreement to provide private health insurance plans to be sold nationwide. The Office of Personnel Management will negotiate lower premiums, just as they negotiate the plans currently available to Federal employees and to Members of Congress. Importantly, we ensured that at least one nonprofit plan will be offered in every State exchange and that the States cannot opt out at the whim of every Governor and legislature. For the first time in our Nation's history, Americans will have an opportunity to have the same kind of insurance that federal employees, including Members of Congress, have.

In addition, there has been a lot of talk about the cost of this bill to the government and to taxpayers. There have been a number of false claims about how this bill will add to the deficit and be a burden to our children and grandchildren. The fact is, this bill is completely paid for and it will reduce the deficit by \$132 billion over the next 10 years and as much as \$1.3 trillion in the following 10 years.

Based on our efforts, the Congressional Budget Office and the Nation's premier economists have confirmed that premiums will go down over time or remain stable so that wages for millions of Americans can increase. When this bill is passed, 31 million uninsured Americans will have access to quality health coverage.

This bill is a big step toward fiscal responsibility and a stronger economy. It aims to achieve these goals by streamlining the health insurance market, ensuring efficiency, and limiting insurance company administrative costs, and to some degree, their profits.

It also imposes an excise tax on insurance companies with high-cost plans. This will encourage employers to be more value-conscious purchasers of health insurance. Employers are expected to choose cheaper plans, and as less capital is spent on health care, wages will go up for hard-working families. Economists predict that this could give American workers a \$223 billion pay raise, amounting to \$660 per household.

I strongly urge that this provision be included in the final legislation. I know that there is fierce opposition to this on the House side. But—and the President has said this publicly and privately to us—this is one of the most significant provisions that will help drive down costs for the entire health care system. It cannot be jettisoned at

this point in the debate. This provision must be in the bill for me to give my final support.

We have also created administrative savings through insurance exchanges, and during Senate consideration of the bill we strengthened the Independent Medicare Advisory Board to find more ways to reduce cost growth and improve quality.

The final Senate bill includes a substantial investment in community health centers and will provide funding to expand access to health care in rural communities and under-served urban areas as well. In Louisiana, federally-supported health clinics have saved the state over \$354 million in emergency room visits by the uninsured. The legislation also expands access by increasing funding for rural health care providers and training programs for physician and other health care providers.

There are many parts of the current bill that I am proud to have fought for. The bill creates health insurance exchanges that will provide individuals, families, and small businesses with a wide variety of affordable choices and ensure that they will always have coverage, whether they change jobs, lose a job, move or get sick. These state-based exchanges will enable consumers to comparison shop online for health insurance which will drive down costs by increasing choice and competition.

The exchange will help the uninsured obtain needed coverage and will also help the more than 200,000 Louisiana residents who currently do not have insurance through their employer to get quality coverage at an affordable price. Many of these Louisianians in the exchange will qualify for a tax credit to help them purchase the insurance of their choice.

For example, in Calcasieu Parish, the median household income is \$39,713. In the exchange created by this bill, the average family in Calcasieu would receive an affordability credit that limits what they spend on their premium to around 5.6% of their income or \$2,225. Considering, right now the average Louisiana family is spending up to 28% of their income on health care, this is a huge improvement.

This version of the bill that we improved on the Senate floor now includes additional much-needed help for small business owners, led by Senator LINCOLN, Senator STABENOW, myself, and other members of my committee. Senator SHAHEEN, Senator CARDIN, Senator HAGAN, Senator BAYH, and others worked very diligently on these provisions.

While small businesses make up 74 percent of Louisiana's businesses, only 37 percent of them offered health coverage benefits in 2008. Of those, 62 percent say they are struggling to do so. Of the 64 percent who don't provide insurance, 87 percent say they can't afford it.

I worked closely with Senator STABENOW to improve affordability and choices for small businesses and amended the bill to make the bridge credit available immediately to help small businesses afford health insurance for their employees, and improve the tax credits for small businesses. This means that small businesses who want to offer quality health insurance to their employees will get tax breaks right away, rather than waiting until 2011. I also worked with Senator LINCOLN to expand the number of small businesses that will be eligible for tax credits so that more small businesses get help in offering health insurance coverage for their employees—allowing more small business workers to benefit. In all, these changes bring an additional \$13 billion in tax relief—on top of the \$27 billion already in the bill—to small businesses.

If you own a small business of 25 or less employees here is how reform will help you: Businesses with 25 or less employees whose average annual wages are less than \$50,000 will get immediate help through a three-year bridge credit. The creation of exchanges and a 2 year exchange tax credit will lift the burden of excessive paperwork administrative costs. The exchanges will create more stable, secure choices for your employees

In Louisiana, more than 50,000 small businesses could be helped by this small business tax credit proposal!

This will help small business owners such as Mary Noel Black and her husband, who own a UPS franchise store in Baton Rouge. They offer their four employees group coverage and are willing to pay half the cost, but the premium rates have gone up so much that neither the workers nor the business can afford to pay the \$3,600 a year per employee for insurance. To help Mary pay for the health insurance of each employee, beginning in 2011, Mary could get a \$1,260 bridge credit per employee under this bill for 3 years. Then, in 2014, if she purchases coverage through the exchange, her business is eligible for an exchange credit of \$1,800 per employee for an even more generous tax credit for another 2 years. This savings could mean the difference between offering insurance or dropping coverage because instead of costing her business \$14,400 a year now for her four employees—a cost that is just unaffordable—the tax credit could initially bring her cost down to \$9,360 and later to \$7,200.

Through our work on the Senate floor during this public debate, we have made this good bill better for small business. Not only have we extended and expanded the small business tax credits, the legislation includes several amendments I authored to ensure small businesses continue to have a seat at the table once this bill is implemented.

The bill requires that small businesses receive information regarding

reinsurance for early retirees, small business tax credits, and other issues specifically for small businesses regarding affordable health care options.

It lists Small Business Administration resource partners as eligible recipients of exchange public awareness grants and will include all Small Business Administration partners in the program, including Women's Business Centers, SCORE, Minority Business Centers, Veteran Business Centers, and others.

The bill now requires the Government Accountability Office to specifically review the impact of exchanges on access to affordable health care for small businesses to ensure that exchanges are indeed making a difference for small business owners.

It also clearly states that agencies cannot waive the Federal acquisition regulation, which requires them to report small business contracting numbers and meet small business contracting goals of 23 percent.

There is a provision that modifies the definition of a full-time employee to take into account fluctuation in employee hours, and reduce the impact of employer responsibility requirements for industries with high turnover and that rely on part-time employees.

The bill eliminates penalties for businesses that wait up to 60 days to provide health insurance to their full-time employees.

Finally, the Patient Protection and Affordable Care Act establishes a national workforce commission to gather information on the health care workforce and better coordinate and implement workforce planning and analysis. The managers' amendment ensures that small businesses and the self-employed will be represented on the commission.

These are important considerations for small businesses and I was proud to ensure these concerns were addressed through the amendment process.

Despite claims from opponents of the bill, we have taken important steps to strengthen Medicare, not weaken it. The Senate health care reform bill creates an independent Medicare advisory board to find ways to reduce cost growth and improve quality and moves to a system that rewards quality over quantity. It reduces payments for preventable hospital readmissions in Medicare, and cuts waste, fraud and abuse by enhancing oversight, identifying areas prone to fraud and requiring Medicare and Medicaid providers and suppliers to establish compliance programs.

As much as our Republican colleagues have tried to scare seniors into opposing this bill, the fact is that Louisiana's 650,000 Medicare beneficiaries stand to gain from this health care reform bill. The AARP and many seniors' organizations are continuing to support this bill because they know it improves care for our seniors.

The bill lowers premiums by reducing Medicare's overpayments to private plans. All Medicare beneficiaries pay the price of excessive overpayments through higher premiums—even the 78 percent of seniors in Louisiana who are not enrolled in a Medicare Advantage plan. Without reform a typical couple in traditional Medicare would pay nearly \$90 in additional Medicare premiums next year to subsidize these private plans.

Our bill extends the life of the Medicare Trust Fund by 9 years and lays the groundwork for a more sustainable health system. Thanks to these reform efforts, there will be no additional cost for preventive services under the Medicare program. This includes a free wellness visit and personalized prevention plan designed to help give beneficiaries the resources they need to take better care of themselves in these important years.

This legislation puts taxpayers' dollars above insurance company profits by forcing insurers to bid competitively for the business of Medicare beneficiaries and makes changes to the Medicare Advantage payment structure that will give insurers an incentive to deliver more value.

Another critical aspect of the bill is that it increases the amount of coverage Medicare Part D beneficiaries receive before they begin to pay out of pocket for their prescriptions. Right now, roughly 116,000 Medicare beneficiaries in Louisiana hit a wall in Medicare Part D drug coverage that will cost some of them an average of \$4,080 per year. This reform legislation will provide a 50 percent discount for brand-name drugs.

Some of the bill's most important provisions will benefit the most important population—children.

The underlying bill includes a provision allowing children to remain on their parents' plans up until the age of 26. I have children. I would like to think that by 22 or 23, they will be on their own, they will be gainfully employed and off my payroll. But any of us who have raised children know that sometimes it takes a little more time to launch our children. I see Senator SHAHEEN, who is nodding. She has done this herself. It takes a little time to launch them. According to the latest data from the Census Bureau, in 2007 there were an estimated 13.2 million uninsured young adults. So the bill includes this important provision to allow kids to stay on their parents' insurance for a bit longer as they transition into adulthood.

But my question was, where do the young people who age out of the foster care system sign up, because they do not have parents? I was proud to work on a provision that Leader REID included in this bill to ensure that every young person who ages out of the foster care system will be able to stay on

Medicaid until the age of 26 starting in 2014. Almost 30,000 young people age out of the foster care system every year, having never been adopted or reunified with their birth parents. The fact that they aged out is our failure as government. We have failed them once and we just can't fail them twice. We must support their transition to adulthood, and guaranteeing access to quality health care will help with that transition.

When this legislation is signed into law, insurance companies will not be able to drop children for preexisting conditions beginning immediately. This is crucial for families with children who have battled cancer or diabetes. When a parent loses a job, they may struggle to get insurance when they find new employment. Once this bill becomes law, no insurance company will be able to deny a child with preexisting conditions.

This health care reform bill holds insurance companies' feet to the fire to ensure they are accountable to their customers. By 2014, insurers will not be able to deny coverage due to preexisting conditions. That means they will not be allowed to drop you from coverage if you get sick or are in an accident.

Because of the good work of my colleagues Senator ROCKEFELLER and Senator BEN NELSON, this bill requires insurance companies to disclose the pricing of their benefits to ensure that premiums are spent on health benefits not profits and gives consumers rebates, putting the insurance companies' excessive profits back into your pockets. It contains new requirements ensuring that insurers and health care providers report on their performance, empowering patients to make the best possible decisions. Under this bill, a health insurer's participation in the exchanges will depend on its performance. Insurers that jack up their premiums before the exchanges begin will be excluded—a powerful incentive to keep premiums affordable.

Finally, I was also proud to work with Leader REID and Finance Committee Chairman MAX BAUCUS to address an inequity in the formula that determines the federal match of Medicaid dollars. As we all know, in 2005 Hurricanes Katrina and Rita ravaged the Gulf Coast and destroyed homes, neighborhoods, and even full communities throughout South Louisiana. In an effort to aid the recovery, Congress approved a much-needed aid package for Louisianians that infused grant dollars and direct assistance to speed our recovery.

Some of the necessary one-time recovery dollars were calculated into our state's per capita income. In addition, labor and wage costs increased because there was heightened recovery activity

and a constriction in the market. Consequently, Louisiana's per capita income was abnormally inflated and put us in a category with richer states.

The result is that our federal match for Medicaid is scheduled to drop pretty dramatically. I worked with my colleagues to correct this formula. I never asked for special treatment for Louisiana, but only for understanding of our state's unique situation. We only wanted to be treated fairly and not to get penalized because we have been forced to rebuild following the worst natural disaster in the United States' history. Our federal Medicaid match rates should reflect that the reality on the ground in Louisiana, not the cold calculations of inflexible federal formulas.

An important note is that this Medicaid funding fix was supported by every Member of our Congressional Delegation, and specifically and repeatedly requested by our Republican Governor Bobby Jindal. Some politicians in my state may run and hide when the heat gets turned up, but that's not the way I was raised. I never have and never will run from what I think is right. I was sent here to fight for my state and that is exactly what I'm doing.

Those who have dubbed this provision the "Louisiana Purchase" know little about lawmaking and even less about my views on health care reform. This Medicaid fix alone would not have been enough to earn my vote on this legislation. This was one of literally a dozen priorities I had as the Senate considered health care reform. I am voting for this bill because it achieves the goals I laid out at the beginning of this debate: it drives down costs and expands affordable health care choices for millions of families and small businesses in Louisiana and around the nation. Any claim to the contrary, is a pathetic lie meant to derail this bill, a tactic that was all too common during this debate.

Today, we stand on the verge of history, with an opportunity to support a bill that will provide health insurance to 31 million more Americans, reducing the deficit by \$132 billion over the next ten years.

The bill is not perfect. It is not the exact health care bill that I would have written. I think the same could be said for each of my colleagues. It was a long, difficult process and during the course of completing this landmark bill there were a lot of twists and turns. But, as former President Clinton was fond of saying, we should never let the perfect become the enemy of the good.

And through hard work and good faith and tough negotiations and keeping our eye on the ball, Senate Democrats have actually crafted, in my view, an extraordinary piece of legislation that will go a long way to pro-

viding comfort and security to the American people who elected us to do so.

It will provide comfort and security for the local grocery store owner in Jennings, the 22-year-old in Lake Charles who has just left the foster care system, the single mother of three in Monroe, the 9-year-old boy in Natchitoches who was just diagnosed with diabetes, and the 70-year-old Medicare beneficiary in Houma who worked for three decades in the offshore oil industry.

The Patient Protection and Affordable Care Act will make a difference in these lives and millions more across America, and I urge my colleagues to support it.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mrs. SHAHEEN. Mr. President, I ask unanimous consent that the remaining Democratic time be divided equally between myself, Senator STABENOW, and Senator BINGAMAN.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. SHAHEEN. Mr. President, I wish to begin by congratulating Senator LANDRIEU and thanking her for all the hard work she has done on this bill—first of all for small business. I think we have significantly, with her leadership, improved this legislation for small business so that many of the small businesses in this country—many in my home State of New Hampshire—will now be able to get help as they try to cover their employees for health care. I also wish to congratulate her for all her good work to help children in the foster system. It is significant they will be able to get health insurance once they age out of the foster system and, of course, to help those, as she has pointed out, who have children who are in their early twenties and who are still trying to get settled in a profession.

My daughter was fortunate enough to have health insurance last year in her first job out of college. But now she is going to a new job that doesn't have health insurance, and so she will be able to be covered once this legislation is passed under our plan. As Senator LANDRIEU points out, it is going to make a real difference for families and for small business.

I am very pleased to be here today to support this legislation and also to try to dispel some of the myths we have heard from our colleagues on the other side of the aisle about what is actually in this legislation. Despite what many of our colleagues may want us to believe, passing this bill is the fiscally responsible thing to do. Our current health care system is a threat to the security of our families, our small businesses, and the entire economy of this Nation. The costs of health care in America make up almost 18 percent of

our economy—our gross domestic product. That is more than any other industrialized country. Health care costs are rising three times faster than wages. The leading cause of about two-thirds of the bankruptcies in America is medical bills. Our current health care system is simply not sustainable.

The Patient Protection and Affordable Care Act moves us in a new direction—a direction that is fiscally responsible because this bill is fully paid for. In fact, according to the Congressional Budget Office, the Patient Protection and Affordable Care Act would reduce our Federal deficit by \$132 billion over the next 10 years. In fact, this legislation represents one of the largest deficit-reduction measures we have seen certainly in many years and possibly ever.

Small businesses in my home State of New Hampshire and across this country are going to benefit from this legislation. We heard Senator LANDRIEU talk about many of the provisions she worked on—and many of which I cosponsored—to help improve the legislation for small business. The fact is, the steep annual increases in the cost of health insurance have been forcing more and more businesses to make the very difficult decision to either drop coverage for their workers or to increase their employees' contribution to the point that too many workers have had to decline coverage.

I have heard from a number of businesspeople in New Hampshire, and I wish to read what a couple of them have said.

A young woman named Adria Bagshaw testified this summer at a Small Business Committee field hearing we held in New Hampshire. Adria and her husband Aaron own the W.H. Bagshaw Company. It is a fifth-generation small manufacturing company in Nashua, NH. There aren't a lot of those fifth-generation companies left that are owned by the same family. They offer health insurance to their 18 employees and cover anywhere between 10 to 25 percent of their monthly premium. But now the premiums are \$1,100 per month per family, and Adria is afraid she will have to cut back on the quality of their health insurance plan or the amount the company covers to make ends meet. The sad thing is that she says right now they are spending more on health insurance than they are for raw materials to make their products.

I also heard from a man named John Colony, who is a small business owner in the small, very picturesque town of Harrisville, NH. He e-mailed me saying:

The cost of health insurance is the biggest problem that our small business faces.

He has 24 employees. He went on to say:

The present system is expensive, inefficient and broken. I can't tell you how the 20

to 35 percent annual rate increases depress us all and there is no end in sight. Over the past five years, most of our employees have had to drop coverage because they simply can't afford to pay their share of the premium. I really believe that the time has come to put the existing system out of its misery.

Well, I am happy to tell John we are about to do that, because under this legislation, beginning next year, we provide significant tax credits for small businesses to help them pay for the cost of coverage for their workers. This bill contains a number of significant measures to rein in runaway health care costs—measures such as creating a new pathway for biologic drugs so we can get biologic generic drugs to the market and help lower costs for people. There are measures in this bill that will eliminate waste, fraud, and abuse—something that takes too big a chunk out of our health care dollar. There are also measures in here that will get rid of the subsidies the government pays to insurance companies for Medicare Advantage plans. These are all commonsense actions that will save the government and health care consumers money over time.

In addition, this bill makes significant improvements to our health care delivery system. That is the way we provide health care for people. It injects more competition into the health care marketplace. Controlling health care spending is critical to address the fiscal health of this Nation—no pun intended. This legislation takes a very important first step in slowing down the growth.

I am sure every Member of the Senate—Republican and Democratic alike—has heard heartbreaking stories from our constituents about health care—stories about being denied health insurance, about having to stay at a job they do not like because of the fear of losing coverage, about frustration over the lack of choice and who provides their health insurance or a lack of understanding about their plan's limits until it is too late and they are facing financial peril. Well, this bill will, I am happy to say, change that. Not only do we ensure coverage for an additional 31 million people—

The PRESIDING OFFICER. The Senator's time has expired.

Mrs. SHAHEEN.—but we eliminate the abuses of the insurance companies.

I will be back to talk about some of these other areas.

I thank the Chair, and I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Ms. STABENOW. Mr. President, first, I wish to thank my friend from New Hampshire for her advocacy on health care reform in general, but specifically working together on the areas that affect small business, I very much appreciate, and we are so pleased to have her in the Senate.

I come to the floor to join my colleagues. I know the chair of the Small Business Committee, Senator LANDRIEU, has been here and others will be here—Senator LINCOLN, who has played such a critical role in putting together the small business provisions in the bill.

I am very pleased to have authored one of the provisions in the managers' amendment that will guarantee that small businesses get immediate help starting next year—tax cuts to help them pay for the cost of health insurance. Michigan has close to 200,000 small employers that represent about 96 percent of the employers in our State.

Most folks who think of Michigan think of large employers, large manufacturers. But, in fact, the majority of our employers, as in the majority of each of our States, are small businesses. That is where the majority of the new jobs are being created. We have just 41 percent of our firms that have fewer than 50 employees who actually are able to offer health insurance. So less than half our small businesses are able to offer health insurance, which is why we are focused on small businesses in this reform bill.

The majority of people in this country who don't have insurance are actually working. The majority of us—about 60 percent—have insurance through our employers. We have about another 20 percent or so who receive their insurance through Medicare or Medicaid or the Veterans' Administration or some other public entity and then 15 to 20 percent of the people overall in America who don't have insurance are predominantly small businesses—people working for small businesses or they are self-employed or they are working one, two, or three part-time jobs just to try to hold things together. So that is a major focus of the health care reforms that are in the legislation that is before us.

I am very pleased we have been able to put together a package that has \$40 billion in direct tax cuts—\$40 billion in direct tax cuts—for small businesses across America to help them afford health insurance going forward, rather than waiting for the new insurance pooling—the exchange—which will provide additional help for small businesses. This help, this tax cut, starts right away. We will see 3.6 million small businesses that could qualify for the tax cuts in this bill that will begin next year.

In my State, that means over 109,000 small businesses that could be helped by the small business tax cuts that will make premiums more affordable. So I am very pleased to be part of a group of Members who came together and worked very hard to focus on the fastest growing part of the economy, which are our small businesses.

I will just share one story, and this was from Crain's Detroit, a highly re-

spected business publication in Michigan. Mark Hodesh, who is the owner of an Ann Arbor home and garden store, said he has seen his health insurance premiums go up more than 300 percent since 1997. In 1996, he paid \$132 in health care premiums a month per employee; and this year, regular premium increases have led him to pay upward of \$375 per month for each employee. So that is a 300-percent increase. He says:

I have been in small business for 40 years, and my conclusion is that without health care reform, these increasing costs will put me out of business.

That is the reality for businesses across this country. I do believe health care reform is directly tied to jobs, whether it is large businesses competing internationally that make a determination to move their facility because of health care costs, whether it is small businesses going out of business or having to decide if they keep people working or pay for health insurance or whether it is the self-employed person out on their own, in their own enterprise—maybe it is local realtor. We know realtors have struggled for years because they haven't been able to buy through a large insurance pool. That is what this reform is all about. That is what this legislation is all about, to help small businesses, people who are working out of their homes, who are self-employed, as well as people who have lost their job and then lost their insurance. That is what this is all about.

When we look at this legislation, according to the Small Business Majority, without health insurance reform that is in this legislation the annual costs of health benefits will more than double in less than a decade. They will more than double. We know, because we have seen the statistics, that when we talk about doubling health care costs for businesses in the next 10 years, it is estimated to equal another 3.5 million jobs.

We cannot afford to lose another 3.5 million jobs because of the doubling of health care costs in America. We are focused on creating more jobs. We need to be laser focused—certainly, I am, coming from Michigan—on creating jobs not losing jobs. According to the economic analysis of the Small Business Majority, health insurance reform could save up to 72 percent of small business jobs otherwise lost to a continuing rise in health care costs. We need those jobs.

Again, health insurance reform is all about saving lives, saving money, saving Medicare, and it is certainly about saving jobs. That is why I am so pleased we have made small businesses a major priority in this legislation—both through \$40 billion in tax cuts for small businesses, creating the new insurance pool through which small businesses can get the same kind of deal,

have the same kind of clout as a large business today in being able to negotiate with private companies, and other provisions that are in the bill as well.

There are many reasons to support health insurance reform. Standing up for small businesses is certainly at the top of the list.

I yield the floor.

The PRESIDING OFFICER (Mrs. GILLIBRAND). The Senator from New Mexico is recognized.

Mr. BINGAMAN. Madam President, over the past few weeks we have heard a lot of heated debate about this health care proposal. Much of it has concentrated on a few key issues: whether there should be a public option, whether there should not be. Of course, much of that debate was on the Democratic side among Members with strongly held views on both sides of the issue.

The question of whether we should try to allow people 55 and older to buy into Medicare was also debated. There were strongly held views on that issue.

It is clear now we have a bill before us that will do neither one of those things but which I think will accomplish very major health care reform for the country. I want to just concentrate for a few minutes on some of the other policies that are contained in this legislation that have received much less attention but which clearly are very constructive proposals that will dramatically improve the health care delivery system in the country.

I can remember when we started these discussions early in the spring and summer and had many meetings and hearings and workshops both in the HELP Committee and in the Finance Committee, there were statements made that—on the Democratic and Republican side—we can agree upon maybe 80, maybe 85 percent of the changes we ought to embrace in health care reform. The question is, What about the other 15 to 20 percent? I think we need to spend more time focused on that 80 to 85 percent, and let me do that for just a minute.

This Patient Protection and Affordable Care Act which Senator REID and others have introduced and is in the House legislation as well, both pieces of legislation do contain very important policies. Let me talk a minute about some of those.

First, this act before us includes long overdue reforms to increase the efficiency and the quality of the U.S. health care system while holding down the growth in costs. For example, the legislation includes payment reforms—I have championed those for a long time; others in this body have championed them as well—to shift from a fee-for-service payments system to a bundled payments system. This will reshape our health care reimbursement system to reward better care and not simply more care as the system currently does.

The legislation also includes broad expansion of quality reporting and pay-for-performance reforms that will further incentivize quality and efficiency. The legislation also puts in place the framework for a national quality strategy and several new key Federal oversight bodies to allow both providers and consumers to have unbiased information about whether health care treatments and devices and pharmaceuticals are effective and efficient.

We have heard a lot of charges made that trying to find out what is effective and efficient is objectionable somehow because it might lead to rationing of care. There is no rationing of care contemplated in this legislation. But how anyone could come to the Senate floor and argue against providing good, scientifically based information both to providers and the consumers about which treatments, which devices, which pharmaceuticals are effective and useful is hard for me to understand.

Second, this Patient Protection and Affordable Care Act includes a broad new framework to ensure that all Americans have access to quality and affordable health insurance. It includes the creation of new health insurance exchanges which will provide Americans a centralized source of meaningful private insurance, as well as refundable tax credits to ensure that the coverage they need is affordable. These new health insurance exchanges will help improve the choices that are available to Americans by allowing families and businesses to easily compare insurance plans and prices and the performance of those plans. This will put families rather than insurance companies or insurance bureaucrats or government bureaucrats in charge of health care. These exchanges will help people to decide which quality, affordable insurance option is right for them.

On the issue of cost, the nonpartisan Congressional Budget Office forecasts that this legislation would not add to the Federal deficit. In fact, the latest estimate they have given us is that it would reduce the deficit by \$132 billion by 2019 and well over \$1 trillion in the second 10-year period; that is, the period from 2020 to 2029.

On the subject of premium costs, which all of us care about, all Americans care about, CBO has also found that in the individual market the amount that subsidized enrollees would pay for coverage would be roughly 56 percent to 59 percent lower, on average, than the premiums they are expected to be charged when this law takes effect in the individual market under current law.

Among enrollees in the individual market who would not receive new subsidies, average premiums would increase by less than 10 to 13 percent—this, again, according to the Congressional Budget Office. The legislation

would have smaller effects on premiums for employment-based coverage. Its greatest impact would be on smaller employers qualifying for new health insurance tax credits. For these businesses and their employees, the Congressional Budget Office predicts that premiums would decrease by somewhere between 8 and 11 percent, compared with the costs that they would have to pay under current law.

These estimates by the Congressional Budget Office are consistent with the estimates of the impact in my home State of New Mexico, where average families may see a decrease in premiums of as much as 60 percent from what they might otherwise have to pay. This is families, I am talking about, who would be eligible for these advance refundable tax credits.

In addition, about two-thirds of the people in my State of New Mexico would potentially be able to qualify for subsidies or for Medicaid. In fact, a quarter of our population in New Mexico is at an income level that would allow them to qualify for near full subsidies if they bought insurance through an insurance exchange or for Medicaid itself.

An overall decrease in premium costs also is consistent with the experience that the State of Massachusetts had after they enacted similar reform to what is now being considered in the Senate. There has been a substantial reduction in the cost of nongroup insurance in that State. In fact, the average individual premium in Massachusetts fell from \$8,537 at the end of 2006 to \$5,142 in mid-2009. That is a 40-percent reduction in premium for that coverage. This was at a time when the rest of the Nation was seeing a 14-percent increase.

Finally, much of the debate on health care reform has focused on insurance coverage. It is important to recognize that as we expand coverage to include more Americans, the demand for health care services is going to increase as well. A strong health care workforce is, therefore, essential for successful health reform. Within this country, approximately 25 percent of the counties are designated as health professional shortage areas. That is a measure that indicates that there are insufficient medical staff to properly serve that geographic area.

This problem is even more apparent in rural States such as mine, such as New Mexico. For example, 32 out of the 33 counties in our State—we have just 33 counties—32 of those counties have this shortage designation—health professional shortage area designation. As a result, New Mexico ranks dead last compared to all other States with regard to both access to health care and the ability to utilize preventive medicine.

This Patient Protection and Affordable Care Act also contains key provisions to improve access and delivery of

health services throughout the Nation. These provisions include increasing the supply of physicians and nurses and other health care providers, enhancing workforce education and training, providing support for the existing workforce—health care workforce, increasing the support for community health centers.

I applaud Senator REID and Senator BAUCUS and Senator DODD and Senator HARKIN and many other colleagues in the Senate who worked so hard on this bill. The legislation represents major health care reform. It is time for the Senate to enact this critical and long overdue legislation. There will be chances and opportunities to improve on this legislation in the future. I hope to participate in some of those.

Nothing that is passed into law in this Congress or any Congress that I have served in is what it should be in all respects. But this legislation is extremely important and significant health care legislation. It will do a tremendous amount of good for a vast number of Americans and it will do that “good” in a very responsible way.

I urge my colleagues to support passage of this legislation so we can get on with a conference with the House of Representatives and finally settle on a bill that could be sent to President Obama for his signature.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. COBURN. Madam President, I know our leader is coming to speak, but prior to him coming, I will take a portion of my time that has been allotted to me by my side.

I sat here with great interest listening to the Senator from New Mexico. He referenced the State of Massachusetts. I entered into the RECORD yesterday the 21 percent of the people under the plan who could not get care in Massachusetts because they could not afford the copay and the deductible. This is basically a copy or model off of that.

He also discussed the fact that this shows a \$132 billion savings over the next 10 years. That is provided you do not think you are going to allow any increase in doctor payments and you are not going to reverse the 21-percent cut.

Madam President, my leader is here, and I will be happy to yield to him at this time.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. MCCONNELL. Madam President, I thank my friend from Oklahoma. I will be very brief.

Madam President, Americans woke up yesterday stunned to read that Democrats had voted to end debate on the latest version of this massive bill while they were sleeping. They will be stunned again when they learn about this second early-morning vote to advance a bill that most of them oppose.

Americans are right to be stunned because this bill is a mess. And so was the process that was used to get it over the finish line.

Americans are outraged by the last-minute, closed-door, sweetheart deals that were made to gain the slimmest margin for passage of a bill that is all about their health care. Once the Sun came up, Americans could see all the deals that were tucked inside this grab bag, and they do not like what they are finding. After all, common sense dictates that anytime Congress rushes, Congress stumbles. It is whether Senator so-and-so got a sweet enough deal to sign off on it. Well, Senator so-and-so might have gotten his deal, but the American people have not signed off.

Public opinion is clear. What have we become as a body if we are not even listening to the people we serve? What have we become if we are more concerned about a political victory or some hollow call to history than we are about actually solving the problems the American people sent us here to address? This bill was supposed to make health care less expensive. It does not. Incredibly, it makes it more expensive.

Few people could have imagined that this is how this debate would end—with a couple of cheap deals hidden in the folds of this 2,700-page bill and rushed early-morning votes. But that is where we are. Americans are asking themselves: How did this happen? How did a great national debate that was supposed to lead to a major bipartisan reform lead to a bag full of cheap legislative tricks inside a \$2.3 trillion, 2,733-page bill that actually makes health care costs go up?

This legislation will reshape our Nation in ways its supporters will come to regret. But they cannot say they were not warned. The verdict of the American people has been clear for months: They do not want it.

Madam President, I thank my friend from Oklahoma, and I yield the floor.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. COBURN. Madam President, I would just follow with one comment to my leader as far as his comments.

In 2007, we passed a bill called the Honest Leadership and Open Government Act of 2007. That act requires the posting of any earmarks or direct benefits for Senators in any bill. It has to be posted. We have not seen that with this bill, though we know there are numerous and sundry specific earmarks for Members.

So my hope is that sometime during this process, we will take up the violation of this very law by the leader of this Chamber in terms of ignoring it and flaunting it. What he said, when we passed it, was it was a needed change, and now we see it ignored as they bring this bill to the floor.

Mr. MCCONNELL. I thank my friend from Oklahoma.

One thing about rushing, not only is there a potential violation of the provision the Senator from Oklahoma mentioned, but we are learning more about this bill every day as we scrub it and try to understand it and figure out what all is in it. All of that, of course, is made more possible by rushing things through in sort of an expedited, hurried fashion to get it by the American people before Christmas in the hopes they will not notice.

Mr. COBURN. I thank the leader.

I want to spend my time this morning kind of talking about how you control health care costs in our country. My experience, just from my qualifications—I have 9 years of experience in manufacturing medical devices. I did that as a young man, had hundreds of employees and a fairly large business. I left that business to become a physician. The call of my life was to help people directly rather than indirectly through my medical device association.

So I want to lay out the two different ways, the two different arguments for how we control health care costs because everybody in this Chamber wants to control health care costs. All the Democrats and all the Republicans do. We have 11 studies that say premiums are going to rise and one that says they are not under this bill. So that is not going to control costs.

But I want to read a story that a lady from my district wrote me because I think it is very important in us considering which way we go.

Dr. COBURN.

I hope you don't mind a personal story, but as I listen to the health care debate, I can't help but think constantly of my middle daughter. I am convinced that Chloe would have lost her chance for a normal life, had these policies—

In this new health care bill—

been in effect two years ago. No government agency could possibly have understood Chloe's unique needs or her extremely rare condition.

After a perfectly healthy childhood, my seventeen-year-old showed me that her left arm was twitching and wouldn't stop. Within weeks, the entire left side of her body was jerking constantly, every waking moment of every day. Her MRI revealed more than one periventricular heterotrophic nodule—

That is a growth around the ventricular system, the fluid system of the brain—

but her first two neurologists weren't sure there was a connection between the [changes in her movement and the movement disorder and the symptoms and the nodules]. They certainly had nothing useful to offer in terms of treatment. But I made the rash promise to my daughter that someone, somewhere, knew what to do, and that we would not stop looking until we found that person. Unlike mothers in a government run system, I was free to research the options and apply where I wanted. Our search took less than three months.

Chloe's pediatric movement disorder specialist at Mayo Clinic called her condition “unique” and unclassifiable. He had to debate her case with his neurology team, but

in the end they were willing to try an unprecedented series of brain surgeries. Chloe was desperate to live a normal life again, so my husband and I agreed, though perhaps you can imagine what an excruciating decision that was. Today, Chloe twitches a little, but anyone who didn't know her history would think she is just fidgeting. She is an honors linguistics student at OU, and she even takes dance lessons. She recently started driving again. She said once, "Mom, without the surgery, I would be strapped into a wheelchair now."

I know that Chloe would never have had the unique care she needed, if we had been required to petition a government agency for permission. A less dedicated person than her subspecialist would have tried to classify her condition and restrict her to known treatments. In fact, other subspecialists wanted to make those same restrictions. Chloe's doctor learned how to treat her by spending a great deal of time with her, by talking to her and to us for hours at a time, and by observing her in multiple contexts. I fear for the next mother whose child has an unclassifiable condition, and whose treatment is planned by a faraway committee with a diagnostic manual open on the table. Chloe won't be in that manual.

The thing that keeps people from getting health care in America today is the cost of health care. We have had all sorts of attempts of, how do we do that? We have had the Massachusetts model, and, as entered into the RECORD yesterday, they have insurance reform. Almost everybody in Massachusetts is covered. Yet last year 21 percent of those people who were covered could not get care because they could not afford the deductibles and copays. So expanding insurance and expanding the model does not solve it.

So you can either approach controlling costs or you can ration care. What has happened in this bill, as it comes through, is we have chosen to ration care. My colleagues are going to dispute that, but I want to offer significant evidence to offset that and discuss what is in the bill and to also discuss what is not in the bill.

What is not in the bill is a prohibition against rationing, which all of my colleagues on both the Finance Committee and the HELP Committee voted against, which means you are for rationing if you vote against, a prohibition. The leader denied an amendment on the floor of the Senate to eliminate rationing, so we do not get to see where everybody stands. But we understand the intent. So there is no question that the way we are going to control costs is to limit your access by rationing health care.

The other side of controlling costs is to incentivize the prevention of disease and incentivize payments for good outcomes when we manage chronic disease that is there in an efficient and effective way. That is not in the bill. That is not anywhere in the bill. What we have to do is incentivize an insurance company to invest in the management of chronic disease rather than to pay for the consequences of the chronic disease. That is not in the bill either.

So we get two choices.

Now, what do we find in this bill? We find a Medicare advisory commission. They actually dropped the name "Medicare" from it, but we find an advisory commission that is going to tell us how much money we have to cut from Medicare, and we either have to cut that amount or make some cuts somewhere else.

We have the U.S. Preventive Services Task Force, and we have already seen during the debate on this bill when they do something that is based on cost alone—not clinical; breast cancer screening for women between the ages 40 to 50—when they do something on the basis of cost instead of clinical, we run in and jump and say no, but we are going to pass a bill that is going to totally empower that. Seventeen times in this bill is the U.S. Preventive Services Task Force referenced in what it is going to tell us what to do, and it is not going to tell us just in Medicare and Medicaid, it is going to tell us in every area what we are going to do. But because there was such a reaction to the first recommendation based on cost—and let me explain what that was. They said that if you are age 50 and over, the incidence of finding somebody with breast cancer is 1 in 1,470 people, but if you are between the ages of 40 and 50, it is only 1 in 1,910 people; therefore, it is not cost-effective. So it does not matter if you have breast cancer between the ages of 40 and 50, we do not think the government ought to be paying for your mammogram and we do not think anybody ought to have one. Well, that is fine for all those people who do not have breast cancer. It is terrible for the people who do have breast cancer and it could be found early with a mammogram.

So we rushed in here and we offset what that task force did. But they are going to be doing it time and time again. And is the Congress going to truly—every time they make a decision based on cost-effectiveness, not clinical effectiveness, are we going to reverse it? We are not. So there is another proof that we are, in fact, going to use the rationing of care to control costs.

Mr. BURR. Madam President, will my colleague yield for a question?

Mr. COBURN. I would be happy to.

Mr. BURR. If, in fact, the Congress did reverse the decision of an advisory board, what does that do to the budget deficit? And what does it do to the claims that this current bill being considered is paid for?

Mr. COBURN. I am not sure I can answer the question. But it would make it less effective in terms of supposed claims.

Mr. BURR. So if the authors of this bill never intended to make cuts, then it blows the budget neutrality that is portrayed in this bill. But if they use all the mechanisms that are in place to make sure reimbursements are cut or

the scope of coverage is affected by a decision to limit one's care, then we could see prevention cut, wellness programs cut, or even the preventive diagnosis such as for breast cancer limited to a much smaller group.

Mr. COBURN. I think the Senator from North Carolina is really going to where I am going to get to later; that is, what is the motivation for the decisionmaking? I think my colleagues on the other side of the aisle are well intended, but I don't think they are well informed about the consequences of their intentions.

So if you set up the Task Force for Preventive Health Services and say you are going to rely on it, but we know they are going to make the decisions based on cost-effectiveness, not clinical effectiveness, what we are going to see is the American Cancer Society coming again and again and again because what we are going to do is we are going to cover those where it is cost-effective but not clinically effective. For 80 percent of Americans, they are not going to notice the difference, but one out of five Americans is going to notice the difference.

The second area, which I wish to spend some time on because we have actually modeled it after England, is cost comparative effectiveness. We ought to talk about what is comparative effectiveness research because there is nothing wrong with the research. It is health care research comparing various drugs, devices, and treatments head to head, and the whole goal of that is to find out what works best and what costs the least.

The assumption in this bill is, we can have 24 or 36 people in Washington decide that. In the Framingham studies they have been running for over 50 years on heart disease, we still don't have the answers and we have been studying it for 50 years. But we are going to be making decisions on cost, not on clinical effectiveness, which is going to limit your ability to have what you and your doctor think you need.

So we are going to pull out clinical experience of individual physicians. We are going to eliminate the heart of medicine, which is the combination of vast experience, gray hair, long years of training, family history, clinical history and physical exam and we are going to say: No, it doesn't matter. We are going to say: Here is the way you are going to do it.

Who uses comparative effectiveness research? Well, several countries do. When I share with my colleagues the stories about how it is used, you are going to get a real vision of what is coming with this bill—a real vision.

This bill creates a new agency called the Patient-Centered Outcomes Research Institute to perform comparative effectiveness research. I have already said the idea behind it is good. I

strongly support medical research. I strongly support helping doctors and their patients choose the best research and the best treatment. The problem is, this bill doesn't do that. On the contrary, this bill will empower the government to decide which treatments you can have and which ones you cannot have. That is what this does. This removes the judgment of the doctor and replaces it with the judgment of the bureaucracy in Washington. It is not a hypothetical concern, it is a real-world problem.

In Britain, they control health care costs by denying or delaying access to expensive therapies. That is one of the reasons this country has one-third better survival for every cancer you can imagine over Great Britain because we don't do that. As a two-time cancer survivor I am acutely aware as a patient, not as a doctor, in that I want to make sure for my family and my patients they have the best alternatives, not the cheapest, because the cheapest alternatives are the ones that take years away from your life.

I am going to go through some examples. Nobody can dispute this is what is happening now and what will happen under our program. To Senator BAUCUS's credit, he had a bill that wasn't cost comparative effectiveness; he had one based on clinical comparative effectiveness. That is not in here. What is in here is cost comparative effectiveness. Senator BAUCUS knew you don't want to use cost as the main thing; you want to use clinical outcomes as the No. 1 deciding agent in how we approach health care—not cost—because if you only look at cost, nobody in this country would get a mammogram between 40 and 50. But this bill is different from what Senator BAUCUS had offered in his Finance Committee markup.

There is an agency in Great Britain called the National Institutes for Health and Clinical Excellence. It is pronounced NIHCE. Here are some of the decisions of NIHCE in the most recent years. They have a problem in England with cost, too, and they have a single-payer, government-run system. They have the government running it, but they still can't control their costs, so what have they done? They have repeatedly denied breast cancer patients breakthrough drugs. They have forced patients with multiple sclerosis to wait 2½ years to receive new innovative treatments that people in this country are getting as soon as they are available. They have denied early stage Alzheimer's patients medication, requiring their condition to worsen before they give them the medicine. What do we know about the medicine? It works best when you have the slightest symptoms of Alzheimer's, not when you get worse. But that is the bureaucratic thinking: We will save money rather than practice good medicine.

They deny life-prolonging treatments to kidney cancer patients. They denied new medicine to all but a small percentage of patients with osteoporosis and then only as a last resort. In other words, you have to about have your bones breaking by standing before you get medicine for osteoporosis in Great Britain. In this country, we have prevented millions of hip fractures through effective medicines to restore the calcium and bone matrix in seniors' bones. But we have Medicare now saying you are doing too many tests to check on that, so you can only do it every 2 years. So we are going to use rationing, and we are.

They denied access to the only drugs available to treat aggressive brain tumors. They denied effective drugs to bowel cancer patients, colon cancer.

Macular degeneration is something that affects a large number of people in this country. That is where the macula—the area that actually allows you to see and concentrate your vision—as we age, we have what is called cystoid macular degeneration or dry degeneration. That is a disease of the eye where it causes vision loss. NIHCE required patients suffering from macular degeneration to go blind in one eye before they could have the medicine that almost every American who has macular degeneration in this country has. She had to go blind first in one eye before you could ever get the medicine. That is a bureaucrat making this decision or a bureaucratic committee because it was cost-effective to allow you to live with one eye. Elderly patients went to court to fight for drugs to keep them from going blind. Twenty-two thousand Britains became totally blind through that ruling by the NIHCE. In one case, an 88-year-old World War II veteran and former Air Force pilot sold his house to pay for the drug after the government said they weren't going to pay for it. The Royal National Institute of Blind People said that as a result of NIHCE's decision, countless people have either been stripped of their sight or stripped of their life savings to pay for private treatment.

For Alzheimer's, they ruled that three drugs, common to many people who are listening today—Aricept, Reminyl, and Exelon—were not cost-effective for patients with early Alzheimer's disease. Well, those are the only ones they work effectively on. One hundred thousand Alzheimer's patients a year were denied treatment that could have slowed the progress of their disease. The British Alzheimer's Society said this decision was disgraceful and victimized the most vulnerable in our society.

Brain cancer. Gliadel and Temodal were not cost-effective for treating brain tumors and severely restricted their access to them. A 47-year-old woman sold her house to buy the drug

the government refused to provide. They have been held as the biggest breakthroughs in treating brain tumors in the last 30 years. Finally, in April of the year before last, they finally relented and allowed brain cancer patients to have the drugs that were available on the market.

Erbix, very effective in resistant colon cancers. In 2006, denied. Seventeen thousand Britons a year get the sort of advanced colon cancer that Erbix is designed for. Yet they can't have it.

Mr. BURR. May I ask a question of my colleague? Listening to this list of products that have been denied people in Great Britain, and certainly this is true in some other countries, makes me look at the Medicare population in this country with the realization that the way Medicare was constructed, a senior can't pay out of pocket because no provider can receive a payment from a senior. If for some reason this bill were passed and you took part of the arsenal of drugs away from seniors or procedures away from seniors, how can a senior get a benefit if no provider can receive an out-of-pocket payment from a senior?

Mr. COBURN. That is the problem with our system today. What we are going to hear them say is the insurance companies do this now. At first, for new treatments, until they are proven effective, most insurance companies don't cover them, but they cover them much sooner than Medicare does today. Today, Medicare is the last to approve the drugs.

We are going to hear that is not any different than the limitations from insurance. That is true. We need to change that. But the fact is, we are getting ready to put all these people into insurance programs, and then we are going to have the Federal Government, which is just as bad or worse than the insurance company, making those decisions.

I wish to finish my point on cost. We get two ways for fixing cost because that is what is keeping people from getting access. We can either ration it—and there are three methods to rationing in this bill which will be used—or we can incentivize outcomes and we can incentivize prevention and we can pay, based on the transparency of outcomes and quality. We haven't done any of that in this bill. We have said we have, but when you look at how do you prevent it—and the model is the 200,000 employees at Safeway and what they have been able to do in using their incentive systems to pay for prevention, to use competitive purchasing to reconnect the employee with the purchase of health care.

I understand my colleague from Nebraska is here, and I will yield to him because I understand he was a unanimous consent request.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. JOHANNIS. Madam President, I appreciate the courtesy extended by the Senator from Oklahoma.

I ask unanimous consent that the pending substitute amendment be modified to delete the following special carve-outs: eliminating or reducing the Medicaid unfunded mandate on Nebraska, Vermont, Massachusetts; exempting certain health insurance companies in Nebraska and Michigan from taxes and fees; providing automatic Medicare coverage for anyone in Libby, MT; earmarking \$100 million for a health care facility, reportedly, in Connecticut; giving special treatment to Hawaii's disproportionate share of hospitals; boosting reimbursement rates for certain hospitals in Michigan and Connecticut; and mandating special treatment for hospitals in frontier States such as Montana, South Dakota, North Dakota, and Wyoming.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. Madam President, I appreciate the Senator's desire to want to cut the payments to his own State, but I object.

The PRESIDING OFFICER. Objection is heard.

Mr. JOHANNIS. Thank you. I yield to the Senator from Iowa.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Madam President, we had a very early vote, and it brings the health care reform bill obviously one step closer to final passage—at least it looks obvious that is going to happen. Regardless of whether the other side has 60 votes, my friends on the other side still have a problem they want to not have the public concentrate on; that is, that the pending bill still raises taxes on middle-income Americans. The Reid modification did nothing to reverse this fact.

I will take a few moments to illustrate the winners and losers under the bill. We start with a question: If a person is not receiving a subsidy for health insurance under the bill, then how can the person receive a tax cut? This is a relevant question because the White House and the majority leadership continue to proclaim that the bill is a "net tax cut" for middle-class Americans. For example, on Wednesday, December 16, a senior White House aide wrote:

The bill being considered represents a substantial net tax cut for middle income families.

So I think that statement begs more questions. Who do you believe? The White House, on the one hand, or on the other hand, the nonpartisan independent experts upon whom we on Capitol Hill rely for judgment—the people who are not political, the Joint Committee on Taxation?

This committee tells us that in 2019, a little more than 13 million individual families and single parents would re-

ceive the government subsidy for helping people under 400 percent of poverty buy health insurance. The Joint Committee also tells us that the number of tax filers in 2019 will be 176 million people. If people are wondering why we talk about 2019, it is the budget window from now until the end of the 10-year period of time that we call a "budget window." That means out of—comparing this 13 million to the 176 million taxpayers, 13 million people receiving the subsidy and 176 million tax filers—that means out of that 176 million individuals, families, and single parents, only 13 million of them would receive a government subsidy for health insurance. That is only 7 percent of the tax filers. It is pretty important to understand that only 7 percent of Americans will benefit from the subsidy for health insurance.

We have a pie chart so people can see exactly what I am talking about. This says 176 million taxpayers, with 13 million receiving the subsidy. This means 163 million families, individuals, and single parents—or 93 percent of all taxpayers—will receive no government benefit under the Reid bill. What does that mean? It means there is a small beneficiary class under the Reid bill—7 percent. Thirteen million people will receive benefits under the Reid bill. A very large nonbeneficiary class—93 percent—will not benefit.

This nonbeneficiary class is affected in other ways. Yes, while one group of Americans in this class would be unaffected, another group of Americans will see their taxes go up. This group would not have a tax benefit to offset the new tax liability. That means these Americans will be worse off under the Reid bill.

It is legitimate to ask, for these 93 percent of the people, what happened to their net tax cut? What they will see instead is a net tax increase. Based on the Joint Committee's data, in 2019 42 million individuals, families, and single parents with incomes under \$200,000 will see their taxes go up. This is even after taking into account the subsidy for health insurance. Again, this is on a net basis.

If we were to identify those Americans who are not eligible to receive the tax credit and those whose taxes go up before they see some type of tax reduction from the subsidy, this number will climb to 73 million Americans. The first bar on the chart illustrates what we have already established but looks at Americans earning less than \$200,000. Right here, 13 million families and single parents and individuals would receive the subsidy.

The middle bar on the chart shows the net tax increase number of 42 million Americans under \$200,000-a-year income. Finally, when we identify those Americans who get no benefit under this bill, and those Americans who see a tax increase, we find that

there are 73 million individuals, families, and single parents under the \$200,000 category. That is this group.

I want to close by referring to a final chart that illustrates the winners and losers under the Reid bill. What we see is that there is a group of Americans who clearly benefit under the bill from the government subsidy for health insurance. This group, however, is relatively small—8 percent of Americans, if you look at those earning less than \$200,000.

There is another much larger group of Americans who are seeing their taxes go up. This group is not benefiting from the government subsidy, this group on the chart. There is another group of taxpayers who are generally unaffected, this 82 million here. The Joint Committee on Taxation tells us this group may be affected by tax increases that are not included in this study, like the cap on flexible savings accounts and the individual mandate tax that people are going to pay if they don't buy health insurance.

The bottom line is this: My friends on the other side of the aisle, first, cannot say that all taxpayers receive a tax cut; two, they cannot say the Reid bill does not raise taxes on middle-income Americans because we have the professionals who are nonpolitical at the Joint Committee telling us differently. No one can dispute that data.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Madam President, my friends on the other side of the aisle continue to argue that the Reid bill eliminates the so-called hidden tax. They argue that this would reduce the cost of health care. For example, on Wednesday, December 16, a senior White House aide wrote:

Even if you believe that some of the tax on insurance companies is passed along, it would be more than outweighed by the benefits middle-class families would get from reducing the hidden tax they currently pay for the uninsured.

I don't believe the fees on health insurance companies will be passed through to the policyholders. I think it is just idiotic not to think they would not be passed through.

I want to flatout state I know they are going to be passed through. My authority for this is the Congressional Budget Office and the Joint Committee on Taxation telling us that fact. The CBO and the Joint Committee on Taxation told us that these fees will actually increase health insurance premiums. Premiums will go up because

the companies are paying increased taxes under this bill. For insurance premiums to go up, under a title of a bill that encompasses health care reform, that is going in the wrong direction. Also, for argument's sake, let's assume my Democratic colleagues are correct and this so-called hidden tax that results from uncompensated care equals \$1,000. The pending health care reform bill still leaves a large number of Americans uninsured. Specifically, the Reid bill leaves 23 million out of 54 million without health insurance at the end of this budget window, 2019. So, at best, the Democrats' reform cuts the hidden tax in half—in this case, to about \$500 a family.

To add insult to injury, however, the bill adds new hidden taxes. These taxes are the fees imposed on health insurance. CBO and the Joint Committee on Taxation—two respected organizations—say this will increase costs. If you check the report, no one can dispute that. These fees go into effect in 2011—still 3 years before any of the major reforms under the pending bill kick in.

That means this hidden tax will increase premiums in 2011, 2012, and 2013. That is before there is any government assistance for health insurance being provided to families that need it. The new hidden tax is also created as a result of the Medicaid expansion on the one hand, and Medicare cuts on the other hand, a major cost shift in health care derived from government programs—Medicare and Medicaid—which reimburse providers at rates roughly 20 percent to 40 percent lower than private providers.

President Obama understands that paying doctors below market rates leads to cost shift. This is what he said at a townhall meeting on health care reform:

If they are only collecting 80 cents on the dollar, they have to make that up someplace else, and they end up getting it from people who have private insurance.

The Medicare and Medicaid cost shift will be increased significantly under the pending health care reform bill. According to the CBO estimate, Medicaid will be increased by more than 40 percent, from 35 million to 50 million people. Additionally, the bill includes almost \$½ trillion in Medicare cuts that will result in lower payments to providers.

Increasing the current Medicare and Medicaid cost shift as a result of the Democrats' health reforms would add even more costs to a family's health insurance policy. The easier cost shift to address would be the \$1,700 cost shift from defensive medicine. The Democrats do not address the cost shift from defensive medicine which former CMS Director Mark McClellan has estimated adds \$1,700 in additional cost per average family.

Addressing this reform alone could save more than covering all of the uninsured in America.

So, you see, my friends on the other side say their bill will eliminate the so-called hidden tax. My friends seem to come up short on that one. Also, they add new hidden taxes that will burden middle-class Americans.

I think in the present situation, the legislation before us and the language used by debaters on the other side, they should be transparent when they are talking about getting rid of the hidden tax. The pending health care reform bill makes things from these three perspectives work.

Madam President, I will be happy to yield the floor for a minute for the purpose of a colloquy with Senator BAUCUS on another subject.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Madam President, I would like to address a colloquy with Senator GRASSLEY, as he said, on another subject that is not related to this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXPIRING TAX PROVISIONS

Mr. BAUCUS. Madam President, the Senate is wrapping up legislative business shortly, but there are a few expiring tax provisions that have unfortunately not been extended. These provisions include tax benefits for individuals and businesses. These provisions would help teachers who purchase supplies for their classrooms and families with college students.

Further, a great number of U.S. businesses rely on important tax benefits, such as the research and development tax credit and the active financing exception, both of which expire at the end of this year. The energy industry also relies on several provisions that expire on December 31. Unfortunately, this is not the first time we have allowed important tax benefits to expire. As soon as the Senate reconvenes next year, my intention is that we take up legislation to extend these important provisions.

That is why Senator GRASSLEY and I have written a letter to the Senate leadership. I ask unanimous consent to have this letter printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, DC, December 22, 2009.

Hon. HARRY REID,
Majority Leader, U.S. Senate, Washington, DC.
Hon. MITCH MCCONNELL,
Republican Leader, U.S. Senate, Washington, DC.

DEAR MAJORITY LEADER REID AND REPUBLICAN LEADER MCCONNELL: We write to inform you that early in the next year, we intend to address the extension of various tax provisions expiring on or before December 31, 2009. We intend to extend the provisions

without a gap in coverage, just as the House did on December 9th of this year. The legislation will extend several important tax benefits to individuals and businesses. The legislation will also extend a number of energy tax provisions, including the biodiesel tax credit, and natural disaster relief.

These provisions are important to our economy—not only because they help create jobs, but also because they are used to address pressing national concerns. We understand that the expiration of these provisions creates uncertainty and complexity in the tax law.

Taxpayers need notice of the availability of these provisions to fully and effectively utilize the intended benefits. We hope to address this issue as soon as possible to cause the fewest disruptions and administrative problems for taxpayers and also generate the greatest economic and social benefit.

Sincerely,

MAX BAUCUS,
Chairman, Senate
Committee on Finance.

CHUCK GRASSLEY,
Ranking Member, Senate
Committee on Finance

Mr. BAUCUS. Madam President, the letter states our intention to work together to get the extenders done as quickly as possible in the new year.

Senator GRASSLEY and I both understand that expiration of these provisions creates uncertainty and complexity in the tax law. Taxpayers need notice of the availability of these provisions to fully and effectively utilize their intended benefits. Finally, we must act quickly to cause the least disruptions and administrative problems for the Internal Revenue Service.

I hope when the Senate convenes early in 2010, we can address these expiring provisions as soon as possible. I wonder if that is also the intention of the my good friend from Iowa, Senator GRASSLEY.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Madam President, I would like to add to what Senator BAUCUS said by speaking positively on this issue and to remind my colleagues who maybe have been watching in the last 3 weeks and have seen Senator BAUCUS and I on opposite sides of the issue of health care reform—it is uncharacteristic for us to have different points of view on legislation. In the 10 years he and I have been leaders of the Finance Committee, most of the issues coming out of our committee have been very bipartisan. What he just talked about and what I am going to respond to is one of those issues.

I agree with Chairman BAUCUS that we should retroactively extend the expiring tax provisions as soon as possible after Congress reconvenes in 2010.

As chairman of the Finance Committee in 2005, I worked with then-Ranking Member BAUCUS, and we authored the biodiesel tax credit.

The biodiesel tax credit is a tax credit that is needed to be extended before

the end of the year to prevent the U.S. biodiesel market from grinding to a halt on January 1, 2010. This tax credit differs from other tax provisions in that the price of biodiesel will be \$1 higher on January 1, 2010, as a result of the tax credit not being extended before that date. That means people will simply buy petroleum diesel rather than biodiesel come January 1, 2010.

I point out that support in Congress for extending the biodiesel tax credit, I think, has been and still is robust, bipartisan, and bicameral, and that it has not been extended prior to January 1, 2010, due solely to issues unrelated to the merits of the biodiesel tax credit.

I want everybody to know that I agree with Chairman BAUCUS that the expiration of these tax provisions creates uncertainty and complexity in the tax law. I also agree that the taxpayers need notice that these tax provisions will be in place so they can plan their personal and business affairs to fully and efficiently use the intended tax incentives.

In addition, extending the tax provisions as early as possible in 2010, as we intend to do, will minimize the administrative problems created for the Internal Revenue Service.

I look forward to working with Chairman BAUCUS to retroactively extend these provisions as soon as possible when the Senate reconvenes in 2010.

Mr. BAUCUS. Madam President, I thank the Senator for his statement. I look forward to working with him and other Senators so we can pass this legislation as soon as possible next year.

Again, I commend my colleague and friend. It is true that much more often than not we are working on the same side of an issue. Even on the few occasions when we are on the opposite side, I do say we do it agreeably. I wish more of the Senate would act the same way.

Mr. HARKIN. Madam President, I thank the Senators. The delay in the passage of the Tax Extenders Act of 2009 will cause problems for a wide variety of groups, as the distinguished Senators from Montana and Iowa have outlined. I believe the negative impact of our failure to act this year will be felt first, and felt most strongly, by manufacturers of biodiesel. Without the immediate passage of legislation to extend the biodiesel tax credit, a large number of biodiesel manufacturing plants are likely to close down because they do not have the resources to operate without the financial benefit of the credit.

Biodiesel is a key part of our Nation's success in biofuels. These biofuels, produced here in our own country, are helping to reverse our near-total dependence on petroleum for transportation in this country. The hard truth is that we get about 70 percent of our petroleum from other countries, and many of those countries are

unstable or are unfriendly to the United States or both. So biodiesel is helping us restore national energy security.

Biodiesel is made from vegetable oils or animal fats. The biodiesel industry employed over 50,000 workers and added over 600 million gallons of biobased fuel last year to help power the diesel engines across our Nation and throughout the economy.

However, this is still a very small and struggling industry. It is absolutely dependent on continuation of the biodiesel tax credit. Without this credit, most of the biodiesel plants in this country will simply be forced to shut down, thus idling important domestic fuels production capacity as well as putting as many as 20,000 employees out of work. We can't let that happen. And, if for any reason the credit was not made retroactive, bankruptcy would in a good number of instances be a quick result.

I do appreciate the efforts by the chairman and ranking member to move forward with this badly needed legislation at the first opportunity.

Ms. STABENOW. Madam President, as we work toward economic recovery, it is imperative that we act quickly to extend critical tax provisions scheduled to expire this year that promote research and development, spur community development, support the deployment of alternative vehicles and fuels, and provide certainty for businesses and families.

Knowing these tax provisions are in place allows Americans to plan for the upcoming year. The longer we wait to pass this legislation, the more uncertainty we place on businesses during a time when they are starting to recover. Many of these tax provisions encourage investment, the development of new technologies, and business growth, which allow our companies to be competitive in a global marketplace.

Delaying the extension of the research credit could put more than 100,000 jobs and billions of dollars in economic activity and Treasury revenue expected in 2010 in jeopardy, according to estimates from TechAmerica. If the credit is renewed, the association estimates that 120,000 jobs would be generated and/or sustained, there would be an additional \$16 billion in additional research and development and other economic activity and \$13 billion in Federal tax revenue over the course of 2010. However, for every day that the credit is left expired, there is the potential to lose 331 jobs, \$45 million in economic activity, and \$37 million in tax revenue.

Another important tax provision set to expire this year allows businesses to write off the expenses of cleaning up brownfields, industrial land that would otherwise continue to be a blight on our communities and harm our environment. In my home State of Michi-

gan, these credits will be needed more than ever to address the brownfields that have been left behind as a result of the restructuring of the automotive industry. Revitalization of these brownfields will be critically important to communities throughout the State and the Midwest.

It is also imperative that we restore the estate tax retroactively to January 1, 2010. I am extremely disappointed that an extension was blocked and that the estate tax will be allowed to expire in 2010. Contrary to Republicans' claims, more heirs of farm and business estates will be hit with a tax increase than if we extended the estate tax at current levels. If the 2009 rules are retroactively applied, then only approximately 6,000 estates would pay the estate tax each year; however, if the estate tax expires, then it is estimated that 61,000 estates could be hit with the capital gains tax. It is critical that we extend the estate tax under the 2009 parameters to protect small businesses and family-owned farms, continue the incentive that the estate tax provides for charitable giving, and provide certainty for the heirs of farm and business estates.

During one of the most challenging economic times our country has faced, dragging our feet on these tax extensions could have a substantial impact on our Nation's businesses and families at a time when we should be doing all we can to help them succeed. I look forward to working with Chairman BAUCUS and Ranking Member GRASSLEY to retroactively extend expiring tax credits expeditiously when we return next year.

Mr. GRASSLEY. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. GRASSLEY. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Madam President, there was a report released recently by the Chief Actuary, Rick Foster. I hope this report will once and for all put an end to any serious consideration of the CLASS Act. The CLASS Act is going to be in the bill, if this bill passes Congress. But it should not be in it, and we should have had a long discussion on this provision because it is simply fiscally unsustainable.

The information the Chief Actuary's letter provides is ample evidence of why the CLASS part of this bill cannot work. Quoting from page 13 of the Chief Actuary's letter:

We estimate that an initial average premium level of about \$240 per month would be required to adequately fund CLASS program costs for this level of enrollment, antiselection, and premium inadequacy for students and low income participants.

So who would enroll in the CLASS program? An American making 300 percent of poverty has a gross income of

\$32,490. If the CLASS premium is, as the Chief Actuary predicts, \$240 per month—that is \$2,880 per year—and an individual at 300 percent of poverty would have to commit 8.9 percent of their income to join the program. That is simply not possible, nor is it plausible to argue that young, healthy persons will commit almost 9 percent of their income to long-term care insurance policy.

The people who will enroll then are those who have real expectations of using the long-term care benefit. People who join the CLASS program with the expectation of needing the benefit become the Bernie Madoffs of the CLASS Act Ponzi scheme.

An individual becomes eligible for the CLASS program after paying premiums for just 5 years. If a person pays premiums of \$2,880 per year for 5 years, they would have paid a total of \$14,400 in premiums for that program. That person can then begin collecting a benefit of \$1,500 per month. In 10 months, the person will have recouped their 5 years' worth of premiums.

This simple explanation should make it crystal clear why the CLASS Act is a fiscal disaster waiting to happen, not based on our determination but based on the determination of the Chief Actuary. The premium will be too expensive to entice young, healthy people to participate. The benefit payout is very enticing for people who know they will need the benefit. Healthy people do not participate; sicker people will. This adverse selection problem will send the program into the classic insurance death spiral.

The Chief Actuary concluded on page 14 of his report with this one sentence:

There is a very serious risk that the problem of adverse selection would make the CLASS program unsustainable.

If the CLASS Act becomes law, the Federal taxpayers are at very serious risk of paying a price to clean up the fiscal disaster when the CLASS Act fails.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAUCUS. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Madam President, this chart shows very graphically—this is data put together by the Joint Committee on Tax, combining all the various provisions in the bill. Basically, it shows that in 2015—that is the bar on the far left—there will be a \$26.8 billion net tax cut for individuals—net tax cut. Two years later in 2017—that is the middle vertical bar—there is a net tax cut of \$40 billion for all Americans—a net tax cut. Not for all Americans.

Some will not get it, but most Americans by far will. Then, of course, 2 years later in 2019, there is a net tax cut of \$40.8 billion.

I wanted to make it clear that there is a net tax cut in this bill, according to Joint Tax. This is the distribution over 3 different years—2015, 2017, and 2019. That is information prepared by the Joint Committee on Tax. I want Americans to know there are tax cuts in this bill, and they are very significant.

Madam President, I yield the floor.

RECESS

The PRESIDING OFFICER. Under the previous order, the Senate stands in recess until 2:30 p.m.

Thereupon, the Senate, at 12:30 p.m., recessed until 2:30 p.m. and reassembled when called to order by the Presiding Officer (Mr. WEBB).

SERVICE MEMBERS HOME OWNERSHIP TAX ACT—Continued

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I have control of the Democratic block of time, and I yield 25 minutes to the good Senator from Rhode Island.

Mr. REED. Mr. President, I thank the chairman for yielding me the time and also thank him for his great effort on this legislation.

It is a profound privilege to have the opportunity to serve the people of Rhode Island and in that capacity to support the legislation before us. This effort has been decades in the making. Every year that passes without health insurance reform has made the task more difficult and, the need for reform, more essential.

Rhode Islanders have seen their health care costs double in just the last decade. In 2000, the average employer-sponsored family health insurance policy cost about \$6,700. In 2008, the same plan cost nearly \$12,700. Without reform, by 2016, that family will pay over \$24,000 in premiums, consuming 45 percent of their projected median income. Such a course is unsustainable by the families of Rhode Island.

Soaring health care costs are hurting family budgets, small businesses, and the national economy. In 1980, Americans spent \$253 billion on medical bills. Today, we are paying \$2.5 trillion on medical bills. That pressure is pushing Medicare toward collapse and 750,000 Americans into bankruptcy each year.

This legislation will help contain health costs, extend insurance to millions, and give health consumers more protection against discriminatory insurance practices. By shifting the balance of power from insurance companies to consumers, we will make health care more affordable for individuals and businesses and provide families

with greater health care access and stability.

This bill is fiscally responsible. It is fully paid for. We trimmed wasteful programmatic spending and imposed new fees on drugmakers, reined in entitlement spending, and imposed taxes on things such as tanning beds, which lead to health care costs. But we also provided every American family with greater health care stability and extended affordable health insurance to 30 million more of our fellow citizens.

The nonpartisan, independent Congressional Budget Office—the CBO—estimates this bill will reduce the deficit by \$132 billion over the next decade and \$1.2 trillion over the following 10 years.

We need urgent action. The delay tactics and the procedural obstacles employed by the other side are hurting our fellow citizens. Every day, 14,000 more Americans lose their health coverage, and every day we remain here delaying this measure, 14,000 more Americans will lose their coverage. We have to, I think, reverse that trend and begin to fix our broken health care system.

Since 1999, Rhode Island's uninsured population has nearly doubled, growing from 6.1 percent to 11.8 percent in 2008, and it has soared up to about 15 percent today in the wake of unprecedented economic issues. But while some of us have made this debate about trying to fix a broken health care system, others have made it clear their real intention was to use this issue to "break President Obama" and make health reform his "Waterloo." Partisanship must not come before providing access to life-saving health care to children, families, and seniors.

I also don't understand how some party loyalists who spent the past 8 years helping George W. Bush drive our economy into the ground and inflate the deficit to record levels are now obstructing every reasonable effort to fix these problems. How could they help George W. Bush double our national deficit, running it up more in 8 years than all 42 Presidents before him, and then turn around and claim President Obama isn't doing enough to control it?

How could they say this \$800 billion insurance reform bill—which is fully paid for and reduces costs to consumers—is too expensive, but the \$1.2 trillion prescription drug bill they passed—which was financed through deficit spending and amounted, in many respects, to a giveaway to drug companies—was somehow good policy?

How can they rail against health care reform right after overseeing the largest expansion of our government in decades? How will they change their approach when, through hard work, we do, in fact, extend coverage and reduce cost and begin to deal with the deficit that has to be dealt with in the years ahead?

Health insurance reform hasn't always been this partisan. Indeed, many Republicans have said they support a great deal of what is in this bill but, for whatever reason, they refuse to support it. Indeed, by my count, this bill increases competition, which Republicans said they wanted. Indeed, by my count, this bill lowers cost, which Republicans said they wanted. Indeed, by my count, this bill does not contain a public option. I regret that, but that is the position I think most of the Republicans—not all—supported. And, indeed, this bill provides Americans with tax credits to purchase insurance, which Republicans said they wanted.

So the bill we will pass seeks to tear down the inefficiencies in the current system, curb the cost, and reduce the waste and abuse Rhode Islanders and Americans experience every day.

It is our responsibility to enact meaningful health reform. Just saying no may be a powerful political weapon, but this country is built on hope and a better future, not fear.

Health insurance reform will offer Rhode Islanders access to stable and affordable health insurance coverage. Here are some of the changes that will happen immediately with the enactment of this bill:

Insurance coverage for the uninsured with preexisting conditions will be provided through a high-risk pool within 6 months of this bill being signed into law. In my State, one plan already acts as the insurer of last resort and provides coverage for those who have preexisting conditions. This bill will support their efforts. And, all insurers will be prevented from denying coverage to children immediately due to a preexisting condition.

There will be no lifetime limits on coverage for all new policies. This means no one will exhaust their coverage plan, no matter how sick they become.

There will be restrictions on annual limits for all new policies. Insurance companies will have more difficulty denying care in the middle of treatment.

All new policies sold will cover children up to the age of 26. This is particularly helpful since graduates from college often—particularly in this economy—have a hard time finding employment with health care benefits.

Insurers will no longer be able to rescind coverage upon illness—when treatments, checkups, screenings, and medication are absolutely critical.

Insurance companies will be required to cover—free of charge—preventive care for new policyholders.

Beginning next year, in 2011, small businesses will be eligible for a tax credit to purchase insurance for employees.

Then, in 2014, after allowing the States a time to design and develop and prepare themselves, our bill will extend affordable coverage to over 30

million uninsured Americans through a new health insurance exchange which promises to expand choice, increase competition, and rein in cost.

Rhode Islanders without a job will be able to purchase insurance on a newly established and government-regulated health insurance market. Many will receive Federal support for the purchase of coverage.

Rhode Islanders employed by a company that does not provide insurance—or inadequate insurance—will be able to purchase insurance on this new market exchange.

Small business owners will be able to easily compare the cost of insurance coverage offered by a multitude of plans through a new health insurance exchange, and it will allow small business owners to pick the coverage that fits the needs and budget of their employees.

Rhode Islanders on Medicare will no longer have to pay out of pocket for important preventive services and no longer spend portions of the year in the so-called doughnut hole without paid drug coverage.

Low-income adults, without children, will have access to Medicaid, which will provide them with insurance at reasonable costs.

Having access to health insurance is important. Individuals, employers, employees, and families will have access to new insurance options after reform, which is important. However, affordability—the amount a family has to pay—is also critically important.

We have examples of States that have already enacted insurance reform that covers their entire population, and what we found is, premiums have gone down significantly since this reform was enacted. We have learned a lot from their efforts, and Federal reform will improve upon those efforts for the rest of the country.

As I suggested before, the average premium for a Rhode Island family is \$12,700. If we don't do something, experts predict this premium will double in just 6 or 7 years. Rhode Islanders will be looking at health insurance bills—just the bills of annual premiums—of over \$25,000. Again, that is not sustainable. It will literally bankrupt the families of Rhode Island, and they will make a very difficult choice: paying this much money—which for many, if not most, is extraordinarily difficult—or not having insurance or doing other things, such as limiting the access their children have for college or not saving for their retirement. We can change that today by moving forward with this legislation.

The Congressional Budget Office has also analyzed the effect of this bill on the premiums that Rhode Islanders pay, and they expect premiums to decrease anywhere from 14 to 20 percent. CBO found these decreases will result from an influx of enrollees with below-average spending for health care.

One of the problems we have in the health care system today is, healthy, young people—unless they are offered health insurance through their employer—don't typically purchase it. They are the classic free riders. If they get hurt in an accident, they will go to the emergency room and be treated for free. They will not have paid into the system that cares for them. The whole principle of insurance is spreading risk across the largest population to reduce cost. That is precisely what we are doing. This is fundamental to any insurance program.

So this approach will actually lower the cost, as the CBO has reported. Additionally, the bill will provide permanent tax credits for Rhode Islanders to purchase insurance.

Depending on income, individual Rhode Islanders can expect a \$500 to \$3,000 break on their insurance costs because of these tax credits. Rhode Island families can expect to save much more—\$1,400 to \$8,500—on their insurance through these credits. Everyone should recognize the insurance reforms in this bill will mean people will get better coverage at lower costs.

The bill also mitigates the costs facing small businesses, which in my State accounts for 95 percent of all businesses. Every year, these business owners face increasing premiums of 15 to 20 percent. They do not have much choice. Two companies control 80 percent of the market in Rhode Island, and you either accept what is offered or you go without insurance. Every year, they see double-digit increases. Again, this is not sustainable, not only over the long term but over the next several years.

Starting a business and finding the right personnel is a challenging and expensive proposition. Innovation and entrepreneurship is risky. Often startup companies have difficulty hiring qualified individuals because the business owners can't face these increasing costs of health insurance. In Rhode Island, these kinds of pressures have led to the loss of employer-sponsored health care or reduction in premium assistance from employers.

What has happened over the last several years is, real wages have been flat because health care has been taking all the extra money that in other times would have gone to increased wages. As a result, if you are a middle-income American and you look around through all the struggle and all the work you are doing and you have this sense that you haven't made a lot of real progress in terms of additional wealth or additional money put aside, it is no wonder. You have been paying the indirect costs of an ineffective, inefficient health care system. The money is going into health care. The money is going into—in many respects—health care that is not efficient or effective and it is not going into the paycheck of working Americans.

The reforms set forth in the Patient Protection and Affordable Care Act will strengthen the employer-sponsored health insurance market. There has been some suggestion that this is going to create no opportunities or options for employers to continue to provide health insurance for their workers. But, according to the CBO, 83 percent of the privately insured Americans will be insured through their employers. That is a dramatic change, nearly double the total of Americans insured through their employer today.

What we are going to see is not a decrease in employer insurance but an increase. I think this is something that will match the best aspects of our economy—individual business men and women making judgments about what plan is best for them and providing that benefit in a cost-effective way to their employees. It will occur because of a few simple changes:

First, as I mentioned, small business owners will actually receive a tax credit to purchase insurance for employees, should they choose, beginning next year, 2011. I will repeat, small businesses will get a tax credit, a tax break which they are not getting now, to help provide insurance for their workers.

Second, individuals will have the option of finding affordable insurance on their own with increased competition to drive down costs, as more people shop effectively for health care insurance.

Third, there will be lower administrative overhead and greater simplification of insurance as a result of this legislation.

Under the proposal we are considering, premiums for small businesses will stop the never-ending trend of increase after increase and will begin to come down. Making health insurance more affordable for small business owners will help them by defraying their startup costs and ensuring individuals can seek employment regardless of the benefit options.

It will foster innovation and put companies in a situation where they have an edge over foreign competitors and can win in the global marketplace. American companies today are competing against nations around the globe that either have a national system, which does not directly affect their balance sheet in terms of health insurance costs, or they have no health insurance at all, and as a result, that is not on the balance sheet of these companies. Every one of our businesses is, in some way or another, competing against other countries that heavily subsidize their insurance, that provide an advantage, a competitive advantage. We want to in some small way diminish—in fact, in a large way at least begin to diminish that advantage.

While there have been many ill-founded claims about the reform package, the simple fact is that the tax

credits provided in this bill is the largest health tax credit bill that has ever been considered in Congress. Over \$400 billion in tax credits will be provided to Americans in order to increase affordability.

Since health insurance reform will provide Rhode Islanders access to affordable health coverage, our providers should no longer face the financial pressure from uncompensated care. Hospitals will care for patients with insurance, and doctors will be able to prescribe preventive measures to patients so they do not become ill. Today, it is estimated that of all the private insurance premiums we pay in Rhode Island, at least \$1,000 dollars of those premiums is to pay for uncompensated care in our hospitals, in our clinics throughout the State. When we have a significant number—95, 94-plus percent—of Rhode Islanders covered, those uncompensated costs won't be uncompensated. There will be an insurance program behind these individuals, so they can seek preventive care and they can pay for emergency care and pay for regular care.

Each one of the hospitals in my state is contributing in our efforts to insure more Americans and doing so with the knowledge that they can potentially benefit from the fact that people will not be showing up in their emergency rooms without insurance but will bring their insurance card, and the support their card ensures, to the emergency room.

In addition, the safety net providers throughout the country, our community health centers, will find great support in this legislation.

There will be direct improvements for physicians in Rhode Island. The looming 21 percent Medicare payment reduction will be eliminated, as it is impending. We will continue to look for permanent solutions, not only to this issue of Medicare payments but also a payment formula used to pay doctors in a more equitable and more appropriate way.

I am also pleased that we have taken steps to improve and enhance training of a new generation of primary care physicians who will be necessary to fill the increased demand. These improvements will help our overall efficiency.

This bill will also provide seniors with an improved Medicare Program. Nearly one-fifth of my State is on Medicare; over 180,000 Rhode Islanders rely on Medicare. Seniors have paid into Medicare during their lifetime. They deserve a program that will provide comprehensive coverage at the lowest cost without risk of coverage being terminated. However, that is not the Medicare coverage Rhode Islanders always receive today. Here is what Medicare does today. Medicare frequently allows the same test for the same complaint to be performed multiple times. This costs money, but it

doesn't necessarily improve patient care. Medicare leaves over 31,000 Rhode Islanders without prescription drug coverage for parts of the year. This costs them money. And Medicare today is on the path toward insolvency in just 8 short years, which will affect every senior in Rhode Island.

Instead of allowing Medicare to go bankrupt, the comprehensive health reform bill we are currently debating would extend Medicare solvency for at least 5 additional years. Some predict it will be extended for nearly a decade. This is important for seniors enrolled in the program today and those who will soon enroll in the program.

Solvency is extended by reforming the system. Seniors in my State will not have to make multiple trips to their doctors' offices for the same test for the same complaint because we will eliminate unnecessary duplication and tests and services. They will not fear being readmitted to a hospital after discharge because we will encourage care coordination after discharge. And they will not put off important preventive care because the out-of-pocket costs are just too great because the cost-sharing component for preventive care will be eliminated.

Many of my seniors are on the Medicare Advantage Program, which is a privatized version of traditional Medicare. Over 65,000 seniors in my State have elected to enroll in this option, and there has been an effort to characterize the changes to this program as undermining that program. The private insurance companies have been saying that for over a month now. Why? Because they profit very handsomely from Medicare Advantage. They spent months telling seniors health reform will take away their coverage. These claims are inaccurate.

We will eliminate excessive overpayments to private insurance companies. In my State, Medicare Advantage plans are paid over 20 percent more per beneficiary than traditional Medicare fee-for-service. This overpayment is particularly astounding given the fact that the Government Accountability Office found that 19 percent of Medicare Advantage beneficiaries pay more than traditional Medicare for home health care and 16 percent pay more for inpatient services. Seniors should be angry and upset at insurance companies, that they continue to profit from the Medicare system while simultaneously taking more money from seniors' pocketbooks as they charge extra for these services. This was not the intent of the program. In fact, the intent of the program—the argument the insurance companies made is: Give us the flexibility to manage Medicare patients, and we will lower costs. Very shortly after that, it became clear that they were not managing the costs that well.

Of course, the bill is going to target waste, fraud, and abuse. For every \$1

we spend in this effort—and you have to invest in this fraud detection—we expect to recover \$17.

Our efforts will improve health care of seniors and will stabilize Medicare.

Also, we should note that we will be doing significant amounts with respect to children. I particularly applaud Senator BOB CASEY's amendment to ensure that Rhode Islanders on Rite Care will not have to fear losing their safety net coverage.

Finally, it is important to note, as I mentioned before, that these reforms are paid for. This is a stark contrast to others. We voted on the Medicare prescription bill in 2003, which I opposed. It was unpaid for, and it was more costly than the amendment which was originally presented to us.

We voted on countless measures outside the normal process of budgeting to fund the wars in Iraq. We voted tax cut after tax cut for the wealthy, which has left my State not prosperous and wealthy but 13 percent of my State unemployed and 15 percent of my neighbors are uninsured.

We are moving forward to reduce the deficit with this bill, to provide valuable coverage, to ensure the promise of health care in the United States is fulfilled, not denied.

I yield the floor.

Mr. BAUCUS. Mr. President, pending a potential unanimous consent request by the two leaders, I now yield such time as the Senator from Massachusetts desires.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KIRK. I ask unanimous consent to speak as in morning business, the time to be counted postcloture.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. KIRK are printed in today's RECORD under "Morning Business.")

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. UDALL of Colorado). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that all postcloture time be considered expired on H.R. 3590 at 8 a.m., Thursday, December 24, if cloture is invoked, and that immediately the bill, as amended, be read a third time, and the Senate vote on passage; that after passage of H.R. 3590, as amended, the Senate then proceed to the immediate consideration of Calendar No. 245, H.R. 4314, an act to permit continued financing of government operations; that no amendments be in order; that the bill be read a third

time, and the Senate then proceed to vote on passage; that passage require an affirmative 60-vote threshold; and if that threshold is achieved, then the motion to reconsider be considered made and laid upon the table; further, that on Wednesday, January 20, 2010, at a time to be determined by the majority leader, following consultation with the Republican leader, the Finance Committee be discharged of H.J. Res. 45, increasing the statutory limit on the public debt and the Senate then proceed to the measure; that immediately after the joint resolution is reported, the majority leader or his designee be recognized to offer a substitute amendment and that the following be the only first-degree amendments in order to the joint resolution: Thune, TARP; Murkowski, endangerment EPA regs; Coburn, rescissions package; Sessions, spending caps; McConnell, relevant to any on the list; Reid, one relevant to any on the list; Reid, pay-go; Baucus, three relevant to any on the list; Conrad-Gregg, fiscal task force; that each of the listed amendments be subject to an affirmative 60-vote threshold and that if any achieve that threshold, then they be agreed to and the motion to reconsider be laid upon the table; that if they do not achieve the 60-vote threshold, then they be withdrawn; that upon disposition of all amendments, the substitute amendment, as amended, if amended, be agreed to, the joint resolution, as amended, be read a third time and the Senate then proceed to vote on passage; further, that passage also be subject to an affirmative 60-vote threshold; further, as in executive session, I ask unanimous consent that on Wednesday, January 20, 2010, after a period of morning business, the Senate proceed to executive session to consider Calendar No. 421, the nomination of Beverly Martin to be a U.S. circuit judge for the Eleventh Circuit; that there be 60 minutes of debate with respect to the nomination, with the time equally divided and controlled between Senators LEAHY and SESSIONS or their designees; that upon the use or yielding back of time, the Senate then proceed to vote on confirmation of the nomination; that upon confirmation, the motion to reconsider be considered made and laid upon the table, no further motions be in order, the President be immediately notified of the Senate's action, and the Senate then resume legislative session.

The PRESIDING OFFICER. Is there objection?

The Republican leader is recognized.

Mr. MCCONNELL. Mr. President, reserving the right to object, and I will not be objecting, I wish to make sure the Senate is aware of an understanding the majority leader and I have that the substitute amendment referred to in paragraph 1 will be limited to an actual amount when it is offered.

Mr. REID. That is right. And if there are any amendments here that pass, of course, they would automatically be part of it.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, reserving the right to object, I wish to inquire whether, under that consent request that is being propounded, secondary amendments would be in order to any of the first-degree amendments on that list.

Mr. REID. No.

Mr. BAUCUS. I do not object.

The PRESIDING OFFICER. Hearing no objection, without objection, it is so ordered.

The Republican leader is recognized.

THANKING SENATE PAGES MARTIN CHARBONEAU AND MIKHAILA FOGEL

Mr. MCCONNELL. Mr. President, I wish to recognize two young pages who are actually on the floor with us today. Martin Charboneau and Mikhaila Fogel are the pages who energetically volunteered to stay until the Senate adjourns and actually have sacrificed some of their Christmas vacation. Also, they both volunteered their service over the weekend before the Thanksgiving break.

We typically have seven pages at a time on each of the sides, the Democratic side and the Republican side, but both Martin and Mikhaila marvelously have worked hard and dutifully, on both sides of the floor—both the Democratic side and the Republican side—to make a 14-person job work with just two people.

One can imagine how hard a task it must be for just two individuals to prepare for the numerous speeches we have had over the course of the past week. I know Senator REID joins me in thanking them for their gracious and impeccable service to the Senate.

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

Mr. CONRAD. Mr. President, I wish to begin by recognizing the work on this legislation of Leader REID, Chairman BAUCUS, Chairman HARKIN, and Chairman DODD.

I believe, when the history of this bill is written, it will be recognized what a remarkable job of leadership Senator REID has provided, bringing together a disparate caucus around extraordinarily complex issues to accomplish something that will be seen in the future as a leap forward for America in reforming the health care system in this country.

Chairman BAUCUS—no one has made a deeper, more committed, personal sacrifice than Senator BAUCUS in advancing this legislation. His commitment to getting this bill done and getting it done right will stand the test of history.

Chairman HARKIN, who succeeded Chairman Kennedy, made major contributions on the wellness provisions.

Chairman DODD, who filled in for Chairman Kennedy and continued in the role of handling this legislation, even while being chairman of the Banking Committee, provided an example of legislative leadership that is unmatched.

The four of them have done a superb job in putting together the pieces of the bill that I believe will lead the way to a dramatically improved health care system in our country.

If we reflect, objectively, on the package before us, it is an entirely reasonable and responsible approach. There is no government takeover of health care, no rationing, no cuts to guaranteed Medicare benefits, no benefits for illegal immigrants, and the bill sets a goal of no taxpayer funding for abortion beyond the Hyde amendment provisions in current law.

In fact, this bill does much of what Republicans said they want in a health care plan. It is fully paid for, and it reduces deficits in both the short and the long term. It expands coverage and provides assistance to help families and small businesses afford health insurance. It sets new rules to stop insurance company abuses. It reforms the delivery system to control costs and improve quality. It allows for the sale of insurance across State lines. It supports medical malpractice reforms.

Those are facts. Every one of those elements is in this bill. This is an approach that Senators on both sides of the aisle, who want solutions rather than slogans, should embrace.

The need to act is clear. The status quo is simply unsustainable. Health care costs are crushing families, businesses, and even the government. The premiums for individuals and families are rising three times as fast as wages. You can see where we are headed. It is as clear as it can be.

Without action, families will see average health care premiums rise to \$22,000 a family by 2019—\$22,000, on average, for family health care premiums in 2019, unless we act.

It does not stop there. Premiums, as I have indicated, are skyrocketing, and national health care costs are skyrocketing right along with them. Without action, total health care spending will equal 38 percent of the gross domestic product of the country by 2050. Thirty-eight percent of the gross domestic product for health care? That would be one in every two and half dollars in this economy. Already, we are consuming one in every six in this economy on health care, and that is an unsustainable course. These costs are driving our long-term fiscal imbalances, threatening our future economic prosperity.

Without action, Federal spending on Medicare and Medicaid will reach 12.7 percent of GDP by 2050. This chart I have in the Chamber makes it very clear. In 1980, the two programs were

consuming 2 percent of gross domestic product, but on the current trend line, by 2050, these two—Medicare and Medicaid—will consume more than 12 percent of our GDP—one in every eight dollars in our economy.

The growth in health care costs threatens to bankrupt Medicare. Medicare went cash negative last year. Without action, Medicare will be bankrupt in 2017. The trustees have just told us that will happen. That is 2 years earlier than forecast just last year. Again, Medicare went cash negative already. That means more money is going out than is coming in, in the Medicare accounts, and it will be insolvent—broke—in 8 years. This legislation extends its life by 9 years.

These health care costs are hurting our competitive position in the world. We are spending far more than other countries on health care, leaving less money for research and development, investment, and higher wages for Americans. In fact, as a percentage of our gross domestic product, we spend twice as much as most other advanced countries.

Here it is, as shown on this chart. We are now even higher than 16 percent of our GDP. The latest numbers indicate we have gone to 17 percent of our GDP for health care. That is one in every six dollars. Look at other countries. Japan and the United Kingdom are half as much; Belgium, Germany, Switzerland, France, a little over half as much as we are paying.

But even with the fact that we are spending more, we are actually performing worse on virtually every metric on health care outcomes. We are ranked 19th in preventable deaths, 22nd in infant mortality, 24th in life expectancy; and we still leave 46 million people without insurance.

Continuing the status quo is not an option. America can do better, and this bill proves it. The bill before us is fiscally responsible. The nonpartisan Congressional Budget Office—the official scorekeeper, relied on by both sides of the aisle—tells us the bill reduces the deficit by \$130 billion over the first 10 years.

Now, those aren't my numbers, those aren't the numbers of the chairman of the Finance Committee, those aren't the Democratic leader's numbers. Those are the numbers of the nonpartisan Congressional Budget Office. They say this bill will reduce the deficit by \$130 billion over the first 10 years.

The savings in the following decade are even more impressive: between \$650 billion and \$1.3 trillion. The Congressional Budget Office says:

All told, CBO expects that the legislation, if enacted, would reduce Federal budget deficits over the decade after 2019 relative to those projected under current law—with a total effect during that decade that is in a broad range between one-quarter percent and one-half percent of gross domestic product.

One-quarter and one-half percent of GDP for that second 10 years is \$650 billion to \$1.3 trillion. Shame on those who get up on the other side and say this is going to increase the deficit. Where is their evidence, other than claims, other than assertions? We are talking about the considered judgment of the Congressional Budget Office that is nonpartisan and is the official scorekeeper for the Congress of the United States.

The bill bends the cost curve for the Federal commitment to health care in the long term. In its December 19 estimate, CBO reports that the proposal would generate a reduction in the Federal budgetary commitment to health care during the decade following the 10-year budget window. So, yes, it bends the cost curve for the Federal expenditure during that period.

This legislation also reforms the insurance market. We have all heard the horror stories. I have loads of letters in my office from constituents telling me about what has happened to them: being dropped because they got sick, even after paying years of premiums; being denied coverage because of pre-existing conditions, in many cases pre-existing conditions that had nothing to do with the illness for which they now need assistance; and being denied even though they have paid the premiums. This is serious business.

This bill puts a stop to these abuses. It prohibits insurers from denying coverage for preexisting conditions on new policies. It prohibits insurers from rescinding coverage when people become sick after they have paid premiums for years on new plans. It bans insurers from lifetime caps and annual limits on health care benefits, and it prevents insurers from charging more based on health status.

It also expands choice and competition. The bill before us builds on our current market-based system and makes it better. It is not government-run health care. Instead, it embraces choice and competition. It sets up a new health exchange where consumers can shop for the best value. It creates consumer-run, co-op health plans not government-run plans but plans run by the members. It allows for insurance sales across State lines to further increase competition.

The managers' amendment also creates a new national plan. The Office of Personnel Management, the same agency that currently oversees health plans for all Federal employees, including Members of Congress, would select private health insurance carriers to offer plans that would be available nationwide. These plans would provide new competition for State-based health plans, particularly in areas where just one or two insurers currently dominate the market. At least one multistate plan would have to be a not-for-profit

insurer, such as one of the newly created co-ops. I am particularly excited by this development.

When we look around the world at the countries with the best outcomes and the lowest cost, one feature stands out: these countries rely on primarily not-for-profit insurance. Germany, France, Switzerland, Belgium, Japan, all have adopted this model. They don't have government-run health care, but they do have universal coverage. They do have extremely high-quality health care outcomes and much lower costs than we do. So I believe the not-for-profit national plans and the co-op option may, in the long run, play a key role in transforming our system into a more efficient, higher quality system.

This legislation also expands coverage. According to the Congressional Budget Office, it covers 94 percent of the American people. It creates State-based exchanges for individuals and small businesses. It provides \$476 billion in tax credits to help working Americans and small businesses buy coverage. You don't hear that much from the other side about this \$467 billion of tax assistance for people to afford better health care coverage. It also reforms the delivery system to focus on quality and not quantity. The bill before us slows cost growth while improving quality. The sad fact is that 30 percent of current health care spending does nothing to improve health care outcomes. We are wasting about \$750 billion a year on unnecessary and counterproductive procedures. Again, that is not a congressional estimate; that comes from a Dartmouth nationwide survey that concluded 30 percent of health care expenditure in this country is wasted. This bill reforms the delivery system in a fundamental way. It contains every delivery system reform health care experts believe is needed to provide better care while slowing cost growth.

This proposal also extends the solvency of Medicare. Medicare's actuary says the Senate bill extends the life of Medicare by 9 years. Some on the other side say that because Medicare is heading toward insolvency, we can't have Medicare savings. What? What are they talking about?

Perhaps the oddest thing I have seen in this debate is the contrast with the last year of the Bush administration. The previous administration sent up a proposal to have nearly \$500 billion in savings under Medicare, and we didn't hear one peep from the other side, not one. In fact, they all said it was critically important to do. Now all of a sudden it is the death of Medicare.

What is even more bizarre about their argument is that now there is an offset for the savings from Medicare providers. The offset is they are going to get 30 million new customers, 30 million Americans who haven't had insurance who will now have it so their un-

compensated care costs will go down, making it more affordable for providers to provide these savings.

Most of these savings have been negotiated with providers. Why have they been willing to agree to savings—hospitals, nursing homes, and home health care? It is because they know they are going to get substantially expanded business—30 million customers with insurance who previously did not.

This is important legislation. These Medicare reforms don't hurt seniors. Some on the other side have said you can't reduce the growth in Medicare costs without taking benefits away from seniors. That is just scare tactics. The Medicare savings provisions lower cost growth without harming beneficiaries.

This legislation also helps my State. I am proud to say it. Some have said the Medicare changes will hurt North Dakota providers. Clearly, they haven't read the bill. Right now, we get paid way below the average for Medicare reimbursement. In fact, we are the second or third lowest State in the country in Medicare reimbursement. North Dakota providers get \$5,000 a year per Medicare beneficiary.

In Miami, they get three times as much, more than \$16,000 a year to take care of seniors there. Now I would be the first to say it may cost more to provide medicine in Miami than it does in Minot, but it doesn't cost three times as much. The fact is, moving to a system that is based on outcomes rather than procedures will benefit, not hurt, a State such as North Dakota.

In addition, this legislation includes the frontier States provision that Senator DORGAN and I offered as an amendment. Our provision puts a floor under payments to North Dakota providers and in other States like ours that are rural States that have not received fair levels of reimbursement. It will mean an additional \$66 million a year in Medicare payments to my State.

Overall, this bill is a win for North Dakota, a win for the Nation. It reduces the deficit, it controls costs, it saves Medicare—or at least extends its life for at least 9 years—it embraces choice for American consumers and competition and expands coverage. It reforms the insurance industry, and it rewards quality and efficiency.

This legislation is an excellent start. I urge my colleagues to allow it to continue because we all know this isn't the last step. Next we go to the conference committee where we will have a chance to write the final legislation. No doubt this bill will be further improved as it has been at every step of the process.

Again, let me conclude as I began by thanking the leadership who has made this bill a possibility: Senator REID, who has done a remarkable job of bringing people together; Senator BAUCUS, who has spent more than a year

and a half in as dedicated an effort as I have ever seen by a committee chairman in this body to bring major legislation to conclusion; Senator DODD, who filled in for Senator Kennedy on a pinch hit basis but worked so hard to produce a result in that committee; and Senator HARKIN, the new chairman of the committee, for all of his assistance in getting the job done.

When the history of this legislation is written, those four will be recognized as producing something that was critically important for this country. We should salute them.

I thank the Chair and yield the floor.

Mr. BAUCUS. Mr. President, I very much thank my good friend from North Dakota for his generous statements. As he knows, this is all teamwork. We are all in this together, all Senators, especially on this side of the aisle, with the President, to get health care reform finally passed for all Americans. Teddy Roosevelt started this many years ago, and many Presidents since have been unable to get health care reform passed. I think finally this time we are going to do it, and it is a moment of which we are all very proud.

Mr. President, I yield the remainder of my time to the Senator from Washington. I don't know how much that is, but whatever it is, it is all hers.

The PRESIDING OFFICER. The Senator from Montana has 7½ minutes remaining.

The Senator from Washington is recognized.

Mrs. MURRAY. Mr. President, I thank my colleague from Montana, the chairman of the Finance Committee, who, I remember, months ago, with a smile on his face, said we can get this done. We are on the verge, and we owe him a huge debt of gratitude. So I thank the Senator very much.

As this debate now moves forward, it has become apparent that some of our colleagues are losing sight of what we are working on. What should be a robust debate about a critical issue that is facing all of our families and businesses is being bogged down by distractions and political gimmicks and obstructions and a lot of delay while American families watch and wait and wonder where they exactly fit into this conversation. So I want to be clear with my colleagues and with Americans across the country today: This bill is about you. It is about your loved ones. It is about the people just like you across the country to bring down your premiums, expand your options, and increase your stability.

It is about helping our economy and creating jobs by reducing the drag that has been created by the skyrocketing premiums and unlocking the potential for new health care careers. It is about supporting the doctors and the nurses, the hospitals and the clinics that work every day to take care of you. It is about helping you or your father or

your mother, your grandfather or your grandmother, by increasing benefits, cutting waste, and strengthening the Medicare on which you depend. And it is about Katerina.

Katerina is a woman from Redmond, WA, and she is one of my more than 10,000 constituents from my home State who have sent me their stories about their experiences with our broken health care system. Katerina is a single mom. She has a good education, she told me, and she has a good job and a solid middle-class lifestyle. But like a lot of Americans this year, struggling in the toughest economy since the Great Depression, she was laid off from her job, and she lost her employer-provided health care. She was able to scrape enough money together to pay for COBRA coverage, but she told me she didn't dare go to the doctor because she knew she wouldn't be able to afford the copays. So though she was technically covered right now, in practice, neither she nor her child have access to true health care or preventive services. She found that living that way had some real consequences.

Last month she told me she got an eye infection and eventually had to go to the doctor for treatment. She said after all of her out-of-pocket costs and still with no job and no income, she had to make some very serious and very tough choices about her family's food and clothing budget. Who knows what would have happened if Katerina or her child got seriously ill.

Our broken health insurance system is failing Katerina, and she is not alone. Millions of people have lost jobs in this current recession.

Millions of families have been tossed out of their employers' plans—families who had health care, who felt secure, all of a sudden understand how broken the system really is and how few options they actually have today for affordable care. That is why we need health insurance reform for Katerina and millions of Americans in similar situations and the hundreds of millions of Americans who may switch jobs or move or start small businesses or who just want more options for high-quality affordable health care.

Mr. President, let me talk for a minute about how this bill will specifically help Katerina and many others. Our plan sets up a market where people can shop for and purchase insurance, where insurance companies would have to compete for your business, and where people such as Katerina would be able to choose a plan that fits her family best from among a range of options in an open marketplace.

It would inject competition into the insurance market, it will lower costs, and it will give families, such as Katerina's, more choices. That means instead of just having one choice when she is laid off, which was to purchase high-priced COBRA, Katerina will be

able to compare the price and performance of plans and make a decision for her family with the benefit of true options.

That will increase stability and keep insurance companies accountable. Never again will insurance companies be able to drop a family's plan simply because somebody got sick. No longer will losing your job mean losing access to affordable coverage, and no longer will people such as Katerina have to choose between food, clothing, and health care for herself and her child.

It will also keep families secure by ensuring that all insurance plans offer an adequate level of coverage, including free preventive care that will keep them healthy and ensure that minor, inexpensive medical issues can be treated before they become major, expensive medical problems.

Our plan will increase options, enhance security and stability, and it will reduce costs for people such as Katerina by providing credits and premium assistance. So families will no longer have to worry about their coverage if they lose a job, switch jobs, move, or get sick.

Mr. President, that is what this plan is about. It is about Katerina, it is about her child, and it is about the millions of Americans in similar situations.

If the status quo wins out, things will only get worse. If some of my colleagues continue to play politics with this issue, Katerina will continue to struggle.

If we continue to have delay and distraction and obstruction, families will pay more for less, they will lose coverage, and they will be denied treatment and continue to have to fight insurance company redtape to get the care they deserve.

That is what this is all about. I am going to continue to stand up and tell the stories of families and small business owners from Washington because they are counting on us to fix this broken system. I urge my colleagues to focus on their States' families and join with us to pass true health insurance reform.

Before I yield, I want to take this opportunity to make an additional point. As everybody knows, we have been working incredibly demanding schedules in recent weeks. Senators have seen this floor at every conceivable hour—late at night, early in the morning, in the face of a blizzard. Far too frequently, we forget that every time we are here, there are literally hundreds of staff forced to be here along with us. In fact, they are often here long before we arrive and long after we leave. This body could not function without the tireless dedication of these men and women.

Many of them are here now: the clerks, Parliamentarians, cloakroom staff, doorkeepers, Capitol Police offi-

cers, and the maintenance workers. They work very long hours, nights, mornings, and weekends—with no regard to a government closure, dangerous snowstorms, or the need to complete their holiday shopping. If we are here, they are here. They deserve our thanks.

I want to express my gratitude to every one of them and to my own staff as well. It hasn't been an easy time. You should all know we are deeply appreciative of your service.

I, for one, am strongly supportive of bringing this debate to a close so that each one of you can be home with your families enjoying some well-deserved time off for the holidays.

I yield the floor.

FURTHER CHANGES TO S. CON. RES. 13 PURSUANT

Mr. CONRAD. Mr. President, section 301(a) of S. Con. Res. 13, the 2010 budget resolution, permits the chairman of the Senate Budget Committee to adjust the allocations of a committee or committees, aggregates, and other appropriate levels and limits in the resolution, and make adjustments to the pay-as-you-go scorecard, for legislation that is deficit-neutral over 11 years, reduces excess cost growth in health care spending, is fiscally responsible over the long term, and fulfills at least one of eight other conditions listed in the reserve fund.

I have already made two adjustments pursuant to section 301(a). The first adjustment was on November 21, for S.A. 2786, the Patient Protection and Affordable Care Act, an amendment in the nature of a substitute to H.R. 3590. The second adjustment was on December 1, for S.A. 2791, an amendment to S.A. 2786 to clarify provisions relating to first dollar coverage for preventive services for women.

The Senate today adopted S.A. 3276, an amendment to S.A. 2786 to improve the bill. I find that in conjunction with S.A. 2786, as modified, that this amendment also satisfies the conditions of the deficit-neutral reserve fund to transform and modernize American's health care system. Therefore, pursuant to section 301(a), I am further revising the aggregates in the 2010 budget resolution, as well as the allocation to the Senate Finance Committee. Along with those adjustments, I have also adjusted the aggregates and committee allocation to reflect changes to the original score of S.A. 2786 as a result of a provision included in H.R. 3326, the Department of Defense Appropriations Act, 2010. That provision uses savings also counted in the score of S.A. 2786. In total, as a result of Congress clearing H.R. 3326 on December 19, the amount of savings in S.A. 2786 is \$1 billion lower over the 2010–2014 period.

I ask unanimous consent to have printed in the RECORD the following revisions to S. Con. Res. 13.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 2010—S. CON. RES. 13; FURTHER REVISIONS TO THE CONFERENCE AGREEMENT PURSUANT TO SECTION 301(a) DEFICIT-NEUTRAL RESERVE FUND TO TRANSFORM AND MODERNIZE AMERICA'S HEALTH CARE SYSTEM

(In billions of dollars)

Section 101	
(1)(A) Federal Revenues:	
FY 2009	1,532.579
FY 2010	1,614.258
FY 2011	1,936.811
FY 2012	2,140.785
FY 2013	2,321.087
FY 2014	2,563.018
(1)(B) Change in Federal Revenues:	
FY 2009	0.008
FY 2010	-51.728
FY 2011	-151.820
FY 2012	-219.608
FY 2013	-194.250
FY 2014	-70.640
(2) New Budget Authority:	
FY 2009	3,675.736
FY 2010	2,905.487
FY 2011	2,845.236
FY 2012	2,835.568
FY 2013	2,988.308
FY 2014	3,206.647
(3) Budget Outlays:	
FY 2009	3,358.952
FY 2010	3,017.021
FY 2011	2,965.551
FY 2012	2,867.235
FY 2013	2,993.112
FY 2014	3,184.357

CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 2010—S. CON. RES. 13; FURTHER REVISIONS TO THE CONFERENCE AGREEMENT PURSUANT TO SECTION 301(a) DEFICIT-NEUTRAL RESERVE FUND TO TRANSFORM AND MODERNIZE AMERICA'S HEALTH CARE SYSTEM

(In millions of dollars)

Current Allocation to Senate Finance Committee:	
FY 2009 Budget Authority	1,178,757
FY 2009 Outlays	1,166,970
FY 2010 Budget Authority	1,249,836
FY 2010 Outlays	1,249,342
FY 2010–2014 Budget Authority	6,824,817
FY 2010–2014 Outlays	6,818,925
Adjustments:	
FY 2009 Budget Authority	0
FY 2009 Outlays	0
FY 2010 Budget Authority	-5,220
FY 2010 Outlays	-6,670
FY 2010–2014 Budget Authority	20,950
FY 2010–2014 Outlays	3,720
Revised Allocation to Senate Finance Committee:	
FY 2009 Budget Authority	1,178,757
FY 2009 Outlays	1,166,970
FY 2010 Budget Authority	1,244,616
FY 2010 Outlays	1,242,672
FY 2010–2014 Budget Authority	6,845,767
FY 2010–2014 Outlays	6,822,645

Mr. LEAHY. Mr. President, the urgent need for comprehensive reform of our health care system has not stopped opponents from launching spurious attacks. I understand that the junior Senator from Nevada recently raised a constitutional point of order against the pending health care reform bill. As chairman of the Senate Judiciary Committee, I would like to respond to those who have called into question whether Congress has the authority under the Constitution to enact health insurance reform legislation. The authority of

Congress to act is well-established by the text and the spirit of the Constitution, by the long-standing precedent established by our courts, by prior acts of Congress and by the history of American democracy. The legislative history of this important measure should leave no doubt with respect to the constitutionality of our actions.

The Constitution of the United States begins with a preamble that sets forth the purposes for which "We the People of the United States" ordained and established it. Among the six purposes set forth by the Founders was that the Constitution was established to "promote the general Welfare." It is hard to imagine an issue more fundamental to the general welfare of all Americans than their health.

The authority and responsibility for taking actions to further this purpose is vested in Congress by article I of the Constitution. In particular article I, section 8, sets forth several of the core powers of Congress, including the "general welfare clause," the "commerce clause" and the "necessary and proper clause." These clauses form the basis for Congress's power, and include authority to reform health care by containing spiraling costs and ensuring its availability for all Americans. The necessary and proper clause of the Constitution provides that "The Congress shall have Power . . . To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States or in any Department or Officer thereof."

Any serious questions about congressional power to take comprehensive action to build and secure the social safety net have been settled over the past century. According to article I, section 8, "The Congress shall have Power To lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defense and general Welfare of the United States." This clause has been the basis for actions by Congress to provide for Americans' social and economic security by passing Social Security, Medicare and Medicaid. Those landmark laws provide the well-established foundation on which Congress builds today by seeking to provide all Americans with access to quality, affordable health care.

The Supreme Court settled the debate on the constitutionality of Social Security more than 70 years ago in three 1937 decisions. In one of those decisions, *Helvering v. Davis*, Justice Cardozo wrote that the discretion to determine whether a matter impacts the general welfare "is not confided in the courts" but falls "within the wide range of discretion permitted to the Congress." Turning then to the "nation-wide calamity that began in 1929" of unemployment spreading from State to State throughout the Nation, leav-

ing older Americans without jobs and security, Justice Cardozo wrote of the Social Security Act: "The hope behind this statute is to save men and women from the rigors of the poor house as well as from the haunting fear that such a lot awaits them when journey's end is near."

The Supreme Court reached its decisions upholding Social Security after the first Justice Roberts—Justice Owen Roberts—in the exercise of good judgment and judicial restraint began voting to uphold the key New Deal legislation. He was not alone. It was Chief Justice Hughes who wrote the Supreme Court's opinion in *West Coast Hotel v. Parrish* upholding minimum wage requirements as reasonable regulation. The Supreme Court also upheld a Federal farm bankruptcy law, railroad labor legislation, a regulatory tax on firearms and the Wagner Act on labor relations in *National Labor Relations Board v. Jones & Laughlin Steel Corporation*. The Supreme Court abandoned its judicially created veto over congressional action with which it disagreed on policy grounds and rightfully deferred to Congress's constitutional authority.

Congress has woven America's social safety net over the last three score and 12 years. Congress's authority to use its power and its judgment to promote the general welfare cannot now be in doubt. America and all Americans are the better for it. Growing old no longer means growing poor. Being older or poor no longer means being without medical care. These developments are all due to congressional action.

These Supreme Court decisions and the principles underlying them are not in question. As dean Erwin Chemerinsky of the University of California Irvine School of Law wrote in a recent op-ed in *The Los Angeles Times*: "Congress has broad power to tax and spend for the general welfare. In the last 70 years, no federal taxing or spending program has been declared to exceed the scope of Congress' power. The ability in particular of Congress to tax people to spend money for health coverage has been long established with programs such as Medicare and Medicaid." I will ask that this article be printed in the RECORD following my remarks.

The right-wing opponents of health care reform are so intent on partisan warfare that they are even calling into question the constitutionality of America's established social safety net. They would leave American workers without the protections their lifetime of hard work have earned them. They would turn back the clock to the hardships of the Great Depression, and thrust modern American back into the conditions of Dickens' novels. That is what some extremists will be urging another Justice Roberts—Chief Justice John Roberts—to do. That path should

be rejected now, just as it was when another inspiring President led the effort to confront the economic challenges facing Americans. To strike down principles that have been settled for nearly three quarters of a century would be wrong and damaging to the Nation.

For months now, we have been debating whether or not to pass health care reform. We can debate whether to control costs by having all Americans be covered by health insurance. In fact, we have been having that debate for months and months in this Congress, through extensive public markups in two committees in the Senate, as well as in the House of Representatives, and now for weeks on the Senate floor. We have considered untold numbers of amendments in committees and several before the Senate. That is what Congress is supposed to do. We consider legislation, debate it, vote on it and act in our best collective judgment to promote the general welfare. Some Senators will agree and some will disagree, but it is a matter for the full Senate to decide. I wish we could do so by a majority but Senate Republicans abhor majority rule now that they are not in control. So it will take an extraordinary majority for the Senate's will to be done.

Tomorrow, we will vote on a point of order challenging the pending bill's constitutionality. The fact that Senate Republicans disagree with the majority's effort to help hardworking Americans obtain access to affordable health care does not make it unconstitutional. As Justice Cardozo wrote in upholding Social Security, "whether wisdom or unwisdom resides in the scheme of benefits set forth . . . it is not for us to say. The answer to such inquiries must come from Congress, not the courts." I agree. Justice Cardozo understood the separation of powers enshrined in the Constitution and the Supreme Court's precedent. In 1803, our greatest Chief Justice, John Marshall, upheld the constitutionality of the Judiciary Act in *Stuart v. Laird* noted that "there are no words in the Constitution to prohibit or restrain the exercise of legislation power." That is true here, where Congress is acting to provide for the general welfare of all Americans.

I believe that Congress can and should decide whether the problems of the lack of availability and affordability of health care, and the rising health care costs that burden the American people, is a problem, "plainly national in area and dimensions," as Justice Cardozo wrote of the widespread crisis of unemployment and insecurity during the Great Depression. I believe that it is right for this Congress to determine that it is in the general welfare of the Nation to ensure that all Americans have access to affordable quality health care. But whether other Senators agree or dis-

agree with me, none should argue that we should take steps that turn back to clock to the Great Depression when conservative activist judges prevented Congress from exercising its powers to make that determination. As Chief Justice Marshall wrote in his landmark decision in *McCulloch v. Maryland*: "Let the end be legitimate, let it be within the scope of the Constitution, and all means which are appropriate, which are plainly adopted to that end, which are not prohibited, but consistent with the letter and spirit of the Constitution, are constitutional."

In seeking to discredit health care reform, the other side relies on a resurrection of long-discredited legal doctrines used by courts a century ago to tie Congress's hands by substituting their own views of property to strike down laws such as those guaranteeing a minimum wage and outlawing child labor. They have to rely on such cases of unbridled conservative judicial activism as *Lochner v. New York*, *Shechter Poultry Corporation v. United States*, *Reagan v. Farmers Loan and Trust* and the infamous *Dred Scott* case. Those dark days are long gone and better left behind. The Constitution, Supreme Court precedent, our history and congressional action all stand on the side of Congress's authority to enact health care legislation including health insurance reform.

Under article I, section 8, Congress has the power "to regulate Commerce with foreign Nations, and among the several States." Since at least the time of the Great Depression and the New Deal, Congress has been understood and acknowledged by the Supreme Court to have power pursuant to the commerce clause to regulate matters with a substantial effect on interstate commerce. The Supreme Court has long since upheld laws like the Fair Labor Standards Act against commerce clause challenges, ruling that Congress had the authority to outlaw child labor. The days when women and children could not be protected, when the public could not be protected from sick chickens infecting them, when farmers could not be protected and when any regulation that did not guarantee profits to corporations are long past. The reach of Congress's commerce clause authority has been long established and well settled.

Even recent decisions by a Supreme Court dominated by Republican-appointed justices have affirmed this rule of law. In 2005, the Supreme Court ruled in *Gonzales v. Raich* that Congress had the power under the commerce clause to prohibit the use of medical marijuana even though it was grown and consumed at home, because of its impact on the national market for marijuana. Surely if that law passes constitutional muster, Congress's actions to regulate the health care market that makes up one-

sixth of the American economy meets the test of substantially affecting commerce. Conservatives cannot have it both ways. They cannot ignore the settled meaning of the Constitution as well as the authority of the American people's elected representatives in Congress.

The regulation of health insurance clearly meets the test from *Raich*, whether the activities "taken in the aggregate, substantially affect interstate commerce." Addressing these problems is at the core of Congress's powers under the commerce clause. In fact, the Supreme Court expressly addressed this issue 65 years ago, ruling in 1944 that insurance was interstate commerce and subject to Federal regulation. Congress responded to this decision in 1945 with the McCarran-Ferguson Act, which gave insurance companies an exemption from antitrust laws unless Federal regulation was made explicit under Federal law. It is the immunity from Federal antitrust law enacted in McCarran-Ferguson that I have been working to overcome with my Health Insurance Industry Antitrust Enforcement Act of 2009 and the amendment I have sought to offer to the current health insurance reform legislation. Why would this exemption have been necessary if insurance was not interstate commerce? I strongly believe that the exemption in McCarran-Ferguson is wrongheaded but would anyone seriously contend that it is unconstitutional? Of course not. That is why I am working so hard to pass legislation to repeal it.

The legislation and amendment I have sponsored will prohibit the most egregious anticompetitive conduct—price fixing, bid rigging and market allocations—conduct that harms consumers, raises health care costs, and for which there is no justification. Subjecting health and medical malpractice insurance providers to the Federal antitrust laws will enable customers to feel confident that the price they are being quoted is the product of a fair marketplace. The lack of affordable health insurance plagues families throughout our country, and my amendment would take a step toward ensuring competition among health insurers and medical malpractice insurers. The need for Congress to repeal the out of date Federal antitrust law exemption only further demonstrates the tremendous impact of health care on our economy and congressional power to act.

The third clause of article I, section 8, to which I have referred, is the necessary and proper clause, as a basis for congressional action. This clause gives Congress the power "to make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers and all other Powers vested by this Constitution in the United States." The Supreme Court settled

the meaning of the necessary and proper clause 190 years ago in Justice Marshall landmark decision in *McCullough v. Maryland*, during the dispute over the National Bank. Justice Marshall wrote that “the clause is placed among the powers of Congress, not among the limitations on those powers.” The necessary and proper clause goes hand in hand with the commerce clause to ensure congressional authority to regulate activity with a significant economic impact.

We face a health care crisis, with millions of Americans uninsured and with uncertainty and high costs for Americans who are insured. We need to ensure that Americans not risk bankruptcy and disaster with every illness. Americans who work hard their whole life should not be robbed of their family's security because health care is too expensive. During the New Deal we charted a path for America where growing old did not mean being poor, or being without health care. Americans should not lose their life savings because they have the misfortune of losing a job or getting sick. That is not America.

The success of the last century was the establishment of a social safety net for which all Americans can be grateful and proud. Through Social Security, Medicare and Medicaid, Congress established some of the cornerstones of American security. They are within the constitutional authority of the Congress just as health insurance reform is. No conservative activist court should overstep the judiciary's role by seeking to turn back the clock and deny a century of progress. The authority of Congress is well settled and well established by the Constitution, judicial precedent, and our history of legislation promoting the general welfare and protecting the economic security and health of Americans.

The cumulative economic effects on the Nation of the rising costs of health care are significant, with those costs making up a large percentage of our economy and with American businesses struggling to provide benefits to their employees. As set forth in a paper by Georgetown University and the O'Neill Institute for National and Global Health Law, the requirement for individuals to purchase health insurance would address the problem of free riders, millions of Americans who refuse to buy health insurance and then rely on expensive emergency health care when faced with medical problems. This shifts the costs of their health care to people who do have insurance, which in turn has a significant effect on the costs of insurance premiums for covered Americans and on the economy as a whole. A requirement that all Americans have health insurance—like requirements to be vaccinated or to have car insurance or to register for the draft or to pay taxes—is within

congressional power if Congress determines it to be essential to controlling spiraling health care costs. Requiring that all Americans have health insurance coverage, and preventing some from depending on expensive emergency services in place of regular health care, can and will help reduce the cost of health insurance premiums for those who already have insurance.

Whether Senators agree or not on the necessity to reform our health care system and health insurance, I trust that all Senators, Republican, Democratic and Independent, agree that it is our responsibility to act and within Congress's constitutional authority to legislate for the general welfare of all Americans.

Mr. President, I ask unanimous consent to have printed in the RECORD the Los Angeles Times op-ed to which I referred.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, Oct. 6, 2009]

THE CONSTITUTIONALITY OF HEALTHCARE
(By Erwin Chemerinsky)

Are the healthcare bills pending in the House and Senate unconstitutional?

That's what some of the bills' critics have alleged. Their argument focuses on the fact that most of the major proposals would require all Americans to obtain healthcare coverage or pay a tax if they don't. Those too poor to afford insurance would have their health coverage provided by the state.

Although the desirability of this approach can be debated, it unquestionably would be constitutional.

Those who claim otherwise make two arguments. First, they say the requirement is beyond the scope of Congress' powers. And second, they say that people have a right to be uninsured and that requiring them to buy health insurance violates individual liberty. Neither argument has the slightest merit from a constitutional perspective.

Congress has broad power to tax and spend for the general welfare. In the last 70 years, no federal taxing or spending program has been declared to exceed the scope of Congress' power. The ability in particular of Congress to tax people to spend money for health coverage has been long established with programs such as Medicare and Medicaid.

Congress has every right to create either a broad new tax to pay for a national healthcare program or to impose a tax only on those who have no health insurance.

The reality is that virtually everyone will, at some point, need medical care. And, if a person has certain kinds of communicable diseases, the government will insist that he or she be treated whether they are insured or not. A tax on the uninsured is a way of paying for the costs of their likely future medical care.

Another basis for the power of Congress to impose a health insurance mandate is that the legislature is charged with regulating commerce among the states. The Supreme Court has held that this means Congress has the ability to regulate activities that have a substantial effect on interstate commerce. A few years ago, for example, the court held that Congress could prohibit individuals from cultivating and possessing small

amounts of marijuana for personal medicinal use because marijuana is bought and sold in interstate commerce.

The relationship between healthcare coverage and the national economy is even clearer. In 2007, healthcare expenditures amounted to \$2.2 trillion, or \$7,421 a person, and accounted for 16.2% of the gross domestic product.

The claim that individuals have a constitutional “right” to not have health insurance is no stronger than the objection that this would exceed Congress' powers. It is hard to even articulate the constitutional right that would be violated by requiring individuals to have health insurance or pay a tax.

Since the 19th century, the Supreme Court has consistently held that a tax cannot be challenged as an impermissible taking of private property for public use without just compensation. All taxes, of course, are a taking of private property for public use, and a tax to pay for health coverage—whether imposed on all Americans or just the uninsured—is certainly something Congress could impose.

The claim that an insurance mandate would violate the due process clause is also specious. Most states have a requirement for mandatory car insurance, and every challenge to such mandates has been rejected. More important, since 1937, the Supreme Court has constantly held that government regulations of property and the economy will be upheld as long as they are reasonable. Virtually every economic regulation and tax has been found to meet this requirement. A mandate for health coverage would meet this standard, which is so deferential to the government.

Finally, those who object to having health coverage on freedom-of-religion grounds also have no case. The Supreme Court has expressly rejected objections to paying Social Security and other taxes on religious grounds. More generally, the Supreme Court has ruled that individuals do not have a right to an exemption from a general law on the ground that it burdens their religion.

There is much to debate over healthcare reform and how to achieve it. But those who object on constitutional grounds are making a faulty argument that should have no place in the debate over this important public issue.

Mrs. FEINSTEIN. Mr. President, I rise to discuss an amendment to create a medical insurance rate authority and rate review process that I filed to the Patient Care and Affordable Choice Act.

Unfortunately, because of the objections of one of my colleagues, my amendment was not included in the final bill before us today.

I am profoundly disappointed. I would like to take a few minutes to discuss why I believe this proposal is so important and why, without it, we can expect to see skyrocketing health insurance premiums.

I am very concerned that health insurance companies will seek to exploit the time between passage of the bill, and 2014, when reforms are fully in place.

Credit card companies provide a useful example. Earlier this year, Congress approved major credit card reform legislation. However, the consumer protections it contains will not be fully effective until February 2010.

Credit card companies have taken full advantage of this interim period to raise rates, with many card interest rates increasing 20 percent over the last year.

I am very worried that health insurance companies will do the very same thing. And I believe the rate authority amendment is essential to stopping them.

In some States, insurance commissioners have the authority to review rates and increases and block rates that are found to be unjustified. According to a 2008 Families USA report, 33 States have some form of a prior approval process for premium increases.

The same report describes several notable successes among States that use this process, including . . . regulators in North Dakota were able to reduce 37 percent of the proposed rate increases filed by insurers. Maryland used their State laws to block a 46-percent premium increase after a company charged artificially low rates for 2 years. The decision was upheld in court. New Hampshire regulators were able to reduce a proposed 100 percent rate increase to 12.5 percent.

But in other States, including California, insurance commissioners do not have this ability.

And some states have laws like this on the books, but do not have sufficient resources to review all the rate changes that insurance companies propose.

Consumers deserve full protection from unfair rate increases, no matter where they live.

The amendment I have proposed would ensure that all Americans have some level of basic protection. The amendment will strengthen a provision included in the underlying bill, which already requires insurance companies to submit justifications and explain increases in premiums. They must submit these justifications to the Secretary of Health and Human Services, and they must make these justifications available on their Web site.

I believe we must do more.

The amendment asks the National Association of Insurance Commissioners to produce a report detailing the rate review laws and capabilities in all 50 States. The Secretary of HHS will then use these findings to determine which States have the authority and capability to undertake sufficient rate reviews to protect consumers.

In States where insurance commissioners have authority to review rates, they will continue to do so.

In States without sufficient authority or resources, the Secretary of HHS will review rates and take any appropriate action to deny unfair requests.

This could mean blocking unjustified rate increases, or requiring rebates, if an unfair increase is already in effect.

This will provide all American consumers with another layer of protection from an unfair premium increase.

The amendment would also require the Secretary of Health and Human Services to establish a medical insurance rate authority as part of the process in the bill that enables her to monitor premium costs.

The rate authority would advise the Secretary on insurance rate review and would be composed of seven officials that represent the full scope of the health care system including: at least two consumers; at least one medical professional; and one representative of the medical insurance industry.

The remaining members would be experts in health economics, actuarial science, or other sectors of the health care system.

The rate authority will also issue an annual report, providing American consumers with basic information about how insurance companies are behaving in the market. It will examine premium increases, by plan and by State, as well as medical loss ratios, reserves and solvency of companies, and other relevant behaviors.

This data will give consumers better information. But more importantly, it will give the newly created insurance exchanges better information.

Under the amendment, the Secretary of Health and Human Services, and the relevant insurance commissioner, will recommend to exchanges whether a company should be permitted to participate in the exchanges.

So companies should be put on notice: unfair premium increases and other unfair behaviors will come with a price. Millions of Americans will receive tax credits to purchase coverage in the exchange beginning in 2014. Insurance companies will need to demonstrate that they are worthy of participating in this new market, and receiving Federal money to cover uninsured Americans.

This concern about premium increases stems from the fact that we are the only industrialized nation that relies heavily on a for-profit medical insurance industry to provide basic health care. I believe, fundamentally, that all medical insurance should be not for profit.

The industry is focused on profits, not patients. And it is heavily concentrated, leaving consumers with few alternatives when their premiums do increase.

As of 2007, just two carriers—WellPoint and UnitedHealth Group—had gained control of 36 percent of the national market for commercial health insurance.

Since 1998, there have been more than 400 mergers of health insurance companies, as larger carriers have purchased, absorbed, and enveloped smaller competitors.

In 2004 and 2005 alone, this industry had 28 mergers, valued at more than \$53 billion. That is more merger activity in health insurance than in the 8 previous years combined.

Today, according to a study by the American Medical Association, more than 94 percent of American health insurance markets are highly concentrated, as characterized by U.S. Department of Justice guidelines. This means these companies could raise premiums or reduce benefits with little fear that consumers will end their contracts and move to a more competitive carrier.

In my State of California just two companies, WellPoint and Kaiser Permanente, control more than 58 percent of the market. In Los Angeles, the top two carriers controlled 51 percent of the market.

Record levels of market concentration have helped generate a record level of profit increases.

Between 2000 and 2007, profits at 10 of the largest publicly traded health insurance companies soared 428 percent from—\$2.4 billion in 2000 to \$12.9 billion in 2007. This is Health Care for America Now, Premiums Soaring in Consolidated Health Insurance Market, May 2009, citing U.S. Securities and Exchange Commission filings.

The CEOs at these companies took in record earnings. In 2007, these 10 CEOs made a combined \$118.6 million. The CEO of CIGNA took home \$25.8 million; The CEO of Aetna took home \$23 million; The CEO of UnitedHealth took home \$13.2 million; and the CEO of WellPoint took home \$9.1 million.

I am very concerned that this profit seeking behavior will only worsen, now that insurance companies know that health reform will change their business model.

Insurers know that come 2014, they will be playing by new rules: No discriminating based on preexisting conditions. No cherry picking and choosing to cover only the healthy. No charging women or older people astronomical rates. No dropping coverage once someone gets sick.

Insurers know these changes are coming. Listen to a comment made by Michael A. Turpin, a former senior executive for UnitedHealth. He is now a top official at an insurance brokerage firm, and he said that insurers were “under so much pressure to post earnings, they’re going to make hay while the sun is shining.”

“Make hay while the sun is shining.” That means these companies will try to make as much money as they possibly can, for as long as they can.

That is why a rate review amendment is so important.

Frankly, I wish the health reform bill before us would go further and eliminate the for-profit health insurance industry.

But since this bill chooses to maintain a for-profit industry, we must do the next best thing and ensure that it is thoroughly regulated. Insurance companies should not be able to take advantage of the fact that affordable

health care is a basic life need. In effect, they have the power to increase their prices at will, knowing that people will continue to pay as long as they can afford to do so.

This amendment certainly will not fix all of the ills of a for-profit insurance industry, but I believe it makes a needed improvement in the underlying bill and will help protect consumers from unfair increases. Without it, I worry that consumers in far too many States will see major premium increases.

I will continue to work to see that this amendment is included in the final version of health reform legislation. Without it, too many Americans will still lack protection from unfair rate increases.

I ask unanimous consent that a copy of a support letter from California organizations be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DECEMBER 17, 2009.

Hon. HARRY REID,
Majority Leader of the U.S. Senate, Hart Office
Building, Washington, DC.

Re Support of amendment to HR. 3590 to improve rate review of increases in health insurance premiums.

DEAR SENATOR REID: Thank you for your leadership in advancing health reform this year. We, the undersigned organizations, support a proposed amendment by Senators Feinstein, Rockefeller and others that would provide greater specificity in terms of rate review of increases in health insurance premiums.

The proposed amendment:

Creates a rate review authority that could deny or modify unjustified rate increases or order rebates to consumers,

Defines potentially unjustified rate increases as increases which exceed market averages,

Gives priority to rate increases that impact large numbers of consumers,

Creates market conduct studies of health insurance rate increases,

Exclude from State Exchanges insurers that have a pattern of excessive premium increase, low medical loss ratios or other market conduct,

Allows a State to conduct the rate reviews.

We support the provisions of health reform which make health insurance more affordable for individuals and businesses. This amendment is consistent with the stated intention of the "Patient Protection and Affordable Care Act" and provides greater specificity to the provisions on "ensuring that consumers get value for their dollars."

The proposed amendment prevents anticipatory price increases by health insurers in advance of full implementation of health reform. Scrutiny of rate increases will have a deterrent effect on increases in premiums that are out of line.

For these reasons, we support the proposed amendment.

Sincerely,

ANGIE WEI,
Legislative Director,
California Labor
Federation.

MARTY MARTINEZ,

Legislative
Ministry Action Network—California.

The PRESIDING OFFICER. The Senator from Mississippi is recognized.

Mr. WICKER. Mr. President, I ask unanimous consent that several Republican colleagues and I be allowed to engage in a colloquy for the next hour.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WICKER. Mr. President, I thank my friend from Washington for commending and complimenting the staff. That is a bipartisan sentiment for this Christmas season. I am sure every Senator on the floor feels the same way and expresses that appreciation to the hard-working staff.

I want to start off by saying there is still an opportunity for this bill to be amended to change some of the very harmful ways that this will affect our people back home and, particularly, our State governments.

I was on the Senate floor several days ago pointing out the objections that most of the State Governors have with regard to the Medicaid mandates. I want to read from a letter dated December 10, from my Governor, Haley Barbour of Mississippi, who reminds Senators that:

This bill continues to place a huge unfunded mandate on States, while harming our small businesses and seniors through budget gimmicks and increased taxes.

And he says this:

If the current bill, which would expand Medicaid up to 133 percent of the Federal poverty level, were enacted into law, the number of Mississippians on Medicaid would increase to 1,037,606, or 1 in 3 citizens, in Mississippi. Over 10 years, this bill would cost Mississippi taxpayers \$1.3 billion.

I was on the Senate floor a few days ago also with this map, which shows in red the number of States that are facing this unfunded mandate because of the increased Federal mandate for Medicare coverage coming from this bill, should it be enacted into law. I

was pointing out that only the two States—Vermont and Massachusetts—because of a formula that has been worked out, would be exempt. Every other State will have to come up with the extra money either through cutting education programs, cutting mental health programs or other vital services or by raising taxes. They will have to come up with the extra money under this legislation so that half of the people covered by this new act will be covered by Medicaid.

I want to make an amendment to that chart today and add one other State. I think it has become quite a well-known fact that we need to put one other State up there in yellow, and that is the State of Nebraska.

We know pursuant to an agreement that was made before Senator NELSON announced his support as the 60th vote for cloture on this very important legislation, a deal was cut—the minority leader said a cheap deal, and I agree—that the State of Nebraska would be exempt in perpetuity from its requirement to pay the State match. The Federal Government, according to this legislation that we will be asked to vote on in the next 2 days, will pick up all of the extra expenditures for the State of Nebraska.

The poverty level in Nebraska is not quite as bad. I don't know how the powers that be felt they should or could justify this expenditure, but I will tell you the people in the State of Mississippi are going to have to come up with another \$1.3 billion over the next 10 years to pay for what we are going to be required to do by Congress—in its wisdom.

How is it fair that one Senator from Nebraska goes behind closed doors with the majority leader and cuts this deal so that his citizens don't have to pay this extra tax, and they don't have to do without services in other State programs to come up with the money? No one in this building—nobody within the sound of my voice—can come in here and explain why that is fair.

The fact is, the majority leader needed that vote, and that was part of the deal that was cut. Now citizens in Arizona, citizens in Wyoming, citizens in Mississippi, in Arkansas, and in Louisiana—we will have to come up with the extra Federal tax money on our part, but the Federal Government can cover all of the additional costs—State and Federal—in Nebraska.

Mr. MCCAIN. If the Senator will yield, on that map, I wonder should there not be a sticker for the State of Florida? According to a published report by one of my favorite columnists, Dana Milbank, of the Washington Post:

Gator Aid: Senator Bill Nelson inserted a grandfather clause that would allow Floridians to preserve their pricey Medicare Advantage program.

So maybe we should have one of those stickers for Florida there. By the

way, that will cost my constituents more money because they will not have that same deal. Should there be a sticker for Montana?

Again, according to Dana Milbank:

Handout Montana: Senator Max Baucus secured Medicare coverage for anybody exposed to asbestos—as long as they worked in a mine in Libby, Montana.

Should there be a sticker there?

Continuing, Dana Milbank says:

Iowa pork and Omaha Prime Cuts: Senator Tom Harkin won more Medicare money for low-volume hospitals of the sort commonly found in Iowa. . . .

Maybe there should be a sticker for that. I don't know if you have North Dakota in there. Dana Milbank says:

Meanwhile, Senators Byron Dorgan and Kent Conrad, both North Dakota Democrats, would enjoy a provision that would bring higher Medicaid payments to hospitals and doctors in "frontier counties" of states such as—let's see here—North Dakota!

Should there be one for Hawaii? Mr. Milbank goes on to say:

Hawaii, with two Democratic senators, would get richer payments to hospitals that treat many uninsured people.

Should there be a sticker there for Michigan? Mr. Milbank says:

Michigan, home of two other Democrats, would earn higher Medicare payments for some reduced fees for Blue Cross/Blue Shield. Vermont's Senator Bernie Sanders held out for larger Medicaid payments for his state. (neighboring Massachusetts would get one, too).

I guess there are a number of States that maybe should have stickers on them so that the American people can see where these special deals were cut out, and the majority of the population of this country can see where they were not. They are going to pay while those States pay less because of not just their location but because they happen to have been behind closed doors and cut special deals.

Mr. BAUCUS. I wonder if the Senator would yield briefly.

Mr. MCCAIN. Sure. I ask that Senator BAUCUS be recognized.

Mr. BAUCUS. I am pointing out, as the Senators know, for example, under this legislation, the Federal Government pays all the costs of eligible enrollees through 2016. In this legislation, we are talking about the so-called expansion population. That is those between 100 percent of poverty on Medicaid and 133 percent of poverty, and under the underlying statute—

Mr. MCCAIN. Does that mean all these States are being treated the same?

Mr. BAUCUS. In 2016, all States are treated the same.

Mr. MCCAIN. This happens to be 2009. What happens between now and 2016?

Mr. BAUCUS. Beginning next year, when this goes into effect, 2010 through 2016, all States will get 100 percent payments for that expansion coverage.

Mr. WICKER. What would happen, then, after 2016 under current legislation?

Mr. BAUCUS. Afterward, under current legislation—one sentence of background. Today, as the Senator well knows, different States receive different Federal contributions to Medicaid. It varies according to States. The average is about 57 percent Federal. The average for all States on average is 57 percent of the cost of Medicaid is paid for—

Mr. MCCAIN. If that is the case—

Mr. BAUCUS. Let me finish.

Mr. MCCAIN. If that is the case, we will be glad to have the same provision inserted for the State of Arizona that was inserted for the State of Florida. You don't have a problem with that, do you?

Mr. BAUCUS. Let me answer the question.

Mr. MCCAIN. Do you have a problem with that?

Mr. BAUCUS. I can answer only one question at a time. The first question is from the Senator from Mississippi. Then, after 2017, all States get 90 percent—we are talking about expansion of population.

Mr. WICKER. The Senator yielded to me the other day, and I appreciate that. We have a number of Republicans who want to speak during our hour.

The fact is, after 2016, every State in red has to tax their own citizens and pay their State share, except Vermont, Massachusetts, and Nebraska. And I still challenge any colleague in this Senate to come before this body and say that is fair. I do not believe they will say that is fair.

Mr. MCCAIN. My question to the Senator from Montana is this: Would the Senator from Montana be willing to have the same provision that Senator NELSON, according to these reports, inserted, a grandfather clause that would allow Floridians to reserve their price in the Medicare Advantage Program? Would he accept a unanimous consent request right now that same provision apply to every State in America?

I ask unanimous consent that the same provision that was put in for the State of Florida by Senator NELSON would apply to every State in America.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. Reserving the right to object, I think it would be highly imprudent for me not to object, so I will object to that request. I also point out that on average, Uncle Sam pays 90 percent of the Medicaid payments for this expansion of population after the year 2016.

The PRESIDING OFFICER. Objection is heard.

Mr. MCCAIN. I think the fact that an objection was heard resolves the case. Those are comforting words on the part of the Senator from Montana, whom I appreciate, but the fact is, there are special deals for special people. It is well known. It is very well known.

May I mention to my colleagues—sort of a personal privilege here—the

Senator from Louisiana came to the floor this morning and said:

Recently, just yesterday, Senator John McCain, our colleague from Arizona, has claimed that the American people are opposed to reform and he speaks about the will of the majority. I would like to remind, respectfully, my colleague from Arizona that the will of the majority spoke last year when they elected President Obama to be President and they decided not to elect him, and the President is carrying out the will of the majority of the people to try to provide them hope and opportunity.

I say in response to that, I really did not need to be reminded. I had not forgotten. Sometimes I would very much like to. But I appreciate the reminder.

The fact is that the Senator from Louisiana and other Senators should know that poll after poll, public opinion, partially because of what the Senator from Mississippi is pointing out—the latest being "U.S. Voters Oppose Health Care Plan by Wide Margin." A Quinnipiac poll finds 3 to 1 that the plan should not pay for abortion. And it says American voters mostly disapprove of the plan 53-36 and disapprove 56-38 percent President Obama's handling of the health care issue.

If I can remind my friend and colleague from Louisiana, I did carry her State.

Mr. BAUCUS. The Senator carried my State too.

Mr. MCCAIN. And the State of the Senator from Montana.

Mr. JOHANNES. If I may jump in here, probably like every Senator here, I read the newspapers back home every morning as I start my day. There was an editorial in the Lincoln Journal Star on December 21 that speaks to this issue of special deals. I thought it was excellent. The Lincoln Journal Star has covered me for a long time. Sometimes I agree with them, sometimes I do not. Sometimes they agree with me, sometimes they do not. But I have always respected the work they do.

Here is what they said in their editorial:

Since when has Nebraska become synonymous for cynical "what's in it for me"-type politics?

The term "Cornhusker kickback" is already a favorite of television's talking heads.

They go on to say:

That's how the rest of the country sees [this] deal.

The editorial continues:

Under its provisions, the federal government would pay all additional Medicaid costs for Nebraska "in perpetuity." The Congressional Budget Office has estimated the deal may be worth \$100 million over 10 years.

They go on to say I think in very powerful language:

The deal is the embodiment of what is wrong in Washington.

Instead of thoughtful, careful work on real problems, Washington lawmakers cobble together special deals, dubious financial accounting and experimentation on a grandiose scale.

They devote a paragraph to the many special deals cut, and the Senator's chart illustrates one.

Mr. MCCAIN. If the Senator will—

Mr. JOHANNIS. If I may finish, I say to Senator MCCAIN, and then you can ask me.

They say this:

It's time to push the reset button on health care reform.

The effort has gone awry.

Mr. MCCAIN. But also, doesn't this bring up a larger issue—I ask all my colleagues to comment on this—whether our job here is to do whatever we can to just simply help our State, even if it is at the expense of other States, as the Senator from Mississippi pointed out, or is our title U.S. Senator, Arizona, Nebraska, Mississippi, et cetera? My title is not Arizona Senator, U.S.; it is U.S. Senator, Arizona. So of course I am here to represent the people of my State. But is a U.S. Senator's job to go out and do something which would then be at the expense of the citizens of another State simply by virtue of their clout and influence? Is that what we were sent here by our constituents to do?

Is it true what the majority leader said yesterday:

"I don't know if there is a Senator that doesn't have something in this bill that was important to them," Senate Majority Leader HARRY REID reasoned when asked at a news conference Monday about the cash-for-cloture accusation. "And if they don't have something important in it to them, then it doesn't speak well of them."

Does it speak well of us when we do something like the Senator from Mississippi pointed out, that favors Libby, MT, and not the rest of the country, that helps the seniors in Medicare Advantage in Florida and not in Arizona? Is that what we were sent here to do? That has never been my view of what our obligations to our citizens are, but also to the citizens of this country.

I ask my colleagues to comment.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. RISCH. Mr. President, here is what this has come to. In the next 48 hours, this 2,400-some page bill is going to pass the Senate. But how did we get there? Was it done the way things are usually done in this body? Not at all. One party has been able to gather 60 votes for this. Not one person from the other party is going to vote for it. How did they get those 60 votes? Did they get it by arguing this out? They did not do that. They have bluntly, boldly, and on the front of virtually every newspaper in this country bought the votes to pass this bill, to get to the 60. They bought the last handful of votes, and they did not even buy it with their money, they bought it with the American people's money. Now, that is wrong.

The explanation I heard from the majority leader the other day is: Well,

that is the way this is done. That may be the way this is done in banana republics, that may be the way this is done in Third World countries, but this is America. The American people are outraged over this. The other party ought to be outraged.

I heard one Member quoted as saying: Well, I was too stupid to get any money for my State in there. I heard the majority leader say: You are not doing your job if you don't have something in there for you. Where is the outrage from the other side, not only about the process but how they are getting snookered by some other members of their party? Where is the outrage?

I watched the debate on the other side and have seen Members come down and say: The American people want this. Are they living in a cave? Sure, there are a handful of American people who want this. Let me tell you who does not. The U.S. Conference of Bishops does not want it. The National Right to Life people do not want this. Not one Republican wants this. The Democrats do not want it.

Listen to what Howard Dean, the former leader of the Democratic Party, said:

At this point, the bill does more harm than good.

Ask any Democratic Governor in America. This bill transfers \$25 billion in costs in unfunded mandates to the Governors and to their taxpayers. They have to come up with \$25 billion. They don't want it.

I have stood here and listened to the other side say: This is wonderful for small business. Small business is going to come out so well on this. Then why does the National Federation of Independent Business—small businesses—say:

The Senate bill fails small businesses.

The National Association of Wholesale Distributors. The Small Business Entrepreneurship Council says:

Small business group say Reid health bill more of the same—more taxes, mandates, big spending, and nothing to help lower insurance costs.

Associated Builders and Contractors is against it. The National Association of Manufacturers is against it, the Independent Electrical Contractors, the International Franchise Association. Even the labor unions have said: Don't tax our health care benefits. We agree with them. We are on the side of the labor unions. We should not be taxing health care benefits.

But set all that stuff aside. These are all people who have an ax to grind. The American people do not want this bill. These people who are coming out here saying the American people want this bill, I don't know whether they are not reading the newspapers, whether they are not reading their own e-mails at their office. The Quinnipiac poll that was out this morning, Tuesday through Sunday, says: 36 percent of the Amer-

ican public support the health care spending bill; 53 percent oppose. That is an 18-percent difference. Gallup says 61 percent of the American people don't want this bill.

Stop coming out here saying the American people want this bill. The American people do not want it. You want it, but the American people do not want it. Leaders in your own party do not want it. The labor unions do not want it. Nobody wants this thing, and most of all small business does not want this bill.

I have listened to anecdote after anecdote from the other side. There are some very touching stories, and everybody over here is empathetic with them. But you don't legislate using anecdotes because you are only hearing one side of the story, you are not hearing all the facts dealing with the anecdotes, and to then pat this 2,400-page bill and say this will solve that, that is not the way you legislate, and it is certainly not the way you argue a point.

I heard the other side come out here and pat the bill and say: When we pass this bill, 94 percent of American people will have insurance, will be covered by health insurance. In court, they say you have to tell the truth, the whole truth, and nothing but the truth, and that is exactly why. You cannot pat this bill and say now 94 percent of the American people are going to be covered.

Somebody listening to that will say: Gosh, what a wonderful bill. What is it going to cost? It costs \$2.5 trillion to cover 94 percent of the American people. But they don't say the bill only adds another 7 percent. The fact is, they don't tell you that 87 percent of Americans are already covered by some kind of health insurance. So don't say this is a grand and glorious victory because we are now going to cover 94 percent when 87 percent are already covered.

This is gimmickry at its worst, to tax for 4 years without giving any major benefits. Giving some minor benefits but holding off the major benefits until later is plain gimmickry. They say: Oh, look how wonderful this is. It is not going to add to the national deficits because we are going to collect taxes for 4 years, and only then are we going to start the benefits.

What do we have here? When all is said and done and you strip it away, you have \$2.5 trillion and 2,400 pages that most people do not understand, higher taxes, and higher insurance premiums.

I can give you one fact that is the best reason to vote against this bill; that is, it cuts \$½ trillion out of Medicare benefits. If you are a senior watching, \$½ trillion of Medicare benefits is going to disappear. I heard the President say and I heard my friends on the other side say: Look, if you like your program, if you like your insurance

plan, you are going to be able to keep it. Try to tell that to the people who are on Medicare Advantage. It is being stripped. It is being eliminated under this bill. Indeed, if you read the rules and regulations under this bill, the plan you have will not even exist when it is done.

You know, I have heard the other side say: Oh, you Republicans are just playing on fears of the American people. Let me tell you something. The American people are frightened. They are afraid. It isn't just this health care bill, they have sat here for the last year, and they have watched stimulus packages costing \$1 trillion. They have watched multibillion-dollar bailouts. They have seen buyouts. They have seen trillion-dollar deficits running up. They have seen the national debt now running into the trillions. And, yes, they are afraid.

But it isn't us that is doing it to them, it is you that have done it to them. It is you that have committed the actions that have put the fear into the hearts of the American people. Don't do this. Stop this nonsense. You have the opportunity still to stop this. You can do it. The American people don't want this. Stop the insanity.

I yield the floor.

Mr. WICKER. I will say to my friend, I am afraid. I am afraid for my country. We are going to have a vote sometime between now and Christmas Eve on raising the debt limit. It will just be a short-term thing. I doubt if a single Republican will vote for that. Then we will have to come back again in February and do the same thing.

The debt that is piling up on our country is something to be frightened about. It is something we need to fight against and be resolute about. We are not shedding crocodile tears, but I am frightened by this debt, and we should be, if we want our economy to stay strong. The fact we are adding \$2.5 trillion in an entitlement program, which apparently the majority has the votes for, is simply going to add to this enormous debt.

So it is no wonder, when you add the Medicare cuts, the taxes that most States are going to have to pay—unless they cut a special deal—on top of the tremendous national debt that we are facing, the American people are frightened. They have a right to be frightened and worried.

Mr. BARRASSO. I don't know how many of my colleagues have seen the editorial in today's *Investors Business Daily*.

Mr. President, I ask unanimous consent to have printed in the *RECORD* the article to which I am going to refer.

There being no objection, the material was ordered to be printed in the *RECORD*, as follows:

LOUISIANA PURCHASE AND OMAHA STAKES

Politics: Mary Landrieu's payoff was the new "Louisiana Purchase." Ben Nelson got

Uncle Sam to pick up Nebraska's future Medicaid tab. Maybe we should just put Senate votes up on eBay.

Nelson, the 60th vote in the middle-of-the-night Senate party line vote on health care reform, will go down in American political history as the inventor of the permanent earmark. His seemingly principled stand against including federal funding for abortion evaporated like the morning dew as he decided to take what was behind door No. 1.

The deal for Nelson includes special Medicaid funding for Nebraska, along with Vermont and Massachusetts, which has a special election to fill the seat of the late Sen. Ted Kennedy coming up in January. Under the Senate bill every state is equal, but some are more equal than others. The other states and their taxpayers—that means you—will pick up this tab.

This came just three days after Sen. Bernie Sanders, I-Vt., said on Neil Cavuto's Fox Business show that he was prepared to vote against the bill after the recent decision to strip the public option and the Medicare buy-in provision from the legislation to get the vote of Sen. Joe Lieberman, I-Conn.

Nelson won a permanent exemption from the state share of Medicaid expansion for Nebraska. Uncle Sam will take the hit for 100% of the Medicaid expansion for Nebraska—forever. The world's greatest deliberative body has now become the most corrupt.

The Congressional Budget Office (CBO) informed lawmakers Sunday night that this section of the manager's amendment to the Senate's health bill would cost \$1.2 billion over 10 years.

Nebraska actually receives the least of the three, some \$100 million over the first 10 years. Vermont will receive \$600 million over 10 years, while Massachusetts will get \$500 million.

Nelson, like most other senators, doesn't know what's really in this bill or what it costs, except for the scoring that involves comparing a decade of taxes with six or seven years of "benefits."

This includes gutting Medicare by half a trillion dollars. The abortion language he accepted may not survive conference or the Stupak amendment supporters in the House. The Medicaid bribe he accepted will.

Senate Majority Leader Harry Reid, the Boss Tweed of our time, defended how this sausage was made. "You'll find a number of states that are treated differently than other states. That's what legislating is all about. It's about compromise," he said.

On the contrary, sir, it's about bribery—about what has been dubbed the "Cornhusker kickback," and about politics done the "Chicago Way."

A \$100 million item for construction of a university hospital was inserted in the Senate health care bill at the request of Sen. Christopher Dodd, D-Conn., who faces a difficult re-election campaign.

Presumably there's a wing where taxpayers can go to get their wallets removed.

The Democrats insist that their Medicare cuts will not lead to rationing. So why did, as HotAir.com reports, Sen. Bill Nelson, D-Fla., insist on language that exempted three heavily Democratic counties in his home state from the cuts? If those massive cuts to the program won't hurt people on Medicare Advantage, why did Nelson fight to get exemptions for Palm Beach, Dade and Broward counties?

After all this wheeling and dealing, we will still have a cost-raising tax-increasing, Frankenstein monster of a bill hurriedly stitched together behind closed doors that

will lead to doctor shortages and rationed care.

Mr. BARRASSO. The article is headlined: "Louisiana Purchase and Omaha Stakes." The editorial says:

Politics: Mary Landrieu was the new "Louisiana Purchase." Ben Nelson got the federal government to pick up his state's future Medicaid tab.

And the article continues:

Maybe we should just put Senate votes up on eBay. . . . Nelson won a permanent exemption from the state share of Medicaid expansion for Nebraska—forever. The world's greatest deliberative body has now become the most corrupt.

So Uncle Sam is taking the hit for 100 percent of the Medicaid expansion for Nebraska forever. That is what this says. It goes on to say this is not what legislating is about; that this is not compromise, rather, it is about bribery.

Mr. President, this is horrible for us as a nation to have these things written about this institution, when we should be way above any of these sorts of claims.

I look at that map that my colleague from Mississippi has up, with just Nebraska on there as the special deal, and I do not believe that is the way legislation should be written. We should be looking at ways to improve health care for all Americans, improve the quality, make it more affordable, make it more available to people, and give them the access they need.

I brought four amendments the other day, after Senator REID brought his massive amendment to the floor, and each was rejected. They were things that would actually improve this bill and make it better for Americans.

So I stand here, looking at this, and reading headline after headline and editorial after editorial about just how very bad is the way this bill is being pushed forward. We certainly wouldn't want any young child to know how this is happening in their country, as we try to get them involved in this process and learn and study and feel that maybe they should become involved in this. This isn't what legislating in America is all about. We are better than this.

If you have to do these sorts of things to get a 60th vote, then the bill isn't good enough to pass. If the ideas aren't good enough to get the votes, then it shouldn't pass. In this country, we look for bipartisan solutions to the big issues of the day. That is what we did in the Wyoming Legislature. Major issues passed with overwhelming numbers. That is what has happened in this country throughout the course of history. The big bills have come forth with large numbers of supporters, and that is how you get the country to follow you, not by trying to force through a vote, buying a vote here and buying a vote there to just squeak by with the minimum amount of support. That is

not the way to change policy that is going to affect everyone in the United States personally and affect one-sixth of our economy. That is not the way to do it.

It has not been the way, it shouldn't be the way, and it should never be the way again. I am looking for some Democrat to stand up and say: This isn't the way, and I am going to not vote for this bill.

Mr. MCCAIN. A Senator from Colorado came to the floor and proudly stated that he had not asked for anything or gotten anything, and I will ask the Senator from Nebraska a question because his State seems to be at the center of a lot of attention. But, first of all, there is a little booklet that is put out by the Government Printing Office that talks about how our laws are made. We give it to our constituents and send it to schools all over America. I have never seen anything in that little booklet—it is a very interesting booklet—that says you get behind closed doors and you cut deals.

I know we are all a little cynical about politics and campaign promises, but the negotiating behind closed doors is especially so, particularly after your President says during the campaign, time after time: I am going to have all the negotiations around a big table. We will have doctors and nurses, hospital administrators, insurance companies, drug companies, they will get a seat at the table. They just would not be able to buy every chair. But what we will do, we will have negotiations televised on C-SPAN so that people can see who is making arguments on behalf of their constituents and who is making arguments on behalf of the drug companies.

Of all people he recognized, the drug companies—who got the best deal of all? PhRMA. Who has spent the most money lobbying? Who has spent the most money on advertising? PhRMA. Who is going to cost the American consumer \$100 billion, that could have been saved by the consumer if we had been able to reimport prescription drugs?

But I would ask my friend from Nebraska because along with the "Louisiana purchase" and probably the Florida deal this Nebraska deal has probably gotten the most publicity and visibility. Maybe because it was the 60th vote. I don't know if it is the biggest or not, in terms of money, because we will be finding deals in this 2,700-page bill for months. For months, we will be finding provisions, even though our staffs have carefully read it. It is not 2,700 pages for nothing.

So I would ask the Senator from Nebraska: How does this go over in the heartland of America? How do the people in Nebraska, who see that they have gotten some kind of special deal, a special provision—certainly reported as so in the media—that would come at

the expense of other taxpayers in America? I am curious about the reaction the Senator from Nebraska gets.

Mr. JOHANNES. It doesn't go over. It just simply doesn't. In every way possible, over the last 4 or 5 days, I have been asked: Do you support this special deal for Nebraska? I don't. I think it is wrong.

I could read through all the special deals because we have all got the list—it is Florida, Louisiana, and Montana, and on and on and on. But I came to the floor this morning and I asked unanimous consent that all the special deals be taken out, and I listed a long list of them. Of course, there was an objection to that request for unanimous consent. Why? Why would we want to try to pass legislation with all of this? It makes no sense to me.

But let me take a step back. We all remember a few months ago there was a big story that Nevada was going to get a special Medicaid deal. It was right about that time that we took a few days off. I went back home, and I did townhall meetings, as I have done for years and years and years. But we really invested time and effort, and we identified six principles of health care which are on my Web site for people to look at. I literally had a PowerPoint presentation. I did four townhall meetings—Carnie, Grand Island, Lexington, and Lincoln. I put up these principles.

One of the principles was no carve-out. No backroom deals. No special deals. I presented that to the people who were at those townhall meetings. I did tons of interviews. I explained why I felt the way I did. People were so irate at the possibility that Nevada was going to get this special deal.

Since then, I think that has fallen by the wayside, but all these other things have come along. That is why I read the Lincoln Journal Star editorial. This is an editorial page that sometimes likes what I am doing and sometimes it does not. Over the years, they have not hesitated to take me to task. They looked at this and they said:

Since when has Nebraska become synonymous for cynical "what's in it for me"-type politics?

They said it is time to hit the reset button. We are not getting this right at all. We simply aren't getting it right. They talked about the issues of cost containment, they talked about the Actuary's report, which I had spent a little time talking to them about, and other folks around the State. After looking at all of that, they just said: Look, this isn't going the way it needs to go for the American people.

Here is what I would say to all of my colleagues in the Senate. I love my State. I love the people there. They are such honest, decent people. In many parts of our State, people believe you seal a contract not by putting things in writing but by shaking hands and giving your word. They don't want this

kind of attention. They don't want to be on the evening news every night with the talking heads talking about the "cornhusker kickback" or whatever the latest terminology is. They just want to be treated fairly.

They asked me to come here and represent them as fervently as I can, to try to do all I can to get fair treatment for them. But not a single person at any townhall I have ever had stood up and said: MIKE, I disagree with that principle. I want you to go back there and give me a special deal or get our State a special deal.

So I appreciate Senator MCCAIN asking me the question. I feel very strongly about this. I wish the other side would consider my request for a unanimous consent agreement that just says: Time out, everybody. Let's pull out the special deals, whether it is Nebraska or Montana or whatever. It doesn't matter to me. Let's pull those out and let's take a step back and let's work for what Senator RISCH talks about and the rest of us have talked about. We can get 80 votes on a health care reform bill. I guarantee you. But not on this bill.

Mr. WICKER. I would echo what the Senator from Nebraska has just said. I know my friend from Arizona has been one of the most outspoken critics of special deals and special earmarks. This is not some catchall appropriations bill to get us through the end of the year. This is one of the most major pieces of legislation on which any Member of this Senate currently serving will ever vote. This is one-sixth of the American economy, and the American people are learning about these special carve-outs where the citizens of one State will be treated differently not because of a formula, not because of the poverty level, but because of political power.

It would just seem to me that one Member of the majority party, in these next 2 days, might step forward and say: You are right, and I will not be a party to this.

Mr. MCCAIN. Let me make one additional comment. I have seen reform go through the Congress of the United States. The first one I saw was when we saved Social Security—a major reform of Social Security. There was no backroom dealing. It was a straightforward proposal as to how to fix Social Security. We fixed welfare, it was welfare reform—again, open, honest, bipartisan negotiations and bipartisan agreement. Welfare reform, Social Security reform, the efforts we made at tobacco reform, at campaign finance reform, at immigration reform and many others—the Patients' Bill of Rights. Every reform I have ever been involved in has had two major and sole components: No. 1, it is bipartisan; No. 2, there were no special favors or deals cut, provisions in thousands of pages of legislation.

Again, we know where the train is headed. We know what is going to happen a short time from now, but they will make history. You will make history. You will have rammed through "reform" on a strictly partisan basis, without the participation of the other party, over the objections of a majority of the American people, done in closed negotiations, with results that are announced to the American people without debate or discussion and to this side without debate or discussion.

The American people do not like it. They do not like for us to do business that way. I am sure this peaceful revolution that is going on out there already—because as the Senator from Idaho pointed out, because of the involvement of the car companies, the stimulus, the bonus, the generational theft we are committing, this, all on top of that, is going to give great fuel to the fire that is already burning out there, where they want real change, real change which they were promised in the last Presidential campaign and certainly did not get.

Mr. RISCH. I say to Senator MCCAIN, probably one of the great ironies of all this is going to be at 8 o'clock on December 24—when this bill passes with the 60 votes, all Democrats—immediately following that vote is going to be a vote, again all 60 Democrats and only Democrats, raising the national debt. What an irony, to put \$2.5 trillion in spending of a new social entitlement program, adding it to the three already huge entitlement programs that are in the process of bankrupting America, adding this to it and then turning right around and increasing the debt ceiling. When they increase it, it is going to be—nobody knows exactly how much it is going to be, hundreds of billions. But that is only in the last 2 months. They are going to have to come back again in February and increase the national debt ceiling again. What irony.

Mr. MCCAIN. Of course, this legislation turns everything we know about budgeting on its head, although it has been done before and it has been done by Republicans, to our shame. Today, if you go out and buy an automobile, you can drive it for a year before you have to pay for it. Under this bill, it is the opposite. You pay the taxes, you have the reductions in benefits, and then 4 years later you start having whatever benefits would accrue from this legislation. So for 4 years small businesspeople, people all over America, will see their health care costs increased before there is a single, tangible result from it—remarkable.

Mr. WICKER. The Senator mentioned the Florida carve-out. Perhaps I should have it on my map. The reason I did not is it involves Medicare Advantage and not Medicaid. The map was about Medicaid, but he makes a good point about the Florida carve-out.

I had a discussion with some of the leadership on the Democratic side on

the floor of the Senate the other day about Medicare Advantage. The strong assertion over on that side is, Medicare Advantage is not Medicare. As a matter of fact, some of the leadership in this very body said the booklet the Government puts out that says Medicare Advantage is part of Medicare should be changed. Those words should be stricken from the handout because it is not part of Medicare. The Web site the Federal Government has saying Medicare Advantage is part of Medicare, that should be changed because it is just an insurance company masquerading as Medicare.

Let me just take a second. This is Betty. Betty represents—she is from Louisiana. I don't know if she was one of the 60 percent of Louisianans who voted for Senator MCCAIN in Louisiana, but she enjoys Medicare Advantage. She was told during the election that if you like your coverage, under any plan that the Obama administration would approve, you get to keep that coverage. She gets hearing aids, vision coverage, dental care, and she likes her Medicare Advantage.

If Betty is 1 of the 150,000 seniors in the State of Louisiana who enjoy this benefit, she is at risk of losing it. But if she happens to be in the State of Florida, in any of these counties with the \$100 million carve-out, she is fortunate enough to be able to keep her Medicare Advantage.

In other words, it may not be guaranteed, but she sure likes it. Obviously, one of the Senators from Florida believes his constituents like it—again, a carve-out so this nonguaranteed, non-Medicare benefit that is not very good, they can keep it in Florida. That is in the bill and no one can deny that special treatment is given to that one State under Medicare Advantage. Again, I challenge any American to come onto the floor of this Senate and tell me how that is fair.

Mr. BARRASSO. It is not. There have been a number of references to our friend and colleague, the late Senator Ted Kennedy. Let's take a look at the book his brother, John Kennedy, wrote, "Profiles in Courage." As we have seen all this, it is time for one courageous Democrat to stand and say: This is about our country. This is about our country, not about a kickback. This is about health care, not about a hand in the cookie jar.

That is what we need. We need one courageous Democrat to stand and say: I don't want to be part of this editorial that talks about the Louisiana Purchase and Omaha Stakes. I don't want to be a part of this that says this, the world's greatest deliberative body, has now become corrupt. I don't want to be a part of this that says this is about bribery.

It needs one courageous Democrat, 1 out of 60, to stand and say: I am going to vote no; we need to back up; we need

to think about this. We have 100 Members of the Senate who want to reform health care in this country, who want to get the costs under control, who want to improve quality, who want to improve access—100 Senators want to do that. That is the goal of each and every one of us here.

We need one courageous Senator to say it is time, time now, to take a step back, let us go home over Christmas, let us think about this, let us talk to our constituents at home, let us hear what they have to say about this looking out for No. 1—\$100 million. Dana Milbank's column in the Washington Post today, that is what we need now in the Senate. We need the kind of courage John Kennedy wrote about in "Profiles in Courage."

Mr. RISCH. I say to Senator BARRASSO, you know there are already some courageous Democrats stepping up. I hope every Democrat on the other side calls their Governor and says: Governor, what do you think about this? Help me out here. I am in caucus, they bought enough votes to get to the 60. But I have to tell you I don't like the way they did it, No. 1; and, No. 2, what about the rest of us? We didn't get the \$300 million. We didn't get the X number of million. Help me out, Governor. They say they are going to shift \$25 billion to the States that you are going to have to come up with. What do you think? Do you think I ought to vote for this—or maybe if one of us steps forward and says I am going to vote no and I want to set the reset button and I want to put people back to the table and say let's do this right, we can do this right.

We are Americans. We know how to do this. We are the most innovative people in the world. All we have to do is get together and do it. But to jam this down the throats of the American people—and make no doubt about it, this is being jammed down the throats of the American people on the eve of Christmas, in the middle of the night, in the face of poll after poll that says don't do this to us.

That is what is happening. There are courageous Democrats out there. Not one of them is sitting here.

Mr. WICKER. Let me tell my friend from Idaho about some courageous Democrats. When the House version of this was being considered at the other end of this building, a number of Democrats stepped forward and said: I can't vote for this. It was very close. They have a huge majority, 40 votes over there. As a matter of fact, one Member of the House today basically said: I can't take any more. He switched parties. A Member from Alabama is now joining the Republican conference. But there are a number of loyal Democrats who have no intention of switching parties and they have stepped forward and said: I can't vote for it. Don't count me in on this.

BART STUPAK is a Representative, a courageous pro-life Representative from Michigan. He did vote for the bill. I do not impugn his motives. He did what he thought was right. But before he voted for it, he made sure legislation was included in the House version to make sure the Hyde language, which has been the law of the land for almost two decades, was included.

Here is what Representative STUPAK said yesterday or the day before yesterday about this so-called pro-life compromise that was included in the version we will have to vote on in the Senate. He said it is "not acceptable . . . a dramatic shift in Federal policy that would allow the Federal Government to subsidize insurance policies with abortion coverage."

That is a release actually on December 19.

I appreciate the courage of someone from a Democratic State, from a district that has long been Democratic, who is a member—chairman of a committee and a member of the leadership over there—stepping forward and saying: I can't go this far. Unless this language is changed—and we are told by Members of the Senate there better not be much of a conference. What we vote on, on Christmas Eve, it better sort of stay like it is or it will not be passed by the Senate when it comes out of conference.

BART STUPAK is stepping forward and saying, if that is the case, then I am switching from a yes to a no. I appreciate that kind of courageous Democrat.

Mr. MCCAIN. Can I say, I appreciate the Senator from Mississippi bringing this important aspect to this issue and continuing to do so.

I would like to pick up on what Dr. BARRASSO mentioned about the Kennedy family. It is well known I had a very close relationship, developed over the years, with Senator Ted Kennedy and that we worked together on a variety of issues. So there is a great irony in the constant, over there on the other side of the aisle, references to Senator Kennedy, who always began legislation by getting bipartisan, by getting Members of the other side of the aisle committed and working together—whether it be on immigration reform, whether it be on health care reform, whether it be on one of the great achievements of President Bush 2, No Child Left Behind.

In other words, every dealing I ever had with Senator Kennedy was to reach out, establish a fundamental base for agreement, and then move forward with legislation in a bipartisan fashion, which I think was one of the major reasons why he had such an impressive legislative record.

How did the other side do it? Without a bit of serious negotiation, without bringing anyone on board before moving forward—no one—which ends up,

now, with a 60-to-40 vote, which is a pure partisan vote and outcome when there has never been, in history, a single reform that was not bipartisan. That is why the American people are rejecting this. That is why the American people are seeing through it. To hear the constant refrain that the American people want this: Read any poll. It is just a matter of difference because the American people have figured this out. It is going to be one of the great historic mistakes—not historic—but historic mistakes made by the Congress of the United States.

Mr. MCCONNELL. If I may say to my friend from Arizona, he is absolutely right. I have had an opportunity to observe Senator Kennedy over the years. That is exactly the way he operated.

If I may, just to make a point with regard to the observation of the Senator from Mississippi about Congressman STUPAK, as I understand it, Congressman STUPAK was not asking for some special deal for Michigan in return for his vote. He was, rather, trying to establish a principle that would apply to all Americans. Is that not the case?

Mr. WICKER. That is exactly correct. I commend my former House colleague for taking that principled stand.

Mr. MCCONNELL. Could not be same thing be said for our colleague, Senator LIEBERMAN from Connecticut? I am sorry he ended up voting for this 2,700-page monstrosity, but you have to stay, as I understood his position—and Senator MCCAIN certainly knows him very well—his position was, if the government goes into the insurance business, I can't support this bill, not: I am open for business and what you can you do for Connecticut.

Mr. MCCAIN. There may be on the floor a unanimous consent request to remove the Nebraska Medicaid deal. I would hope, if there is any unanimous consent agreement at any time, that the whole bill will be fixed, which means every special provision would be removed, whether it be from Nebraska or any other State. We still have the Louisiana Purchase of \$300 million. We still have the Florida Medicare grandfather clause, \$25 to \$30 billion. The list goes on and on. The Connecticut hospital—I guess it is the Connecticut hospital. It is always in legislation, so you have to do research to see who qualifies. I would hope we could have, again, agreement that all these special provisions that affect certain specific States would be removed as well. That would go over rather well with the American people.

I want to say to my colleagues, thank you for your passion. I know a lot of people don't watch our proceedings on the floor. It has played a role in educating the American people as to what we are facing. The media played a role, advocacy groups, grassroots organizations all over America.

But I have had the great privilege of engaging in these colloquies with my colleagues. To me, it has been both helpful to my constituents, and, frankly, it has also been helpful to me to work with people who have been involved in these issues, former Governors and others. We have made some kind of contribution, which I think is what we are all sent here for.

Mr. WICKER. How much time remains?

The PRESIDING OFFICER (Mr. ROCKEFELLER). The Senator has 2 minutes.

Mr. WICKER. Unless my colleagues want to join in, I thank them for joining us and certainly thank Senator MCCAIN, one of the most distinguished public servants, someone who sacrificed for his country and who has been on this floor hour after hour.

The bill we will be asked to vote for on Christmas Eve by the administration's own Chief Actuary increases health care costs, threatens access to care for seniors, forces people off their current coverage, and actually increases the amount of the gross domestic product that will be spent on health care rather than decreasing it. These are not statements I have made; these are assessments made by the Chief Actuary for the Obama administration.

There is still time. Even if this bill passes, we will go home for Christmas, for the holidays. We will hear from our constituents. I hope we listen to that over 60 percent of Americans who say: We advise you not to vote for this legislation.

Mr. BARRASSO. It is time for a new chapter to be written in "Profiles in Courage." One of the Members of this body can be that profile. All they have to do is stand up and say: No, I will not be part of what has been called corruption in the Senate. I will not be part of what has been called, in the editorials, bribery in the Senate. I will be that courageous person and vote no. It is time for a new chapter in "Profiles in Courage."

I yield the floor.

The PRESIDING OFFICER. It is the understanding of the Chair that the Senator from Mississippi had the floor.

Mr. WICKER. I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I have several points to make. First, as a matter of personal privilege, on behalf of the people of Libby, MT, the Senator from Arizona made it sound as if the folks in Libby were getting some kind of a sweetheart deal. I wish the Senator would not leave so he can hear what is actually going on. I think the Senator from Arizona would agree with me that he would not want his constituents to suffer an environmental calamity. He would not want his constituents to not get some redress because of a declaration of public emergency due to contamination of asbestos. I assume the Senator from Arizona

would very much stand up for his constituents.

Let me explain. Congress passed a law in 1980 called CERCLA. That legislation said that whenever there was a declaration of a public emergency because of contamination at a Superfund site, the government has an opportunity to declare a public emergency and help those people get medical care because of contamination of asbestos; in this case especially, something called tremolite, which causes even greater damage than ordinary asbestos. I would assume the Senator from Arizona would want his constituents to get some help from contamination from asbestos.

Mr. MCCAIN. May I respond?

Mr. BAUCUS. Absolutely.

Mr. MCCAIN. All the Senator had to do was have it authorized, bring it up on the floor as an appropriation, and I am sure the Senator's arguments would have been far more cogent than jamming it into a bill which has to do with health care reform, the policy of health care reform.

This legislation and this cause of the Senator from Montana has been turned back several times on other grounds.

Mr. BAUCUS. This is health care. Reclaiming my right to the floor.

Mr. MCCAIN. I am responding.

Mr. BAUCUS. I reclaim my right to the floor because he doesn't want to deal in good faith with this issue.

My second point. It is disrespectful, it is unseemly for Senators in this body to invoke the names of Ted Kennedy and Jack Kennedy in opposition to this bill. It is disrespectful and unseemly. I, frankly, am very much surprised that Senators would go to that level and invoke the names of Ted Kennedy and Jack Kennedy in opposition to this legislation. Talk about profiles in courage. I hear Senators on the other side say: Where is the courage of one Senator to stand up and vote against health care reform? That is what I keep hearing. Where is the courage? Where is the courage of one Senator on the Democratic side to stand up and vote against health care reform?

Mr. President, I want to turn that around. "Profiles in Courage"—Jack Kennedy and Ted Kennedy were Senators who worked to try to find resolutions to agreements. They wanted to compromise. They wanted to work together to get just results.

I ask, where is the Senator on that side of the aisle who has the courage to break from their leadership, break from the partisanship they are exercising on their side of the aisle to work together to pass health care reform? I ask, where is the courage? Where are the Senators who have the courage on that side of the aisle to stand up and work together on a bipartisan basis to get health care reform passed? Where?

We on this side reached out our hands for bipartisan agreement on

health care reform, probably to a fault. I say "to a fault" because for months and months this Senator, anyway, extended the hand to work with other Senators on a bipartisan basis. I know the current occupant of the chair knows that. He watched this. He saw it happen in the Finance Committee.

Senator GRASSLEY and I worked very hard to get Senators on both sides of the aisle to work to pass health care reform, very hard. Then after a while we had to work toward another approach. The Group of 6—3 Republicans, 3 Democrats—worked for months on a bipartisan basis to get health care reform passed. Do you know what happened? I watched it happen. Those Senators in the room were acting in good faith. They were in good faith. They wanted to mutually work together to pass health care reform. They asked good questions. Senator ENZI from Wyoming, for example, asked very good questions. Senator SNOWE asked very good questions. Senator GRASSLEY asked very good questions. We worked to get health care reform.

But do you know what happened? I could feel it happening. One by one by one, they started to drift away. They wanted to pass health care reform. They wanted to act in a bipartisan basis. But they were pressured—pressured from their political party not to do it, not to do it, not to do it. Why were they pressured not to do it? Unfortunately, they gave in to the pressure because their leadership wanted to make a political statement. One of the Senators on the floor here said: Let's make health care Obama's Waterloo. They did not want to work with us, that side of the aisle. They did not want to work with us because they thought it was better to make a political statement: Attack the bill, attack the bill, attack the bill in order to make political points for the 2010 election. That is what they were trying to do.

I ask, where is the courage? Where is the courage? Where is the Republican Senator who will stand up and say: Boy, let's work together to pass health care reform. Where is the Senator who will stand up and say: We want to work together to pass health care reform.

This Senator tried mightily to get bipartisan support. Ask Senator GRASSLEY from Iowa, with whom I have been working for a long, long time. They were pulled away. Senator GRASSLEY—I don't want to speak for him, but I know he wanted to get health care reform passed on a bipartisan basis. I know that is the case. Frankly, he got pressured, pressured, and he just couldn't do it. I have the highest respect and regard for him, but he just couldn't do it.

Mr. WICKER. Will the Senator yield briefly?

Mr. BAUCUS. Absolutely.

Mr. WICKER. I think the Senator has really answered his own question. As a

matter of fact, Senator GRASSLEY and Senator ENZI met for hours and hours, weeks upon weeks with my friend from Montana in good faith, hoping to come up with a program that could get that 80-vote support we usually get on matters of—

Mr. BAUCUS. That is how they started out, that is true.

Mr. WICKER. And then eventually, it dawned on them that my friends on the other side of the aisle wanted to Europeanize the health care system of the United States of America.

Mr. BAUCUS. Reclaiming my time.

The PRESIDING OFFICER. The Senator from Montana has the floor.

Mr. WICKER. I thank the Senator for yielding.

Mr. BAUCUS. That is not what happened. I was in the room constantly. I talked to those Senators many times. That is not what happened. I will tell you what did happen. Your leadership pressured them, pressured them, pressured them not to work together. There was no European-style effort in that room. That is a totally untruthful statement—a totally untruthful statement. None whatsoever. We are passing a bill here that is a uniquely American solution. It provides competition. It helps the doctor-patient relationship. That assertion of working toward a European solution is entirely untrue. It is entirely false.

The fact is, those Senators did not want to work with us. It is regrettable. It is highly regrettable. One of the biggest travesties here is there was not a good-faith effort on that side of the aisle to come up with a constructive, comprehensive alternative to the Democratic version of health care reform. If there had been a constructive, honest, alternative health care reform, we could have had a really good debate. What is the better approach to solving the health care problem? That did not ever happen. It did not ever happen at all. Rather, they didn't have anything. They didn't have a health care bill. None whatsoever.

The only one that came up a little bit was over in the House. Because of all the criticism about Republicans not having an alternative, finally the Republicans in the House came up with an alternative. It was very small. There wasn't much to it. To be honest, the CBO said it would hardly increase any coverage whatsoever. It was not really a comprehensive health care reform bill. And there has been none in the U.S. Senate on the Republican side, no alternative for a comprehensive health care reform bill.

I want the public to know we worked very hard to get a bipartisan bill. That side of the aisle started without working with us, but gradually they began to believe that politically they would have a better chance in the 2010 elections by just not working with us but just attack, attack, attack, attack,

trying to score political points to defeat any honest effort to get health care reform.

I now yield such time as he would like to the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. NELSON of Nebraska. Thank you, Mr. President.

Well, this has been quite an enlightening experience on the floor this past 30 or 40 minutes. It shows how emotionally charged this body has become over this issue and perhaps other issues as well. But the challenge is, we are all entitled to our own opinions. We are just not entitled to our own set of facts.

I would like to take a moment to explain the so-called Medicaid fix for the State of Nebraska. Now, it has been described as the "Omaha Stakes fix." I take issue—and I only wish my colleague from Nebraska had stayed on the floor to hear this. I take issue with one of the premier businesses in the State of Nebraska used in a manner of derision to outline something that is factually incorrect on the basis of how they are presenting it.

You can twist and you can turn and you can try to distort what happens, but it does not change the underlying facts. The underlying facts are, this was pursued initially as an opt-in or opt-out for all States. It was impossible to do that at the present time, and so as a matter of fix, there was, in fact, the extension of the Federal dollars from the year 2017 on, well into the future, as a marker to lay down so that every State could object to this manner of unfunded mandates.

As a Governor—and my colleague is a former Governor—we fought against Federal unfunded mandates. As a Senator back here, I have also fought against unfunded and underfunded Federal mandates. This was, in fact, exactly that. While we were not able to get in this legislation an actual opt-out or opt-in for a State-based decision, what we did get is at least a line, if you will, so that in the future other States are going to be able to come forward and say: Hey, either the Federal Government pays for that into the future or the State will have the opportunity to decide not to continue that so that we do not have an unfunded Federal mandate.

So I am surprised. I am shocked. Well, actually, I am not shocked. I am disappointed this would be used and misused in this fashion, not only derisively against a great company in Nebraska—the Nebraska Steaks—I am also surprised my colleague would participate in a colloquy that would use the name of that company in such a manner.

I am surprised this colloquy went on without understanding the facts of what this so-called carve-out—which is not a carve-out—truly consisted of.

There is no carve-out. Each State between now and 2017—two-thirds-plus of a decade—will have an opportunity to come back in and get this bill changed.

Governors asked for relief. As Governors, we asked for relief against these continuing unfunded mandates. Time and time again, we fought against them. This was one more opportunity to fight. As a matter of fact, the Governor of Nebraska spotted this and wrote me a letter on December 16 and said, among other things:

The State of Nebraska cannot afford an unfunded mandate and uncontrolled spending of this magnitude.

He goes on to say a number of other things about the bill. But he makes the point that this is an unfunded Federal mandate and wanted me to do something about it.

So I sent him back a letter on the same date, saying:

Thank you. . . .

Please be advised that I have proposed that the Senate bill be modified to include an "opt-in" mechanism to allow states to avoid the issues you have raised. Under my proposal, if Nebraska prefers not to opt in to a reformed health care system, it would have that right.

My colleague and others know this is the case. They know this is the case, but they choose to ignore it. They choose to ignore the facts.

On December 20, I again wrote to the Governor and shared with him my concern about this unfunded mandate, and I pointed out that:

Within hours after the amendment was filed, [my colleague from Nebraska] objected to the inclusion of these funds. As a result, I am prepared to ask that this provision be removed from the amendment in conference if it is [the Governor's] desire.

I got a letter back on the day after, on December 21, talking about this as a special deal. It is not a special deal for Nebraska. It is, in fact, an opportunity to get rid of an unfunded Federal mandate for all the States. Let me repeat that: for all the States. There is nothing special about it, and it is fair.

What we have done is we have drawn a line in the sand and said: This is unacceptable, and it is unacceptable for all States as well. I cannot believe that this sort of a situation would continue. There is no misunderstanding here. I think it is just an opportunity to mislead, distort, and, unfortunately, confuse the American public all the more, and to use the State of Nebraska and the name of a good company for partisan political purposes on the other side of the aisle.

My colleagues know I am not a deeply partisan person and that I rarely come to the floor to speak, and that when I come to the floor, it is for something like this, to take exception with the misuse of information for partisan purposes. That is exactly what has been done with this situation.

I am prepared to fight for the State of Nebraska, and I hope my colleague is

as well. Obviously, the Governor was prepared to fight for the State of Nebraska by bringing it to my attention. But I am not prepared to fight to get a special deal for the State of Nebraska. I did not, and I refuse to accept that kind of responsibility or that kind of a suggestion from anyone on that side of the aisle or anyone else.

Then, as it relates to abortion, I think my colleagues know that we introduced legislation that is comparable to the Stupak legislation in the House dealing with barring the use of Federal funds for elective abortions. We introduced it over here, and it was bipartisan. It was Nelson-Hatch-Casey, and it did not pass. So I began the process of trying to find other solutions that I thought equally walled off the use of Federal funds and made it clear that no Federal funds would be used.

Now, apparently I did not say "mother may I" in the process of writing that language because others took issue with it, even though they cannot constructively point out how it does not prohibit the use of Federal funds or wall off those funds or keep them totally segregated. They just did not like the language.

Well, if in the conference the Stupak-Nelson-Hatch-Casey language passes, I will be happy, and so will Congressman STUPAK, and so would, I would imagine, those who signed on to that legislation. It is unfortunate, though, to continue to distort and misrepresent what happens in the body of the Senate. It is difficult enough to have comity. It is difficult enough to have cooperation. It is difficult enough to have collegiality. When politics are put above policy and productivity, this is what we get.

Mr. President, I am very disappointed, somewhat disillusioned, by the use of this method and this approach that would undermine the good name of a company in Nebraska, as well as the name of the State of Nebraska, by associating it with something that has not been done, was not intended, and did not result.

Mr. President, with that, I yield the floor.

The PRESIDING OFFICER. Who seeks recognition?

Mr. BAUCUS. Mr. President, I yield 15 minutes to the Senator from Delaware.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. CARPER. Mr. President, let me just express my thanks for those 17 minutes.

I would ask the Chair to please advise me when I have used 15 of those minutes.

The PRESIDING OFFICER. The Chair will do so.

Mr. CARPER. Mr. President, listening to the debate today reminds me of, among others, a famous quotation from Winston Churchill, who, I believe, said: "The worst system devised by wit of

man”—he was talking about democracy. He said it was the worst form of government devised by wit of man, and then he added “except for all the rest.”

We like to sort of lecture the Iraqis and Afghans on how to run a democracy, and we still struggle with it after more than 200 years. In the 8 or 9 years I have been here, I have never seen us struggle as much as we have on the issue of health care. Part of the reason is because it is just enormously complex, and it is just confusing.

As to the people who are following the debate, if you listen to folks on the political left, mostly in our party, what you hear is: No public option, no Medicare buy-in, we are not doing enough to make health care affordable. What you hear from the right, mostly on the other side of the aisle, is, this is government run, this is government funded, this is a government takeover.

So you have the two extremes out here trying to take shots at one another. Those of us in the middle are sort of collateral damage or road kill. But at the end of the day, a lot of times when you find neither the left nor the right are entirely pleased with the outcome, sometimes that suggests that the outcome is not all that bad.

I am not saying this is a perfect balance, but it is not a bad balance. For those, especially in our party, who feel as though we should have done more, I am sure in 1965, when Lyndon Johnson signed into law the Medicare legislation, there were probably some who did not vote for it—and I am told it was mostly Democrats who voted for it, not so much our Republican friends—but I am not sure how many Democrats who voted for Medicare at the time said: It does not do enough for our senior citizens. It does not provide for hospice care. It does not provide for home health care. It does not provide for disability benefits for those who are under the age of 65. There is no prescription drug program. There is nothing for outpatient surgery. None of those things were in the original Medicare legislation. Over time, they have been added, and I think the Medicare legislation, the Medicare law, has been improved to make it a better program.

Now we face a day when the Medicare Program is literally running out of money. One of the less-told secrets in the legislation that is before us is that the life of the Medicare trust fund—life that has been down to about 7 or 8 years—I understand, thanks to the reforms that are in this legislation, should be pretty much doubled. That is not good enough, but we are going to stretch by about 100 percent the useful remaining life of the Medicare Program.

Another fact that is sort of lost in all the debate, all the tumult, is what this does with respect to our budget deficits. I am told by—not us, not Democrats or Republicans—the neutral Con-

gressional Budget Office, which is neither Democratic nor Republican—nonpartisan—that the legislation, if we adopt it in its current form, will reduce the deficit over the next 10 years by about \$130 billion, and by as much as maybe \$1 trillion, \$1.3 trillion in the second 10 years beyond that.

In terms of what is going to happen as to the cost of premiums, we are told, again, by the nonpartisan Congressional Budget Office that rather than spiking premiums, we are actually going to see people get somewhat better coverage for, frankly, not more money in terms of their premiums.

In terms of those of us who just love the health insurance we have—we are delighted with the coverage and the amount we pay for it—I would just remind all of us of a couple things: One, we have spent more money by far than any nation on Earth for health care—about 1½ times more than the next closest country. We do not get better results. In many cases, we get worse results.

We have about 14,000 people who woke up with health care coverage who will wake up tomorrow morning and they will not have it; they will have lost it. Over 40 million people in our country have no health care coverage at all.

Finally, we have big companies such as GM and Chrysler that have gone bankrupt because they cannot compete with foreign competitors because of the price of our health care; and that is true with a lot of smaller companies as well.

The idea of doing nothing is, to my mind, not a very smart thing to do. We have to do a number of things to accomplish three goals: No. 1, rein in the growth of health care costs. This idea of two, three times the rate of inflation in the growth of health care costs is not sustainable. Frankly, if we do not rein in the growth of health care costs, neither will be sustainable the coverage we extend to people who do not have it today.

The third thing we try to work on in this legislation, to the extent we can—a lot of interesting things are going on in the private sector, very interesting things going on in the private sector, regarding how to instill personal responsibility in employees, and how to get better transparency and better costs through the health care delivery system. That is going to be a part of this as well. But we have to figure out a way to get better outcomes, and there are a lot of good examples for doing that.

I want to take the remaining time I have today to just mention some things that are in the legislation that I think make sense because they are based and founded on what works. And as an old Governor—and Senator NELSON has already spoken from Nebraska—we are used to focusing on

what works and trying to replicate what works, steal ideas from other States and try to work them in our own State. I want to mention a couple things we have taken that work. We are trying to grow them and, in some cases, on a national level.

One of things Senator BAUCUS and his staff in the Finance Committee focused on, I think, is maybe the best idea in the health care legislation, something called an exchange.

When I was a naval flight officer, we used to go to the exchange on the base which was a place to buy stuff. It was like a little department store. The exchange in health care delivery, which will open in January 2014—I hope we can actually stand up the exchanges and open the exchanges sooner—but that is going to be a place for people to go and buy health care coverage. When people do that, they will become part of a purchasing pool in their State or maybe in a couple of States to sort of band together and form a regional purchasing pool.

Why is a purchasing pool important? Well, because we are part of one, and we know that with 8 million people in our purchasing pool—Federal employees, Federal retirees, all of our dependents—we get a lot of competition. A lot of private sector companies want to offer us products to choose from. We don't get cheap insurance, but we get pretty good prices. With 8 million people in a purchasing pool, we really drive down administrative costs to about 3 percent for every premium dollar. That is a lot lower than folks who try to go out and buy it on their own in the open market. They may pay 33 percent of their premium dollar for their administrative costs. They are not paying 3 percent. We are going to try to replicate that. We do it in the exchange.

There may be 50 exchanges throughout the country, some regional exchanges as well. So we do exchanges as well. When States create interstate compacts across State lines, such as Delaware with New Jersey or maybe Delaware and Maryland or Delaware and Pennsylvania, maybe all four of us, insurance sold in any of those four States can be sold across State lines and introduce new competition, additional competition for business and for the folks looking for coverage for those two or three or four States.

Another thing that works is the delivery system, delivery of health care in outfits such as the Cleveland Clinic and the Mayo Clinic, Geisinger in Pennsylvania, not far from where we are in Delaware, Intermountain Health out in Utah, and Kaiser Permanente in California.

I actually went with Rachael Russell, a member of my staff, to the Cleveland Clinic about 3 months ago. What we found was the Cleveland Clinic and the Mayo Clinic and Geisinger and all

these others pretty much all have the same template. They focus on primary care. They focus on prevention and wellness. They coordinate the care of folks who are receiving treatment. All of their patients have electronic health records.

Medical malpractice coverage is provided by the entity itself, the Mayo Clinic, Cleveland Clinic, and all the docs are on salary. They have gone after what we call not just defensive medicine but fee-for-service, and they have done a very good job reducing the problems that flow out of fee-for-service which lead to more utilization and unnecessary utilization of time, tests, technology. They get better outcomes and they spend less money.

What we are trying to do with this legislation is to take those health care delivery ideas from those nonprofits and instill them into the delivery of health care, particularly through Medicare but also in other ways too.

I like to shop for groceries. We have a bunch of good grocery stores in Delaware. One of the places I shop for groceries occasionally when I am in my State is a place called Safeway, in Dover. A guy named Steve Burd is the CEO of the company, and they have really helped inform our decision-making in this debate in ways that are pretty remarkable by virtue of the way they provide coverage to their employees. It is not just Safeway. It is not just Pitney Bowes. There are a number of companies that are figuring out how to get better results for less money, and we are borrowing some of their ideas.

One of the ways we are borrowing is to say, how does Safeway provide—literally flattening out for the last 4 or 5 years—health care coverage for their employees? They haven't reduced their benefits. One of the things they have done is to incentivize their employees, use financial incentives to get employees to—if they are overweight, to control their weight, get their weight down, and if they do that, their payments are reduced. If they are smokers, they get rewarded for stopping smoking. If they have high cholesterol or high blood pressure, they get rewarded by reduced premiums for reducing their cholesterol and blood pressure.

What we have done with our legislation—and I thank the chairman and my colleagues for their support, Democratic and Republican, for supporting an amendment by Senator ENSIGN and myself where employers would be able to provide a 30-percent discount to employees who do the right thing for their own health. By doing that, they will reduce health care costs for not just their employer but for others in the group in which they are covered.

There is another piece in the legislation that really borrows from an idea that is popping up in a couple of cities and maybe a State or two around the

country, and that is, Why don't we better inform people? We are interested in personal responsibility, people taking charge of their own health and reducing their health care liability. Why don't we do a better job of ensuring that—when I go into a restaurant or anybody goes into a restaurant, we look at the menu board of a chain restaurant and we know right then and there what the calories are in what we are drinking or eating, for an entree, for a salad or dessert. I know it right there by looking at the menu board if it is a chain restaurant. If it is a menu, not a board, they have to have that information on the menu. They have to have on site additional information on 10 other items, including fats, trans fats, cholesterol, sodium, and on and on.

The idea is to make us better informed consumers. As we try to fight obesity in this country—about a third of our country is obese or overweight, and adults are worse than kids. Kids are catching up with their parents, unfortunately. That is one of the things that is in the legislation. We call it the Lean Act. The idea is to try to provide personal information so people can assume personal responsibility.

Speaking of what we should eat or not eat, I wish to mention doughnuts, and I will do it in the context of something called the doughnut hole. Folks who are Medicare eligible have probably heard this term before because under the Medicare prescription drug program, when people's out-of-pocket costs reach about—when their cost for medicines, their prescription medicines, reach about \$2,500, the first \$2,500, Medicare pays 75 percent of the cost and the individual pays 25 percent of the cost. But once a person's prescription costs reach \$2,500 up to about \$5,500, for most people Medicare doesn't pay anything and the individual pays it all. That \$2,500 to \$5,500 gap is called the doughnut hole. It has nothing to do with doughnuts, but that is the name we have given to it.

In the legislation that is before us—again, I give a lot of credit to our chairman and others who have negotiated this—we are going to fill the doughnut hole. We are going to basically cover people who are in that gap of the \$2,500 to \$5,500 so that people will be able to continue to take the medicine they need to take. They won't stop. They will have the availability to medicine.

They will also have access to something called primary care. I am at the tender age of 62, and I think my Presiding Officer, also from Delaware, is just about the same age as I. When people in this country end up being old enough for Medicare, they get a one-time-only Medicare physical. That is it—one time. If they live to be 105, they never get another one, at least not paid for by Medicare.

In terms of borrowing good ideas from the nonprofits, the Cleveland Clinics and the Mayo Clinics, we are going to say you get more than just one physical. You get it when you are 65 and 66 and 67 and 68, and if you live to be 105, God bless you, you will get it every year up until then; finding out what is right with people, what is wrong with people, and what they need to do more of or less of. That is a smart idea, and it is part of the reforms in the legislation.

In terms of going back to medicine, we want to make sure people have good access to primary care, annual physicals if they are on Medicare, so their doctor can find out what is wrong with them, if they need to exercise, stop smoking, control their weight, whatever that might be, but also to learn if there are some medicines they ought to be taking, and second, to make sure they can afford them. Third, our legislation actually improves their lives in terms of if medicines are prescribed, they will actually be taken and used the way they are prescribed.

There is a little piece in this legislation that Senator RON WYDEN deserves a lot of credit for called personalized medicine. The idea is that if there are certain people who, because of their genetic makeup, the way God made them, they have a particular condition and the medicine is not going to help them—if the same group of people have the same problem—or if a different group of people have a different genetic makeup and the medicine will help one group and not the other, we want to make sure we spend the money on the folks who will be helped and not waste money on the folks who will never be helped because of their genetic makeup—literally, the way the Good Lord made them. That is called personalized medicine, and it is in this legislation. I think in the future it will be a very important addition.

Lastly, I want to build on a proposal offered again by Senator BAUCUS with Senator ENZI, and the issue is defensive medicine.

The ACTING PRESIDENT pro tempore. The Senator has used 15 minutes.

Mr. CARPER. Thank you.

The issue is defensive medicine. The issue is medical malpractice. There have been a couple of amendments offered by friends across the aisle for us to try to deal with the incidence of medical malpractice lawsuits, the defensive medicine that sort of flows from there where doctors prescribe really too many tests and too many procedures and maybe too many of the wrong kinds of medicine just in an effort to reduce the likelihood they are going to be sued. What we have done here is to take an idea from the States.

The States have done some very interesting stuff with respect to trying to make sure we reduce the incidence of medical malpractice lawsuits, that

we reduce the incidence of defensive medicine, and we actually improve health care outcomes. We are going to take those ideas, one called Sorry Works that they were using up in Michigan where people have an opportunity—doctors have an opportunity to apologize and offer a financial settlement to people and patients who have been harmed by that doctor; an idea called panels of certification like we have in Delaware where before I can sue my doctor I have to go before a panel to find out if my suit has any basis in fact. We are going to take ideas like safe harbor. If a doctor does all the things by the book, everything by the book, should that doctor receive some kind of expectation that maybe they are safe from lawsuits or reduced exposures to lawsuits? We think there should be some of that. There is the idea of health courts, where there are folks on the court, like the bankruptcy courts, folks who are the experts, and before a suit can actually go into a court, that health court would actually sit in determination of whether a doctor or a hospital or a nurse has really messed up. Those are all ideas that are being talked about, experimented with.

We are going to make sure they are robustly tested. States are going to apply for grants to test those ideas and maybe others to accomplish three things: one, reducing medical malpractice lawsuits; two, reducing the incidence of defensive medicine; and three, and most importantly, improving health care outcomes.

Those ideas build on what works. They are not Democratic ideas. They are not Republican ideas. I think they are just smart ideas for the most part. They are ideas that, as time goes by, people will find out if they really do the trick in helping to rein in health care costs so the coverage we extend can be sustained.

I will just close with this, if I could. For the folks in this country who are totally confused by all this, for the people who are scared that we are doing something really foolish and it is going to be a disaster for our country, let me just say that when all the negative ads sort of stop being funded, when folks have actually had a chance to understand some of the things I have talked about here today and a lot of the aspects of the bill that really will improve outcomes, that really will rein in the growth of cost, that really will extend coverage, I think they really will be pleasantly surprised.

In closing, I am the guy who came here always believing that Democrats and Republicans should work together. I know our chairman tried mightily in the Finance Committee to do that, and I commend him and others for their effort. When we come back, we can't have another 12 months of this or 12 years of this. Our country is in trouble if this is the way we are going to be

doing business in the future. Our country is in trouble.

My hope is that we will get this done, we will get it behind us, we will improve the bill in conference, and the President will provide a signature for us, and we will go back to work on implementing this. Just like Medicare. Just like Medicare. The key isn't just to stop; the key is to make it better and to build on this as a foundation. I am committed to doing that. I know my colleagues on this side of the aisle are committed to doing that. My hope and prayer is that our friends on the other side will want to join us in that effort.

Again, I commend our chairman of the Finance Committee, our leadership, Senator REID, and others. I commend my friend OLYMPIA SNOWE, who showed a lot of courage during the course of this debate in committee and here on the floor. She was under enormous pressure, as were some of our Republican colleagues on the Finance Committee whom I am convinced would like to have been with us, and I believe we would have had an even better bill if the pressure from within their own party had allowed them to be more fully participative. But that wasn't the case this time. It has to be the next.

On that happy note, I say to my colleagues, we will gather again after the holidays and get this job done and look forward to working on a host of other issues. None will be more important than this one. None will be more important than this one.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Montana.

Mr. BAUCUS. Mr. President, I want to begin by saying I agree with my colleague from Delaware. This partisanship has to stop. It is just too much. It is ironic, it is bittersweet that we are reaching a high point because we are going to pass health care reform legislation, but we are reaching a low point, too, in terms of partisanship. It is very unfortunate. Many of us over the last several days have been scratching our heads just trying to figure out what we can do to avoid this next year. Hope springs eternal.

I know this Senator and I know the occupant of the chair want to try to find ways for this body to be much more civil. We are not just blowing smoke here. We really mean it. I thank very much the Senator from Delaware for raising that point. It is needed, and I do think this country is in trouble if we don't find some solution to handle this excessive partisanship which is certainly hurting our country.

On another matter, some of my colleagues on the other side of the aisle have asserted that the penalty that is proposed under the bill before us for failing to maintain health coverage is unconstitutional. One Senator has

raised a point of order—Senator ENSIGN—on that subject, and that is now pending.

Those of us who voted to proceed to the health reform bill and who voted for cloture on the substitute amendment take seriously our oath to defend the Constitution. Every Senator here takes that oath of office very seriously.

We have seriously looked at this question as well and have concluded that the penalty in the bill is constitutional.

Those who study constitutional law as a line of work have drawn that same conclusion. Most legal scholars who have considered the question of a requirement for individuals to purchase health care coverage argue forcefully that the requirement is within Congress's power to regulate interstate commerce.

Take Professor Erin Chemerinsky, a renowned constitutional law scholar, author of four popular treatises and casebooks on constitutional law and the dean of the University of California Irvine School of Law. Professor Chemerinsky has gone so far as to say that those arguing on the other side of the issue do not have "the slightest merit from a constitutional perspective."

In arguing that a requirement to have health care coverage falls within Congress's power to regulate interstate commerce, Professor Chemerinsky compares health care reform to the case of *Gonzales v. Raich*—often cited by the other side. In that case, the Supreme Court held that the Federal Government's commerce clause powers extend to the cultivation and possession of small amounts of marijuana for personal use. Professor Chemerinsky notes that the relationship between health care coverage and the national economy is even clearer than the cultivation and possession involved in *Gonzalez v. Raich*.

Mr. President, I ask unanimous consent that Professor Chemerinsky's Los Angeles Times article be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[FROM THE LOS ANGELES TIMES, OCT. 6, 2009]

THE CONSTITUTIONALITY OF HEALTHCARE

(By Erwin Chemerinsky)

Are the healthcare bills pending in the House and Senate unconstitutional?

That's what some of the bills' critics have alleged. Their argument focuses on the fact that most of the major proposals would require all Americans to obtain healthcare coverage or pay a tax if they don't. Those too poor to afford insurance would have their health coverage provided by the state.

Although the desirability of this approach can be debated, it unquestionably would be constitutional.

Those who claim otherwise make two arguments. First, they say the requirement is beyond the scope of Congress' powers. And second, they say that people have a right to be

uninsured and that requiring them to buy health insurance violates individual liberty. Neither argument has the slightest merit from a constitutional perspective.

Congress has broad power to tax and spend for the general welfare. In the last 70 years, no federal taxing or spending program has been declared to exceed the scope of Congress' power. The ability in particular of Congress to tax people to spend money for health coverage has been long established with programs such as Medicare and Medicaid.

Congress has every right to create either a broad new tax to pay for a national healthcare program or to impose a tax only on those who have no health insurance.

The reality is that virtually everyone will, at some point, need medical care. And, if a person has certain kinds of communicable diseases, the government will insist that he or she be treated whether they are insured or not. A tax on the uninsured is a way of paying for the costs of their likely future medical care.

Another basis for the power of Congress to impose a health insurance mandate is that the legislature is charged with regulating commerce among the states. The Supreme Court has held that this means Congress has the ability to regulate activities that have a substantial effect on interstate commerce. A few years ago, for example, the court held that Congress could prohibit individuals from cultivating and possessing small amounts of marijuana for personal medicinal use because marijuana is bought and sold in interstate commerce.

The relationship between healthcare coverage and the national economy is even clearer. In 2007, healthcare expenditures amounted to \$2.2 trillion, or \$7,421 a person, and accounted for 16.2% of the gross domestic product.

The claim that individuals have a constitutional "right" to not have health insurance is no stronger than the objection that this would exceed Congress' powers. It is hard to even articulate the constitutional right that would be violated by requiring individuals to have health insurance or pay a tax.

Since the 19th century, the Supreme Court has consistently held that a tax cannot be challenged as an impermissible taking of private property for public use without just compensation. All taxes, of course, are a taking of private property for public use, and a tax to pay for health coverage—whether imposed on all Americans or just the uninsured—is certainly something Congress could impose.

The claim that an insurance mandate would violate the due process clause is also specious. Most states have a requirement for mandatory car insurance, and every challenge to such mandates has been rejected. More important, since 1937, the Supreme Court has constantly held that government regulations of property and the economy will be upheld as long as they are reasonable. Virtually every economic regulation and tax has been found to meet this requirement. A mandate for health coverage would meet this standard, which is so deferential to the government.

Finally, those who object to having health coverage on freedom-of-religion grounds also have no case. The Supreme Court has expressly rejected objections to paying Social Security and other taxes on religious grounds. More generally, the Supreme Court has ruled that individuals do not have a right to an exemption from a general law on the ground that it burdens their religion.

There is much to debate over healthcare reform and how to achieve it. But those who object on constitutional grounds are making a faulty argument that should have no place in the debate over this important public issue.

Mr. BAUCUS. Mr. President, as a second example, I refer my colleagues to an article by Mark Hall, a law professor at Wake Forest University. His article is a comprehensive peer-reviewed analysis of the constitutionality of a Federal individual responsibility requirement.

In this article, Professor Hall concludes that there are no plausible 10th amendment or States' rights issues arising from the imposition by Congress of an individual responsibility to maintain health coverage.

Professor Hall notes further that health care and health insurance both affect and are distributed through interstate commerce, and that gives Congress the power to legislate a coverage requirement using its commerce clause powers.

Professor Hall notes that the Supreme Court indicated in its decision in *U.S. v. Morrison* and *U.S. v. Lopez*—two other cases relied on by the other side—that the noneconomic, criminal nature of the conduct in those cases were central to the Court's decisions in those cases that the government had not appropriately exercised power under the commerce clause.

Health insurance, on the other hand, does not deal with criminal conduct. Health insurance is commercial and economic in nature and, to reiterate, substantially affects interstate commerce.

Health insurance and health care services are a significant part of the national economy. National health spending is 17.6 percent of the economy, and it is projected to increase from \$2.5 trillion in 2009 to \$4.7 trillion in 2019.

Private health insurance spending is projected to be \$854 billion in 2009. It covers things such as medical supplies, drugs, and equipment that are shipped in interstate commerce.

Health insurance is sold by national or regional health insurance carriers. Thus, health insurance is sold in interstate commerce. As well, claims payments flow through interstate commerce.

The individual responsibility requirements, together with other provisions in the act, will add millions of new consumers to the health insurance market, increasing the supply and demand for health care services.

Under existing health and labor laws, the Federal Government has a significant role in regulating health insurance.

Other prominent legal scholars have also said that Congress has the constitutional authority to impose a requirement on individuals to maintain health coverage.

Jonathan Adler, a professor of law at Case Western Reserve University School of Law, stated:

In this case, the overall scheme would involve the regulation of "commerce" as the Supreme Court has defined it for several decades, as it would involve the regulation of health care markets. And the success of such a regulatory scheme would depend upon requiring all to participate.

Doug Kendall of the Constitutional Accountability Center similarly concluded:

The fundamental point behind pushing people into the private insurance market is to make sure that uninsured individuals who can pay for health insurance don't impose costs on other taxpayers.

Professor Michael Dorf of the Cornell University Law School also noted:

[T]he individual mandate is "plainly adapted" to the undoubtedly legitimate end of regulating the enormous and enormously important health care sector of the national economy. It is therefore constitutional.

Robert Shapiro, a professor of law at Emory University School of Law, stated:

When everyone thinks of the wisdom of an individual mandate, or of health care reform generally, it would be surprising if the Constitution prohibited a democratic resolution of the issue. Happily, it does not.

Thus, Mr. President, the weight of authority is that health care and insurance represent interstate commerce. The individual responsibility requirement to maintain coverage would be within Congress's power to regulate interstate commerce.

Mr. President, in the last hour, several Senators on the other side listed many organizations they claim oppose the bill before us. I will indicate many organizations that favor the health care reform bill.

I will begin with the American Medical Association. That is the major doctors association that supports this legislation. In fact, the incoming president, the president-elect of AMA, at a press conference yesterday, made that statement very clear.

In addition, the American Heart Association supports the legislation. They believe the many patient-centered provisions are a significant step toward meaningful health care.

The American Hospital Association supports passage of the legislation.

The American Cancer Society Action Network supports it.

The Federation of American Hospitals also supports it.

The National Puerto Rican Coalition supports this legislation.

Mr. President, it would be unfair to say that these are all totally 100 percent endorsements. Rather, these are statements of support from these organizations. Some totally support it, and some say there are very good features in it. As far as I know, none of these groups totally oppose this legislation. Some would like to see some changes, but they favor the legislation.

The American Association of Retired People supports this legislation. That is the largest seniors group. They think this is good—I am sure for a lot of reasons, but it extends the solvency to the Medicare trust fund for another 5 years.

The Business Roundtable supports this legislation. They say:

On behalf of the members of Business Roundtable, I want to commend you for your efforts to improve the health care reform legislation currently being considered by the United States Senate. The proposed legislation is a step toward our shared goal of providing high quality, affordable health care for all Americans. . . . As we understand it, the proposed legislation now will include provisions to accelerate and enhance the process for delivery reform for the Medicare system. . . . It strengthens the match between the insurance reforms and the individual obligation. . . . We will continue to work with you, the Congress and the Administration to ensure we achieve the goals we all set when this process began.

The American Diabetes Association also supports this bill. They say it is “long overdue improvements to our broken health care system.”

The Small Business Majority also believes the managers’ amendment “includes new provisions essential for small business protection and survival.”

Doctors for America supports passage of this bill.

The National Hospice and Palliative Care Organization strongly supports this legislation. There has been confusion as to whether they did. But they strongly support it, saying:

On behalf of hospice and palliative care providers and the more than 1.5 million patients, and their families . . . would like to express our strong support for the national effort to enact health care reform. We acknowledge the enormity and complexity . . . and we applaud your recognition of the importance of various provisions. . . .

Families USA supports this legislation. I already mentioned AARP, which also supports it. Community Catalyst is another organization that supports it. U.S. PIRG supports it. The Center for American Progress supports it. Medco Health, Microsoft, a big company in the United States, makes a strong statement approving the measure we are considering here.

Many organizations support this legislation. I am sure there are more, but this is an example of a few.

How much time remains on our side? The ACTING PRESIDENT pro tempore. There is 10 minutes remaining.

Mr. BAUCUS. Mr. President, I yield 10 minutes to the Senator from Pennsylvania.

The ACTING PRESIDENT pro tempore. The Senator from Pennsylvania is recognized.

Mr. CASEY. Mr. President, I commend the work of our Finance Committee chairman, MAX BAUCUS, for so many things in this debate. First, for helping us get health care legislation

moving in 2009 and now at the point of getting close to passing the bill. I am grateful for his leadership. There are some highlights of the bill I want to note in the remaining moments of our time.

First, there has been a lot of debate over the last couple of days and weeks—but even over months—about cost and care. Fortunately, we are able to report that with this bill coming out of the Senate, we will have more care and less costs. The deficit will be cut by \$132 billion over 10 years as a result of this bill; \$1.3 trillion will be cut in the deficit in the second decade.

It will provide coverage for 94 percent of the American people. This has not been talked about much, but the bill is a net tax cut for the American people. We are going to crack down on insurers’ practices that have gone on too long, were allowed to go on for too many years: ending preexisting condition discrimination, and discrimination based upon gender, providing protection from exorbitant out-of-pocket costs, something we hear about all the time.

Just with regard to older citizens across our country, one, the bill will extend the solvency of Medicare; two, it makes prescription drugs more affordable by filling the so-called doughnut hole and helping people with those costs; cutting waste, fraud, and abuse in Medicare; ensuring Medicare funding to improving care for seniors not to insurance companies.

Small businesses—if there was one sector of our economy we have heard from over and over about the crushing burden of health care costs, it is small businesses. I know that tens of thousands of small businesses in Pennsylvania, for example, will benefit from this legislation.

There are two points with regard to the bill and small business. First, the bill provides tax credits to small businesses to make employee coverage more affordable.

Second, tax credits of up to 50 percent of premiums will be available to eligible firms that choose to offer coverage—a tremendous breakthrough for people out there who are creating most of the jobs in Pennsylvania and most of the jobs nationally.

One of the more unreported or underreported aspects of the bill is what happens immediately. A lot of folks say: We like your bill. We like what is going to happen. But a lot of it won’t take effect for at least several years, until 2014.

A good part of the bill takes effect in 2010. A quick summary of those provisions: First, it provides affordable coverage to the uninsured with preexisting conditions. If there is an insurance company that excludes you because of a preexisting condition, you can go into a high-risk pool to get help right away.

It improves care to older citizens, as I mentioned, and lowers prescription drug costs.

It reduces costs for small businesses through tax credits.

Fourth, it extends coverage for young adults—young adults 25, 26 years old, who may be living under difficult circumstances and don’t have insurance coverage. Preventive care—we preached and talked about that for years, and we point to studies and good practices, but we have never made it part of our overall health care bill. This bill does it.

We eliminate lifetime limits on the amount of coverage a person may receive—a terrible problem for families. The message from our system has been that we can cure you, but we have to limit the kind of care we are going to provide for you.

Three more points in this area: What are the immediate benefits in 2010? It prohibits discrimination based upon salary, gender, or illness. We make insurance plans more transparent and competitive.

Finally—and this is a rather new change—it prohibits insurance companies from denying children coverage due to a preexisting condition.

That has moved up in the bill, so to speak, to an immediate benefit for children. So at least in the short term for children, there will be no more denying them coverage due to a preexisting condition—a tremendous breakthrough for a child, for his or her family, and for our economy and for our health care system, to protect children in a very substantial way. Whether it is cutting the deficit, providing better quality of care, providing opportunities for great prevention which will lead to a healthier outcome, protecting people so they do not have to go bankrupt to get the care they need, and especially for protecting older citizens and children, this bill moves forward in a way we have never had an opportunity to move our system forward in a very positive way.

I again commend Chairman BAUCUS on his work and our majority leader, HARRY REID, and all those who made it possible to move this bill forward and to have it passed through the Senate and move it to enactment.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Montana.

Mr. BAUCUS. Mr. President, I see no Senator seeking recognition. I ask unanimous consent that the next block of time begin immediately.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Florida.

Mr. LEMIEUX. Mr. President, I thank the chairman of the Senate Finance Committee for his courtesy. I appreciate the opportunity to be here.

I understand, Mr. President, I have a certain allotment of time. If I can be

notified when I have 2 minutes remaining, I would appreciate that.

The ACTING PRESIDENT pro tempore. The Chair is unaware of any restrictions. There is 1 hour for the Senator's side.

Mr. LEMIEUX. OK. If I can be notified when I have spoken for 20 minutes.

The ACTING PRESIDENT pro tempore. The Chair will so notify the Senator.

Mr. LEMIEUX. Mr. President, I rise today to talk about this health care bill. I have spoken about it before. I feel obligated on behalf of my State of Florida to explain why I, unfortunately, will not be able to support this bill on final passage. I think, in doing so, it is important to talk about why we are here and how we got here.

I am sure the American people think that in this process of debating health care over the past weeks and months, this has been a process where both sides, Republicans and Democrats, have worked together, sat in an open room and gave ideas back and forth; that there has been give-and-take and compromise so that we could come to the plan that is before us today. I am sure the American people believe that amendments were offered, that each Senator could come to the floor and offer amendments and that his and her colleagues were allowed to hear about those amendments and vote them up or down. I also believe the American people think we do not just come to this Chamber and give monologs. They probably think this room is not empty and that there are just two of my distinguished colleagues here but that we all sit here and listen to each others' arguments and decide what is best for the American people.

Unfortunately, that is not the case with this bill. This bill was designed and crafted by the Democratic leadership, without the input of the colleagues from this side of the aisle. There was no give-and-take. There was no back-and-forth in a conference room with C-SPAN in the room, as the President told us he would ensure when he ran for the Office of the Presidency. And we did not have the opportunity to offer amendments to make this bill better.

I know that seems hard to believe, that we would not have the ability to offer amendments to make this bill better, but I can prove it to you.

I have an amendment at the desk. It is amendment No. 3225. What this amendment does is it takes a piece of legislation I filed shortly after coming to the Senate in September of this year—the legislation is called the Prevent Health Care Fraud Act of 2009. This legislation has 11 cosponsors. It has bipartisan support.

What the bill does is basically three things:

First, it creates the chief health care fraud prevention officer of the United

States. It would be the No. 2 person at Health and Human Services. Their only job would be to ferret out health care fraud.

Second, it would use and take a page from the private sector to go after fraud. There is an industry out there right now that does an excellent job of stopping fraud. That industry is about the same size as the health care industry. It is the credit card business. It is about a \$2 trillion business. Health care is about a \$2 trillion business. In health care and in Medicare alone, estimates are that \$1 out of every \$7 in Medicare is fraud. In the credit card business, it is pennies on the hundreds of dollars.

How does the credit card business do it? We have all had this experience. You go to purchase something in a store, and when you leave, you get an e-mail or a phone call and your credit card company says to you: Did you really mean to purchase that good or service? Guess what. If you say no, they don't pay. The way we do things in Medicare and Medicaid is we do pay-and-chase. We pay, and then when we think there is fraud, we try to go after it.

This model stops the fraud before it starts. A group here in Washington, DC, has evaluated this legislation and says that it might save as much as \$20 billion a year in Medicare alone. We think there is \$60 billion in fraud in Medicare—\$1 out of every \$7.

This proposal that we put forward also would require background checks for every health care provider in America to make sure they are not a criminal. Florida, my State, unfortunately is ground zero for health care fraud. We have the worst health care fraud in America. Just this past weekend, and I sent this letter around to my colleagues—a \$61 million Medicare fraud scheme out of Florida and some other States.

My bill, this proposal which has bipartisan support, could save \$20 billion a year. We have fashioned this bill into an amendment to this health care bill.

Mr. President, I ask unanimous consent that the pending amendment be set aside to call up my amendment. It is amendment No. 3225.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. BAUCUS. Reserving the right to object, and I hope my colleague will let me say a word or two in my reservation, the underlying bill, while certainly objective, was crafted with the guidance of CMS, the Office of the Inspector General, HHS, and the Justice Department for stronger antifraud. It would give CMS new screening authority to provide resources to CMS for new screening authority. It also limits providers in other ways but more oversight when fraud is suspected, such as limiting durable medical equipment providers because we know it is fraught

with fraud. We also require providers to have compliance programs, make sure providers know the rules. There are increased penalties for fraudulent activity in the bill as well. Most importantly, we will give CMS, HHS, OIG, and DOJ more tools at their disposal to preserve and protect the program's integrity. The bill does a lot to protect fraud.

I might say, I know this is on his time, but this procedure has been unusual. I appreciate the indulgence of the Chair, as well as the indulgence of the Senator from Florida.

You will not believe the number of amendments that were offered on a bipartisan basis in the Finance Committee, as well as in the HELP Committee. They were adopted in both committees. It was very transparent, open, bipartisan. Unfortunately, by the time the bill got to the floor, it became apparent we were facing less than the nature of legitimate amendments, more message amendments. So the majority leader resorted to a procedure to move this bill expeditiously.

I am taking advantage of the Senator's time to explain all this. That is not the proper procedure. There are strong antifraud provisions in this legislation, and very respectfully I must object.

The ACTING PRESIDENT pro tempore. Objection is heard.

Mr. LEMIEUX. Mr. President, I thank the distinguished chairman of the Finance Committee. Sure, there are things in this bill that he pointed out to go after fraud. But I would like to inform the Senate of a report that came out evaluating this new bill, the managers' amendment.

I have a table which evaluates how much will be saved from the waste, fraud, and abuse provisions which are in this bill. It is \$9 billion. The proposal that I have, one group—and, again, it is not the CBO—one group has said it might save \$20 billion a year.

Putting aside our differences, I sure wish we could talk about my amendment today, I say to my colleague. I hope we can revisit it after this is over because we should be able to agree, and it does have bipartisan support. I wish we could amend the bill today. I hear the objection, and I will move on. I hope we can talk about this.

Mr. BAUCUS. I ask the Senator if he might yield using time on our side. I fully agree with the Senator. It is unfortunate we cannot proceed at this moment. But I pledge my support next year to work aggressively with very strong oversight to boost our antifraud measures even more than they are in this bill.

There will be an awful lot of oversight necessary when the bill is passed to make sure all the provisions that are intended come true. In fact, we think we are working hard to get it passed; frankly, I think we have to

work harder next year to make sure the provisions work. I pledge my support to work aggressively in that area.

Mr. LEMIEUX. I thank the chairman. I wish we could do it before we had to rush to judgment on this bill. I wish we had more time. I wish we did not have to be backed up against a wall before Christmas. I understand colleagues on the other side have a desire to get this bill done. But it is my concern with this measure and with the other measures in the bill that we could have worked together.

Mr. President, I say to the chairman, I am new to the Chamber. But this is not the way businesses work. It is not the way American families work. It is not the way even State legislators work, which I have experience with in Florida.

I wish we could have talked about that amendment and offered it. I wish my colleagues were here to debate it up or down. Let's talk about where we are instead. Let's talk about what this bill does and why I cannot, unfortunately, support it as a Senator from Florida.

We know this bill cuts Medicare by nearly \$½ trillion. We know this bill raises taxes by nearly \$½ trillion. And we know it does not accomplish the fundamental goal the President put forward when we embarked on this debate about health care reform.

The American people are beginning to realize and if they have not realized yet will be shocked to hear that this bill is not going to cut the cost of health care for people who have insurance already. That is the very reason this debate was embarked upon, not just access for people who do not have health care insurance but to bring the costs down. Health care has gone up 130 percent in the past 10 years. This bill will not address that. In fact, estimates show that for some folks, the cost of health care will go up.

There are basically five reasons why I cannot support this measure as a Senator from Florida.

I am concerned, first of all, about access and quality of care for our seniors. When you take \$½ trillion out of Medicare, my fear is that it is going to diminish the quality of care for seniors in Florida.

It is said on the other side that we are not going to take away benefits, that we are just going to take money away from providers. It was said on the other side that the new insurance will take care of uncompensated care, so that the cuts to hospitals and to other providers will not really hurt seniors in the end. I think that is a tremendously risky experiment.

I cannot believe, at the end of the day, when we pay providers less, it is not going to affect benefits. Right now, studies show that 24 percent of seniors on Medicare trying to find primary care physicians cannot find one. I get letters from seniors in Florida who say

they cannot find a doctor who will take their Medicare. We know in Medicaid it is worse. We know in Medicaid that if you are just going into the program and trying to find a physician, almost 40 percent of the physicians will not take you. In metropolitan areas for specialists, it is up to 50 percent who will not take Medicaid.

I fear that if we take nearly \$½ trillion out of a program that is already in financial trouble, a program that in the next 7 years is going to be in serious financial trouble and not be able to meet its obligations, that it is going to hurt seniors.

I have heard this discussion about how we are prolonging the life of Medicare. The distinguished chairman just spoke about it. But when you look at what the Actuary at HHS has said about that assumption, the assumption is that we are not going to restore the 21-percent decrease in physician payments which, of course, as soon as we get back in the new year, we are going to have before us.

You cannot take money out of Medicare and pay for a new program and shore up Medicare. You do not need an actuary or an evaluation or an analyst to tell you that. It is common sense. You cannot get blood from a stone. If the doctor is not in, it is not health care reform.

I have received a letter, as many of my colleagues have, from an organization called 60 Plus which represents 5.5 million seniors. James Martin, the president of 60 Plus, writes:

Cutting half a trillion dollars from Medicare while adding 31 million more to the health care rolls is an outrage.

60 Plus strongly supports health care reform but first we should do no harm to a system serving so many so well. . . . Make incremental changes that do not bankrupt a system already teetering on insolvency.

I want to talk a minute about Medicare Advantage. There are more Floridians in Medicare Advantage than any other State. A lot has been said about this program. We have had amendments to try to stop the cuts. Mr. President, 950,000 Floridians—Medicare Advantage is a great program, and people in Florida enjoy it. Seniors enjoy it because they get more than regular care; they get eye care, hearing care, wellness, diabetic supplies, and other things that add to the quality of life of seniors and help their entire health care. These Medicare Advantage providers are actually working hard to make sure their senior customers are happy, not a concept you hear a lot about when the government is in charge.

There is a fix for Florida, as has been talked about, but I wish to talk about what that fix is, as I understand it. It is an off-ramp. For the rest of the country, it is going to be somewhat of an exit. For Florida, it is an off-ramp.

First of all, we don't know what will happen in conference. The Senate cuts

\$120 billion; the House cuts \$170 billion. I don't know if the Florida fix will still be there. But in talking to experts and reading the bill myself—specifically around page 895 through about 901 of the original Reid bill—there is this grandfathering in for folks in Florida, and other areas, but part of Florida is covered. Of the 950,000 people, the experts think 150,000 to maybe as many as 250,000 will not get this grandfathering in. They are going to get the cuts to Medicare Advantage. So this is not good for them. Then, for the others, say, 700,000 people or so, every year, starting in 2013, their benefits—or the payments to the providers for benefits—are going to decline 5 percent a year. That is on pages 895 through 897. So it is an off-ramp. Every year, less payments. Every year, less benefits.

I talked to one provider down in Miami that many Senators in this Chamber have visited. He runs a very successful Medicare Advantage Program. He said these cuts would be devastating. So while it might not be an exit for Florida right away, it is certainly going to be an off-ramp that one day ends up being an exit.

Let's remember that many of the folks on the other side of the aisle who are proposing these cuts to Medicare Advantage didn't vote for Medicare Advantage to start with. They don't like it. They don't like the private sector being involved. They don't like these extra benefits being provided. It goes against what they philosophically believe. But I know Floridians like it. Because this bill cuts it, I can't be for it. No one can guarantee to me that in the next 10 years Medicare Advantage in Florida will be as robust as it is today.

I am concerned also about the home health care payments. I am concerned about what it is going to do to the small business home health care providers in Florida. I talked to the largest provider of home health care services in Florida, and he said: We will be fine, but the small businesses—the mom and pops who do this—will go out of business. That is disconcerting in a State with 11½ percent unemployment.

The second reason I can't support this bill is this is going to have a devastating effect on our State budget in Florida. We talked today to the head of the Florida health care system, the Agency for Health Care Administration, and these increases in Medicaid, raising Medicaid from 100 percent of poverty to 133 percent, are going to cost Florida an estimated \$3½ billion over the next 10 years. That is \$3½ billion Florida can't afford to pay.

Our budget has gone from \$73 billion to \$66 billion in a short period of time with the economic decline. Unlike this Chamber, which spends money it doesn't have, Florida has to balance its budget. So what happens when you have less money? You have to cut programs. But when you have a Federal

mandate, you can't cut that. So what do you cut? You cut education and teachers. You cut law enforcement—not good for Florida. This is a burden Florida can't afford to pay. That is why all the Governors in the country—virtually Republican and Democratic alike—including our Governor, Charlie Crist, are against this unfunded mandate.

The third reason I can't support this bill is because it raises taxes—\$518 billion. What happens when the drug company that makes your medicine or the medical device company that makes the lifesaving implement for you gets taxed? They are going to pass it along to you. They are going to put it right in the bill. That is the way it is going to work. That is why health care costs aren't going down for the 170 million Americans who have health insurance. In fact, for some, they are going to go up. That is not health care reform.

Fourth, this is a budget-busting bill. It is not deficit neutral. Let me explain why. You will hear reports this is going to cut more than \$100 billion from the deficit over the next 10 years. Only in Washington, DC, could you come to this calculation. It is funny math. We have this Congressional Budget Office, which is sort of the arbiter of all things financial here in Washington. You send them a proposal and they give you an answer. But it is not a thinking answer; it is an analytical answer, and it gets gamed. What you send them determines what you get back. They only look at a 10-year period—what it is going to cost in the next 10 years. If you bring in more money than you spend in the next 10 years, then it will cut the budget. It will cut the deficit. That is what they say back to you.

So what was done in this bill in order to get something that would fulfill the President's promise to be a budget cut or at least deficit neutral? We have 10 years of taxes and 6 years of benefits. Most of the benefits don't start until 2014, yet the taxes start in 2 weeks—in January. That is akin to you going to buy a home and saying: I am going to live here for 10 years, and they say: That is great, start paying today and you can move in in 2014.

It is funny math. This is a \$2.5 trillion new entitlement program we can't afford. We can't afford the programs we have, let alone the programs the majority in this Chamber want. We have a \$12 trillion deficit. We have \$30-some trillion in unfunded entitlement deficit. We have hundreds of thousands of dollars of debt for every family in America, and no plan to pay for it. We spend more than we take in. We spent \$1.4 trillion—we have a \$1.4 trillion deficit this year—just the debt this year. That is more than the past 4 years combined.

The American people are on to this and they are angry about it and they should be.

The ACTING PRESIDENT pro tempore. The Senator has used 20 minutes.

Mr. LEMIEUX. Fifth and finally, the reason I can't support this bill is it doesn't lower the cost of health insurance for Americans.

The Congressional Budget Office has said the majority of Americans would see the same increases as they currently get under the current system. For some people, individual policies, for example, they will receive a 10- to 13-percent increase.

I am going to conclude by saying this, and this will probably be the final time I will speak before we have final passage on this bill. I long for what could have been. We could have worked together. We could have had an 80-vote bill. We could have had a bill that would say insurance companies can't drop you if you are sick, insurance companies can't deny you if you have a preexisting condition, insurance companies can compete across State lines, set up an exchange, give a tax credit to the American people, put money in their pocket, let them be consumers who go out and buy health insurance and drive the cost down because the market economy would, once again, work in health care.

This bill doesn't solve the problem. It perpetuates it and makes it worse. At the same time, it cuts health care for seniors and doesn't lower the cost of health insurance for most Americans. For more and more seniors, the doctor will not be in. That is not reform. For those reasons, respectfully, for that lost opportunity, I will not be able to support this bill.

I yield the remainder of my time to my friend and colleague from Alaska.

The ACTING PRESIDENT pro tempore. The Senator from Alaska is recognized.

Ms. MURKOWSKI. Mr. President, I wish to acknowledge the very eloquent and articulate comments of my friend from Florida. We recognize that his time in the Senate has been relatively short, but in terms of an individual jumping in with both feet and embracing the challenges we clearly have in front of us and representing the constituents of the State of Florida in the manner he has, I think that deserves public recognition, and I thank the Senator for his leadership.

We have had occasion to talk about the similarities between Alaska and Florida. You might not think there would be much in relationship there—my being from the North and the cold versus the sunny South in Florida. But when it comes to our senior populations, this is where we truly have a shared interest. Florida has probably the largest number of seniors per capita, and in my State of Alaska, we are the State that has the fastest growing population of seniors per capita.

One might not think of Alaska as being a retirement haven, but more

and more we are becoming so, and we share the same problems when it comes to access. When you can't get in to see a provider, when that insurance card is all we have given you, then we haven't done anything to provide for a level of care to improve the situation for the residents of Florida or the residents of Alaska. So what we are doing today—as we move toward final passage on legislation that I would concur with the Senator from Florida does not fix the problem—we are not dealing with how we appropriately and adequately provide for access to quality health care. We have much work remaining before us.

We have had some time these past couple days—actually these past couple weeks—as we have spent a considerable amount of time in our offices waiting for votes at 1 in the morning or votes at 7 o'clock in the morning, and I have had a chance to go through some things on my desk, but I have also had an opportunity to spend a lot of time checking to see what people are saying when they are contacting our office. The volume of correspondence, whether in e-mails or faxes or phone calls, coming in from Alaskans during this time has been absolutely unprecedented.

I think, typically, in the legislative calendar about this time—several days before Christmas—you don't see constituents contacting their Senators and pounding the drum. Well, let me tell you, the people in Alaska are pounding the drum. In just the past 24 hours, we have gotten probably close to about 500 health care e-mails that have come in. Overwhelmingly these are e-mails from constituents saying: No, this is not good. You must do what you can to prevent this reform package, as you call it, from moving forward.

It seems the longer the people from Alaska, the longer the people from around this country have to look at what is contained in this 2,000-plus page bill, the more they realize the negative impacts, the consequences to them and their families and their businesses and they are no longer silent. I have had so many calls and letters coming from people saying: I have never weighed in with you before, never weighed in with my delegation, but this is something I can't keep silent on.

When you look at some of the ones that have come in, these are just today's. This is one from a woman in Anchorage who says: Yesterday on the TV news I heard about the sweetheart deal Senator NELSON made regarding the rest of us paying Nebraska's Medicare bill forever. To say I am angry is putting it mildly.

There is a gentleman in Fairbanks who writes in: I am very skeptical about this mandatory health insurance that apparently everyone will have to buy in.

Here is one from a fellow in Anchorage also. He says: You are moving a

health care bill that can't be understood unless a person has a law degree.

Another individual, and this is an interesting one. He and his family apparently own four indoor tanning businesses in Alaska. We need to get a little sunshine, even if it is not what God has provided us. But these are good businesses, and he says: When did this go from a 5-percent tax increase for cosmetic surgery to 10 percent for indoor tanning anyway? And he adds: Adding another 10-percent tax hike on small businesses, like indoor tanning, will likely drive many families, just like mine, into bankruptcy.

I could go on and on in terms of the stacks of correspondence and phone calls we have gotten, but suffice it to say, the more people understand what is in this legislation, the greater their concerns are and the greater their outrage as they learn what is contained in it.

One of the things I learned just yesterday, which I don't think we have gotten the focus or the attention on—and this is a concern that was raised by the Anchorage homebuilders and the Alaska State Home Building Association. They have pointed out that as an industry, the homebuilders industry, they are being unfairly singled out in this bill.

We have talked about the employer mandate that is contained in this legislation, and that mandate applies to those businesses with 50 or more employees. But there is a zing in this legislation to homebuilders who are now responsible for providing federally approved health benefits if they have five or more employees.

Look at what is going on throughout this country in terms of industries that have taken a real hit with this economic downturn and this recession. The homebuilding industry has suffered incredibly during this downturn. On top of depressed house prices and increases in home foreclosures, now we are now going to punish them with an employer mandate that treats them worse than any other employer. In other words, if you have five or more employees as a homebuilder, you need to know that your industry is the one, the only one that will be subject to the employer mandate of \$750 per employee.

In Alaska, we checked to see how many individuals are homebuilders within the State. We have about 250 homebuilders in Alaska. But when you look to see how many individuals they employ, that is about 3,078 employees, it is about 12 employees to every builder. So the total homebuilding industry that would be impacted is about 800 employers in my State.

Yesterday, there was a letter sent to Members of the Senate. This is from the homebuilding industry as well as many other associated industries—the air-conditioning contractors, the build-

ers and contractors, the electrical contractors. I wish to mention some of the statements that are contained in this letter. Again, it is written yesterday. They say:

We are writing to express our strong opposition to language contained in the managers' amendment which excludes the construction industry from the small business exemption contained in the bill. The fact that the managers' amendment was made public less than 2 days before the first vote on the matter has increased the difficulty of playing a constructive role in the legislative process.

I will take a little detour from the letter. This is part of the problem. You have these organizations and groups, and there is a list of about a dozen of them here, that have signed on to this letter. They had literally hours before we were forced to vote on the managers' amendment. They did not know what was in the bill and how it impacted them. They go on to say:

The managers' amendment singles out the construction industry by altering the exemption so it applies only to firms with fewer than 5 employees. This is an unprecedented assault on our industry. It is unreasonable to presume that small business owners can bear the increased costs of these new benefits simply because Congress mandates that they do so.

They go on to conclude in the letter:

We are unaware of any data or evidence that suggests that the needs and struggles of a construction contractor with fewer than 50 employees are so different from those of small business owners in other industries, and absent such convincing evidence, we are left to assume that this specific provision is merely a political payoff to satisfy the desires of a small constituency.

Those are some pretty strong words there toward the end. But it does cause you to wonder why, in this legislation, we are going to require that businesses—only businesses in excess of 50 employees are going to be subject to this mandate. Why this unprecedented assault on the homebuilders? I don't get it. But what it does cause me to get is that there is a heck of a lot more out there that, the more we read it, the more we sit down and we connect the dots, the more we realize this fish we have set out on the front porch is going to continue to stink.

It stuns me. We have the homebuilders up in Alaska who are beside themselves, saying: Can you take a look at this and let me know how the Senators feel. What are you going to do about this, LISA, is the question I have received.

This is something we all have to reckon with.

Madam President, at the conclusion of my remarks, I ask unanimous consent that a copy of the letter be printed in the RECORD.

The PRESIDING OFFICER (Mrs. SHAHEEN). Without objection, it is so ordered.

(See exhibit 1.)

Ms. MURKOWSKI. I am going to speak a little bit about how aspects of

this legislation have impact specifically on my State. As a rural State, sometimes the impacts we see are different than you have in more urban States. Our geography is different, our lack of providers, our high senior population, our extremely expensive costs, there are a lot of dynamics at play that cause real issues and real concerns.

There have been many words that have been exchanged on this floor about what this bill doesn't do or what it does do. I find it helpful to go to the experts, the think tank in my State, and ask them flat out. We have an institution at the University of Alaska called the Institute of Social Economic Research. I take what they have to say very seriously.

I also take very seriously what our Congressional Budget Office has to say, what the CMS Actuary has to say, because, as my colleague from Florida pointed out, these are the independent arbiters. These are the guys whose job it is to work the numbers. I would like to discuss some of the findings from the University of Alaska and also try to inject a little bit of common sense into the debate as to what it means for Alaska, how it increases their premiums, how it raises that cost curve on the Federal health care expenses, the taxes on small businesses for the individuals, the families, the health benefits of the police, the firefighters, other public protective service people who put their lives on the line for so many. These are the things about which, unfortunately, we might not be getting the full picture.

Our colleagues on the other side have claimed that health care coverage will be expanded. Again, let's go to our non-partisan entities—the CBO and the Joint Committee on Taxation. The average premium per person, if you purchase in the individual market, is going to be 10 to 13 percent higher in 2016 than the average premium under current law. That tells you if these Federal scorekeepers are correct, your premiums are going to go up under this health bill if you buy insurance yourself.

In Alaska, according to ISER—again, the Institute for Social and Economic Research—you have about 28,000 Alaskans who would pay 12 percent more for their premiums. It is going to cost an individual in my State an extra \$1,100 per year and a family in my State nearly \$3,000 more per year for the coverage by 2016.

Again, you have to ask the question: Is health care expanding? This bill forces you to purchase federally approved health care; otherwise, you have to pay the penalty of \$750 or 2 percent of your income if you earn more than \$37,500.

If you look at Alaska's population, this is going to bring in more than 50 percent of Alaska's population who are going to be penalized if they fail to

have health insurance. Again, you ask the question: Is health care coverage going to be expanded?

Since the law we are advancing is going to require that you buy federally approved health insurance, and then we are going to penalize you if you do not buy it, then what you have is the heavy hand of the Federal Government that forces you to buy health insurance, which is going to cost about 12 percent more once this bill is enacted—12 percent more than it would today.

The Democrats will also talk about the hidden tax on families and how that will go away because once this bill passes, under this bill, everyone is going to have coverage. Alaskans and all Americans who do not get federally approved health insurance that the Federal Government is going to require that you have, they are going to be fined \$750, 2 percent of your taxable income, and what the Democrats will not tell you when they say health care coverage is going to be expanded or the hidden tax is going to go away is, those with income greater than \$37,500—again, affecting over 50 percent of the people in my State—are going to be taxed a full 2 percent of their household income, once the bill is fully phased in, if they do not get health insurance. It is this penalty that is going to raise \$15 billion to help pay for this bill. This is how we are paying for the bill.

CBO and CMS told us the taxes on medical devices—whether they are tongue depressors or x-rays or blood sugar meters—these are going to be passed on to the individuals so you are going to be taxed for vital medications and other health products. The question you then have to ask yourself: OK, so do these hidden costs actually go away?

I suppose they do because they are no longer hidden. What we will have done is we will have raised your premiums, we will have increased the penalties on those earning more than \$37,500 who did not buy into health insurance, and we will have taxed your tongue depressors and x-rays to pay for the bill.

In addition, the smallest of the small businesses are going to be taxed if they do not provide insurance for their employees, and individuals and couples earning over \$200,000, they are going to be penalized because they are the higher income earners.

The Democrats are also telling you that as Medicare patients, they are going to get some good, positive things. They will get free preventive services. This is good. This is absolutely great. We should be encouraging preventive services.

But as my colleague from Florida was explaining, as I mentioned, after this bill passes, are any of the 13—I think we are down to only 12 now—primary care doctors in Alaska, in the Anchorage area anyway, accepting new

Medicare patients? We are saying we are going to provide this service to you at no cost. But, again, if you can't get anybody who will take you as a patient, how are we helping you? We have heard from a doctor in Anchorage. In fact, I have an opinion piece that was published just this week in the Anchorage Daily News. She indicates she is dropping out of Medicare and she is doing it because of this legislation.

I ask unanimous consent that be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Anchorage Daily News, Dec. 18, 2009]

OPINION: DOCTORS AND PATIENTS, NOT FEDS, KNOW BEST

(By Ilona Farr, M.D.)

I have made the heart-wrenching decision as a physician to opt out of Medicare. I do so after working with Sen. Stevens, Sen. Murkowski and Rep. Young for a decade in hopes we could ensure seniors would be able to continue to receive medical services in Alaska.

On a visit costing \$115, Medicare pays \$40, secondary insurance pays \$7, and the rest—\$68—is a loss, not a tax write-off. It takes six insurance paying patient visits to offset losses from one Medicare or Medicaid patient.

The House health care bills, HR3590/HR3962, increase the number of people not paying their share of the costs and will lead doctors to opt out of Medicare or retire early.

Anchorage has 75 family physicians, down from 180. Physician shortages like these are caused by government interference in the free market. Government artificially keeps reimbursement rates low, forcing other patients, and insurance companies, to pick up the additional costs. Family practice residencies are filled with foreign medical graduates because of high costs (more than \$200,000) associated with medical school. Low physician reimbursement rates make it difficult to repay loans.

Medicare and Medicaid auditors are paid on commission, can fine us \$2,000 to \$50,000 for one charting mistake or billing error, and then extrapolate this over the practice and drive us out of business . . . all for one minor mistake. There is fraud, but this system that penalizes us severely for simple errors is untenable.

In these bills malpractice reform is restricted, health savings accounts (which help reduce costs and fraud) are essentially eliminated, and taxes and fees on insurance and medical services are increased. There are no Medicare/Medicaid rate, rule, or audit reforms, or tax write-offs for business losses.

One section in Sen. Harry Reid's bill says Medicare will no longer pay for home health services, durable medical goods, and possibly labs, X-rays, prescriptions or other services written by providers who have opted out of Medicare. Many talented physicians have had to opt out of Medicare (and by this law must opt out of Medicaid and the military's Tricare also) to stay in business. People will no longer be able to see these physicians because of government financial restrictions or will be forced to pay all medical bills associated with these visits themselves.

Bills under consideration cut Medicare spending by \$460 billion, raise fees on medical services, increase physicians' adminis-

trative burdens, promote electronic medical records with mandated reporting of outcomes data, and increase business costs so it will be impossible for small practices to survive.

My decision to withdraw from Medicare was also precipitated by U.S. Preventive Services Task Force's recommendation that breast cancer screening mammograms should only be done on women between age 50 and 74. Approximately 48 percent of my patients with breast cancer developed it before age 50. Up to 1.2 percent of my practice, mostly young mothers, could have died if this were a national guideline.

The Senate bill has this task force and other committees determining what tests will be covered for patients. I am concerned that penalties may be imposed on insurance companies, and maybe providers, for going against these guidelines. The Hippocratic Oath compels us to protect the health of all humans throughout life, and many provisions in these health care bills would cause us to violate that oath.

Physicians and patients (not government) should decide the best, most cost-effective medical treatment for patients. Government should not dictate to insurance companies or providers which tests can or cannot be covered. Medicine is changing too rapidly for guidelines to be made at a national level.

I have worked in government medical facilities and in private practice for the last 26 years. Physicians provide timelier, less costly and more patient-oriented care if not overseen by hordes of non-producing government administrators.

I am in favor of reform, but current bills before Congress will collapse our health care system and work against the freedoms we are guaranteed under the Constitution. Government should not be allowed to force people to purchase health insurance, mandate what health care services you are allowed, or increase our taxes astronomically to support a huge government health care bureaucracy that will bankrupt us as individuals and as a nation.

Ms. MURKOWSKI. It is no secret, in my State of Alaska and in far too many States around this country, we do not have enough providers that will take these individuals. ISER has said seniors in low payment Medicare States will be forced to wait in line. Alaska is one of two States—we are, I think, second to last in terms of Medicare payments and where we stack up in relation to the reimbursement. ISER goes on to state:

Independent of the doc fix, in Alaska the remainder of seniors are at risk of long lines to see a primary care doctor and overflowing to community health center and hospital emergency rooms where existing capacity is highly likely to be quickly overwhelmed and long wait times become increasingly common.

ISER has also said that additional new insured patients are going to hurt Medicare beneficiaries, and they state:

Federal healthcare reform applied to Alaska likely will exacerbate an already very challenging situation for Alaska's seniors as baby boomers age into Medicare and finding themselves waiting in line behind a rapidly expanding line of better paying private plans.

We are told 5 years from now our Medicare population is going to increase by 50 percent. We cannot accommodate those who are Medicare-eligible now. Our boom is not sustainable.

The CMS Actuary has said:

The Reid bill reduces payments to health care providers, which is unlikely to be sustainable on a permanent basis. As a result, providers could find it difficult to remain profitable and absent legislative intervention, might end their participation in the Medicare program.

It is happening. Doctors, providers, physicians are making those decisions as we speak. They are opting out. So this is not some theoretical approach to the problem. This is happening.

Madam President, how much time do we have on our side?

THE PRESIDING OFFICER. The Senator has 17 minutes.

Ms. MURKOWSKI. If I may ask my colleague from Kansas, do I understand the Senator is seeking about 10 minutes?

Mr. BROWNBACK. Yes.

Ms. MURKOWSKI. Madam President, I want to speak about small businesses because we have all been talking about the impact to small businesses. Under this bill, as we know, small businesses are going to be penalized \$750 per employee if even one of their employees seeks governmental health care through Medicaid or through Federal subsidies. So if you have 50 or more employees, you can be expected to pay fines in an amount of \$750 per employee, which amounts to over \$37,000 or \$3,000 for that individual employee.

I think we need to put it into perspective in terms of who these businesses are. These are the solo-practitioners, like the one-lawyer office or the small doctor's office. If these individuals purchase health care in the individual market, they are going to see their premiums go up an extra \$1,160 per year for a family—nearly \$3,000 more in 2016.

Alaska is defined as a high-cost State. If you are a small business that can afford to pay good health and dental benefits for your employees and those benefits amount to \$8,500 per individual or \$23,000 per family, in a high-cost State such as Alaska, you look to be hit with a 40-percent excise tax because you basically want to provide your employees with good benefits.

Again, according to ISER:

Alaska is a high cost state and thus, roughly 50 percent of health plans in Alaska will be subject to the tax by 2016, compared to only 19 percent average in the Lower 48.

Again, by 2016, 50 percent of the plans in my State will be subject to this 40-percent excise tax.

I ask unanimous consent to have printed in the RECORD a letter we received from the municipality of Anchorage, Police and Fire Retiree Medical Trust.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MUNICIPALITY OF ANCHORAGE, POLICE & FIRE RETIREE MEDICAL TRUST,

December 15, 2009.

PLAN ADMINISTRATOR REPORT

At the November 24, 2009 PFRMT board meeting I brought to your attention a health care bill, HR 3590as—Patient Protection and Affordable Care Act, being considered in the US Senate that contains provisions that if implemented into law would require that the Municipality of Anchorage (MOA) and the Trust to make changes to their current business practices. S 1796—America's Healthy Future Act of 2009 also contains these changes and could become effective January 1, 2010.

Three provisions in the bill that are of particular concern are:

1. Inclusion of health care benefits as taxable income to employees. Not only will this increase the employee's taxable income but the MOA's payroll taxes will also increase.

SEC. 9002. INCLUSION OF COST OF EMPLOYER-SPONSORED HEALTH COVERAGE ON W-2. (p. 1996)

(b) EFFECTIVE DATE—The amendments made by this section shall apply to taxable years beginning after December 31, 2010.

2. Taxation of MOA health care plans. This tax will be imposed on the employer. The current MOA health plan design is apt to be considered to have an "excess benefit". This would make it subject to a 40% excise tax. There is also an aggregation rule for the value of employee coverage with multiple employers or retiree medical (example, veterans and rehired police officers and fire fighters). If a retiree would purchase MOA Health Insurance that is considered excessive, the 40% excise tax would be incurred by the general fund of the Medical Trust. One may argue that the tax is a tax to the employer. The argument can also be made that the Trust is an integral part of the Municipality. This was a conclusion determined in IRS PLR-06164-96. Thus the tax would be payable from the Trust general fund assets.

SEC. 9001. EXCISE TAX ON HIGH COST EMPLOYER-SPONSORED HEALTH COVERAGE. (P. 1979)

"any excess benefit with respect to coverage, there is hereby imposed a tax equal to 40% of the excess benefit."

(d) (1) (E) GOVERNMENTAL PLANS INCLUDED

IRS PLR-06164-96 Because the Trust is an integral part of the Municipality, it is not required to file an annual federal income tax return. (p.5)

3. Current Municipal employees are able to be reimbursed tax free from money that they have placed in their flexible spending account for over the counter (OTC) medicine. Retired police officers and fire fighters also currently are allowed this reimbursement as part of their medical benefit. Under the rules of this bill, these reimbursements would no longer be allowed. This is a reduction in employee benefits. It is also likely to encourage an increase the utilization of more expensive non-OTC prescriptions, as they are a covered expense.

SEC. 9003. DISTRIBUTIONS FOR MEDICINE QUALIFIED ONLY IF FOR PRESCRIBED DRUG OR INSULIN. (p. 1997)

This bill contains expenses that should be considered and planned for accordingly. A December 2009 press release from Mercer, an HR consultancy stated,

Nearly two-thirds (63 percent) of employers in a recent survey by Mercer say they would cut health benefits to avoid paying an excise tax included in the Senate's Patient Protec-

tion and Affordable Care Act, unveiled November 18. Mercer estimates that one in five employers offer health coverage that would be deemed "too generous" and thus be subject to the Act's 40 percent non-deductible tax on the excess value.

Two letters have been sent to the MOA informing them of these matters. The dates of these letters were November 25 and December 5, 2009. Since then, Larry Baker, Senior Policy Advisor, in the Mayor's Office informed me that the MOA's benefit consultant, The Wilson Agency, affirmed that the current MOA health plans are going to be subject to the 40% excise tax. They are contacting Senator Begich but beyond that he did not specify what the course of action was going to be.

I recommend two points of action. Bring the PFRMT membership up to date of this situation. And contact Senator Begich to inform him of the negative impact that these bills will have on our retired police officers' and fire fighters' medical benefit.

Sincerely,

LORNE BRETZ,
Plan Administrator.

Ms. MURKOWSKI. The city of Anchorage is the largest city in Alaska. We received this letter last week. In the letter, they cite specifically three provisions in the bill that are of particular concern—No. 1, inclusion of health care benefits as taxable income to employees.

It states:

Not only will this increase the employee's taxable income but the [Municipality of Anchorage's] payroll tax will also increase.

The second point is the taxation of the municipality's health care plans.

This tax will be imposed on the employer. The current [municipality] health plan design is apt to be considered to have "an excess benefit." This would make it subject to a 40% excise tax.

They go on to say:

There is also an aggregation rule for the value of employee coverage with multiple employers or retiree medical. If a retiree would purchase [the municipality's] Health Insurance that is considered excessive, the 40% excise tax would be incurred.

One may argue that the tax is a tax to the employer. The argument can also be made that the Trust is an integral part of the Municipality. Thus the tax would be payable from the Trust general fund assets.

Their third point is:

Current municipal employees are able to be reimbursed tax free from money they have placed in their flexible spending account for over the counter medicine. Retired police officers and firefighters also currently are allowed this reimbursement as part of their medical benefit. Under the rules of this bill, these reimbursements would no longer be allowed. This is a reduction in employee benefits. It is also likely to encourage an increase [in] the utilization of more expensive non-OTC prescriptions, as they are a covered expense.

There are about 400 members that are part of the Police and Fire Retiree Medical Trust. When they find out, as I am sure they will, that essentially they are going to be taxed on their plan—I think most of these firefighters and police officers don't view themselves as having access to a Cadillac

plan. They are just firefighters and police officers. But this is coming from their trust fund, expressing great concern over what we have in front of us.

I have mentioned that we have received a copy of an opinion piece from a primary care provider in Anchorage who has outlined why she is opting out of the Medicare system in Alaska.

I ask unanimous consent to have her letter printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Anchorage Daily News, Dec. 18, 2009]

OPINION: DOCTORS AND PATIENTS, NOT FEDS, KNOW BEST

(By Ilona Farr, M.D.)

I have made the heart-wrenching decision as a physician to opt out of Medicare. I do so after working with Sen. Stevens, Sen. Murkowski and Rep. Young for a decade in hopes we could ensure seniors would be able to continue to receive medical services in Alaska.

On a visit costing \$115, Medicare pays \$40, secondary insurance pays \$7, and the rest—\$68—is a loss, not a tax write-off. It takes six insurance paying patient visits to offset losses from one Medicare or Medicaid patient.

The House health care bills, HR3590/HR3962, increase the number of people not paying their share of the costs and will lead doctors to opt out of Medicare or retire early.

Anchorage has 75 family physicians, down from 180. Physician shortages like these are caused by government interference in the free market. Government artificially keeps reimbursement rates low, forcing other patients, and insurance companies, to pick up the additional costs. Family practice residencies are filled with foreign medical graduates because of high costs (more than \$200,000) associated with medical school. Low physician reimbursement rates make it difficult to repay loans.

Medicare and Medicaid auditors are paid on commission, can fine us \$2,000 to \$50,000 for one charting mistake or billing error, and then extrapolate this over the practice and drive us out of business . . . all for one minor mistake. There is fraud, but this system that penalizes us severely for simple errors is untenable.

In these bills malpractice reform is restricted, health savings accounts (which help reduce costs and fraud) are essentially eliminated, and taxes and fees on insurance and medical services are increased. There are no Medicare/Medicaid rate, rule, or audit reforms, or tax write-offs for business losses.

One section in Sen. Harry Reid's bill says Medicare will no longer pay for home health services, durable medical goods, and possibly labs, X-rays, prescriptions or other services written by providers who have opted out of Medicare. Many talented physicians have had to opt out of Medicare (and by this law must opt out of Medicaid and the military's Tricare also) to stay in business. People will no longer be able to see these physicians because of government financial restrictions or will be forced to pay all medical bills associated with these visits themselves.

Bills under consideration cut Medicare spending by \$460 billion, raise fees on medical services, increase physicians' administrative burdens, promote electronic medical records with mandated reporting of outcomes data, and increase business costs so it

will be impossible for small practices to survive.

My decision to withdraw from Medicare was also precipitated by U.S. Preventive Services Task Force's recommendation that breast cancer screening mammograms should only be done on women between age 50 and 74. Approximately 48 percent of my patients with breast cancer developed it before age 50. Up to 1.2 percent of my practice, mostly young mothers, could have died if this were a national guideline.

The Senate bill has this task force and other committees determining what tests will be covered for patients. I am concerned that penalties may be imposed on insurance companies, and maybe providers, for going against these guidelines. The Hippocratic Oath compels us to protect the health of all humans throughout life, and many provisions in these health care bills would cause us to violate that oath.

Physicians and patients (not government) should decide the best, most cost-effective medical treatment for patients. Government should not dictate to insurance companies or providers which tests can or cannot be covered. Medicine is changing too rapidly for guidelines to be made at a national level.

I have worked in government medical facilities and in private practice for the last 26 years. Physicians provide timelier, less costly and more patient-oriented care if not overseen by hordes of non-producing government administrators.

I am in favor of reform, but current bills before Congress will collapse our health care system and work against the freedoms we are guaranteed under the Constitution. Government should not be allowed to force people to purchase health insurance, mandate what health care services you are allowed, or increase our taxes astronomically to support a huge government health care bureaucracy that will bankrupt us as individuals and as a nation.

Ms. MURKOWSKI. One of the things we don't have in this legislation is a provision that relates to medical malpractice. It has been stated that, in Alaska, you tried medical malpractice reform and we haven't seen the positive impacts.

I ask unanimous consent to have printed in the RECORD a statement from the Alaska State Medical Association, along with an article that was published in Alaska Medicine in September of 2009 entitled "Malpractice Relief, Lower Premiums, Tort Reform Add to Alaska's Appeal."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ALASKA PHYSICIANS' GROUP: SENATOR ERRED ON TORT REFORM

ANCHORAGE, ALASKA (Dec. 21, 2009)—The Alaska State Medical Association (ASMA), which represents physicians throughout Alaska and is primarily concerned with the health of all Alaskans, is taking issue with Sen. Mark Begich's stance on medical liability reform.

In an interview with Fox News on Dec. 7, 2009, Alaska's junior senator opined that tort reform in his home state has not worked. ASMA asserts that Begich did not accurately portray the facts in that nationally broadcast interview and that medical liability reform in Alaska serves as a shining example for the other 49 states.

"Alaska's physicians have worked hard for at least the last 35 years to achieve meaningful and equitable liability reform measures," ASMA President Brion J. Beerle, MD, wrote today in a letter to Sen. Begich. "Those efforts have resulted in a stable marketplace for insurers that provide medical professional liability coverage to Alaska's physicians at rates that are competitive."

More than 90% of medical liability coverage in Alaska is provided by two, not-for-profit insurers—MIEC and NORCAL—that are owned by their policyholders (mutual insurers) and overseen by boards of governors, all of whom are physicians, with representation on those boards by Alaska physicians.

"The cumulative result of the Alaska physicians' advocacy has been a success for physicians and their patients," Beerle wrote. "For example, according to the Medical Liability Monitor Survey, 2008 premiums paid by Alaska's internists average just 24% of those paid by the interests in the five most expensive states; general surgeons pay about 25%; and obstetricians/gynecologists pay about 31%. According to that same 2008 survey, the premiums for those same specialties are in the lowest quartile of all states plus the District of Columbia."

"MIEC also has returned excess earnings to its policyholders in 16 of the last 19 years; and NORCAL policyholders received dividends in 12 of the last 18 years. MIEC has, in addition, reduced its rates by 5% in 2009 and also for 2010," the ASMA president added.

Writing on behalf of the association he leads, Beerle noted that because of tort reform, premiums Alaska's physicians pay for liability coverage is generally not significant in the cost of operating a medical practice.

"The factor that does have a material effect is the cost of practicing defensive medicine," he wrote.

The American Medical Association has estimated that the annual cost of the practice of defensive medicine in the United States ranges from \$99 billion to \$179 billion.

"Until medical liability reforms similar to those enacted in Alaska are adopted nationwide, the additional costs of the practice of defensive medicine will continue to be a driver in the cost of health care in Alaska and throughout the country," Beerle concluded.

[From Alaska Medicine, Sept. 2009]

MALPRACTICE RELIEF

(By Andrew Firth and Roger Holmes)

It is seemingly a universal truth that wherever one practices in the United States, malpractice insurance costs too much. But in Alaska, the average medical malpractice premiums are lower than at least 35 other states, a national survey shows.

Physicians in Alaska pay much less than their colleagues in the nation's five most costly states, according to the Medical Liability Monitor Survey, 2008. Premiums paid by Alaska's internists average 24 percent of those paid by internists in the five highest states; surgeons here pay roughly 25 percent, and obstetrician/gynecologists pay about 31 percent. (The top five states vary by specialty.) Some of the difference in cost may be societal, but part of it has to do with the tort reforms that have passed, or not passed, in each state.

In Alaska, our history is similar to many states where the costs are lower. It's a state with an active medical society (the Alaska State Medical Association), an engaged membership, a broad coalition of providers and an enlightened legislative body that recognizes the connection between malpractice costs and access to care.

In 1975, Alaskan physicians suddenly were confronted with a disappearing market for medical malpractice insurance. The Legislature stepped in and created the Medical Indemnity Corporation of Alaska (MICA), a quasi-state agency funded with state money but run by a private board of directors appointed by the governor. At the same time, the Legislature modified the law governing medical malpractice claims. Among the key changes:

The burden of proof was codified, making it clear that a practitioner could only be judged against those in the same field or specialty.

Res ipso loquitur, a legal doctrine that switched the burden of proof to the health-care provider in certain instances, was abolished.

The law required that juries be told that injury alone does not raise a presumption of negligence or misconduct.

Plaintiffs were prohibited from filing inflammatory pleadings asking for millions of dollars.

The law of informed consent was codified. The law prohibited claims that a health-care provider had orally agreed to achieve a specific medical result.

Plaintiffs were prohibited from obtaining a recovery for sums that had been paid by collateral sources, except for a select few federal programs that must, by law, seek reimbursement.

During the 1970s and '80s physicians encountered rising and falling malpractice costs as the insurance cycle reacted to changing claim experience in Alaska and elsewhere, culminating in the departure of several medical professional liability (MPL) insurers in the late 1990s.

In the mid-1990s, the Alaska State Medical Association and several MPL insurers joined with the Alaska State Hospital and Nursing Home Association, Providence Hospital and the business community to press for additional tort reforms. The result was the 1997 Tort Reform Act.

Among its achievements was a cap on non-economic damages of \$400,000 except in cases of severe disfigurement or severe permanent impairment, in which the cap rises to \$1 million.

Punitive damages were limited, and the standards for awarding them were tightened. Prejudgment interest was tied to the federal discount rate—Alaska's current rate is 3.25 percent. Joint and several liability was abolished in favor of comparative fault, in which each party is responsible only for its percentage share of the total fault. And parties were prohibited from using experts in medical malpractice cases unless the expert is licensed, trained and experienced in the same discipline or school of practice as the physician and certified by a recognized board.

A coalition called Alaskans for Access to Health Care—comprising ASMA, Alaska Physicians & Surgeons, the hospital association and Providence—went back to the Legislature in 2005 and argued for an even lower non-economic damage cap for health-care providers. The result was a limit of \$250,000 in all cases except when damages are awarded for wrongful death or a severe permanent physical impairment that is more than 70 percent disabling. For those, the limit is \$400,000.

Since then, Alaska has enjoyed a stable malpractice climate, with both of its major insurance carriers reducing rates and/or returning profits through dividend distributions.

The caps make a big difference. For example, NORCAL Mutual, which writes policies

in Alaska and California, also does business in Rhode Island, which does not limit non-economic damages in malpractice cases.

"Most rates for physicians with at least three years' practice experience (mature rates) in Rhode Island are at least double the mature rates for physicians in Alaska," NORCAL Marketing and Communications Manager Brent Samodurov wrote in an e-mail to Alaska Medicine. "For several medical specialties NORCAL Mutual's rates for Rhode Island are nearly triple those for Alaska."

MPL CARRIERS

There are two major MPL insurers in Alaska: MIEC and NORCAL. Both companies are owned by their policyholders (mutual insurers) and are overseen by a board of governors consisting of physicians.

MIEC came to Alaska in 1978 and is sponsored by ASMA. NORCAL became active in 1991 after it purchased MICA.

According to data published by the National Association of Insurance Commissioners, MIEC wrote 69.7 percent of all medical malpractice premiums for physicians in the state during 2008 and NORCAL wrote 23.4 percent. Ten other carriers shared the remaining 6.9 percent of the market.

Typical of these types of policyholder-owned companies, both MIEC and NORCAL have a long history of returning profits to policyholders through dividend distributions:

NORCAL's Alaska clients have received dividends in 12 of the past 18 years, the most recent amounting to 12 percent of each eligible policyholder's premium as of Sept. 30, 2008, according to Samodurov. He noted: "Dividends declared are directly related to the company's loss experience in each state."

MIEC has a similar record of returning profits to its Alaska members. MIEC policyholders have received dividends in 16 of the past 19 years in amounts that average 28.8 percent of basic premiums (for \$1 million/\$3 million limits) in each one of the past 19 years.

Ms. MURKOWSKI. The bottom line is from the Alaska State Medical Association:

The cumulative result of Alaska physicians' advocacy has been a success for physicians and their patients.

Again, we have seen the positive impact in Alaska because of the laws we have passed. It is unfortunate that we didn't take that opportunity as we dealt with health care reform these past many months.

I yield the floor.

EXHIBIT 1

DECEMBER 21, 2009.

*U.S. Senate,
Washington, DC.*

DEAR SENATOR: We are writing to express our strong opposition to language contained in the Manager's Amendment to H.R. 3590, which excludes the construction industry from the small business exemption contained in the bill. We regret that this is our first opportunity to address this issue, though the fact that the Manager's Amendment was made public less than two days before the first vote on the matter has increased the difficulty of playing a constructive role in the legislative process.

In recognition of the negative impact that a mandate to provide health insurance will have on employers, H.R. 3590 exempts employers with fewer than 50 employees from

the fines levied on those who cannot afford to provide their employees with the federal minimum standard of health insurance. However, the Manager's Amendment singles out the construction industry by altering the exemption so that it applies to only those firms with fewer than 5 employees.

This narrowly focused provision is an unprecedented assault on our industry, and the men and women who every day make the bold decision to strike out on their own by starting a business. Our members' benefit packages reflect the reality of their business models, and they proudly offer the best health insurance coverage that they can afford. It is unreasonable to presume that small business owners can bear the increased cost of these new benefits simply because Congress mandates that they do so.

In the real world, where the rhetoric surrounding this legislation will meet the stark reality of the employer struggling to make payroll, this special interest carve out is simply another bill to pay in an industry that, with an unemployment rate exceeding 18% and more than \$200 billion in economic activity lost in the past year, already is struggling to survive.

And, we would be remiss if we failed to question the justification for singling out the construction industry to bear such a burden. We are unaware of any data or evidence that suggests that the needs and struggles of a construction contractor with fewer than 50 employees are so different from those of small business owners in other industries, and absent such convincing evidence, we are left to assume that this specific provision is merely a political payoff to satisfy the desires of a small constituency.

As Congress moves forward in the legislative process for H.R. 3590, we strongly encourage you to address this onerous provision that needlessly singles out small construction industry employers.

Sincerely,

Air Conditioning Contractors of America, American Institute of Architects, Associated Builders and Contractors, Associated Equipment Distributors, Associated General Contractors, Association of Equipment Manufacturers, Independent Electrical Contractors, National Association of Home Builders, National Federation of Independent Business, National Lumber and Building Material Dealers Association, National Ready-Mixed Concrete Association, National Roofing Contractors Association, National Utility Contractors Association, Plumbing-Heating-Cooling Contractors-National Association, Small Business & Entrepreneurship Council, U.S. Chamber of Commerce.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. BROWNBACK. Madam President, I am glad to join my colleagues in talking about the health care bill. If you looked in the New York Times today, there was a full-page ad describing the bill. I am putting it up here, the same thing that was in the New York Times today. It starts with the question, I want to receive care from my doctor. This, on one page, puts the 2,600 pages in kind of what you are going to see with this bill. It is convoluted. It is difficult. It is expensive. This is what you are going to get. This was in the New York Times today. This is where I sit or this is what is going to happen to me in this overall system. It is no wonder the American public

doesn't want this. They are not excited about this. They are not excited about what it is going to do to the budget—\$2.5 trillion. That is about \$700 million a day, if you are counting in millions a day as one way to look at it.

There are some interesting things hidden within the bill. One of the things I want to point out is the transfer of wealth from young people to old. One of the things that has really bugged me about what we have done in so many of the government systems here—it has been a wealth transfer from younger people to older.

Several of my children are students and working part-time jobs, and they are paying payroll taxes. They say: What is this payroll tax going to? I say: Well, talk to your grandparents and tell them to say thank you to you. These are funds collected that are going to pay for their retirement funds. They do, and the grandparents say thank you. But it doesn't seem to be satisfying to them because they are saying: Why aren't I putting this in something I am saving money for me so that I can have something later on instead of this sort of, OK, I am paying and they are getting. What is going to be there when I get there?

That sort of wealth transfer from young people to old people continues in this bill. Look at this wealth transfer. Younger workers will pay more for health insurance premiums so that older workers can pay less. Their cost at age 25 will go up 25 percent for health insurance premiums. If you are 64, it will go down 20 percent for health care. This is another one of the wealth transfers that take place. It isn't right. It is taking from the kids. It is taking from the grandkids. It should not be continued. It is continued in this bill.

You can look at it another way: Subsidies in this bill go disproportionately to older Americans. Average subsidies for the 55-year-olds are nearly 10 times that of a 25-year-old. A 25-year-old gets a subsidy of \$458, a 55-year-old gets a subsidy of \$4,427—another wealth transfer from younger to older.

Then you can look at the claims in this bill that there are going to be tax cuts for the middle class. That is if you are in the lucky group. For every low-to-middle-income family with a tax cut, three low-to-middle-income families have a tax increase in this bill by the structure of this bill, by this structure, this convoluted, difficult-to-navigate, hard-to-understand, expensive, \$2.5 trillion structure.

That is where we stand. Likely to pass this body and then go to the House of Representatives where there is a major issue that is still brewing, difficult, and must be dealt with, and that is the issue of public funding of abortion that is in this bill.

If you want to cut some of the cost out of this thing, why don't you take some of those expenses out of this.

That would be one way to cut back some of the expenses. But in the House bill, they included Stupak language which continued the Hyde tradition and law of the land that the government will not pay for abortions other than cases of rape, incest, and life of the mother. Except now buried in the Senate bill, in the Reid amendment, is the public funding of abortion, which we haven't done for years.

Yesterday I talked to both Congressman STUPAK and Senator NELSON. They both agree that the Stupak language is far superior. It doesn't publicly fund abortions, whereas what is in this bill now does. You don't need to take my word. Here is what others have said. The U.S. Conference of Catholic Bishops, who want a health care bill but are opposed to the public funding of abortion and opposed to abortion, say:

The bill is morally unacceptable unless and until it complies with longstanding current laws on abortion funding such as the Hyde amendment.

We voted on this floor for the Nelson-Hatch amendment which is now not in the bill.

You don't have to take that. You can take BART STUPAK, Democrat from Michigan, who voted for the bill in the House. He says:

It is now not acceptable. A dramatic shift in Federal policy that would allow the Federal Government to subsidize insurance policies with abortion coverage.

The American public doesn't want that either. The latest poll of December 22 shows that 72 percent of Americans oppose using any public money in the health care overhaul to pay for abortion, including 54 percent of Democrats and 74 percent of Independents. That is where they are. That is where the public is.

National Right to Life, which is the gold standard on standing up for life, says:

The Reid managers amendment requires that all enrollees in an abortion covering plan make a separate payment into an account that will pay for abortions. The bill also contains language that is intended to prevent or discourage any insurer from explaining what this surcharge is to be used for. Moreover, there is nothing in the language to suggest that payment of the abortion charge is optional for any enrollee.

This base bill has another thing in it: It takes the individual opt-out and moves to it a State opt-out. So while let's say Kansas may opt out of the abortion funding in the bill, they still have to pay their taxes that go to another State to pay for abortions there which are equally offensive to my people or other States that don't want to see this funding take place.

It doesn't address the issue of having preventive services include abortion. There was discussion that we are not going to include preventive services in it, but that is not in the language. There was discussion. We tried an

amendment. That is not there. It can still be defined. Now it may ultimately unwind the entire bill based upon the funding of abortion that is in the Senate bill. It will be up to House Members, a number of whom are very concerned and quite fired up about this particular piece, to take this out. I know Congressman STUPAK is working to do that, wants to see that done, agrees with Senator NELSON that his language is far superior, actually does that. It is supported by the Catholic Bishops, the National Right to Life, and other pro-life groups that say the way to go is the Stupak language.

It is not what is in the Senate bill. The Senate bill will actually fund abortions. Then we go through the specifics, as I have in here, of the various places that it has. I met with Senator NELSON about those specifics. I have addressed a number of those concerns. I know he continues to work on it, but at the end of the day this is one of those babies you cannot split. You need to have the Stupak language in this bill. I am afraid at the end of the day that is not going to be in there. I know Congressman STUPAK is pushing very hard for its inclusion, and I wish him all the best.

If this legislation passes this body, it is going to be up to the House of Representatives to put in that Stupak language. And they can do it. It is my hope they will do it. I do not think the overall bill should be passed, but certainly you should not have this piece of funding in this bill, in breaking the longstanding work we have had in the Hyde agreement, in the Hyde language.

Thank you very much, Madam President. How much time do we have remaining on our side?

The PRESIDING OFFICER. One minute.

Mr. BROWNBACK. Madam President, in that concluding minute, what I would like to briefly speak about is the overall process.

I think there are people in this body who did not want to include things such as abortion funding in the bill. But when you operate in a closed process like this, these sorts of things end up happening because the people who work on these issues are excluded. I certainly was not consulted. I am not saying anyone said: Well, look, we are not going to get your vote anyway, so we do not need to have it. But if you do not want to have abortion funding in it, one should look past that and say: Let's get the people who understand and work on this issue—and we agree, we should not have it in there; that is what President Obama said; it should not be in there—and let's see what language passes by their muster.

That was not done. Unfortunately, that is part of what has happened in this process. I think it is tragic that it has happened that way in this process. I think it is wrong. I think it builds a

bill that then people are not satisfied with, and certainly a process they do not agree with that takes place in this overall bill.

It is still not too late. There is still time to address these issues, now that we have the bill to be able to look at. If people of good faith on the other side want to get these addressed, there are ways, and we have the language on how to address it. It is called the Stupak language. It has already passed the House of Representatives. It is called the Nelson-Hatch amendment that was debated here, although it was not passed. We can do that. It is important that it get done.

This bill is not supported by the American public, and particularly this funding piece that is so offensive to so many Americans. We can debate about abortion, but the government should not be funding it, and that is agreed to by over 70 percent of the American public.

I just ask my colleagues on the other side, as you move on forward with this—if this bill passes here—take this piece out. We know what language is agreed to and works. This piece can be taken out. It can be taken out yet. And I think the whole bill may unwind if it is not taken out—unwind because of a number of Democrats who voted for the bill on the House side who want the Stupak language, and they do not want the inferior language that was put in on the Senate side that will actually allow and start the funding of abortion, that we have not done for 30 years.

Madam President, I thank my colleagues and yield the floor.

Mr. GRASSLEY. Madam President, My Friend, Senator CASEY, just a few moments ago repeated the frequent claim made by members on the other side of the aisle that the health care bill provides a \$40 billion net tax cut.

As I demonstrated in a speech earlier today, this claim is inaccurate and does nothing to address the fact that millions of middle-class Americans will see a tax increase.

I have consistently given my Democratic friends credit for providing a significant benefit to help people buy insurance.

This beneficiary class, however, is small.

At the same time there are 78 million individuals, families, and single parents who will see a tax increase.

Seventy-three million of them are below \$200,000.

It is only because the subsidy for this small group is so large—and refundable—that there is a net tax benefit.

For example, the average subsidy is close to \$8,000. Around 13.2 million individuals and families receive this subsidy.

But the data also shows that there is a group of 73 million middle-class Americans who will pay on average \$710 more in taxes.

My Democratic colleagues want to say that since the cost of providing an average tax benefit of \$8,000 to 13.2 million individuals and families is greater than the revenue raised by raising the taxes on 73 million individuals and families by \$710 there is a net tax decrease.

The truth is individuals who are seeing a tax increase are not actually benefiting from the very large subsidy. This is because, in general, this group isn't even eligible for the subsidy.

It comes back to this: a small group of Americans benefit under this bill. Another group of Americans pay higher taxes. These Americans include middle-income individuals and families.

Mr. HATCH. Madam President, I rise to speak on my amendment to the Reid health care bill that would add an expedited judicial review provision to the legislation. It would provide a mechanism for the courts expeditiously to handle any future constitutional challenges to this legislation.

Make no mistake. I strongly oppose this Federal takeover of our health care system. I do so for a host of important and serious policy reasons. I believe it is bad for our country, but I also oppose it because I believe some of its core provisions are unconstitutional, undermining the Constitution and the liberty that it makes possible.

I have argued for months that the constitutional problems with this legislation include the requirement that individuals obtain a certain level of health insurance and the differential State-by-State taxation of high cost insurance plans. Other scholars and commentators have argued that restrictions on the ability of insurance providers to make risk-adjusted decisions about coverage and premiums amount to a taking of private property in violation of the fifth amendment. Others have said that requiring States to pass legislation creating health benefit exchanges exceeds Congress's power in our Federal-State system.

I do not necessarily believe that each of these constitutional arguments is as substantive or as persuasive as the next. Some may agree with this one or that one, all of them, or none at all. These and other arguments, however, are real, substantive, and many of them are as yet untested by the courts because this legislation goes so far beyond anything the Federal Government has ever attempted. These and other issues very well may be the basis for litigation against this legislation. Therefore, I think it is in everyone's interest to provide a mechanism for future constitutional challenges to be handled expeditiously by the courts.

The supporters of this legislation, those who are so confident that no conceivable constitutional argument has any merit whatsoever, should be the strongest supporters of this amendment. More than anyone, they would

want to eliminate as quickly as possible anything that could delay or prevent full implementation of this legislation. Frankly, I am surprised that they are not the ones offering this amendment and I hope they will support it.

Madam President, I now wish to speak about my amendment No. 3294. My amendment would ensure that all Americans would be able to keep the health care coverage they already have.

My amendment is simple. If adopted, it would ensure that the implementation of the Democrat's health care bill shall be conditioned on the Secretary of Health and Human Services certifying to Congress that this legislation would not cause more than 1,000,000 Americans to see higher premiums as compared to projections under current law.

This amendment would ensure that this \$2.5 trillion tax-and-spend bill would not go into effect if the Secretary of Health and Human Services finds that it would actually raise health insurance premiums for more than 1 million Americans compared to projections under current law contrary to the promise made by President Obama that health care reform would result in average savings of \$2,500 per family.

One of the major reasons for enacting health care reform is to ensure that we control rising health care costs that continue to put increasing pressure on American families and small businesses. However, according to the non-partisan Congressional Budget Office, the premiums under this bill would actually rise for Americans purchasing insurance on their own by as much as 13 percent and will continue to rise at double the rate of inflation for both the small group and large group markets.

Spending \$2.5 trillion of hard-earned taxpayer dollars on a system that already spends almost \$2.2 trillion a year without any impact on controlling health care premiums should be unacceptable to every American.

Madam President, I also wish to speak to my amendment No. 3296 to H.R. 3590, the health care reform legislation. This amendment isn't complicated. It would prevent the provisions of the bill from taking effect in the event that it imposes unfunded mandates on the States. As we all know, this legislation imposes significant new burdens on the States and the proposed funding for this program is, in some cases, likely to fall short. Simply put, the Congress should not impose upon the States new Federal policy requirements without ensuring they are adequately reimbursed. In the event that Congress does not provide full funding for these programs, my amendment would ensure that none of the new mandates will be binding on the States.

MEDICAID PHARMACY REIMBURSEMENT

Mrs. LINCOLN. I would like to engage my colleague, the distinguished Senate Finance Committee chairman, in a short colloquy regarding the Medicaid pharmacy reimbursement provisions in the Senate health care reform bill.

Mr. BAUCUS. I would be happy to engage Senator LINCOLN in a colloquy. I commend her for all her leadership over the years on this issue, because she recognizes that it is important to reimburse pharmacies adequately for the generic medications they dispense to Medicaid patients. In rural States like ours, Medicaid patients need access to their community pharmacies to obtain their medications. Sometimes community pharmacies are the only health care providers for many miles. So, it is important that we permanently fix in this health care reform bill the problems for pharmacies caused by the severe reimbursement cuts from the Deficit Reduction Act of 2005.

Mrs. LINCOLN. I thank my colleague and agree with him. That is why I ask him the purpose behind the language in the bill that would establish the Federal upper limit for generics at no less than 175 percent of the weighted-average average manufacturer price. I know this amount is less than the chairman originally proposed in the Medicaid Fair Drug Payment Act from last Congress, which I cosponsored. However, in what cases would it be the intent of the intent of the chairman that the Federal upper limit would be set at more than 175 percent? I am particularly concerned about my small independent pharmacies in Arkansas that fill a significant number of Medicaid prescriptions. Would it be the intent to set a higher rate for these pharmacies? Would it be the intent to set a higher rate for generics that might be in short supply or for which there are availability problems to encourage more manufacturers to make them?

Mr. BAUCUS. I would say to my colleague that the language indicating that the Secretary could set the Federal upper limit at no less than 175 percent the weighted average average manufacturer price could be used in those types of circumstances. It would give the Secretary flexibility to set the Federal upper limits in cases where there is a need to provide states with a higher match in order to assure that appropriate payment is made to pharmacies to encourage the use of generic drugs.

Mrs. LINCOLN. I thank the chairman for his insights into this provision and his work on behalf of our Nation's community pharmacies.

WISCONSIN'S MEDICAID PROGRAM

Mr. KOHL. Madam President, I rise to discuss language in the Reid substitute amendment to H.R. 3590 that would have a dramatic effect on Wis-

consin's Medicaid Program. I would like to converse about this with two of my distinguished colleagues—the other Senator from my home State of Wisconsin, Senator FEINGOLD, and Senator BAUCUS, chairman of the Senate Finance Committee.

I commend Senator BAUCUS's long and hard work in crafting this historical piece of legislation, and today, I seek clarification of one piece of this bill.

Mr. FEINGOLD. I also seek clarification of this piece of the Patient Protection and Affordable Care Act, specifically in section 2001, regarding the definition of individuals that would be considered newly eligible under Medicaid.

Mr. BAUCUS. I thank the Senator. I would be pleased to enter into a colloquy with the Senators from Wisconsin on this subject.

Mr. KOHL. I thank the Senator. Section 2001 of the legislation describes which individuals in each State will be deemed “newly eligible” for Medicaid. It is my understanding that the Federal Government will provide 100 percent of the funds to cover this group of newly eligibles from 2014 to 2016 and that States will be provided with their current law FMAP rates, which are below 100 percent, for individuals already covered. Is this correct?

Mr. BAUCUS. I thank the Senator for the question. Yes, that is correct, and it is my understanding of the legislation as well.

Mr. FEINGOLD. I thank the Senator. As the Senator knows, to be considered “newly eligible” under this bill, individuals must not be eligible under the State plan or under a waiver of the plan for full benefits or for benchmark coverage as described in section 1937 of the Social Security Act. Two of the benefits that must be incorporated into benchmark coverage under section 1937 of the Social Security Act are mental health and substance use disorder services, and prescription drug coverage. If these two benefits are not offered at all, then the coverage will not count as benchmark coverage.

Mr. KOHL. As my two colleagues are aware, Wisconsin currently provides coverage for a number of individuals under a Medicaid waiver, but this coverage does not meet the requirements for benchmark or benchmark-equivalent coverage under the Social Security Act. The Centers for Medicare & Medicaid Services, the Federal agency that oversees Medicaid, has confirmed this for us. Senator FEINGOLD and I understand that, because of this, the individuals in Wisconsin who do not receive benchmark or benchmark-equivalent coverage will be considered newly eligible, and therefore Wisconsin will receive 100 percent Federal funds for those individuals in 2014, 2015, and 2016. Is this the Senator's understanding of the legislation as well?

Mr. BAUCUS. Yes. I thank the Senator.

RELIGIOUS CONSCIENCE EXEMPTION

Mr. CASEY. May I ask the Senator from Iowa to yield for a question about the managers' amendment, amendment 3276, to amendment 2786 to H.R. 3590?

Mr. HARKIN. Of course.

Mr. CASEY. Chairman HARKIN, the managers' amendment includes a religious conscience exemption from the individual requirement to maintain minimum essential coverage in section 1501. Is it the intent of the managers that this exemption apply to an individual who is a member of recognized religious sect described in Internal Revenue Code section 1402(g) regardless of employment status?

Mr. HARKIN. Yes, the intent of the religious exemption is to focus on an individual who is a member of a religious sect described in 1402(g) and who is an adherent of the teachings of that sect notwithstanding his or her employment status.

Mr. CASEY. I thank the chairman. So, for example, an Amish person working in a factory or store for a non-Amish employer and meeting the 1402(g) requirements would not be required to obtain insurance coverage against his or her religious convictions?

Mr. HARKIN. The Senator is correct. The managers' amendment creates a clear bright line exemption for individuals described in 1402(g). This religious conscience exemption applies whether one is unemployed, a self-employed Amish person, an Amish person working for an Amish employer, or an Amish person working for a non-Amish employer.

Mr. CASEY. I thank the Senator for that clarification.

The PRESIDING OFFICER. The majority leader is recognized.

ORDERS FOR WEDNESDAY,
DECEMBER 23, 2009

Mr. REID. Madam President, I ask unanimous consent that when the Senate completes its business today it adjourn until 9:45 a.m., Wednesday, December 23; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of H.R. 3590, the health care reform legislation, with the time following any leader remarks and until 10 a.m. equally divided and controlled between the two leaders or their designees; that at 10 a.m. and until 2 p.m. the time be controlled in alternating 1-hour blocks of time, with the majority controlling the first hour; further that the remaining time until 2:13 p.m. be equally divided and controlled between the two leaders, with the majority leader controlling the final half.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Madam President, Senators should expect a series of rollcall votes, maybe as many as five, to begin at approximately 2:13 tomorrow afternoon.

ORDER FOR ADJOURNMENT

Mr. REID. Madam President, if there is no further business to come before the Senate, I ask unanimous consent that it adjourn under the previous order, following the remarks of Senator DODD of Connecticut.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DODD. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DODD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

HEALTH CARE REFORM

Mr. DODD. Madam President, I want to take a few minutes, if I may, this evening to speak about what this health care bill means to my constituents in Connecticut. I say to the Presiding Officer, the benefits to our States are very similar in many ways, but, obviously, we like to point out what this particularly means in our own respective jurisdictions that we represent.

But before doing so, I want to take a few minutes, if I could, because, again, tomorrow will be a short day, and then there are the votes, apparently, that we are going to have Thursday, and then we will be leaving the Senate for a number of weeks before we return in mid-January, and it might not be possible tomorrow or in the very early hours of Christmas Eve to say a special thanks to the people who work with our offices in this Chamber, both on the minority side and the majority side, who rarely get the kind of recognition they deserve.

I have tried periodically over the years to make sure that as to the consideration of every major bill we talk about the staff and what they have done. So I want to take a couple minutes and identify people with whom I have worked. This not an inclusive list. There are many more people who work for individual Senators who have done outstanding work. Our floor staff here, both on the majority side and the minority side, do a remarkable job and have great patience with all of us. I am very grateful to them, as well as for the jobs they perform.

I want to take a few minutes and recognize the people I have worked very

closely with over the last—well, intensely—over the last almost year now on this issue.

Certainly in Senator REID's office, the majority leader's office, Kate Leone, Carolyn Gluck, Jacqueline Lampert and Randy Devalk deserve a great deal of credit. All of us know them and how much they have been involved in this issue.

And for those of us who serve in our caucus, we have listened to Kate Leone on numerous occasions go over the details of these bills, answer the questions Members have raised about the importance of the legislation. So to the members of Senator REID's staff—and, obviously, there are a lot more people in his office who deserve recognition—but I want to particularly recognize these four individuals with whom we have worked very closely.

Senator Kennedy, as we all know, was such a lion of this institution and cared so deeply about this issue. Over the years, he attracted some wonderful people to work with him, as he fought year in and year out to bring us to the moment we are about to enjoy; and that is, to see some national health care legislation adopted for the very first time.

Michael Myers had worked on this issue for a number of years for Senator Kennedy, and still is here working with Senator HARKIN now as part of the Health, Education, Labor, and Pensions Committee.

Mark Childress, again, worked for the majority leader, worked for Tom Daschle, has worked for others in this body, and has just done a fantastic job. He stayed on at my request and the request of Leader REID to help us work on this issue. He was involved with the White House as well, and really understood the substance of this bill as well as the political navigation that was necessary to bring us to this moment.

I thank Pam Smith as well for her fine work for Senator HARKIN. Jenelle Krishnamoorthy made a wonderful contribution. She worked closely with Senator HARKIN, and I want to thank her. Connie Garner was responsible, for many years, working on the CLASS Act, which is a part of our bill. Portia Wu and David Bowen did a remarkable job. John McDonough and Topher Spiro, as well, are individuals who certainly made a significant contribution to our product here.

Senator BAUCUS's staff: Liz Fowler, Bill Dauster, Russ Sullivan, Cathy Koch, Yvette Fontenot, David Schwartz, Neleen Eisinger, Chris Dawe, Shawn Bishop, and Kelly Whitener—I want to thank them for their efforts as well.

Again, we could give separate remarks about each of these individuals and their contributions.

In my office, again, like others, I have been blessed with some wonderful people. Jim Fenton is my legislative

director and has done a terrific job. Tamar Magarik Haro, who is sitting with me on the floor this evening—I know we are not supposed to recognize people other than Members—along with Jeremy Sharp, they have just done a wonderful, wonderful job, and I know all of my colleagues have gotten to know both of them because of their work.

Monica Feit, Joe Caldwell, Bryan DeAngelis, Andy Barr, Lia Lopez, Daniel Barlava, and Rachael Holt all have made wonderful contributions as well.

Senate legislative counsel, with special thanks to Bill Baird, who was present throughout the entire HELP Committee consideration, has gone way above and beyond. And legislative counsel never gets the kind of recognition they deserve.

They do a tremendous job in drafting the actual legislation. Once these ideas are developed, then they require legislative language to be written.

From the administration, Nancy Ann DeParle, whom all of us have gotten to know very well; Jeanne Lambrew—I want to give a special thanks to Jeanne. She has been just incredible in terms of her encyclopedic knowledge of the issues, working very closely with our staffs. Again, individuals who may not be well known to the public, but when this bill becomes law, these are the individuals who deserve special credit for their tremendous work.

Mike Hash, Lauren Aronson, Secretary Sebelius, Kathleen Sebelius, who left the governorship of Kansas to come here to be head of the Health and Human Services agency and has done a magnificent job in her new capacity; Jim Messina, who worked with MAX BAUCUS for years up here and has been the Deputy Chief of Staff at the White House and has done a tremendous job. Phil Schilliro and Shawn Maher both worked to represent the administration and their Legislative Affairs Office and they do a great job; Dana Singiser as well, for her work.

We will make this list available for the RECORD. I wanted to thank these individuals again for their fine work.

I wish to speak, if I can today, not in my capacity as a senior member of the Health, Education, Labor, and Pensions Committee nor in my capacity as one of the coauthors of the underlying legislation, but rather in my capacity, as I said at the outset, as a Senator representing 3.5 million residents of the State of Connecticut. Our neighboring State, my good friend and colleague, the Senator from New Hampshire, the Presiding Officer, represents New England.

If you travel my State, you will meet some of the world's most talented and dedicated health care professionals. You will tour some of the Nation's finest hospitals where patients get world-class treatment. But you will also hear some heartbreaking stories from people in my State who come from middle-

class families who have lost everything—their homes, their life's savings, their hope for the future—just because someone in their family got sick. They needed special care. You will meet hard-working men and women who have seen their insurance premiums skyrocket over the last decade from around \$6,000 for a family of four to over \$12,000 annually for that same family, and they wonder how much longer they will be able to continue to afford the coverage they have. You will meet small business owners facing an impossible choice between cutting off health care benefits to their employees or laying off those workers.

I have talked specifically about constituents of mine, small businesspeople who literally have been faced with that choice or who have had employees who dreaded having to leave the job they had because there were no health care benefits. They took reductions in pay because they just couldn't stay given the health conditions of their family. Having to leave a job they had for 20 years or more to find new work where there was health care coverage; leaving a job they loved for less pay because they weren't able to get that health care coverage—not because their employer didn't want to give it to them but because that small employer just could not afford to do so and stay in business. Even those who are healthy in my State, who have insurance, there is that worry as well.

What I have described is not an irrational fear they have that someone in their family will lose their job that provides the coverage as I just described, worrying about that child who may develop an illness not covered by their policies, or worrying about no matter how much they pay in premiums their insurance doesn't allow them to be sure of anything at all.

The residents of my State understand the status quo is no longer sustainable because the so-called status quo threatens the basic economic security of every family in my State, as it does across this country. They and their fellow Americans in all 50 States sent us here to take action, and it is action that we shall take.

When this bill becomes law, the people of my State will begin to reap the benefits right away. One in four of my constituents have high blood pressure. One in four teens suffers from diabetes in Connecticut. Today, insurance companies can use these preexisting conditions, along with many others, as an excuse to deny these people coverage. Immediately, young people in our State and across the country will be protected against these preexisting conditions to receive the coverage they need. Beginning 90 days after this bill becomes law, every uninsured resident of my State who has been denied coverage because of a preexisting condition will be able to find the affordable

coverage they need to treat that condition.

Small businesses make up more than three and four businesses in the State of Connecticut, but today only one-half of them are able to offer health benefits to their workers. Beginning in 2010, next year, some 37,000 small businesses in my State, as well as others across the nation, will be eligible for tax credits to make those benefits more affordable. A 50-percent tax break, \$40 billion in this bill, is provided specifically for that purpose: to assist the 37,000 small businesses in Connecticut, and others across the country, to get a tax credit, as much as 50 percent, to allow them to defer or reduce the cost of health insurance for their employees.

Small business owners throughout Connecticut have experienced persistent annual increases in premiums. In recent years—and this is true across the country, but certainly true in my State—it is not uncommon for small business owners to be told they have to pay 20 percent or more for the same insurance they had the previous year.

So the bill we are about to pass will empower the State insurance exchanges such as the one we will have in Connecticut in 2014 to deny insurers access to the exchange if they engage in consumer price gouging in the next few years. That is going to be critically important. For the more than half million seniors in Connecticut, this bill protects Medicare, keeping it solid into the future. Nearly 100,000 seniors in my State hit what is called the doughnut hole in the prescription drug benefit area, costing them an average of more than \$4,000 annually.

This bill we are about to adopt takes the first critical step toward closing that doughnut hole, and Connecticut seniors should know that I and Chairman BAUCUS, along with majority leader HARRY REID, have committed to completing that job in conference, and we will do so.

Meanwhile, in Connecticut, seniors will see their Medicare premiums go down. They will see major improvements in the quality of care they receive, resulting in as many as 29,000 hospital readmissions being prevented. In my State of Connecticut, 3 in 10 Connecticut residents have not had a colorectal cancer screening.

One in six women over the age of 50 have not had a mammogram in the past 2 years. These are important screenings. They and other wellness programs will be provided at no cost to people in my State as well as others across the country. Beginning in 2011, seniors will be able to get a free annual checkup so they can stay well instead of simply receiving care when they get sick. That annual free checkup can make such a difference. I am a living example of that where—because under our health care plan, I can have a free medical checkup once a year. As a re-

sult of that, I discovered that I had prostate cancer, and what a difference that made to be able to discover that, to get through the surgery, and to know that I have a bright future ahead of me, not one that I would discover later on when the kind of surgery I received might have been worthless and pointless.

So these are the kinds of annual physicals Members of Congress get under our health care plans, and our fellow citizens ought to be able to as well, particularly our seniors.

In addition, there are some 255,000 Connecticut residents between the ages of 55 and 64 who will need home health services after they turn 65 because of an illness or an injury. These services, whether they involve installing a handicap shower or hiring a home health care aide, will help these older Americans live in their homes in dignity and with independence. But today these services are not always covered by Medicare or private insurance. Rather than having to impoverish themselves so they can qualify for Medicaid by transferring all of their wealth and assets to a family member or rely on the full-time help of loved ones, these seniors will be able to take advantage of a new voluntary program called the CLASS Act—authored by Senator Kennedy years ago and which is now a part of this bill—that will provide a cash benefit to be used on these services and supports, totally paid for by the individual themselves. Not a nickel, not a penny of Federal money is in that program. It is totally based on the contribution that people make to that program.

So when I hear people talk about this as if it was some great robbery from the Federal Treasury, it doesn't involve the Federal Treasury at all. As the bill takes effect, the health insurance exchanges are set up and health insurance will become a buyer's market for people in my State as well. More than 350,000 Connecticut residents who today do not have insurance will finally have affordable options to choose from. Nearly a quarter of a million people in my State would be eligible for premium credits to help take care of the cost of insurance. That doesn't go into effect until 2014, but in 2010, next year, insurance companies will be prohibited from imposing lifetime caps on the amount of care you can receive.

Insurance companies will be prohibited next year from taking away your coverage, and they will be prohibited from discriminating based on gender or income in the year 2014. The insurance industry will be forced to spend more of your premium dollars on your health care, not on bureaucrats hired to come up with reasons to deny you the care you need. This is called the so-called medical loss ratios which require that resources be spent on patient care and

needs of the policyholder rather than on profits or administrative costs.

The industry will also be required to offer an appeal if your claim is denied, and each State will set up its own independent appeals process to keep the industry honest. Next year the industry will be forced to provide more details about their policies so that you can shop for health insurance the same way you shop for anything else, armed with enough information to be a smart consumer.

All of these insurance items will take effect at least by 2014, many of them next year, as I have just mentioned.

It is not just consumers who will benefit. Connecticut's 15,000 physicians will also benefit. Today these physicians spend, on average, 140 hours and \$68,000 every year just dealing with bureaucrats at the health insurance companies. Let me repeat that: 140 hours and roughly \$68,000 every year just dealing with bureaucrats at the insurance companies. That is 2.1 million hours and \$1 billion in costs overall, time and money wasted in my State alone. That is going to end.

This bill cuts down on bureaucratic redtape and needless paperwork. Doctors will be able to spend their time caring for patients, not fighting with the insurance industry. Meanwhile, more than 5,000 Connecticut primary care physicians will qualify for the new 5- to 10-percent payment bonus. That happens next year in 2010. New programs will incentivize many more young doctors to stay in primary care, which we all know is critically important.

Today, 9 percent of Connecticut residents can't access a primary care physician because there aren't enough doctors to go around. This bill makes an investment in our medical workforce and a \$10 billion investment in community health centers and the National Health Service Corps, which begins taking effect immediately in 2010. It will be phased in over 5 years. That is going to expand dramatically the availability of patient care with our community health care system.

As more uninsured people gain coverage, Connecticut will no longer have to subsidize the \$383 million it spends in uncompensated care our providers deliver each year—important at a time when my State is already, like every State—almost every State—in serious budget trouble.

I have just recited a long list of statistics showing how my State will benefit from this bill—in many instances, benefit immediately. Some will take a little longer, but many of these provisions go into effect in the next year. More important than any statistic will be what you will see when you tour my State, or any other State for that matter, after this bill takes effect—or more accurately, what you will not see. You will not see 100 people losing their in-

surance, their health insurance every single day, finding themselves cast into uncertainty and fear—100 people every day—that will no longer be the case. You will not see families paying an extra \$1,100 a year in health insurance premiums, the so-called hidden tax paid by everyone with insurance as a result of the nearly 50 million uninsured Americans. You will not see seniors facing the loss of their Medicare benefits because overpayments to private insurance companies have rendered the program insolvent. You will not see parents laying awake at night praying that their child's cough goes away because they can't afford to take him or her to see a doctor. You will not see people losing their homes, their life's savings, losing their economic security, all because they got sick or a child or a spouse did. You will not see people dying, as 45,000 do every year in our country, because they couldn't afford access to the health care system.

So as a senior member of the Health, Education, Labor and Pensions Committee, and a close and dear friend of our departed colleague, Senator Ted Kennedy, who led this fight for so long, it will be my honor—a deep honor indeed, one of the highest honors I would have had in the 30 years I have served here—to cast a vote in favor of this landmark legislation.

As one of two Senators whose job it is to look out for the people of my home State of Connecticut, supporting this bill is nothing short of my duty, and I intend to fulfill it with great pride at 8 a.m. on Christmas Eve. What better gift could I give to my folks at home than to cast my vote as 1 of 100 in this body for health care reform in our Nation, so long overdue, so long waited for. And on this Christmas Eve it will become an accomplished feat of the U.S. Senate.

With that, I yield the floor and note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DODD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. UDALL of Colorado). Without objection, it is so ordered.

Mr. DODD. Mr. President, there were a number of other people I wished to mention. I will not go through the list of all the staff involved in this effort in the Senate. I am sure I would miss some people. It is a lengthy list of those who played such an important role. I was fearful I wouldn't have a chance between now and the actual vote on Thursday morning, Christmas Eve, to express my deep gratitude as one Member who benefited tremendously from the participation of my staff, two of whom are seated with me this evening. I know that is probably a

violation of Senate rules to recognize them, but I want my constituents at home and the American public to know how many dedicated people there are whose names they never know, faces they will never see.

I ask unanimous consent that a list of staff be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REID

Kate Leone, Carolyn Gluck, and Randy DeValck.

HARKIN/KENNEDY

Michael Myers, Mark Childress, Pam Smith, Jenelle Krishnamoorthy, Connie Garner, Portia Wu, David Bowen, John McDonough, Topher Spiro, Stacey Sachs, Tom Kraus, Terri Roney, Craig Martinez, Taryn Morrissey, Andrea Harris, Sara Selgrade, Lee Perselay, Caya Lewis, Stephanie Hammonds, Andrew Garrett, Joe Hutter, Lauren McFerran, Jeff Teitz, Kate Cyrul, Dan Goldberg, Caroline Fichtenberg, Bill McConagha, Lory Yudin, and Evan Griffis.

BAUCUS

Liz Fowler, Bill Dauster, Russ Sullivan, Cathy Koch, Yvette Fontenot, David Schwartz, Neleen Eisinger, Chris Dawe, Shawn Bishop, Kelly Whitener, Tony Clapsis, Diedra Henry-Spires, Tom Reeder, Bridget Mallon, Tiffany Smith, and Catherine Dratz.

DODD

Jim Fenton, Tamar Magarik Haro, Jeremy Sharp, Monica Feit, Joe Caldwell, Bryan DeAngelis, Andy Barr, Lia Lopez, Daniel Barlava, and Rachael Holt.

Senate Legislative Counsel, with special thanks to Bill Baird, who, along with Stacy Kern-Scheerer, was present throughout the entire HELP Committee and has gone above and beyond.

OBAMA ADMINISTRATION

NancyAnn DeParle, Jeanne Lambrew, Mike Hash, Lauren Aronson, Secretary Sebelius, Jim Messina, Phil Schilliro, Shawn Maher, and Dana Singiser.

Mr. DODD. Mr. President, let me say this to the minority staff as well. While we have disagreed, and while they didn't vote for the bill, there are people I admire immensely on the minority staff. On our committee, there were wonderful suggestions and contributions that came from the Republican side of the aisle. While they didn't support the bill, I think they made it a better bill because of their contributions. I want to add their names as well. MIKE ENZI of Wyoming, the ranking member—and I worked with every Republican minority member of the HELP Committee—offered amendments that were included. While they may not want to admit it or acknowledge it, they made a contribution to this bill that makes it stronger and a better piece of legislation. I add their names as well for their efforts.

MORNING BUSINESS

Mr. DODD. Mr. President, I ask unanimous consent that the Senate proceed

to a period of morning business, with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRIBUTE TO BARBARA A. SOULIOTIS

Mr. KIRK. Mr. President, I know all my colleagues share an indebtedness to the many staff members who work so (skillfully and) tirelessly behind the scenes each day. They assist us in serving the public and responding to the needs of our constituents. Today, I am honored to pay particular tribute to the contributions of one truly outstanding member of the Senate staff. She will retire at the end of this session of Congress after 47 years of impressive service to the citizens of Massachusetts.

Barbara Souliotis worked on Senator Edward M. Kennedy's first campaign for the Senate in 1962. She was the first employee in Senator Kennedy's office in November of that year. And from the moment he joined this body until the end of his life, Barbara served as a member of his staff and for the last 23 years, she was the State director of his Boston office.

"Barbs" recalls that on her first day at work here in Washington, she spilled a glass of Coca Cola on Senator Kennedy. When she started to apologize, he smiled his iconic smile and said "Barbara, you and I are going to get along just fine."

And they did. She served him brilliantly throughout his entire Senate career—the only member to run the full race as a "staffer", though many of us have reported back in whenever Barbara sent out the call.

Senator Kennedy considered "Barbs" to be his most indispensable assistant. If anyone ever had a question relating to the Massachusetts people whom he loved, he would inevitably ask; "Have you checked with Barbs?" I know how proud Ted would be that this tribute honoring Barbara's extraordinary example of public service to our Senate, our Commonwealth and our country is taking place this day.

I first met Barbara Souliotis when I joined Senator Kennedy's staff in 1969—40 years ago. I could see right away that behind Barbara's modest demeanor was a remarkable woman who would never let Senator Kennedy down. Why?

Because she had learned that his values and his commitment to making a positive difference in peoples lives was the very reason she wanted to work for him in the first place. As I have thought about public service through the years, it has become clear that the best of our Nation was built on the labors of loyalty and love of unsung public heroines like Barbara Souliotis.

It was once said that "Loyalty means nothing unless it has at its heart—the

absolute principle of self sacrifice". If that is the standard of loyalty, I can tell you this,—there is no more loyal United States Senate staffer than Senator Kennedy's own "Barbara Souliotis".

She embodies the admirable quality of loyalty no matter the circumstances. Barbs planned to retire years ago, but her loyalty to Senator Kennedy and her leadership position on his staff kept her with him to the end. Just as she had throughout his storied career, she worked unfailingly for Senator Kennedy through the difficult months of his illness and during his final days.

After Senator Kennedy passed away in August, Barbara continued her remarkable life's work of service as the director of my Boston office. This woman I had known as a colleague came, once again, to the aid of a friend. As one who was appointed to, among other things, continue constituent services for the people of Massachusetts, I knew I could keep that pledge—because Barbara Souliotis volunteered to stay on to lead the Kennedy team during these last few months.

Barb's loyalty, integrity and commitment are legendary. She is the true noble public servant, the tireless and compassionate friend, the unassuming aid to all around her.

If public service is Barb's vocation, sports is her avocation. There is no more avid fan of the Boston Red Sox, the Boston Bruins, the Boston Celtics, and the New England Patriots than Barbara Souliotis.

And she's also an outstanding golfer who plays without a handicap and who has at least one hole-in-one on her score card. In Massachusetts, sports and politics are our passion. And Barbs has scored literally thousands of holes-in-one for the constituents of Massachusetts. A lifelong resident of Haverhill, she has travelled tens of thousands of miles through the years serving the people of our Commonwealth.

In acknowledging Barbara's years of All-Star service to Senator Kennedy for 47 years and to me for these few important and historic months, I add my own personal heartfelt thanks to her, especially for the blessings of her friendship, support, and counsel over the many decades, and I wish her a well-deserved happy and healthy retirement in the many years to come. Thank you, Barbs. We love you. Hit 'em long and hit 'em straight!

NOMINATION OF ERROLL SOUTHERS

Mr. DURBIN. Mr. President, it is only fitting that during this travel-heavy holiday season, we urge our colleagues on the other side of the aisle to work with us in confirming the nomination of Erroll Southers as Assistant Secretary for the Transportation Security Administration.

The Transportation Security Administration is tasked with ensuring the security and safety of travelers using our transportation network. Most often associated with security at airports, TSA responsibilities also include highway, rail, port, bus, and mass transit security. The agency grew out of the aftermath of 9/11, a somber reminder of the need for vigilant attention to transportation security.

Erroll Southers is the chief of homeland security and intelligence for the Los Angeles International Airport police force. He is ready for this job. He has nearly three decades working in public safety, homeland security, and intelligence. Chief Southers has worked as a Santa Monica police officer, special agent for the Federal Bureau of Investigation, and as a top officer with the Los Angeles International Airport, assisting in the management of the largest U.S. airport police force.

Unfortunately, without Chief Southers in the position he has been nominated to, TSA is without the leadership necessary to move forward. The President nominated Chief Southers in September, and the nomination has been reported favorably to the Senate by both the Homeland Security and Commerce Committees, it is being held up by Senate Republicans.

At the same time Senate Republicans are insisting on expanding the role and responsibility of TSA by requiring guns to be allowed on Amtrak, they block and delay the permanent leadership necessary to implement these new policies.

And what is the justification for delaying Chief Southers' confirmation? It is not his qualifications, his past actions or experience. These are generally accepted to be outstanding. No, it is instead an unreasonable demand that he predetermine if TSA employees should be allowed to form unions. Instead of bending to political pressure, Chief Southers has taken the stance that this decision should be made with the input of all stakeholders, using good information, to find the best solution that does not jeopardize safety and security.

The Senate must move past these disagreements and provide the administration with the leadership agencies need to implement congressionally mandated duties. Chief Southers is an excellent candidate to lead the Transportation Security Administration, and he should be in place at the agency today. In the midst of the heaviest travel period of the year, it is irresponsible that the Senate has left this post unfilled. I urge my colleagues to support the confirmation of Chief Southers.

BIODIESEL TAX CREDIT

Mr. GRASSLEY. Mr. President, the biodiesel tax credit will expire on December 31, 2009. I am speaking today to

set the record straight about why the biodiesel tax credit will not be extended before the end of the year.

Some have suggested that Republicans are to blame for not getting the biodiesel tax credit extended before the end of the year. This is simply inaccurate.

The bottom line is that the Senate Democratic leadership decided they were going to attach the tax extender package to a controversial estate tax bill in an attempt to get moderate Democrats and Republicans to vote for an estate tax bill that does not provide sufficient estate tax relief.

If the Senate Democratic leadership had not chosen to hold the tax extender package hostage in an attempt to force moderate Democrats and Republicans to vote for an estate tax bill that lacks support, the tax extender package would have easily passed separately.

The tax extenders bill could have passed as a stand-alone bill easily at any time during this whole year. In fact, the Senate Democratic leadership could simply bring up a noncontroversial version of the tax extenders bill and pass it by unanimous consent like we have done in the past. We wouldn't even need to be talking about the tax extenders package in relation to the Department of Defense funding bill.

However, because the Senate Democratic leadership failed to act on the tax extenders package this entire year, one of the only legislative vehicles left to pass the tax extenders package was the Department of Defense funding bill.

Instead of just adding to the Defense bill a noncontroversial tax extenders package that both Republicans and Democrats could agree on, the Senate Democratic leadership instead decided that they would also try to attach the controversial estate tax bill and a controversial increase in the debt limit.

They could have instead just included a noncontroversial tax extenders package with the Defense bill, and it would have easily passed. Again, they did not do this because they wanted to use the tax extenders package as leverage to get moderate Democrats and Republicans to vote for an estate tax bill that lacks support.

It is also worth noting that there are 60 Senators that caucus with the Democrats, so they can pass anything if they vote together. It rings hollow to place the blame on Republicans for failing to enact the tax extenders package before the end of the year when the Democrats hold a supermajority of 60 Senators, an overwhelming majority in the House, and the Presidency.

The House, waiting until the last month of the year, finally passed a tax extenders bill. However, the House usually passes an extenders bill prior to the last month of the year.

For example, in 2008 the House passed a tax extenders bill on September 26,

2008, and in 2007 the House passed a tax extenders bill on November 9, 2007. This year, the House passed an extenders bill that they knew the Senate would not accept. And then they left town for the year. This is called a dump and run.

The House dumped a tax extenders bill that they knew the Senate would not agree to, and left town before the Senate could have any chance to negotiate a tax extenders bill that both the House and Senate could agree to.

The House also had a choice to make regarding whether they wanted to pass a tax extenders bill this year by simply attaching a noncontroversial version of the tax extenders bill, which both the House and Senate could agree on, to the House Department of Defense bill, without attaching either the controversial estate tax bill or the increase of the debt limit on the Defense bill. However, the House chose not to do so.

Therefore, this should set the record straight. The Democratic leadership in the House and the Senate, and not Republicans, are responsible for the failure to pass a tax extenders bill before the end of this year.

This failure has very serious consequences to the U.S. biodiesel industry, which will grind to a halt as of January 1, 2010. I remind my colleagues of the economic challenges faced by this industry. In 2008, the biodiesel industry supported more than 52,000 green jobs.

Because of the downturn in the economy, the biodiesel industry has already lost 29,000 green jobs in 2009. The industry is poised to lose another 23,000 jobs if nothing is done on the tax incentive or regulatory delays at the Environmental Protection Agency.

So where are these jobs? Some might think they are all in the Midwest, but they are not. These green jobs are in 44 of the 50 States. I would like to list the 13 largest biodiesel-producing States in the country.

There are 24 facilities in Texas. There are 15 facilities in Iowa. There are 6 facilities in Illinois and 6 in Missouri. There are 4 facilities in Washington. Ohio has 11 facilities. There are 5 facilities in Indiana. There are 3 facilities each in Mississippi and South Carolina. There are 7 facilities in Pennsylvania and 4 in Arkansas. New Jersey has 2 facilities. There is 1 facility in North Dakota.

Only 6 of the 50 States do not have some biodiesel production. They are Alaska, Delaware, Maine, New Hampshire, Vermont, and Wyoming. The other 44 States have some biodiesel presence.

So workers in 44 States will be negatively affected by the inaction of this Congress to extend the tax credit.

You don't have to take my word for it. On November 25, I received a letter from the Iowa Renewable Fuels Association.

The letter outlined the economic and job ramifications of allowing the tax credit to expire, even if it is a short-term expiration. I would like to read directly from that letter.

It states in part:

Simply put, if the biodiesel tax incentive is allowed to expire—even for a brief period of time—the Iowa biodiesel industry will cease production and many plants will likely not reopen under current ownership.

If the biodiesel tax incentive expires, biodiesel blends will be priced out of the marketplace and our customers—the oil companies—will stop purchasing biodiesel. In reality, we already cannot book any first quarter sales for next year.

No retroactive action on the tax credit sometime next year will undo the harm caused by the lost sales and shuttered plants over the holidays.

Quite frankly, the biodiesel industry is facing shutdowns that would certainly lead to a much longer—and unpaid—Christmas break than anticipated for the hundreds of workers at Iowa biodiesel plants.

But there are long-term impacts potentially even more far-reaching. After more than a year of mainly breakeven or negative margins, most of Iowa's biodiesel plants simply do not have the cash reserves to withstand even a two or three month shutdown.

So, even if the biodiesel blenders' tax credit is retroactively enacted, several of Iowa's biodiesel plants are unlikely to reopen under the current local-ownership. Please do not let the Iowa-owned biodiesel industry disappear on your watch.

I would ask unanimous consent that the entire letter from the Iowa Renewable Fuels Association to which I referred be printed in the RECORD.

The dire situation reflected in this letter applies to all 173 biodiesel plants around the country. The expiration of this tax credit on December 31, 2009, will affect all 23,000 workers in this green energy sector.

It is unfortunate that we have to be faced with the loss of 23,000 green jobs because of inaction on the extension of the biodiesel tax credit. I hope this explanation makes clear who is responsible for this terrible situation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IOWA RENEWABLE FUELS ASSOCIATION,
November 25, 2009.

Hon. CHARLES E. GRASSLEY,
Hart Senate Office Building,
Washington, DC.

DEAR SENATOR GRASSLEY: First, thank you for taking the time to meet with Iowa Renewable Fuels Association members on November 17, 2009. At that meeting, we discussed the absolute necessity of extending the biodiesel blenders' tax credit prior to the end of this year. With this letter, we want to reinforce the economic and job ramifications of allowing the tax credit to expire—even for a couple of months.

As a longtime supporter of Iowa biodiesel, you know that the biodiesel tax incentive, which allows blenders to claim a \$1 excise tax credit for each gallon of biodiesel blended with diesel, is set to expire on December 31, 2009. Simply put, if the biodiesel tax incentive is allowed to expire—even for a brief period of time—the Iowa biodiesel industry will cease production and many plants will likely not reopen under current ownership.

With the tax credit, biodiesel blends are very competitive in today's marketplace. However, if the biodiesel tax incentive expires, biodiesel blends will be priced out of the marketplace and our customers—the oil companies—will stop purchasing biodiesel. In reality, we already cannot book any first quarter sales for next year. Therefore, biodiesel plants are unable to purchase feedstocks for the beginning of 2010 because there is no guarantee that a market for biodiesel will exist come January 1, 2010. As a result, many plants will likely begin to stop operations in mid-December.

No "retroactive" action on the tax credit sometime next year will undo the harm caused by the lost sales and shuttered plants over the holidays. Quite frankly, the biodiesel industry is facing shutdowns that would certainly lead to a much longer—and unpaid—Christmas break than anticipated for the hundreds of workers at Iowa biodiesel plants.

That is a prospect that any industry hopes to avoid. But there are long-term impacts potentially even more far-reaching. While 2009 has been a rough economic year for many industries, the biodiesel industry has been hit harder than most. In fact, of Iowa's fifteen biodiesel refineries, only nine are currently operating—and most of those at a severely reduced capacity. After more than a year of mainly breakeven or negative margins, most of Iowa's biodiesel plants simply do not have the cash reserves to withstand even a two or three month shutdown.

So even if the biodiesel blenders' tax credit is retroactively enacted, several of Iowa's biodiesel plants are unlikely to reopen under the current local-ownership. In fact, if recent history from the ethanol industry is any indication, Big Oil companies may swoop in, buy the closed plants for pennies on the dollar and then reopen them as part of their multi-national, vertically-integrated business plan. While this would be better than having the doors of these plants closed for good, keeping these plants in the hands of Iowa investors provides the most benefits to the local communities.

During our meeting, there was discussion of using a tax extenders package or estate tax bill as a vehicle to extend the biodiesel tax credit this year. That type of decision is best left to you—we just know the extension needs to happen this year. We have also increasingly heard of the need for a "jobs bill" this year in response to U.S. unemployment surpassing ten percent. We urge you to consider the extension of the tax credit as part of any "jobs bill" that Congress may consider. After all, extending the tax credit—something most people believe will happen "eventually"—is an easy way to maintain hundreds of jobs in Iowa and thousands around the country. Failure to extend the biodiesel tax credit will undoubtedly add to the jobless rolls.

We thank you for your support of the Iowa biodiesel industry, and we encourage you to do all you can to ensure that the biodiesel tax incentive is extended as soon as possible. We are not trying to be alarmist. Rather, we want you to have a clear picture of the prospects facing the Iowa biodiesel industry as the tax credit expiration comes closer each day. Please do not let the Iowa-owned biodiesel industry disappear on your watch.

Sincerely,

MONTE SHAW,
Executive Director.

THANKING STAFF

Mr. NELSON of Nebraska. Mr. President, I want to take a few minutes in the midst of this debate to acknowledge some individuals who work for us here in the Senate. As chairman of the Legislative Branch Appropriations subcommittee that funds these agencies, I have had the opportunity to get to know these staffs and have a good understanding of the work they do for us here in the Senate. These folks work tirelessly behind the scenes at all times to keep this institution running safe and sound under any circumstances.

We have been in session every week-end since Thanksgiving, including during the largest December snowstorm in Washington's history, and we have worked uninterrupted thanks to the dedication and hard work of these individuals. It is easy to take for granted the hard work they perform on a daily basis—and we often do, but today, on behalf of the entire Senate I would like to say a heartfelt thank you to all of them.

I want to start by thanking the U.S. Capitol Police Force, led by Chief Philip Morse and Assistant Chief Dan Nichols. This force of 1800 officers put their lives on the line every day to protect us and this institution, and they have all worked a tremendous amount of overtime lately. I want to particularly mention the terrific work of Inspector Sandra Coffman and her staff in the Capitol Division for all the extra hours they have worked in securing and protecting the Capitol and the Chamber. They have gone above and beyond their normal duty, and we are extremely grateful for their dedication to our safety and protection.

Next I want to thank the staff of the Senate Sergeant at Arms, led by Sergeant at Arms Terry Gainer and Deputy Sergeant at Arms Drew Willison. The SAA staff of nearly 900 people includes the doorkeepers who have worked nonstop through the last month keeping access to the Senate available for staff and visitors who have traveled to Washington to witness this historic debate firsthand. They have kept our computer systems and overstretched telephone systems running, kept the mail moving, and the recording studio functioning, not to mention the facilities staff who have kept the Capitol Building clean and warm, replenishing wood for the fireplaces nonstop.

I want to thank the staff of the Architect of the Capitol, led by Acting Architect Stephen Ayers, and the many, many folks who have worked around the clock from Ted Bechtel and the Capitol Grounds crew who have been removing snow from the road, sidewalks, and parking lots of the Capitol Complex, to Robin Morey and his staff who have kept the Senate buildings clean and warm throughout these

long, long weeks. I truly appreciate the extra hours of work provided by these individuals.

I want to thank the Secretary of the Senate, Nancy Erickson, and her staff, including the legislative clerks, the bill clerks, the enrolling clerks, the executive clerks, Parliamentarians, official reporters of debates, captioning services, journal clerks, and the staff of the Daily Digest. These folks have been here around the clock, under some very tiring circumstances, to deliver the services that are needed to keep this institution running.

Last but not least, I want to thank Lula Davis and David Schiappa, our floor leaders, for their tireless guidance in keeping us—the Members—where we need to be when we need to be there. We are in your debt.

Mr. President, I have undoubtedly left out many people in the Senate who deserve to be thanked, and I hope they know who they are and how much we appreciate them.

ADDITIONAL STATEMENTS

100TH ANNIVERSARY OF THE HOUSE OF JACOB

• Mr. VOINOVICH. Mr. President, today I am pleased to extend my warmest congratulations to the Supreme Council of the House of Jacob of the United States of America as it celebrates its 100th anniversary with delegates from 41 locations from around the United States travelling to Coshocton, OH, for services in the church's newly constructed Mount Zion Tabernacle.

For 100 years, the Supreme Council of the House of Jacob of the United States of America has invited men and women of diverse backgrounds to worship God according to the teachings of Jesus Christ, advocating strong family ties, a high standard of moral values and civic participation.

I would like to recognize Supreme Bishop, Father J. Daniel Israel, J.O.G., and the Board of Directors of the House of Jacob of the United States of America, which make up the leadership of this church. I commend the ministries and the good works under their supervision within Ohio, and across our Nation.

I encourage my fellow Ohioans, my colleagues in the Senate and the entire Nation to recognize this memorable anniversary celebration and to congratulate the Supreme Council of the House of Jacob of the United States of America on its 100-year anniversary on the 1st day in January 2010. Also, may God continue to bless this Church, its leaders and its faithful members.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to

the Senate by Mrs. Neiman, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-4144. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Update to Notice 2009-38" (Notice No. 2010-2) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Finance.

EC-4145. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Extension of Notice 2008-55" (Notice No. 2010-3) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Finance.

EC-4146. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Guidance Under Section 409A(a) Regarding Complying with Opinions Issued By the Special Master Under the EESA" (Notice No. 2009-92) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Finance.

EC-4147. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Extension of Deadline to Adopt Certain Retirement Plan Amendments" (Notice No. 2009-97) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Finance.

EC-4148. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "2009 Cumulative List of Changes in Plan Qualification Requirements" (Notice No. 2009-98) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Finance.

EC-4149. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Arbitrage Treatment of Certain Guarantee Funds" (Notice No. 2010-5) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Finance.

EC-4150. A communication from the Chief of the Publications and Regulations Branch,

Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Reduction in Taxable Income for Housing Hurricane Katrina Displaced Individuals" ((TD 9474)(RIN1545-BF14)) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Finance.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ROCKEFELLER, from the Committee on Commerce, Science, and Transportation, without amendment:

H.R. 3819. A bill to extend the commercial space transportation liability regime.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. HATCH:

S. 2922. A bill to amend the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 to extend the Rural Community Hospital Demonstration Program; to the Committee on Finance.

By Mrs. MURRAY:

S. 2923. A bill to provide funding for summer and year-round youth jobs and training programs; to the Committee on Health, Education, Labor, and Pensions.

By Mr. LEAHY (for himself, Mr. HATCH, Mr. KOHL, and Mr. SESSIONS):

S. 2924. A bill to reauthorize the Boys & Girls Clubs of America, in the wake of its Centennial, and its programs and activities; to the Committee on the Judiciary.

By Mr. WYDEN (for himself and Mr. CORNYN):

S. 2925. A bill to establish a grant program to benefit victims of sex trafficking, and for other purposes; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BURR (for himself and Mrs. HAGAN):

S. Res. 384. A resolution honoring United States Army Special Operations Command on their 20th anniversary; to the Committee on Armed Services.

By Mr. LUGAR:

S. Res. 385. A resolution recognizing the great progress made by the people of Ukraine in the establishment of democratic institutions, and supporting a free and transparent presidential election on January 17, 2010; to the Committee on Foreign Relations.

By Mr. KAUFMAN (for himself, Mr. LIEBERMAN, Mr. MCCAIN, Mr. DODD, Mr. KYL, Mr. CASEY, Mr. GRAHAM, Mr. LEVIN, Mr. BROWNBACK, and Mr. HATCH):

S. Res. 386. A resolution condemning the Government of Iran for restricting and suppressing freedom of the press, freedom of speech, freedom of expression, and freedom of assembly, and for its human rights abuses, and for other purposes; considered and agreed to.

ADDITIONAL COSPONSORS

S. 619

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 619, a bill to amend the Federal Food, Drug, and Cosmetic Act to preserve the effectiveness of medically important antibiotics used in the treatment of human and animal diseases.

S. 891

At the request of Mr. DURBIN, the name of the Senator from Pennsylvania (Mr. CASEY) was added as a cosponsor of S. 891, a bill to require annual disclosure to the Securities and Exchange Commission of activities involving columbite-tantalite, cassiterite, and wolframite from the Democratic Republic of Congo, and for other purposes.

S. 987

At the request of Mr. DURBIN, the name of the Senator from North Dakota (Mr. DORGAN) was added as a cosponsor of S. 987, a bill to protect girls in developing countries through the prevention of child marriage, and for other purposes.

S. 1076

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 1076, a bill to improve the accuracy of fur product labeling, and for other purposes.

S. 1297

At the request of Mr. CONRAD, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 1297, a bill to amend the Internal Revenue Code of 1986 to encourage guaranteed lifetime income payments from annuities and similar payments of life insurance proceeds at dates later than death by excluding from income a portion of such payments.

S. 1927

At the request of Mr. DODD, the name of the Senator from Washington (Mrs. MURRAY) was added as a cosponsor of S. 1927, a bill to establish a moratorium on credit card interest rate increases, and for other purposes.

S. 1939

At the request of Mrs. GILLIBRAND, the name of the Senator from North Dakota (Mr. DORGAN) was added as a cosponsor of S. 1939, a bill to amend title 38, United States Code, to clarify presumptions relating to the exposure of certain veterans who served in the vicinity of the Republic of Vietnam, and for other purposes.

S. 2781

At the request of Ms. MIKULSKI, the names of the Senator from New Jersey (Mr. LAUTENBERG) and the Senator from Massachusetts (Mr. KIRK) were added as cosponsors of S. 2781, a bill to change references in Federal law to mental retardation to references to an intellectual disability, and to change references to a mentally retarded individual to references to an individual with an intellectual disability.

S. 2787

At the request of Mr. THUNE, the name of the Senator from Florida (Mr. LEMIEUX) was added as a cosponsor of S. 2787, a bill to repeal the authority of the Secretary of the Treasury to extend the Troubled Asset Relief Program.

S. 2847

At the request of Mr. NELSON of Florida, his name was added as a cosponsor of S. 2847, a bill to regulate the volume of audio on commercials.

S. 2862

At the request of Ms. SNOWE, the name of the Senator from Maryland (Mr. CARDIN) was added as a cosponsor of S. 2862, a bill to amend the Small Business Act to improve the Office of International Trade, and for other purposes.

S. 2917

At the request of Mr. BAUCUS, the names of the Senator from Arkansas (Mrs. LINCOLN) and the Senator from Nebraska (Mr. JOHANNIS) were added as cosponsors of S. 2917, a bill to amend the Internal Revenue Code of 1986 to modify the penalty for failure to disclose certain reportable transactions and the penalty for submitting a bad check to the Internal Revenue Service, to modify certain rules relating to Federal vendors, and for other purposes.

S. CON. RES. 39

At the request of Mr. MENENDEZ, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of S. Con. Res. 39, a concurrent resolution expressing the sense of the Congress that stable and affordable housing is an essential component of an effective strategy for the prevention, treatment, and care of human immunodeficiency virus, and that the United States should make a commitment to providing adequate funding for the development of housing as a response to the acquired immunodeficiency syndrome pandemic.

S. RES. 158

At the request of Mr. KERRY, the name of the Senator from South Carolina (Mr. GRAHAM) was added as a cosponsor of S. Res. 158, a resolution to commend the American Sail Training Association for advancing international goodwill and character building under sail.

AMENDMENT NO. 2995

At the request of Mr. SCHUMER, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of amendment No. 2995 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3218

At the request of Mr. DORGAN, the name of the Senator from Connecticut (Mr. DODD) was added as a cosponsor of

amendment No. 3218 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mrs. MURRAY:

S. 2923. A bill to provide funding for summer and year-round youth jobs and training programs; to the Committee on Health, Education, Labor, and Pensions.

Mrs. MURRAY. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 2923

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Youth Jobs Act of 2010".

SEC. 2. SUMMER AND YEAR-ROUND YOUTH JOBS.

(a) FINDINGS.—Congress finds that—

(1) a \$1,500,000,000 investment in summer and year-round employment for youth, through the program supported under this section, can create up to 450,000 temporary jobs and meaningful work experiences for economically disadvantaged youth and stimulate local economies;

(2) there is a serious and growing need for employment opportunities for economically disadvantaged youth (including young adults), as demonstrated by statistics from the Bureau of Labor Statistics stating that, in November 2009—

(A) the unemployment rate increased to 10 percent, as compared to 6.8 percent in November 2008;

(B) the unemployment rate for 16- to 19-year-olds rose to 26.7 percent, as compared to 20.4 percent in November 2008; and

(C) the unemployment rate for African-American 16- to 19-year-olds increased to 49.4 percent, as compared to 32.2 percent in November 2008;

(3) research from Northwestern University has shown that every \$1 a youth earns has an accelerator effect of \$3 on the local economy;

(4) summer and year-round jobs for youth help supplement the income of families living in poverty;

(5) summer and year-round jobs for youth provide valuable work experience for economically disadvantaged youth;

(6) often, a summer or year-round job provided under the Workforce Investment Act of 1998 is an economically disadvantaged youth's introduction to the world of work;

(7) according to the Center for Labor Market Studies at Northeastern University, early work experience is a very powerful predictor of success and earnings in the labor market, and early work experience raises earnings over a lifetime by 10 to 20 percent;

(8) participation in a youth jobs program can contribute to a reduction in criminal and high-risk behavior for youth; and

(9)(A) youth jobs programs benefit both youth and communities when designed around principles that promote mutually beneficial programs;

(B) youth benefit from jobs that provide them with work readiness skills and that help them make the connection between responsibility on the job and success in adulthood; and

(C) communities benefit when youth are engaged productively, providing much-needed services that meet real community needs.

(b) REFERENCES.—

(1) CERTIFICATE; CREDENTIAL.—In subsection (d), references to the terms "certificate" and "credential" have the meanings prescribed by the Secretary of Labor.

(2) YOUTH-RELATED REFERENCES.—In this Act, and in the provisions referred to in subsections (c) and (d) for purposes of this Act—

(A) a reference to a youth refers to an individual who is not younger than age 14 and not older than age 24, and meets any other requirements for that type of youth; and

(B) a reference to a youth activity refers to an activity covered in subsection (d)(1) that is carried out for a youth described in subparagraph (A).

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary of Labor for youth activities under the Workforce Investment Act of 1998 (29 U.S.C. 2801 et seq.), \$1,500,000,000, which shall be available for the period of January 1, 2010 through June 30, 2011, under the conditions described in subsection (d).

(d) CONDITIONS.—

(1) USE OF FUNDS.—The funds made available under subsection (c) shall be used for youth jobs and training programs, to provide opportunities referred to in subparagraphs (C), (D), (E), and (F) of section 129(c)(2) of such Act (29 U.S.C. 2854(c)(2)) and, as appropriate, opportunities referred to in subparagraphs (A) and (G) of such section, except that no such funds shall be spent on unpaid work experiences and the opportunities may include learning described in paragraph (3)(B).

(2) LIMITATION.—Such funds shall be distributed in accordance with sections 127 and 128 of such Act (29 U.S.C. 2852, 2853), except that no portion of such funds shall be reserved to carry out 128(a) or 169 of such Act (29 U.S.C. 2853(a), 2914).

(3) PRIORITY.—In using funds made available under subsection (c), a local area (as defined in section 101 of such Act (29 U.S.C. 2801))—

(A) shall give priority to providing—

(i) work experiences in viable, emerging, or demand industries, or work experiences in the public or nonprofit sector that fulfill a community need; and

(ii) job referral services for youth to work experiences described in clause (i) in the private sector, for which the employer involved agrees to pay the wages and benefits, consistent with Federal and State child labor laws; and

(B) may give priority to providing—

(i) work experiences combined with linkages to academic and occupational learning, so that the experiences and learning provide opportunities for youth to earn a short-term certificate or credential that has value in the labor market; and

(ii) work experiences combined with learning that are designed to encourage and maximize the likelihood of a participant's return to, or completion of, a program of study leading to a recognized secondary or postsecondary degree, certificate, or credential.

(4) MEASURE OF EFFECTIVENESS.—The effectiveness of the activities carried out with such funds shall be measured, under section 136 of such Act (29 U.S.C. 2871), only with performance measures based on the core indicators of performance described in section

136(b)(2)(A)(ii)(I) of such Act (29 U.S.C. 2871(b)(2)(A)(ii)(I)), applied to all youth served through the activities.

By Mr. LEAHY (for himself, Mr. HATCH, Mr. KOHL, and Mr. SESSIONS):

S. 2924. A bill to reauthorize the Boys & Girls Clubs of America, in the wake of its Centennial, and its programs and activities; to the Committee on the Judiciary.

Mr. LEAHY. Mr. President, I am pleased today to introduce legislation to reauthorize the Department of Justice grant program for Boys & Girls Clubs. I thank Senator HATCH, Senator KOHL and Senator SESSIONS for joining me in this effort.

I have partnered with Senator HATCH for many years on issues concerning the Boys & Girls Clubs, and this bipartisan bill shows the commitment of both Democrats and Republicans to the good work done by Boys & Girls Clubs across the Nation.

Children are the future of our country, and we have a responsibility to make sure they are safe and secure. I know firsthand how well Boys & Girls Clubs work, and the real impact they have in our communities. In my home State of Vermont, we are fortunate to have 6 Boys & Girls Clubs operating in 25 locations. These clubs serve more than 14,000 youth in the State. I often hear from parents, educators, law enforcement officers and others in Vermont about just how successful these Clubs are, and how they inspire youth to reach their full potential.

As a senior member of the Senate Appropriations Committee, I have pushed for more Federal funding for Boys & Girls Clubs. This year, I recommended additional funding for youth mentoring programs, so that youth-serving organizations like the Boys & Girls Clubs of America are able to continue making a substantial and real difference in the lives of vulnerable children. I was pleased that Congress included \$100 million for competitive youth mentoring grants in the recently passed consolidated appropriations bill.

The current recession has hit many organizations around the country, threatening their financial health, and the Boys & Girls Clubs are no different. At the same time, participation in these clubs has never been higher, and it continues to increase. I believe funding is well spent at the community level, however, where the positive impact on our youth is felt most directly.

In the 108th Congress, Senator HATCH and I worked together to pass a bill to reauthorize and extend the programs of the Boys & Girls Clubs of America through fiscal year 2009. Due in part to the support of Congress, there now exist over 4,300 Boys & Girls Clubs in all 50 states, serving more than 4.8 million young people. The bill we introduce today will help us continue to support these important programs by

authorizing Justice Department grants through 2015.

We need safe havens where our youth—the future of our country—can learn and grow up free from the influences of drugs, gangs and crime. That is why Boys & Girls Clubs are so important to our children.

I hope all Senators will support this bipartisan bill to provide Federal support for the Boys & Girls Clubs of America. Our greatest responsibility is to our children, and supporting Boys & Girls Clubs is just one way in which we can show our commitment to their future.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 2924

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Boys & Girls Clubs Centennial Reauthorization Act of 2009”.

SEC. 2. BOYS & GIRLS CLUBS OF AMERICA.

Section 401 of the Economic Espionage Act of 1966 (42 U.S.C. 13751 note) is amended—

(1) in subsection (a), by striking paragraph (1) and inserting the following:

“(1) FINDINGS.—Congress finds that—

“(A) for over 100 years, the Boys & Girls Clubs of America, a national organization chartered by an Act of Congress, has proven itself as a positive force in the communities it serves;

“(B) Boys & Girls Clubs and the programs and services implemented therein by over 50,000 professional staff, and 194,000 volunteers promote and enhance the development of boys and girls by instilling a sense of competence, usefulness, belonging and influence thereby making Boys & Girls Clubs a safe place to learn and grow;

“(C) the purpose of the program established by this section has been to provide adequate resources in the form of seed money for the Boys & Girls Clubs of America to assist local communities to form partnerships in a collaborative manner so education, youth development and prevention programs could be available for the youth in those communities;

“(D) in 1990 there were 1,810 Boys and Girls Clubs facilities throughout the United States, Puerto Rico, and the United States Virgin Islands, serving 2,400,000 youths nationwide;

“(E) due to the public investment via the program established pursuant to this section, resulting congressional appropriations, and private partnership support, there are now 4,387 Boys & Girls Clubs facilities throughout the United States, Puerto Rico, and the United States Virgin Islands, serving 4,500,000 youths nationwide;

“(F) with the assistance of the Federal Government, local communities have collaborated to establish and operate the Clubs in schools, parks, parks and recreation facilities, libraries, and community centers;

“(G) these new partnerships have resulted in 33 percent of the Boys & Girls Clubs located in or on school campuses where Club programs enhance and enrich the learning opportunities for youth;

“(H) the growth of Boys & Girls Clubs also includes an increase in Clubs located in public housing sites across the Nation, having grown from 289 in 1990 to 440 in 2009;

“(I) the growth of Boys and Girls Clubs also includes the growth of Boys & Girls Clubs on Native American land, having grown from 0 in 1990 to 225 in 2009 serving 140,000 Native American youth;

“(J) investment in our school partnerships has positively impacted graduation rates as demonstrated in recent survey of Clubs conducted by BGCA’s CareerLaunch career preparation program, in which 96.68 percent of participants progressed successfully to the next grade level at the end of the 2008-2009 school year;

“(K) public housing projects and Native American land in which there is an active Boys and Girls Club have experienced a reduction in the presence of crack cocaine, and a reduction in juvenile crime and gang violence;

“(L) Boys & Girls Clubs are locally run and have been exceptionally successful in balancing public funds with private sector donations and maximizing community involvement as evidenced by collaborations and partnerships with schools, cities, counties, Sea Research, other youth providers such as Big Brothers Big Sisters, Police Athletic League (PAL), Cal Ripken Sr. Foundation, Boy Scouts, Girl Scouts, 4-H, and public libraries; and

“(M) further investment in Boys & Girls Clubs, which celebrated 100 years of service in 2006 will—

“(i) inure to our collective national benefit;

“(ii) continue to assist in the effort to reduce crime and drug use among our Nation’s youth by teaching young people how to avoid gangs, resist alcohol, tobacco, and other drug use;

“(iii) continue to assist in improving educational opportunities and create centers of learning in and with schools thereby reducing the drop out rate and helping to improve the economy (if the national male graduation rate were increased by only 5 percent, the Nation would see an annual savings of \$4,900,000,000 in crime related costs);

“(iv) continue in the efforts of reducing childhood obesity by teaching young people about the benefits of healthy habits such as eating right and being physically active;

“(v) continue to serve youth in rural communities including Native American land, by engaging and creating partnerships in those communities;

“(vi) continue to serve youth in urban and suburban communities including Public Housing by engaging and creating partnerships in those communities;

“(vii) continue to provide outdoor and environmental education programs for kids that would otherwise not have those educational and enriching opportunities;

“(viii) continue to develop job training programs for teens; and

“(ix) better equip communities to continue to sustain and improve the quality of these programs through effective use of existing resources, merging operations, and working collaboratively within communities to provide the highest quality programs for the youth in the Boys & Girls Clubs.”;

(2) in subsection (c)(1)—

(A) by striking “2006, 2007, 2008, 2009, and 2010” and inserting “2011, 2012, 2013, 2014, and 2015”; and

(B) by striking “establishing and extending Boys & Girls Clubs facilities where needed, with particular emphasis placed on establishing clubs in and extending services to

public housing projects and distressed areas" and inserting "improving the quality of youth development and educational programs, health, physical fitness, and prevention services for youth at existing and new Boys & Girls Clubs facilities with special emphasis on reducing high school drop out rates";

(3) in subsection (c)(2)—

(A) by striking subparagraphs (A) and (B); and

(B) by redesignating subparagraphs (C) and (D) as subparagraphs (A) and (B), respectively; and

(4) by amending subsection (e) to read as follows:

"(e) AUTHORIZATION OF APPROPRIATIONS.—

"(1) IN GENERAL.—There are authorized to be appropriated to carry out this section—

"(A) \$85,000,000 for fiscal year 2011;

"(B) \$85,000,000 for fiscal year 2012;

"(C) \$85,000,000 for fiscal year 2013;

"(D) \$85,000,000 for fiscal year 2014; and

"(E) \$85,000,000 for fiscal year 2015.".

By Mr. WYDEN (for himself and Mr. CORNYN):

S. 2925. A bill to establish a grant program to benefit victims of sex trafficking, and for other purposes; to the Committee on the Judiciary.

Mr. WYDEN. Mr. President, I am pleased to join today with my colleague from Texas, Senator CORNYN, to introduce the Trafficking Deterrence and Victims Support Act of 2009.

This bill addresses a serious problem that is modern day slavery, pure and simple—human sex trafficking. You could almost call it a war, where all too often, children are the casualties.

The statistics on minors involved in sex trafficking are shocking. Experts estimate that over 100,000 children in the U.S. are at risk for prostitution. The average age of entry into prostitution is 12. The children at greatest risk of becoming involved in sex trafficking are what they call "repeat runaways"—kids who have run away over and over again. They need help right away if they are going to avoid being caught by pimps. One third of runaway children are lured into prostitution within 48 hours of leaving home and 75 percent of minors caught in this web of prostitution have a pimp.

This problem is on the rise because criminal gang members are increasingly turning to pimping. Gang members have discovered that they are less likely to get prosecuted for trafficking a person than trafficking drugs. While drugs can only be sold once, a pimp can sell a person over and over. It is just as lucrative. A pimp can make \$200,000 a year on one trafficking victim.

This situation is horrifying and totally unacceptable. The bill I am introducing today will bring a smart strategy that will give some teeth to the efforts law enforcement across the country have made to combat sex trafficking. It will give them additional resources they need to lock up pimps and sex traffickers. It will also help victims break away from their abusers and get the treatment and services they need to take their lives back.

Let us be absolutely clear about this—the pimps who prey upon vulnerable young people are criminals, and they should be put behind bars. The young women, girls, and sometimes boys who are trafficked are not criminals—they are victims of crime. They don't need to be prosecuted. They need all the help they can get to escape the clutches of pimps.

Unfortunately, until now, the government has been a step behind. Right now, it is very difficult for law enforcement officers and prosecutors to build criminal cases and crack down on pimps. The Trafficking Deterrence and Victims Support Act would change that.

Here is how it would work: The bill would establish a pilot project of 6 block grants in locations in different regions of the country with significant sex trafficking activity. The block grants would be awarded by the Department of Justice to State or local government applicants that have developed a workable, comprehensive plan to combat sex trafficking. The grants would require a comprehensive, multi-disciplinary approach to addressing trafficking problems. Applicants for the grants would have to demonstrate they can work together with local, State, and Federal law enforcement agencies, prosecutors, and social service providers to achieve the goals the bill would set out for them.

Government agencies that get the grants would be required to create shelters where trafficking victims would be safe from their pimps, and where they could start getting treatment for the trauma they have suffered. The shelters would provide counseling, legal services, and mental and physical health services, including treatment for substance abuse, sexual abuse, and trauma-informed care. The shelters would also provide food, clothing, and other necessities, as well as education and training to help victims get their lives on track.

It is going to take this kind of comprehensive plan to finally turn the tables on pimps who, right now, just wait for their victims to be released from jail so they can put them back out on the streets to make money for them. Once those girls are out, they don't come back to testify against their pimps—they're just gone.

This bill fixes that problem by giving the young victims a safe haven. It is only by addressing the needs of these victims that law enforcement officers will be able to work with them to build criminal cases against their pimps. The block grants will also provide for specialized training for law enforcement officers and prosecutors to help them learn how to handle trafficking victims and build trafficking cases.

This bill would also strengthen reporting requirements for runaway or missing children, and authorize fund-

ing to the FBI to enhance the National Crime Information Center, NCIC, database, which is where missing child reports are filed. This would give law enforcement officers better information on the children at greatest risk of being lured in to sex trafficking by being able to show a tally of how many times a child has run away, and can flag them as "repeat runaways" who are at high risk of being lured into prostitution.

Sex trafficking is a complex issue that requires the comprehensive, wrap-around approach that this bill would deliver. As daunting as this problem is, there are bright examples of how to address the challenge, such as the achievements of Sergeant Byron Fassett of the Dallas Police Department. Just listening to Sergeant Fassett, who spoke at a recent congressional briefing that I hosted, is an education in how to do this right. The lessons he has learned in over 20 years of combating sex trafficking are a primer for how to get victims out of the clutches of pimps and build cases to put pimps away. Sergeant Fassett is not the only officer out there who's attacking this challenge the right way. In my home town of Portland, the officers on the human trafficking task force are doing excellent work. But right now, they simply don't have the resources to crack this problem. The Trafficking Deterrence and Victims Support Act would deliver the training and resources they need.

I want to also thank the many individuals and organizations who attended the briefing and participated in efforts to craft this legislation. I particularly want to acknowledge the Polaris Project and the National Center for Missing & Exploited Children, for their instrumental roles in this effort.

I look forward to working with Senator CORNYN and other colleagues to move this important legislation forward. There are children out on the streets tonight who shouldn't have to wait for the help this bill can give. Let us end this appalling war on those kids. Let us give them the help they need by passing this piece of legislation with all the speed possible.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 2925

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Trafficking Deterrence and Victims Support Act of 2009".

SEC. 2. FINDINGS.

Congress finds the following:

(1) Human trafficking is modern day slavery. It is the fastest-growing, and second largest, criminal enterprise in the world.

Human trafficking generates an estimated profit of \$32,000,000,000 per year, world wide.

(2) In the United States, human trafficking is an increasing problem. This criminal enterprise includes citizens of the United States, many of them children, who are forced into prostitution, and foreigners brought into the country, often under false pretenses, who are coerced into forced labor or commercial sexual exploitation.

(3) Sex trafficking is one of the most lucrative areas of human trafficking. Criminal gang members in the United States are increasingly involved in recruiting young women and girls into sex trafficking. Interviews with gang members indicate that the gang members regard working as an individual who solicits customers for a prostitute (commonly known as a "pimp") to being as lucrative as trafficking in drugs, but with a much lower chance of being criminally convicted.

(4) Minors in the United States are highly vulnerable for sexual exploitation and sex trafficking. As many as 2,800,000 children live on the streets. Of the estimated 1,600,000 children who run away each year, 77 percent return home within 1 week. However, 33 percent of children who run away are lured into prostitution within 48 hours of leaving home.

(5) National Incidence Studies of Missing, Abducted, Runaway and Throwaway Children, the definitive study of episodes of missing children, found that of the children who are victims of non-family abduction, runaway or throwaway children, the police are alerted by family or guardians in only 21 percent of the cases. In 79 percent of cases there is no report and no police involvement, and therefore no official attempt to find the child.

(6) In 2007, the Administration of Children and Families, Department of Health and Human Services, reported to the Federal Government 265,000 cases of serious physical, sexual, or psychological abuse of children.

(7) Experts estimate that over 100,000 children in the United States are at risk for prostitution.

(8) Children who have run away from home are at a high risk of becoming involved in sex trafficking. Children who have run away multiple times are at much higher risk of not returning home and of engaging in prostitution.

(9) The vast majority of children involved in sex trafficking have suffered previous sexual or physical abuse, live in poverty, or have no stable home or family life. These children require a comprehensive framework of specialized treatment and mental health counseling that addresses post-traumatic stress, depression, and sexual exploitation.

(10) The average age of entry into prostitution is 12. Seventy-five percent of minors engaged in prostitution have a pimp. A pimp can earn \$200,000 per year prostituting 1 trafficking victim.

(11) Sex trafficking is a complex and varied criminal problem that requires a multi-disciplinary, cooperative solution. Reducing trafficking will require the government to address victims, pimps, and johns; and to provide training specific to sex trafficking for law enforcement officers and prosecutors, and child welfare, public health, and other social service providers. A good model for this type of approach is the Internet Crimes Against Children task force program.

(12) Human trafficking is a criminal enterprise that imposes significant costs on the economy of the United States. Government and non-profit resources used to address trafficking include those of law enforcement, the

judicial and penal systems, and social service providers. Without a range of appropriate treatments to help trafficking victims overcome the trauma they have experienced, victims will continue to be involved in crime, unable to support themselves, and continue to require government resources rather than being productive contributors to the legitimate economy.

(13) Many domestic minor sex trafficking victims are younger than 18 years old and are below the age of consent. Because trafficking victims have been forced to engage in prostitution rather than willfully to committing a crime, these victims should not be charged as criminal defendants. Instead, these victims of trafficking should have access to treatment and services to help them escape and overcome being sexually exploited, and should also be allowed to seek appropriate remuneration from crime victims' compensation funds.

(14) The State of New York has adopted a safe harbor law that establishes a presumption a minor charged with a prostitution offense is a severely trafficked person. This law allows the child to avoid criminal charges of prostitution and instead be considered a "person in need of supervision." The statute also provides support and services to sexually exploited youth who are under the age of 18 years old. These services include safe houses, crisis intervention programs, community-based programs, and law-enforcement training to help officers identify sexually exploited youth.

(15) Sex trafficking is not a problem that occurs only in urban settings. This crime exists also in rural areas and on Indian reservations. Efforts to address sex trafficking should include partnerships with organizations that seek to address the needs of such under-served communities.

SEC. 3. SENSE OF THE SENATE.

It is the sense of the Senate that—

(1) the Attorney General should implement changes to the National Crime Information Center database in order to ensure that—

(A) a child entered into the database will be automatically designated as an endangered juvenile if the child has been reported missing not less than 3 times in a 1 year period;

(B) the database be programmed to cross-reference newly entered reports with historical records already in the database; and

(C) the database be programmed to include a visual cue on the record of a child designated as an endangered juvenile in order to assist law enforcement officers in recognizing the child and providing the child with appropriate care and services; and

(2) funds awarded under subpart 1 of part E of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3750 et seq.) (commonly known as Byrne Grants) should be used to provide programs relating to sex trafficking education, training, deterrence, and prevention.

SEC. 4. SEX TRAFFICKING BLOCK GRANTS.

(a) DEFINITIONS.—In this section—

(1) the term "Assistant Attorney General" means the Assistant Attorney General for the Office of Justice Programs of the Department of Justice;

(2) the term "domestic minor" means an individual who is—

(A) a citizen of the United States or a lawful permanent resident of the United States; and

(B) under the age of 18 years old; and

(3) the term "eligible entity" means a State or unit of local government that—

(A) has significant sex trafficking activity;

(B) has demonstrated cooperation between State and local law enforcement agencies, prosecutors, and social service providers in addressing sex trafficking; and

(C) has developed a workable, multi-disciplinary plan to combat sex trafficking, including—

(i) the establishment of a shelter for sex trafficking victims;

(ii) the provision of comprehensive services to domestic minor victims;

(iii) the provision of specialized training for law enforcement officers and social service providers; and

(iv) deterrence and prosecution of sex trafficking offenses.

(b) GRANTS AUTHORIZED.—

(1) IN GENERAL.—The Assistant Attorney General is authorized to award 6 block grants to eligible entities in different regions of the United States to combat sex trafficking, and not less than 1 of the block grants shall be awarded to an eligible entity with a State population of less than 5,000,000.

(2) GRANT AMOUNT.—Each grant awarded under this section shall be in the amount of \$2,500,000.

(3) DURATION.—

(A) IN GENERAL.—A grant awarded under this section shall be for a period of 1 year.

(B) RENEWAL.—The Secretary may renew a grant under this section for 2 1-year periods.

(c) USE OF FUNDS.—

(1) ALLOCATION.—For each grant awarded under subsection (b)—

(A) not less than 25 percent of the funds shall be used to provide shelter and services to victims of sex trafficking; and

(B) not less than 10 percent of the funds shall be awarded by the eligible entity to a subcontractor with annual revenues of less than \$750,000, to provide services to victims of sex trafficking or training for law enforcement and social service providers.

(2) OTHER ACTIVITIES.—Grants awarded pursuant to subsection (b) may be used for activities such as—

(A) providing shelter to domestic minor trafficking victims, including temporary or long-term placement as appropriate;

(B) providing trafficking victims with clothing and other daily necessities needed to keep the trafficking victims from returning to living on the street;

(C) counseling and legal services for victims of sex trafficking, including substance abuse treatment, trauma-informed care, and sexual abuse or other mental health counseling;

(D) specialized training for law enforcement personnel and social service providers, specific to sex trafficking issues;

(E) funding salaries, in whole or in part, for law enforcement officers, including patrol officers; detectives; and investigators; provided that the percentage of the salary of the law enforcement officer paid for by funds from a grant awarded under subsection (b) shall be no less than the percentage of the time dedicated to working on sex trafficking cases by the law enforcement officer;

(F) funding salaries for State and local prosecutors, including assisting in paying trial expenses for prosecution of sex trafficking law offenders;

(G) investigation expenses, including—

(i) wire taps;

(ii) consultants with expertise specific to sex trafficking cases;

(iii) travel; and

(iv) any other technical assistance expenditures; and

(H) outreach and education programs to provide information about deterrence and

prevention of sex trafficking, including programs to provide treatment to men charged with solicitation of prostitution in cases where—

(i) a treatment program is an appropriate alternative to criminal prosecution; and

(ii) the men were not charged with solicitation of sex with a minor.

(d) APPLICATION.—

(1) IN GENERAL.—Each eligible entity desiring a grant under this Act shall submit an application to the Assistant Attorney General at such time, in such manner, and accompanied by such information as the Assistant Attorney General may reasonably require.

(2) CONTENTS.—Each application submitted pursuant to paragraph (1) shall—

(A) describe the activities for which assistance under this section is sought; and

(B) provide such additional assurances as the Secretary determines to be essential to ensure compliance with the requirements of this Act.

(e) EVALUATION.—The Assistant Attorney General shall, in consultation with the Comptroller General of the United States, enter into a contract with an academic or non-profit organization that has experience in sex trafficking issues and evaluation of grant programs to conduct an annual evaluation of grants made under this section to determine the impact and effectiveness of programs funded with grants awarded under subsection (b).

(f) AUTHORIZATION OF APPROPRIATIONS.—For fiscal years 2011 through 2014, there are authorized to be appropriated, to carry out the provisions of this section, the following sums:

(1) \$45,000,000 to fund grants awarded under subsection (b).

(2) \$1,500,000 to conduct the evaluation under subsection (e).

(3) \$3,500,000 to the Attorney General, to design and implement improvements to the NCIC database.

SEC. 5. REPORTING REQUIREMENTS.

(a) REPORTING REQUIREMENT FOR STATE CHILD WELFARE AGENCIES.—

(1) REQUIREMENT FOR STATE CHILD WELFARE AGENCIES TO REPORT CHILDREN MISSING OR ABDUCTED.—Section 471(a) of the Social Security Act (42 U.S.C. 671(a)) is amended—

(A) in paragraph (32), by striking “and” after the semicolon;

(B) in paragraph (33), by striking the period and inserting “; and”; and

(C) by inserting after paragraph (33) the following:

“(34) provides that the State has in effect procedures that require the State agency to promptly report information on missing or abducted children to the law enforcement authorities for entry into the National Crime Information Center (NCIC) database.”.

(2) REGULATIONS.—The Secretary of Health and Human Services shall promulgate regulations implementing the amendment made by paragraph (1). The regulations promulgated under this subsection shall include provisions to withhold federal funds to any State that fails to substantially comply with the requirement imposed under the amendment made by paragraph (1).

(3) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect on October 1, 2010, without regard to whether final regulations required under paragraph (2) have been promulgated by that date.

(b) ANNUAL STATISTICAL SUMMARY.—Section 3701(c) of the Crime Control Act of 1990 (42 U.S.C. 5779(c)) is amended by inserting “, that includes the total number of reports re-

ceived and the total number of entries made to the National Crime Information Center (NCIC) database” after “of this title”.

(c) STATE REPORTING.—Section 3702 of the Crime Control Act of 1990 (42 U.S.C. 5780) is amended in paragraph (4)—

(1) by striking “(2)” and inserting “(3)”;

(2) in subparagraph (A), by inserting “, and a photograph taken within the previous 180 days” after “dental records”;

(3) in subparagraph (B), by striking the “and” after the semicolon;

(4) by redesignating subparagraph (C) as subparagraph (D); and

(5) by inserting after subparagraph (B) the following:

“(C) notify the National Center for Missing and Exploited Children of each report received relating to a child reported missing from a foster care family home or childcare institution; and”.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 384—HONORING UNITED STATES ARMY SPECIAL OPERATIONS COMMAND ON THEIR 20TH ANNIVERSARY

Mr. BURR (for himself and Mrs. HAGAN) submitted the following resolution; which was referred to the Committee on Armed Services:

S. RES. 384

Whereas since the establishment of United States Army Special Operations Command (USASOC) on December 1, 1989, its personnel have operated in some of the most remote and hostile regions of the world;

Whereas the 7 components of USASOC consist of the John F. Kennedy Special Warfare Center and School, the United States Army Special Forces Command, the 75th Ranger Regiment, the 160th Special Operations Aviation Regiment, the 4th Psychological Operations Group, the 95th Civil Affairs Brigade, and the 528th Sustainment Brigade;

Whereas USASOC provides 70 percent of special operations personnel in Central Command's theater and approximately 63 percent of the total overseas military commitments of the United States;

Whereas in the 8 years since the start of Operation Enduring Freedom and Operation Iraqi Freedom, 245 USASOC soldiers have made the ultimate sacrifice; and

Whereas Master Sergeant Brendan O'Connor, Chief Warrant Officer David Cooper, Colonel Mark Mitchell, Master Sergeant Donald Hollenbaugh, and Master Sergeant Daniel Briggs, all of whom have served this Nation as soldiers assigned to USASOC, received the Distinguished Service Cross for actions in support of the Global War on Terrorism: Now, therefore, be it

Resolved, That the Senate—

(1) commends the United States Army Special Operations Command for more than 20 years of dedicated service to our Nation;

(2) honors the more than 27,000 personnel who serve in the United States Army Special Operations Command; and

(3) pledges its continued support for the men and women of the United States Armed Forces.

SENATE RESOLUTION 385—RECOGNIZING THE GREAT PROGRESS MADE BY THE PEOPLE OF UKRAINE IN THE ESTABLISHMENT OF DEMOCRATIC INSTITUTIONS, AND SUPPORTING A FREE AND TRANSPARENT PRESIDENTIAL ELECTION ON JANUARY 17, 2010

Mr. LUGAR submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 385

Whereas adherence by Ukraine to democratic, transparent, and fair election standards has been necessary for full integration into the community of democracies;

Whereas steps undertaken by Ukraine in recent years, including reform of election laws and regulations, the development of a free and independent press, and the establishment of public institutions that respect human rights and the rule of law, have enhanced Ukraine's progress toward democracy and enhanced prosperity;

Whereas elections in Ukraine in 2004, 2006, and 2007 were determined by the Organization for Security and Cooperation in Europe (OSCE) to have been consistent with international election standards;

Whereas the United States has closely supported the people of Ukraine in their bold efforts to pursue a free and democratic future following the declaration of their independence in 1991;

Whereas the NATO Freedom Consolidation Act of 2007 (Public Law 110-17; 22 U.S.C. 1928 note), signed into law by President George W. Bush on April 9, 2007, recognized the progress made by Ukraine toward meeting the responsibilities and obligations for membership in the North Atlantic Treaty Organization (NATO) and designated Ukraine as eligible to receive assistance under the NATO Participation Act of 1994 (title II of Public Law 103-447; 22 U.S.C. 1928 note);

Whereas Ukraine has made steps toward integration within European institutions through a joint European Union-Ukraine Action Plan, as part of the European Neighbourhood Policy; and

Whereas the United States-Ukraine Strategic Partnership Commission was inaugurated by Secretary of State Hillary Clinton and Ukrainian Foreign Minister Petro Poroshenko on December 9, 2009: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the great progress made by the people of Ukraine in establishing democratic institutions and carrying out peaceful election processes in 2004, 2006, and 2007;

(2) supports a free and transparent election process in the presidential election in Ukraine on January 17, 2010, that comports with the international election standards of the Organization for Security and Cooperation in Europe;

(3) encourages all parties to respect the independence and territorial integrity of Ukraine, as well as the full integration of Ukraine into the international community of democracies; and

(4) pledges support for the creation of a prosperous free market economy and the strengthening of a free and open democratic system in Ukraine.

**SENATE RESOLUTION 386—CON-
DEMNING THE GOVERNMENT OF
IRAN FOR RESTRICTING AND
SUPPRESSING FREEDOM OF THE
PRESS, FREEDOM OF SPEECH,
FREEDOM OF EXPRESSION, AND
FREEDOM OF ASSEMBLY, AND
FOR ITS HUMAN RIGHTS
ABUSES, AND FOR OTHER PUR-
POSES**

Mr. KAUFMAN (for himself, Mr. LIEBERMAN, Mr. MCCAIN, Mr. DODD, Mr. KYL, Mr. CASEY, Mr. GRAHAM, Mr. LEVIN, Mr. BROWBACK, and Mr. HATCH) submitted the following resolution; which was considered and agreed to:

S. RES. 386

Whereas hundreds of thousands of Iranian citizens have engaged in peaceful protest since the June 12, 2009, presidential election in Iran;

Whereas the Government of Iran has responded to these protests with a concerted campaign of intimidation, repression, and violence, including human rights abuses against Iranian citizens;

Whereas there have been numerous allegations of torture, rape, imprisonment, and violence perpetrated against Iranian citizens by the Government of Iran since the June 12 elections;

Whereas the Government of Iran has sought to restrict and suppress the legitimate right of the people of Iran to exercise freedom of speech, freedom of expression, freedom of assembly, and freedom of the press;

Whereas the Government of Iran has monitored, controlled, and censored access to the Internet, and has conducted a campaign of harassment and intimidation through the electronic media;

Whereas Freedom House assesses Internet and digital media in Iran as "Not Free," and characterizes the Government of Iran as wielding "one of the world's most sophisticated apparatuses for controlling the internet and other digital technologies";

Whereas the Government of Iran is engaged in a range of activities that interfere with, or infringe upon, the right of the people of Iran to access accurate, independent news and information;

Whereas, according to Amnesty International, the Government of Iran has banned several newspapers, including Farhang-e Ashti, Arman-e Ravabet-e Omomi, Tahlil-e Rooz, and Sarmayeh;

Whereas the Government of Iran has harassed, arrested, detained, imprisoned, and assaulted numerous Iranian and foreign journalists, publishers, editors, photographers, cameramen, and bloggers;

Whereas the Government of Iran has prohibited Iranian and non-Iranian news services from distributing reports in Farsi;

Whereas the Government of Iran has revoked and temporarily suspended the accreditation of foreign journalists to report on current events and news developments in Iran;

Whereas the Government of Iran has interrupted short message service (SMS), preventing text message communications and blocking Internet sites that utilize such services;

Whereas the Government of Iran has partially jammed shortwave and medium wave transmissions of Radio Farda, the Persian language service of Radio Free Europe/Radio Liberty;

Whereas the Government of Iran has intermittently jammed satellite broadcasts by Radio Farda, the Voice of America's Persian News Network (PNN), the British Broadcasting Corporation (BBC), and other non-Iranian government news services;

Whereas the Government of Iran has blocked Web sites and blogs, including social networking, content-sharing, and blogging sites, such as Facebook, Twitter, YouTube, Orkut, Blogger, and Persianblog;

Whereas the Government of Iran has targeted, blocked, and limited Internet connections and mobile network access to thwart communication in advance of planned demonstrations, and has seized mobile phones that were used to film or document the demonstrations;

Whereas the Government of Iran has monitored online activities of Iranians and threatened them and their families with punitive action, including citizens of Iran and Iranian-Americans living in the United States and elsewhere overseas;

Whereas, in November 2009, the police forces of the Government of Iran formed a special unit to monitor websites and "Internet crimes," including political offenses;

Whereas the Victims of Iranian Censorship Act (subtitle D of title XII of Public Law 111-84), which was signed into law on October 28, 2009, stipulates that "it shall be the policy of the United States to encourage the development of technologies, including Internet Web sites, that facilitate the efforts of the Iranian people to gain access to and share accurate information and exercise freedom of speech, freedom of expressions, freedom of assembly, and freedom of the press, through the Internet or other electronic media";

Whereas on December 10, 2009, President Barack Obama affirmed in his statement accepting the Nobel Peace Prize, "We will bear witness to the quiet dignity of reformers... to the hundreds of thousands who have marched silently through the streets of Iran. It is telling that the leaders of these governments fear the aspirations of their own people more than the power of any other nation. And it is the responsibility of all free people and free nations to make clear to these movements that hope and history are on their side."

Whereas, on December 18, 2009, the United Nations General Assembly passed a resolution calling on the Government of Iran to respect its human rights obligations, including its obligations under its own constitution as well as those of international human rights law; and

Whereas, on December 18, 2009, the Department of State issued a statement welcoming the passage of the United Nations resolution which stated, "The resolution, first adopted last month by the UN Third Committee, expresses deep concern over the brutal response of Iranian authorities to peaceful demonstrations in the wake of the June 12 election... Those in Iran who are trying to exercise their universal rights should know that their voices are being heard." Now, therefore, be it

Resolved, That the Senate—

(1) supports the right of the people of Iran to peacefully express their voices, opinions, and aspirations, despite intimidation, repression, and violence;

(2) condemns the human rights abuses committed by the Government of Iran against Iranian citizens;

(3) condemns the efforts of the Government of Iran to restrict and suppress freedom of the press, freedom of speech, freedom of expression, and freedom of assembly;

(4) condemns online censorship, monitoring, intimidation, and harassment con-

ducted by the Government of Iran, including threats against citizens of Iran and Iranian-Americans living in the United States;

(5) condemns an atmosphere of impunity in Iran for those who employ censorship, intimidation, harassment, or violence to restrict and suppress freedom of speech, freedom of expression, freedom of assembly, and freedom of the press;

(6) condemns the Government of Iran for violating the International Covenant on Civil and Political Rights, done at New York December 16, 1966, and entered into force March 23, 1976, which has been ratified by Iran and states, "Everyone shall have the right to freedom of expression; this right shall include freedom to seek, receive and impart information and ideas of all kinds, regardless of frontiers, either orally, in writing or in print, in the form of art, or through any other media of his choice.";

(7) welcomes the decision made by the Department of State on December 15, 2009, to foster and support the free flow of information to Iranian citizens by recommending that the Department of the Treasury's Office of Foreign Assets Control (OFAC) issue a general license that would authorize downloads of free mass market software to Iran necessary for the exchange of personal communications or sharing of information or both over the Internet as deemed "essential to the national interest of the United States"; and

(8) urges the implementation of the Victims of Iranian Censorship Act (subtitle D of title XII of Public Law 111-84).

**AMENDMENTS SUBMITTED AND
PROPOSED**

SA 3294. Mr. HATCH submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table.

SA 3295. Mr. HATCH submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3296. Mr. HATCH submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3297. Mr. DEMINT submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 3294. Mr. HATCH submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other

purposes; which was ordered to lie on the table; as follows:

At the appropriate place in title I, insert the following:

SEC. ____ . ENSURING THE AFFORDABILITY OF COVERAGE.

Notwithstanding any other provision of this Act, this Act (and the amendment made by this Act) shall not take effect until the date on which the Secretary of Health and Human Services certifies to Congress that the implementation of this Act (and amendments) will not result in a greater increase in health insurance premiums than the increase that is otherwise projected under current law for more than 1,000,000 Americans.

SA 3295. Mr. HATCH submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. ____ . CIVIL ACTIONS BROUGHT ON CONSTITUTIONAL GROUNDS.

(a) SPECIAL RULES FOR ACTIONS BROUGHT ON CONSTITUTIONAL GROUNDS.—If any action is brought for declaratory or injunctive relief to challenge the constitutionality of any provision of this Act or any amendment made by this Act, the following rules shall apply:

(1) The action shall be filed in any United States District Court and shall be heard by a 3-judge court convened pursuant to section 2284 of title 28, United States Code.

(2) A copy of the complaint shall be delivered promptly to the Secretary of the Senate and the Clerk of the House of Representatives.

(3) A final decision in the action shall be reviewable only by appeal directly to the Supreme Court of the United States. Such appeal shall be taken by the filing of a notice of appeal within 10 days, and the filing of a jurisdictional statement within 30 days, of the entry of the final decision.

(4) It shall be the duty of the United States District Court in which the action is brought and the Supreme Court of the United States to advance on the docket and to expedite to the greatest possible extent the disposition of the action and appeal.

(b) APPLICABILITY.—

(1) INITIAL CLAIMS.—With respect to any action initially filed on or before July 31, 2010, the provisions of subsection (a) shall apply with respect to each action described in such section.

(2) SUBSEQUENT ACTIONS.—With respect to any action initially filed after July 31, 2010, the provisions of subsection (a) shall not apply to any action described in such section unless the person filing such action elects such provisions to apply to the action.

SA 3296. Mr. HATCH submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time

homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place in title I, insert the following:

SEC. ____ . PROHIBITION ON UNFUNDED MANDATES.

Notwithstanding any other provision of this title (or an amendment made by this title), no State or locality shall be required to comply with a requirement of this title (or amendment) prior to the date on which funds are appropriated at the full authorized level as provided for in this Act (or an amendment made by this Act).

SA 3297. Mr. DEMINT submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. ____ . POINT OF ORDER.

(a) IN GENERAL.—It shall not be in order in the Senate to consider a congressionally directed spending item, a limited tax benefit, or a limited tariff benefit, if a Senator, Member, Delegate, or Resident Commissioner has conditioned the inclusion of language to provide funding for a congressional directed spending item, a limited tax benefit, or a limited tariff benefit in any amendment, bill, or joint resolution (or an accompanying report) or in any conference report on a bill or joint resolution (including an accompanying joint explanatory statement of managers) on any vote cast by any Senator, Member, Delegate, or Resident Commissioner.

(b) WAIVER.—The provisions of this section be waived or suspended only by the affirmative vote of two-thirds of the Members, present and voting.

(c) APPEALS.—Appeals from the decisions of the Chair relating to any provision of this section shall be limited to 1 hour, to be equally divided between, and controlled by, the appellant and the manager of the measure. An affirmative vote of two-thirds of the Members of the Senate, present and voting, shall be required to sustain an appeal of the ruling of the Chair on a point of order raised under this section.

NOTICE OF INTENT TO SUSPEND THE RULES

Mr. DEMINT. Mr. President, I submit the following notice in writing: In accordance with Rule V of the Standing Rules of the Senate, I hereby give notice in writing that it is my intention to move to suspend Rule XXII, Paragraph 2, for the purpose of proposing and considering the following amendment, including germaneness requirements:

At the appropriate place, insert the following:

SEC. ____ . POINT OF ORDER.

(a) IN GENERAL.—It shall not be in order in the Senate to consider a congressionally directed spending item, a limited tax benefit, or a limited tariff benefit, if a Senator, Member, Delegate, or Resident Commissioner has conditioned the inclusion of language to provide funding for a congressional directed spending item, a limited tax benefit, or a limited tariff benefit in any amendment, bill, or joint resolution (or an accompanying report) or in any conference report on a bill or joint resolution (including an accompanying joint explanatory statement of managers) on any vote cast by any Senator, Member, Delegate, or Resident Commissioner.

(b) WAIVER.—The provisions of this section be waived or suspended only by the affirmative vote of two-thirds of the Members, present and voting.

(c) APPEALS.—Appeals from the decisions of the Chair relating to any provision of this section shall be limited to 1 hour, to be equally divided between, and controlled by, the appellant and the manager of the measure. An affirmative vote of two-thirds of the Members of the Senate, present and voting, shall be required to sustain an appeal of the ruling of the Chair on a point of order raised under this section.

EXTENDING GENERALIZED SYSTEM OF PREFERENCES AND THE ANDEAN PREFERENCE ACT

Mr. DODD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 4284, received from the House and at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the bill by title. The bill clerk read as follows:

A bill (H.R. 4284) to extend the Generalized System of Preferences and the Andean Trade Preference Act, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. DODD. Mr. President, I ask unanimous consent that the bill be read the third time, passed, the motion to reconsider be laid upon the table, and that any statements on the bill be printed in the RECORD, with no intervening action.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 4284) was ordered to a third reading, read the third time, and passed.

COMMENDING THE SOLDIERS AND CIVILIAN PERSONNEL AT FORT GORDON

Mr. DODD. Mr. President, I ask unanimous consent that the Committee on Armed Services be discharged from further consideration and the Senate now proceed to H. Con. Res. 206.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The bill clerk read as follows:

A concurrent resolution (H. Con. Res. 206) commending the soldiers and civilian personnel stationed at Fort Gordon and their

families for their service and dedication to the United States and recognizing the contributions of Fort Gordon to Operation Iraqi Freedom and Operation Enduring Freedom and its role as a pivotal communications training installation.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. DODD. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution was agreed to.

The preamble was agreed to.

CONDEMNING THE GOVERNMENT OF IRAN

Mr. DODD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 386, submitted earlier today.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The clerk will report.

The bill clerk read as follows:

A resolution (S. Res. 386) condemning the Government of Iran for restricting and suppressing freedom of the press, freedom of speech, freedom of expression, and freedom of assembly, and for its human rights abuses, and for other purposes.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DODD. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and that any statements related to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 386) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 386

Whereas hundreds of thousands of Iranian citizens have engaged in peaceful protest since the June 12, 2009, presidential election in Iran;

Whereas the Government of Iran has responded to these protests with a concerted campaign of intimidation, repression, and violence, including human rights abuses against Iranian citizens;

Whereas there have been numerous allegations of torture, rape, imprisonment, and violence perpetrated against Iranian citizens by the Government of Iran since the June 12 elections;

Whereas the Government of Iran has sought to restrict and suppress the legitimate right of the people of Iran to exercise freedom of speech, freedom of expression, freedom of assembly, and freedom of the press;

Whereas the Government of Iran has monitored, controlled, and censored access to the

Internet, and has conducted a campaign of harassment and intimidation through the electronic media;

Whereas Freedom House assesses Internet and digital media in Iran as "Not Free," and characterizes the Government of Iran as wielding "one of the world's most sophisticated apparatuses for controlling the internet and other digital technologies";

Whereas the Government of Iran is engaged in a range of activities that interfere with, or infringe upon, the right of the people of Iran to access accurate, independent news and information;

Whereas, according to Amnesty International, the Government of Iran has banned several newspapers, including Farhang-e Ashti, Arman-e Ravabet-e Omomi, Tahlil-e Rooz, and Sarmayeh;

Whereas the Government of Iran has harassed, arrested, detained, imprisoned, and assaulted numerous Iranian and foreign journalists, publishers, editors, photographers, cameramen, and bloggers;

Whereas the Government of Iran has prohibited Iranian and non-Iranian news services from distributing reports in Farsi;

Whereas the Government of Iran has revoked and temporarily suspended the accreditation of foreign journalists to report on current events and news developments in Iran;

Whereas the Government of Iran has interrupted short message service (SMS), preventing text message communications and blocking Internet sites that utilize such services;

Whereas the Government of Iran has partially jammed shortwave and medium wave transmissions of Radio Farda, the Persian language service of Radio Free Europe/Radio Liberty;

Whereas the Government of Iran has intermittently jammed satellite broadcasts by Radio Farda, the Voice of America's Persian News Network (PNN), the British Broadcasting Corporation (BBC), and other non-Iranian government news services;

Whereas the Government of Iran has blocked Web sites and blogs, including social networking, content-sharing, and blogging sites, such as Facebook, Twitter, YouTube, Orkut, Blogger, and Persianblog;

Whereas the Government of Iran has targeted, blocked, and limited Internet connections and mobile network access to thwart communication in advance of planned demonstrations, and has seized mobile phones that were used to film or document the demonstrations;

Whereas the Government of Iran has monitored online activities of Iranians and threatened them and their families with punitive action, including citizens of Iran and Iranian-Americans living in the United States and elsewhere overseas;

Whereas, in November 2009, the police forces of the Government of Iran formed a special unit to monitor websites and "Internet crimes," including political offenses;

Whereas the Victims of Iranian Censorship Act (subtitle D of title XII of Public Law 111-84), which was signed into law on October 28, 2009, stipulates that "it shall be the policy of the United States to encourage the development of technologies, including Internet Web sites, that facilitate the efforts of the Iranian people to gain access to and share accurate information and exercise freedom of speech, freedom of expressions, freedom of assembly, and freedom of the press, through the Internet or other electronic media";

Whereas on December 10, 2009, President Barack Obama affirmed in his statement ac-

cepting the Nobel Peace Prize, "We will bear witness to the quiet dignity of reformers...to the hundreds of thousands who have marched silently through the streets of Iran. It is telling that the leaders of these governments fear the aspirations of their own people more than the power of any other nation. And it is the responsibility of all free people and free nations to make clear to these movements that hope and history are on their side."

Whereas, on December 18, 2009, the United Nations General Assembly passed a resolution calling on the Government of Iran to respect its human rights obligations, including its obligations under its own constitution as well as those of international human rights law; and

Whereas, on December 18, 2009, the Department of State issued a statement welcoming the passage of the United Nations resolution which stated, "The resolution, first adopted last month by the UN Third Committee, expresses deep concern over the brutal response of Iranian authorities to peaceful demonstrations in the wake of the June 12 election...Those in Iran who are trying to exercise their universal rights should know that their voices are being heard." Now, therefore, be it

Resolved, That the Senate—

(1) supports the right of the people of Iran to peacefully express their voices, opinions, and aspirations, despite intimidation, repression, and violence;

(2) condemns the human rights abuses committed by the Government of Iran against Iranian citizens;

(3) condemns the efforts of the Government of Iran to restrict and suppress freedom of the press, freedom of speech, freedom of expression, and freedom of assembly;

(4) condemns online censorship, monitoring, intimidation, and harassment conducted by the Government of Iran, including threats against citizens of Iran and Iranian-Americans living in the United States;

(5) condemns an atmosphere of impunity in Iran for those who employ censorship, intimidation, harassment, or violence to restrict and suppress freedom of speech, freedom of expression, freedom of assembly, and freedom of the press;

(6) condemns the Government of Iran for violating the International Covenant on Civil and Political Rights, done at New York December 16, 1966, and entered into force March 23, 1976, which has been ratified by Iran and states, "Everyone shall have the right to freedom of expression; this right shall include freedom to seek, receive and impart information and ideas of all kinds, regardless of frontiers, either orally, in writing or in print, in the form of art, or through any other media of his choice.";

(7) welcomes the decision made by the Department of State on December 15, 2009, to foster and support the free flow of information to Iranian citizens by recommending that the Department of the Treasury's Office of Foreign Assets Control (OFAC) issue a general license that would authorize downloads of free mass market software to Iran necessary for the exchange of personal communications or sharing of information or both over the Internet as deemed "essential to the national interest of the United States"; and

(8) urges the implementation of the Victims of Iranian Censorship Act (subtitle D of title XII of Public Law 111-84).

APPOINTMENTS

The PRESIDING OFFICER. The Chair, on behalf of the President pro tempore, pursuant to 22 U.S.C. 276n, as amended, appoints the following Senator as a delegate of the U.S.-China Interparliamentary Group conference during the 111th Congress: The Honorable MICHAEL ENZI of Wyoming.

The Chair, on behalf of the President pro tempore, pursuant to 22 U.S.C. 276n, as amended, appoints the following Senator as a delegate of the U.S.-China Interparliamentary Group conference during the 111th Congress: the Honorable ROLAND BURRIS of Illinois.

Mr. DODD. Mr. President, I yield the floor.

ADJOURNMENT UNTIL 9:45 A.M.
TOMORROW

The PRESIDING OFFICER. Under the previous order, the Senate stands adjourned until 9:45 a.m. tomorrow.

There being no objection, the Senate, at 7:06 p.m., adjourned until Wednesday, December 23, 2009, at 9:45 a.m.

NOMINATIONS

Executive nominations received by the Senate:

THE JUDICIARY

J. MICHELLE CHILDS, OF SOUTH CAROLINA, TO BE UNITED STATES DISTRICT JUDGE FOR THE DISTRICT OF SOUTH CAROLINA, VICE GEORGE ROSS ANDERSON, JR., RETIRED.

RICHARD MARK GERGEL, OF SOUTH CAROLINA, TO BE UNITED STATES DISTRICT JUDGE FOR THE DISTRICT OF

SOUTH CAROLINA, VICE HENRY M. HERLONG, JR., RETIRED.

DEPARTMENT OF JUSTICE

WILLIAM N. NETTLES, OF SOUTH CAROLINA, TO BE UNITED STATES ATTORNEY FOR THE DISTRICT OF SOUTH CAROLINA FOR THE TERM OF FOUR YEARS, VICE WILLIAM WALTER WILKINS, III.

KELVIN CORNELIUS WASHINGTON, OF SOUTH CAROLINA, TO BE UNITED STATES MARSHAL FOR THE DISTRICT OF SOUTH CAROLINA FOR THE TERM OF FOUR YEARS, VICE JOHNNY MACK BROWN.

IN THE COAST GUARD

THE FOLLOWING NAMED INDIVIDUAL FOR APPOINTMENT AS COMMANDANT OF THE UNITED STATES COAST GUARD AND TO THE GRADE INDICATED UNDER TITLE 14, U.S.C., SECTION 44:

To be admiral

VICE ADM. ROBERT J. PAPP, JR.

HOUSE OF REPRESENTATIVES—Wednesday, December 23, 2009

The House met at noon and was called to order by the Speaker pro tempore (Mr. MORAN of Virginia).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
December 23, 2009.

I hereby appoint the Honorable JAMES P. MORAN to act as Speaker pro tempore on this day.

NANCY PELOSI,
Speaker of the House of Representatives.

PRAYER

The Reverend Gene Hemrick, Washington Theological Union, Washington, D.C., offered the following prayer:

In the Old Testament, the Canticle of the prophet Daniel rings with the exaltation of God's Mother Nature:

Cold and Chill bless the Lord
Ice and Snow bless the Lord
Nights and Days bless the Lord
Light and Darkness bless the Lord
Lightning and Clouds bless the Lord

O Lord, the recent snowstorm in our Nation's capital reminds us of this canticle and of the wise means You employ in maintaining the order and rhythms of nature with which You bless this world.

Bless this Congress with the heavenly wisdom that is needed to be prudent stewards of Your ecological systems. Endow it with Your divine counsel and understanding as it seeks the most efficient and effective means for preserving their God-given order and balance. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. The Chair will lead the House in the Pledge of Allegiance.

The SPEAKER pro tempore led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

COMMUNICATION FROM THE HON. JOHN B. LARSON, CHAIRMAN, DEMOCRATIC CAUCUS

The SPEAKER pro tempore laid before the House the following communication from the Honorable JOHN B. LARSON, Chairman, Democratic Caucus:

DEMOCRATIC CAUCUS,
HOUSE OF REPRESENTATIVES,
Washington, DC, December 23, 2009.

Hon. NANCY PELOSI,
Speaker of the House, U.S. Capitol, Washington DC.

DEAR MADAM SPEAKER: This is to notify you that the Honorable Parker Griffith of Alabama has resigned as a Member of the Democratic Caucus.
Sincerely,

JOHN B. LARSON,
Chairman.

COMMUNICATION FROM THE SPEAKER

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

HOUSE OF REPRESENTATIVES,
December 23, 2009.

Hon. JAMES L. OBERSTAR,
Chairman, Committee on Transportation and Infrastructure, Rayburn House Office Building, Washington, DC.

DEAR MR. CHAIR: This is to advise you that Representative Parker Griffith's election to the Committee on Transportation and Infrastructure has been automatically vacated pursuant to clause 5(b) of rule X effective today.

Best regards,

NANCY PELOSI,
Speaker of the House.

COMMUNICATION FROM THE SPEAKER

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

HOUSE OF REPRESENTATIVES,
December 23, 2009.

Hon. NYDIA M. VELÁZQUEZ,
Chairman, Committee on Small Business, Rayburn House Office Building, Washington, DC.

DEAR MADAM CHAIR: This is to advise you that Representative Parker Griffith's election to the Committee on Small Business has been automatically vacated pursuant to clause 5(b) of rule X effective today.

NANCY PELOSI,
Speaker of the House.

COMMUNICATION FROM THE SPEAKER

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

HOUSE OF REPRESENTATIVES,
December 23, 2009.

Hon. BART GORDON,
Chairman, Committee on Science and Technology, Rayburn House Office Building, Washington, DC.

DEAR MR. CHAIR: This is to advise you that Representative Parker Griffith's election to the Committee on Science and Technology has been automatically vacated pursuant to clause 5(b) of rule X effective today.

Best regards,

NANCY PELOSI,
Speaker of the House.

ADJOURNMENT

The SPEAKER pro tempore. Pursuant to section 11(b) of House Resolution 976, the House shall stand adjourned until 10 a.m. on Saturday, December 26, 2009, unless the conditions specified in section 11(c) of that resolution have been met, in which case the House shall stand adjourned sine die pursuant to House Concurrent Resolution 223.

Accordingly (at 12 o'clock and 4 minutes p.m.), the House adjourned.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5189. A letter from the Assistant to the Board, Board of Governors of the Federal Reserve System, transmitting the System's final rule — Truth in Lending [Regulation Z; Docket No. R1378] received December 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

5190. A letter from the Chief Counsel, Department of Homeland Security, transmitting the Department's final rule — Final Flood Elevation Determinations [Docket ID: FEMA-2008-0020] received December 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

5191. A letter from the Chief Counsel, Department of Homeland Security, transmitting the Department's final rule — Changes in Flood Elevation Determinations [Docket ID: FEMA-2008-0020; Internal Agency Docket No. FEMA-B-1063] received December 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

5192. A letter from the Chief Counsel, Department of Homeland Security, transmitting the Department's final rule — Final Flood Elevation Determinations [Docket ID: FEMA-2008-0020] received December 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

5193. A letter from the Chief Counsel, Department of Homeland Security, transmitting the Department's final rule — Final Flood Elevation Determinations [Docket ID: FEMA-2008-0020] received December 1, 2009,

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

5194. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Closure of the 2009 Commercial Harvest of Gulf of Mexico Greater Amberjack [Docket No.: 040205043-4043-01] (RIN: 0648-XP56) received December 8, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

5195. A letter from the Deputy Assistant Administrator For Regulatory Programs, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Pacific Halibut Fish-

eries; Subsistence Fishing [Docket No.: 0812191631-91238-03] (RIN: 0648-AX53) received December 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

5196. A letter from the Acting Assistant Administrator for Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Central Gulf of Alaska Rockfish Program; Amendment 85 [Docket No.: 0811201490-91372-03] (RIN: 0648-AX42) received December 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

5197. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administra-

tion, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Reallocation of Pacific cod in the Bering Sea and Aleutian Islands Management Area [Docket No. 0801041351-9087-02] (RIN: 0648-XS69) received December 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

5198. A letter from the Deputy Assistant Administrator For Regulatory Programs, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the United States Exclusive Economic Zone Off Alaska; Fisheries of the Arctic Management Area; Bering Sea Subarea [Docket No.: 090218204-91211-04] (RIN: 0648-AX71) received December 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

SENATE—Wednesday, December 23, 2009

The Senate met at 9:45 a.m. and was called to order by the Honorable TOM UDALL, a Senator from the State of New Mexico.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Eternal God, the source of peace on Earth, good will toward humanity, we feel delight because You are sovereign, causing all things to work together for good to those who love You, who are called according to Your purpose.

Help our lawmakers to see that each difficulty is an opportunity to see You work and that in Your time You will bring them to a place of abundance. May they face waiting tasks and challenges with Your gifts of understanding, kindness, civility, and self-control. Lord, astound them with new insight and fresh vision they could not conceive without Your blessings. Give them the faith to believe that if they listen to You, You will give them answers they cannot find by themselves.

We pray in Your powerful Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable TOM UDALL led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, December 23, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable TOM UDALL, a Senator from the State of New Mexico, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. UDALL of New Mexico thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Mr. President, following leader remarks, the Senate will resume consideration of the health reform legislation. The time until 10 a.m. is equally divided between the two leaders or their designees. From 9 a.m. until 2 p.m. today, there will be 1-hour alternating blocks of time, with the majority controlling the first hour. The time between 2 p.m. and 2:13 p.m. will be equally divided and controlled between the two leaders, with the majority leader controlling the final half. The Senate will then proceed to a series of five or six rollcall votes in relation to the health care bill.

I note the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. REID. Mr. President, I note the absence of a quorum. No one is here.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SESSIONS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

SERVICE MEMBERS HOME OWNERSHIP TAX ACT OF 2009

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of H.R. 3590, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3590) to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

Pending:

Reid amendment No. 2786, in the nature of a substitute.

REID (for CARDIN) amendment No. 2878 (to amendment No. 2786), to provide for the establishment of Offices of Minority Health.

Reid amendment No. 3292 (to amendment No. 2878), to change the effective date.

The ACTING PRESIDENT pro tempore. Under the previous order, the time until 10 a.m. will be equally divided between the two leaders.

The Senator from Alabama is recognized.

Mr. SESSIONS. Mr. President, I just received this morning—and I am sure it is on the CBO Web site, the Congressional Budget Office Web site—an analysis of the health care bill we are considering today. That analysis is crystal-clear and confirms what CMS has told us; that is, the proponents of the legislation before us have been double-counting—double-counting—the savings from Medicare, and as a result, it cannot be said that this bill is going to create a surplus in the Treasury but, in fact, will put us in a deficit.

I think every Member of this body needs to read this communication before they cast their vote. I know a lot of Members of the Senate who voted for the bill did so under the belief that it would be deficit neutral. They have said so publicly. The President has repeatedly stated—and he did to the Joint Session of Congress—that not one dime will be added to the national debt, and that is not so.

I will reveal what we were told by CBO this morning in their report. This is what the CBO said to us, and it is very simple. It is actually stunning that we have been confused about this issue when we are talking about hundreds of billions of dollars. It is absolutely an amazing event that the U.S. Congress can't get its act together when we are talking about hundreds of billions of dollars.

They say this:

The key point is that the savings to the HI trust fund—

Talking about Medicare—
under the PPACA—

That is the health care bill we are considering—

would be received by the government only once, so they cannot be set aside to pay for future Medicare spending and, at the same time, pay for current spending on other parts of the legislation or on other programs.

That is exactly what this bill proposes to do.

Just 2 days ago at this press conference, the President said:

Medicare will be stronger and its solvency extended by nearly a decade.

Then he goes on to say this:

The Congressional Budget Office now reports that this bill will reduce our deficit by \$132 billion over the first decade.

That is counting the money twice. It cannot be done. That is wrong, and it must not be allowed to occur.

Senator GREGG, the former chairman of the Budget Committee and ranking Republican on that committee, proposed an amendment that said any savings in Medicare stay in Medicare, and our colleague who voted it down—Senator HARKIN said: You have to vote it down—to our colleagues in his speech on the floor—you have to vote it down because it will kill the bill. Why would it kill the bill? Because they are planning to use the money both ways, and it cannot be done and ought not to be done.

This is very much consistent, entirely consistent with the communication from the Chief Actuary, Richard S. Foster, of the Center for Medicare and Medicaid Services. Mr. Foster laid it out. We should have seen this back on December 10. It is really what piqued my interest in this whole matter because I was wondering how this could be done. It didn't make sense to me. And I read his letter, and he says this:

The combination of lower Part A costs—

And that is Part A of Medicare, the hospital part—

and higher tax revenues results in a lower Federal deficit based on budget accounting rules.

He goes on to say:

However, trust fund accounting considers the same lower expenditures and additional revenues as extending the exhaustion date of the Part A trust fund.

They are running out of money, and if you cut the cost to Part A, you would extend, according to the trust fund accounting, the lifetime of the trust fund before it goes broke.

He adds:

In practice, the improved Part A financing cannot be simultaneously used to finance other Federal outlays.

Then he put in parentheses:

such as the covered expansions under the PPACA—

Which is the health care bill—

and to extend the trust fund, despite the appearance of this result from the respective accounting conventions.

So there are two different accountings. The one from CMS says one thing. The one from CBO, which is a unified accounting, a different process of accounting for Federal expenditures—both say good things. But both can't be accurate. Both Members say, CBO says you can't count it twice, and CMS also says that.

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

Mr. SESSIONS. I thank the Chair and urge my colleagues to access this information on the CBO Web site and mine if they would like.

The ACTING PRESIDENT pro tempore. Under the previous order, the time until 2 p.m. will be controlled in alternating 1-hour blocks of time, with the majority controlling the first hour.

The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, it has been nearly 5 weeks since the majority leader moved to proceed to the health care reform bill before us today. And it has been more than 2 months since the Finance Committee reported its bill, a great deal of which is reflected in the bill before us today.

It has been 3 months since the Finance Committee publicly posted the 564 amendments that Senators filed for consideration in the committee.

It has been 7 months since the Finance Committee convened three bipartisan roundtable discussions on each of the three major areas of reform: delivery system reform, insurance coverage, and options for financing reform.

It has been 7 months since the Finance Committee issued three bipartisan policy papers detailing the options from which the committee chose to craft its bill.

It has been 18 months since the Finance Committee convened a bipartisan, day-long health care summit at the Library of Congress.

It has been 19 months since the Finance Committee began holding open hearings to prepare for the bill before us today.

It has been more than 15 long years since the last time that the Senate took on this fight to enact comprehensive health care reform.

It has been 38 years since our late Colleague, Ted Kennedy, proposed a plan to extend health insurance coverage to all.

It has been 44 years since Congress created Medicare, providing health care for America's seniors, and Medicaid, providing health care for the poorest among us.

It has been 64 years since President Harry Truman asked the Congress to enact a national insurance program "to assure the right to adequate medical care and protection from the economic fears of sickness."

It has been 97 years since President Theodore Roosevelt ran on a platform that called for "the protection of home life against the hazards of sickness . . . through the adoption of a system of social insurance adapted to American use."

And it is now only hours until this Senate will pass meaningful health care reform.

It will not be long now until the law will prohibit insurance companies from cancelling insurance policies when people get sick.

It will not be long now until people with preexisting conditions will have access to health care.

It will not be long now until the law will prohibit insurance companies from imposing lifetime or annual limits on benefits.

It will not be long now until parents will be able to include their children up to age 26 on their insurance policies.

It will not be long now until the law will require insurance companies to report on the share of premium dollars that goes to pay medical care, and the share that doesn't.

It will not be long now until consumers will be able to shop for quality insurance in new Internet Web sites, where insurance companies will compete for their business.

It will not be too long now until millions of uninsured Americans will be able to buy insurance on new exchanges with tax credits to help make it affordable.

It will not be too long now until the law will prohibit insurance companies from discriminating against women in setting premiums.

It will not be too long now until the law will limit insurance companies in how much more they can charge when people get older.

It will not be too long now until more than 30 million Americans who otherwise would not have health care coverage will finally get that peace of mind.

It will not be too long now until more than 30 million Americans will have a better chance to live longer, healthier, less pain-ridden lives.

It will not be too long now until more than 30 million Americans will be able to share their family Christmas free of the fears of medical bankruptcy.

Mr. President, it will not be long now. It has been a long time coming.

I thank God that I have lived to see this day. I thank God for sustaining us and for enabling us to reach this time. Let us now, at long last, pass this historic legislation.

Mr. President, I yield 20 minutes to the Senator from Maryland.

The ACTING PRESIDENT pro tempore. The Senator from Maryland is recognized.

Mr. CARDIN. Mr. President, first, it will not be long now until we achieve universal health care coverage affordable care for all Americans. I thank Senator BAUCUS for making this moment possible. I know how hard he has worked for so many weeks, so many months, so that we could bring very different views together but all focused on the goal of achieving affordable health care for every American.

Senator BAUCUS never lost sight of that goal. As a result, we are now just hours away from the last procedural hurdle until we will have a chance in the Senate to vote on a bill that for the 23 years I have been in Congress I have told the people of the Third Congressional District and the people of Maryland that I am going to fight to change our health care system so that every American has access to affordable, quality health care.

We are going to take a giant step forward to reaching that goal in the legislation we have before us today. Through the Chair, I thank Senator

BAUCUS very much for his extraordinary patience and leadership to bring us to this moment.

Mr. President, there is a lot of discussion on both sides as to what the facts of the bill are. I am going to use the CBO because that is what we agreed to. That is the objective scorekeeper. They are not partisan. Everybody agrees to that.

The CBO tells us that for the under-65 group we are going to increase the number of insured from 83 percent to 94 percent. For all Americans, we are going to have 98 percent covered by health insurance. That is universal. We are going to have a framework so that at long last America joins every other industrialized nation in the world with a health care system where everyone is included.

To me, this is a moral issue. It is an issue of whether health care is a privilege or a right. I believe the values of America teach us that health care should be a right for all Americans.

The bill we will be voting on will take us very much in the direction of achieving that goal. Today in America too many people fall through the cracks. Too many families are literally destroyed because they cannot afford access to health care. Therefore, they don't get the tests they need, and perhaps a disease that could have been caught early or prevented is lost, and a person has to go through tremendous health care treatment; perhaps even losing their life.

We have seen too many families go through bankruptcy because they cannot afford the health care they need. We see too many literally cutting their prescription pills in half in the hopes of being able to keep their medicine for a longer period of time because they cannot afford it, knowing full well they are compromising their health.

I have mentioned the case of Deamonte Driver which, to me, is representative of so many tragedies in our community that could be avoided. Deamonte Driver, a 12-year-old in Prince George's County, MD, very close to here, had a tooth ache. His mom tried to get him to a dentist, but he had no insurance, and they couldn't find a dentist. They went to a social worker and made dozens of calls and still couldn't find a dentist. Deamonte was complaining of severe headaches. After weeks of not being able to get to a dentist, he went to the emergency room—the only option that was still available. They found out the tooth had become abscessed, which went into his brain. He had emergency surgery. He lost his life because our health care system didn't provide access to affordable, quality care for all Americans.

Mr. President, that is about to change. I am proud to be a part of it. I have been asked by many in recent days as to what is in it for the people of Maryland. The people of Maryland

are going to get a national health care system that makes a lot more sense, a rational system for care in America. With the current system, too many people are being left out. Small employers have a hard time finding affordable products.

I have gotten many letters from constituents that I have read. I must tell you about the letter I received from a small business owner in Montgomery County. She and her husband had to take out two separate policies to cover their family of four. The private insurance companies discriminated and said each has preexisting conditions, and the only way to have full coverage is to have two policies with two separate deductibles—which the family cannot afford—two separate premiums that the family cannot afford.

There is not competition to provide coverage to small businesses in America. Small businesses in Maryland want to have the opportunity to cover their employees, and they know competition will work, and this bill provides for a lot more competition.

This bill will help those who are losing coverage today. Many people in Maryland are losing their health care coverage every day. Hundreds lose their health insurance in my State every day. We live in the wealthiest Nation in the world, and Maryland is the wealthiest State, and we are still losing health coverage today.

Our Medicare beneficiaries are finding their program under attack. They want to have the stability of knowing Medicare will be there not just this year but for decades to come. This bill starts to reform Medicare by reforming health care so we can sustain it and fill in the prescription drug doughnut hole under which so many seniors are finding it very difficult to afford their medicine.

For the people of Maryland, this bill will provide a rational way in which they can maintain their existing coverage, find it more affordable, and certainly sustain coverage for our Medicare population and provide competition for small business owners to find affordable health care. It ought to bring down health care costs. Marylanders are very interested in that.

Again, let me use the CBO, the objective scorekeeper. They say for the overwhelming majority of Americans, their health premiums will go down because health care costs are coming down. This legislation invests in prevention and wellness. We know prevention and wellness works. We know if you can detect a disease early, you cannot only save lives, but you can save health care costs because the preventive services only cost a couple hundred dollars, and an operation you can avoid is tens of thousands of dollars. Screening and early detection works. Management of diseases works.

Most of our health care costs in America are spent on the leading dis-

eases such as cardiac care and diabetes. We know we spend a lot of money, but we can manage those diseases more effectively, and this bill takes us down that path. We can save money by investing in health information technology. Think about that—about how much paper we receive every year from our health care system. Think about our own medical records and how that could be used to help us each manage our own health care and take more responsibility. We are not doing that today. We know that we can use a card to go anywhere in the world, and they can track our financial records. But for health care, that is not true today.

By investing in health information technology, we can reduce a significant amount of administrative costs in health care and better manage each of our own health care needs. That is what this bill does.

This bill will cover 31 million more Americans. That is not what I am saying as a Democratic Senator from Maryland; that is what the CBO is saying this bill will achieve—31 million more Americans that will not have to go to an emergency room to get their primary care needs met.

Think about how much it costs each one of us when that person whose only option is to go to an emergency room, how much that costs us. You see, many of those individuals cannot afford those hospital charges, so it becomes uncompensated care. It is added to the rates at the hospital that you and I pay—those of us who have health insurance.

The people in Maryland who have health insurance have a hidden tax of \$1,100 every year. It is not only a waste of money that we have to pay, it is an efficient way to work the system. There should be facilities available so that everybody can get care in a much more cost-effective way. This bill moves us toward those goals. It provides competition so we can bring down the cost of health insurance through the local exchanges.

Another provision in the bill that I am very excited about is that we can cross State lines for competition, so if you are an employer in Maryland and you hire workers in Maryland and Virginia and Pennsylvania, you are able to get the regional and national competition so you have more choice on the health insurance companies. That will also bring down costs but also increase quality, which is what we are trying to do.

For Marylanders, this bill is important. This bill will help reduce the Federal deficit. How many of us have talked about that? I know that people who watch us say: Gee, I hear a Republican Senator and then a Democratic Senator; is this the same bill they are talking about?

Let's talk about the Congressional Budget Office, the objective scorekeeper. The Congressional Budget Office says this bill will reduce the Federal deficit by \$132 billion—billion, that is a B, billion. That is quite an accomplishment when you realize that to get everyone covered, the Federal Government is providing subsidies which will cost us some additional investments. To make sure small businesses can afford it, we provide tax credits. That costs revenues—people insured, they have tax preferences. Yet the Congressional Budget Office has confirmed that this bill brings down the deficit by \$132 billion in the first 10 years.

Let's look at the second 10 years because a lot of us want to look at the long-term impact. The Congressional Budget Office, the objective scorekeepers, tell us it will reduce the deficit by one-half of 1 percent of the GDP or about \$1.3 trillion. It is quite an accomplishment to get everybody covered and reduce the deficit and have that confirmed by the Congressional Budget Office. That helps the people of Maryland, and that is why the people of Maryland benefit from this bill, as do the citizens of every State in the Nation.

I wish to talk about protecting consumers. Senator BAUCUS talked about this. I wish to make sure people understand what is involved. Senator BAUCUS mentioned a lot of the provisions that are in the bill about preexisting conditions and pediatrics for children take effect immediately, the caps we bring in, the lifetime caps we deal with covering children under the age of 26, the reinsurance program for 55- to 64-year-olds, the loss ratios that were added to the bill by the managers' amendment to make sure insurance companies are using your premium dollar to pay for benefits, the independent review of a decision made by an insurance company whether to cover a charge.

But I wish to talk about the Patients' Bill of Rights because I think the people of this Nation would be surprised to find out we have not yet enacted the Patients' Bill of Rights.

It was 1997 when we started talking about a Patients' Bill of Rights, about enacting it so we had national protection against the arbitrary practices of private insurance companies. In 1998, President Clinton, by Executive order, applied the Patients' Bill of Rights to the government insurance programs. But today there is still no protection against private insurance companies with a Patients' Bill of Rights.

I am very pleased the managers' amendment has added four very important provisions I authored by an amendment, that I have been working with Democrats and Republicans over the last decade to get into Federal law.

Access to emergency care—let me talk about that for a moment because

today there are people who live in New Mexico and live in Montana and live in Maryland who go to their emergency rooms. They read the fine print of their insurance plan. It says: Before you go to an emergency room, you have to call for preauthorization or you need to go to the emergency room that is in network or we may second-guess whether you needed to go to that emergency room, if, in fact, your final diagnosis was you did not have an emergency need or condition. You may have sweating, the traditional chest pains, the traditional symptoms for a heart attack. You did exactly what a prudent layperson would do: get to that emergency room as quickly as possible. Then you find out it was not a heart attack. Today the insurance companies can second-guess your coverage.

Thanks to the managers' amendment Senator BAUCUS helped us put together, we now are going to cover access to emergency care as a requirement for every private insurance company. Prudent layperson standards, no preauthorizations, get to the closest emergency room as quickly as you can—those are important protections to get into Federal law.

Then there is the ability to choose your primary care doctor. Your primary care doctor is the person you have to have confidence in. If you are a woman, if you want it to be OB/GYN, you should have that right. Many insurance companies deny you that today. If you are a parent and you want a pediatrician for your child, you should be able to have a pediatrician as a primary physician for your child. It is not guaranteed to today. Many insurance plans deny it. This will make sure it is in law.

I am pleased, and I know the people of Maryland will be glad to know, at long last, we get the Patients' Bill of Rights protected.

There are a lot of groups that supported this over the years. I wish to acknowledge the long list of people, the long list of groups, bipartisan groups, that have worked on this issue, from AARP to the Consumers Union to the NAACP to the SEIU, YMCA—the list goes on and on of groups that have supported the Patients' Bill of Rights against private insurance companies. At long last, we have the ability, with the passage of this bill on the Senate floor, to move it one step closer to passage and to be the law of the land.

I wish to talk about minority health. The reasons I wish to talk about minority health are twofold. First, I know my colleagues are interested to know that the amendment that is currently pending that the leader filed, technically on my behalf, which establishes the minority health protections within the different Federal agencies—I wish to assure my colleagues that it is in the underlying bill. It is in the package. It is in the managers' package which has been adopted.

I am going to suggest to the body that we withdraw the amendment because we do not need it to pass; it is already in the underlying bill. This was the original amendment I submitted. I wished to explain that because the amendment I filed to establish the Minority Health Office at the Department of Health and Human Services and also within NIH will be in the underlying bill because of the managers' package.

This is an important moment because there are huge disparities in our health care delivery systems in America, bringing about huge disparities among different ethnic communities. The life expectancy of African Americans, for example, is 5.3 years lower than Whites. When we look at diabetes in America, the incidence of diabetes is two times greater among minorities than the general population. That means we need to have a strategy to deal with it. We need to know how can we reach out to minority communities to deal with their special needs. Unless you have a focus within the Department of Health and Human Services, unless you have a focus within NIH and the other agencies, you will not deal with it as effectively as we should. I, again, thank Senator BAUCUS, Senator DODD, Senator REID, and the rest who understood this and put it into the managers' package because we can then develop a national strategy to help deal with the issues of the minorities.

I also will mention heart disease. African Americans have a 33-percent higher death rate due to heart disease. The list goes on and on. That is why this bill codifies the Office of Minority Health in the Office of the Secretary of Health and Human Services, establishes individual Offices of Minority Health at the Centers for Disease Control and Prevention, Health Resources and Services Administration, Substance Abuse and Mental Health Services Administration, Agency for Health Care Research and Quality, Food and Drug Administration, the Centers for Medicare & Medicaid Services, and it elevates the current Center on Minority Health and Health Disparities at NIH into an institute. That is good news for this Nation in dealing with this issue.

I, again, thank those who helped me get this into the managers' package—and it is now in the bill—that we will be taking up for a vote tomorrow.

I also compliment Senator SANDERS—I have done this before—on the community health centers. I mention that because as we deal with the disparities in health care in America, we deal with minority health care issues, yes, we have to get people health insurance, we have to get people the financial wherewithal to provide health care, but you also have to have the facilities in place if you are going to deal with health care needs. It is one thing

to say we will cover the costs, it is another thing to say we will have the doctors available.

I met with one of the leaders at Johns Hopkins University, which is located in the urban part of Baltimore city. He said: We need help. We need more community health centers. We need more primary care doctors. We need more nurses. We need help with more people seeking care through traditional channels rather than using emergency rooms. That is great news. With them being able to afford insurance, that is great news, but let us have the facilities.

There are many underserved in Maryland and around the Nation who just need facilities. Thanks to the Sanders amendment, of which I am proud to be a cosponsor and worked with him, that is in this bill. We are going to see \$10 billion to expand community health centers and 25 million more Americans will be able to get access to care through our community health centers. That is good news and that will help and we invest in creating more primary care doctors, which is a very valuable part of this bill. I applaud all those.

Let me point out this bill will help families in America. The choice is whether we pass this bill which sets up the framework for America to finally become a nation that provides universal coverage or we maintain the status quo. Let me tell you what happens if we maintain the status quo. These are the numbers. Right now, the average cost for a family for health insurance is \$13,244. If we do not take action, by 2016—that is not too many years away—it is going to be \$24,291.

The ACTING PRESIDENT pro tempore. The Senator has consumed the 20 minutes he was yielded.

Mr. CARDIN. May I have 2 more minutes, if that is possible?

Mr. BAUCUS. I yield the Senator 2 more minutes.

Mr. CARDIN. Mr. President, if people are going to be able to maintain their existing coverage, we have to act, and this bill will allow us to act. That is why the American Medical Association supports the bill. This bill will help our Medicare population because it strengthens Medicare, as I pointed out before. That is why the AARP supports it. We will be able to provide preventive services, such as annual physicals, for our seniors. This bill is important for small business owners who no longer will be discriminated against by paying 20 percent more than comparable large companies pay for the same type of insurance product.

This bill is good for Marylanders. It is good for every American. It moves us toward universal coverage. The bill is not perfect. I am disappointed with some of the things in the bill and some of the things that did not make it into the bill. But this bill establishes the

framework for universal, affordable, quality care for every American. It speaks to the values of our Nation.

I am proud to support this legislation, and I know we will look back at this day as being one of the bright moments for America, where we said to the people of our Nation that, indeed, we will provide affordable, quality health care for every American.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Montana is recognized.

Mr. BAUCUS. I yield 15 minutes to the Senator from Delaware, Mr. KAUFMAN.

The ACTING PRESIDENT pro tempore. The Senator from Delaware is recognized.

Mr. KAUFMAN. Mr. President, I thank the manager not just for this but for the many things he has done to make this bill a possibility. It is truly historic, transformational. To a large degree, it is because of his hard work. I appreciate that.

Also, I yield him 30 minutes of my postcloture time.

The ACTING PRESIDENT pro tempore. The time will be so yielded.

Mr. KAUFMAN. Mr. President, I rise, once again, to express my support for this historic health care legislation before us. After more than a year of debate and months and months of negotiations, I welcome the extraordinary opportunity finally to enact meaningful health care reform. Yes, I mean years and months, since this reform effort has been a long and deliberative process, not the rush job opponents of this effort have been claiming.

I must admit, however, there were times during this debate when I was not sure if we were ever going to reach this point. In fact, I was convinced we were not. But I found in my life that when you think things are never going to happen, as with every important thing I have ever done, you reach a point when you say this is never going to happen, and this is another example. There are many times I never thought this would happen.

From the bogus charge of death panels—which was just named *politifact.com's* "Lie of the Year"—to the tension over whether the bill will contain a public option, which I supported, there were some long days where it was hard to see how we were going to get to the end point.

But thanks to the hard work of the majority leader, as well as Senators BAUCUS, DODD and HARKIN and their staffs, we are finally here.

As many of you know, I have worked in and around the Congress for more than 36 years. I have learned quite a bit about how things operate in the Senate.

The Senate is commonly referred to as the most deliberative body in the world. But such deliberations are not

always pretty. Sometimes tempers flare, sometimes debate does not reach the level we aspire to or the American people deserve. Sometimes the most important legislation actually fails to get the votes necessary to pass.

We all know what happened to health care reform the last time we attempted a major overhaul 15 years ago when President Clinton tried to pass his version of health care reform. The debate was just as passionate with charges and countercharges on both sides of the aisle. Because of the coarseness of that debate, because of the seemingly intractable opposition to health care reform, Congress has been wary in the intervening 15 years to take up this cause again, and it is understandable.

But over the past 15 years, our health care system has gotten more expensive. Rising medical costs, skyrocketing premiums, increasing numbers of the uninsured and the strain on both business and providers have brought the critical need for health reform back to the Senate this year.

Make no mistake, we need health care reform now. The status quo—what I call the present health care system—is simply unsustainable.

Medical costs account for one-sixth of domestic spending and are headed upward. In 1979, we spent approximately \$220 billion as a nation on health care. In 1992, we spent close to \$850 billion. In 2009, we will spend \$2.5 trillion on health care. Listen to this: \$220 billion in 1979, \$850 billion in 1992, and \$2.5 trillion in 2009. How can anyone argue it is not time to deal with health care reform and that the need is urgent? The trajectory of our national health care expenditures is out of control.

In addition, one of the biggest—if not the biggest—forces behind our Federal deficit, which we hear so much about on this floor, are the skyrocketing costs of Medicare and Medicaid. In 1996, Medicare and Medicaid accounted for only 1 percent of all government expenditures; they now account for 20 percent. If we do nothing to start bending the cost curve down for Medicare and Medicaid, we will eventually spend more on these two programs than on all other Federal programs combined. We must slow the level of growth in the Medicare and Medicaid Programs if we are to ever get our budget situation under control.

In addition to the fiscal pressures crushing our Federal and State governments, the present health care system is also crushing families and workers. Just look at the rise in the insurance premiums in my home State of Delaware. In 2000, the average premium for family health coverage was just over \$7,500. That is \$7,500. By 2008, the number had jumped to \$14,900—that is \$14,900—almost doubling in just 8 years. If we fail to enact the pending

health care reform legislation, the same premium for family coverage is expected in Delaware to reach \$29,000 in 2016.

Let me repeat that: \$29,000 for family coverage in Delaware in 2016 if we don't pass health care reform now.

States around the country will see similar increases, which are simply unaffordable. Too many people are going bankrupt paying for their medical care. Today, the inability to pay for skyrocketing medical bills accounts for more than 60 percent of U.S. personal bankruptcies, a rate of 1½ times what it was just 6 years ago. Keep this in mind: More than 75 percent of families entering bankruptcy due to health care costs actually have health insurance.

Let me repeat this because it is a critical point: Three-quarters of all Americans filing for bankruptcy because of medical bills already have insurance. We also need reform to stop the worst abuses in the health insurance industry. In my year as serving as the Senator from Delaware, I have heard from far too many constituents who have been refused an insurance policy because they have a preexisting condition.

I have heard from fathers who were denied family insurance coverage because they were told their children had preexisting conditions too expensive to cover. Much to my shock—and I have talked about this on the Senate floor—I have received letters from women who have been turned down for coverage because their pregnancy was considered a preexisting condition. Pregnancy a preexisting condition? That is simply intolerable. Even worse, however—if that is possible—is the practice of rescission, where insurance companies drop coverage for individuals the moment they get sick and need their insurance the most. Being denied coverage after you have already paid your premiums is just plain cruel.

For all those reasons and more, we must reform the present health care system. Thankfully, we now have the opportunity to bring about meaningful health care reform through the Patient Protection and Affordable Care Act, and I would like to take just a couple more minutes to discuss why this legislation has earned my support.

First off, it is fiscally responsible. President Obama laid down a marker that any health care reform legislation that landed on his desk could not add to our Nation's debt. I am happy to say this legislation passes this test.

According to the Congressional Budget Office, the Patient Protection and Affordable Care Act will reduce the deficit by \$132 billion over the first 10 years. This bill is fully paid for.

Second, the bill helps stabilize Medicare and Medicare Programs. In the absence of this legislation, the Medicare trust fund is expected to go bankrupt

in 2017. According to the head actuary at the Centers for Medicare and Medicaid Services, passing this bill would extend the solvency of the trust fund for an additional 9 years—9 years. Medicare is a sacred trust with Americans, and this bill ensures this trust is preserved.

In addition to reducing the deficit and shoring up the Medicare Program, this bill contains numerous provisions that will help Americans afford their premiums and prevent them from filing for bankruptcy protection. Starting next year, insurers will no longer be able to place lifetime caps on health care benefits. For the next several years, insurers will also be restricted in the annual limits they can place on benefits, and then these will be eliminated altogether in 2014.

These are huge changes for people with debilitating diseases and those who experience unexpected catastrophic events costing millions of dollars in treatment.

In addition, premium subsidies for families with incomes under 400 percent of the poverty level—or \$88,000 for a family of four—will be available to help them afford their premiums once the new insurance exchange is up and running. There will also be annual limits on out-of-pocket costs for individuals, and dependents will be able to be covered under their parents' insurance policies until the age of 26.

All of these are meaningful reforms that will dramatically lower the rate of bankruptcies associated with medical costs.

The bill also contains some other great consumer protections that don't currently exist in our present health care system. I have already highlighted the problems in the current system with insurers denying coverage for people with preexisting conditions and rescinding coverage when people get sick. Under this bill, Americans will finally be freed from the shackles of preexisting clauses that have kept so many from obtaining much needed health insurance.

Starting next year, insurers will no longer be able to deny coverage to children with preexisting medical conditions. This ban on not covering preexisting conditions will be extended to all Americans in 2014.

The bill also forbids insurers from rescinding health insurance after Americans have already paid their premiums. Americans will no longer lose their coverage when they get sick and need it most.

In addition, the bill dramatically expands coverage of prevention and wellness services. It provides incentives for employers to implement wellness programs and offers a new annual wellness checkup for seniors enrolled in Medicare.

These are all good, positive reforms to our health care system.

Now that we are close to finishing this debate, the media has focused its attention on particular deals that benefit certain Senators and specific States, but I want to point out that all the benefits I have talked about—all of them—are available to every American in every State.

Most every Senator has brought something to this debate and to this bill. I am very pleased that the managers' package includes the health care fraud enforcement amendment, which I introduced, along with Senators LEAHY, SPECTER, KLOBUCHAR, and SCHUMER as cosponsors. Again, this benefits all Americans not just Delawareans.

The National Health Care Anti-Fraud Association conservatively estimates that 3 percent of all health care spending—some \$72 billion—is lost to health care fraud in both public and private health care plans. That is \$72 billion lost in health care fraud in both public and private health care plans. Other estimates place the figure as high as 10 percent over \$220 billion.

Fraud hits every one of us in every corner of our Nation where we can least afford it—our health care premiums—while simultaneously driving down the quality of, and our trust in, the health care system. This amendment increases funding for fighting fraud in public programs.

It improves screening of providers and suppliers and requires implementation of meaningful compliance programs. This section tightens requirements for claims submissions and provides new tools to deter fraud and abuse in the private insurance market.

It also strengthens criminal investigations and prosecution. Today, outdated laws and punishments insufficient to provide effective deterrence hamper prosecutors and agents. This may seem incredible, but many criminals have told law enforcement officers that they switched to health care fraud from the drug trade because the reward-to-risk ratio is so much higher. Can you imagine that? There is actually an incentive for crooks in the present health care system to commit health care fraud.

This antifraud amendment can begin to reverse this trend. Significantly reducing costs attributable to fraud will go a long way toward bending the cost curve down. What this bill does is it increases the sentencing requirements for people who commit health care fraud to make it much less attractive for them to get into the health care fraud business. It gives us the prosecutors and the agents we need—just like we did in the financial regulatory reform—to go after these folks and catch them, then put them in jail. With these new sentencing guidelines, we can put them there for a longer time, discouraging people from getting into the health care fraud business to begin with.

In addition, the package of amendments I cosponsored with my fellow freshman Democrats will also improve the bill and benefit all Americans.

I am lucky to be a member of a dynamic freshman class, including the Presiding Officer, and I have enjoyed teaming up with them in our morning speeches and colloquies to push the health care reform effort forward. I am pleased that our amendment package was accepted by the bill's managers and that it provides commonsense, practical solutions that help further contain costs, improve value, and increase quality.

For example, it quickens the implementation of uniform administrative standards, allowing for more efficient exchange of information among patients, doctors, and insurers. It provides more flexibility in establishing accountable care organizations that realign financial incentives and help ensure that Americans receive high-quality care. It provides greater incentives to insurers in the exchange to reduce health care disparities affecting underserved minority communities.

For all the reasons listed above, from the original text to the additions added to the managers' package, this bill should and must be passed. It brings quality, affordable health care within the reach of all Americans, including more than 30 million Americans who are currently uninsured. It strengthens the Medicare Program, extending its insolvency for 9 years. It helps restore fiscal order by reducing the deficit by approximately \$132 billion over 10 years and more than \$1 trillion over 20 years. It offers much needed consumer protections that provide stable coverage at an affordable cost.

In closing, I again want to acknowledge the hard work of Senators BAUCUS, REID, DODD, HARKIN, as well as their staffs—especially their staffs—because the staff has done incredible work on this piece of legislation. They have enabled us to reach this historic legislative moment.

I have ended many speeches by noting that it is time to gather our collective will and do the right thing to join this historic opportunity by passing health care reform. I think we may have finally reached that goal. We certainly can't afford to wait any longer. We need to act now. We can do no less. The American people deserve no less.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. KIRK). The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I yield the remainder of the time we have in our hour to the Senator from North Dakota, Mr. CONRAD.

Mr. CONRAD. Mr. President, I rise this morning not to talk about health care but to talk about the other critical matter that faces this body before we leave this session for the holidays

and that is the matter of extending the debt limit of the United States. Let me start by saying it is imperative that we extend the debt limit. If we do not, the United States would default on its debt. The consequences for this country and the global economy would be nothing short of catastrophic.

If you think about the problems created in world markets by the fact that Dubai defaulted on \$40 billion of debt, think of what it would mean to global markets if the United States were to default on \$12 trillion of debt.

For those who say this is Obama's fault—no. This is not Obama's fault. He has been in office 11 months. I remind everyone that he walked into the biggest mess in 70 years—deficits and debt exploding, joblessness skyrocketing, economic growth plummeting. All that was happening before Barack Obama became President of the United States. He did not create the economic mess, he inherited it. He did not create the fiscal mess, he inherited it. Those are things he had to take on as the new President.

There were record deficits and a doubling of the national debt, there was the worst recession since the Great Depression, financial market and housing crises, ongoing wars in Iraq and Afghanistan, and an unsustainable long-term budget outlook with everything going in the wrong direction.

This is what was happening to deficits before President Obama took office. The deficits were skyrocketing. In fact, we have never held Presidents responsible for the fiscal affairs during the first year of their term of office because everybody here knows they inherit a budget from the previous President for the first year. That is not Barack Obama's responsibility, that is the responsibility of the previous administration.

For those who say President Obama made things worse—no, he didn't make things worse, he made things better. Yes, he added short term to the deficit, about \$300 billion in 2009 because of the economic recovery package, but I remind people the difference the economic recovery package has made. We have gone from private-sector job losses of 749,000 jobs a month when he came in—this is January of 2009, the month he came in. Job losses had mounted to 749,000 jobs a month. Look at the trend. Because of the recovery package and other measures that were put in place, the changes in private nonfarm payrolls have improved dramatically, from losses of over 700,000 a month in January to losses of 18,000 last month. We now believe that, in the first quarter of next year, those job losses will have become job gains.

The same thing happened on economic growth. Economic growth was sharply negative when President Obama came into office. In the last quarter, we now know the economy ac-

tually grew at a rate of 2.2 percent. That is a dramatic change. The fact is President Obama made things better. He inherited a disaster and he went to work to get America back on track.

Let's look for a moment at the debt. This is what happened under the previous administration. The gross debt of the United States skyrocketed, more than doubling under the previous administration. So this is what the current President inherited. He did not create it. He wasn't the architect of it. He didn't produce these deficits and debt. He inherited them.

It is true we are still on a course for long-term debt that is unsustainable. This was the cover of Newsweek on December 7, Pearl Harbor day. The Newsweek cover said this: "How great powers fall; steep debt, slow growth, and high spending kill empires—and America could be next."

When you went inside to the story, it said this:

This is how empires decline. It begins with a debt explosion. It ends with an inexorable reduction in the resources available for the Army, Navy, and the Air Force . . . If the United States doesn't come up soon with a credible plan to restore the Federal budget to balance over the next 5 to 10 years, the danger is very real that a debt crisis could lead to a major weakening of American power.

I don't know what could be more clear than that. Here is what has happened since 2001. Again, most of this is on the shoulders, the responsibility of the previous administration, because the debt absolutely skyrocketed under their watch. But it is continuing to grow and we must face up to that.

What is even more alarming is the longer term outlook. On the trend we are on, the debt, which will reach over 100 percent of the gross domestic product by 2019, is projected to hit 400 percent of gross domestic product by 2050. That is the trendline we are on. That is the trendline we have been on since 2001, a trendline of massively growing debt. The question is, can we face up to it? Do we have the strength, do we have the will to take on the burgeoning debt?

This is what the National Journal wrote on November 7 of this year:

The debt problem is worse than you think. Simply put, even alarmists may be underestimating the size of the (debt) problem, how quickly it will become unbearable and how poorly prepared our political system is to deal with it.

The reality we confront tomorrow morning is whether we will extend the debt limit of the United States. We have no choice. If we fail to pay the debts we have already accrued, the United States and other markets around the world would collapse. That is just the fact. We cannot permit that to happen.

How we got to this point is very clear to me. The previous administration put forward a fiscal policy that doubled the

debt of the United States and put us on track to continue doubling it every 8 years. The current administration has taken action to get the economy moving and growing again. Had they not taken those steps, which add to the deficit in the short term, the long-term debt outlook would be even worse. That does not take away from the fact that we have to deal with the reality that confronts us now. That reality is we are on a trendline that is absolutely unsustainable.

To those who say if you deal with the debt, you are going to have to do something about Social Security and Medicare and revenue—I say yes. That is true. We are going to have to do something about all of those. To those who say dealing with the debt means facing up to the hard reality that confronts this country and the fact that we are on a course that is unsustainable—I say yes. That is true. We are going to have to make changes in the entitlement programs. We are going to have to make changes in the revenue system.

When I say that, I don't mean by that the first thing we do is raise taxes. The first thing we ought to do is collect the taxes that are already owed but are not being paid because of these offshore tax havens and abusive tax shelters and all the rest. We can get more revenue. We do not need to raise taxes to get more revenue. We need to collect the revenue that is currently owed and we need to get it from the people who are cheating all the rest of us by engaging in these tax schemes—offshore tax havens, abusive tax shelters. We even have companies now that are leasing sewer systems, buying them from European cities in order to depreciate them on the books in the United States to reduce their taxes here, then leasing those same sewer systems back to the European cities that built them in the first place. That is happening right now.

If you doubt we are losing money to offshore tax havens, Google “offshore tax havens” and see how many hits you get. You get over a million. Those sites describe a life of luxury, living offshore, tax free, on income received in this country, income on which taxes are owed in this country but not paid. That is the kind of thing that has to be stopped.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 5½ minutes.

Mr. CONRAD. Let me talk for a minute about what Senator GREGG and I have proposed: a bipartisan task force to deal with this long-term debt threat. Our proposal has 35 cosponsors now. The idea is to give a group of our colleagues and members of the administration the responsibility to come up with a plan to reduce the deficits and debt. If a plan enjoyed a supermajority

among the group of 18 who would be given the responsibility to come up with such a plan—if 14 of the 18 could agree on a plan—it would have to come here for a vote. It would come here for a vote. Every Senator would retain their rights to vote up or down. Every Senator would retain their rights. And it would require 60 votes in the Senate to pass, it would require 60 percent of the House to pass and the President would be able to veto it if he didn't like it.

I think it is clear that we have a real challenge facing our country and it is going to take some special process to deal with it. What we have outlined would put everything on the table with 18 Members, 10 Democrats, 2 from the administration, and 8 Republicans. All task force Members would need to be currently serving in Congress or the administration. If 14 of the 18 could agree, that report would have to come to the Congress for a vote. The report would be submitted after the 2010 election and there would be fast-track consideration in the Senate and the House. There would be a final vote before the 111th Congress adjourned.

To those who say that is going to shred Social Security and Medicare—I say no. What threatens Social Security and Medicare is our doing nothing. Both of those programs are already cash negative. The trustees of Medicare tell us the program will be insolvent by 2017 if we do nothing. The answer can not be to do nothing. I believe this is a challenge that requires us to come together now, Republicans and Democrats, House, Senate, the administration, as we came together to deal with fiscal crises in the past. The Social Security Commission in the 1980s, the Andrews Air Force Base Summit in the 1990s—those were special procedures to deal with a special challenge and that is what is required now. We are on a course that is absolutely and utterly unsustainable.

Let me go back to the vote tomorrow, because a group of us have said we are not going to vote for any long-term extension of the debt without consideration of a special process to deal with the debt, but we are also prepared to extend the debt on a short-term basis. That is absolutely essential. That is the responsible thing to do. A failure to extend the debt tomorrow would send a message to markets around the globe that the United States is not going to pay its debt. The United States cannot renege on its commitment to pay the \$12 trillion of debt that has already been run up. Those are not future debts but debts that have already been incurred. Those are debts that are due now and will be due in the weeks to come.

The United States has never defaulted on its debt and it never can without grave consequences to our economy and to the world economy.

Let me say again as clearly as I can: for those who want to blame President Obama, that won't wash. He has been in office only 11 months. He walked into the biggest mess in over 70 years—deficits and debt exploding, job losses skyrocketing, economic growth plummeting. President Obama didn't create that economic mess, he inherited it. He did not create the fiscal mess, he inherited it.

Tomorrow will be a key vote for this country. Those of us who are concerned about the growing debt and are willing to take it on must also be responsible about making certain that the United States does not default on its already accrued debts. To do otherwise would be disastrous for this country.

How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 10 seconds.

Mr. CONRAD. Perfect. Merry Christmas.

I yield the floor.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. CORKER. Mr. President, I would inquire how much time is allotted to me?

The PRESIDING OFFICER. The minority has 60 minutes.

Mr. CORKER. I have 10 minutes. I wonder if the Presiding Officer might let me know when I have 2 minutes remaining.

The PRESIDING OFFICER. The Chair will do so.

Mr. CORKER. I thank the Chair.

Mr. President, I have watched this body over the last period we have been discussing health care. The body itself, the integrity of this body has been challenged. I have watched as individuals have challenged each other's integrity as it relates to this bill. I choose not to do that today.

I wish to say, as I do constantly in my State, that I consider it a privilege to wake up each day and come to work in this body. Obviously, things don't always go as one might expect, but I do consider it a privilege. I thank the folks back home for allowing me to serve and to deal with these important issues.

I don't think I will ever quite understand why this bill was put together the way it was. I certainly understand there are differences of opinion and differences of interest, but I don't think I will ever understand why Medicare moneys, from an insolvent program, were used to fund a new entitlement.

CBO has come out this morning clearly stating what we have been saying for over 6 months. The fact is, taking Medicare savings and using them to create another entitlement does not work. It takes away from the solvency of Medicare itself. It is kind of late, but I am glad CBO has actually come out and said today, finally, after months of debate, what we have been saying from day one, that you could not take Medicare savings and use them to create a

new entitlement without challenging the solvency of Medicare itself.

I will never understand why that building block, a flawed building block, was used to create this bill. Everybody knows it was that use of inappropriate funding that began this whole partisan divide. My guess is, we might have ended up with a bill that would stand the test of time had we not utilized that basic flawed building block in the bill.

There has been one, though, that I have found equally problematic; that is, the whole issue of creating an unfunded mandate for the State of Tennessee and for States across the country. The challenge to people's personal integrity has been centered more around this issue than anything else, as various Senators trying to protect their States from an unfunded mandate have been challenged in that regard.

Many people who serve in this body used to be mayors, they used to be Governors, people who had to deal with budgets in their own States. Years ago, in a bipartisan effort, a bill was passed to ensure that we in Washington didn't pass laws that increased costs for cities. I was a mayor of a city. I was commissioner of finance for a State. In those capacities, there was nothing that was more offensive than for the Federal Government to pass a law and send down a mandate to a city or a State that costs money and yet not send the money that went with it. There was nothing more infuriating. We had to actually balance our budgets. We didn't have the ability to borrow money from overseas and to continue to operate in the red.

Back in 1995, a law was passed called the Unfunded Mandates Reform Act. It was done to do away with the arrogance that existed up until that time—and unfortunately, continues to exist—where the Federal Government would create laws that would increase costs on cities and States. It was passed in a bipartisan way. As a matter of fact, 15 Members from the other side of the aisle supported this law, voted for this law, and put this law in place. Many of the people who made this bill, created this bill participated. The chairman of the Finance Committee voted for this law. The majority leader voted for this law. The distinguished chairman of the Budget Committee voted for this law. The chairman of the HELP Committee who drafted a big part of this bill voted for this law. What this law said was that we could not pass legislation out of this body, out of Congress, that placed an unfunded mandate on States, on cities, and caused them to have to do things that raised expenses by laws we created without sending the money themselves.

Our Governor of Tennessee is a Democrat. He is on the other side of the aisle. We have worked closely on a number of economic development

issues. I have talked with him all the way through this process. He actually had hoped to work with this administration on health care and on health care legislation. He has been involved in health care all of his life. He has managed our State well. He has dealt with many challenging health care issues. Much has been documented about the travails our State has had as it relates to Medicaid and our desire to try to fix that. He has called this bill, which appears to be ready to pass this body, the mother of unfunded mandates. He has talked about the more than \$750 million in cost this bill is going to cause the State of Tennessee to deal with at a time when they are hoping their State's revenues will be at 2008 levels by the year 2014.

Again, I will never understand why we have raided an insolvent entitlement to create a new entitlement, weakening Medicare. I will never understand why we have done that to create this bill. I will never understand why this body chose to create such a large unfunded mandate for States through the provisions we have put in place as it relates to Medicaid, telling States they have to raise the levels at which they insure citizens across their State to 133 percent of federal poverty.

There is no question this bill violates the law put in place in 1995.

The PRESIDING OFFICER. The Senator has 2 minutes remaining.

Mr. CORKER. I thank the Chair.

I talked about the fact that it is a privilege to serve in this body. Generally speaking, people try to live up to the standards this body has set for all of us and that citizens across the country expect us to live up to. For that reason, I am going to raise a budget point of order. There is no question, per what CBO has said, the fact that this bill is going to cause cities and States to pay more for the health insurance of their employees—CBO has stated that clearly. There is no question this bill is going to cause States to have to utilize dollars that otherwise might be used for education or public safety.

I raise a point of order. Section 425(a)(2) of the Congressional Budget Act of 1974 makes it out of order to consider any legislation that contains an unfunded intergovernmental mandate in excess of the statutory limit unless the bill provides new direct spending authority or includes an authorization for appropriations in an amount equal to or exceeding the direct cost of such mandate in the Senate.

The pending bill includes an unfunded intergovernmental mandate in excess of the annual statutory limit of \$69 million within the next 5 years. Therefore, I raise a point of order against the substitute amendment pursuant to section 425(a)(2) of the Congressional Budget Act of 1974.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I move to waive the point of order for consideration of the pending legislation and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be.

The yeas and nays are ordered.

The Senator from Iowa.

Mr. GRASSLEY. Mr. President, I ask my friend from Montana, Senator BAUCUS, to be alert because I want to raise a similar request to set aside. But before I do that, I want to explain why I am doing this. I worked for 6 years to pass the Congressional Accountability Act, which was signed into law by President Clinton in 1995. I worked so hard because I strongly believed there should only be one set of laws in this country.

Prior to 1995, there were two sets of laws—one for Capitol Hill and one for the rest of the country because Congress exempted itself. That is why, following on that practice of 1995, I offered an amendment during the Finance Committee markup to require that Members of Congress and congressional staff get their employer-based health insurance through the same exchanges as our constituents. That is something for which I also heard complaints from the grassroots of Iowa during my town meetings. I did offer that amendment, and it was adopted without objection.

But then after careful consideration and examination of the bill Senator REID put together—and this was done by the Congressional Research Service—it was revealed that my amendment was changed under this closed-door merger process. Something cute happened. Under the bill we now have before us, this requirement would not apply to staff for committees of the Congress or leadership offices, it would apply to Members and their personal staff but not leadership. That is a real cute thing, to give exemptions for some people on Capitol Hill but not for others.

I ask unanimous consent to have printed in the RECORD an analysis from the Congressional Research Service.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL RESEARCH SERVICE,
Washington, DC, Dec. 2, 2009.

MEMORANDUM

To: Senate Finance Committee. Attention: Andrew McKechnie.

From: Ida Brudnick, Analyst on the Congress, Government and Finance Division; Todd B. Tatelman, Legislative Attorney, American Law Division.

Subject: Potential Statutory Interpretation of 1312(d)(2)(D)(ii)(II) of H.R. 3590, The Patient Protection and Affordable Care Act.

This memorandum responds to your request for a review and potential statutory

interpretation of 1312(d)(2)(D)(ii)(II) of H.R. 3590, The Patient Protection and Affordable Care Act.¹ Specifically, you have asked whether the definition of the term “congressional staff” could be interpreted to exclude committee staff, leadership staff, or other employees of the Congress. The definition used by the bill covers “all full-time and part-time employees employed by the official office of a Member of Congress, whether in Washington, DC or outside of Washington, DC.”² In addition, you have asked CRS to review the language used by S. 1796, America’s Healthy Future Act of 2009, which was reported from the Senate Finance Committee.³ S. 1796 used the term “congressional employee,” which it defined as “an employee whose pay is disbursed by the Secretary of the Senate or the Clerk of the House of Representatives.”⁴ Finally, you have requested that CRS examine what, if any, other Legislative Branch employees might be covered should language similar to that in S. 1796 ultimately be adopted.

Based on our review of the financial practices of the Congress with respect to payment of employees, the bill language, and applicable canons of statutory construction, it appears possible to argue that the definition of “congressional staff” used by 1312(d)(2)(D)(ii)(II) excludes any staff not directly affiliated with a Member’s individual or personal office. Should this interpretation be adopted by an implementing body or a court, it would appear that it would exclude professional committee staff, joint committee staff, some shared staff, as well as potentially those staff employed by leadership offices including, but not limited to, the Speaker of the House, Majority Leader of the Senate, Minority Leader of the House, Minority Leader of the Senate, as well as the Whip offices in both the House and Senate. Moreover, this interpretation would arguably exclude other congressional employees, for example, those employed by the Office of the House Clerk, House Parliamentarian, House Historian, Secretary of the Senate, Senate Legal Counsel, House and Senate Legislative Counsel offices.

LEGISLATIVE BRANCH APPROPRIATIONS ACCOUNTS

The legislative branch appropriations acts funds the: Senate; House of Representatives; Joint Items;⁵ Capitol Police; Office of Compliance; Congressional Budget Office; Architect of the Capitol, including the Capitol Visitor Center; Library of Congress, including the Congressional Research Service; Government Printing Office; Government Accountability Office; and Open World Leadership Program.

Both the House and Senate portions of the annual legislative branch appropriations bills contain one line item that provides for salaries and expenses within Member offices. The House and Senate sections contain additional line items for employees of leadership offices, committees, and officers.

In the Senate, the Senators’ Official Personnel and Office Expense Account provides each Senator with funds to administer a personal office. It consists of an administrative and clerical assistance allowance, a legislative assistance allowance, and an official office expense allowance. The funds may be interchanged by the Senator, subject to limitations on official mail. The FY2010 legislative branch appropriations act provided \$422 million.

The Senate portion of the bill includes the following additional headings: Expense Allowances and Representation; Salaries, Officers, and Employees; Office of Legislative

Counsel; Office of Legal Counsel; Expense Allowances for Secretary of Senate, Sergeant at Arms and Doorkeeper of the Senate, and Secretaries for the Majority and Minority of the Senate; and Contingent Expenses. The “Contingent Expenses” account includes funding for Inquiries and Investigations; Expenses of the United States Senate Caucus on International Narcotics Control; Secretary of the Senate; Sergeant at Arms and Doorkeeper of the Senate; Miscellaneous Items; and, Official Mail Costs.

Staff in personal offices in the House of Representatives are paid through funding provided for Members’ Representational Allowances (MRA). The MRA, which was preceded by multiple allowances for each Member covering different categories of spending, was first established in 1996.⁶ The FY2010 legislative branch appropriations act provided \$660.0 million for MRAs.

The House “Salaries and Expenses” account provides funding under the following additional headings: House Leadership Offices; Committee Employees; Salaries, Officers And Employees; And Allowances And Expenses. Many of these categories include multiple line items. In FY2010, the “House Leadership Offices” heading provided funding for the: Office of the Speaker; Office of the Majority Floor Leader; Office of the Minority Floor Leader; Office of the Majority Whip; Office of the Minority Whip; Speaker’s Office for Legislative Floor Activities; Republican Steering Committee; Republican Conference Committee; Democratic Steering and Policy Committee; Democratic Caucus; Nine Minority employees; training and program development—majority; training and program development—minority; Cloakroom Personnel—majority; and Cloakroom Personnel—minority. “Committee Employees” provides funding in separate headings for “Standing Committees, Special And Select,” and “Committee on Appropriations.” Funding for “Salaries, Officers And Employees” is divided among various financial, administrative, legal, ceremonial, and security offices, including, for example, the offices of the Clerk of the House, Chief Administrative Office, Sergeant at Arms, Inspector General, and General Counsel.

POTENTIAL STATUTORY INTERPRETATION

When interpreting the meaning of legislative language, courts will often use methods of statutory construction commonly referred to as “canons,” or general principles for drawing inferences about language. Perhaps the most common “canon of construction” is the plain meaning rule, which assumes that the legislative body meant what it said when it adopted the language in the statute. Phrased another way, if the meaning of the statutory language is “plain,” the court will simply apply that meaning and end its inquiry.⁷ As the United States Supreme Court stated in *Connecticut National Bank v. Germain*:

[I]n interpreting a statute a court should always turn first to one, cardinal canon before all others. We have stated time and again that courts must presume that a legislature says in a statute what it means and means in a statute what it says there When the words of a statute are unambiguous, then, this first canon is also the last: judicial inquiry is complete.⁸

Applying the plain meaning canon to the language in H.R. 3590, it appears possible to argue that the phrase “official office of a Member of Congress” most naturally refers to Member’s personal offices and, therefore, excludes other employees that a Member

may utilize for other purposes. For example, Members who serve as committee chairman or ranking members may have staff affiliated with their service on a given committee. While the Member may have control over hiring, promotion, and even termination, those staff are paid by the committee and not the Member. Moreover, the Member’s position on the committee is not commonly considered their “official office,” as committee assignments may change during a Congress and are determined by the chamber caucuses. Furthermore, it is worth noting that CRS has been unable to locate any previous use of the phrase “official office of a Member of Congress” in statute or appropriations laws.

Alternatively, applying the plain meaning canon to the language used in S. 1796, it appears possible to argue that this language includes committee staff, leadership staff and most other congressional employees. The language, unlike that in H.R. 3590, turns on who the disbursing agent of the funds is, rather than who the employer is. As a result, the language in S. 1796 appears to be much broader, as most “congressional employees” have their pay disbursed from either the Secretary of the Senate or the Chief Administrative Office (CAO) of the House, regardless of whether they are employed in a Member’s personal office, by a committee, leadership official, or in another capacity by the Congress. Moreover, unlike the language in H.R. 3590, similar text to that in S. 1796 has been used previously to categorize congressional staff for salary and benefits purposes.⁹

OTHER POTENTIAL ISSUES

The language in H.R. 3590 raises additional possible concerns in light of the way that the House and Senate conduct business. For example, one potential issue with proposing different standards for employees in Member office accounts and employees paid through other House and Senate accounts arises from the use of shared staff. Although the House and Senate have different rules regarding shared staff, both chambers allow types of shared staffing arrangements that could result in an employee being both on the payroll of a Member office and another type of office.

In the Senate, 2 U.S.C. 61-1a authorizes limited sharing of staff:

Notwithstanding any other provision of law, appropriated funds are available for payment to an individual of pay from more than one position, each of which is either in the office of a Senator and the pay of which is disbursed by the Secretary of the Senate or is in another office and the pay of which is disbursed by the Secretary of the Senate out of an appropriation under the heading “Salaries, Officers, and Employees”, if the aggregate gross pay from those positions does not exceed the maximum rate specified in section 61-1(d)(2) of this title.

The Senate Handbook summarizes these laws, stating:¹⁰

An employee may be on the payroll of more than one Senator’s office or on the payroll of a Senator’s office and a leadership or administrative office, providing the aggregate pay received does not exceed the maximum annual salary for a Senator’s office (2 U.S.C. 61-1a). An employee can only be shared between offices which are funded through the appropriations, “Senators’ Official Personnel and Office Expense Account” (Senators’ personal staff), and “Salaries, Officers, and Employees”.

The House Member’s Handbook, as compiled by the Committee on House Administration, states the following about shared employees:¹¹

The term shared employee means an employee who is paid by more than one employing authority of the House of Representatives.

Two or more employing authorities of the House may employ an individual.

Such shared employees must work out of the office of an employing authority, but are not required to work in the office of each employing authority. The pay from each employing authority shall reflect the duties actually performed for each employing authority. The name, title, and pay of such an individual will appear on each employing authority's Payroll Certification. Such employees may not receive pay totaling more than the highest rate of basic pay in the Speaker's Pay Order applicable to the positions they occupy.

Employees may not be shared between a Member or Committee office and the office of an Officer of the House if the employee, in the course of duties for an Officer, has access to the financial information, payroll information, equipment account information, or information systems of either Member, Committee, or Leadership offices.

Applying the interpretation of H.R. 3590 suggested above, it is possible that certain shared staff could be covered by the provision, while other shared staff, even in the same office, would not be covered.

Because the bill does not propose a standard for determining coverage, it is potentially left to the implementing authority to establish such a standard. The implementing authority would appear to arguably have wide discretion in setting such a standard. As a result, it is not unreasonable to assume that an implementing authority could use a majority time or similar standard in making coverage determinations. In other words, shared employees would need to declare whom they spent a majority of time working for. If the staffer's declaration was the Member's official office, they could arguably be covered. On the other hand, if the majority of a staffer's time was spent on committee or leadership work, they may arguably not be covered. It is important to note that this is but one possible standard and that unless otherwise stated in the bill, it will up to the implementing authority to determine the standard.

The language of S. 1793 arguably avoids this problem as it appears to encompass all shared employees because they all receive salaries through either the CAO or Secretary of the Senate.

Another potential issue is the scope of the disbursing authority of the CAO of the House and the Secretary of the Senate. The CAO has served as the disbursing officer for the House of Representatives since 1995. The Secretary of the Senate serves as the disbursing officer for the Senate. Both of these officers are required to publish reports on disbursement.¹² Pursuant to the FY2010 legislative branch appropriations act, the Secretary and CAO are each responsible for the disbursements for two accounts included as "joint items." Additional disbursements by the Secretary include salaries and expenses of the Joint Economic Committee and Office of Congressional Accessibility Services.¹³ The CAO serves as the disbursing officer for the Joint Committee on Taxation and the Office of Attending Physician. In addition, the CAO and Secretary also have disbursing authority for a number of House and Senate revolving funds.¹⁴ Thus, it appears possible to argue that, should the language of H.R. 3590 be interpreted as suggested above, these employ-

ees would be excluded from coverage. Conversely, should the language from S. 1793 be utilized, it would appear that employees of these committees would be covered as they are paid by the CAO or Secretary of the Senate.

Finally, there is the issue of what, if any, other entities or employees of the Legislative Branch the CAO and/or Secretary of the Senate may serve as the disbursing officers. Our research indicates that although the CAO and Secretary of the Senate served as the disbursing officers for the U.S. Capitol Police (USCP) prior to 2003, the Chief of the Capitol Police currently serves as the disbursing officer for the USCP.¹⁵ Moreover, it appears that other Legislative Branch agencies such as the Architect of the Capitol and the Congressional Budget Office each have their own disbursing agents and do not use either the CAO or the Secretary of the Senate. In addition, it appears that the CAO and/or Secretary of the Senate may serve as the disbursing agent for some, but not all, congressional commissions. Thus, some employees of such commissions may be covered by the language used in S. 1793, however, none would appear to be covered by the language used in H.R. 3590.

Mr. GRASSLEY. This carve-out creates a double standard and is totally

unacceptable. This amendment goes beyond just going where my original amendment went to cover all people on Capitol Hill. The amendment I am asking consent for would also include the President, Vice President, political appointees, and senior-level staff of the executive branch. It is only fair that if this bill becomes law, these leaders should themselves be subject to the reforms that make our constituents go through the exchange.

I ask unanimous consent to set aside the pending amendment in order to offer amendment No. 3178 which is at the desk.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. GRASSLEY. Mr. President, Democratic leadership and the White House have spent months talking about accountability. With this objection, the majority will not even consider an amendment to make sure the White House and all Members employed on Capitol Hill, not just those in our personal offices, live under the same new health care system the rest of the country lives under. That sure doesn't sound like accountability to me.

There is widespread agreement that the health care system in this country has serious problems. Costs are rising at three times the rate of inflation. Many Americans are uninsured. Millions more fear losing their insurance in a weak economy or because of pre-existing conditions. Doctors are ready to close their doors over high malpractice costs and lower government reimbursements, and we do not do anything in this bill about high malpractice costs.

Something has to be done, everyone seems to agree. But tomorrow the Senate will vote on a bill that makes a bad situation worse. It is unfortunate that we are voting on a bill that a significant majority—61 percent—of Americans oppose. The American people, providers, advocacy groups as well, are simply reacting to the fact that this bill slid rapidly down the slippery slope to more and more government control of health care.

It contains the biggest expansion of Medicaid since 1965. It creates a long-term care insurance program called the CLASS Act that the CMS Actuary says runs a significant risk of being unsustainable, and one of the most significant Members of this body referred to it as a Ponzi scheme similar to what Madoff did. It imposes an unprecedented Federal mandate for coverage backed by the enforcement authority of the Internal Revenue Service. It increases the size of government by \$2.5 trillion when fully implemented. It creates dozens of new Federal bureaucracies and programs to increase the

scope of the Federal role in health care. That is a lot of power over people's lives concentrated in the Federal Government, and there are 1,697 delegations of authority to the Secretary of HHS to do things beyond authorities specifically given in this legislation.

The excesses of this bill appear willfully ignorant of what is going on in the rest of the economy outside of health care. These excesses make it far worse than doing nothing.

At this point in our Nation's history, we are facing very challenging economic times. We have seen the auto industry go into bankruptcy. We have seen banks shutter their doors. The chart behind me shows how the Federal debt has increased by \$1.4 trillion since inauguration. The chart also shows the growing amount of debt the Federal Government is taking on. The amount of increased debt added just since inauguration puts \$11,000 more of debt on each household, and that total debt now exceeds \$12 trillion for the first time in history.

At the beginning of this debate, one of the key promises of health care reform was that it would bring down health care costs. This needs to be done before health spending sinks the Federal budget and saddles taxpayers. I have a chart that illustrates the upward expenditures of health care costs by \$160 billion over the next decade, and that comes from this bill. The red area on this chart is the net additional Federal health spending according to not this Senator but the Congressional Budget Office.

Americans have rightly lost faith when, in the face of the current economic crisis, Congress thinks this \$2.5 trillion restructuring of the health care system is a good idea. From rationing care to infringing on the doctor-patient relationship, this government-run system will guarantee U.S. taxpayers a staggering tax burden for generations to come.

When the debate began last year, interested legislators of both parties set forth benchmarks that were at the time no-brainers and still are. But this bill does not conform. Health care reform should lower the cost of premiums. It should reduce the deficit. Now, this bill does over the 10-year window, but if you look at when the program really starts, 4 years from now, and look ahead 10 years at that time, you will find it does not. It should bend the cost curve of health care the right way, but it does not do that. The Reid bill does not do any of these things we set out to do at the beginning of the debate.

As we end this debate, I urge my colleagues to listen to the American people. The Reid bill is the wrong direction.

Mr. President, with widespread agreement that our health care system has serious problems, why do we have a partisan debate?

There is a column from the *Financial Times* by a commentator, Clive Crook, that sheds some light on the cause of the partisanship.

Mr. Crook, a Brit, is sympathetic to the goals and methods of my friends on the other side. But, as one who knows a system of the universal coverage our friends on the other side seek, he is sober about the consequences.

I ask unanimous consent that a copy of Mr. Crook's article entitled "The Honest Case for a Bungled Health Care Reform," be printed in the *RECORD*.

There being no objection, the material was ordered to be printed in the *RECORD*, as follows:

[From the *Financial Times*, Dec. 20, 2009]

THE HONEST CASE FOR A BUNGLED
HEALTHCARE REFORM
(By Clive Crook)

The US system of government has a lot in its favour, in my view, but if you wanted to argue the opposite, the fiasco of healthcare reform has it all.

The measure being fought over in the Senate—if a bill gets passed, ordeal by House-Senate conference comes next—is detested with equal passion by left and right. A majority of the public is now opposed as well. Even its supporters do not like it all that much. Yet if the system fails to spit this thing up for the president's signature, the country will be deemed ungovernable and the Obama administration will be pronounced dead. Expect the rending of garments either way.

It does not matter that conservatives oppose this reform. Of course they do. Conservatives are unmoved by the plight of the uninsured, want to block this administration's domestic initiatives regardless, and are incapable of uniting behind an alternative proposal. They have nothing to offer on the issue.

It does not matter that the loony left of the Democratic party opposes this reform either. In fact, that is a plus. Progressives who want to kill the most far-reaching US social reform in decades because it would send more customers, public subsidy in hand, to private insurance companies are as stone-hearted on this matter—and as far from understanding the concerns of most voters—as their hard-right enemies. Their opposition is an endorsement.

What matters is the failure to rally the country behind an initiative that, at the outset, voters strongly supported. A telling instance of the administration's ineffectiveness as a spokesman for its own project came just last week. Howard Dean, speaking for the progressive wing of the Democratic party, said the reform would do more harm than good—that this was the policy the insurance companies had dreamed of. White House spokesmen rushed to explain that, on the contrary, the insurance companies hate the bill.

Think about that. At the beginning Barack Obama promised people that if they liked their existing insurance arrangements—which are mostly private, of course—nothing would change. This entire effort is based on preserving, by popular demand, a mostly private model of insurance. And here is the administration endorsing the progressives' view that private insurers are evil, and citing the companies' opposition to the reform as an argument in its favour.

The White House cannot have it both ways. If progressives are right about the wicked-

ness of private insurance, they are right that the whole reform is misconceived. The administration cannot appease leftist opinion and also make the strongest possible case for this reform to the middle of the electorate. Since it cannot appease leftist opinion in any case, why even try? Make a virtue of opposition from that quarter. Mr Obama's reluctance to cross that line has hobbled his administration from the start.

Be that as it may, the healthcare bill in its current form is a mess—and an unpopular mess to boot. Popular fears that the bill will drive up insurance premiums and add to public borrowing are probably justified. The measure is timid about changing incentives to promote efficiency: it proposes lots of experiments, but little compulsion.

Adverse selection is likely to be a bigger problem than the reformers say: new rules would stop insurance companies denying coverage to the sick, and the quid pro quo of mandatory insurance may be insufficient to offset this. If the insurers' risk pools deteriorate, premiums will rise. Deep cuts in Medicare, the public insurance programme for the elderly, are needed to balance the books, but are unlikely to materialise in full. Higher taxes as well as higher premiums are the likely result of this reform.

Would it therefore be better to abandon the effort altogether and start again? One can think of simpler, better blueprints, but the politics that led the country here would still be the same—and so would the economic constraints. It is delusional to suppose that you can significantly widen access to healthcare at no net public cost. You cannot both transform a system and leave its basic structure unaltered. Trying to squirm around these unavoidable realities has brought the effort to its current pass. Why expect things to be different next time?

In the end, I think, everything depends on the weight one attaches to achieving security of coverage as quickly as possible. In my view, this is the overriding consideration. Abandoning the effort now might postpone that goal for another decade or more. The country should regard this as unacceptable. Once the reform is law, though, the real work begins. Getting a grip on costs will be even more urgent than it is already—especially when you recall the broader fiscal calamity that awaits the country during the next decade.

The honest case for reform along the lines of the Senate bill is not that it fixes US healthcare; still less that, as the White House blithely maintains, it alleviates the country's fiscal distress. The truth is, it will create more problems than it solves. But the one big thing it gets right—the assurance of affordable health insurance for all Americans—is of surpassing importance.

Enacting this reform is not the end of the healthcare argument, but the beginning. If it does pass, it may well be looked back on as a mistake once its financial implications sink in. Yet the principle of universal coverage will have been accepted, and with luck there will be no going back. The price will be high, but is worth it.

Mr. GRASSLEY. I am going to try and break through the partisan wall and connect with my friends on the other side.

Costs are rising at three times the rate of inflation.

Many Americans are uninsured, millions more fear losing their insurance in a weak economy or because of pre-existing conditions.

Doctors are ready to close their doors over high malpractice costs and low government reimbursement rates.

Something has to be done. Everyone agrees on that much.

But tomorrow, the Senate will vote on a bill that makes a bad situation worse. Mr. Crook describes the state of play well:

[t]he health care bill in its current state is a mess—and an unpopular mess to boot.

It is unfortunate that we are voting on a bill that a significant majority—61 percent—of Americans oppose.

The American people, providers, and advocacy groups are simply reacting to the fact that this bill slid rapidly down the slippery slope to more and more government control of health care.

Mr. Crook states:

Popular fears that the bill will drive up insurance premiums and add to public borrowing are probably justified. The measure is timid about changing incentives to promote efficiency: it proposes lots of experiments, but little compulsion.

All through this process, it is as if Republicans and Democrats have been living in parallel universes. Republicans have focused on the elements of the policy and asked tough questions about the cost of the change.

Mr. Clive captures that sobering reality:

Adverse selection is likely to be a bigger problem than reformers say: new rules would stop insurance companies denying coverage to the sick, and the quid pro quo of mandatory insurance may be insufficient to offset this. If the insurers' risk pools deteriorate, premiums will rise. . . . Higher taxes as well as higher premiums are the likely result of this reform.

Members on this side of the aisle, at each stage of the process, have focused on this reality. While recognizing the worthy goal of expanding coverage, we have been concerned about the effect on the currently insured.

This bill contains the biggest expansion of Medicaid since it was created in 1965.

It cuts Medicare by a staggering half a trillion dollars over the next decade.

It creates a long-term care insurance program called the CLASS Act that the CMS Actuary says runs a significant risk of being unsustainable.

It imposes an unprecedented Federal mandate for coverage backed by the enforcement authority of the Internal Revenue Service.

It increases the size of the government by \$2.5 trillion when fully implemented.

It creates dozens of new Federal bureaucracies and programs to increase the scope of the Federal role in health care.

That is a lot of power over people's lives concentrated in the Federal Government.

And the excesses of this bill appear willfully ignorant of what is going on in the rest of the economy outside of health care.

The cost of these excesses make this bill far worse than doing nothing.

This summer, official scorekeepers fleshed out the size of this cost of achieving the other side's noble, but costly goal of expanded coverage. As on who agrees with the goal of universal coverage, Mr. Crook acknowledges it:

It is delusional to suppose that you can significantly widen access to healthcare at no net public cost. You cannot both transform a system and leave its basic structure unaltered. Trying to squirm around these unavoidable realities has brought the effort to its current pass.

And yet, despite these cold hard facts, our Democratic friends continue to quest for the Holy Grail of expanded coverage. Mr. Crook captures that sentiment:

In the end, I think, everything depends on the weight one attaches to achieving security of coverage as quickly as possible. In my view, this is the overriding consideration. Abandoning the effort now might postpone that goal for another decade or more. The country should regard this as unacceptable.

Does anyone doubt this is where our Members on the other side are coming from? Some are explicit about it, like my friend, the majority whip. I recognize that transparency. But to them the price—for everyone else, the insured, businesses, Federal and State taxpayers, and Medicare patients—is secondary.

Go back and look at the many pages in the RECORD and you will see two themes prove my point. One is the Democratic theme. Most of the debate from those on the other side has been about what they want this bill to do. They want it to expand the role of the Federal Government in health care. Hence, the prideful references to past efforts, successful and unsuccessful, in that regard. They want it to solve all problems the uninsured face. They recite case after case of uninsured and underinsured. The stories they tell are compelling. On our side, we see the point the other side is making.

Go look at all those pages of debate again. You will see another theme. It is the Republican theme. That theme is not about what we want the bill to do for the uninsured. It is about understanding and explaining what the costs and benefits of this bill are to all Americans: Insured and uninsured, young, middle-aged, and elderly, suburban, and rural. In this regard, Republicans reflect where the vast majority of Americans are right now.

Mr. Crook, again, firmly where our friends on the other side are, captures the polarity of the debate:

Once the reform is law . . . the real work begins. Getting a grip on costs will be even more urgent than it is already—especially when you recall the broader fiscal calamity that awaits the country during the next decade.

Mr. Crook is correct. At this point in our Nation's history, we are a Nation facing very challenging economic

times. We have seen the auto industry go into bankruptcy. We have seen banks shutter their doors.

The Federal debt has increased by \$1.4 trillion since inauguration. This chart shows the growing amount of debt that the Federal Government is taking on. Just the amount of increased debt added just since the inauguration is \$11,535 per household.

It now exceeds \$12 trillion for the first time in history.

In these perilous times, Mr. Crook notes the public is extremely sensitive to the fiscal consequences of the bill before the Senate. And that is where Republicans have focused all along. Mr. Crook describes the tension between the goal he shares with our Democratic Members and the public's focus on the questions Republicans have asked for almost a year now. On one side of that tension are the answers to Republican inquiries:

The honest case for reform along the lines of the Senate bill is not that it fixes U.S. healthcare; still less that, as the White House blithely maintains, it alleviates the country's fiscal distress. The truth is, it will create more problems than it solves.

On the other side of that tension is the goal Democratic Members seek. Their goal of trying to achieve "universal coverage" overrides all other considerations. As Crook puts it "of surpassing importance."

And, if the other side prevails, what does it mean for the future. From Mr. Crook, who shares my Democratic friends' goals, I quote:

Enacting this reform is not the end of the healthcare argument, but the beginning. If it does pass, it may well be looked back on as a mistake once its financial implications sink in. Yet the principle of universal coverage will have been accepted, and with luck there will be no going back. The price will be high, but is it worth it?

What is that price, Mr. President? To a certain extent, what we do know is that it is high for everyone, but the uninsured population. To the extent we don't and cannot know, it is likely to be higher.

From rationing care to infringing on the doctor-patient relationship, this government-run system will guarantee U.S. taxpayers a staggering tax burden for generations to come.

When the debate began last year, interested legislators of both parties set forth benchmarks that were no-brainers. Health care reform should lower the cost of premiums. It should reduce the deficit. It should bend the growth curve in health care the right way.

How does the Reid bill measure up?

CBO tells us premiums rise.

What about health spending? As this chart here illustrates, this bill bends the Federal spending curve further upward by \$160 billion over the next decade. The red area on this chart is that net additional Federal health spending according to the Congressional Budget Office.

How about deficit reduction? Americans have rightly lost faith when in the face of the current economic crisis, Congress thinks this \$2.5 trillion restructuring of the health care system is a good idea.

The Reid bill doesn't measure up on any of those things.

The unfortunate state of this partisan floor debate goes to the tension Mr. Crook identified:

I was raised by FDR Democrats. From a lifetime of public service, I know a little bit about my Democratic friends' political DNA. A big part of that political DNA is one principle. It is this. Expanding health insurance trumps everything else.

I respect and understand that view.

Where we, on our side, differ, is whether it is an absolute or relative principle. Does the principle of universal coverage trump everything else? Does it trump cost containment? Does it trump the tax burden it brings with higher Federal and State taxes?

Does it trump the financial burden it places on small businesses and other employers? Does it trump the financial burden related premium cost increases will bring? Does it trump the negative impact it will have on the Medicare Program that our seniors count on?

For those of us, on this side, expanding coverage is a worthy goal. But it is not an absolute goal. We prefer to expand coverage through better access and affordability. But that goal of expanded coverage must be balanced with other goals.

We view it as relative to those other goals. It is relative to whether the related Federal and State tax burden is bearable. It is relative to realistic cost containment reforms. It is relative to whether the cost burden on employers, especially small businesses, is bearable. It is relative to whether the impact on Medicare services and solvency is bearable.

The American people have tuned into this debate. They don't like the partisanship. They agree with all of us that reform is needed. They have been telling us that expanding coverage is important, but not absolute.

I urge the other side to make the honest case for reform to the American people. That will lead to a bipartisan response, process, and product. Americans don't want bungled health care reform.

I yield the floor.

THE PRESIDING OFFICER. The Senator from New Hampshire.

Mr. GREGG. Mr. President, I want to associate myself with the comments of the Senator from Iowa. In fact, I would like to incorporate them by reference in my comments because they were so on point on the issue of substance as to what this bill does not do and what it does do. In both instances, he is absolutely right. The bill does not accomplish what we set out to do, which was cover all Americans, which was to bend

health care costs down, which was to let you keep your insurance if you had it and not have your premiums go up. It does just the opposite.

It is a \$2.3 trillion increase in health care spending—\$2.3 trillion. That is how much it grows the government. Health care costs go up by over \$230 billion in the first 10 years. We know premiums are going up.

Now we have this interesting issue involving Medicare. We have heard a lot of talk from the other side of the aisle about how Medicare is not being cut, and if it is being cut, it is just being used to help a new entitlement, and therefore it should be counted as part of the basic effort to bring fiscal responsibility to this bill. Well, that is hokum, just pure unadulterated hokum. Medicare is being cut by \$500 billion the next 10 years, \$1 trillion over the first 10 years of full implementation, and \$3 trillion over the first 20 years. And then the money is being spent not to make Medicare more solvent, not to make Medicare stronger so it does not have a huge unfunded liability, it is being spent to create this brandnew entitlement—an entitlement that is massively going to expand the size of government by \$2.3 trillion.

The American people understand this does not work. Common sense kicks in with the American people. They know—they know—from common sense that you cannot possibly cut Medicare by \$3 trillion, spend it on a new entitlement, and have fiscal responsibility around here and claim Medicare is better off for it. And they do not have to know it through common sense; all they have to do now is listen to the CBO, which has now written us a letter. Let me quote from this letter because it is a devastating letter. I just wish this bill was going to be on the floor long enough for it to actually be open to public view and have some sunshine on it. It is being rushed through here just before Christmas so nobody can see what is actually in it. But here is what CBO says:

The key point is that the savings to the HI trust fund—

That is the Medicare trust fund—under the [bill]—

They use the acronym for it—would be received by the government only once, so they cannot be set aside to pay for future Medicare spending and, at the same time, pay for current spending on other parts of the legislation or on other programs.

Exactly what this bill does: It spends the Medicare money on other programs.

They go on to say—and this is CBO speaking, not me:

To describe the full amount of the [Medicare] trust fund—

Again, they use “HI trust fund”—savings as both improving the government's ability to pay future Medicare benefits and financing new spending outside of Medicare would essentially double-count—

I repeat: “double count”—

a large share of those savings and thus overstate the improvement in the government's fiscal position.

The simple fact is, what is happening here is a scam, a pure and simple scam on the American people and especially on the seniors in this country because Medicare is being cut by billions of dollars in order to create a new entitlement, and it is going to have a massively negative effect on the fiscal health of this Nation because we know that new entitlement will not be fully funded and we know Medicare has \$35 trillion of unfunded liability out there.

If you are going to cut Medicare by \$3 trillion, as the other side of the aisle is proposing, if you are going to eliminate Medicare Advantage for a large number of seniors—except those who live in southern Florida—then that money ought to be used to reduce the debt so that the Medicare system becomes more solvent. It is that simple in the long run. It is not being done here. CBO has pulled the curtain back from this game and made it very clear that it is not going to be done. Of course, nobody is going to learn this because they are going to pass this bill through here before anybody can figure that out and even listen to CBO.

It is just an outrage the way this bill was put together. We all know that. Dark of night, back rooms, deals everywhere, only a few people in the room; those people who really drafted the bill, very small crowd. Nobody else was allowed in. No cameras, no information about what was going on. And then you would bring in a Senator here and a Senator there and say: What do you need from me to get your vote, and something would appear in the bill, I guess. Then the bill arrived here.

It is not unusual around here to have earmarks in bills. If they were within the budget and the budget was reasonable, I would even ask for earmarks. But this goes way beyond the concept of earmarks—this bill. This bill fundamentally changes policy—that has never happened around here—for one part of the country versus another part of the country. In other words, all of America—all American seniors—will have to live by massive cuts in Medicare Advantage. That is a pretty good health insurance program for a lot of seniors; I think there are 11 million seniors on that program. All of America has to live by that policy except for three counties in southern Florida. All of America has to live by an insurance situation where insurance companies are taxed at a certain rate, except insurance companies in Nebraska. All of America has to live by Medicaid reimbursement rates, which are going to cost the States billions of dollars—New Hampshire, \$120 million over 10 years—except for Vermont and Massachusetts. And then there is a special exemption in here for New York and a couple of

other States—Louisiana, \$300 million. That is a total corruption of the concept of policy. Policy in America is supposed to cover everyone. When the Federal Government acts, it is supposed to be a policy that affects everyone equally. You are not supposed to have little cadres of exceptions for those policies.

This bill has been called historic—historic—by my colleagues on the other side of the aisle. Well, the most historic thing about this bill is the fundamental damage it has done to the concept of open, thorough, and public debate that was at the heart of the thought process of Adams and Madison, our Founding Fathers, when they created the checks and balances system, with the Senate at the center. The Senate was supposed to be the place where bills come to the floor, they are open to debate, there are amendments, and you have a process where things get aired and there is sunshine. No sunshine here—no, not at all. This is not majority rule, as conceived by our Founding Fathers in Philadelphia. This is closer to the single-party state system we see in Europe—or have seen in Europe. The minority is ignored, and there are no checks in this process on the autocratic rule of the majority. The irony, of course, is that the bill never went through the public's consideration, never went through committee, and was drafted behind closed doors and has been on the floor for less than 72 hours. As a result, we are delivered a health care bill that has been corrupted by special interests, especially on the issue of policy, that is extraordinarily expensive and has a massive expansion in the Federal bureaucracy, to which, if you applied the word "reform," you would have to call Bernie Madoff "honest." The terms just simply do not apply here.

Unfortunately, this bill in its present form, I believe, will lead to fundamental harm to the fiscal health of this Nation. There is no question in my mind but that if we load \$2.3 trillion of cost onto our government, expand our government in this manner, our children are going to be passed a nation where they have less opportunity than our generation had. Further, I do not think it is going to help the Nation's people, our people relative to their health care. I think it will lead to a significant contraction of the quality of health care, especially for seniors but for all Americans, as we lose the innovation, the energy for innovation, and the resources for innovation. As a result, this bill, in my opinion, should be sent back to the drawing boards and should be reconsidered.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. KAUFMAN). The Senator from Texas.

Mr. CORNYN. Mr. President, over the last few days, as we have dug into this bill and the process by which it was

written behind closed doors, we have discovered the bill is chock-full of sweetheart deals.

When Americans voted to change Washington last year, they did not think it would be politics as usual here, but unfortunately it has sunk to a whole new level. It is painful for me to read the editorials in hometown newspapers back in Texas and elsewhere around the country to see what editorial opinion and other opinion leaders are saying about the process by which this bill was written, but let me read a couple of lines from the Fort Worth Star-Telegram:

The tawdry use of earmarks to bury the doubts of recalcitrant moderate Democrats was a cynical display of ends-justifies-the-means horse-trading that President Barack Obama campaigned against as a Senator and a candidate.

This was an administration that was elected on the campaign slogan: "Change You Can Believe In."

But when David Axelrod, one of the masterminds of the campaign, one of the advisers to the President, was asked about that, he said:

Well, this is just the way it is. This is the way Washington works.

I, for one, want to stand up and say this is not the way it should work. I know Presidents campaign for office saying they are going to change Washington, but the truth is the hardest fight is to keep Washington from changing you. Unfortunately, it seems as though that is what has happened here.

Rather than listening to the American people, the creators of this health care bill started with the special interests first. That is where the meetings behind closed doors started—with the pharmaceutical industry, to cut a deal with them; with the insurance industry, to cut a deal with them. The insurance industry will get \$476 billion worth of tax credits from this bill alone, and the hospital industry, and the list goes on and on.

Colleagues will stand up and tout the endorsement of organizations such as AARP that has backed nearly $\frac{1}{2}$ trillion in cuts out of Medicare because, as it turns out, they are in the insurance business and they can sell more Medigap policies when they cut Medicare Advantage, as this bill does.

In order to get the 60 votes for cloture on the motion to proceed, we didn't hear high-minded and idealistic debates about what is the right policy for this country when it comes to reforming our health care system. If this bill could have passed or mustered 60 votes because it was such great policy and the American people were embracing it, you wouldn't need to make all the sweetheart deals that were made behind closed doors to induce recalcitrant Senators to vote for cloture, not because they think it is the right policy but because their State got a special deal.

We know well about what happened in Louisiana and now in Nebraska, but of course there were special deals for Vermont that included \$600 million in the managers' package. We know that in California, the so-called "Botax" has been replaced now by another tax on tanning beds at the insistence of one of the businesses named Allergan out in California which led the lobbying campaign to defeat the cosmetic surgery tax.

We have heard this is all about keeping insurance companies honest, but the fact is there were special deals here for insurance companies in Nebraska—what has been coined the "Omaha Prime Cuts," the carve-out from new fees for Mutual of Omaha and other insurance companies doing business in Nebraska that no other insurance company in the Nation is going to benefit from.

Then there is the so-called "Gator Aid" special deal for insurance companies in Florida.

There is a \$100 million hospital deal in Connecticut—something called "U Con."

And, of course, there were deals for Montana that were slipped in the bill. Although, you know what, no one actually had the courage to mention the name of the State. You had to start to dig into it, like the Louisiana deal. At least the Senator from Nebraska was brazen enough to actually have Nebraska listed by name. The rest of them you have to dig out by trying to figure out: Who benefits from this deal and who doesn't?

I want to ask: What about the other States? My State, under this unfunded mandate in this legislation, will have to pay the State taxpayers \$21 billion in unfunded Medicaid liabilities over the next 10 years. We didn't make a sweetheart deal to vote for bad policy because my State could get some extra money, because I think that is unprincipled. I wouldn't do it. But what about the other States that voted for the bill without getting the sweetheart money, such as Arkansas, which faces an unfunded Medicaid mandate of \$335 million; Colorado, \$624 million; California, \$3.5 billion—a State that is already nearly bankrupt. This is going to make their situation enormously worse, as Governor Schwarzenegger has acknowledged.

I am not saying other States should somehow get the sweetheart deals that were negotiated for these other votes, but I am saying this entire bill is a bad deal and we need to kill it and start over, strip out all the earmarks, and bring the kind of transparency the President campaigned on and that I think the American people have a right to expect.

These sweetheart deals are egregious in and of themselves. What is worse—and I have been on the telephone talking to constituents back in Texas—

there are some people who paint with such a broad brush, they say, Well, we think all of you are corrupt, because this verifies some of the most cynical suspicions that people have about government. I, for one, resent it. We have many honest and honorable people who serve in public life, and this taints us all with a broad brush and, simply stated, makes me furious. I resent it. I resent those who brought us to this position, because I think it sullies the reputation of the Senate.

In a moment I am going to offer a point of order, but let me first note that one of Senator REID's first acts as majority leader was to pass the Honest Leadership and Open Government Act. Let me tell my colleagues the name of that again. It is called the Honest Leadership and Open Government Act.

In 2007, President Obama, then Senator, said:

To earn back the trust to show people that we are working for them and looking out for their interests, we have to start acting like it.

Unfortunately, for the American people, Washington has not yet started to act like it.

This landmark ethics reform legislation required Senators to publicly disclose earmarks and who requested them. Senator GRASSLEY and I have both made parliamentary inquiries about whether this provision has been complied with, which is now contained in rule LXIV of the Senate Standing Rules, and we found that the majority leader has so far not complied with these public disclosure rules that he himself championed. Since my friends on the other side of the aisle don't seem to care a lot about this, we have to insist that this provision be complied with. In a moment I will raise a point of order about this violation of the Senate rules. We need to force the Members of this body to be honest about who has required special favors and earmarks, tax treatments and benefits in this bill.

I have a parliamentary inquiry.

According to rule XLIV, paragraph 4(a) of the Standing Rules of the Senate states:

If during the consideration of a bill or joint resolution, a Senator proposes an amendment containing a congressionally directed spending item, limited tax benefit, or limited tariff benefit which was not included in the bill or joint resolution as placed on the calendar or as reported by any committee, in a committee report on such bill or joint resolution, or a committee report of the Senate on a companion measure, then as soon as practicable, the Senator shall ensure that a list of such items (and the name of any Senator who submitted a request to the Senate for each respective item included in the list) is printed in the CONGRESSIONAL RECORD.

I would simply inquire of the Chair: Is the Chair aware whether this list of congressionally directed spending items and their Senate sponsors has been printed in the CONGRESSIONAL RECORD?

The PRESIDING OFFICER. The Chair is not aware if such a disclosure has been made.

Mr. CORNYN. Mr. President, under those circumstances, I raise a point of order that the amendment is not in order since it violates the provisions of Senate rule XLIV, paragraph 4(a).

The PRESIDING OFFICER. Paragraph 4(a) of rule XLIV requires that the Senator who proposes an amendment containing any congressionally directed spending item ensure as soon as practicable that the list of such items be printed in the CONGRESSIONAL RECORD. The provision is not enforceable and no point of order lies.

Mr. CORNYN. Mr. President, I appeal the ruling of the Chair and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I move to table the appeal of the ruling of the Chair and I ask that the vote occur upon the expiration of all postcloture time.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. BAUCUS. I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be.

The yeas and nays are ordered.

The Senator from Missouri is recognized.

Mr. BOND. Mr. President, last week I had a little fun with an old holiday classic: Clemente Clark Moore's "The Night Before Christmas" which you can still find on YouTube, by the way. While I meant this parody to bring some much needed levity to the process, the points I made are very serious. For the American people, there is nothing more serious than the reform bill we are considering today.

The majority's so-called reform package will restructure one-sixth of our struggling economy, drive health care costs higher, force millions off their current plan, put health care decisions in the hands of bureaucrats, cut seniors' Medicare, raise taxes, and hurt small businesses and cost jobs.

There is nothing funny about this health care bill. Americans faced with rising premiums asked for bipartisan reform to make health care costs affordable. But the Democratic bill fails to give the American people what they want, which is why Senator REID has written bill after bill behind closed doors with no Republicans. The majority party doesn't want Americans to know they are getting a lump of coal for Christmas until it is too late.

But Leader REID has outdone himself on the latest deal he cut. His is Chi-

cago-style politics at its worst: a 2,700-page backroom deal written behind closed doors, full of political payoffs, vampire votes in the dead of night, all to pass a health care bill before Christmas that the American people don't want, that will increase health care costs, raise taxes, and cut Medicare for seniors, operating under an arbitrary deadline which seems designed to minimize transparency, understanding, and public involvement.

But I want the American people to know what they are getting from the majority this holiday season. I don't want my good friend from Nevada to be known as Hurry-up-and-Reid, so let's talk about what is in this bill.

Under the majority's latest backroom deal, Americans are getting more taxes. This deal imposes about \$500 billion in fees and taxes on individuals, families, and businesses.

Under the majority's latest backroom deal, Americans who own small businesses—the backbone of our economy—are getting more taxes and costly regulation. For small businesses who employ a large number of those currently uninsured, this bill does nothing to help make insurance more affordable or accessible.

The bill contains a costly employer mandate which destroys job creation opportunities for employers. It doesn't take a rocket scientist or an economist to figure out that the multiple penalties small businesses will pay for full-time workers will result in these companies forcing workers from full time to part time and discouraging new hiring. Companies are going to have to think twice before hiring new full-time workers if it is going to cost them a pretty penny, at a time when the companies are trying to pinch pennies.

There is also a paperwork mandate which is a new administrative burden on small business which, according to the National Federation of Independent Business, will impose a direct \$17 billion burden on businesses.

Unfortunately for small businesses, unlike larger businesses or unions, the news gets even worse. Unlike large businesses, most small businesses can only find and purchase health insurance in the private insurance marketplace. That means to insure their employees, small businesses have to go to the big insurance companies on which the Reid bill is placing hefty new fees. Most folks don't have a problem with putting more fees on insurance companies. It seems to be politically popular, but it is economics 101 that these insurance companies are not going to suck it up and swallow all of these new fees themselves. CBO has stated so explicitly. Instead, they will pass the fees on to small businesses that will have no choice but to purchase their services.

One of the gimmicks the majority is using to hide the cost of the bill is a

weak tax credit that is supposed to help small businesses in purchasing health insurance.

The hitch is that small businesses will only receive the full tax benefits if they have less than 10 employees. If they hire that 11th employee, the tax credit is reduced. At 25 employees the tax credit is no longer available.

In addition, a small business can only get full credit if it pays its employees an average of \$25,000 a year or less. So no salary increase, no wage increases.

In other words, in what is already a horrible economic situation, where businesses are shuttering their doors and workers are being laid off, we are actually going to punish small businesses for hiring new employees and paying workers more.

This tax credit is also a case of bait and switch. If your small business happens to fit in the narrow qualifications, it is only temporary—after 6 years the credit goes away—but the mandates and burdens on small businesses stay.

That is why the National Federation of Independent Businesses, in their strong opposition to the majority's plan, stated that it:

will not only fail to reduce and control the constantly climbing healthcare costs small business owners face, but it will result in new and greater costs on their businesses. Reform that was supposed to be all about small business has turned out to be more about big business and other late-night dealmakers, all at the expense of our nation's job creators.

That is not the kind of reform small businesses can afford.

Under the majority's latest backroom deal, Americans are getting hundreds of millions of dollars in cuts to critical health care programs, such as \$118 billion in cuts to Medicare Advantage, as well as cuts to hospitals, nursing homes, home health agencies, and hospices.

When government forced through massive cuts to home health in the late 1990s, the unintended consequences were costly and tragic in Missouri. A significant number of agencies closed, forcing patients into more expensive care.

One example is in one county in Missouri, the county's only home health agency closed. The provider had 40 patients they served in homes at a cost of \$400,000 a year. When those patients were cut off, 30 were forced into hospitals or nursing homes. The cost skyrocketed for these patients to a staggering \$1.4 million on the government tab or a \$1 million larger hit to taxpayers. We don't even know what happened to the other 10 patients who lost this critical care.

This is not the kind of reform Americans can afford. Under the majority's latest backroom deal, States are also getting hit hard. For example, the majority's big plan is to expand Medicaid, but their big plan for paying for it is to put the burden on the States; that is,

unless you were able to cut a backroom deal like Nebraska, which leaves other States holding the bag for their costs.

That brings me to my next point. Under the majority's latest backroom deal, Americans are forced to fund a number of political payoffs. There are such a large number of political payoffs, which is why this bill is starting to be dubbed "cash for cloture."

There is a carve-out for the insurance industry in Michigan and Nebraska. There is an extra \$300 million in Medicaid funding for Louisiana, now known as the "Louisiana purchase." What was the mysterious \$100 million for a "health care facility" turns out to be a hospital in Connecticut.

Sadly, this isn't even the entire list of sweetheart deals in REID's latest backroom deal. That is not the kind of reform Americans want.

With Chicago politics and backroom deals such as this, it is no surprise that poll after poll makes clear the American people are saying no to the Democrats' proposals.

The latest poll released by Quinnipiac University found that American voters "mostly disapprove" of the plan—53 to 36 percent.

A recent Washington Post/ABC News poll, detailed in a Post article, found the American public generally fearful that a revamped system would bring higher costs while worsening the quality of their care.

The American public is absolutely right. Americans don't want this bill. In the classic tale called "The Christmas Carol," Scrooge is given the opportunity to see the ghosts of Christmas past, present, and future. While the Democrats are trying to paint the GOP as "Scrooge," they would do well to look at what the Christmas future would look like if their bill were to pass.

We don't want to wake up next Christmas and have Americans paying more for health care or being unable to get it or losing their jobs. But under the majority's latest backroom deal, that is the future.

Next Christmas, we don't want to see small businesses that still cannot afford to offer health insurance to employees or, worse, small businesses struggling to keep their doors open because of the costly new burdens in this bill. Under the majority's latest backroom deal, that is the future. A year from now we don't want to hear that seniors have lost access to services and care. Unfortunately, that is the Christmas future we face if the bill passes. Christmas future—several years from now—could look even worse.

That is why in my "The Night Before Christmas" parody it was not funny as much as it was scary and true when I said:

But I could not catch the holiday spirit myself; how far away from common sense we've been led, our kids and our grandkids have their futures to dread.

In the last year, my colleagues on this side of the aisle watched with dismay as the wheels have come off Federal spending; a trillion dollars of taxpayer money here and a trillion dollars there. Got a problem? Throw money at it. Will historians look back and say the 111th Congress is where the decline of American economic power began in earnest? I don't want that on my watch. We can reform health care without spending trillions of our children's and grandchildren's money.

If the majority were to bring up a bill that made health insurance more affordable for small business owners to purchase for their employees, that eliminated frivolous lawsuits, that emphasized wellness and prevention programs, they could go a long way to solving the problems of the uninsured and underinsured, and they could probably get 80 or 90 truly bipartisan votes. Instead, what they want, apparently, is to take over health care, at a tremendous cost to individuals, families, and businesses, and to increase the dependency on the Federal Government. That is not a Christmas present I want, and I don't want to give it to the American people.

I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. ENZI. I thank the Senator from Missouri for his comments. He has been chairman of the Small Business Committee. Small business plays a huge role, the biggest role, in the economy of the United States.

We could have, and we should have, spent the last 4 weeks talking about what needed to be done with small business. It is a big issue and it is important. I appreciate the emphasis the Senator from Missouri has put on it through the years.

I want to talk about the whole bill today, because a quote I ran into was that "absolute power corrupts—absolutely."

The Democrats have absolute power right now. Under the biggest requirement for votes, it only takes 60 in the Senate. The Democrats have 60 votes. In the House, they have a clear majority of the votes, and that is all that is required to pass a bill there. They are under the impression that they won the election, so they get to write the bills. Never before has that happened on a major piece of legislation.

Everyone in this country should be upset when the majority refers to bills like ending slavery and civil rights and Medicare and welfare reform and paint the Republicans as the opposition. Substantial numbers on both sides of the aisle made those bills possible. I am pretty sure people remember that it was Lincoln, a Republican, who led the fight to abolish slavery. Leader Mansfield gives Everett Dirksen, a Republican from Illinois, credit for the leadership that made the civil rights bill

possible. In every instance, until now, Republicans have had a leadership role and both sides have substantially participated in making and voting for those laws. In politics, that is how it has to work for our country to be successful.

Only one party, and especially one person, "gains" from this so-called health care reform bill. The President will be able to show how he was able to accomplish something against all odds. Why against all odds? Because the Democrats of the Senate wrote off the 40 votes of the Republicans. That is right, we were written off from the start. Oh, yes, we were allowed to participate to see if we couldn't be persuaded to take what the Democrats wanted to write and foist on America. Anything short of buying the whole Democratic plan and we could be and would be thrown overboard because our votes aren't needed. We were thrown overboard with the excuse of phony time deadlines, when it was needing to do just the Democratic ideas.

Senator Kennedy and I were able to work through an incredible number of bills because we recognized that both sides had good ideas and both sides had bad ideas. The trick was to take as many of the good ideas as possible and have the courage to tell some on both sides that their idea wasn't ready for prime time. With evenhandedness and both leaders promoting the surviving ideas, many of the bills were unanimous on both ends of the building. Were there flaws in some of the bills? Yes. No bill is perfect. On the simplest solutions, nobody, particularly those who have never been involved in that business or that area, can comprehend all of the unintended consequences. But when it is both parties acting in concert, when problems come up, solutions are sought. When bills are done by one party—and no all-encompassing bill has been done this way ever before—when the bills are done by one party, those inevitable flaws result in justified finger pointing.

You can't change such a basic part of the economy—something that affects every single person—by ignoring many who have experience in the business and in the area and not expect major flaws. The American people even recognize the flaws—already. Of course, everybody has some knowledge of health care, since it affects us all. When those flaws develop, and they will, in an avalanche, everybody will point to one party, the Democratic party, and say why did you have to prove your power? Why didn't you work to get it right? Why did you have to polarize the issue to show you were the only ones concerned about people?

Of course, the Republicans will be compelled to pull out the proof that we warned about the flaws but were ignored, because the Democrats are focused on proving that they won the

election. Normally, there is plenty of blame to go around, but not on this one.

The Republicans were thrown overboard. That only left the 60 votes needed to pass the bill. Well, you cannot get 60 people to agree on 100 percent of anything. You could not get 60 people to agree on a place to eat dinner. But all 60 had to agree. That is where you have to move away from legislating and into dealmaking. That is when you have to start playing games like "Let's Make a Deal" or "The Price is Right." I don't want to downplay how masterful the leader was. Everyone has to be in awe of his ability to give much to a few and none to many and get 100 percent to stay on what they can see from the polls is a sinking ship. How can a person discriminate between Members, between States? Usually, we do earmarks in appropriations bills. Now we are starting to do them in policy bills. Why? To buy votes. The leader is buying votes with taxpayer money for things the majority of the taxpayers will never benefit from.

I don't have time to go into the way the groups have made hidden deals for this bill, such as the American Medical Association and big pharmaceuticals.

I don't have time to talk about how taxes will go up and premiums will be up. As an accountant in the Senate, you are going to be shocked by the numbers—but not until it is too late. I don't have time to explain to you how the Democrats are planning to spend the same money twice. That is a pretty neat trick, too.

I don't have time to explain how the government will tell you what the minimum amount of insurance is. It is more insurance than most Americans have right now. If you don't find a way to buy this better package, there will be fines for you to pay. If the government can force you to buy insurance and force you to buy what Washington thinks is the best, what is next? Will they be able to tell you what kind of car to buy? Remember, the government now owns a car company.

I hope I have time to remind you we all agree that Medicare is going broke. But this bill takes almost \$500 billion of Medicare money and uses it to do new programs—new programs outside of Medicare—that will go on forever and need money forever, even after Medicare is broke. They even recognize the problem and form a commission to tell us where to cut Medicare. That is so they can shift the blame to a commission. But the difficulty is they have made special deals that take away the commission's ability to make cuts—except to the benefits of seniors. They are the only ones left standing. There will have to be cuts—real cuts.

They made a deal. I saw a letter from those who said they support the bill. For a while, they had a whole year's worth of change in their pay. Now they

have 2 months where they will be paid what they think is less than adequate but OK to stay in business. Evidently, they think that even though the Senate turned it down, because they couldn't afford to pay for it, \$250 billion in adjustments to what they get paid because it wasn't paid for, and we are going to come back and do that without it being paid for. It could have been paid for out of the Medicare money if they were using it for Medicare only.

I ask unanimous consent to have printed in the RECORD the Effects of the Patient Protection and Affordable Care Act on the Federal Budget and the Balance in the Hospital Insurance Trust Fund.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CBO has been asked for additional information about the projected effects of the Patient Protection and Affordable Care Act (PPACA), incorporating the manager's amendment, on the Federal budget and on the balance in the Hospital Insurance (HI) trust fund, from which Medicare Part A benefits are paid. Specifically, CBO has been asked whether the reductions in projected Part A outlays and increases in projected HI revenues under the legislation can provide additional resources to pay future Medicare benefits while simultaneously providing resources to pay for new programs outside of Medicare.

HOW THE HI TRUST FUND WORKS

The HI trust fund, like other Federal trust funds, is essentially an accounting mechanism. In a given year, the sum of specified HI receipts and the interest that is credited on the previous trust fund balance, less spending for Medicare Part A benefits, represents the surplus (or deficit, if the latter is greater) in the trust fund for that year. Any cash generated when there is an excess of receipts over spending is not retained by the trust fund; rather, it is turned over to the Treasury, which provides government bonds to the trust fund in exchange and uses the cash to finance the government's ongoing activities. This same description applies to the Social Security trust funds; those funds have run cash surpluses for many years, and those surpluses have reduced the government's need to borrow to fund other federal activities. The HI trust fund is not currently running an annual surplus.

The HI trust fund is part of the Federal government, so transactions between the trust fund and the Treasury are intragovernmental and leave no imprint on the unified budget. From a unified budget perspective, any increase in revenues or decrease in outlays in the HI trust fund represents cash that can be used to finance other government activities without requiring new government borrowing from the public. Similarly, any increase in outlays or decrease in revenues in the HI trust fund in some future year represents a draw on the government's cash in that year. Thus, the resources to redeem government bonds in the HI trust fund and thereby pay for Medicare benefits in some future year will have to be generated from taxes, other government income, or government borrowing in that year.

Reports on HI trust fund balances from the Medicare trustees and others show the extent of prefunding of benefits that theoretically is occurring in the trust fund. However,

because the government has used the cash from the trust fund surpluses to finance other current activities rather than saving the cash by running unified budget surpluses, the government as a whole has not been truly prefunding Medicare benefits. The nature of trust fund accounting within a unified budget framework implies that trust fund balances convey little information about the extent to which the Federal government has prepared for future financial burdens, and therefore that trust funds have important legal meaning but little economic meaning.

THE IMPACT OF THE PPACA ON THE HI TRUST FUND AND ON THE BUDGET AS A WHOLE

Several weeks ago CBO analyzed the effect of the PPACA as originally proposed on the HI trust fund (http://www.cbo.gov/ftpdocs/107xx/doc10731/Estimated_Effects_of_PPACA_on_HI_TF.pdf). CBO and the staff of the Joint Committee on Taxation (JCT) estimated that the act would reduce Part A outlays by \$246 billion and increase HI revenues by \$69 billion during the 2010-2019 period. Those changes would increase the trust fund's balances sufficiently to postpone exhaustion for several years beyond 2017, when the fund's balance would have fallen to zero under the assumptions used for CBO's March 2009 baseline projections.

The improvement in Medicare's finances would not be matched by a corresponding improvement in the Federal government's overall finances. CBO and JCT estimated that the PPACA as originally proposed would add more than \$300 billion (\$246 billion + \$69 billion + interest) to the balance of the HI trust fund by 2019, while reducing Federal budget deficits by a total of \$130 billion by 2019. Thus, the trust fund would be recording additional saving of more than \$300 billion during the next 10 years, but the government as a whole would be doing much less additional saving.

CBO has not undertaken a comparable quantitative analysis for the PPACA incorporating the manager's amendment, but the results would be qualitatively similar. The reductions in projected Part A outlays and increases in projected HI revenues would significantly raise balances in the HI trust fund and create the appearance that significant additional resources had been set aside to pay for future Medicare benefits. However, the additional savings by the government as a whole—which represent the true increase in the ability to pay for future Medicare benefits or other programs—would be a good deal smaller.

The key point is that the savings to the HI trust fund under the PPACA would be received by the government only once, so they cannot be set aside to pay for future Medicare spending and, at the same time, pay for current spending on other parts of the legislation or on other programs. Trust fund accounting shows the magnitude of the savings within the trust fund, and those savings indeed improve the solvency of that fund; however, that accounting ignores the burden that would be faced by the rest of the government later in redeeming the bonds held by the trust fund. Unified budget accounting shows that the majority of the HI trust fund savings would be used to pay for other spending under the PPACA and would not enhance the ability of the government to redeem the bonds credited to the trust fund to pay for future Medicare benefits. To describe the full amount of HI trust fund savings as both improving the government's ability to pay future Medicare benefits and financing new spending outside of Medicare would essen-

tially double-count a large share of those savings and thus overstate the improvement in the government's fiscal position.

Mr. ENZI. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a December 22 article from the Casper Star Tribune, by nationally syndicated columnist Cal Thomas.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Casper Star Tribune, Dec. 22, 2009]

SNOW JOBS

(By Cal Thomas)

There were two snow jobs in Washington over the weekend. One came from the sky as a record December snowfall blanketed the city. The other came from Capitol Hill where the Senate labored to cover up the real effects of its massive "health care reform" bill.

All you need to know about this monstrosity is contained in a paragraph from page four of the Congressional Budget Office's 21-page letter to Senate Majority Leader Harry Reid: "According to CBO and (the Joint Committee on Taxation's) assessment, enacting the Patient Protection and Affordable Care Act with the manager's amendment would result in a net reduction in federal budget deficits of \$132 billion over the 2010-2019 period. In the subsequent decade, the collective effect of its provisions would probably be continued reductions in federal budget deficits if all of the provisions continued to be fully implemented. Those estimates are subject to substantial uncertainty."

So uncertain are they that the CBO later noticed an error in its calculations and a day later on Sunday, Dec. 20 delivered another letter to Senate leaders that said: "Correcting that error has no impact on the estimated effects of the legislation during the 2010-2019 period. However, the correction reduces the degree to which the legislation would lower federal deficits in the decade after 2019."

The public is being asked to swallow a bill that most senators haven't read, contains cost projections that are substantially uncertain, and touts outcomes that can be reasonably predicted to be nothing that resembles what Democrats are promising.

Senator Ben Nelson, Nebraska Democrat and a supposedly staunch pro-lifer, agreed to vote for the bill after, as the Washington Post put it, he got "abortion language" he wanted and "also secured other favors for his home state." That's what it's ultimately about: getting favors for your home state so you can be re-elected. Re-election trumps the Constitution and the will of the people, most of whom oppose the Senate and House health care "reform" bills.

Even one's stand on a moral issue like abortion can be compromised for the right deal. Inserting language that supposedly restricts federal funding of abortion in order to provide political cover to Sen. Nelson turns out to be a sham. According to House Minority Leader John Boehner, whose office wrote a critique of Reid's 383-page Manager's Amendment, "Everyone enrolled in these (health) plans must pay a monthly abortion premium and these funds will be used to pay for the elective abortion services. The Reid amendment directs insurance companies to assess the cost of elective abortion coverage and charge a minimum of \$1 per enrollee every month."

Some defenders of this deal argue that federal money will be magically segregated when it comes to abortion and that money going to abortion providers will be for other "services." Even if this were true—and there is little truth coming out of Washington these days—that is like saying the government won't pay for the actual procedure, but it will subsidize other costs, such as the electric bill and the rent on the clinic's office space.

Republicans have done a good job highlighting the multiple flaws in the Senate bill (and the similarly long House bill). Most importantly for seniors, the Senate bill slashes hundreds of billions of dollars from Medicare to pay for a new-government program. It includes massive tax increases on individuals businesses, which means businesses are unlikely to hire workers at a time of double-digit unemployment. It includes a massive new entitlement program—the CLASS Act (short for Community Living Assistance and Support Services)—which Budget Committee Chairman Kent Conrad has described as "a Ponzi scheme of the first order" and which was recently opposed by a bipartisan majority, including 11 Democrats.

To their credit, Republicans have stood together in opposition to this health care fiasco. Their pledge to voters in the November 2010, election should be to repeal the measure and to offer real insurance and health care reform that will not include an abortion provision, new taxes, more entitlements and a bigger bureaucracy.

Yes, it can be done.

He says:

There were two snow jobs in Washington over the weekend. One came from the sky as a record December snowfall blanketed the city. The other came from Capitol Hill where the Senate labored to cover up the real effects of its massive "health care reform" bill.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. ENZI. Mr. President, I ask unanimous consent to have printed in the RECORD a Wall Street Journal article called "ObamaCare's Longshoremen Rules."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal]

OBAMACARE'S LONGSHOREMEN RULES

President Obama praised the Senate yesterday for clearing a 60-40 procedural vote on his health plan in the dead of night and "standing up to the special interests who've prevented reform for decades and who are furiously lobbying against it now." They're furiously lobbying all right—not against ObamaCare but for the sundry preferences in the Senate bill.

Start with the special tax carve-outs included in the "manager's amendment" that Harry Reid dropped Saturday morning. White House budget director Peter Orszag has claimed that the bill's 40% excise tax on high-cost insurance plans is key to reducing health costs. Yet the Senate Majority Leader's new version specifically exempts "individuals whose primary work is longshore work." That would be the longshoremen's union, which has negotiated very costly insurance benefits. The well-connected dock workers join other union interests such as miners, electrical linemen, EMTs, construction workers, some farmers, fishermen, foresters, early retirees and others who are absolved from this tax.

In other words, controlling insurance costs is enormously important, unless your very costly insurance is provided by an important Democratic constituency.

The Reid bill also gives a pass on the excise tax to the 17 states with the highest health costs. This provision applied to only 10 states in a prior version, but other Senators made a fuss. So controlling health costs is enormously important, except in the places where health costs need the most control.

Naturally, the Secretary of Health and Human Services will decide how to measure "costs" and therefore which 17 states qualify. (Prediction: Swing states that voted for Mr. Obama in 2008 or have powerful Democratic Senators.)

These 11th-hour indulgences make a hash of Mr. Orszag's cost-control theories and Mr. Obama's cost-control claims. Their spin has been that wise men would convene and make benevolent decisions about everyone's health care based only on evidence and the public good. But as the Reid bill shows, politics will always dominate when Washington is directing a U.S. health industry that is larger than the economy of France.

Or take a separate \$6.7 billion annual "fee" on insurance companies that is supposed to be divvied up by market share. This beaut doesn't claim to be anything more than a revenue grab, but at the behest of Michigan Senator CARL LEVIN Democrats chose to apply it to some insurers and not others. Select companies incorporated as nonprofits will be exempt, even though nonprofits typically have net income exceeding for-profit companies because they pay no taxes.

Since this new tax will merely be passed through as higher premiums, the carve-outs mean that cost increases will be even higher for workers whose employer contracts with a nonfavored insurer. These gyrations to tax law are so complex that it still isn't clear which nonprofits would qualify, but the protections are sure to apply to certain insurers in Michigan, Illinois and California. The poor saps stuck with higher premiums everywhere else can thank Mr. Levin and Senators Debbie Stabenow, Dick Durbin, Barbara Boxer and Dianne Feinstein.

The press corps is passing this favoritism off as sausage-making necessary to "make history," but that's an insult to sausages. What this special-interest discrimination illustrates in how all health-care choices will soon be made as Washington expands its political control over one-seventh of the U.S. economy.

Mr. ENZI. It points out how there will be an excise tax in 17 States with the highest costs, but yet we made an exception for a number of unions, particularly the longshoremen's union not being subject to some of the taxes in the bill.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from a number of contractors.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DECEMBER 21, 2009.

U.S. SENATE,
Washington, DC.

DEAR SENATOR: We are writing to express our strong opposition to language contained in the Manager's Amendment to H.R. 3590, which excludes the construction industry from the small business exemption contained in the bill. We regret that this is our first op-

portunity to address this issue, though the fact that the Manager's Amendment was made public less than two days before the first vote on the matter has increased the difficulty of playing a constructive role in the legislative process.

In recognition of the negative impact that a mandate to provide health insurance will have on employers, H.R. 3590 exempts employers with fewer than 50 employees from the fines levied on those who cannot afford to provide their employees with the federal minimum standard of health insurance. However, the Manager's Amendment singles out the construction industry by altering the exemption so that it applies to only those firms with fewer than 5 employees.

This narrowly focused provision is an unprecedented assault on our industry, and the men and women who every day make the bold decision to strike out on their own by starting a business. Our members' benefit packages reflect the reality of their business models, and they proudly offer the best health insurance coverage that they can afford. It is unreasonable to presume that small business owners can bear the increased cost of these new benefits simply because Congress mandates that they do so.

In the real world, where the rhetoric surrounding this legislation will meet the stark reality of the employer struggling to make payroll, this special interest carve out is simply another bill to pay in an industry that, with an unemployment rate exceeding 18% and more than \$200 billion in economic activity lost in the past year, already is struggling to survive.

And, we would be remiss if we failed to question the justification for singling out the construction industry to bear such a burden. We are unaware of any data or evidence that suggests that the needs and struggles of a construction contractor with fewer than 50 employees are so different from those of small business owners in other industries, and absent such convincing evidence, we are left to assume that this specific provision is merely a political payoff to satisfy the desires of a small constituency.

As Congress moves forward in the legislative process for H.R. 3590, we strongly encourage you to address this onerous provision that needlessly single out small construction industry employers.

Sincerely,

Air Conditioning Contractors of America, American Institute of Architects, Associated Builders and Contractors, Associated Equipment Distributors, Associated General Contractors, Association of Equipment Manufacturers, Independent Electrical Contractors, National Association of Home Builders, National Federation of Independent Business, National Lumber and Building Material Dealers Association, National Ready-Mixed Concrete Association, National Roofing Contractors Association, National Utility Contractors Association, Plumbing-Heating-Cooling Contractors—National Association, Small Business & Entrepreneurship Council U.S. Chamber of Commerce.

Mr. ENZI. It points out how most businesses have an exclusion of 50 employees or less, but they have singled out the construction industry with an exemption of 5 employees.

Mr. President, I ask unanimous consent to have printed in the RECORD a Wall Street Journal article that covers that same topic.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From The Wall Street Journal, Dec. 22, 2009].

SENATE HEALTH BILL UNFAIR TO CONSTRUCTION INDUSTRY—NAHB

"In their rush to pass massive health care reform before Christmas, Senate Democrats included a last-minute provision overtly targeting the construction industry, including home builders," the National Association of Home Builders said in an e-mail alert to its 200,000 members Monday. "In order to find the 60 votes needed to pass health-care reform, a provision was slipped into the health-care bill to exclude the construction industry from the small business health-care exemption contained in the bill."

Employers with more than 50 employees would be required to offer insurance or pay a fine of up to \$750 per employee if any employee obtains federal subsidies for coverage. But the builder group says the bill singles out the construction industry by "only giving construction firms an exemption from the bill's employer mandates if a firm employs less than five people. Every other industry is granted an exemption if they have fewer than 50 employees."

Many home builders are small, private organizations working to survive the worst downturn in decades. More than half of the NAHB's members have fewer than five employees. "You might as well take an industry that has been a cornerstone of the economy and kick it while it's down," said Jerry Howard, the Washington-based group's chief executive. "It makes no sense . . . and it's really bad public policy."

The NAHB is urging its members to quickly contact their senators to derail the measure. The Senate, however, is marching toward a Christmas Eve vote. The Senate version needs to be reconciled with a House-passed bill, but is likely to form the core of any final legislation presented to President Barack Obama for his signature.

If the Senate bill passes and goes to a conference committee with the House, as expected, the House is likely to do most of the reconciling. That's because Senate Majority Leader Harry Reid—after battling for weeks to get the minimum number of votes needed to avert a Republican filibuster—has little room to maneuver. The House passed its version on Nov. 7 on a 220-215 vote.

President Obama hopes to sign a final bill before his State of the Union address after the first of the year so he can turn to other issues, in particular the economy and jobs.

Mr. ENZI. Mr. President, the Department of Labor recently reported that our Nation's unemployment rate is 10 percent. In States such as Michigan, California, Rhode Island, and Nevada, the average rate is over 12 percent.

Millions of Americans have lost their jobs and millions more go to work every day worried about keeping the job they have. Businesses of all sizes are struggling to keep their doors open and are finding it harder and harder to make ends meet.

Unfortunately, the policies in the Reid health care reform bill will only make matters worse for America's businesses and the workers they employ.

When I am home in Wyoming, which is nearly every weekend, my constituents ask me: What does health care reform mean for me? Unfortunately I have to tell them that if the Reid bill is passed, their jobs and their paychecks will be in danger.

The bill being pushed through the Senate imposes \$28 billion of new taxes on businesses that will eliminate jobs and reduce wages.

Many business owners cannot provide health insurance. They cannot afford insurance for their workers or for their own families. They have looked at their bottom lines and understand that they cannot afford to buy insurance and continue to stay in business—health insurance simply costs too much.

Rather than addressing the issue and enacting reforms that would lower health insurance costs, the majority's health care bill instead increase the taxes that these businesses will have to pay.

These are the same businesses that are already barely making it. These are the same businesses that are laying off workers to try to survive.

We know what the new employer taxes in the Reid bill will do, and who will ultimately have to pay the price for this misguided policy. These taxes will eliminate jobs and be paid for on the backs of American workers.

The Congressional Budget Office has told us that the new job killing taxes in the Reid bill will lower wages across this country by \$28 billion.

We have shed 3.5 million jobs since January of this year and the average workweek is now down to 33 hours for the American worker. Yet the bill before us today will actually make that situation worse.

The workers who will be the hardest hit by the job killing tax in the Reid bill are those already making the lowest wages and with the fewest job opportunities. According to the Congressional Budget Office, employer mandates like those included in the Reid bill would quote "reduce the hiring of low-wage workers."

Low-income workers are already hit hard by the current economic conditions. These low-income workers typically have less formal education and find it even more difficult to find work. Workers without a high school diploma have a 50 percent higher unemployment rate than workers with higher education levels.

Harvard Professor Kate Baicker reported that an employer mandate, like the one in this bill, will mean that "workers who would lose their jobs are disproportionately likely to be high school dropouts, minority and women".

This is in part due to the fact that many of these workers are only making minimum wage. Their employers cannot reduce their wages, so consequently they will either have to re-

duce the number of hours these employees work or simply get rid of them to make up for the costs of the next tax.

Employer mandates and the job killing taxes that go with them are paid on the backs of low-income workers. The job killing taxes in this bill fall disproportionately on the people who struggle the most—putting the jobs they have at risk and making it even more difficult to find a new one.

At a time when Americans across this country are looking for signs of an economic recovery, the Senate should be debating a bill that helps the situation, rather than a bill that makes it worse.

The job killing tax in the Reid bill will also discourage employers from hiring new workers and growing their business. Any small business that currently has 50 or fewer employees will do everything they can to avoid hiring that 51st employee in order to avoid these new taxes.

I filed an amendment to the Reid bill that would protect businesses and their workers from the worst effects of the job killing tax. My amendment would simply suspend the employer mandate any time the unemployment rate goes above 6 percent.

Between 1999 and 2008, the unemployment rate was about 5 percent. But when our economy began to struggle, we saw the unemployment rate rise to a point that now we are seeing more than 10 percent unemployment.

It seems only logical to me that if our economy is struggling and people are losing their jobs, we would want to protect workers from having their wages cut and even losing their jobs because of the job killing tax in the Reid bill.

I thank the Chair and yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I now yield to Senator MURRAY from Washington—I suggest she be recognized to speak for 7 minutes.

The PRESIDING OFFICER. The Senator from Washington.

Mrs. MURRAY. Mr. President, the health insurance system in our country has been broken for a very long time. For far too long, families and businesses across my home State of Washington have been forced to make some tough decisions, spending nights struggling or whispering after their kids go to bed about how to pay the bills and praying they do not get sick.

I am proud to say that is about to change. Over the course of months of work on this issue, I have noticed it is very easy for this debate to tip into the realm of abstractions, to focus on numbers and charts—to devolve into petty partisanship or ideological inflexibility. Too often real people get left out of this conversation—mothers and fathers who are scared they are going

to lose their jobs; families scared they are going to lose their insurance; people with preexisting conditions who cannot get coverage and who know they are one hospital visit away from bankruptcy; small business owners who cannot afford another premium increase and who want to cover their employees but they cannot keep up with the rising costs; senior citizens who are forced to cut their pills in half to make them last twice as long; people who pay their premiums and like their doctors, but when they get sick they find out that some of the most personal choices in their lives are being made by their insurance companies.

These are the real people who need real health insurance reform. Most Americans seem to fall into one of those categories.

Over the past few months, I have tried to ensure that the struggles of people in my home State are represented in this debate. I told my colleagues the stories that I have received in over 10,000 letters and e-mails and at roundtables and on the phone, stories told to me too often by men and women with tears in their eyes or a quiver in their voice, people who are not looking for a handout or a free ride but who are pleading for a fair system—a system that works for families or businesses like theirs.

I shared the story of Janet from Seattle. She lost her job, lost her insurance, and succumbed to cancer after being forced to wait 6 weeks to see a specialist after her throat began to hurt. Janet's story is why we need to reform the health insurance system.

I told my colleagues the story of Joseph and his wife who was denied an MRI after complaining of pain in her chest, and only after 3 years of fighting her insurance company were they able to determine she had breast cancer and begin the treatment she desperately needed. Their story is why we need real health insurance reform.

I told the story of Mark Peters from Port Townsend who owns a small technology company. He told me he is being crushed by skyrocketing premiums. He offers health insurance to his employees. He does the right thing. But he told me he just got a letter from his insurance company raising his rates by 25 percent. Mark told me his small business cannot sustain increases such as that; no business can. But in our current health insurance system, small businesses are often at the mercy of the insurance companies. This company's story is why we need to reform the health insurance system.

I told the story of Patricia Jackson from Woodinville who has private insurance but cannot keep up with the rising premiums. To provide care for her family of four, Patricia told me she paid \$840 a month in 2007. The next year it was \$900 a month, and then \$1,186 a month, and again her rates

were raised recently to a hike of \$1,400 a month. That is an increase of over 66 percent in just 3 years. Patricia and her family's story is why we need to reform the health insurance system.

I told my colleagues the story of Marcelas Owens. Marcelas Owens is a young man I have thought about every single day since I actually met him back in June. Marcelas is only 10 years old. He has two younger siblings whom you can see in the photo with him. This is his grandmother. He and his siblings have been through a lot. Two years ago, their mother Tiffany lost her life because she was uninsured. She was 27 years old. Tiffany was a single mom who worked as an assistant manager in a fast food restaurant. She had health care coverage through her job. But in September of 2006, Marcelas told me that she got sick, she lost her job, she lost her insurance, and ultimately she lost her life. Marcelas and his sisters lost their mom.

Health insurance reform is coming too late for Tiffany. But her story and the story Marcelas tells me why we need to reform health insurance.

Real people, real stories, real needs—that is why we are here now and that is why we have to get this done. When we pass this bill, Americans will be able to shop for coverage that meets their needs. For the first time, insurance companies will have to compete for our business, for the business of the American people.

When we pass this bill, we will end discrimination based on preexisting conditions and make it illegal to drop people when they get sick.

When we pass this bill, we are going to give tax credits to small businesses and help the self-employed afford care.

When we pass this bill, we are going to make preventive services free, end lifetime coverage limits, and cap out-of-pocket fees. We are going to extend the life of Medicare without cutting guaranteed benefits while shrinking the doughnut hole gap in drug coverage for our seniors.

When we pass this bill, people such as Mark and Patricia and Joseph and his wife will be helped. The memories of people such as Janet and Tiffany will be honored. That is why we need to reform the health insurance system.

I thank the more than 10,000 people in my home State of Washington who sent me their personal health care stories. Their input has helped guide me as I worked on this bill and served as a constant and welcome reminder about who I am here to represent.

I urge my colleagues to stand with these families and with the families of the small business owners in their States and across the country who desperately need this reform.

Health insurance reform has been a long time coming. But today we stand closer than ever to making it a reality.

I yield the floor.

Mr. BAUCUS. Mr. President, I yield 18 minutes to the Senator from Minnesota, Mr. FRANKEN.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. FRANKEN. Mr. President, we have been working on this bill for a long time, and I am proud of what we are doing here. Every Senator has had his or her chance to speak up and help make this a better bill or to make their case against the bill.

Unfortunately, it has been a bit ramorous, and I think that is too bad. There have been accusations flying back and forth. Umbrage has been taken. This place has become an umbrage factory. I even took umbrage once, and I feel badly about that. My colleagues across the aisle have taken great umbrage because we have accused them of using scare tactics.

May I point out that the title of the op-ed of my friend from Oklahoma in last Wednesday's Wall Street Journal is "The Health Bill Is Scary." Exhibit A in our case that the other side has, indeed, used scare tactics—the op-ed entitled "The Health Bill Is Scary."

Seriously, when you are talking about people's health, there is more than enough fear to go around. Instead of scaring people, we should be debating the merits of the proposal in front of us. We have heard a lot of stories. We all know our health care system is screwed up. We can all agree on that. The most important things to know about the bill are what is actually in it and will it help.

You see, this bill is too important for us to hide it from our bosses, the American people. We have a duty to let the American people know exactly what we are doing on their behalf. That is why I have been so disappointed when my friends and colleagues have said—and I actually agree with them—that Americans are confused about what is in this bill. They would not be so confused if everyone was being honest and forthright about what is in the bill.

I have heard a lot of misinformation over the last several weeks: some on the airwaves and, unfortunately, some right here on the Senate floor. Very early Monday morning, I heard a colleague on the floor say this bill is going to add \$2.5 trillion to our deficit. That is simply made up. The nonpartisan Congressional Budget Office, the official scorekeeper of Congress, said the bill reduces the debt by \$132 billion in the next 10 years. They estimate the bill lowers the debt by at least five times that amount in the following decade.

CBO is like a referee, and we all agree to let the referee make the call about what things will cost. It is completely possible we will disagree on different calls the referee makes during the game. I do not always agree with CBO. For example, I do not think they

score prevention as saving enough. I may be wrong or I may be right, but I accept the CBO score because the CBO is the ref. We would not walk away from a basketball game saying we won if the other team scored more points and just say: It is bad refereeing, we really won.

So we may not like how CBO scores certain provisions, but it is all we can go by. These are the rules of the games to which we agreed. So if you are talking on the Senate floor, you cannot just say this bill will add \$2.5 trillion to the debt when it is not at all what the CBO says.

No wonder people are confused. People who are trying to kill health reform are deliberately confusing Americans, and it is working. A recent study found that more than half of respondents to health care polls say they do not know enough about the bill to give a hard opinion. Then opponents use the fact that people are confused as a reason to draw out this process.

The American people are confused and opponents of this bill want more time to confuse them even more.

I have heard a colleague on this floor say this bill would not add one day—he said "not one day"—to the solvency of Medicare. That is simply not what the nonpartisan Chief Medicare Actuary found. This is the same Actuary who is often cited by opponents of the bill. He has determined that it keeps Medicare solvent for an extra 9 years.

Colleagues on my side are often making statements that might come under the heading of overselling, saying that for most people premiums will go down. It is true for many Americans, the out-of-pocket costs for better, more secure health insurance will go down. But it is also true that most health care premiums will continue to go up. It is just that they will go up at a slower rate than they would have if this bill were not adopted. That is a really good thing.

This bill is going to pass. So we want people to understand what is happening. We are slowing the growth and the cost of health care. I want to be crystal clear because I do not want to confuse people either. So today I am going to try to cut through all this rhetoric and tell you about what is actually in the bill and how it will affect you.

When I first spoke on this floor on health reform, I related three questions that I hear from most Minnesotans. I heard them when I was at the State fair, when I spoke with tea-partyers. I heard them in Minneapolis and St. Paul. I heard them in Willmar—all across the State—and on the Iron Range.

First, they say health care costs too much; what are we going to do about that.

Second, they ask: What am I going to do if I get sick or my spouse or one of

my kids get sick and then someone in my family has a preexisting condition and then I lose my job? How am I going to get health insurance then?

Third, they ask: If something bad happens to me, am I going to lose everything; am I going to go bankrupt?

Well, now that we are about to pass this bill, let me take each question and tell you how this will affect you; what this bill will do and what it will not do. Remember, this legislation is an important first step but not the final word.

First, what does this bill do about health care costing so much? Let's take a look at a point Dr. Atul Gawande, a Harvard physician, makes. He points out that almost half this bill comprises programs to try out different ways to lower costs and improve quality. Some have criticized this as a weakness in the bill, but I think it is a strength. Gawande makes the point that when a system is as complex as ours, there is no one-time fix. There is not one simple solution. As much as I wish it were true, the whole country probably can't be like the Mayo Clinic or HealthPartners or other insurance companies in my State or Intermountain in Utah or Geisinger in Pennsylvania. So one size may not fit all.

But these projects and pilots will generate solutions to fix the biggest problems in health care, such as paying doctors fee for service, which rewards volume and not value. For example, thanks to the efforts of MARIA CANTWELL and my colleague, AMY KLOBUCHAR, and others, for the first time ever we will include what is called the value index in the Medicare payment structure. Doctors and States that provide high-quality care at a reasonable cost will no longer be punished for that. Instead, they will be rewarded for being effective partners in their patients' care.

The bill also calls for all health insurance companies to use a single uniform standard for claims, as we do in Minnesota now, which will save our State \$60 million just this year. There are lots of ideas, and we don't know which ones yet will work the best. But the point is, all the key elements are in this bill.

One program in the bill I am particularly proud of is the Diabetes Prevention Program at CDC. I worked on these provisions with my Republican colleague, DICK LUGAR from Indiana, who is a hero of mine. The Diabetes Prevention Program is based on what we have learned in Minnesota and in Indiana—prediabetics can avoid becoming diabetic if they get access to community services such as nutritional counseling and gym memberships. These are proven to cut the risk of developing diabetes in half, so people can live healthier lives and their health care costs less. We will replicate this program across the country.

We will also guarantee routine checkups and recommended preventive care, such as colonoscopies and mammograms, are covered by all insurance plans at no cost. No copays for preventive care.

I am also happy the bill requires a minimum medical loss ratio, something I have been fighting for with Senator ROCKEFELLER. This is going to make health insurance companies put at least 85 percent of their premiums toward actual health services, not administrative costs, marketing campaigns or profits or bloated CEO salaries. Advocates have been trying to get these profit restrictions in place in many States, but it is usually too hard to fight these companies on a local level. So while I am disappointed we don't have the public option, the minimum medical loss ratio is a potent measure that will limit insurers' profits and put the brakes on skyrocketing premiums.

Diabetes prevention, minimum medical loss ratio, incentivizing value over volume—these are just a few of the innovative ways this bill will bring down costs. All the basic ingredients for success are here. Dr. John Gruber, professor of economics at MIT, agrees. He says this about our bill:

It's really hard to figure out how to bend the cost curve, but I can't think of a thing to try that they didn't try. They really make the best effort anyone has ever made. Everything is in here. I can't think of anything I'd do that they are not doing in the bill.

So when two of my colleagues said 2 days ago: There is no health care reform in this bill, well, that is confusing.

The next question I hear from Minnesotans is: What if I get sick and lose my job, what will I do?

This bill reforms the insurance markets, guaranteeing that having health insurance equals security. Some of these reforms will kick in when the bill passes, others will kick in 4 years from now.

I wish we could do everything at once, but we are making a complex set of reforms and it will take time to implement them and generate the cost savings necessary to pay for the benefits you will receive.

For the Minnesotans who can't afford the coverage they have because they are sick or have a preexisting condition, what will this bill do for them?

Well, 6 months after this bill is passed, we will get rid of all preexisting condition exclusions for kids, and young adults will be able to stay on their parents' insurance until they turn 27. That is big.

Within 90 days, families who get turned down because of preexisting conditions will have access to non-profit insurance coverage designed to cover people who can't pay for insurance on their own. These are called high-risk pools, and many States, as

well as Minnesota, have these plans in some form. The good thing is, this bill will invest \$5 billion to help people afford premiums in the high-risk pools.

In 2014, anybody who doesn't have an affordable plan through work or has been denied coverage will be able to go to a Web site and purchase coverage through a new insurance marketplace called the exchange. No one will be turned away or charged more because of their health status or because they happen to be a woman. It will let you compare plans and prices. What you pay will be based on your income. No one will pay more than 10.2 percent of their income toward premiums in the exchange. Lower income families will pay significantly less. If the coverage you are offered through your employer costs you more than 8 percent of your income, you can go to the exchange.

There are millions of people who have insurance and are worried about losing what they have; for instance, Minnesotans who work for small businesses that are squeezed by growing health care costs. Beginning in 2010, this bill will give small businesses tax credits to pay up to 35 percent of their employees' premiums.

More small businesses will be able to cover more employees more affordably. Then, in 2014, once the exchanges are up and running, small businesses can choose to go into the exchange so they can pool their risk with other small businesses.

These reforms will bring coverage to an additional 295,000 Minnesotans by 2019. There should be no confusion. This is real reform.

Lastly, Minnesotans ask me: Will I go bankrupt from health care costs? I hear from a lot of Minnesotans who have maxed out their health insurance or who are getting uncomfortably close to their annual or lifetime limits. These arbitrary limits let insurance companies off the hook and leave you holding the bill when you are sick and need help the most.

Fifty percent of personal bankruptcies in this country are due to a health care crisis. The good news is, within 6 months of passing this bill, new plans will not have lifetime limits on benefits and will stop companies from imposing annual limits on needed care. When the exchanges are operational, the use of annual limits will be banned entirely.

I would like to ban all limits on all plans, new and existing, right away. But this is an example of how we have had to compromise in order to keep the cost of the bill down so we are being fiscally responsible and not adding to the debt. I wish to be very clear on that. When this bill is fully implemented, it will give Americans access to affordable health care so they can avoid going bankrupt when they get very sick. That is very good.

There is more. We will start closing the Medicare prescription doughnut

hole in 2010. We will invest in home visits for new mothers, more loan forgiveness for primary care providers and for doctors who practice in rural areas, the Public Health Investment Fund, stronger antifraud laws, support for people with disabilities to stay out of nursing homes, and funding for community health centers.

I said at the beginning of this debate there would be amendments that make it an even better bill and there would be amendments that make it less to my liking and, therefore, a less good bill from my point of view. But I also said I would only support a bill if it makes quality health care available to tens of thousands of additional Minnesotans and tens of millions more Americans. We have all compromised on many fronts, but the bill we have before us is real reform and deserves our support.

The bill deserves our support because Minnesotans and Americans can't wait any longer. As Martin Luther King, Jr., once said: "Of all the forms of inequality, injustice in health care is the most shocking and inhumane." We have the opportunity to express our humanity today, to make our country healthier and more secure for generations to come.

I would like to conclude by sharing a letter I received from John Goldfine in Duluth, MN. John operates a business on the shores of Lake Superior and wrote to share the requests he had received to donate money to fellow community members facing financial crises because of health care costs.

John was asked to donate to a cancer benefit for a woman who has melanoma.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. FRANKEN. I ask unanimous consent for 2 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FRANKEN. John was asked to donate to a cancer benefit for a woman who has melanoma, to attend a spaghetti dinner for an 11-year-old with brain cancer, a bake sale for a woman in need of a new kidney, and a pancake breakfast for a burn survivor. This is what John says:

As a business owner in Duluth, these are just a few of the requests that we have received these last few years. We have given a donation towards these fundraisers to help people pay for their medical expenses. As I travel the country and go into grocery stores, restaurants and convenience stores, I always take a minute to look at what is going on in the area. Rare is the time that I do not see a fundraiser to help someone with their health care bills and expenses. I know you know how wrong this is, but I am left wondering what some of your fellow Congressmen and Senators are thinking. Maybe they need to go home and look at some of these community bulletin boards. Every time I look at one of these I want to cry. I know how hard this battle is. I know there will be more compromises, but please do not

leave empty handed. There are so many people out there that really need some help.

I am proud I am voting for this bill to provide help for the people who need it.

I thank the Presiding Officer for the extra time, and I yield the floor.

The PRESIDING OFFICER. The deputy majority leader is recognized.

Mr. DURBIN. Mr. President, I wish to thank my colleague. That letter from his constituent is heartfelt and should be an inspiration to all of us to get this job done. We have sacrificed. This is the 24th day debating this bill. Some of these sessions have been early in the morning and late at night, but I think the time has been well spent. People have come to the floor and spoken at great length but no one more eloquently than your constituent who sent you that letter.

Come tomorrow morning, we will have the official vote—very early in the morning. I would like to say to my colleagues from West Virginia and Minnesota that we have a piece of news. A lot of what has been said on the floor has been said by others and said before, but this is a piece of news worth reporting. Our bill—the health care reform bill—has been endorsed by the American Medical Association, the largest physician organization in this country; endorsed by the American Hospital Association, the largest organization representing our hospitals; it has been endorsed by the American Association of Retired Persons, the largest senior citizens organization, which focuses intensely on the future of Medicare; and today we have received the endorsement of what is regarded by most as the most highly respected medical organization in America. If you ask most Americans whom do you respect the most, it is the nurses. You know why. Because when you are in a hospital with someone you love or in the care of a doctor, it is the nurse who is with you in those moments that make a lifetime. The nurses today have issued their formal endorsement of this health care reform bill.

The nurses today have Rose Gonzalez, director of government affairs for the American Nurses Association, who writes:

Nurses across this country have waited decades for this historic moment and the time is at hand.

Once again, the need for fundamental reform of the U.S. health care system is critical. ANA and nurses around the country are ready to work with you toward enactment of the strongest possible health care reform legislation.

For all of our critics from the other side of the aisle, the simple fact is this: The people who are on the front line of health care, the people to whom we turn every day for critical care and critical treatment of the people we love, endorse this measure. They have come out foursquare for it. I would rather have their endorsement than

any political endorsement we might find.

Now let me tell you how this is significant. This bill will change many things. Some on the other side have criticized the bill because it is too big; they want a small bill. I want a bill that is large enough to treat the problem. It is like saying to a doctor: You can give me a prescription but only give me one; I can only take one prescription at a time.

In this bill we address problems existing in our health care system that go to the heart of the challenge that faces our Nation. We have great doctors and hospitals and nurses. But we spend more than twice as much as any other nation on Earth per person for health care in some areas. Many countries spend a fraction of what we spend and get much better results.

We know the cost of health care is getting beyond us. We know a family of four with a health insurance plan now through their employer pays, on average, \$12,000 a year for premiums. Ten years ago it was \$6,000. It is projected to double again in just 8 years. People would be working to earn \$2,000 a month just to pay for health insurance. That is before you take the first penny home for your family. That is unsustainable.

The first thing we do is address affordability, start bringing down the increase in cost in health care. That is our first responsibility, and this bill does it. The second thing it does is extend the reach of health insurance protection.

As I stand here, one out of every six Americans has no health insurance. These are not lazy, shiftless people. These are people who can't afford it, who work at a place that doesn't offer it, or happen to be unemployed. At the end of the day, 60 percent of those people, 30 million, will have the protection of health insurance. That is critically important.

This bill provides protections needed by the people who have health insurance. How many times have you heard about a friend or a family member who has to fight an insurance company for the payment for critical care that the doctor has ordered, or over a prescription which the doctor believes will keep a person healthy or make that person well? Those battles are now going to tip to the side of the consumers of America. Health insurance companies will not be able to discriminate based on preexisting conditions or put caps on lifetime policies or tell kids that at age 24 they can no longer be covered by the family health care plans. All of those things are changed in this bill, giving consumers across America a fighting chance when it comes to health insurance.

Last night I met with several of my colleagues. We talked over dinner about how America is going to react to

this. It is hard enough to digest the contents of this bill, to expect the average American who has so many other concerns to digest it may be too much to ask. But I asked my staff to give me a list of the things that most Americans can expect to see, the changes they can expect to see on a timely basis—not the long-term changes where 94 percent of people have health insurance or would have a better standing to fight health insurance companies when they complain, but what will we be able to see. My staff came up with a convenient top 10 list which most of us are familiar with from late night television shows.

Within 6 months or a year after this bill is enacted into law, here are the top 10 things Americans will notice changing when they buy a new health plan: No. 1, if you own a small business you will start receiving within 6 months tax credits to help your business pay for health insurance for your employees beginning with tax year 2010. Mr. President, 144,000 small businesses in my State of Illinois will be eligible for the small business tax credit so that small businesses can afford to offer health insurance for the owners of the business and for their employees. That is No. 1—and this is all within 90 days of enactment.

No. 2, we are going to create immediate options for people who can't get health insurance today. We estimate that 8 percent of the people in my State have diabetes; 28 percent have high blood pressure, and all of them could be denied coverage because of this so-called preexisting condition. We are going to put in place high-risk pools so these people who can't buy health insurance today because of these preexisting conditions, have an option, a place to turn to, to buy health insurance. That is No. 2.

No. 3, and this is good news for every family and every parent: Within 6 months after the enactment of this bill, the parents of loved ones—3.6 million kids in my State—will sleep better knowing that whatever health insurance they have will be required to cover their child regardless of any preexisting condition. Any child under the age of 18 with a diagnosis of diabetes or a history of cancer or asthma or whatever it may be cannot be denied coverage under the family plan, within 6 months of this bill being enacted.

No. 4, you will no longer need to fear an insurance company dropping you from coverage once you get sick. It is called rescission, and it means as soon as you need the health insurance, the health insurance companies run away and say: We are not covering you anymore. Hire a lawyer and fight us if you don't like that. That comes to an end within 6 months after this bill passes.

No. 5, you will no longer need to worry if you get sick or get in an accident because you are out of town and

out of the network of hospitals and doctors your insurance policy provides. This bill ensures access to emergency care in-network and out-of-network without additional cost sharing beginning 6 months after the date of enactment.

No. 6, you will have the freedom to choose your doctor, the person you think is right for you and your family. This bill protects your choice by allowing plan members to pick any participating primary care provider and prohibit insurers from requiring prior authorization before a woman, for example, goes in for a gynecological examination.

No. 7, you will no longer fear losing your home or going bankrupt because of a bad car accident or a serious illness such as cancer. This bill, when it becomes law, will bar insurance companies from limiting lifetime benefits and severely restricting annual benefits under health insurance policy.

No. 8, this bill will require providing preventive services and immunizations without copay. Mr. President, 41 percent of the people in my State have not had a colorectal cancer screening; 22 percent of women in Illinois over the age of 50 have not had a mammogram in the past 2 years. Health insurance reform will ensure that people can access preventive services for free through the health care plans. It makes sense. It is an ounce of prevention and built into the law 6 months after it passes.

No. 9, senior citizens are going to notice the difference within 6 months. They will have access to dramatic discounts in the purchase of name-brand prescription drugs under Medicare Part D beginning July 1, 2010. Roughly 314,000 Medicare beneficiaries in Illinois hit the so-called doughnut hole, the gap in coverage. They are going to have protection. It is going to be provided by this bill.

No. 10, seniors across America will be eligible for one free wellness visit each year without charge. Think about that: the peace of mind which it brings to you and to your family to know that you have had a checkup, and the doctor said you are doing fine and takes care of a problem before it becomes major.

Those are the top 10 things to expect in the first 6 months or a year, and more to follow. This is a bill worth voting for. This is a bill which finally puts us on record as a Nation that health care is not just the privilege of the lucky and the wealthy. It is a privilege of living in this great Nation. It is a right that comes to all of us. If we truly want to enshrine that guarantee of life, let's enshrine in this bill guaranteed access to quality health care.

We have had a long debate. Those on the other side have been critical of this bill. They have never offered an alternative—not one substitute comprehensive alternative. They just can't do it,

and they won't. But we know we have the responsibility to do it.

With votes this afternoon, in just a couple of hours and again tomorrow morning, we are going to make this bill a bill that is passed by the Senate, on its way to conference with the House, and by the first of this new coming year, we will be able to offer that promise of quality care which the American people are asking for.

Madam President, I yield the floor.

The PRESIDING OFFICER (Mrs. HAGEN). The Senator from West Virginia.

Mr. ROCKEFELLER. Madam President, I thank you. I rise today to join with my colleagues, in fact, to stand very proudly with my colleagues, in support of the Senate passage of groundbreaking comprehensive health care reform. I have wanted to say that for decades. It has taken not just the better part of a year but, in fact, the better part of a generation.

The story of health care reform over the last 50 years has been one of narrow incremental change, some quite meaningful—the Children's Health Insurance Program, for example—but none truly comprehensive in the way the Americans want to have their health care.

It is a history of big ideas left unrealized for lack of political will, for lack of time—whatever—of leaders and lawmakers and the medical profession all trying boldly yet all failing badly; failing fundamentally to take away the fear of so many, the terror of living and getting sick in America today; the terror of becoming sick in a country that holds itself out as a beacon of hope, a beacon of fairness, yet denies men, women, and children access to doctors and nurses, tests and medicines that we know will prevent illness or will make them well; a country that allows people, especially low-income people, but not only low-income people, however, to suffer or watch a beloved family member suffer alone and outside the health care system—all at great cost to our national economy and our national productivity and our national sense of self-esteem but, even more importantly, to our national soul, to our moral compass, to our conscience.

Now in the final days of 2009 we have a profound opportunity to deliver on years and years of unmet promises and to begin a new decade by building a strong, new foundation for the American people, for all of them; to wit, a more secure and reliable health care system that works for virtually all Americans, where those who are uninsured finally have some place to go for health care; where those with insurance know that the coverage they count on and pay for will be there when they need it—they will know that—and where a profit-driven health insurance industry does not play mercilessly with people's lives or steal their hope so

that the health insurance company can have a very prosperous future, a very gloomy chapter in our Nation's business history.

Each of us brings to this moment shared stories about the tragic and trying personal experiences of our friends and neighbors back home. We are all motivated by this bill. We are all moved by this bill. I know that West Virginia's struggles with the health care system are not unique in America, but they are unique to me because I represent them. They are what drive me to work so hard to make things better. That never changes.

I talked about the Bord family. The Bords are two dedicated schoolteachers with health insurance through their employer whose son Samuel had leukemia and needed treatment well beyond the onerous annual insurance limits imposed upon him, without his knowledge, and, therefore, his health insurance stopped producing any care for him at all at 8 years old. What was he to know?

Samuel's parents were desperate, and they feared for the worst. When he hit his \$1 million cap on annual insurance, my office helped his parents to find some more resources, but those ran out too. So the Bords were left with two gut-wrenching suggestions: consider getting a divorce so that Samuel would qualify for Medicaid, or stop taking their other two children to the doctor and giving them health care so they could spend the money that they had been spending in part on Samuel—take it all away from the other two children to help with Samuel as best they could. When people are desperate, they try anything. The choices are all cruel.

So you get a device or you choose one child's health care needs over another's—that is not what parents want to be like. Those are the choices our Nation offered to these caring, hard-working parents with a sick child. How can that be? How can we allow that to be? The answer is, of course, that we cannot.

They did everything in their power, but this fall Samuel passed away. There are no words. It breaks my heart to think of what his parents went through, not only the pain of watching their son fight a terrible disease but also the uncertainty of paying for his treatment as best as they could and then have the coverage they counted on and paid for suddenly cease to exist.

I say to my colleagues, when do we say collectively that enough is enough? When do we finally step in and try to solve such an enormous set of problems? So much is at stake, so many people's needs and expectations are so high, and so are mine and so are yours, I say to the Presiding Officer. I know all too well that reform is not about shying away from the tough issues or the tough decisions. Reform is not about reaching perfect agreements on a

perfect piece of legislation. Reform is making things better for people, as much as you can for as long as you can, with as much money as you can possibly collect to pay for it.

There are real and serious differences of opinion among us, among our esteemed colleagues in the House of Representatives as well—the Senate, the House, there are differences. Within the Senate—one side of the aisle, the other side—there are differences. Within the Democratic Party, there are differences. We have struggled to find solutions that will make a difference, that we can afford. We have had to negotiate and compromise.

Now we vote in a few short hours. It is an extraordinary moment in history. There is nothing like it that I have ever seen. We vote, I believe, to improve access to affordable and meaningful coverage; to control runaway costs—we have to do that so the Medicare trust fund doesn't run out; and to rein in the health insurance industry's rapacious and, to me, lugubrious practices. I don't like them, and they don't like taking care of us, and they don't.

Am I disappointed that this legislation does not include a strong public option, like the one I first introduced, to keep private companies honest? Am I disappointed it does not include a sensible Medicare buy-in provision that should be a right for millions of Americans? Of course I am. Does that mean I turn my back and walk away from all of this because I didn't get everything I wanted? Of course not. I am a public official. I represent people, I represent their interests, even as they, maybe in the majority, oppose what we are doing here because they know not yet entirely what is in this bill. But when they do, they will feel differently. Am I disappointed that we were unable to expand Medicaid even more for our most vulnerable Americans? Yes, of course I am. I live in a State where, in the average hospital, 85 percent of all patients are either under Medicaid or Medicare. As my colleagues on the Finance Committee heard me say often, 50 percent of all babies born in West Virginia are born under Medicaid. That is the way it is there for the people I represent. Yes, of course I am disappointed that we do not have more, but I still believe those are among the best and right solutions in this bill for our health care system. They are the best we can do at this particular time, and it is a great deal that we are doing. It is an unavoidable fact that this bill does not do everything I had hoped for but, again, that would not justify turning my back on what the bill does achieve.

Why is it that we always seek out the negative and avoid the positive? It is because the negative is easier to talk about. It is easier to criticize than to do, than to collect people together under an umbrella.

The ultimate question cannot be what the bill does not do. It cannot end there because in so many ways what this bill does do is make good on the powerful promise of meaningful reform that millions of people have dreamt of, have prayed for, have fought for, for so long.

Passing health care reform will mean 31 million previously uninsured Americans will now get health care coverage. Excuse me, 31 million people—extraordinary. It is in the bill.

Passing health care reform will extend Medicaid so that vulnerable populations can get the health care they need.

Passing health care reform will close, almost, the doughnut hole that hurts 3.4 million seniors enrolled in the Medicare prescription drug program. Mr. President, 3.4 million seniors is a lot. So we close at least half the doughnut hole, and then we give people a bonus for this coming year. But by closing half, we are signaling that we are going to close it all. Health care now will be done each year, every year, to make things better.

Passing health care reform will mean the elimination of preexisting condition exclusions right away for our children. As soon as the exchanges are up and running, that will also apply to adults.

Passing health care reform will mean it is illegal for insurance companies to impose arbitrary limits, as they did annually on Samuel, or lifetime benefits, such as the Bord family faced so courageously.

Passing health care reform will mean insurance companies are required to spend more of their money—which comes from premiums we give them—on medical care, not fancy offices and executive salaries. They will be required to achieve a medical loss ratio of 85 to 90 percent. We shall see. They will have to prove it. We already have the numbers. We know where to go to get the numbers. Nobody has done it. So they can play in their shifty darkness and deprive people of things, take things away. People do not know where to go to complain, and they just get referred somewhere else. This will be the very first time they are held accountable—and they will be held accountable. They will be held accountable by the law, by congressional oversight, by a ferocity of attention on what health insurance has done to hurt so many people and how, now, they are going to behave in a very different manner whether they like it or whether they don't.

Passing health care reform will mean family coverage must include dependent children up to the age of 26. That is exciting. It is also immediate. But it is exciting because young people don't tend to get health insurance because they think nothing will happen to them. It actually doesn't work out like

that, and when they get hurt, somebody else has to pay. They should have their own health insurance, and so they are going to get it. They will not be outside the health care system; they will be inside the health care system.

Passing health care reform will mean protecting the Children's Health Insurance Program, or CHIP, which John Chafee and I wrote back in the mid-1990s and Ted Kennedy and ORRIN HATCH first established through the HELP Committee in 1997 in a show of bipartisanship—which, frankly, I am nostalgic for these days—which will cover more than 14 million children by the year 2013. Today, CHIP covers 7 million, but you see it has run out of its 10 years, so it has to be reauthorized. Then we add on 2 more years, and the program will keep going on and on, and children will have health insurance forever.

Passing health care reform will mean guaranteed prevention and wellness benefits for seniors so they can get the regular checkups that are so important. It is a big deal. Somebody told me once that there are about 9 million American seniors who live alone. In West Virginia, it might be on the tops of hills or it might be on some dusty plain, but they are basically alone, by themselves. They are aged, they have problems. Does anybody check in on them? Does anybody call them? Do they have a telephone? Have you eaten your food today? Do you have food? Are you OK? Did you fall down? Did you break your hip? Is there somebody to check? We have to do a lot better than that. Through this bill, we will.

Passing health care reform will mean we finally begin to get politics and lobbyists out of the business of deciding Medicare payments. That is very important for me because we can create new hope—perhaps our only hope—for keeping Medicare stable and solvent for the long term.

The list goes on and on—real, meaningful, life-changing and in some cases lifesaving new laws and new policies that will become law. Not since the creation of Medicare and Medicaid nearly 45 years ago has this body or the other body attempted to make a commitment as fundamental to our future in health care as we are doing here.

Fortunately, this commitment will not end with the passage of this legislation. We will not have to wait another 15 to 20 years to take up the cause of reform. Because of the intensity of the experience, the passion of the experience, the depth of the feeling in discussing the experience as we have talked back and forth with each other, this now becomes an annual commitment. We will be doing health care every single year until we get it exactly right. We have not gotten here by accident or by chance, and we will not get all the way across the finish line without more hard work and, hopefully, good will.

To those on the left who are disappointed in what this bill does not do—and in some cases, those folks are even calling for its demise—I implore you to reconsider, to be a part of this solution even as we keep working on others, which I promise you I will do, and I think you know that I mean what I say when I say it. To those on the right who in all these years somehow have not seen fit to accept any of the various options and ideas that are put on tables for comprehensive reform, I ask you to seek the facts, find the truth, follow the facts, follow the truth. There are legitimate disagreements between us about how best to solve the problems plaguing our health care system and hurting our people. But the status quo is unacceptable. Claims that we are rushing this process or have operated in secret are absurd. Claims that we will hurt seniors, close hospitals, take away people's choices are reckless and disingenuous.

Our work in this institution affects people's lives every single day in all the work we do for good or for ill. In public life, really, there is nothing neutral: you either do something that helps or you do something that hurts. We have a solemn responsibility to help our people in their hour of need, and that is the reason we are here. It is the only reason we are here—to achieve meaningful reform, not just in health care but in all other needs.

As somebody who has been involved in this debate from the very beginning and fought for strong reforms in the Senate Finance Committee, I know how far we have come to get here. And I, for one, am not going to allow this moment and its great promise to end in failure. The progress will be real. The greatly improved quality of life for millions of Americans will be its measure.

I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Madam President, I ask unanimous consent that after Senator HUTCHISON raises a point of order that the Reid substitute amendment No. 2786 is a violation of the Constitution, the point of order be set aside until after all postcloture time expires.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Texas.

Mrs. HUTCHISON. Madam President, I ask the distinguished Senator from Montana if, following the postcloture time, my point of order will be put in the queue for the votes if I ask for the yeas and nays?

Mr. BAUCUS. That is my understanding.

Mrs. HUTCHISON. Madam President, we truly are in uncharted waters. This bill has been written by the majority under a veil of secrecy. We are expected to vote on its final passage less than 2 days before families across the

country will be sitting down for holiday celebrations. Over the last weeks, my colleagues and I have spoken about some of the things we know to be problematic, ranging from unsustainable cuts to Medicare that will result in catastrophic reductions in care—make no mistake about that—to oppressive new taxes on individuals, medical devices, prescription drugs, and insurance companies that will clearly raise costs to consumers and stifle innovation, to taxes on small businesses at a time when we know our economy is on the brink. We are in a recession. We are asking businesses to hire people. Yet we are forcing burdens on them, taxes on them that would have the opposite effect. It would cause them not to take a chance to hire someone who will have the result of new mandates that go beyond all the expenses of an employee today. We have talked about that for the last 3 weeks.

Today I wish to talk about the concerns we have been able to have about 3 days to find on the constitutionality of parts of this bill. We have not had too much time to consider this. Certainly, constitutional issues will take much thought. But we do believe some of the bill's provisions do violence to our constitutional protections. Members, staff, and legal experts are scrambling by the majority's decision to draft a bill that we didn't have a chance to look at in detail because it only was released on Saturday, and we haven't had very much debate time on these legal issues.

I commend many of my colleagues for identifying one of my biggest concerns. The majority claims the commerce clause of the Constitution gives Congress the authority to adopt much of what it is we are looking at in this substitute before us. What I disagree with and what I don't think has been mentioned is, the power to regulate interstate commerce has not been the basis for a robust role in insurance regulation. Our States have the experience, the infrastructure in place to carry out this important regulatory role. In comparison, the Federal role in regulating private insurance has been limited. In fact, following the decision by Congress to exclude Federal agencies from any antitrust role in the insurance market, it is our States that have been charged with providing this regulatory oversight during the last 60 years. Yet usurping the role of the States in regulating health insurance is precisely what the substitute that has been put forward will do.

Creating a big role for the Federal Government in health care will also usurp States, rights that have been in place for over 60 years. Consider, for a moment, that the commerce clause is being suggested to allow Congress to not only regulate a channel of commerce that historically has been addressed by States but for Congress to

actually direct the American people to purchase a specific product or service. Everyone within the sound of my voice should be alarmed that Members of Congress actually believe our Constitution, which enumerates and protects our liberties and choices, can be perverted to require Americans to purchase something they may not want and may feel they do not need. Such a view is totally at odds with our Constitution. I believe strongly the individual insurance mandates in this bill are unconstitutional.

The person who has raised the point of order is also on the floor with me, Senator ENSIGN from Nevada. He is going to cover that area. It is essential we address it.

I wish to raise another area where I think we also have transgressed over the Constitution. That is the trampling of the rights of our States under the 10th amendment. I taught constitutional law. I have studied the background of the Constitution. I have looked at many facets of it. I can't say I am a constitutional scholar. I am a lawyer. I have taught this subject.

I wish to read the very clear and simple 10th amendment. The 10th amendment has made clear the following:

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively or to the people.

That is it. The beauty of our Constitution is, it is a very limiting document. That is why it is short. Everything not specifically given to the Federal Government in the Constitution is reserved to the States or to the people. That is the beauty of our Constitution. The reason it is short is because the powers were meant to be limited. What was reserved to the Federal Government was meant to be limited because our Founders knew the government closest to the people and the people should be responsible for most of the laws of the country.

Today, in the bill we have before us, we have a State, such as my State of Texas and many States across the country, which have taken full responsibility for creating, maintaining, and providing oversight for a health insurance plan and will now have to justify changes to the terms of the insurance plan to the Federal bureaucrats.

My State of Texas has created a fully self-insured plan for State employees and for our teachers so creation, administration, and oversight will be within the realm of the State. I believe it is very important, when we look at the bill before us, to see that the States now are going to be required, similar to every insurance provider, to justify with the Federal Government changes in premiums. The States are going to have to now put forward all the background, what they are doing in their self-insured plans, and justify it before the States, apparently, will be able to go forward.

Of course, there is going to be a book written on the meaning of "justify." I can see it coming. What exactly does justify mean? I don't think we have to go that far to write the book on what justify means because this is an encroachment on the rights of the States guaranteed by the 10th amendment. Not only does it walk away from the words themselves of the 10th amendment but walks away from what the Founding Fathers intended; that is, that it is the prerogative of the States to make the laws that affect the people. Even Congress, for the last 60 years, has kept the Federal Government restrained pretty much—not completely but pretty much—from mandates and regulation of insurance plans. There are some, but it has largely been left to the States. The States have provided the infrastructure for what can be offered in a State. But here we go. In what is supposed to be the reform of our health care system, we are taking away the rights, the prerogatives of the States, and also the expertise the States have come to have put together and formed through the years. The big Federal Government takeover is going to begin.

Let me mention a 1992 case by the Supreme Court, which stated, in *New York v. United States*:

The Framers explicitly chose a Constitution that confers upon Congress the power to regulate individuals, not States.

I have asked the attorney general of Texas to use every resource at his disposal to investigate the provisions in this legislation and to challenge any unconstitutional attempt to limit the authority of Texas to carry out its regulatory responsibilities in the insurance market or to provide for the insurance needs of its employees and the teachers of Texas through the State health insurance plans. The attorney general of Texas has already said he is going to challenge the constitutionality of treating one State differently from all the other 49 and the taxation of our residents in Texas because of the exemption of the State of Nebraska from the Medicaid responsibilities that every other State is going to have. Of course, every other State will pick up the tab for this Nebraska exemption. The attorney general of Texas is on it, just like the attorney general of South Carolina and probably many more by the time we will end this day.

It is important we also stand on 10th amendment grounds for the States to be able to put forward a self-insurance plan for its employees without the permission of the Federal Government, and I feel-duty bound to question the constitutionality of this bill on 10th amendment grounds.

Therefore, Madam President, I make a constitutional point of order against the substitute amendment on the grounds that it violates the 10th

amendment of the Constitution, and I ask for the yeas and nays.

The PRESIDING OFFICER. Under the precedents and practices of the Senate, the Chair has no power or authority to pass on such a point of order. The Chair, therefore, under the precedents of the Senate, submits the question to the Senate. Is the point of order well taken?

The yeas and nays have been requested.

Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Under the previous order, the vote on this question will occur after all postcloture time expires.

Mrs. HUTCHISON. Thank you, Madam President. That is my understanding. I very much appreciate the opportunity to bring this forward.

I think now that we are finally beginning to digest this bill, we are seeing several areas where points of order have been raised, and I hope some of these will send this bill back to the drawing board, where it belongs, to have health care reform that will do what we intended to do when we started; that is, bring down the cost of health care, make more affordable health care possible for more people in this country. If we could do that, on a bipartisan basis, I think the people of America, as they sit down for their holiday celebrations with their families, would have been well served.

I implore my colleagues to look at the points of order that will be voted on postcloture today and think about the consequences of passing this monstrous piece of legislation that is going to alter the quality of life for every individual, every family, every small business in this country.

Let's start again and do it right. Doing it fast should not be the goal. Doing it right is what we should pursue. I hope my colleagues, before we finish this process, will come back with something we can all be proud of and not something that is going to pass on a strictly partisan vote.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. ENSIGN. Madam President, I wish to first compliment the Senator from Texas on her raising a different constitutional point of order. There are several ways in which this bill violates the Constitution. I have raised a constitutional point of order, where I believe this bill violates the enumerated powers under article I, section 8 of the Constitution, as well as the fifth amendment takings clause of the Constitution.

I see the senior Senator from Utah is in the Chamber. He is going to talk about several other problematic provisions in the bill that is before us today.

This is the Constitution of the United States, which I hold in my hand. There are several other documents in here, but that is how short the Constitution of the United States is—this short, concise document that limits the powers of the Federal Government. Our Founders were afraid of a powerful central government, so they put down on paper the powers they granted to this body, the House of Representatives, and the rest of the Federal Government.

When each one of us comes to this floor, after we are elected, we raise our right hand, put our hand on the Bible, and take an oath to defend and protect the Constitution of the United States. We do not take an oath to reform health care or to do anything else that we may think is good to do. Anything on health care or any other good provision we want to enact has to fit within the limited powers that are listed within the Constitution of the United States.

That is the oath, the solemn oath, each and every Senator takes. That is what each and every one of us needs to think about when we are voting on this constitutional point of order.

I wish to make a couple points very briefly in one area where I think, on the individual mandate, this bill violates the U.S. Constitution. Nowhere, at no time, has this government, this Federal Government, ever passed a law that requires people who do nothing to engage in economic activity. In other words, if this bill passes and then you choose not to buy health insurance, this bill requires you to purchase health insurance. If you do not do that, it charges you up to 2 percent of your income. So this bill is telling you, just because you exist as a citizen of the United States, you must do something.

The United States has never, in its history, ever passed something such as this. This will dramatically expand the powers of the Federal Government, if this bill is passed, and if, God forbid, the Supreme Court upholds this piece of legislation.

I have read a lot of articles—and I submitted several of them yesterday—by constitutional scholars, who believe this bill is unconstitutional. Even folks who believe it is constitutional, some folks on the left, concede that there are legitimate arguments against the bill's constitutionality. They also recognize that there is potential that it is unconstitutional. So this is not some wild-eyed radical debate. This is a legitimate debate about what this document, this Constitution of the United States, actually means.

I am not a lawyer similar to a lot of the other Members of the Senate, but I understand the importance of a pretty plain reading of the Constitution's text.

Within the enumerated powers, and within the fifth amendment, there are

limitations on what this Congress can do. The Supreme Court has held that the interstate commerce clause, for instance—gives this body certain power to regulate commercial activity. Even activity of an individual that is intrastate in nature can be regulated if it has the potential to somehow substantially affect interstate commerce.

Unfortunately, this bill goes beyond even regulating any kind of commercial activity. It goes to regulating non-economic inactivity. It says: If you choose not to do something, we are going to regulate you and we are going to tax you if you do not behave. This is a very dangerous precedent for the Congress to set. I made the point yesterday; others have made this point—if we could just require citizens to purchase certain things, why did we need a cash-for-clunkers bill? The reality is we lack the power to just tell people: Go out and buy a car.

The government is allowed to provide certain incentives for people to do activity that maybe they were not going to do. But Congress does not have the power to actually tell citizens what to do, in that case, to regulate inactivity.

There are all kinds of things this government could tell people what to do if something such as this precedent is upheld today. This is incredibly dangerous, and the people of America need to wake up and the people who are voting for this bill need to analyze the unintended consequences and the massive expansion of power this bill will provide for, if this bill passes, and if the Supreme Court does not strike it down.

I am going to yield because I have listened to the senior Senator from Utah talk eloquently about the provisions that are unconstitutional. He is much more of a constitutional scholar than I would ever dream to be. I hope everybody pays close attention to what he is saying and thinks about that oath each one of us made when we raised our right hand to defend and uphold the Constitution. Are we doing that if we vote for this bill?

I yield the floor.

THE PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Madam President, I thank my gracious colleague, and I am grateful for his kind words.

Each Member of this body has taken an oath to support and defend the Constitution of the United States. Not any Constitution, not their own personal Constitution, not a fake or pretend Constitution, but the real Constitution of the United States. That means that there will come times when politics says yes, but the Constitution says no. There will come times when the grand plans and good intentions of politicians meet the limits of the Constitution. I submit that this is one of those times, and the constitutional point of order raised by the Senator from Nevada presents each of us with the choice of

whether politics or the Constitution will win the day. I choose the Constitution and will vote to support the point of order.

America's founders gave us a written Constitution that delegates certain powers to the Federal Government, separates those powers among three branches, and enumerates the powers given to Congress. They did all of that writing, delegating, separating, and enumerating for one overriding reason, to set limits on Federal Government power because liberty cannot survive without such limits. As Justice Sandra Day O'Connor reaffirmed in 1991 when writing the Supreme Court's opinion in *Gregory v. Ashcroft*, our system of federalism and the separation of powers "was adopted by the Framers to ensure the protection of our fundamental liberties." Liberty requires limits on government power, it always has and it always will. The question for us today is whether liberty is still more important than power.

The Members of this body have our own, independent responsibility to ensure that the actions we take are consistent with the Constitution we have sworn to support and defend. We cannot simply assume that the Constitution necessarily allows us to do whatever we may want to do. And we cannot ignore this question by simply punting it to the courts. Litigation is likely, to be sure, which means that the courts will be asked to decide certain legal questions, including whether this legislation is constitutional. Judges also take an oath to support and defend the Constitution and must exercise the powers it grants to them. Speculating about how courts may decide a hypothetical case in the future, however, is no substitute for Senators making a decision about an actual piece of legislation today.

The Constitution cannot limit government if government controls the Constitution. If the Constitution means whatever we want it to mean, then we might as well take an oath to support and defend ourselves. Frankly, that is what it seems like we do sometimes. But we cannot take the power the Constitution provides without the limits the Constitution sets.

Turning to the legislation before us, we all want to see a higher percentage of Americans covered by health insurance. That is a desirable goal, but my friends on the other side of the aisle would achieve that goal with a very blunt instrument, an order that Americans purchase health insurance. That is a means that the Constitution does not permit. While the Constitution gives Congress power to regulate interstate commerce, that power does not mean anything and everything we want to mean. Those words are not infinitely malleable. I agree with the 75 percent of Americans who say that this mandate to purchase health insurance is

unconstitutional because Congress's power to regulate interstate commerce does not include telling Americans what they must buy.

When President Franklin D. Roosevelt chose Frances Perkins as his Secretary of Labor, they discussed social policy legislation including health insurance. As Secretary Perkins later described it, they agreed that such legislation would pose "very severe constitutional problems," including fundamentally altering Federal-State relationships. That is why the Social Security Act uses the payroll tax. Even the Roosevelt administration, which oversaw the most dramatic expansion of federal power in our Nation's history, would not go as far as the legislation before us today would go. Even they knew that the Constitution put certain means off limits.

The goal of raising the percentage of Americans with health insurance could be achieved by constitutionally permissible means. My friends on the other side of the aisle know as well as I do, however, that those means are politically impossible. And so they have chosen politics over the Constitution, and that is why I will support the constitutional point of order.

In 1995, the Supreme Court reaffirmed that there are indeed limits on the means Congress may use to achieve its goals. The Court rejected a version of the power to regulate interstate commerce that would make it hard to imagine any activity by individuals that Congress could not regulate. The legislation before us would not only regulate economic transactions in which individuals choose to engage, it would require that they engage in those transactions. This is the first time that Congress has ever ordered Americans to use their own money to purchase a particular good or service. Crossing that line would do exactly what the Supreme Court said we may not do, and would virtually eliminate whatever limits remain on federal government power. That would deprive the Constitution not only of its meaning, but of its function as a guardian of liberty. I urge my colleagues to put the Constitution ahead of politics and support this point of order.

There is a lot of talk from the majority about why passing this bill is the right thing to do for the American people. It is a decision of conscience for them. Well, let us take a closer look at these decisions of conscience.

After weeks of closed-door, clandestine negotiations, Senator REID finally emerged with a 383-page Christmas list. This bill is a dark example of everything that is wrong with Washington today. Despite all the promises of accountability and transparency, this bill is a grab bag of Chicago-style, backroom buyoffs. It is nothing more than a private game of "Let's Make A Deal" with the special interest groups financed by American taxpayers.

So who won and who lost in this game? Well, let's take a closer look. The AARP issued a strong statement of support for this bill. The Reid bill slashes Medicare by almost a \$½ trillion to finance additional government spending. So why would the Nation's largest lobbying organization, avowed to protect the interests of seniors, support this legislation? To find the answer, similar to anything else in Washington, follow the money.

AARP takes in more than half its \$1.1 billion budget in royalty fees from health insurers and other vendors. The sale of supplementary Medicare policies, called Medigap plans, make up a major share of this \$1.1 billion royalty revenue. AARP has a direct interest in selling more Medigap plans. However, there is a strong competitor to Medigap policies, and that happens to be the Medicare Advantage plans.

These private plans provide comprehensive coverage, including vision and dental care, at lower premiums for nearly 11 million seniors across the country. Seniors enrolled in Medicare Advantage do not need Medigap policies. So what happens when the Reid bill slashes this program by almost \$120 billion? That is with a "b."

Look at the Washington Post front-page story from October 27, questioning whether AARP has a conflict of interest. I quote:

Democratic proposals to slash reimbursements for . . . Medicare Advantage are widely expected to drive up demand for private Medigap policies like the ones offered by AARP, according to health-care experts, legislative aides and documents.

One of the most disturbing developments in the Reid bill has been the perpetuation and even the doubling of the unconstitutional mandate tax from \$8 billion to \$15 billion. You heard me right. This unconstitutional mandate tax actually doubled behind closed doors. I have long argued that forcing Americans to either buy a Washington-defined level of coverage or face a tax penalty collected through the Internal Revenue Service is highly unconstitutional.

We hear a lot of rhetoric from the other side about Republicans defending the big, evil insurance companies while they are the defenders of American families. The insurance mandate is a clear example of this partisan hypocrisy. Let me ask one simple question. Who would benefit the most from this unprecedented, unconstitutional mandate to purchase insurance or face a stiff penalty enforced by our friends at the Internal Revenue Service?

The answer is pretty simple. There are two clear winners under this draconian policy—and neither is the American family. The first winner is the Federal Government, which could easily use this authority to increase the penalty—or impose similar ones—to create new streams of revenue to fund more out-of-control spending.

Second, the insurance companies are the most direct winners under this individual insurance mandate because it would force millions of Americans who would not otherwise do so to become their customers. I cannot think of a bigger giveaway for insurance companies than the Federal Government ordering Americans to buy their insurance products. If you do not believe me, then just look at the stock prices of the insurance companies that have recently shot to their 52-week highs.

Jane Hamsher, the publisher of the very liberal blog Firedoglake, said the following in a recent posting:

Having to pay 2 percent of their income in annual fines for refusing to comply with the IRS acting as the collection agency just might wind up being the most widely hated legislation of the decade. Barack Obama just might achieve the bipartisan unity on health care he always wanted—Democrats and Republicans are coming together to say "kill this bill."

Now that we clearly understand the huge windfalls the Reid bill provides AARP and insurance companies, let me take a moment to talk about the winners and losers in the so-called abortion compromise.

The language to prevent taxpayer dollars from being used to fund abortions is completely unacceptable. The new abortion provisions are significantly weaker than the amendment I introduced with Senator BEN NELSON to ensure that the Hyde amendment, which prohibits use of Federal dollars for elective abortions, applies to any new Federal health programs created in this bill. The Hyde amendment has been public law since 1976.

The so-called abortion compromise does not stop there. The Reid bill creates a State opt-out charade. However, this provision does nothing about one State's tax dollars paying for abortions in other States. Tax dollars from Nebraska can pay for abortions in California or New York.

This bill also creates a new public option run by the Office of Personnel Management that will, for the first time, create a federally funded and managed plan that will cover elective abortions.

When you have Senator BOXER, the distinguished Senator from California, and Speaker PELOSI, the distinguished Speaker of the House of Representatives—two of the largest pro-abortion advocates in the Congress—supporting this sham so-called compromise and everyone from the U.S. Conference of Catholic Bishops to the National Right to Life Committee and the Family Research Council opposing it, there is only one clear loser, and that is the majority of Americans who believe in the sanctity of life and oppose the use of Federal dollars for elective abortions.

Last, but not least, I wish to spend a couple of minutes talking about the numerous special deals conferred on States in this \$2.5 trillion spending bill.

How hefty are the price tags for decisions of conscience? Here are some highlights: \$300 million for Louisiana, \$600 million for Vermont, \$500 million for Massachusetts, \$100 million for Nebraska, and that is just the beginning.

At a recent news conference, when the authors of this legislation were asked about the Nebraska earmark for Medicaid funding, the majority leader simply replied:

A number of States are treated differently than other States. That's what legislation is all about. That's compromise.

The next logical question is pretty straightforward: Who will pay for these special deals? The answer is simple: Every other State in the Union will pay for these special deals, including my home State of Utah. All of these States that are collectively facing \$200 billion in deficits and are cutting jobs and educational services to survive will now pay to support these special deals.

According to the Congressional Budget Office, the Medicaid expansion in the Reid bill creates a \$26 billion unfunded mandate on our cash-strapped States.

Coincidentally, only one State avoids this unfunded mandate; that is, the State of Nebraska.

Of course, let's not forget about the biggest loser in this bill: the hard-working American taxpayer. This bill imposes over $\$1\frac{1}{2}$ trillion worth of new taxes, fees, and penalties on individuals, families, and businesses. The new fees begin in 2010, while the major coverage provisions do not start until 2014. Almost \$57 billion in new taxes are collected before any American sees the major benefits of this bill, which are largely delayed until 2014, assuming they are benefits at all.

It is also no coincidence that through the use of these budget gimmicks, the majority can claim this bill reduces our national deficit when we all know these reductions will never, ever be realized.

Based on data from the Joint Committee on Taxation, the nonpartisan congressional scorekeeper, this bill would break another one of President Obama's campaign promises by increasing taxes on 42 million individuals and families making less than \$250,000 a year. At a time when we are struggling to fight a double-digit unemployment rate, the Reid bill not only increases payroll taxes by nearly \$87 billion but also imposes \$28 billion in new taxes on employers that do not provide government-approved health plans. These new taxes will ultimately be paid by American workers in the form of reduced wages and lost jobs.

However, it is hard to say we didn't see these new taxes coming. For years now, many of us have warned that the out-of-control spending in Washington would eventually have to be repaid on the backs of American families. In this bill, the repayment comes in the form

of stifled economic growth, lost jobs, and new and increasing taxes—and they are just the first installment of what will be a long and painful extortion of taxpayers if Congress doesn't stand up and stop these terrible bills. According to a recent study of similar proposals by the Heritage Foundation, these new job-killing taxes will place approximately 5.2 million low-income workers at risk of losing their jobs or having their hours reduced and an additional 10.2 million workers would see lower wages and reduced benefits.

Poll after poll tells us about the growing opposition against this tax-and-spend health care bill. The latest Rasmussen poll shows that 55 percent of Americans are now opposed to this bill. The CNN poll is an even higher 61 percent. Among senior citizens, the group most likely to use the health care system, only 33 percent are in favor while 60 percent are opposed. Independent voters are also opposed 2 to 1. Opposition in certain State polls such as Nebraska is even higher at 67 percent.

So what is the majority doing to address these concerns? Nothing. In fact, despite the efforts by many of us here on this side of the aisle to express our substantive policy disagreements for months, one Senator recently said the following:

They are desperate to break this President. They have ardent supporters who are nearly hysterical at the very election of President Barack Obama. The birthers, the fanatics, the people running around in right-wing militia and Aryan support groups, it is unbearable to them that President Barack Obama should exist.

That statement is outrageous. It was made by a very dear friend of mine, and I know he probably didn't mean it the way it comes out, but it is outrageous.

Instead of listening to the policy concerns of a majority of Americans, the other side is simply dismissing them as rants from the far right. If the majority refuses to listen to what Americans are telling them now, I am sure they are going to have a rude wake-up call later. It should come as no surprise that this kind of arrogance and power has led to congressional approval ratings rivaling the most hated institutions on the planet at a dismal 22 percent and falling.

One of the biggest tragedies of letting this bill move forward is that it will do nothing to address the fundamental issue of rising health care costs in this country. According to the Congressional Budget Office, CBO, this bill will actually raise our national health care costs by \$200 billion. The administration's own Actuary at the Centers for Medicare and Medicaid Services, CMS, agrees with this assessment.

When this bill fails to work, Americans will no longer have anything in Congress to effectively address the issue of health care reform. The opportunity to save Medicare and Medicaid

from their impending financial collapse will be lost for another generation.

The historic blizzard in Washington earlier this month was the perfect symbol of the anger and frustration brewing in the hearts of the American people against this bill. I urge the majority once again to listen to the voices of the American people. Every vote for this bill is the 60th vote. Let me repeat that again. Every vote for this bill is the 60th vote. My Republican colleagues and I are united with the American people in our fight against this \$2.5 trillion tax-and-spend bill. I implore my colleagues not to do this to the American people. Don't foreclose on their futures. Don't stick them with even more government spending and more government intrusion.

We can fix health care. Many of us have been working to do just that for many years. A truly bipartisan bill that would garner 75 to 80 votes, which has always been the case in the past on these major pieces of legislation in the Senate, would be fiscally sound and provide the American people with the fixes they are asking for in the health care marketplace, and it would be easily achievable if we would just open our hearts and work together. Many of us are standing at the ready, and have been for months, to step forward and pass meaningful health care reform that truly would help American families and please American taxpayers. To date, we have been rebuffed by an unfailing determination by a few to pursue a nearly Socialist agenda.

I would ask my colleagues on the other side of the aisle who do not believe in the Europeanization of America, who believe in doing truly bipartisan work here in the Senate, to step forward and vote against advancing this bill and work with those of us on this side of the aisle who are committed to making a difference to craft a health care reform bill they can be proud to support.

Having said that, I do praise my colleague and friend from Montana, Senator BAUCUS, who literally did try for months in many meetings with first the Gang of 7—I was in that and then finally decided I could not support what they were going to come up with and expressed to my colleagues that I would have to in good conscience leave the negotiations. He tried, but he was too restricted in what he really could do, so that in the end no Republican supported what was done. We had a totally Democratic bill in the HELP Committee, a totally Democratic bill with the Pelosi bill in the House, and the Reid bill has been done in back rooms here with the White House, with very few even Democrats involved, and many of the things some of my friends worked so hard to get in the bill were no longer in it.

Let me just say there are good people in this body on both sides of the floor,

but I have suggested in times past and I suggest it again: If you can't get 75 or 80 votes for a bill that affects every American, that is one-sixth of the American economy, then you know that bill is a lousy bill.

There are many on our side of the aisle who have stood ready, willing, and able to try to do something in a bipartisan way. I have spent 33 years here, and I have participated in a bipartisan way to help bring both sides together on all kinds of health care bills that work. This one would work, too, if we would just work in a bipartisan way.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. ENSIGN. Madam President, I wish to make a couple of points regarding the constitutional point of order I raised on the individual mandate.

Some folks have said that States mandate car insurance, that is require people who drive to carry car insurance; therefore, the Federal Government can mandate the purchasing of health insurance to individuals. Well, I think that should be pretty obvious that States can do things that the Federal Government cannot. The Constitution limits the Federal Government as to what it can do and it reserves the power for the States and/or the people. Senator HUTCHISON raised this exact point in her constitutional point of order relating to the 10th amendment.

So this mandate of buying car insurance—comparing it to the mandate to buy health insurance from the Federal Government is a false comparison. The Federal Government cannot mandate you to buy car insurance, nor can it mandate you to buy health insurance. It is not within the enumerated powers given to this body and to this Federal Government in the Constitution.

This bill is a real threat to liberty because of the precedent it sets on the Federal Government being able to tell individuals what to do.

I wish to quote from a couple of articles that have been written. This one was written by David Rivkin and Lee Casey. I am quoting:

But Congress cannot so simply avoid the constitutional limits on its power. Taxation can favor one industry or course of action over another, but a "tax" that falls exclusively on anyone who is uninsured is a penalty beyond Congress's authority. If the rule were otherwise, Congress could evade all constitutional limits by "taxing" anyone who doesn't follow an order of any kind—whether to obtain health-care insurance [in this case] . . . or even to eat your vegetables.

It literally sets the precedent to dramatically expand the powers of the Federal Government far beyond anything our Founders wrote and limited this Congress to doing in the Constitution.

I see the Republican whip here, and I wish to yield to him because of his expertise on the Constitution.

I want to make a real quick point reading from another article. I commend this article to our colleagues by Randy Barnett and Nathaniel Stewart and Todd Gaziano. It said:

Never in the nation's history has the commerce power been used to require a person who does nothing to engage in economic activity.

There are constitutional experts out there telling us this bill is doing something the Federal Government has never done in its history. So I go back to this United States Constitution.

When we take an oath to defend the Constitution, we better take that as a solemn oath and think about whether we are violating that oath we swore to uphold and defend when we are voting on this bill.

You must uphold this constitutional point of order. It is not just up to the Supreme Court; it is up to us. We don't just say we will pass anything, whether it is constitutional or not, and let the Supreme Court decide. That is the oath we take. It is our responsibility to uphold and defend the Constitution. We must think about that when we are passing something here. That is the reason we have this authority to bring a constitutional point of order, so that this body considers whether it is constitutional. That is why we must consider the consequences of greatly expanding the powers of the Federal Government in this bill, which are so dramatic that the threat to liberty is very real.

I yield the floor to the Republican whip so he can make some comments.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. Madam President, I compliment my colleague who has raised a most important constitutional point. It is true, as Senators, we have an obligation not just to throw questions to the Supreme Court but to use our best judgment as to whether we would be violating the Constitution by adopting them.

I think the point of order he raises with respect to the 10th amendment is a very important question and should be carefully considered by our colleagues. I think you can only come to one conclusion. I support what he is trying to do.

I also want to make another point, which is that around the country people are calling in and raising questions about other aspects of the bill, also raising similar questions—the imposition of a supermajority rule, for example. Can one Congress bind another in that regard? We are only now learning of all of these things, and our constituents are only learning of them because the most recent amendment was filed just a few days ago.

As we read through it and begin to realize its implications, a lot of questions are being raised. The question I want to raise today goes right to the

heart of the claim that supporters have made for this legislation; that is, that it reduces the Federal budget deficit. Many colleagues on the other side of the aisle have said: I could not vote for this bill if it did not reduce the Federal budget deficit, or at least if it were not deficit neutral.

It turns out that from information received today from the CBO, it is not deficit neutral. In fact, it adds at least \$170 billion to the deficit, which, of course, is very important since tomorrow we are going to be asked to increase the temporary debt ceiling. This legislation will add to our Federal debt, not make the situation better, as many of our colleagues have claimed.

I will describe why that is so. I heard another colleague on the other side on a talk show this morning say that we are going to extend the fiscal life of Medicare by 9 years. That is a claim that directly conflicts with the claim that the bill is budget neutral.

What both the CMS Actuary and the CBO have now said is, no; both are not true. There is only one sum of money. You can either extend the life of Medicare with that money, or you can buy a new entitlement under the bill with that money. But you cannot do both.

So if that money is spent on the new entitlement, for example, it cannot extend the life of Medicare. It cannot show a budget surplus of \$130 billion.

In effect, they are saying you can't sell the same pony twice. Here is exactly what the Congressional Budget Office had to say about it this morning. Incidentally, we were tipped off to this by a comment that was in the body of a letter from the CMS Actuary last week, or December 10, and as we read through it and tried to analyze the new amendment that was just filed, it became clear that, in effect, that is precisely what is being done by the other side.

I am not suggesting duplicity. What I am suggesting is that they, too, have been misled by the arcane accounting language, and until it became crystal clear with the language today, I can understand why there would be confusion—but no longer. You cannot vote for this bill this afternoon and claim not to have known that it both buys an extension of the trust fund for Medicare and claims to buy a surplus of \$130 billion.

Here is what the CBO says today, December 23, which is posted on their Web site:

The key point is that the savings to the HI trust fund under this bill would be received by the government only once, so they cannot be set aside to pay for future Medicare spending and at the same time pay for current spending on other parts of the legislation.

In other words, the new entitlements that are allegedly paid for under the bill. Here is the last sentence:

To describe the full amount of the HI trust fund savings as both improving the government's ability to pay future Medicare benefits and financing new spending outside of Medicare would essentially double-count a large share of those savings and thus overstate the improvement in the government's fiscal position.

It would essentially double-count the money. That is the point Senator GREGG and Senator SESSIONS and I tried to make earlier this morning.

This is new information, I grant you. But it is an illustration of why we should not try to force this bill to a vote before Christmas, when we haven't tried to figure out what this all means and the American people haven't had an opportunity to react to it.

I quoted to you from the CBO, the nonpartisan office that tells us what the fiscal impact is. Here is what tipped us off: Richard Foster, the CMS Chief Actuary, had sent a letter. This phrase caught our attention. He said:

In practice, the improved part A financing cannot be simultaneously used to finance other Federal outlays, such as the coverage expansion under this bill and to extend the trust fund. Despite the appearance of this result from the respective accounting conventions.

Despite the fact, in other words, that it appears you can do both because of the way the government accounting is, it is only one pot of money. You cannot use it to extend the life of Medicare on one hand and buy new entitlements and show a budget surplus on the other.

This is what happens when you try to rush a bill through like this too quickly. Many colleagues on the other side of the aisle have said: I will not vote for a bill that is not budget neutral or creates a budget deficit. Then they cannot vote for this legislation now that CBO has said what it has said. Some of them won't realize that. That is why I came to the floor.

I compliment Senator SESSIONS for talking to the Director of the Budget Office last night and confirming this, asking him if he would put it in writing, which he did.

I think this is a game changer, my friends. If, now that you have this knowledge, you still go forward and vote for the legislation, those of you who have made the pledge not to do so will be violating that pledge. You can't use the same pot of money to do two separate things, as the CBO said. They describe it this way: You can't do both of these things. You would essentially double-count a large share of that savings and thus overstate the situation.

Mr. SESSIONS. Will the Senator yield for a question?

Mr. KYL. Yes.

Mr. SESSIONS. The earlier statement from CBO was that the legislation would result in reducing the deficit by \$132 billion, which was cited several times. Well, that was obviously

before the statement that was issued today. In boiling it down—and the Senator is an accomplished lawyer—doesn't this say there is a misimpression created by that previous statement and that this statement today clarifies it, making absolutely clear that it is not creating a surplus or reducing the debt but, in fact, increasing the debt?

Mr. KYL. Madam President, that is exactly right. The title of the document is "Effects of the Patient Protection and Affordable Care Act on the Federal Budget and the Balance in the Hospital Insurance Trust Fund." He starts out by saying CBO has been—

Mr. BAUCUS. Will the Senator yield for a question?

Mr. KYL. Madam President, I will be happy to in a moment. I ask unanimous consent that the CMS report, dated December 10, be printed in the RECORD following the colloquy so that people can follow what we have done.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HEALTH & HUMAN
SERVICES, CENTERS FOR MEDICARE
& MEDICAID SERVICES,
Security Boulevard, Baltimore, MD.
OFFICE OF THE ACTUARY

Date: December 10, 2009.

From: Richard S. Foster, F.S.A., *Chief Actuary.*

Subject: Estimated Effects of the "Patient Protection and Affordable Care Act" on the Year of Exhaustion for the Part A Trust Fund, Part B Premiums, and Part A and Part B Coinsurance Amounts.

In addition to proposals to expand health insurance coverage, the "Patient Protection and Affordable Care Act of 2009" (PPACA) includes numerous provisions that would reduce Medicare costs and one that would increase the Hospital Insurance payroll tax rate for high-income individuals and families. This memorandum describes the estimated impacts of the PPACA, as proposed by Senate Majority Leader Harry Reid on November 18, 2009, on the date of exhaustion for the Medicare Hospital Insurance (Part A) trust fund, on Part B beneficiary premiums, and on the average level of Part A and Part B beneficiary coinsurance.

We estimate that the aggregate net savings to the Part A trust fund under the PPACA would postpone the exhaustion of trust fund assets by 9 years—that is, from 2017 under current law to 2026 under the proposed legislation.

The combination of lower Part A costs and higher tax revenues results in a lower Federal deficit based on budget accounting rules. However, trust fund accounting considers the same lower expenditures and additional revenues as extending the exhaustion date of the Part A trust fund. In practice, the improved Part A financing cannot be simultaneously used to finance other Federal outlays (such as the coverage expansions under the PPACA) and to extend the trust fund, despite the appearance of this result from the respective accounting conventions.

The estimated postponement of asset exhaustion for the Part A trust fund does not reflect the relatively small impact on HI payroll taxes due to economic effects of the legislation or the small increase in adminis-

trative expenses under the legislation. As noted in our December 10, 2009 memorandum on the estimated financial and other effects of the PPACA, reductions in Medicare payment updates to Part A providers, based on economy-wide productivity gains, are unlikely to be sustainable on a permanent annual basis. If such reductions were to prove unworkable within the period 2010–2026, then the actual HI savings from these provisions would be less than estimated, and the postponement in the trust fund exhaustion date would be reduced.

The Medicare expenditure reductions under the PPACA would also affect the level of Part B premiums paid by enrollees and the Part A and Part B beneficiary coinsurance amounts. The following table presents these estimated impacts:

CY	Part B Premium Impact (change in monthly premium amount)	Coinsurance Impact (change in yearly per capita amount)	
		Part A	Part B
2010	\$0.00	\$0	\$90
2011	1.80	–1	22
2012	–3.10	–4	–37
2013	–4.60	–8	–55
2014	–5.30	–13	–64
2015	–7.20	–18	–86
2016	–9.00	–23	–108
2017	–10.80	–28	–129
2018	–12.50	–34	–151

As indicated, Part B premiums and average coinsurance payments would initially increase, reflecting higher overall Part B costs under the PPACA in 2010 as a result of the provision to postpone the 21.3-percent reduction in physician payment rates that would be required for 2010 under current law. Thereafter, there would be steadily increasing savings to Part B and associated reductions in the Part B premium and coinsurance averages. Similarly, the Part A savings under the PPACA would result in lower beneficiary coinsurance payments for inpatient hospital and skilled nursing care. As before, all of these results are conditional on the continued application of the productivity adjustments to the Medicare "market basket" payment updates.

Expenditure reductions under Part B translate directly to lower financing requirements from general revenues and beneficiary premiums, since financing is re-established annually to match program costs. Thus, in the case of Part B, the savings under the PPACA are not needed to help pay for future Part B benefit costs, and the full reduction in Federal general revenues attributable to such savings can be used to offset other Federal costs, such as those arising under the PPACA coverage expansions.

Mr. KYL. I am now happy to yield.

Mr. BAUCUS. I ask my good friend from Arizona, is it not true that the last statement from CBO, on the degree to which the underlying legislation does or does not reduce the deficit, stated that the legislation reduces the deficit by \$132 billion—that is the last statement after addressing the deficit—and also stating that at the end of the decade, the deficit will be reduced between \$630 billion and \$1.3 trillion? Isn't that the last statement from CBO addressing the question on whether this legislation reduces or increases the deficit. Isn't that true?

Mr. KYL. Madam President, I don't know the document that my friend is referring to as "the last document." I

think that document, dated December 23, today, is the last document.

Mr. BAUCUS. This is from a day or two ago. It is the CBO letter commenting on the modification.

Mr. KYL. I don't know. I am not aware of that. My point is this: The document released today, in order to clarify the situation again, said the key point is that you can't do both. The government only gets the money once. Therefore, they say, to describe the full amount as both providing a savings to Medicare and providing a surplus essentially double-counts the money and thus overstates the improvement in the government's position.

Mr. BAUCUS. Will the Senator further yield?

Mr. KYL. I will not yield now. I have a unanimous consent request.

I ask unanimous consent that a Washington Post op-ed by Michael Gerson, dated December 23, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 23, 2009]

FOR SALE: ONE SENATOR (D-NEB.); NO PRINCIPLES, LOW PRICE

(By Michael Gerson)

Sometimes there is a fine ethical line between legislative maneuvering and bribery. At other times, that line is crossed by a speeding, honking tractor-trailer, with outlines of shapely women on mud flaps bouncing as it rumbles past.

Such was the case in the final hours of Senate Majority Leader Harry Reid's successful attempt to get cloture on health-care reform. Sen. Ben Nelson of Nebraska, the last Democratic holdout, was offered and accepted a permanent exemption from his state's share of Medicaid expansion, amounting to \$100 million over 10 years.

Afterward, Reid was unapologetic. "You'll find," he said, "a number of states that are treated differently than other states. That's what legislating is all about."

But legislating, presumably, is also about giving public reasons for the expenditure of public funds. Are Cornhuskers particularly sickly and fragile? Is there a malaria outbreak in Grand Island? Ebola detected in Lincoln?

Reid didn't even attempt to offer a reason why Medicaid in Nebraska should be treated differently from, say, Medicaid across the Missouri River in Iowa. The majority leader bought a vote with someone else's money. Does this conclusion sound harsh? Listen to Sen. Lindsey Graham of South Carolina, who accused the Senate leadership and the administration of "backroom deals that amount to bribes" and "seedy Chicago politics" that "personifies the worst of Washington."

This special deal for Nebraska raises an immediate question: Why doesn't every Democratic senator demand the same treatment for his or her state? Eventually, they will. After the Nelson deal was announced, Sen. Tom Harkin of Iowa enthused, "When you look at it, I thought well, God, good, it is going to be the impetus for all the states to stay at 100 percent (coverage by the federal government). So he might have done all of us a favor." In a single concession, Reid

undermined the theory of Medicaid—designed as a shared burden between states and the federal government—and added to future federal deficits.

Unless this little sweetener is stripped from the final bill by a House-Senate conference committee in January, which would leave Nelson with a choice. He could enrage his party by blocking health reform for the sake of \$100 million—making the narrowness of his interests clear to everyone. Or he could give in—looking not only venal but also foolish.

How did Nelson gain such leverage in the legislative process in the first place? Because many assumed that his objections to abortion coverage in the health bill were serious—not a cover, but a conviction. Even though Nelson, a rare pro-life Democrat, joked in an interview that he might be considered a "cheap date," Republican leadership staffers in the Senate thought he might insist on language in the health-care bill preventing public funds from going to insurance plans that cover abortion on demand, as Democratic Rep. Bart Stupak had done in the House.

Instead, Nelson caved. The "compromise" he accepted allows states to prohibit the coverage of elective abortions in their insurance exchanges. Which means that Nebraska taxpayers may not be forced to subsidize insurance plans that cover abortions in Nebraska. But they will certainly be required to subsidize such plans in California, New York and many other states.

In the end, Nelson not only surrendered his beliefs, he also betrayed the principle of the Hyde Amendment, which since 1976 has prevented the coverage of elective abortion in federally funded insurance. Nelson not only violated his pro-life convictions, he also may force millions of Americans to violate theirs as well.

I can respect those who are pro-life out of conviction and those who are pro-choice out of conviction. It is more difficult to respect politicians willing to use their deepest beliefs—and the deepest beliefs of others—as bargaining chips.

In a single evening, Nelson managed to undermine the logic of Medicaid, abandon three decades of protections under the Hyde Amendment and increase the public stock of cynicism. For what? For the sake of legislation that greatly expands a health entitlement without reforming the health system; that siphons hundreds of billions of dollars out of Medicare instead of using that money to reform Medicare; that imposes seven taxes on Americans making less than \$250,000 a year, in direct violation of a presidential pledge; that employs Enron-style accounting methods to inflate future cost savings; that pretends to tame the insurance companies while making insurance companies the largest beneficiaries of reform.

And, yes, for \$100 million. It is the cheap date equivalent of Taco Bell.

Mr. SESSIONS. The leader's time is up at 6 minutes after the hour; is that correct?

The PRESIDING OFFICER. The Republican leader has 6½ minutes reserved.

Mr. SESSIONS. I ask Senator KYL this: The CBO report this morning essentially says you cannot count the same money twice; correct?

Mr. KYL. Madam President, it doesn't say you cannot. It just says that is what would happen if you attempted to apply the money both to

the trust fund and to the additional spending. It says it "would essentially double count and thus overstate."

What I am saying is that it doesn't say you can't do it, but they are saying you only have one pot of money to pay for two things and, obviously, you cannot do that and be honest about the accounting. That is my interpretation of what it says.

Mr. SESSIONS. I think that is correct. The Senator may not know this. I understand that at the request of our Democratic colleagues, they have returned to CBO and gotten another statement this morning, perhaps so they can continue to make the argument that somehow this creates a surplus. But staff having examined that, I am informed that it in no way refutes this morning's statement that this cannot simultaneously fund a new program and strengthen Medicare at the same time.

I think it is a matter, will Senator KYL not agree—I am not afraid to talk about it—if we need to slow down before we vote, so be it. First of all, is the Senator convinced, as Senator GREGG indicated this morning and CBO does, that we are, in fact, passing a bill that would, if it passes, add to the debt approximately \$170 billion, as staff has calculated based on this letter, and would not reduce the debt by \$132 billion?

Mr. KYL. Mr. President, I am absolutely convinced of that, yes.

Mr. SESSIONS. I do not think there is any dispute about it. I think that is the fact. It has been exposed. The President looked us in the eye in a joint session of Congress, did he not, and said this legislation would not add one dime or one dollar to the debt of the United States?

Mr. KYL. Mr. President, it is my recollection that is pretty close to what the President said. I guess maybe this would not be such a big deal unless you are trying to do two things with the same pot of money. As long as the other side is also claiming we are actually extending the life of Medicare, which I heard one of my colleagues do on television this morning, then you cannot make this other claim. You can claim one or the other but you cannot claim both. That is precisely what the head of CBO said:

To describe the full amount of HI trust fund savings as both improving the government's ability to pay future Medicare benefits and financing new spending outside of Medicare would essentially double-count a large share of those savings and thus overstate the improvement in the government's fiscal position.

Mr. SESSIONS. To follow up on that, is it not true—and President Obama Monday flatly stated in one press conference that it would reduce our deficit over 10 years by \$130 billion and extend the Medicare Program by 9 years, which is patently false, it would appear. I am not sure he understood the

complexities of all this accounting, but, in fact, I think he misspoke at that point. Would the Senator from Arizona not agree?

Mr. KYL. Mr. President, I obviously cannot get into the President's mind, but I must say that all of us had missed this point. I said before I ascribe no ill will to anybody on the other side. This is hard to understand. Accounting can be arcane. That is why this statement from the CMS was a little troubling to us when we first read it. They said:

Despite the appearance of this result from the respective accounting conventions—

Which is a fancy way of saying accountants have their way of showing things and that might have confused you—

in practice, improved party financing cannot be simultaneously used to finance other Federal outlays.

You cannot use the same pot of money of \$10 to buy two different \$10 benefits. You can buy one or the other or half of each, but you cannot buy both. As the old saying goes, you cannot sell the same pony twice.

Mr. SESSIONS. It said, did it not, in that CMS letter that was a fact “despite the appearance of this result from the respective accounting conventions”? Were they not warning us that it might appear this way but it cannot be that way?

Mr. KYL. Mr. President, our colleague Senator GREGG, a respected member of the Budget Committee, pointed out this morning why that is so, and my colleague from Alabama can do that as well.

There are two different systems of accounting by two different parts of the government. The only way they can do this is by sending an IOU back to the Social Security trust fund, but, of course, the IOU comes out of the pocket of the taxpayers where we have to borrow it and it is still an obligation even though it shows up on accounting books as obligation satisfied.

Mr. BAUCUS. Will the Senator yield for a simple question?

Mr. KYL. Sure.

Mr. BAUCUS. I wonder if the Senator is aware that CBO this morning at 9:57 sent an e-mail to all relevant staff that its estimates with regard to budget deficit reduction still stand, still hold. CBO still estimates this legislation results in a \$132 billion deficit reduction. That was an e-mail sent today. Is the Senator aware of that e-mail?

Mr. KYL. I did not see that e-mail. I assume that is the same communicate about which the Senator from Alabama is talking. It shows you exactly why this is so confusing and why I am a little bit concerned about the politicization of the CBO.

Last night and again this morning, we have a memo that says you cannot pay twice. If after that he says I still show that as a surplus, then what he has to also be saying is, and therefore

it does not extend the life of the Social Security trust fund. As I said, you can do one or the other, or roughly half of each, but you cannot do both. If he is choosing to say it is applied to one, then our colleagues cannot continue to say that it applies to the other.

Mr. President, Americans' biggest complaint about the current healthcare system is the increasing cost of health insurance premiums.

President Obama promised that his healthcare reform bill would address this problem. As he said during his campaign, “I have made a solemn pledge that I will sign a universal healthcare bill into law . . . that will . . . cut the cost of a typical family's premium by up to \$2,500 a year.”

By the President's own yardstick, this bill is a failure, since it actually increases premiums for many Americans and fails to restrain growths for the rest.”

Recently, the nonpartisan Congressional Budget Office (CBO) concluded that, under this bill, those in the individual market—that is, those without employer-sponsored insurance—will face premium increases between 10 and 13 percent. That's approximately \$2,100 per family by 2016.

A second study, from the actuarial firm Oliver Wyman, also concluded premiums will rise under this legislation, thanks to burdensome new Federal mandates and requirements and several new taxes.

In the individual market, this study predicts, premiums will rise by \$3,300 per year for family coverage and \$1,500 for individuals. In my home State of Arizona premiums could rise by as much as 72 percent in the individual market.

This study also tells us that the small group market would see premium increases. Small employers purchasing new policies in the reformed market would experience premiums up to 20 percent higher in 2019 than they would under current law.

Oliver Wyman also estimates that, if this bill is enacted, 2.9 million fewer Americans would have insurance through small-employer policies.

So what this bill does is raise the cost of insurance for many Americans and then force everyone to buy a policy—and not just any policy, one that is been approved by Washington!

Our friends on the other side of the aisle argue that many families will receive government subsidies to help with the increased cost of insurance brought on by new mandates, taxes, and Federal requirements.

There are a few problems with this argument.

First, not every family will qualify for such subsidies. Indeed, 14 million Americans who buy their own coverage would earn too much to get a subsidy, according to the Congressional Budget Office.

So 14 million Americans will be required, by Washington, to purchase unsubsidized insurance that is more expensive than they could get under current law. And this is being called reform?

Second, those who do receive a subsidy may find the subsidy does not begin to cover the total cost of the increase. So, those families, too, will actually be worse off.

And, finally, the heart of this debate is a basic question: What is the point of raising the price of insurance and then subsidizing a portion of the increase? You are still raising premiums and someone has to pay for subsidies.

Americans have asked us to lower healthcare costs, not raise them and then provide subsidies to those who qualify. And they certainly don't want to pay more in taxes to subsidize their own insurance—but that is what the Democrats' bill would have them do.

As the Wall Street Journal recently editorialized, “The [Reid] bill will increase costs, but it will then disguise those costs by transferring them to taxpayers from individuals.”

Not surprisingly, small business associations, whose members would be overwhelmingly impacted by this legislation, are disappointed.

The Small Business Coalition for Affordable Healthcare, for one, opposes this bill.

Their name says it all. This organization believes, as all of us do here in the Senate, that the status quo is not acceptable and not sustainable. But they disapprove of this legislation because, as they wrote in a letter to Congress, “it costs too much and delivers too little.”

Here are just a few of the dozens of businesses represented by this organization: The Americans Hotel and Lodging Association; American Bakers Association; the Independent Electrical Contractors; the National Association of Convenience Stores; the National Automobile Dealers Association; Printing Industries of America; the Society of American Florists. The list goes on and on.

These businesses wrote a letter to Congress expressing disapproval of the bill's huge costs and failure to bring down premiums, among other provisions that hurt small businesses. They believe that increased premiums have a domino effect, hurting both the employer and the employee, resulting in fewer jobs, depressed wages, and fewer choices.

I will share some excerpts from their letter, with regard to increased premiums and costs:

They write:

The bill does little to make insurance more affordable and the [small business] tax credit is so limited, few will be able to obtain affordable insurance.

They go on:

The impact on non-group premiums is . . . devastating, as they are expected to increase

an average of 10–13 percent per person. Those estimates, in addition to the financing provisions in the bill, slam the “savings” door shut.

Another organization, the National Federation of Independent Business, has also raised major objections to this bill with regard to increased premiums.

Here is a telling excerpt from a letter they wrote to the two Senate party leaders:

H.R. 3590 fails the small business test, and, therefore, fails small business. The most recent CBO study detailing the effect [this bill] will have on insurance premiums reinforces that, despite claims by its supporters, the bill will not deliver the widely-promised help to the small business community.

Bruce Josten of the U.S. Chamber of Commerce concurs. He recently said:

The fundamental failure of the Senate bill is its failure to address cost containment. We have a bill that raises taxes on pretty much everything that moves in the healthcare space. And successful cost containment practices that are in the marketplace, like health savings accounts or flexible spending accounts, are dramatically weakened in this . . . Healthcare cost increases are going to crowd out the compensation pool.

The majority leader recently disagreed with the notion that this bill increases costs, citing a prediction by the President's Council of Economic Advisers that the bill before us would bring down costs.

This is the same council that told us unemployment would peak at 8 percent if only Congress would pass the stimulus. As Americans know, Congress passed the stimulus, and we are now at 10 percent unemployment.

Moreover, if the Council of Economic Advisors is supposed to be the Bible of economic analysis and administration officials know best, why is it that on the same day the President's top economic advisor Larry Summers declared on *This Week*, “the recession is over,” the Council's chair, Christina Romer, told *Meet the Press* viewers that “of course” the recession is not over? So, who should we believe on costs?

I submit that small business owners and their representatives have the most intimate knowledge of which policies will benefit them and which stand to hurt them. They are telling us this bill will hurt them.

Finally, I would like to point out that this bill does not even guarantee that all Americans have insurance. This bill leaves 24 million Americans uninsured.

We are going to spend \$2.5 trillion to raise the price of insurance for millions of Americans and keep affordable insurance out of reach for millions more.

There are much better ways to give access to affordable healthcare to all Americans.

We should start with serious medical liability reform, which has been proven in Texas, Arizona, and Missouri to bring down costs for patients and doctors.

We need to allow Americans to buy insurance across State lines. This is one of the most commonsense reforms out there. Why should Americans be denied access to lower-cost policies just because they are being sold in other states?

We should also allow small businesses to band together to pool their risk and purchase insurance at the same rates large corporations get.

Enacting these simple reforms would cost little, if anything, and would be sure to bring down costs. That is the kind of reform Americans would be sure to support.

The ACTING PRESIDENT pro tempore. The Senator's time has expired. The majority leader is recognized.

Mr. REID. Mr. President, I ask unanimous consent that the Baucus motion to waive be set aside.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. REID. Mr. President, I want to take a moment to talk about the motion to table the appeal by Senator CORNYN and the ruling of the Chair that no point of order lies under rule XLIV.

Senator CORNYN's appeal is not about transparency and certainly not about disclosure. It is about delay and obstruction. That is what the whole tenor of all the Republican statements has been regarding this legislation.

The vote is whether we create a whole new point of order even though Senate rules at this stage do not allow a point of order. They want to rewrite the rules at a whim, not for purpose of disclosure and transparency but for the purpose of delay and obstruction.

The legislative history of the Honest Leadership and Government Act specifically addresses the issue of whether a point of order lies in this instance:

If rule XLIV does not expressly provide for a point of order with respect to a provision, then no point of order shall lie under the provision.

We open a Pandora's box if we reverse the ruling of the Chair on appeal. What would be the new rule? How would the new rules be implemented? What happens to the health care bill? Who decides the answers to these questions?

Moreover, if we overrule the Chair, we would be setting a dangerous precedent that points of order lie even if not provided for in Senate rules, standing orders, or procedures.

It is clear the purpose of this is to obstruct and delay. I urge my colleagues to vote to table the Cornyn appeal of the ruling of the Chair when that comes.

Mr. CORNYN. Will the Senator yield for a question?

Mr. REID. No, I will not. The health care votes we have held this week have been procedural in nature. Each has been a party-line vote and much of this

debate is focused on politics. But health reform is not about procedure or partisanship or politics. It is about people—people like the thousands who write us every day.

At my desk, we have a few of the letters we have picked up in the last day or so. Sorry, staff has had to lift that and I didn't. This is a few we have gotten. Look at this. They are all basically the same. Each of these letters right here represents a story, a tragedy, a life, a death, but most of all, a person—a person, people who wake up every morning and struggle to get health care or struggle to hold on to what they have, people who lie awake every night second-guessing the agonizing decisions they have to make about what to sacrifice just to stay healthy.

Here is a letter that was written to Senator BOB CASEY of Pennsylvania. Listen to what this woman said:

Dear Senator CASEY. In a country like the United States, we shouldn't need a tip jar in an ice cream shop to raise money for a kid with leukemia. Jennifer Wood.

Here is another one of those letters. This one is from a father in North Las Vegas, NV:

Can you imagine what it is like to have a doctor look you in your eye when you hold your 1-year-old child and be told that you will likely outlive your son?

He goes on to say:

I am certain my story is not unique, but it is real. Stop forcing Americans to use the most expensive point of service, the emergency room, to get what the system won't give them. Let's make all Americans equal in the eyes of health care, please.

This legislation is not about the number of pages of this bill. It is about the number of people—people such as the man whose letter I just read who was told by a doctor that he would likely outlive his son. It is about the number of people whom this bill will help. That is what this is all about. It is about fairness. So when people are hurt or sick, they can go see somebody who can help them and not lie awake at night wondering if they will outlive their 1-year-old son.

Mr. President, how much time remains?

The ACTING PRESIDENT pro tempore. There is 1½ minutes remaining.

Mr. REID. I yield back that time and ask the vote start earlier.

I withdraw that request.

I ask unanimous consent that prior to each vote today there be 2 minutes of debate equally divided and controlled in the usual form.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

There is now 2 minutes equally divided.

The majority leader.

Mr. REID. Mr. President, stop the 2 minutes from running. I do want to explain. We will shortly have a series of

up to seven votes. As we noted in the last few days, if Members remain at their desks, the votes can be concluded much earlier.

ENSIGN POINT OF ORDER

The ACTING PRESIDENT pro tempore. There is now 2 minutes of debate equally divided prior to a vote on the constitutional point of order offered by the Senator from Nevada, Mr. ENSIGN.

Who yields time?

The majority leader.

Mr. REID. Mr. President, the vote sequence will be as follows: Ensign constitutional point of order; Corker unfunded mandates point of order; Baucus motion to table the Cornyn appeal ruling of the Chair; Hutchison constitutional point of order. I have been advised that a Republican Member will move to suspend the rules so he can offer his amendment under rule XXII. He is going to be allowed 10 minutes. This will require 67 votes because it is an effort to change the rules. Following that we will have adoption of the substitute amendment and cloture on H.R. 3590. So there is a series of seven votes.

The ACTING PRESIDENT pro tempore. Who yields time?

The Senator from Nevada is recognized.

Mr. ENSIGN. Mr. President, I raise a constitutional point of order because I am concerned that the health reform bill violate's Congress's enumerated powers under article I, section 8 and the fifth amendment takings clause of the Constitution.

Each one of us takes an oath to defend the Constitution of the United States. We do not take an oath to reform health care. We do not take an oath to do anything else here but to defend the Constitution of these United States.

Health care reform needs to fit within the Constitution. The Constitution limits the powers we have. The Congress, the U.S. Government has never enacted anything that would regulate someone's inactivity in the way the individual mandate in this health care bill would. Anything we have ever done, somebody actually had to have an action before we could tax or regulate it. In this case, if you choose to not do something—in other words, if you do not choose health insurance—this bill will actually tax you. It will act as an onerous tax. So for the first time in the history of the United States this bill will do something the Federal Government has never done before. This bill would do something that is beyond Congress's powers to authorize. This bill is unconstitutional and I urge all Members to vote in support of the constitutional point of order.

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

The Senator from Montana.

Mr. BAUCUS. Mr. President, our committee and the HELP Committee

have given a lot of thought to the provisions in this legislation. We also gave a lot of thought to the constitutionality of the provisions—how they work and the interrelationship between the power of Congress and the States and what States will be doing, particularly under the commerce clause and the tax-and-spending powers of the Constitution.

It is very strongly our considered judgment, and that of many constitutional scholars who have looked at these provisions—and many articles have been put in the Record—that clearly these provisions are constitutional. The commerce clause is constitutional, the tax-and-spending clause, and the provisions clearly are constitutional.

I yield back my time.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the constitutional point of order made by the Senator from Nevada, Mr. ENSIGN, that the amendment violates article I, section 8 of the Constitution, and the fifth amendment.

The question is, Is the point of order well taken?

The yeas and nays have been ordered.

The clerk will call the roll.

The bill clerk called the roll.

Mr. KYL. The following Senator is necessarily absent: the Senator from Kentucky (Mr. BUNNING).

Further, if present and voting, the Senator from Kentucky (Mr. BUNNING) would have voted "yea."

The ACTING PRESIDENT pro tempore. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 39, nays 60, as follows:

[Rollcall Vote No. 389 Leg.]

NOT VOTING—1

Bunning

The ACTING PRESIDENT pro tempore. The point of order is not well-taken.

CORKER POINT OF ORDER

The ACTING PRESIDENT pro tempore. There is now 2 minutes equally divided prior to the vote on the motion to waive the point of order raised by the Senator from Tennessee, Mr. CORKER.

Who yields time?

The Senator from Tennessee is recognized.

Mr. CORKER. Mr. President, thank you so much.

There is almost nothing held in lower esteem than for the Senate to pass laws in this body that cause mayors and Governors to have budgetary problems because we create unfunded mandates.

Many of you have been mayors and Governors, and for that reason, in 1995, in a bipartisan way, a law was created—15 Senators on the other side of the aisle who are now serving supported this law—to keep us from passing unfunded mandates. CBO has stated without a doubt that this bill violates that.

I urge Members to vote against this motion to waive that. It is important. It says everything about the way we do business here in Washington. Please, let's not pass another huge unfunded mandate to the States at a time when they all are having budgetary problems. This speaks to the essence of who we are and the arrogance many people perceive us to have here in Washington.

The ACTING PRESIDENT pro tempore. The Senator from Montana is recognized.

Mr. BAUCUS. This point of order calls for legislation to impose an obligation on States to extend their coverage on Medicaid. Under existing law, on average, the Federal Government pays about 57 cents on the dollar for every dollar spent under Medicaid. Under this legislation, the Federal Government will pay 100 percent of that obligation for newly enrolled beneficiaries up through the year 2016. Afterward, the Federal Government will pay on average 90 percent of the cost of new enrollees. Therefore, I think this is a very fair deal for States, and I urge my colleagues to waive the point of order.

Mr. President, I also ask consent that this vote and all subsequent votes in this sequence be 10-minute votes.

The PRESIDING OFFICER (Mr. SANDERS). The question is on agreeing to the motion to waive the Budget Act point of order raised under section 425(a)(2).

The yeas and nays were previously ordered.

The clerk will call the roll.

Mr. KYL. The following Senator is necessarily absent: the Senator from Kentucky (Mr. BUNNING).

Further, if present and voting, the Senator from Kentucky (Mr. BUNNING) would have voted "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 55, nays 44, as follows:

[Rollcall Vote No. 390 Leg.]

NOT VOTING—1

Bunning

The PRESIDING OFFICER. The motion to waive section 425(a)(2) requiring a simple majority is agreed to.

The point of order falls.

The majority leader is recognized.

Mr. REID. Mr. President, I have spoken to the Republican leader. Senators on both sides feel that it would be to their advantage if we had the vote on Christmas Eve at 7 a.m. rather than 8 a.m. That being the case, I ask unanimous consent that the vote start at 7 a.m. on Christmas Eve.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. May I address a question to the distinguished majority leader.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, it will not affect my travel plans because I long ago decided—

Mr. REID. If I could interrupt my friend, quit while you are ahead.

Mr. LEAHY. You have your agreement on this. But is there any possibility that our friends on the other side, knowing that those who are traveling to the Midwest are going to face horrendous problems, that we could have that vote this evening? It will not

affect the Senator from Vermont one way or the other, but it will affect a lot of Senators, Republicans and Democrats alike, who have to fly through the Midwest to get where they are going.

Mr. MCCONNELL. Regular order.

CORNYN APPEAL OF THE RULING OF THE CHAIR

The PRESIDING OFFICER. Regular order has been called for.

There is now 2 minutes equally divided prior to a vote on the motion to table the appeal of the ruling of the Chair.

The Senator from Texas.

Mr. CORNYN. Mr. President, upon passage of the Honest Leadership and Open Government Act, the majority leader said:

I believe last November Americans . . . asked us to make Government honest. We have done that . . . This is the toughest reform bill in the history of this body as it relates to ethics and lawmaking.

This is an appeal to the ruling of the Chair that that provision of rule XLIV is unenforceable. Why would anybody who voted overwhelmingly to make this the toughest reform bill in the history of the body render this rule toothless by agreeing with the attempt to set this aside and to waive its effect?

I ask my colleagues to make sure we vote for transparency, for honesty, for open government. Vote no on this motion to waive.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, the plain text of the language in rule XLIV provides that no point of order lies against amendments. That is the way the drafters intended it. That is the way they wrote rule XLIV. That is why the Presiding Officer ruled that way on the advice of the Parliamentarian. We should support the Chair and the Parliamentarian and vote for the motion to table the appeal of the ruling of the Chair.

I yield back the remainder of my time.

Mr. CORNYN. Do I have time remaining?

The PRESIDING OFFICER. One second.

Mr. CORNYN. I ask my colleagues to vote no on the motion to waive.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the appeal of the ruling of the Chair that there is no point of order under rule XLIV, paragraph 4(a).

The yeas and nays were previously ordered.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KYL. The following Senator is necessarily absent: the Senator from Kentucky (Mr. BUNNING).

Further, if present and voting, the Senator from Kentucky (Mr. BUNNING) would have voted "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 57, nays 42, as follows:

[Rollcall Vote No. 391 Leg.]

YEAS—57

Akaka	Gillibrand	Murray
Baucus	Hagan	Nelson (NE)
Begich	Harkin	Nelson (FL)
Bingaman	Inouye	Pryor
Boxer	Johnson	Reed
Brown	Kaufman	Reid
Burris	Kerry	Rockefeller
Byrd	Kirk	Sanders
Cantwell	Klobuchar	Schumer
Cardin	Kohl	Shaheen
Carper	Landrieu	Specter
Casey	Lautenberg	Stabenow
Conrad	Leahy	Tester

NOT VOTING—1

Bunning

The motion was agreed to.

Mr. REID. I move to reconsider the vote.

Mr. DURBIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HUTCHISON POINT OF ORDER

The PRESIDING OFFICER. There is now 2 minutes, equally divided, prior to a vote on the constitutional point of order made by the Senator from Texas, Mrs. HUTCHISON.

The Senator from Texas.

Mrs. HUTCHISON. Mr. President, the 10th amendment says:

The powers not delegated to the United States by the Constitution . . . are reserved to the States. . . .

In this bill, a State such as Texas and many other States that have taken full responsibility for insurance plans for their employees and teachers will have to justify any change in those terms to the Federal Government.

The majority claims the commerce clause gives them the power to do what is in this bill. But what they fail to mention is the power to regulate interstate commerce has not been the basis for a robust role in insurance regulation.

This is an encroachment of the Federal Government into a role left to the States in the Constitution. The 10th amendment is being eroded by an activist Congress, and it is time to stop it now.

I urge a vote to uphold this point of order.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, the bill before us is clearly an appropriate exercise of the commerce clause. We further believe Congress has power to enact this legislation pursuant to the taxing and spending powers. This bill does not violate the 10th amendment because it is an appropriate exercise of powers delegated to the United States, and because our bill fundamentally gives States the choice to participate in the exchanges themselves or, if they do not choose to do so, to allow the Federal Government to set up the exchanges fully within the provisions as interpreted by the Supreme Court of the 10th amendment.

I urge my colleagues to vote against the point of order.

The PRESIDING OFFICER. The question is on the constitutional point of order made by the Senator from Texas, Mrs. HUTCHISON, that the amendment violates the 10th amendment.

The question is, Is the point of order well taken?

The yeas and nays have been ordered.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. KYL. The following Senator is necessarily absent: the Senator from Kentucky (Mr. BUNNING).

Further, if present and voting, the Senator from Kentucky (Mr. BUNNING) would have voted "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 39, nays 60, as follows:

[Rollcall Vote No. 392 Leg.]

NOT VOTING—1

Bunning

The PRESIDING OFFICER. The point of order is not agreed to.

The Senator from South Carolina.

Mr. DEMINT. Mr. President, since I have not used or yielded 10 minutes, I ask to be recognized for up to 10 minutes under rule XXII, paragraph 2.

The PRESIDING OFFICER. The Senator has that right.

The Senator from South Carolina.

DEMINT MOTION TO SUSPEND

Mr. DEMINT. Mr. President, in just a moment I will move to suspend the rules for the purpose of offering an amendment that would ban the practice of trading earmarks for votes.

While I want to be careful not to suggest wrongdoing by any Member, there has been growing public concern that earmarks were used to buy votes for this legislation. It has been argued by some that this practice is acceptable because it is necessary to get things done in the Senate. I reject that argument, and I urge my colleagues to put an end to business as usual here in the Senate.

The House of Representatives has a rule prohibiting the use of earmarks to buy votes for legislation. If we were in the House considering this bill, vote trading would be a direct violation of the ethics rules. Unfortunately, a vote-trading rule does not exist in the Senate.

During the debate on the lobbying and ethics reform bill in the 110th Congress, the senior Senator from Illinois, Mr. DURBIN, and I offered an earmark reform amendment which contained the following language:

A Member may not condition the inclusion of language to provide funding for a congressional earmark . . . on any vote cast by another Member.

The Durbin-DeMint amendment was written to mirror Speaker PELOSI's earmark reforms in the House. The Durbin-DeMint amendment passed the Senate by a vote of 98 to 0 and was included in S. 1, the Honest Leadership and Open Government Act, which passed the Senate by a vote of 96 to 2.

The rule against trading votes for earmarks was in the bill when it left the Senate, but then the bill moved to a closed-door negotiation. Somehow, at some point in those closed-door negotiations, someone dropped the earmark-for-vote language. I have no idea who it was, and we may never know. Remember, this bill was called the Honest Leadership and Open Government Act. In any case, the vote-trading rule was dropped from the bill, which then passed the Senate and was signed by the President.

Just to confirm all of this, I wish to make a parliamentary inquiry to the Chair. Is the Chair aware of any prohibition in the Standing Rules of the Senate such as the previously referenced rule contained in the Durbin-

DeMint amendment or in the Rules of the House of Representatives?

The PRESIDING OFFICER. No such rule exists in the Senate.

Mr. DEMINT. No such rule exists.

I have an amendment which would correct this error. It mirrors the Durbin-DeMint language which passed the Senate 98 to 0, and I will read the relevant parts. I quote:

It shall not be in order in the Senate to consider a congressionally directed spending item . . . if a Senator . . . has conditioned the inclusion of the language . . . on any vote cast by any Senator.

This language had unanimous bipartisan support in 2007, and it should be part of the rules today. This rule would provide needed accountability and allow any Senator to raise a point of order to strike any earmark that has been used to buy votes. This point of order could be waived and the ruling of the Chair could be appealed with the support of two-thirds of Senators present and voting.

Before I make this motion and we vote on this amendment, I wish to make a few things absolutely clear. First, this rule already won a unanimous vote in the Senate in 2007, so it is not controversial. Second, this rule only applies to earmarks used to buy votes in the future. It will not, unfortunately, apply to the earmarks in this bill. Third, this vote is not a trick. The amendment is written as a "standing order," so it will not increase the number of votes required to pass this legislation. It will not slow down the health care bill in any way.

The only reason for Senators to oppose this amendment is if they want to use earmarks to buy votes for legislation. It is that simple. If you support business as usual, then oppose this motion. But if you want to start to clean this place up and bring some integrity back to the legislative process, then please support the motion.

Mr. President, I move to suspend the provisions of rule XXII, including germaneness requirements, for the purpose of proposing and considering my amendment No. 3297, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

It appears there is a sufficient second.

The yeas and nays were ordered.

The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, this proposed new point of order may sound good in theory, but it has many flaws, in fact, when you stop and think about it. If you think the Senate is tied up in knots now, if this were in effect, the current situation would pale in comparison to what the effect of this amendment would be.

The amendment is written in a way to become an endless source of delay. Senators could make one point of order

after another under this provision, pointing to different provisions or indicating the integrity of different Senators.

The amendment provides no way for determining how to rule on a point of order raised under it. A point of order cannot be decided without solid guidance. Points of order make the most sense when they are based on objective criteria.

The proposed amendment to rule XXII would ask the Chair and the Parliamentarian to sort through purely subjective concepts such as the basis for a Senator's vote or the intent behind inclusion of a provision. How would the Chair be able to rule on such a point of order? Would the Parliamentarian have to question the chairman of a committee or a Senator who offers the amendment, under oath? Would the Parliamentarian have to question every Senator who requested a directed spending item, under oath, to ensure they did not condition their support on inclusion of the item?

The rule may sound good in theory, but it is totally unworkable as a practical matter.

I move to table the DeMint motion and ask for the yeas and nays.

The PRESIDING OFFICER. There is 1 minute left for those who favor the motion. Who yields time?

The Senator from South Carolina, 1 minute.

Mr. DEMINT. Mr. President, I would answer the questions of the Senator by suggesting that Senator DURBIN, who wrote the amendment, perhaps may wish to make a couple of comments about it because this is the mirror—

Mr. DURBIN. Are you yielding time?

Mr. DEMINT. Yes, I sure will.

Mr. DURBIN. I don't understand how this amendment would work. If the Senator happens to have a hurricane in his State and needs disaster aid and we put money in the bill, then would we have to question the Senator's motive for voting for the bill? I think it goes entirely too far, and I support this effort to table.

Mr. DEMINT. This a DeMint-Durbin amendment. It is mirrored after Speaker PELOSI's bill. They have this rule in the House. They can make it workable. Certainly, the integrity of this body is worth considering.

I would encourage my colleagues, at this point, when the public is looking at us, asking for some trust and integrity, we can make this bill work. I ask my colleagues to support my amendment and oppose the tabling motion.

Mr. BAUCUS. I move to table the motion and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The question is on agreeing to the motion to table the motion to suspend the rules.

The clerk will call the roll.

The PRESIDING OFFICER (Mr. AKAKA). Are there any other Senators in the Chamber desiring to vote?

Mr. KYL. The following Senator is necessarily absent: the Senator from Kentucky (Mr. BUNNING).

Further, if present and voting, the Senator from Kentucky (Mr. BUNNING) would have voted "nay."

The result was announced—yeas 53, nays 46, as follows:

[Rollcall Vote No. 393 Leg.]

YEAS—53

Akaka	Franken	Mikulski
Baucus	Gillibrand	Murray
Begich	Hagan	Nelson (FL)
Bennet	Harkin	Pryor
Bingaman	Inouye	Reed
Boxer	Johnson	Reid
Brown	Kaufman	Rockefeller
Burris	Kerry	Sanders
Byrd	Kirk	Schumer
Cantwell	Klobuchar	Shaheen
Cardin	Kohl	Specter
Carper	Landrieu	Stabenow
Casey	Lautenberg	Tester
Conrad	Leahy	Udall (CO)
Dodd	Levin	Udall (NM)
Dorgan	Lieberman	Whitehouse
Durbin	Lincoln	Wyden
Feinstein	Menendez	

NAYS—46

Alexander	Enzi	Merkley
Barrasso	Feingold	Murkowski
Bayh	Graham	Nelson (NE)
Bennett	Grassley	Risch
Bond	Gregg	Roberts

Ensign	McConnell	

NOT VOTING—1

Bunning

The motion was agreed to.

Mr. REID. I move to reconsider the vote, and I move to lay that motion on the table.

The motion to table was agreed to.

AMENDMENT NO. 2878 WITHDRAWN

Mr. REID. Mr. President, I ask unanimous consent that amendment No. 2878 be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2786, AS AMENDED

Mr. REID. Mr. President, what then is the pending business?

The PRESIDING OFFICER. There is now 2 minutes of debate prior to a vote on amendment No. 2786, as amended.

The Senator from Montana.

Mr. BAUCUS. Mr. President, this is a vote to adopt the substitute. This is another vote on whether we wish to reform health care.

I urge my colleagues to vote aye and move this process forward.

I yield back my time.

Mr. REID. I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays have been ordered.

Who yields time in opposition?

Mr. REID. I yield back the time on behalf of my Republican colleague.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to amendment No. 2786, as amended.

The yeas and nays have been ordered.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. KYL. The following Senator is necessarily absent: the Senator from Kentucky (Mr. BUNNING).

Further, if present and voting, the Senator from Kentucky (Mr. BUNNING) would have voted "no."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 60, nays 39, as follows:

[Rollcall Vote No. 394 Leg.]

YEAS—60

Akaka	Franken	Mikulski
Baucus	Gillibrand	Murray
Bayh	Hagan	Nelson (NE)
Begich	Harkin	Nelson (FL)
Bennet	Inouye	Pryor

NOT VOTING—1

Bunning

The amendment (No. 2786), as amended, was agreed to.

Mr. REID. Mr. President, I move to reconsider the vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CLOTURE MOTION

The PRESIDING OFFICER. Under the previous order and pursuant to rule XXII, the Chair lays before the Senate the pending cloture motion, which the clerk will report.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on H.R. 3590, the Service Members Home Ownership Tax Act of 2009.

Christopher Dodd, Richard Durbin, Mark Begich, Paul G. Kirk, Sheldon Whitehouse, Roland W. Burris, Max Baucus, Sherrod Brown, Claire McCaskill, Jon Tester, Barbara A. Mikulski, Bill Nelson, Maria Cantwell, Mark Udall, Arlen Specter, Kirsten E. Gillibrand, and Ron Wyden.

The PRESIDING OFFICER. By unanimous consent, the mandatory quorum call has been waived.

The question is, Is it the sense of the Senate that debate on H.R. 3590, the Service Members Home Ownership Tax Act of 2009, shall be brought to a close?

The yeas and nays are mandatory under the rule.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KYL. The following Senator is necessarily absent: the Senator from Kentucky (Mr. BUNNING).

Further, if present and voting, the Senator from Kentucky (Mr. BUNNING) would have voted "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 60, nays 39, as follows:

[Rollcall Vote No. 395 Leg.]

YEAS—60

Akaka	Franken	Mikulski
Baucus	Gillibrand	Murray

NOT VOTING—1

Bunning

The PRESIDING OFFICER. On this vote, the yeas are 60, the nays are 39. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion to invoke cloture on the underlying bill is agreed to.

Mr. REID. Mr. President, I think we all recognize that things have gotten pretty tense around the Senate as we have worked three weekends in a row, long hours, and approach the Christmas holiday. Sometimes the tension

has boiled over into what has been said on and off the floor, and the way we treat each other, and that is very regrettable.

Two nights ago there was an unfortunate incident that deserves special mention, though. One of our colleagues, the Senator from South Carolina, attacked the office of the Senate Parliamentarian. We all know that the Senate Parliamentarian is a non-partisan referee. The Office of the Parliamentarian does their best to enforce the rules and procedures of the Senate in an impartial manner.

We have all come across situations when we were frustrated by the Parliamentarian's ruling because we were hoping that a given amendment was or was not germane, or that a given point of order was or was not well taken. But, we have all taken comfort in the fact that whatever the ruling in the instant case, the Parliamentarian was calling it straight and the same ruling would apply to similar amendments by other Senators and similar facts in the future.

So, it is simply not right and not fair to attack the Parliamentarians for doing their job. This is especially so when the issue is not a close call. Our colleague from South Carolina attacked the Parliamentarian over a ruling relating to the difference between amendments to the Standing Rules of the Senate and procedural changes adopted in less formal ways. The former requires a 2/3rds vote to achieve cloture; the latter is treated like any other piece of legislation. The distinction is an interesting quirk of Senate rules. But it is a venerable and well-established distinction. The Senate Manual includes 70 pages of Standing Orders. The Budget Act process—which the minority used to make a point of order just today—is almost entirely dependent on procedures that are not part of the Standing Rules of the Senate. In fact, in the last two Congresses, the Senator from South Carolina has authored or co-sponsored at least 17 bills or amendments that implicate the distinction. For the Parliamentarian to be accused of "redefin[ing] words," "ignoring a rule" of the Senate, and a "truly historic" and unconstitutional "subvert[sion of] the principle we have operated under" for re-stating this longstanding distinction is completely unwarranted.

As I noted, tensions are running high and Senators are tired and, according to one recent article, cranky. But I hope that the body will do its best to ensure proper decorum as we proceed for the remainder of the year and the remainder of the Congress. We need to treat each other with respect. And we certainly need to treat the institution of the Senate and its hard-working employees with respect.

Mr. President, I ask unanimous consent there now be alternating blocks of

time as follows: The first hour under the control of the Republicans; further, that after the first 2 hours, then there be alternating blocks of 30 minutes, with the Republicans controlling the first 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, there have been a lot of conversations on this floor in the last couple hours. There are a lot of people who are facing tough timetables tomorrow. I know of one Senator—

Mr. VITTER. Mr. President, regular order. Regular order, Mr. President.

Mr. HARKIN. Mr. President, I ask consent I be given 2 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. VITTER. Mr. President, reserving the right to object. I would be happy for those 2 minutes to come out of the Democrats' 1 hour without asking for regular order.

Mr. HARKIN. That is fine.

The PRESIDING OFFICER. Without objection.

Mr. HARKIN. Mr. President, I know one Senator whose family is with their in-laws. The husband is from England and the kids are over there and cannot make it for Christmas dinner tomorrow night. I know another person who has to get out to the West and there are a lot of storms out there. If they can get that early flight, they can make two legs and get home. If they have to go later in the day, they have to do three legs and they may not make it. There are a lot of people around here who are having a lot of problems that we are all here. There is no reason to hold over the vote so I am going to ask unanimous consent that the vote on the passage of the bill and the vote on the debt limit bill occur at 6 p.m. this evening.

The PRESIDING OFFICER. Is there objection?

Mr. VITTER. Addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. VITTER. Mr. President, that request has not been cleared on this side. On behalf of my colleagues, I object. If the Senator would like to talk to all his colleagues about it, that would be fine, but in the meantime, I would object.

Mr. HARKIN. Mr. President, then I would further ask unanimous consent that the votes that are going to occur at 7 a.m. tomorrow occur at 12:15 a.m., in the morning.

The PRESIDING OFFICER. Is there objection?

Mr. VITTER. Mr. President, my response would be the same and I would object in the same vein.

The PRESIDING OFFICER. The objection is heard.

Mr. HARKIN. I want Members to know who is keeping us here.

Mr. RISCH. Mr. President?

The PRESIDING OFFICER. The Senator from Idaho.

Mr. RISCH. Mr. President, I ask unanimous consent that the vote referred to by Senator HARKIN take place at 2 p.m. on January 20, 2010, when we return.

The PRESIDING OFFICER. Is there objection?

Mr. HARKIN. I object.

The PRESIDING OFFICER. There are objections.

The Senator from Louisiana is recognized.

Mr. VITTER. Mr. President, I ask unanimous consent that this first block of time on the minority side be divided equally between the following Senators: myself, Senators COBURN, THUNE, SESSIONS, KYL, and ENSIGN.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. VITTER. I thank the Chair. Mr. President, I ask for order on the floor.

The PRESIDING OFFICER. The Senate will be in order.

Mr. VITTER. Mr. President, I ask that time not be counted against me until the floor is in order.

The PRESIDING OFFICER. The Senator will not be charged. The Senator from Louisiana is recognized.

Mr. VITTER. Mr. President, I rise to talk about this important health care issue but also to talk about another vitally important issue directly connected, which is spending and debt because we will also have an enormously important vote tomorrow morning on increasing the debt limit. It is already over \$12 trillion, but the proposal is to increase it further.

In starting, let me refer back to a couple comments and parts of the debate yesterday because I think it will provide a good segue into this important debate. First, yesterday, as we were debating health care, my colleague from Louisiana, the distinguished senior Senator, Ms. LANDRIEU, was on C-SPAN's "Washington Journal." In discussing the health care bill, my participation came up. She said: "Senator VITTER has not lifted a finger to pass this bill."

I wish to say that is a very kind and positive and generous comment of the Senator and I take it as a nice Christmas overture and I accept it in that vein. I wish her all the best this Christmas season as well. It is obviously very true, and I take it as a very positive comment.

I would go further. I fought hard against this bill. I fought hard for alternative reforms, focused reforms, reforms focused like a laser beam on real solutions in health care to real problems such as preexisting conditions. I would simply add, I don't think this fight is over by a long shot. I will continue fighting and I will continue offering those alternatives.

With regard to the bill and this enormously important issue of spending

and debt, as I was leaving the floor to go to meetings in my office after speaking yesterday, Senator BAUCUS took issue, apparently, with some of my comments—specifically, my comments about Medicare. I had suggested that this bill cuts Medicare by \$467 billion, almost $\frac{3}{2}$ trillion. Although I needed to go to meetings, I think Senator BAUCUS took issue with that and characterized that as actually extending the life of Medicare.

The Congressional Budget Office answered that debate far better than I could have. They answered that debate in the last 24 hours with their report. They outline very clearly and we have been talking about it earlier today that, in fact, Medicare money and other pools of money are double counted in this analysis about the health care bill. "The key point is that the savings to the HI trust fund under the health care bill would be received by the government only once so they cannot be set aside to pay for future Medicare spending and, at the same time, pay for current spending on other parts of the legislation or on other programs."

The same Congressional Budget Office report says "to describe the full amount of HI trust fund savings and both improving the Government's ability to pay future Medicare benefits and financing new spending outside of Medicare would essentially double count a large share of those savings."

So this answers the Senator's comments directly. You can't have it both ways. You can't say we have a bill that is paid for and also a bill that strengthens Medicare and extends solvency for additional years. That is double counting. That is exactly what the CBO is saying. The American people, in a much more basic, commonsense way, know better. They know this bill isn't paid for. They know this bill is going to expand the deficit and put us on an even worse fiscal road. They know that in their gut. They know that with their common sense. Of course, that gets us to the other big vote tomorrow extending the debt limit, yet again, well beyond \$12 trillion.

These issues are connected. They are connected in the technical way I just suggested, and these issues are certainly connected in the hearts and minds of the American people. The American people have responded to this debate because health care is so vitally important and the health care issue is so personal.

There is even an overarching, larger reason the American people have responded so much to this debate. It is because they are connecting the dots. They are putting this as part of a larger pattern, and they are connecting the dots between bailing out and taking over insurance companies and financial companies and car companies, hiring and firing the CEO from the Oval Office

to potentially one-sixth of the U.S. economy in health care. They are connecting those dots in terms of spending and debt, as well, because that has been the dominant trend over the last 12 months at least.

We have a debt limit today. It is over \$12 trillion. The motion tomorrow suggests that is not enough. We need to go higher. The American people are connecting the dots, particularly in the last year, and they are scared to death about where it leads. How did we get this way? How did we come to this \$12 trillion-plus point? Well, in July, 2008, Fannie Mae and Freddie Mac were given an unlimited line of credit from the Treasury that, so far, has been \$400 billion, and that bill increased the debt limit from \$9.8 trillion to \$10.6 trillion. But that wasn't enough. Only 3 months later, in October, 2008, came the Wall Street bailouts, the \$700 billion TARP that will raise the debt limit. That did raise the debt limit even further, to \$11.3 trillion, but we weren't done yet. Only a few months after that, in February of this year, we passed the so-called stimulus bill. That will cost over \$1 trillion before it is all over, and then the debt limit was raised to \$12.1 trillion. Then we passed an omnibus spending bill earlier this year that increased spending about 8 percent over the previous fiscal year.

This month, we passed another omnibus spending bill that increased spending another 12 percent on top of that. That is what is leading to tomorrow's debt limit vote. That is what is leading to the statement that our debt limit is now above \$12 trillion. But that is not enough. Apparently, we need to go further.

The American people are connecting the dots. They see this trend, which has accelerated dramatically over the last 12 months, and they are truly scared for our collective future—for their kids' and their grandkids' future. All these things I mentioned plus this health care bill are part of that.

The American people know in their gut—they may not understand all of the Congressional Budget Office technicalities, but they know in their gut that you cannot have it both ways. You cannot count \$467 billion of Medicare cuts as both helping pay for the other spending in the bill and strengthening Medicare. It is one or the other. It cannot be both. It is the same thing in the health care bill with regard to Social Security—\$52 billion double-counted. But you cannot have that both ways. It is the same thing in this health care bill with regard to the CLASS Act—\$72 billion double-counted. You can't have that both ways. Those factors alone put this bill out of balance, adding to the deficit, adding to the debt.

What about the doc fix, the fix of reimbursement rates under Medicare to health care professionals such as doctors, which is clearly needed. That was

taken out of the health care bill. Why? Because that would cost money. It was taken out. It was just pushed down the road, the can was kicked down the road. That has to be revisited by March 1 of next year. If a real 10-year-or-more doc fix is passed, that will be another \$200 billion unpaid for—more deficit and more debt.

The American people get it. They know in their hearts, in their gut, that we are on an unsustainable course. They know all these bailouts and so-called stimulus acts, all these spending bills and now this enormous health care bill, are part of that unsustainable course, and they are crying out. They are saying we must reverse course, we must save our Nation. I hope we do that starting here, starting now.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oklahoma, Mr. COBURN, is recognized.

Mr. COBURN. Mr. President, I ask consent to have 3 minutes outside of the time allotted to make a point of personal privilege, and I ask unanimous consent for that. I would say the reason is today is my 41st wedding anniversary, and I was going to discuss that.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

HONORING MY WIFE ON MY 41ST ANNIVERSARY

Mr. COBURN. In 1953, I met a young lady—actually, it was 1954—a young lady when she was 6 years of age. Her name was Carolyn. I went through grade school with this young lady. I went through junior high with this young lady. I went through high school with this young lady. The only serious dating relationship I ever had in my life was with this young girl named Carolyn Denton. She became one of my best friends in high school. It just so happened that one weekend I couldn't get a date, she didn't have one, and I asked her out. From that point forward, I fell in love with somebody I have been married to for 41 years, my wife Carolyn Coburn.

On this day of significant votes in the Senate, and tomorrow, I wanted to take a moment to say how much I appreciate what she has meant to me the past 41 years, how much stronger she has made me as a man, how she has completed every aspect of my life being my partner as we walk through life, and the gift she gave me of three wonderful daughters.

So to my wife Carolyn, in front of the body, I tell you thank you and happy anniversary.

I would like to go to my prepared remarks.

The PRESIDING OFFICER. The Senator is recognized.

Mr. COBURN. Mr. President, I have spent 5 years in the Senate talking to my colleagues about spending. We find in front of us another opportunity to

do the wrong thing. We have a debt limit increase. Yet, in those 5 years, after hundreds and hundreds of amendments the body has refused to agree to that would cut spending, we are going to increase the debt limit but we are not going to make any effort to cut the spending.

I have given seven complete speeches on the floor about the significant amount of waste in the Federal Government. I will not repeat those now. But that number is now annualized to \$380 billion a year—every year, \$380 billion worth of waste. Part of it is fraud, but a large part of it is duplication. Let me give some examples of the duplication because I think when Americans hear this they do not understand why.

The Government Accountability Office found that there are 13 Federal agencies that spend \$3 billion to fund 207 Federal programs, 207 different programs, to encourage student standards in the fields of math and science—13 different agencies, 207 different programs. We could have spent one-tenth that amount of money and had exactly the same results and saved \$2.7 trillion. But we will not do it.

Another example, according to GAO, to the tune of \$30 billion, the Federal Government funded more than 44 job-training programs administered by 9 different Federal agencies across the Federal bureaucracy. According to the Catalog of Federal Domestic Assistance, we have 14 departments within the Federal Government and 49 independent agencies that operate exchange and study-abroad programs. We have 49 programs instead of 1. I have tons of other examples just like that.

We have failed to do our job, and the easiest thing in the world is to spend somebody else's money. Increasing the debt limit without having a rescission to get rid of programs just like this and have one program that is effective and efficient, that has metrics on it, that measures its goals and is accountable, instead of 49 or 72 or 64 across a large number of different agencies—we can do that, but there is no will here to do that. As a consequence, what we do, instead of making the Federal Government more efficient, we just raise the debt limit. I am not about to be a part of that anymore.

I know my colleagues get upset with me as I come to the floor year after year talking about what we do and the fact that we do not fix the real problems. I have been rather hard to get along with, by my colleagues, in terms of them advancing new programs when we do not eliminate the programs that are already doing the same thing.

I think at this time of Christmas, one of the things we ought to be doing is telling the American public that we will change. Next year, instead of creating new programs, we are going to look at all the programs and consolidate them and have one that does math

and science, one that is for work-study programs abroad, not the numerous numbers we have for which we have no accountability.

America recognizes our incompetence, but we are going to spell it out. In this new year that comes forward, there is not going to be a week that comes by that I do not come to the floor and show another example to the American people of how we are not doing our work. It grieves me—not for me but for my children and everybody else's children, for my grandchildren and everybody else's grandchildren—that we fail to treat the real symptoms of our debt; that is, we will not do the hard work of oversight. We should be condemned for that. We are failing the American people. It ought not to be.

I yield the floor.

The PRESIDING OFFICER. The Senator from South Dakota, Mr. THUNE, is recognized.

Mr. THUNE. Mr. President, I appreciate the comments of both my colleagues from Louisiana and Oklahoma touching on an issue that I think is becoming increasingly important to a lot of Americans.

I was listening this morning to one of my colleagues on the other side as he came down here and talked about how all the spending problems and all these debt problems were all inherited from the previous administration. There is sort of a Bush-phobia or something around here among Members on the other side because they do not want to own up for the decisions they have made.

Granted, I would be the first one to admit that when Republicans were in control of the Congress, we didn't do it right all the time and we lost our way a little bit with regard to spending.

But having said that, we now have—since 2006—a Democratic Congress. I need to remind my colleagues that the President doesn't spend a dime under our Constitution. Congress has the power of the purse. Congress appropriates funds. So if you look at the last several years in terms of appropriations, going back to the last couple of years that the Republicans were in control of the Congress, the amount of spending in the nondefense part of the budget was a negative 1 percent in 2007, 5 percent in 2006, and 8 percent in 2005. That is nondefense discretionary spending in our annual appropriations. If you go to total growth, which includes defense, you are talking about 8 percent in 2005, 5 percent in 2006, and 2 percent in 2007—more than most people would argue we needed to be spending in annual appropriations bills.

But the Democrats took control of the Congress after the 2006 election, so they started writing the budgets. We have ownership for the 2007 budget, but the Democrats have ownership for 2008, 2009, and 2010. The 2008 budget grew at 9 percent total growth. Nondefense discretionary spending grew at 6 percent.

If you look at nondefense discretionary spending in 2009, the last fiscal year, it was 12 percent. In this fiscal year, 2010, the estimate is that we will spend 17 percent over the previous year. So year-over-year spending in nondefense discretionary appropriations here in the Congress will have grown almost 30 percent in the last 2 years. That is not a problem that was created by the Bush administration. That is not a problem, obviously, for which the Republican majority was responsible. That is the Democrats, when they took control of the Congress after the 2006 elections, beginning in 2007. They write the budgets, they approve the appropriations bills. Obviously, as you can see, the numbers have gone up dramatically—12 percent in the 2009 budget year, and the 2010 estimate for which we are now funding appropriations bills—and we have funded most of them now with the omnibus or with the smaller appropriations bills, the six bills that were passed just a week or two ago—looking at 17 percent year-over-year spending in appropriations. So that is almost 30 percent in the last 2 budget years. That is not a problem the other side can hold the previous administration responsible for or attack them for.

I will also mention that the \$1 trillion approved earlier this year in the stimulus funding was approved on almost party lines. There were a couple of Republicans who supported that, but for the most part that was something approved by the Democratic majority. It was proposed by the President of the United States. That is not spending for which the former President is responsible.

At some point around here, people have to own up and take responsibility for their own decisions. You cannot blame the past administration. You cannot blame inherited problems for all the spending that is going on right here, right now. The last year, as I said, appropriations spending—and this year again—was by any stretch way above anything we have seen or should see at a time when we have an economy in recession and most Americans are having to tighten their budgets—12 percent nondiscretionary increase in 2009 and 17 percent increase in spending in 2010.

With that and the stimulus spending, it brings us to where we are today, which is this massive expansion of the Federal Government—\$2.5 trillion in new spending for a new entitlement program. That, too, is not something for which the previous administration is responsible. That is something this administration, the majority here in the Congress, has decided they want to push through. They want to finish it before the Christmas holiday. They want to get this in the rearview mirror before the American people have an opportunity to see what is in it, particu-

larly in the last hurried rush here over the weekend where we got the 400-page amendment that included all the special last-minute deals that were made to try to get that elusive 60th vote. What we have seen is now the \$2.5 trillion in new spending is filled with all kinds of goodies that are going to favor individual Senators and individual States.

The American people are starting to react.

The point I want to make about this is, the one thing that the President and a lot of our colleagues on the other side have been talking about is how this reduces the deficit. This saves \$132 billion over the next 10 years. Just remember that is \$132 billion over 10 years. If you look at what the deficit was for the month of October, if any of my colleagues know what the deficit was for the month of October, 1 month alone, this last October, it was \$176 billion—in 1 month. They are crowing about \$132 billion in savings over a 10-year period.

What is interesting about that \$132 billion, if you take away all the gimmicks and you look at all the phony accounting that has been done to get to that number, it goes down in a real hurry.

For example, the SGR fix, the physician reimbursement issue is a \$200 billion-plus item. Let's say they are saying they got \$132 billion in savings over the next 10 years. But at some point you have to deal with that \$200 billion SGR. If you take that away, you end up with a negative \$68 billion already. Then you add in this CLASS Act, which everybody who has any sense, any actuary has absolutely denounced, including even the Washington Post. But if you look at what the CLASS Act does, they are using the revenues in the first early years that come from the premiums paid in. That money will be spent.

So when it comes time to pay out benefits, there isn't going to be any money there. But they are showing a \$72 billion savings or addition to their so-called savings in that first 10 years from the CLASS Act. The chairman of the Budget Committee has called the CLASS Act a Ponzi scheme of the first order, something that Bernie Madoff would be proud of.

You take that \$72 billion out, which the Congressional Budget Office says is going to add huge deficits in the out-years, you take out that \$72 billion, and you are already at a \$130 billion deficit. We haven't even dealt with the fact that because of the way they have set this up, by front end loading the tax increases and back end loading spending, that understates the total cost.

In the first 10 years, if you take those first 4 years when you have \$56 billion of revenue coming in and only \$9 billion of spending going out, that is another \$47 billion that you could add to

the deficit. So you have gone from \$132 billion in savings to a \$177 billion deficit. That is before you even get to the more important issue, which is what the CBO came out with today in response to a question by the Senator from Alabama asking: How can you count money that is going to come from these Medicare cuts, count that as revenue that will save and extend the life of Medicare, and still spend it for a new entitlement program on health care?

The CBO basically said that is double counting. In fact, I want to read what they said:

To describe the full amount of HI trust fund savings as both improving the government's ability to pay future Medicare benefits and financing new spending outside of Medicare would essentially double-count a share of those savings and thus overstate the improvement in the government's fiscal position.

Every American knows you can't spend the same money twice. That is what this does. They are going to cut \$1 trillion over 10 years, when fully implemented, out of Medicare, but they will spend that money on a new entitlement program and still count the savings in Medicare. You can't have it both ways. The American people have figured out this shell game.

When you take a \$177 billion deficit after you take out all these accounting gimmicks, you are already running a significant deficit. Then when you add in the fact that what the CBO now says, what most of us have believed to be true and have been arguing, that you can't spend the same money twice, you cannot double-count that revenue, the Medicare trust fund is going to take a significantly big hit. I know the Senator from Alabama is going to talk more extensively about that. I want to point that out because we are going into a big debate about raising the debt limit. Everybody, now that the horse is out of the barn, wants to shut the gate. But you can't spend \$2.5 trillion on a new entitlement program and then claim to be fiscally responsible or say that you are doing something to reduce the deficit.

Interestingly enough, the CMS Actuary said these Medicare cuts are unlikely to be sustainable on a permanent basis. We all know we are not going to cut \$1 trillion out of Medicare over the first 10 years. That just doesn't happen here. All that money is going to get borrowed and put on the debt or they will have to raise taxes to pay for it. You can't have it both ways.

As we get into the debate about the debt limit, it is important to put things into context. I want to say again that \$132 billion in savings, which is what they are saying they get by this health care reform bill with all the tax increases and the Medicare cuts, is suspicious in the first place, given the fact that the SGR, the \$200 billion is not included, the \$72 billion

CLASS Act, and the \$47 billion that they achieve by front end loading tax increases and back end loading spending brings you to a \$177 billion deficit in the first 10 years. That does not even include the funky accounting being used with regard to the Medicare trust fund. We will get into this debate about the debt limit, but nothing bears on that more heavily than what we do with health care.

We need to defeat this. I hope we will still see some courage by a few of my colleagues to help us take this health care bill down, to go back to the drawing board, to do it right and to actually put in place solutions that will meaningfully reduce the cost of health care for people in this country, not increase their premiums, and not add to the deficit and saddle future generations with an enormous debt they don't deserve. Remember, \$176 billion was the deficit in the month of October alone. We are talking about, under their numbers, \$132 billion in savings over 10 years which, when you sit down and figure it out, it just doesn't add up.

I yield the floor.

The PRESIDING OFFICER (Mr. NELSON of Florida). The Senator from Arizona.

Mr. KYL. Mr. President, when the recession hit last fall, many Americans had been living beyond their means and had to quickly scale back. Families all across America have been tightening their belts. They have been forgoing vacations, meals in restaurants, extra Christmas presents, cutting back wherever they can. The government needs to take a lesson from those families. It is time that Congress and the administration get serious about cutting spending in a meaningful way. Spending during President Obama's first year in office, to put it charitably, has not been what most would describe as responsible. Government spending grew by \$705 billion in fiscal year 2009, an increase of 24 percent. Appropriations legislation enacted this year will increase spending by another 8 percent in the year 2010. All of this spending, of course, has an impact on both the Federal deficit and the Federal debt.

Let me clarify the difference between those two numbers. The deficit is the amount of total spending not covered by revenues in a given year. The debt is the sum of all of the Nation's yearly deficits. The 2009 deficit made history and not in a good way. It exceeded \$1.4 trillion in the last fiscal year. That is the highest amount in history and more than three times as much as the highest deficit during the last administration. The budget President Obama submitted to Congress doubles the deficit in 5 years and triples it in 10. It also creates more debt than the combined debt under every President since George Washington. That seems almost impossible, but it is true.

The President's budget creates more debt than all of the debt ever combined

throughout the history of the country, from George Washington all the way up through George Bush, more debt under President Obama's budget than all of that combined.

Even Management and Budget Director Peter Orszag has said that is not sustainable. The debt has reached an almost unimaginable sum of \$12 trillion. To pay the Federal Government's bills for the next 2 months, tomorrow we are going to consider passing a roughly \$300 billion increase in the allowable U.S. national debt known as the debt ceiling. That means our debt ceiling, now \$12.1 trillion, will be \$12.4 trillion. After those 2 months, we will need to add another \$1.5 trillion to the debt ceiling to pay for the remaining spending in the year 2010.

Early next year our debt ceiling will be a whopping \$13.9 trillion. Of the massive national debt, a paper by the Heritage Foundation tells us:

The recession and excessive spending have caused the debt held by the public to grow sharply to 56 percent of the economy, topping the historic average of 36 percent. To make matters worse, entitlement programs will double in size over the next few decades and cause the national debt to reach 320 percent of the economy.

That is so obviously unsustainable that it has to be of great concern to us. It is like the size of a credit card being several times more than our income, such that we can never pay the debt on the credit card. That is even to ignore the interest payments. Let's not forget about that. That is another tab we have to pick up. I have only been talking about the principle. But in 2009 alone, interest payments were \$209 billion. By the year 2019, interest payments are expected to reach \$800 billion a year. That is just the interest on the debt.

How are we going to afford that? By the way, who do we pay that to? We pay it to all the people we borrow money from, one of which is the nation of China. Chinese officials have indicated that they are very nervous about the amount of debt the United States is taking on.

In mid-March, Chinese Premier Wen Jiabao voiced concerns about U.S. Government bond holdings:

We have lent huge amounts of money to the United States. Of course we are concerned about the safety of our assets. To be honest, I am a little bit worried, and I would like to . . . call on the United States to honor its word and remain a credible nation and ensure the safety of Chinese assets.

What can a lender do when he or a nation becomes concerned that the borrower is going to have trouble paying back, when the borrower keeps coming back for more and more lending? What you do is you raise the interest rate to reflect the greater risk in the lending of the money. That is what is going to happen to us. That greater interest rate is going to be manifest in payments that we have to make by our

productivity and the taxes we pay. That will decrease our standard of living and create an additional obligation on the American people.

President Obama has acknowledged the problem. He said:

We can't keep on just borrowing from China. We have to pay interest on that debt, and that means we are mortgaging our children's future with more and more debt.

He is right. So why does he propose more spending and more borrowing and more than any other President in the history of the world?

It is time for words and actions to match. It is time for Congress and the President to start reining in this out-of-control spending and debt. I stand with my colleague from Alabama in support of his amendment to reinstate statutory spending caps. While this is not a panacea for solving the fiscal problems the Nation faces, it is a good way to start on the path to responsibility. I will bet that most of our colleagues on the other side of the aisle will vote against it. It is wrong for them to expect Republicans to extend the debt ceiling as long as they are unwilling to do anything to get spending under control.

Americans expect us to get this spending and debt under control. When we return to the Senate in January, our first item of business will be a long-term debt ceiling extension, including consideration of the Sessions amendment and others. After pushing the stimulus, the auto bailout, cash for clunkers, the massive \$2.5 trillion health care bill, and others, I would hope our Democratic colleagues are ready to take a breather from their big spending and support a more reasonable course so that we don't have to continue to extend the Nation's debt ceiling.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. SESSIONS. Mr. President, I thank Senator KYL for his consistent performance over his entire career in the Senate of trying to maintain financial responsibility in this body, and I respect him highly on that and many other issues.

There is so much we could say at this point on the debt limit, on which we expect the vote tomorrow. I am not going to vote on a debt limit increase until we accompany it with some action that will actually reduce the incredibly irresponsible path we are on. That is going to be one of my positions, and I think others will take the same view.

Saying we have to increase the debt—well, we have to do something about reckless government spending. We really do. We have to do something about it. They always say: Next year. So I say: When? I believe we should condition any increase in the debt limit on the passage of legislation that would renew what has expired, spending caps on the discretionary spending

accounts. I thank Senator KYL for supporting the legislation.

In other words, we can do that. We did it in 1990. You can see, as shown on this chart, the declining expenditures that resulted in those numbers. We passed it in 1990. As shown on this chart, those yellow lines represent the deficit—up to \$300 billion, and it began to shrink. In late 2000, 2001, we had surpluses in our accounts. It is odd to show a surplus, shown below the line on this chart, but we accomplished that.

President Clinton liked to claim credit for it. I have a vague memory that Republicans shut the government down to contain President Clinton's spending. But there were battles over containing spending, and it worked. A big key to it was the spending limits, the spending caps. Those expired in 2002, and, look, we began to show the increases in deficits again. So I think as a condition of voting for a debt increase we should have a fix of the restoring of the caps.

Senator KYL made reference to the fact that under President Obama's 10-year budget he submitted earlier this year, which was scored by the Congressional Budget Office, a nonpartisan group, but the leaders were picked by the Democratic majority. What would it do to our deficit, I ask? He has a budget for 10 years. He shows what he expects to have in revenues during those 10 years and what he expects to spend. He does not show, however, what is spent in the health care legislation because that was not in law at the time the budget was submitted. So in truth it will be worse than this.

But let's look at this. In 2008, the debt was \$5.8 trillion; in 2013 it doubles to \$11.8 trillion; and by 2019, it triples to \$17.3 trillion. That is a stunning tripling of the public debt of the United States of America. It is an unsustainable path. One of the most grim parts of the scoring of this deficit expansion is it is not getting better. In years 8, 9, 10, the deficit is going up to almost \$1 trillion a year; in 2019—the 10th year—going up. They are not projecting during that 10 years any recession. In fact, they projected that we would come out of the recession we are in now faster than we are coming out of it. So the numbers probably will be worse there.

This is not made up. This is the President's budget. It is scored by this Congress's CBO, and it is the best numbers we have. It is a stunning development. We cannot continue. That is why people say it is unsustainable.

Senator KYL made reference to this. I made a chart on it some time ago. I just could not believe it. In 2009, the total interest this government paid on the debt we owe was \$170 billion. You can see, this chart shows the annual interest payments we make that are surging year after year. It is the result of several things.

CBO is cautious, but they are acknowledging that interest rates are going to go up. We have virtually zero interest rates in short-term Treasuries today. That is not going to continue. So you have more debt and higher interest rates. You get surging interest payments.

In 2017, we have interest payments over \$600 billion. It goes over, in 2019—1 year's interest—\$799 billion. As I recall, the supplementals we have used to fund the war in Iraq represented about \$70 billion a year. A couple years ago, our highway spending was about \$40 billion a year. Aid to education is about \$100 billion a year. In 2019, in 1 year, we will pay \$799 billion, I think, at a minimum, just in interest. You see how huge those numbers are? It is unsustainable. We cannot continue to do this.

The American people understand it. CNN did a poll last month. They asked this question of the American people:

Which of the following comes closer to your view of the budget deficit—the government should run a deficit if necessary when the country is in a recession and at war or the government should balance the budget even when the country is in a recession and is at war?

What do you favor? Sixty-seven percent say: "Balance the budget."

Well, what is Congress doing? Running the most incredible series of deficits we have ever seen, tripling the national debt in 10 years—all in furtherance, basically, of President Obama's budget, which calls for this.

Sure, President Bush was not as frugal and fiscally responsible as he should have been. Most, however, of his debt was driven by war costs. But regardless, he could have been more frugal and spent less. But the deficits he had would come in at half or less than half of the deficits we are going to see on average over the next 10 years. So I have to say, we are losing our perspective.

This health care reform bill is a serious matter. We have a report this morning from the Congressional Budget Office that clarifies what has been pretty obvious to us for some time, but it was difficult to get an official accounting of how these numbers are scored or added up by the Congressional Budget Office.

But, basically, what they say is pretty simple. They are saying that proposals in this bill that raise the payroll tax on Medicare and reduce expenditures within Medicare—cutting Medicare—saves money. It puts more money in the pot. But it is part of the Medicare trust fund pot. As to that savings, it is said: Well, we will just spend it over here and pay for this new health care program that was just voted on earlier today.

So we are going to take this savings and increased revenue to Medicare, and we are going to spend it over here. This

is a chart I just put together to try to show that. As shown on this chart, here is Medicare. You raise Medicare income and you cut their costs and you create an extra surplus. We have some surplus still in Medicare. If we do not do something about it, Medicare will be in deficit in 2017—8 years. So this transfer of money then goes to the U.S. Treasury, and: Oh, we have extra money, let's spend it on a new health care reform that has never before been passed, creating benefits for people who have never received these kinds of benefits before because we want to be helpful to those people, create more insured people in America.

But as the CBO said, you cannot count this money twice. What about the people who are paying into Medicare, who have been paying into it for 40 years? They have not received a dime of benefit—until they get to age 65—and it is their money they are putting into Medicare. They are not just giving it over here to the U.S. Treasury.

As one of them wrote me: You are taking my money. I am 67. I am just now beginning to draw Medicare. You are taking my money and giving it to somebody else. I have never received any benefits from Medicare until now, and you are taking it from me.

So as a matter of the way our accounting occurs, the U.S. Treasury cannot take that money just free and clear. It is not extra, free money.

I see my colleague. I want Senator BAUCUS to recognize that according to the CBO Director—he told me last night, there are bonds issued. Treasury has to give a bond to Medicare, a Treasury note, an IOU. So when Medicare starts running in default—as it will within the next 15 years if this bill were to pass—when Medicare starts running into default, they are going to have the Treasury pay for it. So, in effect, this bond causes the U.S. Treasury to pay interest to Medicare.

During this first 10 years, the U.S. Treasury will pay interest to Medicare of \$69 billion on the money they borrowed—this IOU here. Then, when it goes into default—as it is inevitably heading into default—the Treasury will have to pay those bonds. So it increases the debt.

What CBO says, without any equivocation, is—it is not disputable—the debt of the United States will be increased by this bill, not decreased. It will not be a \$132 billion surplus in reality but will be a \$170 billion deficit, just on that. Then, when you get to what Senator THUNE talked about, other gimmicks in the bill, it makes that even worse.

You say, well, the CBO has a score that says it is a \$132 billion surplus. It reduces our debt \$132 billion. Well, the way they are doing this, and the way that accounting is done, with trust funds and nontrust funds in a unified

government budget, they do not score this IOU because they seem to think it is all one government, and so what is one is not the other, and it is not debt. But it is a debt, and they said it explicitly. You cannot count the money over here as adding to the life of Medicare and at the same time score this as free money to be spent over here on this program.

President Obama, Monday, at a press conference, said it is going to reduce our deficit \$132 billion, and it is going to extend the life of Medicare by 9 years. Well, you cannot do both, as they have explicitly stated in the letter we got from CBO, and it is just a matter of absolute fact.

They say:

To describe the full amount of HI trust fund savings—

Over here in Medicare—

as both improving the government's ability to pay future Medicare benefits and financing new spending outside of Medicare would essentially double-count a large share of those savings. . . .

Well, these kinds of gimmicks and manipulations have been done before, but it is time to end it. I think the American people have said: In a time of war, in a time of recession, we need to get busy about the budget—by a two-thirds vote.

They are right. We are going to work our way out of this recession. This American economy will respond sooner or later and, hopefully, sooner for the people of the United States.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SESSIONS. Mr. President, is that the 10 minutes on this side? And is there time left on this side? I ask unanimous consent to have 3 additional minutes.

Mr. THUNE. Mr. President, I think our side has another 10 minutes or so, with which I would perhaps enter into a colloquy with the Senator from Alabama.

I would ask the Senator, on the point he made—and I give the Senator great credit for raising that question to the CBO—because I think it is intuitive to most people that you cannot spend money twice; that you cannot somehow double-count it. That is essentially what the CBO said in their letter. I think the Senator quoted from it.

They went on to say—CBO has written “that the savings to the HI trust fund . . . would be received by the government only once, so they cannot be set aside to pay for future Medicare spending and, at the same time, pay for current spending on other parts of the legislation or on other programs.” That is the argument we have been making all along. I guess finally it dawned on the CBO, evidently, and it took the Senator's question, I think, to get them to respond this way.

But the way the Senator explained the interaction between government

trust funds, the unified budget, and the IOUs the government writes to itself, perhaps gives some explanation to how they came up with this actually achieving a savings. But the Senator made it very clear: \$170 billion actually to the deficit. As I mentioned earlier, the accounting gimmicks that have been used have understated the 10-year cost of this. By the way, my staff corrected me. The off-the-top-of-my-head calculation was \$177 billion in deficit; it is actually \$187 billion. So you add that to what you mentioned, pretty soon you have what they are claiming is a \$170 billion savings turns into a very sizable deficit.

So I would ask the Senator from Alabama—again, I give him great credit for bringing this to light, raising this issue with the CBO—what does that mean for this piece of legislation we are going to be voting on tomorrow, a \$2½ trillion expansion of the government financed through tax increases and Medicare cuts. Yet even with all that, the assumption is, this is not going to meet the requirement the President set out; that is, that it doesn't add a single dime to the deficit.

What does that mean to that commitment made by the President and to this legislation's sort of fiscal situation as we move forward and to these negotiations or discussions, if this passes tomorrow, with the House of Representatives?

Mr. SESSIONS. This is a huge issue. I remember a few months ago, in a joint session of Congress, President Obama spoke to us. He looked out at the crowd and said: This bill will not add one dollar—or one dime—to the national debt. It was a firm commitment to all the American people who were listening, all the Congressmen and Senators in that room—it will not add to the debt. So what we now know is that this bill is going to add to the debt. There is no doubt about it. The debt of the United States will increase. It is a dangerous trend that happens in a lot of different ways that has put us onto this course.

I think he recognized you shouldn't increase the debt. He recognized, if he is going to create an entirely new health care program over here, it ought to be paid for, and he promised to do that. We have Members of this body, Members of the House who supported the bill, based on the promise it would not increase the debt. But we have now, conclusive proof, in any number of different ways but particularly with the CBO score, that it will increase the debt. It is a decisive issue as far as I can see.

Mr. THUNE. If the Senator will further yield, in addition to this revelation from the CBO, which I think does change the game and the whole debate about whether this is a budget buster, which it has been described as, in spite of the fact that our colleagues on the

other side have been arguing it extends the life of Medicare, I think this statement by the CBO certainly shreds the notion that you can have it both ways; that you can double count this money; that you can spend it twice. You can't do that. I think the American people get that, which is why they believe it will add to the deficit as well.

But there are other things in this bill—

Mr. SESSIONS. I would just say my understanding, having looked at this at some length and given it thought, is the legislation will extend Medicare because it increases the Medicare tax, and that will bring in more money. It pretends we will slash provider payments on health care and others and save money that way. So, on paper, it definitely should extend the life of Medicare.

What do we do with the money? Well, the money that is saved is not staying in Medicare. It is being borrowed by the U.S. Treasury to spend on a new program, and the U.S. Treasury owes it to Medicare. We can see in the trends in Medicare it will not be too many years before Medicare is going to want that money. That is going to leave us over here, and that is why we have a debt. It increases our debt, and we are going to have to pay that back—our children, our grandchildren—sooner than that. Hopefully, we will be around to pay some of that back.

So that is the problem we have. It is a misrepresentation to say this creates money that can fund a program on a permanent basis. It does not. It is just an internal debt situation.

Mr. THUNE. If the Senator will further yield, a couple other items that are being used to get us to where this argument can be made, which is that there are savings from this, this \$132 billion savings and deficit reduction the majority has talked about also includes the creation of an entirely new program called this CLASS Act.

There were eight Democratic Senators who wrote a letter, basically, asking that the CLASS Act not be included in this bill, recognizing what many have; that is, that the CBO has recognized that while it may show some savings in the early years, when people are paying premiums, it is similar to everything else. That money, when it gets spent on other things, isn't there to pay out benefits when the time comes to pay out benefits. So we get this artificial \$72 billion infusion of cash in the early years, which is being used to, again, understate the cost of this and to demonstrate—or to make the argument that there is, in fact, \$132 billion in savings here or deficit reduction.

There is \$72 billion that this CLASS Act represents in that first 10-year window which, as I described earlier, our colleague on the other side has described it as a Ponzi scheme. But it

does create an entirely new program, not unlike some of the entitlement programs that already exist, where payments are coming in now that are being used to spend for other purposes that someday, when the chickens come home to roost, there is going to be another reckoning. Again, I think it is another example of a program of a way in which this financial picture, with regard to this health care bill, is understating its true costs and its impact on deficits in the long run.

I would ask my colleague from Alabama, having looked at that particular program, if he would agree that too is something that is going to cost us significantly in the outyears and whether that is something that ought to be included as counted toward the whole calculation on deficit reduction in this legislation.

Mr. SESSIONS. I thank Senator THUNE for his leadership in exposing this. The way I believe this operates—and you correct me if I am wrong—but the way I believe it operates is it requires a certain number of premiums now, and the actuaries who score these things say that in the years to come, there will be claims on those policies and people will claim more and more as they get older and the years go by and it becomes actuarially unsound. But in the first few years, on paper—on paper—for the first 2 years, it looks good because you have more coming in than going out. So they are scoring this short-term surplus—correct me if I am wrong—they are scoring this as an asset, as income to the Treasury, when the contracts people have when they start paying this money in protects them for years and years to come, and in the future they will be making more claims than are paid out.

That is why it is actuarially unsound and will increase the debt in the long run. Would the Senator describe it that way?

Mr. THUNE. Well, I think that is exactly how it would work. Again, it is another gimmick, if you will; another accounting tool.

Mr. SESSIONS. So it is dishonest. When you know a program is not actuarially sound and it is going to take additional Federal Government revenue to honor the contracts in the years to come, to count that today as an asset is wrong. It is improper to do that. We ought not to propose a plan that has a Ponzi scheme-type nature to it.

Mr. THUNE. Well, I don't disagree, and I think the American people agree with that.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. SESSIONS. I thank the Chair and yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, this has been an interesting discussion we have

heard in the last 15, 20 minutes. One can do anything with figures, numbers. I am not going to cite the often-used phrase that some category of people can figure, another category of people can do something else. But anyway, one can do anything with numbers, anything whatsoever. Frankly, this is an effort to confuse by pulling different figures out from one document and then another and concocting—they can put a board up here. It is just an effort to confuse. One can do anything with numbers.

The real question is, What are the facts?

Mr. SESSIONS. Will the Senator yield?

Mr. BAUCUS. I wish to first make a point, and I will yield later to the Senator.

The Congressional Budget Office stands by its analysis. I have before me an e-mail sent today, dated today's date, 2:56 p.m., and let me read it, from the Congressional Budget Office:

The Congressional Budget Office has been asked whether our memo this morning discussing the effect of [this legislation] incorporating the manager's amendment, on the federal budget and on the balance in the Hospital Insurance trust fund alters CBO's earlier findings about the budgetary impact of the legislation. It does not. In particular, as described in our December 19 and December 20 letters to Senator Reid—

Let me continue reading and, hopefully, Senators are listening to this because this is a letter today, actually it is an e-mail today, at 2:56 p.m. CBO says:

CBO and the staff of the Joint Committee on Taxation estimate that the legislation would reduce federal budget deficits by \$132 billion during the 2010–2019 period.

Next:

CBO expects that the legislation would reduce federal budget deficits during the decade beyond 2019 relative to those projected under current law—with a total effect during that decade that is in a broad range between one-quarter percent and one-half percent of GDP.

Of course, we know that is about \$650 billion to \$1.3 trillion. That is CBO today.

Third:

CBO expects that the legislation would generate a reduction in the federal budgetary commitment to health care during the decade beyond 2019.

So what everyone says—and I might say to my good friend from Alabama, part of that chart he had before us today is accurate, I mean the flow of Medicare and the IOUs and so forth. The part that is inaccurate is the increasing debt and the double accounting part. There is no double accounting here. There are separate accounting regimes and procedures that are used for all trust funds, including Medicare. The Medicare trust fund issues dollars that are in surplus in the outyears, as the Senator said, that have been held by the trust fund—by the trustees—and

dollars that are used in any way the Federal Government decides to spend dollars, either pursuant to legislation or maybe the administration on its own may be spending some dollars in one place or another.

This is not double accounting. Nobody has claimed there is double accounting. There are two different regimes and that is how—the Senator accurately described how the Medicare trust fund is accounted for. But it is also true that under our budget rules, we have a unified budget, there is one government—U.S. Government—there is Medicare and the rest of the government, and under that unified budget regime, the CBO still reaches the same conclusion it has always reached. I would like that to be on the RECORD.

The Senator has a question.

Mr. SESSIONS. Mr. Chairman, I would agree that—

The PRESIDING OFFICER. The Senator will address the other Senator through the Chair.

Mr. SESSIONS. Mr. President, will the Senator yield for a question?

Mr. BAUCUS. Mr. President, I yield for a question.

Mr. SESSIONS. I think that CBO's second statement is correct. I think the statement they did earlier about the \$132 billion surplus reducing the debt over 10 years is technically accurate. But I think the statement they issued early this morning that this is—to count it in both places is a double count of the money, in effect.

My question to the Senator is, we are going to be talking about voting on the debt limit tomorrow.

Mr. BAUCUS. That is correct.

Mr. SESSIONS. The debt limit is the gross debt of the country.

Isn't it true the passage of this health care bill will increase the gross debt of the country, the gross debt being both the public debt and the intergovernmental debt?

Mr. BAUCUS. No, that is not—

Mr. SESSIONS. Will not the bill increase the gross debt of the United States?

Mr. BAUCUS. If I might respond and answer the question—no; the exact opposite. CBO says so. CBO says it actually reduces the debt by \$1 billion.

Mr. SESSIONS. I am asking the difference. The question is gross debt. Does it reduce or increase the gross debt?

Mr. BAUCUS. If I might, Mr. President, as the Senator knows, the debt is the accumulation of deficits, and by definition, if a deficit is reduced, therefore, the national debt is also reduced. That is a mathematical truism. If the deficit is reduced, automatically the debt is reduced. That is mathematics.

The next point I want to make, there was substantial debate today about the constitutionality of this bill. As I have discussed before, we have confidence that the health care plan we have

crafted is an appropriate exercise of the commerce clause and does not violate the 10th amendment. We further believe that ample power is available under the takings and spending power, as well.

I ask unanimous consent to have printed in the RECORD two articles by Prof. Erwin Chemerinsky and Prof. Michael Dorf.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From *Politico*, Oct. 23, 2009]

HEALTH CARE REFORM IS CONSTITUTIONAL

(By Erwin Chemerinsky)

Those opposing health care reform are increasingly relying on an argument that has no legal merit: that the health care reform legislation would be unconstitutional. There is, of course, much to debate about how to best reform America's health care system. But there is no doubt that bills passed by House and Senate committees are constitutional.

Some who object to the health care proposals claim that they are beyond the scope of congressional powers. Specifically, they argue that Congress lacks the authority to compel people to purchase health insurance or pay a tax or a fine.

Congress clearly could do this under its power pursuant to Article I, Section 8 of the Constitution to regulate commerce among the states. The Supreme Court has held that this includes authority to regulate activities that have a substantial effect on interstate commerce. In the area of economic activities, "substantial effect" can be found based on the cumulative impact of the activity across the country. For example, a few years ago, the Supreme Court held that Congress could use its commerce clause authority to prohibit individuals from cultivating and possessing small amounts of marijuana for personal medicinal use because marijuana is bought and sold in interstate commerce.

The relationship between health care coverage and the national economy is even stronger and more readily apparent. In 2007, health care expenditures amounted to \$2.2 trillion, or \$7,421 per person, and accounted for 16.2 percent of the gross domestic product.

Ken Klukowski, writing in *POLITICO*, argued that "people who declined to purchase government-mandated insurance would not be engaging in commercial activity, so there's no interstate commerce." Klukowski's argument is flawed because the Supreme Court never has said that the commerce power is limited to regulating those who are engaged in commercial activity.

Quite the contrary: The court has said that Congress can use its commerce power to forbid hotels and restaurants from discriminating based on race, even though their conduct was refusing to engage in commercial activity. Likewise, the court has said that Congress can regulate the growing of marijuana for personal medicinal use, even if the person being punished never engaged in any commercial activity.

Under an unbroken line of precedents stretching back 70 years, Congress has the power to regulate activities that, taken cumulatively, have a substantial effect on interstate commerce. People not purchasing health insurance unquestionably has this effect.

There is a substantial likelihood that everyone will need medical care at some point.

A person with a communicable disease will be treated whether or not he or she is insured. A person in an automobile accident will be rushed to the hospital for treatment, whether or not he or she is insured. Congress would simply be requiring everyone to be insured to cover their potential costs to the system.

Congress also could justify this as an exercise of its taxing and spending power. Congress can require the purchase of health insurance and then tax those who do not do so in order to pay their costs to the system. This is similar to Social Security taxes, which everyone pays to cover the costs of the Social Security system. Since the 1930s, the Supreme Court has accorded Congress broad powers to tax and spend for the general welfare and has left it to Congress to determine this.

Nor is there any basis for arguing that an insurance requirement violates individual liberties. No constitutionally protected freedom is infringed. There is no right to not have insurance. Most states now require automobile insurance as a condition for driving.

Since the 19th century, the Supreme Court has consistently held that a tax cannot be challenged as an impermissible take of private property for public use without just compensation. All taxes are a taking of private property for public use, but no tax has ever been invalidated on that basis.

Since the late 1930s, the Supreme Court has ruled that government economic regulations, including taxes, are to be upheld as long as they are reasonable. Virtually all economic regulations and taxes have been found to meet this standard for more than 70 years. There is thus no realistic chance that the mandate for health insurance would be invalidated for denying due process or equal protection.

Those who object to the health care proposals on constitutional grounds are making an argument that has no basis in the law. They are invoking the rhetorical power of the Constitution to support their opposition to health care reform, but the law is clear that Congress constitutionally has the power to do so. There is much to argue about in the debate over health care reform, but constitutionality is not among the hard questions to consider.

[From *FindLaw Legal News*, Nov. 2, 2009]

THE CONSTITUTIONALITY OF HEALTH INSURANCE REFORM, PART II: CONGRESSIONAL POWER

(By Michael C. Dorf)

Although many key details remain to be negotiated, Congress appears poised to enact some substantial reform of American health care that will build on, rather than replace, our patchwork of government, private, and non-profit insurance. The bill that the President signs will likely contain, among other things, an "individual mandate" requiring that everyone obtain health insurance or face a financial penalty. Would such a mandate be constitutional?

In my last column and an accompanying blog entry, I considered and rejected the objection that an individual mandate would be an unprecedented burden on liberty because it would affirmatively direct conduct, rather than either forbidding conduct or imposing affirmative obligations on only those who engage in conduct that the government has the power to forbid. As I explained, there are substantial precedents for such affirmative obligations and even if there were not, there is no reason in principle why an affirmative

duty is a greater restriction on liberty than a prohibition or condition.

In this column, I consider a different objection to the individual mandate: the claim that the federal government lacks the authority under the Constitution to impose the mandate or to penalize those who do not comply. As I explain, this objection is also unsound as a matter of constitutional law. I conclude, however, that individual members of Congress ought to decide for themselves whether regulating health care in the manner of the proposed bills is an appropriate job for the federal government, or instead should be left to state regulation or the market.

IS A REGULATION OF HEALTH CARE A REGULATION OF INTERSTATE COMMERCE?

Under the Tenth Amendment, Congress may only enact legislation that falls within one or more of its enumerated powers. Most of those powers—and all of the powers that are potentially relevant in the health insurance reform debate—are found in Article I, Section 8. From the very earliest days of the Republic, there has been controversy about the scope of those powers.

Consider, for instance, that the Constitution does not expressly grant Congress the power to charter a bank. Accordingly, President George Washington asked two of his Cabinet members to prepare memoranda on whether that power could nonetheless be inferred from the powers that are enumerated in the Constitution—including the powers to regulate interstate and foreign commerce, to coin money, to lay and collect taxes, to spend money for the general welfare, and to enact such laws as are "necessary and proper for carrying into execution the" specifically enumerated powers.

Arguing for a position that would today be called "states' rights," Thomas Jefferson said no. The enumerated powers had to be construed narrowly, he said, or else the federal government would completely overshadow the states. Alexander Hamilton disagreed, however. He explained that in order to carry out the powers it was expressly granted, Congress must have implied powers. Washington sided with Hamilton and, years later, in the landmark 1819 case of *McCulloch v. Maryland*, so did the Supreme Court.

At various points in American history, politicians and judges have flirted with the Jeffersonian view, but for the most part, the Hamiltonian position has prevailed, especially with respect to laws purporting to regulate interstate commerce. Thus, under the Supreme Court's 1942 decision in *Wickard v. Filburn*, Congress can forbid a farmer from growing more wheat than his federal quota allows on the theory that if he does not grow wheat, he will purchase it, which will affect the interstate market.

Likewise, in the 2005 case of *Gonzales v. Raich*, the Court said that in the course of regulating the national illegal market in marijuana, Congress could forbid the intrastate, noncommercial production and consumption of medical marijuana, even if it is legal under state law. The Court explained that Congress legitimately worried that making an exception to the general prohibition on marijuana use for medical marijuana use that is authorized by state law could substantially undermine the government's ability to police other marijuana production, distribution, and possession.

That same logic applies to the individual mandate in the health insurance context. As I explained in my last column, the main point of the individual mandate is to ensure that insurance companies cover people even though they have pre-existing conditions.

Without the individual mandate, however, many young, healthy people would decline insurance until they got sick, creating a severe adverse selection problem. Thus, the individual mandate is closely connected with the regulation of health insurance, just as the Court said in *Raich* that the regulation of marijuana that is used for medical purposes is closely related to the regulation of the broader market for marijuana.

Health care is an enormous interstate business. It therefore counts as interstate commerce, regulable by Congress. Just as, in *Raich*, Congress acted constitutionally by declining to exempt individual acts of non-commercial intrastate marijuana possession from the Controlled Substances Act, so too Congress would act constitutionally by including an individual mandate within the ambit of its regulation of health care.

IS EXISTENCE AN "ECONOMIC ACTIVITY"?
THAT'S THE WRONG QUESTION

Skeptics nonetheless point to two Supreme Court cases—the 1995 ruling in *United States v. Lopez* and the 2000 decision in *United States v. Morrison*—as grounds for the conclusion that the individual mandate would be beyond the power of Congress under the Commerce Clause. In *Lopez*, the Court invalidated a federal criminal law forbidding possession of a firearm near a schoolyard. In *Morrison*, the Court rejected a federal law providing victims of gender-motivated violence with a right to sue their attackers. Both decisions reasoned that Congress typically cannot regulate "noneconomic" intrastate activities on the ground that they affect interstate commerce.

Accordingly, lawyers David Casey and Lee Rivkin, writing in *The Washington Post* in August, concluded that *Lopez* and *Morrison* make the Commerce Clause unavailable as a source of congressional power for the individual mandate because a human being's mere existence is not a form of economic activity. Indeed, they might have added, existence is not an activity at all.

Although the issue is not entirely free from doubt, I do not think that Casey and Rivkin have correctly read the precedents. In *Lopez* and *Morrison*, Congress sought to prohibit activities—firearms possession near schools and gender-motivated violence, respectively—that were not, according to the Court, "economic." In those two cases, it was only by several logical inferences of the handbone-connected-to-the-wristbone-wristbone-connected-to-the-elbow-bone sort that one could move from the regulated activity to an effect on commerce. For example, in *Lopez*, the theory went as follows: Guns near schools intimidate children; intimidated children have a hard time concentrating on their studies; they learn less; they then grow up to be less productive members of society; and thus the national economy suffers. Even though each link in this chain is plausible, the *Lopez* majority reasoned that if the Court were to allow this sort of inferential process, then virtually anything would count as a regulation of interstate commerce. Acknowledging that congressional power under the Commerce Clause is very broad, the Court in *Lopez* and *Morrison* nonetheless insisted that it is not infinitely broad.

By contrast with the laws that were invalidated in *Lopez* and *Morrison*, the individual mandate is quite close to the core of the Commerce Clause. Treating the mere existence of a human being as the predicate of regulation in the health care bills would miss the point. Whereas the Gun Free School Zones Act in *Lopez* and the civil remedy provision of the Violence Against Women Act in

Morrison sought to discourage certain conduct, the point of the individual mandate is to encourage certain conduct. And crucially, the conduct the individual mandate seeks to encourage is quintessentially economic: It is the purchase of a service, namely health insurance.

Does Congress have the power to encourage people to engage in market transactions? Of course it does. That, after all, was the whole point of the law upheld in *Filburn*: By limiting the amount of wheat that farmer *Filburn* could grow, the government sought to encourage him to buy compensating amounts on the market. As the unanimous Court explained in a ruling that the more recent cases expressly reaffirm: "The stimulation of commerce is a use of the regulatory function quite as definitely as prohibitions or restrictions thereon."

In the end, then, the argument of Casey, Rivkin, and others who oppose the individual mandate on Article I grounds amounts to no more than the assertion that the Constitution forbids Congress from using the most direct means of encouraging market activity: a mandate that individuals do so. But there is nothing in the text or history of the Constitution to support that conclusion.

Indeed, the *Ur*-decision about Article I power, *McCulloch*, says the exact opposite: "Let the end be legitimate, let it be within the scope of the constitution, and all means which are appropriate, which are plainly adapted to that end, which are not prohibited, but consist with the letter and spirit of the constitution, are constitutional."

As we have seen, the individual mandate is "plainly adapted" to the undoubtedly legitimate end of regulating the enormous and enormously important health-care sector of the national economy. It is therefore constitutional.

THE TAXATION POWER

In light of the broad interpretation the Supreme Court has given to the enumerated powers of Congress, an Act may be justified on more than one constitutional ground. Thus, the individual mandate could alternatively be upheld as a valid exercise of the Article I power to "lay and collect taxes, duties, imposts and excises," as bolstered by the Sixteenth Amendment's authorization of an income tax. After all, in most versions of the individual mandate, Americans are not literally required to purchase health insurance: Instead, they are told to pay a tax from which they can be exempted if they have health insurance.

To be sure, as Casey and Rivkin observe, a 1922 case, *Bailey v. Drexel Furniture Co.*, holds that Congress may not use taxation as a pretext for accomplishing a regulatory objective that it could not accomplish directly. But subsequent cases upholding "occupational taxes" on businesses that Congress clearly intended to discourage, have made clear that a tax that serves a revenue-raising purpose is not invalid simply because it also serves a regulatory purpose. And there is no doubt that the tax on uninsured income earners would serve a valid revenue-raising purpose—namely, to defray the costs of subsidizing health insurance for those who could not otherwise afford it.

Thus, even if Congress lacked the power to adopt the individual mandate under the Commerce Clause, the taxing power would separately authorize a properly-worded tax on the uninsured, despite its regulatory impact.

FEDERALISM IN CONGRESS: ITS MEMBERS, TOO,
CAN CONSIDER THE CONSTITUTIONAL DIMENSIONS OF LEGISLATION

The foregoing analysis shows why an individual mandate would be upheld against a court challenge, so long as the courts faithfully apply the current Supreme Court precedents. Nonetheless, members of Congress are entitled—indeed, some might say they are obligated—to reach their own constitutional judgment about any bill that comes before them. And that is especially true when there is a question about the proper role of the federal government and the states.

In its cases involving challenges to congressional power, the Supreme Court has sometimes said that the broad deference given to Congress arises out of institutional concerns: Except in extreme cases, the Justices lack the fact-finding capacity and democratic legitimacy to make all of the fine-grained judgments about what matters should be federalized and what matters should be best left to the states. In the words of the late constitutional law scholar Herbert Wechsler, the Court relies on "the political safeguards of federalism" to do most of the work of ensuring a constitutional balance between national and state regulation.

Wechsler pointed to a variety of ways in which the interests of the states are represented in Congress itself. Chief among these are the facts that each state has two Senators, and that electoral districts respect state lines. In addition, as Stanford Law School Dean Larry Kramer has noted in more recent scholarship, the national political parties tie members of a state's congressional delegation to state politicians. Taken together, these and other mechanisms ensure that Congress will not simply federalize everything, leaving no area of regulatory discretion to the states.

Wechsler's point was mostly descriptive: Congress, he said, would in fact take account of state interests. But we might add a normative dimension: Congress should take its constitutional role seriously in matters of federalism, because judges are going to be highly deferential in such matters if and when federal statutes are constitutionality tested.

Accordingly, it would be perfectly appropriate for one or more members of Congress to vote against the individual mandate or health care reform more broadly on the ground that they think such matters should be left to state regulation or to private decision makers. But it would be equally appropriate for Congress to conclude otherwise and thereby join the ranks of the other industrialized countries—including those, like Canada and Germany, with robust commitments to federalism—that have comprehensive national health care systems. Properly understood, the constitutional case law is no obstacle.

DEBT LIMIT

Mr. BAUCUS. Mr. President, tomorrow morning, the Senate will have to vote on legislation to increase the statutory limit on the United States debt. The measure that will be before us will increase the limit by \$290 billion.

The debt limit sets a ceiling on the amount of money the U.S. Treasury can borrow. If we pass this bill, then the Treasury can continue to borrow money until about February 11 of next year. If we do not pass this bill, then at least two very bad things will happen:

First, the United States would default on the interest payments on this

debt for the first time in the history of this country. Second, the Federal Government would be unable to borrow the money it will need to pay Social Security benefits that beneficiaries are entitled to receive.

The bottom line is we have no choice. We have to approve it. The law limits how much money the Treasury can borrow. One might ask: How did we reach the current limit? The answer is simple and it is, frankly—I am trying to give a very fair answer, fair to both sides of the aisle and not be political about this but just be fair and explain how we got to where we are.

The financial crisis and the deep recession the new administration inherited has resulted in record borrowing this year. Let me be specific.

First, the Bush administration asked for and then used authority to spend unprecedented sums of money to help banks, auto companies, insurance firms, Fannie Mae, and Freddie Mac to weather the financial crisis. The prior administration enacted and used these authorities before the current administration even took office. That ran up a huge number, a huge addition to our deficits and debt.

Second, the new administration inherited the great recession. The recession has lowered revenues. To compensate for reduced revenues, the Treasury has had to borrow more.

In addition, the recession has increased the need for Federal spending on things such as unemployment insurance and Medicaid costs for folks who can no longer afford health care. To compensate for these increased outlays, Treasury has had to borrow more as well.

Finally, to keep the recession from becoming a lot worse than it has, the Obama administration had no choice but to enact a vigorous stimulus package, and the Treasury had to borrow the money to make up for this shortfall as well.

Without enactment of this stimulus, the economy could have well descended into a depression. We would have been in far worse economic shape had we not passed the stimulus legislation.

To cover the costs of all these measures—that is those in the Bush administration and those in the Obama administration—the Treasury Department has had to borrow record amounts of money. Unfortunate as it is, we had to do it. Had we not, we would be in much worse shape today.

As a result of this unprecedented borrowing, the Treasury is about to reach the current limit. It is clear that we have no choice but to raise the ceiling on the debt the Treasury can borrow.

We have spent the money. We have to raise the debt limit so bills can be paid. If we do not, the United States will default on its interest payments for the first time in its 220-year history. We cannot let that happen. We will not be

able to pay all the monthly Social Security benefits to which people are entitled. That would be unthinkable.

It is true we have to work harder to reduce these deficits—we have no choice—also, therefore, to reduce our national debt, certainly as a percent of gross domestic product. We have no choice. The point is we are beginning to reach a crisis in the accumulation of deficits and therefore debt. That is clear. We must as a country, as a Congress, working with the President, reduce those deficits in national debt. However, we have to pay our bills. If we do not pay our bills, we default. That would cause catastrophic consequences.

To prevent those catastrophic consequences—that is, other countries having less confidence in the government, less confidence in the ability of the United States to pay its debt, less confidence in the U.S. dollar—we must increase the Treasury's borrowing limit and, for a short period of time, I think it is appropriate and prudent.

I urge my colleagues to vote for this legislation. There is no way around it. It is a necessity. We simply have no choice. We have to pay our debts, but in the future, let's work harder to get our deficits under control.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, I am not a member of the Finance Committee and do not have the responsibility Senator BAUCUS does in dealing with these debt ceiling issues. But let me corroborate what he has been saying. Someone once drew the analogy that this is like going out to dinner, ordering a good meal, and then refusing to pay the bill at the end of it. We have a meal in front of us—tragically a meal that got too large because, frankly, the previous administration accumulated a debt without ever asking the American people to pay for it, including the war in Iraq and other items that left us in a hole larger than created by all administrations combined over 225 years of our history—a remarkable achievement. It is not just the deficit of one administration but all 43 Presidents combined had never accumulated what one administration did in 8 years.

I commend my colleague from Montana. This is no easy task. It is a painful vote for anyone to cast, but it is obviously critical. This is more than just a vote in this Chamber. It goes to the very stability of the global economy.

We have to meet our obligations. I, for one, am certainly glad to cast a vote. I do not think it is a difficult vote. It is a hard vote considering what is at stake. But the implications of refusing to support this would be catastrophic to our country.

I thank my colleague.

Mr. President, 10 minutes short of 12 hours from now, we are going to cast our final vote on the national health

care proposal. I have some closing remarks on this historic debate.

Before I do so, I wish to thank once again our staffs who have been involved in all of this. I know my dear friend and colleague from Iowa will talk about this more specifically. I have already announced the names of the majority staff who have made a contribution to this effort.

I think it is fairly clear that tomorrow morning at 7 a.m., when we cast our votes on this proposal, this is going to be a very divided Chamber. Sadly, we are going to end up on a very partisan vote. I suspect something along the lines of 60–40, although obviously we need less than 60 votes to pass the bill at this point. But I suspect the vote will be something like that. I regret that deeply. It saddens me we have come to that moment. But it is what it is.

While last evening I mentioned the members of the staff who are part of the majority staff who made such a contribution—and I thank them once again for their efforts—I want to also mention the minority staff who served their Members well and admirably in this effort, certainly during the markup of our bill in the Health, Education, Labor, and Pensions Committee that Senator Kennedy chaired for so many years, that I had the honor of taking over for him during his period of illness, and is now chaired by my friend from Iowa, Senator HARKIN.

The Senator from Wyoming, MIKE ENZI, is the ranking minority member of that committee. We ultimately had a divided, partisan vote in that committee. But as my colleagues have heard me say over and over again during these days and weeks of debate, a good part of our bill, even though it ended up with a partisan vote, included 161 amendments offered by the minority in that markup session. More than half of all the amendments considered were offered by the Republicans on that committee, on my committee at the time that were adopted almost unanimously in most cases.

I wish to mention the minority staff tonight who made that possible. They strengthened our bill and made it a stronger one. Beginning with Frank Macchiarola, Chuck Clapton, Katy Barr, Todd Spangler, Hayden Rhudy, Keith Flanagan, Amy Muhlberg. They work for Senator ENZI.

Liz Wroe and Jeff Gonzales work for JUDD GREGG of New Hampshire.

Jay Khosla, Patty DeLoatsche—I may have mispronounced that last name; I apologize if I did—along with Paul Williams of Senator HATCH's staff made a significant contribution to the bill.

While, again, there was division on a partisan basis, I thank them for their efforts. They put in long hours as well.

On that note, let me say before getting to the substance of my remarks, I

chair the Senate Banking, Housing, and Urban Affairs Committee. We have been working diligently. In fact, today my good friend and colleague from Alabama, RICHARD SHELBY, and I spent about an hour or so together and then about five or six members, Republicans and Democrats on that committee, spent another hour together, as we have every day almost over the last several weeks trying to fashion a bill on financial services reform that we hope to present to our colleagues on our return in January and February that will deal with the catastrophe that has occurred economically in our Nation.

My hope is as a Chamber—I know my colleagues have heard me say this—I arrived in this Chamber as an employee of the Senate about 50 years ago. I sat on these steps right over here. Lyndon Johnson sat in the Presiding Officer chair. John Kennedy was the President of the United States. I was a Senate page and listened to the all-night debates in the early 1960s on civil rights and got to witness history. I got to watch the Members of this Chamber, some of the historic figures—Hubert Humphrey, Lyndon Johnson, Everett Dirksen—remarkable people who served here. Barry Goldwater, of course. We served together in this Chamber for a period of time when I arrived in the Senate.

Thirty-five years ago on January 3 of next month, I arrived as a 30-year-old Member of the House of Representatives, and 6 years later I arrived here as a freshman Senator 30 years ago. Going back to the sixties, I had a lot to do with this Chamber and watched it over the years.

The best moments occur when we work together. This has been a bitter and difficult battle over the last number of months. But as someone who takes great pride in having been part of this Chamber, as my father was before me, for more than a quarter of the life of our country, I want to see us once again return to the days when we have our partisan debates, which we should because it has built the country.

Partisanship—there is nothing wrong with that. It is our ability to act civilly with each other. I have been deeply disturbed by some of the debate I have heard, usually from newer Members, usually those who have been here 1, 2, 3 years, who do not have an appreciation of what this Chamber means and how we work together.

While we have our differences, the ability to walk away from differences and forge those relationships over the next day is critically important. It is always the newest Members who fail to understand how the Senate has worked for more than two centuries. We need to get back to that sense of civility once again.

I hope when we return in January to deal with new issues that we will get

back to that comity that is important. Not the disagreements. The disagreements are important, but the ability to deal with each other and forge the kind of proposals that serve all of our constituents and serve all of our country is going to be critically important.

I wanted to share that thought with my colleagues this evening as someone who now at the ripe old age of 65 has spent well more than half of my life deeply involved in this institution. It saddens me when we end up being divided and engaged in the ad hominem arguments that I think ridicule the institution, belittle and demean the contributions that each and every Member wants to make.

Even though we have had very strong disagreements, I never once in my life in this Chamber ever questioned the patriotic intentions of any Member. We may have strong disagreements on how to best achieve that more perfect Union, but the idea you challenge another's patriotism, honesty, their integrity, does a great disservice to this institution, in my view.

Again, I regret sometimes the newer Members who fail to understand the importance of maintaining that which our Founders envisioned when they created this institution.

This evening I rise to express once and for all and lastly in this debate my strong support for this bill, our Patient Protection and Affordable Care Act of 2009. In a little over a week, this decade, the first decade of the 21st century will come to a close, and it has been a turbulent one for our country. We have been tested by the acts of God and the acts of evil men in this decade. We have entered two wars and have been through a profound recession, almost a depression. Our financial markets have failed. Middle-class families have lost their footing. The American dream is fading for far too many of our families in this Nation.

We wear these 10 years heavily. We have seen deep division in our country, bitter debates within the walls of this Chamber in which all of us are so proud to serve.

We do not have the luxury of tackling only those challenges that can be solved easily. But as Thomas Paine wrote:

The harder the conflict, the more glorious the triumph.

Those words come from a pamphlet called "The American Crisis." It was published 233 years ago this very week at another very uncertain moment in American history. That pamphlet begins with these words:

These are times that try men's souls; the summer soldier and the sunshine patriot will, in this crisis, shrink from the service of his country; but he that stands it now, deserves the love and thanks of man and woman.

GEN George Washington, outmanned, outgunned, and sensing that morale

was flagging in light of recent setbacks, ordered that this pamphlet and these words be read to his deeply troubled and impoverished troops. And on Christmas Eve, 1776, he gathered his officers at McKonkey's Ferry to plan the crossing of the Delaware.

This body has been in session on Christmas Eve only once since 1963—and we will tomorrow—when in the wake of President Kennedy's assassination, the Senate met to consider a bill to fund our operations in Vietnam. We will be in session tomorrow morning, embroiled again in times that certainly try men's souls. Like GEN George Washington, we have an opportunity to meet history's gaze, to steel ourselves to the difficult work of making our Union more perfect.

The journey we complete tomorrow has been a long and difficult one. But I, for one, would not trade it for anything. We who will have the privilege to cast our votes at 7 a.m. tomorrow morning for health care reform will never cast a more important vote in our Senate careers. History will judge harshly those who have chosen to shrink from this moment, but those of us who stand up to make this country more secure, to make our Union more perfect, we will never forget this Christmas Eve. For this Christmas Eve, we have given an incredible gift. We have been granted a rare opportunity to deliver an enormous victory for the American people for generations to come. We have a chance to alleviate tremendous burdens of anxiety and fear and suffering, to make our country stronger and healthier, to deliver the leadership our constituents have demanded—and rightfully so—and the real and meaningful change they voted for 13 months ago. So in the last week of a decade in which so much has been asked of the American people, that is what history now asks of us in this Chamber.

Over the past weeks and months, I have come to this floor to talk about what this bill will do for the citizens of my State and my country. I have talked about how reform will guarantee every American will have access to quality, affordable care when they need it, from the doctor they choose. I have talked about how reform will reduce our national deficit by finally getting health care costs under control. I have talked, as others have, about what reform will do for small businesses—giving them access to health insurance exchanges where they can find the best deals for their workers and a tax credit to help them pay for it. And I have talked, as others have, about how reform will help our older citizens, our seniors, by strengthening Medicare and closing the so-called doughnut hole for prescription drugs and creating a new, voluntary program to pay for long-term care. I, along with others, have talked about how reform

will help doctors and health care providers spend more time caring for their patients, which they want to do, and less time fighting with insurance company bureaucrats. I and so many others have talked about how reform will finally make insurance accessible and affordable for the 350,000 residents of my State and the 31 million people across our Nation who today don't have it, whether it is because they can't afford it or because they have been denied coverage due to a preexisting condition. I have also talked, along with my colleagues, about how reform will finally make insurance a buyer's market, ending a wide variety of abusive insurance industry practices and empowering consumers to make smart decisions.

As has been said so many times, this bill is far from perfect, and we all know that. It represents not the end but, as my friend and colleague from Iowa has said so many times, the beginning of our work. Long after all of us have left this Chamber, however we depart, those who come after us will work on our product. They will make it better, they will make it stronger, they will find our shortcomings in this bill, they will add to it, and they will subtract from it. But they can never engage in those efforts if we do not do the job I am confident we will do tomorrow morning at 7 a.m. on Christmas Eve, and that is to renew the American dream, revive our middle class, and rebuild the foundation upon which future generations will stand.

I am very proud of this legislation, with all its shortcomings. I am proud to have had a role in bringing it to a vote—an accidental role, as all of us know. I wouldn't be standing here talking about it in this context, other than as a Member of this Chamber, were it not for the tragic death of my great friend and colleague from Massachusetts.

President Teddy Roosevelt famously said:

It is not the critic who counts; not the man [or woman] who points out how the strong man stumbles, or whether the doer of deeds could have done them better. The credit belongs to the man who [or woman] is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly; who errs; who comes short again and again, because there is no effort without error and shortcoming; but who does actually strive to do the deeds; who knows great enthusiasms, the great devotions; who spends himself [or herself] in a worthy cause; who at the best knows in the end the triumph of high achievement, and who at the worst, if he [or she] fails, at least fails while daring greatly, so that his [or her] place shall never be with those cold and timid souls who neither know victory nor defeat.

So we happy few, the 60 of us who stand in the arena today, who have fought and argued and compromised and organized so that we might cast this historic vote at 7 a.m. on Christmas Eve, we would not trade this opportunity for anything.

This last year has proven that progress is not easy. Tomorrow, we will prove that it is not impossible. May the next decade in our country's history be shaped by that spirit—by the promise of a brighter tomorrow, by the unshakable desire to rise to the challenges that fate places in our path, by the quest to make our great Nation a more perfect one.

I yield the floor.

The PRESIDING OFFICER (Ms. CANTWELL). The Senator from Iowa is recognized.

Mr. HARKIN. Madam President, I ask unanimous consent that the remainder of the time used on the bill today be for debate only.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Madam President, first of all, before he leaves the floor, I want to thank my dear friend, my colleague, my classmate from 1975, for all his great leadership on this bill. We were all saddened by the fact that our leader, Senator Kennedy, could not be with us over the last year to guide and direct and to see the fulfillment of his lifetime dream of health care reform. It fell upon CHRIS DODD's shoulders to take it through. Madam President, he did it superbly. He kept our committee together.

Again, I just want to say that Senator DODD bent over backward, extended every consideration to the other side to amend and to be involved in the shaping of this bill. As my friend said, we adopted 161 of their amendments out of 220 or so they offered. Not all of them were accepted. Not all of the Democratic amendments were accepted, by the way, in the committee. So I thought Senator DODD went the extra mile to accommodate the other side. He did. I am just sorry that not one Republican saw fit to support the bill when it came out of the committee, but so be it. Because of Senator DODD's dedication and his leadership, we have a great bill here today.

I have been watching the debate, and most of the things people are talking about are items that were in the bill Senator DODD crafted, things that are going to make a big difference in people's lives. I will talk about a few of those in my formal remarks—things such as doing away with preexisting conditions; stopping rescissions, where they cut off your policy when you get sick; keeping kids on their parents' policies longer, and all of the things we fought so hard for regarding prevention and wellness. All of that is in our bill. It is in the bill Senator DODD brought forward out of our committee. So I am proud to have him not only as a friend but as our great leader on this health care bill. Tomorrow morning, when we finally pass it, it will be in no small part because of the great leadership of Senator DODD. So I wanted to thank him on the floor before he leaves to go

home to be with his two great kids and his wonderful wife.

Appreciate it very much, CHRIS.

Mr. DODD. I thank my colleague from Iowa, and we couldn't have done it without him as well. I appreciate it.

Mr. HARKIN. I thank the Senator very much.

Madam President, I also want to thank my good friend from Illinois, Senator BURRIS, for allowing me to go first here, in front of him.

You know, I was kind of feeling bad for myself because I didn't know if I was going to make Christmas Eve with my wife and family for the first time in 41 years. But I think, because of moving up the vote to 7 a.m., I might be able to do that.

But I just found out that today is Senator BURRIS's 48th wedding anniversary. Congratulations, Senator BURRIS. So he is here today and his lovely wife is out in Illinois, but he sent her flowers today. I am sure she appreciated that, but she would much rather be with Roland on this day. My goodness, 48 years—in this day and age, it is hard to find people married that long. So I congratulate Senator BURRIS, who is a great friend of mine personally and a valuable Member of the Senate. I think it shows what people are giving up here to make sure they are here to get health reform passed. Senator BURRIS gave up being with his spouse of 48 years. That is quite a sacrifice.

Thank you very much, Senator BURRIS.

Madam President, as we approach the final vote, again I wish to thank both Senator DODD and Senator BAUCUS for a masterful job of shepherding this legislation through the Finance and HELP Committees.

There is no way we would be here today without the great work of our majority leader. To put it in Biblical terms, Leader REID has the patience of Job, the wisdom of Solomon, and the stamina of Sampson. Senator REID is on the verge of achieving what majority leaders going back nearly a century have failed to accomplish. Make no mistake about it, when this final vote is cast tomorrow morning, Majority Leader REID will have earned his place in the Senate's history.

As we approach the final vote, we have reached a momentous crossroad, just as Senators did in 1935 when they passed the Social Security Act and in 1965 when they created Medicare. Each of those bills marked a giant step forward for the American people. Each was stridently opposed by defenders of the status quo. But in the end, a critical mass of Senators rose to the historic occasion. They voted their hopes, not their fears. As we know now, in retrospect, they passed laws that transformed America in profoundly positive ways.

The Senate has now arrived at another one of those rare historic crossroads. This time, we are going to pass

comprehensive health reform—a great goal that has eluded Congresses and Presidents going back to Theodore Roosevelt.

I make no bones about my enthusiasm for the reforms in this great bill. Is it perfect? Is it what I would write if I could dictate everything? No. There have been genuine compromises made, and that is the art of legislating.

There are a lot of things not in this bill for which I fought very hard, such as a public option or getting a Medicare buy-in at age 55. But I understand the art of compromise. Beyond that, this bill will be the biggest expansion of health coverage since the creation of Medicare.

It cracks down on abusive practices by health insurance companies, abuses that currently leave most Americans one serious illness away from bankruptcy. It includes an array of provisions, including wellness and prevention and public health. Our aim in this bill is to change our current sick care system to a true health care system that keeps people out of the hospital in the first place.

Madam President, I was struck by something that the distinguished minority leader, Senator MCCONNELL, said early Monday morning prior to the first critical cloture vote. Addressing Democratic Senators, the minority leader turned and faced us and said: It's not too late, it's not too late. All it takes is one, just one. Gesturing to this side of the aisle, he said: One can stop this bill; one can stop it, for every single one will own it.

He was talking about Democrats. I say to the minority leader, we Democrats are proud to own this bill. Just as we are proud of our ownership of Social Security and Medicare and the Elementary and Secondary Education Act and so many other reforms, progressive reforms, that have made America the great Nation we are today.

For the record, let me point out exactly what it is that Democrats will "own" by passing this bill. We will own the fact that this bill is fully paid for. Indeed, this bill will reduce the Federal debt by \$132 billion in the first decade and by at least \$650 billion in the second decade. We will own the fact that some 30 million additional Americans will in coming years have access to quality, affordable health care.

Let me mention just a few of the things in the bill that Democrats will own next year as soon as President Obama signs this into law. We will own the fact that next year insurance companies will be required to cover the preexisting conditions of children. We will own that. Think about that. There will be a program to extend coverage to uninsured Americans with preexisting conditions later.

We will own the fact that this bill provides immediate support to health coverage for early retirees. We will

own the fact that this bill will immediately shrink the size of the doughnut hole by raising the ceiling on the initial coverage period by \$500 next year.

We will own the immediate guarantee of this bill of 50 percent price discounts on brand-name drugs and biologics purchased by low- and middle-income Medicare beneficiaries who are in the doughnut hole. We will own the fact that this bill will provide tax credits to small businesses to make employees' coverage more affordable. Tax credits of up to 35 percent of the cost of premiums will be available to small businesses next year.

In addition, we will own the fact that this bill requires health insurance companies to allow children to stay on their family's policies until age 26. Democrats will own the fact that this bill prohibits health insurers from imposing lifetime limits on the benefits consumers believe they are paying for and will tightly restrict the use of any annual limits.

Let me mention one other extremely important thing that, in the minority leader's word, Democrats will own. Our bill, immediately, will stop insurers from the devastating practice of rescinding or cancelling health insurance coverage when a policyholder is seriously ill.

All of those things I mention will happen right away, Madam President, as soon as the bill is signed into law. Taken together, this is a breathtaking catalog of reforms that will benefit the American people immediately. So, we Democrats are very proud, I say to the minority leader, to own these reforms.

We had hoped that our Republican colleagues would also be proud to own them. But let's remember William F. Buckley's conservative model. He is sort of the father of the conservative movement in America. He said the role of conservatives is "to stand athwart history yelling 'stop'." That is exactly what our Republican colleagues have been doing by filibustering and trying to kill health care. They are "athwart history, yelling 'stop'." My friends on the Republican side will be on the wrong side of history, the wrong side of reform, and the wrong side of progress.

I have been saying this bill, the Patient Protection and Affordable Care Act, is like a starter home. It is not the mansion of our dreams. It doesn't have every bell and whistle we would all like, but it has a solid foundation giving every American access to quality, affordable coverage. It has an excellent protective roof which will shelter Americans from the worst abuses of the health insurance companies, and this starter home has plenty of room for additions and improvements.

We Democratic Senators are proud to own this starter home. We are proud of the fact that this starter home is fully paid for. It is a starter home without a mortgage.

Indeed, as I said earlier, this bill will reduce the Federal deficit by \$132 billion in the first decade and by at least \$650 billion in the second decade. So, Madam President, even at this late date before the vote tomorrow morning, I say to our Republican colleagues, Democrats are proud to own this legislation and this starter home. We are proud to own the many reforms and benefits in this bill and we would be very pleased to share ownership with as many of our Republican colleagues who care to join us.

With all due respect to William F. Buckley, it is not written in stone that conservatives have to say no to history. I urge every Senator to say yes.

This bill has many authors. But in a very real sense this is Senator Ted Kennedy's bill. Our late beloved colleague would be so proud to see the Senate on the cusp of passing landmark health care reform. For decades, from his first days in the Senate, this was his highest priority and fondest win. As his friends on both sides of the aisle know, his great dream was of an America where quality affordable care is a right not a privilege for every citizen.

Today, we are on the verge of making that dream a reality. So often Senator Kennedy talked about the moral imperative of health reform. Too often in the debates of recent weeks we have lost sense of this moral imperative. We have heard speeches. We have had charts, back and forth and back and forth on some of the small stuff; who wins, who loses, because of this or that minor provision in the bill.

Today, on the eve of this historic vote, we should refocus on the big stuff, the moral imperative that drove Senator Kennedy. With this bill we will get rid of the shameful dividing line that has excluded millions of Americans for too long. For too long, tens of millions of Americans have been on the wrong side of that divide, without health insurance, without regular medical care for their children, just one serious illness away from bankruptcy. With this landmark legislation we erase that shameful divide within our American family. With this bill we say for every American, for every member of our American family, access to quality affordable care will be a right, not a privilege. It is a monumental achievement.

I urge all of our colleagues to vote yes on this bill.

Now, Madam President, a lot has been said about those of us who have been the leadership on this bill: Senator REID, Senator BAUCUS, Senator DODD, myself, and so many others. It is important to etch in history in our CONGRESSIONAL RECORD the names of those individuals on our staffs, who have done so much to get us to this point. I said earlier there is an old saying that Senators are a constitutional

impediment to the smooth functioning of staff. We kind of laugh at that, but we know there is great truth to that. Were it not for the staff who spent so many hours and so much time away from their families that we would not be here.

I was talking with Senator REID's office. Kate Leone did a magnificent job. Carolyn Gluck, Jacqueline Lampert, Bruce King, David Krone, Rodell Molineaux, and Randy DeValk.

Senator DODD's staff: Jim Fenton, Tamar Magarik Haro, Monica Feit, Brian DeAngelis.

Senator BAUCUS's staff: Liz Fowler, Bill Dauster, Russ Sullivan, John Sullivan, Scott Mulhauser, Kelly Whitener, Cathy Koch, Yvette Fontenot, David Schwartz, Neleen Eisinger, Chris Dawe.

On our HELP committee: Michael Myers, our great staff director, who for more than a decade has led this staff and for almost 20 years has worked for Senator Kennedy. We are all sorry that Senator Kennedy could not be here for this. I can say honestly that Mike Myers carries on the torch as his staff director. He did a magnificent job of getting us through this. And David Bowen—David Bowen, if there is one person who knows more about what is in this bill than anyone else, it is David Bowen. I have never asked him about anything in this bill that he didn't know where it was and what it does. He has been at every meeting, I don't care how early in the morning, how late at night. I know he has been apart from his family and his children. I wish David the best in terms of being with his family tomorrow and over Christmas. David Bowen has done such a magnificent job of guiding and directing this bill and making sure it was all put together.

Connie Garner, who worked so hard, so hard; Portia Wu, John McDonough, Topher Spiro, Stacey Sachs, Tom Kraus, Terri Roney, Craig Martinez, Taryn Morrissey, Andrea Harris, Sara Selgrade, Dan Stevens, Caroline Fichtenberg, Lory Yudin, Evan Griffis.

Now I want to mention one other person who has been on my staff but now is on the HELP Committee staff, Jenelle Krishnamoorthy. I have for many years been advocating that we have to change our focus in America from a sick care society to a health care society. I mentioned that earlier. This bill contains more for wellness and prevention and public health than any bill ever passed by Congress—ever passed—and it is not talked about much, you don't hear too much debate about it. But it is significant that we are going to change this paradigm. We are going to start putting more up front, keeping people healthy in the first place.

One person who has done more than anyone else to make this happen is Jenelle Krishnamoorthy. I want to

thank her for just focusing laser-like the last couple of years or so on this and making sure it became a big part of our health care reform bill.

On my personal staff, Jim Whitmire, Beth Stein, Jenny Wing, Rosemary Gutierrez, and Lee Perselay. Let me mention Lee. Lee does all my work on disability issues. As many people know, it is my name on the Americans With Disabilities Act. Nineteen years ago we passed that. Lee Perselay does all my work on the disability issue.

There is another part of the bill not too many talk about, but it is so profoundly important to people with disabilities. In this bill there is a provision that will have the Federal Government give a 6 percent increase in the amount of money that the Federal Government gives to a State for Medicaid, 6 percent increase for a State that will enact legislation to put in place the provisions of the Olmstead decision by the Supreme Court over 10 years ago; that is, that every person with a disability has a right to a least restrictive environment. That means living in their own communities and their own homes with personal assistant services, support so they can live at home rather than going to a nursing home.

This has been a dream of the disability community since we passed the Americans With Disability Act in 1990. We have never been able to get it done. Now we have it in this bill. It is not talked about much, didn't hear much about it. But this will have more of a profound effect on people with disabilities than any other single thing in this bill or anything that we have done, literally, since 1990. Now people with disabilities can live at home and live in their own communities and the State will get money from the Federal Government to enable them to do that. Lee Perselay.

Lee Perselay; thank you very much, Lee.

Kate Cyrul of my staff, Dan Goldberg, and the Senate legislative counsel. A special thanks to Bill Baird, along with Stacy Kern-Scheerer and Ruth Ernst, who was present throughout the entire HELP Committee, and they have gone above and beyond.

To all the floor staff here, too, we forget about all they have done—Mike Spahn and Anne Wall and Stacy Rich and Tim Mitchell and Tricia Engle and Lula Davis, wonderful floor staff working with us to get us to this point, where we have a final vote on this tomorrow morning.

I wished to particularly mention these individuals. In many ways, they are the unsung heroes and heroines of what we have done. They can be content in knowing, as they go through life, they did a big thing here. They did something so important to help transform our society. I, personally, thank each and every one of them and wish

them the best of the holiday season, Christmas, New Year. We will come back next year, and we will start implementing this bill. As the chairman of the HELP Committee, we will start looking at building those additions and those expansions.

I yield the floor and thank my friend from Illinois for letting me go.

The PRESIDING OFFICER (Mr. BEGICH). The Senator from Illinois is recognized.

Mr. BURRIS. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator has 6 minutes.

Mr. BURRIS. Mr. President, the Senate has long been a forum for great debate.

This institution is equipped to handle the most difficult questions our Nation faces.

Since we took up the issue of health care reform, the debate has been fierce, and our differences of opinion have played out in dramatic fashion on the national stage.

Over the last several months, I have said time and again that this health reform bill must accomplish the three distinct goals of a public option in order to win my support:

It must create real competition in the health care system.

It must provide significant cost savings to the American people.

And it must restore accountability to the insurance industry.

For months I have told my colleagues that I would not be able to support a final bill that fails to meet these three goals.

I believe they are the keys to comprehensive health reform in America, and without them, our legislation would be ineffective and incomplete.

I expressed my concerns about the compromise bill, and I asked tough questions.

I have reviewed the CBO score and the final legislative language as soon as it became available.

I believe the way forward is clear.

This bill is not perfect. It does not include everything I had hoped for.

But I am convinced that it can meet the three goals of a public option.

I believe it represents a monumental step forward—a strong foundation we can improve upon in the months and years to come.

This is not the end of health care reform in America—it is the beginning.

That is why we need to take the next step in this process. Although this is not the bill I had hoped I might be voting on, I am confident enough to pass this legislation on to the next step.

Let us send the Patient Protection and Affordable Care Act to a conference committee, where it will be merged with the House bill.

There, I have every hope that the conferees will have the opportunity to strengthen some of these provisions and make this legislation better.

We must not let the perfect stand in the way of the good. While it is not everything I had hoped it would be, it is far more than we have now.

And while this bill will not satisfy many of us, it would be a mistake to overlook all the good it will do for tens of millions of Americans.

So let me explain exactly why I am convinced that this bill will satisfy the three goals of a public option:

According to the nonpartisan Congressional Budget Office, the exchanges that will be created under this legislation will dramatically enhance competition in the insurance market.

This will drive premiums down, allowing consumers to shop around for the plan that is best for them, their family, or their small business.

CBO projections show that this would force providers to compete for the first time in many years, reducing costs and bringing everyone's premiums under control.

As a result, many more people would be able to get better coverage for less money.

This bill will enhance the choices that are available for individuals and small businesses.

Everyone will have the choice to keep their current insurance coverage if they are happy with it, but if they are not, they will have real options for the first time in many years.

This bill will give consumers the tools they need to hold insurance companies accountable.

It includes strong consumer protections—many of which take effect immediately—and it contains significant insurance reforms designed to put ordinary folks back in the driver's seat.

This bill will eliminate annual and lifetime caps on coverage, prohibit companies from dropping patients who get sick, and prevent discrimination against people who have preexisting conditions.

It will also require insurance providers to cover essential health benefits and recommended preventive care, so more people can get the treatment they need.

Based on these provisions, it is quite clear that this measure will provide immediate and lasting improvements in the health care system for everyone in this country.

It will extend quality coverage to 31 million Americans who are currently uninsured, and increase access to preventive care.

This will reduce emergency room visits, allow more people to treat preventable and chronic diseases, and help to bring health care costs under control.

In fact, the Congressional Budget Office projects that this legislation will cut the deficit by more than \$130 billion in just the first decade, and will save nearly \$1 trillion over the next several decades.

That is why I am confident that this bill will meet the three goals of a pub-

lic option: competition, cost savings, and accountability.

It may not be the legislation I would have written at the beginning of this process, but after nearly a century of debate about health care reform, under the leadership of 11 Presidents and countless Members of Congress, this legislation represents a strong consensus.

So it is time to take the next step in this process—to send this bill to conference and keep building upon this foundation.

This is not a perfect bill, but it contains a number of fundamentally good components.

Most importantly, it will ensure that 94 percent of Americans can get the health coverage they need.

After decades of inaction, the Patient Protection and Affordable Care Act is a monumental step in the right direction.

There were many competing ideas that gave rise to this bill.

There were many voices, inside this Chamber and outside of it, shouting to be heard on these issues.

There were concessions and compromises.

But, out of a century of dissent—out of decades of discussion and debate—we have arrived at a basis for comprehensive reform.

It is time to put aside our differences and move forward as one Congress, and one Nation.

There is much work left to do on this and a host of other issues. But in the messy process of debate and compromise, along the path that has led us to this point, this body has reaffirmed the enduring truth of the motto inscribed in this Chamber, just above the Vice President's chair: "E pluribus unum." It is there, Madam President, right over your head. It means "Out of many, one."

For our entire history, it has been the creed that binds us to one another and to our common identity as Americans. It is the principle that drives us to assemble in this august Chamber to debate the toughest issues we will ever face.

Although we come from every section of this country, from many States, we are one country, and together, we can create a health care system that will be worthy of the people we represent.

It is time to make good on the promise of the last century and move forward with the Patient Protection and Affordable Care Act.

Let's take the next step, and send this bill to conference.

I yield the floor.

MEDICARE GEOGRAPHIC INEQUITIES IN REIMBURSEMENT

Mr. HARKIN. Mr. President, I am pleased to support the legislation pending before the Senate today, which will ensure that 31 million Americans will finally have access to affordable, qual-

ity health coverage, which will crack down on outrageous abuses by the insurance industry, and which will, at long last, put prevention and wellness at the heart of our health care system. I rise today, however, to signal that there is an area of this legislation that remains of concern and that I will be working to fix as we head to conference; namely, provisions to rectify the geographic inequities in the low Medicare reimbursement rates.

Across the country, Americans pay equal premiums to support Medicare. Yet there is a substantial geographic disparity in physician reimbursement levels in the Medicare Part B Program. The degree of this disparity is unjustified and inherently unfair—and it is having an increasingly negative impact on the number of providers that are accepting Medicare and magnifying the workforce shortage problem—especially in rural areas. The unfairness in this disparity in reimbursement rates is compounded by the fact that the States with the lowest reimbursement rates are often those that deliver the highest quality of care. The system must change and reward the quality of service delivered instead of the volume of care served.

I see that my colleague from Oregon, Senator MERKLEY, is here on the floor. He and I have often discussed this issue, as his State is also one that provides outstanding care and yet suffers from unduly low reimbursement rates. I wonder if my distinguished colleague shares my view that this is something we must continue to work on before this bill is finalized?

Mr. MERKLEY. I thank my distinguished colleague for raising this issue, which has also been a concern of mine. I agree with him that my State consistently lags behind other States on Medicare reimbursement and per capita spending. I strongly believe that a fundamental way to achieve the goal of more efficiency in Medicare is to realign the Medicare payment system to reward health care providers for the quality of care they deliver, not simply the quantity of services they provide. Medicare is spending over one-third more for each Medicare beneficiary in some States compared to Oregon, to Iowa, or to the home State of my good friends from Minnesota, Senators KLOBUCHAR and FRANKEN, who are also here on the floor with us today.

The simple fact is, this antiquated payment formula penalizes rural providers and penalizes medical efficiency, and I know in Oregon it has forced many physicians to stop accepting Medicare patients or limit the number of Medicare patients they serve, and that is why I feel so strongly that we must fix it once and for all in the final health reform bill. I wonder if the Senators from Minnesota have had a similar experience in their state.

Ms. KLOBUCHAR. I want to thank you, Senator MERKLEY and Senator

HARKIN, for your work on this issue. I have observed the same problems with Medicare reimbursement in my home State. We represent States and regions that have demonstrated true leadership in lowering costs to Medicare while increasing the quality of care patients receive. The high-efficiency areas we represent are known for utilizing integrated health delivery systems and innovative quality measures to provide Medicare beneficiaries with better value. Research shows that these efficient delivery practices can save the Medicare Program upwards of \$100 billion a year while also providing beneficiaries better access to the care they need. Unfortunately, the current Medicare payment structure penalizes those who provide efficient care while rewarding those who order unnecessary tests and services. It is critical that this is addressed in conference, and it will be a priority as we move forward through this process.

Mr. FRANKEN. Thank you, Senator HARKIN, for your leadership, and also thanks to my other colleagues for working on this issue. I agree with all that has been said, and I would like to reiterate that our States have some of the best health care in the country. And it just doesn't make sense that under the current Medicare reimbursement system, the good care in our States gets punished and the less effective, more expensive care gets rewarded. The result is that we are not providing health care in this country; we are providing sick care. We need incentives for providers for high-value care, and the best way to do this is through Medicare payment reform.

These geographic disparities in Medicare payments are unfair, and they are not good for patient care. We are forcing excellent providers out of business because reimbursement rates are low and they just can't make ends meet. This is counterproductive to the goal that I know we all share—to increase access to high-quality health care for all Americans. It is a top priority for me that in conference we make some changes so high quality care that is provided at a reasonable cost will no longer be punished. Instead, we need to make sure that the bill rewards providers for being effective partners in their patients' care. I appreciate the opportunity to share these concerns and discuss these issues with my colleagues.

Mr. HARKIN. I couldn't agree with my colleagues more. It is long past time to take action to fix this system. I appreciate the commitment of the Senator from Oregon and the Senators from Minnesota to fixing this problem once and for all.

DEFINITION OF FULL TIME WORK

Mrs. MURRAY. Mr. President, I would like to engage my friends, the Senator from Iowa and Chairman of the Health, Education, Labor and Pen-

sions Committee, and the Senator from Montana and Chairman of the Finance Committee, in a conversation about how "full time" is defined in the Patient Protection and Affordable Care Act and clarify any misunderstandings about how the legislation resolves the potential for exclusion of certain work group such as flight crews and rail workers due to the definition of "full time" work and the unique way their work hours are calculated.

Is it the Senators' understanding that the Patient Protection and Affordable Care Act resolves a potential problem of excluding from employer incentives to provide coverage for employees who work in professions that use unique calculations for hours worked, such as flight crews and rail workers? And that it does this by indicating that the Secretary of HHS, in consultation with the Secretary of Labor, shall prescribe such regulations, rules, and guidance as may be necessary to determine the hours of service of an employee, including rules for employees who are not compensated on an hourly basis?

Mr. HARKIN. Yes, the Senator is correct. The Patient Protection and Affordable Care Act is designed to expand access to high quality and affordable health coverage for all workers. Because of the nature of work, some industries uniquely calculate total daily and monthly working time to determine full-time schedules. That is why this legislation gives the Secretaries of Health and Human Services and Labor discretion to establish rules and regulations for the hours of service for workers outside of standard hours. This provision is meant to be construed broadly.

Mr. BAUCUS. I would concur with my friend, the Senator of Iowa, in his understanding of the act. This provision is meant to be construed broadly, and to expand access to high quality and affordable health coverage for all workers.

Mrs. MURRAY. Of particular concern to me are groups such as pilots and flight attendants, cabin crews who, under "full time" contracts, "work" on average only 70 hours per month due to the unique way their hours are calculated. For obvious safety reasons, a pilot is limited, through Federal regulations, to flying 100 hours per month, or 1,200 hours annually, even though he or she contributes many more hours of service outside of the time spent flying planes. This unusual work schedule, however, raises the potential that a pilot might not be considered a full-time employee for purposes of this legislation under a rule that defined full time status as simply "working" upwards of 30 or 40 hours per week. The same is true of other flight-crew employees.

Additionally, railroad hours-of-service employees, who work by the mile or

by the day, could also find it difficult to meet the definition of full-time employee under a strict "hours worked" standard. Many train and engine service railroad employees are paid by the mile and or by the day or paid for time available to work, and are not paid by the hour. Although these workers are undoubtedly full-time employees within their profession, the annual or weekly hours they are calculated to work might not satisfy a narrow minimum hour component that did not take into account a more flexible hours of service concept for certain types of jobs.

Currently all flight and cabin crew members employed by Part 121 commercial air carriers and train and engine service railroad employees paid by the mile or by the day are full-time employees and receive the same benefits afforded other full-time workers. Is it the Senators' understanding that this bill is intended to allow these working groups to be encompassed in the definition of "full-time employee" for purposes of the employer incentives to provide quality health care coverage?

Mr. HARKIN. Yes, that is my understanding, that the Secretaries of Health and Human Services and Labor will establish standards to govern workers in these industries so they are fully entitled to the protections under this bill. It is not the intent of Congress to exclude or prevent workers with unique work schedules from the benefits under the Patient Protection and Affordable Care Act or from incentives for employers to provide these workers with quality healthcare coverage.

Mr. BAUCUS. Again, I am pleased to concur with the Senator from Iowa in his understanding. The Secretaries of Health and Human Services and Labor will establish standards to govern workers in these industries so they are fully entitled to the protections under this bill.

Mrs. MURRAY. Mr. President, I would like to thank the Senators from Iowa and Montana for their time and clarification on this issue.

Mr. DURBIN. The Patient Protection and Affordable Care Act offers community health workers some overdue recognition, and more importantly, authorizes grants to help support and expand their work.

Community health workers are from the communities they serve. From rural small towns to the urban inner city, community health workers reach out to underserved communities in ways that the current health care system cannot, providing culturally and linguistically appropriate health information in a more familiar and welcoming manner. Their work helps to bridge the healthcare gap and diminish disparities.

Nowhere is this more evident than in the community-based doula program.

Community-based doulas support pregnant women during the months of pregnancy, birth, and the immediate postpartum period. They provide parent education, logistical and emotional support. They help new mothers make better lifestyle choices and deliver healthier babies. What makes these programs work is the culturally sensitive mentoring within the community.

In Chicago, the community-doula model has made a big difference in the lives of these young moms and their babies. The Chicago Health Connection came up with this model. They trained mentors from the community to work with at-risk moms, many of whom didn't know where else to turn. These mentors spend time in the neighborhood, finding and befriending pregnant women who need help.

With the guidance of the doula, the Chicago Health Connection found that more young mothers were going to their prenatal care appointments, making better lifestyle choices, and—not surprisingly—delivering healthier babies. The doulas stay with the moms through the early months, encouraging breastfeeding, cuddling, and interactive play.

Bina Holland is a community-based doula at the Easter Seals Children's Development Center in Rockford, IL. Bina has had a powerful impact on one of her clients—a 14 year old girl who was 5 months pregnant and severely underweight. Bina taught her about healthy nutrition habits to strengthen her body to carry a baby. Bina also encouraged the young woman to visit her doctor regularly and to openly talk with the doctor about the health status of the baby.

The girl delivered her baby early at 2.5 lbs, and Bina was there to explain the health benefits of breastfeeding. The young mom agreed to nurse her child, and each week the mother monitored the baby's growth. The child was nursed to health, and the mother successfully graduated from the doula program. Thanks to Bina.

Community-based doulas are a powerful resource for maternal and child health, and the model is effective. In communities that have employed it, outcomes include better prenatal care, higher birth weight, higher breastfeeding rates, better parenting skills, fewer preterm births and c-section deliveries, and delays in subsequent pregnancy for teenages.

With Chicago Health Connection's success, they took on the challenge of working with other communities to build their own community-based doula program. Today, they have transformed into Health Connect One, a training organization for communities nationwide interested in starting their own community based doula programs. The need is everywhere, and these women are working hard to make

these important services available everywhere for all moms.

I am encouraged by the language in Section 5313 of the Patient Protection and Affordable Care Act, Grants to Promote the Community Health Workforce and want to ensure that the definition of community health worker includes community-based doulas. The Federal Government currently funds community-based doula programs through the Maternal and Child Health Bureau's Special Projects of Regional and National Significance. Expanding the definition of community health workers in the reform bill will give these evidence-based programs greater support to meet the needs of families in underserved communities.

Community-based doula programs are a proven example of the health outcomes that education, prevention and health literacy can bring. With grants to promote the community health workforce, doulas will continue to promote positive health behaviors in pregnant women and improve the lives of families nationwide.

Mr. FEINGOLD. Mr. President, I will vote for the comprehensive health reform bill being considered in the U.S. Senate, but I will also work to improve its flaws. There is much that is good about this legislation. It will, over the course of 10 years, help ensure that nearly every American has access to good and affordable health insurance. It will put Medicaid and Medicare spending on a more sustainable and stable path. It will increase access to home and community-based long term care services, increase our medical workforce, and end some of the worst abuses by the private insurance. But there are serious deficiencies—like the failure to establish a public health insurance option—that we know of, and there will be undoubtedly be some gaps in the bill that we will discover during implementation. The commitment that is made with this legislation is ongoing, and will require diligent oversight and improvements in the years to come.

I am pleased that many of the priorities I laid out at the start of this process have been addressed in this bill. The bill includes provisions I fought for that help make sure Wisconsin is treated fairly. Those provisions include fixes to a flawed Medicare formula that denies our state fair reimbursement, financial incentives for the kind of low-cost, high-value care practiced in Wisconsin, and hundreds of millions of dollars in additional Medicaid assistance for Wisconsin to account for the State's leadership in expanding coverage to its citizens. But I also recognize that this bill does not do as much as I would like to reform our current health care system, and I will work to try to make sure the final version fixes these flaws.

I receive countless letters and emails and phone calls from my constituents

on health care reform. Some of the most heartbreaking letters I receive are from people who are sick or caring for a sick loved one and do not have health insurance. Some of these people are recently laid off due to the recession, and have lost their health insurance. Some people had health insurance, but were dropped from their coverage because they became sick and actually needed health care. And some people were denied health insurance altogether, either because it was priced out of their reach, or because they had a preexisting condition. In far too many cases, these people have been forced to declare bankruptcy because of their medical bills. Two thirds of all personal bankruptcy cases in the United States are due to medical debt, and over 80 percent of those individuals had health insurance. And in the most egregious cases, sick children in Wisconsin and around the country have reached lifetime limits on care that are set by an insurance bureaucrat, and are denied coverage for further medical treatment.

Because of this bill, lifetime and annual limits on coverage will be prohibited. Premiums cannot increase due to medical needs or illness. Insurers cannot charge women more than men for the same insurance policy. Restricting or denying coverage based on preexisting conditions is prohibited for all Americans, beginning with children effective 6 months after final passage of this bill. A recent study found that 36 percent of currently uninsured adults were unable to get health insurance because of a preexisting condition. Preexisting conditions can be anything from serious, chronic diseases like diabetes or cancer to medical episodes like acne or even pregnancy. In nine States, being a victim of domestic violence can be a preexisting condition. This bill will end these consumer abuses.

People will be guaranteed the ability to renew their health insurance year after year. If a claim is denied, policy holders have a guaranteed right to appeal. And group insurers are required to spend at least 85 percent of every premium dollar on actual health care; if they are found to be spending less, they are required to refund the difference to the customer. This policy, along with others, will require an unprecedented level of transparency in the sale of health insurance policies.

One of the strongest points of this bill for me, and perhaps one of the most underappreciated, is the commitment made to realign Medicare spending to reward our doctors and hospitals for the quality of care they provide to their patients, rather than the quantity of care. Moving to a value-based system is one of the single most effective ways to reduce health care spending and improve the quality of care. Wisconsin is a national leader in value-

based delivery of health care. If every health care provider operated like those in Wisconsin, over \$100 billion a year in taxpayer dollars could be saved. Just last year, the Congressional Budget Office estimated that nearly 30 percent of Medicare spending could be avoided by integrating and coordinating care, in the manner of high-value providers.

As a result of this bill, Medicare reimbursement for certain health care providers will be based, in part, on the quality of care they deliver to their patients. Health providers will now have the opportunity to voluntarily join together as Accountable Care Organizations to coordinate the care they deliver to their patients, and to share in the savings they generate for Medicare. They will be given numerous opportunities and incentives to change the way they deliver health care, and will, for the first time, be penalized for delivering low-quality care. For example, if a hospital demonstrates high rates of readmissions or hospital acquired infections, they will receive less reimbursement from Medicare. Not only will patients receive smarter care from their physicians, these policies will help ensure that taxpayer dollars are going to pay for the value of care Medicare patients receive, as opposed to the volume of care.

In addition to these positive changes to the way Medicare pays for health care, there is language to finally address the historic inequity in Medicare reimbursement that Wisconsin and other rural States have faced. Thanks to the leadership of Senator CHUCK GRASSLEY in the Senate Finance Committee, this bill includes language that will increase Medicare reimbursement for Wisconsin physicians and directs the Secretary of Health and Human Services to analyze and adjust the current formula to ensure more accurate payments for rural providers in the future. Fixing the flawed Medicare formula so that Wisconsin receives its fair share of Medicare reimbursements has long been a priority of mine.

I am pleased that this bill more fairly reimburses Wisconsin for the leadership my state has demonstrated in extending coverage to low-income residents through BadgerCare, our State Medicaid program. I was concerned that the Senate Finance Committee bill would have denied Wisconsin much-deserved Medicaid dollars, and I worked hard to try to ensure the bill before the Senate fixed this problem. As a result, relative to the bill that the Senate Finance Committee reported, this bill will bring hundreds of millions more in Medicaid assistance back to Wisconsin. I appreciate the willingness of my fellow Wisconsin Senator, HERB KOHL, the Chairman of the Finance Committee, Senator MAX BAUCUS, and Senator REID in working with me to ensure that Wisconsin's investment is acknowledged in this legislation.

I am also pleased by the attention to long-term care reform in this bill. Modern medicine has turned fatal diseases into chronic diseases, and enabled individuals to live much longer. These are tremendous accomplishments. But the reality is that these individuals need even more assistance because of medical advancements—from their families, communities, and government.

Long-term care reform is inextricably linked to overall health reform, and one cannot truly succeed without the other. While this bill does not include a comprehensive strategy to reform our long-term care system as I had hoped, it does include a number of critical building blocks to assist reform efforts in the future. One of these critical pieces is the Community Living Assistance Services and Supports Act, or CLASS Act. The CLASS Act would create an optional insurance program to help pay for home care and other assistance for adults who become disabled. Those choosing to participate would pay monthly premiums into an insurance trust, and after 5 years, could access a cash benefit if they become disabled and need assistance.

Another critical component of this bill is the attention paid to expanding home and community-based care options. Again, Wisconsin has been a national leader in increasing access to home and community-based care, beginning with the Community Options Program almost 30 years ago. As a State Senator, I worked to help expand Wisconsin's Community Options Program, known as COP, which provided flexible, consumer-oriented and consumer-directed long-term care services in community-based settings, enabling thousands of people needing long-term care to remain in their own homes rather than going to a nursing home. Over time, the COP program turned into Wisconsin's FamilyCare program, which is our newest State entitlement program for low-income and disabled adults to receive necessary care, supports, and services in their homes and communities.

The progressive vision that is the driving force behind Family Care is also the driving force behind the long-term care provisions in this bill. This bill will establish the Community First Choice Option, which gives States the option to create a new Medicaid benefit through which States could offer community-based attendant services and supports to Medicaid beneficiaries with disabilities who would otherwise require the level of care offered in a hospital, nursing facility, or intermediate care facility.

This bill also removes barriers to expanding home and community-based services; protects recipients of home and community-based services from spousal impoverishment; and increases appropriations by \$40 million to help fund Aging and Disability Resource Centers.

And finally, as a result of Senator REID's amendment, the bill provides new financial incentives for States to shift Medicaid beneficiaries out of nursing homes and into home and community-based services.

Over 10 million Americans are currently in need of long-term care, and that number is expected to rise to 15 million in the next 10 years. These individuals struggle to remain independent with limited assistance. Policies like those included in this bill, which increase options for home and community-based care so that nursing homes are not the only choice, are smart changes that will benefit consumers of long-term care and save taxpayers money.

One of my most important priorities for the bill was that it be fiscally responsible. Based on the most current projections, the Congressional Budget Office expects this legislation to reduce the deficit by \$132 billion by 2019 and roughly \$1 trillion by 2029. While the bill does not go as far as I would like to rein in health care spending, the \$871 billion price tag on the bill is fully offset and will not add a penny to the deficit.

Deficit reduction is achieved through a number of policies, three of which are included in legislation I introduced to bring down the deficit, the Control Spending Now Act. These policies, which make prescription drugs more affordable and require wealthy individuals to pay their fair share of Medicare premiums, generate \$24.6 billion in savings.

For all the positive aspects of this bill, I am deeply disappointed by the lack of a public option. I have been fighting all year for a strong public option to compete with the insurance industry and bring health care costs down. I continued that fight during recent negotiations, and I refused to sign onto a deal to drop the public option from the Senate bill.

Removing the public option from the Senate bill is the wrong move. I am concerned that without a public option, there will be no true competition for the insurance industry. We have included mechanisms to protect against egregious year-to-year increases in private insurance premiums from this point on, but we have no mechanism to force insurance companies to decrease premiums as they are set today. A strong public health insurance option would provide a powerful incentive for less responsible insurers to re-evaluate their own cost-sharing and benefit plans to ensure they are an attractive option for consumers.

The public option would give consumers a strong voice in the marketplace. If the private market was not meeting their needs, they would have an alternative. Competition is how we can reduce our health care costs, but there is no real competition in the private market. Private insurers compete

to generate the most profit, and the best return on investment for their shareholders. There is at most a secondary motivation to compete to give the best value to consumers. A public option serves as an outside factor to force private insurers to consider more than just shareholder interests.

The Congressional Budget Office estimated that the public option in the bill that was brought to the floor could save up to \$25 billion. The CBO's analysis of Senator REID's amendment, which strikes the public option and replaces it with multi-state plans, says the following about the new policy:

Whether insurers would be interested in offering such plans is unclear, and establishing a nationwide plan comprising only of non-profit insurers might be particularly difficult. Even if such plans were arranged, the insurers offering them would probably have participated in the insurance exchanges anyway, so the inclusion of this provision did not have a significant effect on the estimates of federal costs or enrollment in the exchanges.

Removing the public option gives up a huge opportunity to reduce costs for American families and the government, and I will work to try to ensure the final bill fixes this serious mistake.

I also am concerned about the excise tax on high cost health plans. Under this bill, health insurers will be taxed on the value of any health care plan sold that is valued above \$8,500 for an individual and \$23,000 for a family. Improvements have been made to this policy during Senate consideration, and the thresholds for the tax, along with exemptions for high-risk professions, have been expanded. But I have heard from so many in my State who have traded wage increases for solid health insurance benefits in the past years. I have heard from teachers and laborers and union members who are worried they may lose the health benefits they have fought for, and can't reclaim the wages they have already lost. While this policy is often referred to as the "Cadillac" health care tax, they will be the first to tell you that they hardly live the Cadillac lifestyle. I urge my colleagues in the Senate and the House to consider the real-life impact that this policy could have on working Americans and their families.

I am concerned about the cuts to home health and hospice providers under this bill. Home health and hospice providers offer a truly valuable service to our communities. But under this bill, their reimbursements will be drastically cut and I am concerned that access will decrease as a result. Improvements have been made under Senator REID's amendment, but we must do better for home health and hospice providers.

I am disappointed that the bill does not permit the safe importation of prescription drugs, which would reduce health care spending for consumers and the Federal Government. I will keep

fighting to enact this common-sense reform.

Lastly, I oppose the sweetheart deals that some Senators and interest groups apparently cut. These deals weaken the bill by subsidizing States or interest groups at taxpayer expense. They are unjustified, and they should be eliminated.

Mr. WYDEN. Mr. President, the Patient Protection and Affordable Care Act is a fundamental first step toward providing all Americans with affordable, quality health care. The health care system is complex, and that is why this Senate and two of its committees, including the Senate Finance Committee of which I am a member, have taken the better part of this past year crafting this legislation. I believe several provisions of this bill are transformational for American health care and will begin to move America toward more competition, choice, and quality.

The first provision is in the managers' amendment, and it is called free choice vouchers. This section creates something that has never existed before in the American health care system: a concrete way for middle-income Americans who cannot afford their health care to actually push back against the insurance lobby and force insurance companies to compete for their business in the insurance exchanges. Unlike today, where if a hard-working, middle-class American can't afford just the one health insurance policy available to him at his job, with this new provision, there will be a different health care marketplace, with free enterprise choices that can actually drive down costs for the middle class while ensuring those choices are of good quality. And in that new marketplace, a worker who cannot afford his employer's health plan can get a tax-free voucher for the same amount the employer contributes under the health plan and use that voucher to buy a more affordable plan in the insurance exchange.

I have been an advocate for consumer empowerment and choice my entire career in public service. Exchanges are a new pathway to creating a competitive marketplace for the first time for health care in this country. Massachusetts led the way, opening the door to showing Federal legislators the potential for insurance exchanges when Massachusetts enacted its own health reform law. Many other States lead the way with innovation in health care, including States like Oregon and Vermont. That is why I have authored and championed in the Senate Finance Committee section 1332, the waiver for State innovation. If States think they can do health reform better than under this bill, and they cover the same number of people with the same comprehensive coverage, they can get a waiver exempting them from the legislation and still get the Federal money

that would have been provided under the bill. To me, this provision is a safety valve, if certain provisions in this bill will not work as intended in a given State. This provision will give States a way to tailor health reform to best meet the needs of their citizens. I intend to work with Senator SANDERS and other colleagues to make sure that State waivers will be available even sooner than they are under the current bill.

The waiver for State innovation and free choice vouchers will improve the number of choices in the bill, for states, for employers and for employees. The Patient Protection and Affordable Care Act will also increase quality of care, particularly in the Medicare Program. I worked in the Finance Committee to increase bonus payments to high quality plans in the Medicare Advantage Program. In Oregon, Medicare Advantage is a lifeline given the low traditional Medicare reimbursement rates in the State. This amendment will reward the high quality plans that exist in Oregon, but will also encourage other plans across the country to increase the quality of the care they provide. By boosting payments to the highest quality plans—the four and five star plans—the Federal Government will be incentivizing plans that provide preventive care, manage chronic diseases well, and have high levels of consumer satisfaction.

Another provision that will add quality to the Medicare Program is Independence at Home, IAH, section 3024 of the bill, that I won approval for in the Finance Committee. This provision stems from legislation that I introduced with 11 other Members on both sides of the aisle. As the name indicates, the Independence at Home program will provide a way for seniors with chronic medical conditions to get medical treatment at home. The IAH program is based on a house call team approach that has proven successful in reducing costs and improving the quality of care for high cost patients with multiple chronic illnesses, patients who account for 66 percent—85 percent of Medicare spending. The Independence at Home program requires providers to achieve minimum savings on health care provided to the highest cost Medicare beneficiaries as a condition of participating in the program.

Providing care at home makes sense, and is the right direction for the future of health care delivery. But there is another aspect of the future of health care that I think holds much promise: personalized medicine. I won approval in the Finance Committee, along with Senator CARPER, for including section 3113 in the bill. This provision will increase access to innovative molecular diagnostic tests that provide the foundation for the application of personalized medicine for individuals suffering from life threatening diseases such as

cancer and heart disease. These tests hold the promise of getting patients the right type of chemotherapy for their specific case of cancer. Personalized medicine is the future, and I am thrilled that the Patient Protection and Affordable Care Act takes steps to move toward 21st century medicine.

I have spent the better part of my career trying to make the health care marketplace more competitive and trying to improve the quality of care for all Americans. I take many lessons from my home State of Oregon, and have tried to apply the innovation that Oregon is known for as an example for how other States can provide higher quality care at a lower cost. Through free choice vouchers, State waivers, Medicare Advantage bonus payments, Independence at Home, and personalized medicine, I believe this bill improves competition, choice and quality across the entire country.

Mr. INOUE. Mr. President, I am pleased that this bill will extend basic health care to more than 30 million Americans who were previously unable to afford the costs associated with seeing a medical professional. Not since former President Harry S. Truman enrolled as Medicare's first participant in July of 1965 has our health care system undergone such a complete overhaul. The reform brought about by this bill is needed and long overdue. For too long millions of Americans have struggled to see health professionals while health insurance providers have raised premiums and executives have reaped multimillion-dollar bonuses. That is no longer the case. This bill also ensures that Hawaii, a State long ahead of the curve in terms of providing health insurance and affordable access to medical professionals, maintains its high level of health care while expanding the reach of existing Federal programs. The State Prepaid Health Care Act of 1975 ensures that every employee in Hawaii working at least 20 hours a week receive health insurance from their employer. Hawaii received an exemption to ensure Hawaii's employer mandated health care law would not be rolled back. The health care reform bill also includes tremendous cost savings and subsidy incentives for the State. Hawaii is one of two States in the country who are not permanently enrolled in the Federal disproportionate share hospital, DSH, program which reimburses hospitals that care for the uninsured. Currently Hawaii's temporary enrollment expires in 2012 but the new bill will make DSH permanent resulting in more than \$100 million for Hawaii's health care industry over the next 10 years. I am also pleased that we were able to include the reauthorization of the Wakefield Pediatric-Emergency Medical Services for Children program, at the suggestion of my two colleagues from North Dakota, Senator KENT CONRAD and Senator BYRON DOR-

GAN. This program works to ensure that emergency rooms across the country are equipped with the resources necessary to treat young children. A civilized, democratic society like ours should help maintain the health and welfare of all our citizens. No one should be denied medical care or lose coverage because they can't afford to pay to see a medical professional. Like that July afternoon in 1965 when President Lyndon Johnson signed Medicare into law I am especially pleased to see that our great Nation once again has recognized and worked to meet the basic needs of our citizens.

Mr. LEVIN. Mr. President, at a handful of moments, Members of the U.S. Senate have faced choices that could fairly be described as historic. Each of these choices was between progress—sometimes incomplete progress—and an intolerable status quo. In our finest hours, we have overcome fear and doubt and stood for the principle that our Nation, though great, could aspire to do better. When our ambition has weakened, we have taken the timid path. That is an easier journey and less laden with fear or political peril, but it has not served our own time well or passed the test of history.

We have come to another of those times. We can vote, now, to address decades of frustration and anguish over a health care system most Americans know is broken. Or we can destroy the hopes of millions of Americans whose modest ambition is not a perfect system, but an improved one. We cannot vote to end every problem in health care; this bill will not do that. But we can make life safer, more secure, less costly, for most Americans, because we can give them a better health care system.

Briefly, here is some of what this legislation will accomplish:

People with preexisting conditions who are currently left out of the system will be able to get access to health care in the future. Within 6 months of enactment, this legislation will allow those not covered at work and who are unable to find insurance in the individual market because of preexisting conditions to buy a plan that will remain in place if they get sick. And it will offer free preventive services and immunizations.

This bill has provisions to help strengthen Medicare by giving seniors access to important preventive services that they may otherwise not be able to afford. And also for seniors, this bill reduces the Medicare doughnut hole, a gap in prescription drug coverage that I hope we are able to eventually close altogether.

After 2014, new plans will be barred from imposing annual limits on coverage, and sliding tax credits will be available to make insurance more affordable for those earning below \$88,000 for a family of four, or earning below

\$43,000 for an individual. The credits that will be offered to make coverage more affordable will bring millions of Americans under the umbrella of health insurance, an important improvement for those families now without insurance and a step toward reducing burdens and inefficiencies that make health care more expensive for all of us. State-based exchanges will offer those seeking individual coverage both the purchasing power of belonging to a larger group, and a transparent marketplace in which benefits are standardized and costs are clear.

The bill also helps small businesses that are struggling to get a handle on ever-increasing health care insurance costs. Beginning in 2010, small businesses will receive a tax credit of up to 35 percent of their costs for insuring their employees and their employees' families. In 2014 and beyond, the tax credit can be as much as 50 percent of an employer's costs for covering employees. These credits will encourage these employers, which are the backbone of our economy, to provide health care insurance coverage.

The bill also includes some major insurance company reforms. Beginning in 2011, plans that do not spend a high percentage of their revenue for patient care—85 percent of revenue for large-group programs, and 80 percent in the individual and small-group market—will have to provide rebates to their enrollees.

One of the benefits of this new requirement on insurance companies is reversing the troublesome trend that has seen more and more of our health care dollars spent on administration. Since 1970, the number of administrative positions in our health care system has increased by nearly 3,000 percent, far outstripping the growth in the number of physicians over the same period. It is long past time to ensure that we are spending precious health care dollars on care and not on paperwork and bureaucracy. Hospitals will become more transparent as well—every hospital in the Nation will publish a list of standard charges for the items and services it provides.

The bill includes incentives to boost the availability of primary care, including financial incentives under Medicare to increase the number of primary care physicians. And it also promotes standardizing health information technology in an effort to reduce costly administrative overhead.

This is not everything I hoped for. But it is what we can get done. It is what we should do.

The minority has offered no alternatives, just apocalyptic rhetoric. Some of them stood before rallies, leading chants about socialism. They claimed it is a big government takeover. "Kill the bill" was their slogan. Before television cameras our efforts to produce reform were compared to

the activities of financial fraudsters like Bernie Madoff.

For those familiar with the facts, these notions are rightly seen as falsehoods. One of these falsehoods—the notion that health care reform would mean “death panels” voting to end the lives of senior citizens—has just been named by an independent fact-checking organization its “Lie of the Year.” That’s quite a distinction. When discussing the scare tactics being used by opponents of health reform, the policy director of AARP said, “The opponents of health reform have targeted (seniors) and have . . . misrepresented the facts, and have consciously tried to scare seniors who depend on health care. So no surprise that they feel anxious, because they’re hearing messages every day designed to scare the bejesus out of them.”

The extreme rhetoric of the minority is a repeat of similar rhetoric which was used when Social Security and Medicare were being considered by the Congress.

In 1935, as Social Security was being debated, one Republican warned the program would “enslave workers,” and another declared “the lash of the dictator will be felt” if it passed. Three decades later, as the Congress debated the Medicare Program, one Republican Member of Congress said, “Let me tell you here and now, it is socialized medicine.” A future Republican President of the United States warned that if Medicare passed, “you and I are going to spend our sunset years telling our children and our children’s children what it was like in America when men were free.”

Incredibly, the same Republican Party that once equated Medicare with socialism would now have the public believe they are defending Medicare from the threat of socialism. The mental gymnastics this requires is breathtaking. If this bill is such a threat to seniors, why does AARP support its passage? If it will destroy our health care system, why do so many of the groups that know health care firsthand, from the American Medical Association to the American Heart Association to the American Cancer Society, and dozens of others support passage of this bill? If this bill will explode the deficit, why does the nonpartisan Congressional Budget Office tell us it will reduce the deficit by \$132 billion over the first decade after enactment, and up to \$1.3 trillion in the second?

Are all these organizations, the nonpartisan CBO, independent fact-checkers, scores of economists and health care experts—are they all engaged in a conspiracy to engineer a socialist government takeover of medicine? I am afraid that some of our Republican colleagues have latched onto any argument at hand to justify their opposition to health care reform.

Let me ask one final question: What do opponents say to our constituents

who speak to us every day of their belief that the time for health reform has come? That today is not the time? The man from Kalamazoo, MI, who went bankrupt because his health insurance would not cover \$40,000 in costs for a life-saving heart operation—will they tell him this is not the time? The woman from Jackson, Michigan, who spent months fighting to get coverage because insurance companies considered her pregnancy a preexisting condition—will they tell her this is not the time? The worried mother who wrote my office to say, “We will lose too many bright young people—if something is not done”—will they tell her this is not the time?

No, this is the time. Now is the time to embrace the same call of history that led our predecessors to ignore the apocalyptic rhetoric and establish Social Security and Medicare. We must pass this bill, so that generations after us do not look back on a broken health care system and say, “Here was another lost moment when it could all have changed.” We must pass this bill. Now is the time. Just as we are ploughing the roads of record snow to get to work, our work now is to plough through the endless filibusters to get our job done.

Mr. REID. On behalf of Senator BAUCUS, Senator DODD, and myself, I submit this statement under the spirit of rule XLIV of the Standing Rules of the Senate. We hereby certify that, to the best of our knowledge and belief, the managers’ amendment to the substitute amendment to H.R. 3590 does not contain any congressionally directed spending item as defined in rule XLIV.

Rule XLIV defines a congressionally directed spending item as “a provision or report language included primarily at the request of a Senator providing, authorizing, or recommending a specific amount of discretionary budget authority, credit authority, or other spending authority for a contract, loan, loan guarantee, grant, loan authority, or other expenditure with or to an entity, or targeted to a specific State, locality or Congressional district, other than through a statutory or administrative formula-driven or competitive award process.” To the best of our belief, no item meets this definition. There are numerous items that affect one or more States or localities differently than others, but none of these meet the definition because of one or more of the following reasons—(A) no specific amount is associated with the provision, (B) the provision involves distribution through “a statutory . . . formula-driven . . . or competitive award process” or (C) the criteria are such that more than one State or locality will or may benefit. It is quite common in legislation for formulas and programs to make adjustments to affect State- or locality-specific needs.

The rule defines a “limited tax benefit” as “any revenue provision that (A) provides a Federal tax deduction, credit, exclusion, or preference to a particular beneficiary or limited group of beneficiaries under the Internal Revenue Code of 1986; and (B) contains eligibility criteria that are not uniform in application with respect to potential beneficiaries of such provision.”

Section 10905 provides exceptions to the annual fee on health insurance providers for certain insurers. One of these exceptions is provided to any entity that meets the following criteria—a mutual insurance company with market share in a State for 2008 between 40 percent and 60 percent and whose medical loss ratio for all markets—individual, small group and large group—in 2008 was 90 percent or higher. The performance-based exception is available if the entity has an average medical loss ratio for years after 2011 for the previous 3 years for all markets of 89 percent or higher—prior year for 2012 fee and prior two years for 2013 fee. It may be argued that this provision could be considered a “limited tax benefit” as defined in rule XLIV; at the same time, the Joint Committee of Taxation has indicated that the universe of potential beneficiaries depends in part on how “medical loss ratio” is ultimately determined under the statute. In the interest of transparency, the provision was included at the request of Senator BEN NELSON so that nonprofit Blue Cross Blue Shield of Nebraska would not be excluded from the exemption of nonprofit insurers from the fee. In keeping with the spirit of rule XLIV, Senator NELSON has provided Senator BAUCUS with a certification that neither he nor his family has a financial interest in the provision.

Mr. President, I ask unanimous consent to have printed in the RECORD the letter from Senator NELSON of Nebraska dated December 21, 2009.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,

Washington, DC, December 21, 2009.

Chairman MAX BAUCUS,
Ranking Member CHARLES GRASSLEY,
U.S. Senate Committee on Finance, Dirksen
Senate Office Building, Washington, DC.

DEAR CHAIRMAN BAUCUS AND RANKING MEMBER GRASSLEY: Consistent with the provisions of Rule XLIV of the Standing Rules of the Senate, I am submitting this letter with regard to Section 10905 of Senate Amendment 3276.

Section 10905 of the amendment creates a limited exemption from the annual fee on health insurance providers established by Section 9010 of Amendment No. 2786 to H.R. 3590, the Patient Protection and Affordable Care Act of 2009. The exemption from the fee is created for certain non-profit insurers with a high medical loss ratio. Among other exemptions provided for under this section, an exemption from the fee is available to any entity which is a non-profit mutual insurance company with market share in a

State for 2008 between 40% and 60% and whose medical loss ratio for all markets (individual, small group, and large group) in 2008 was 90% or higher. The exception is available only if the entity has an average medical loss ratio for years after 2011 for the previous three years for all markets of 89% or higher (prior year for 2012 fee and prior two years for 2013 fee).

This provision could be considered a "limited tax benefit" as defined in Rule XLIV, and I anticipate that Blue Cross Blue Shield of Nebraska may benefit from this provision, provided that they maintain the high medical loss ratio called for under the provision. My purpose for requesting this provision was so that Nebraska's sole non-profit insurer would not be excluded from the exceptions to the insurance fee as set forth in Section 10905.

Consistent with the requirements of paragraph 9 of Rule XLIV, neither I nor my immediate family have any pecuniary interest in this item.

Sincerely,

E. BENJAMIN NELSON.

Mr. REID. Mr. President, as we finish this session, there are many people who have worked to get us to this point. From the staff in the Senate to the Capitol Police, many employees have given their time to make sure that the Senate could complete its work on health care.

In particular, I would like to recognize the work of the employees of the Government Printing Office, GPO. Each day, the GPO works with the Secretary of the Senate to meet the needs of the Senate and we appreciate their efforts. Nearly all of the documents we have used for the health care debate have been printed and delivered by the employees of the GPO.

This past weekend, when the heavy snow blanketed the city and shut down most government agencies and operations, the men and women of the GPO came to work and remained at their posts. Some GPO employees spent the night to ensure that the Senate was able to get the documents we needed. Their performance throughout the health care debate was commendable and I would like to ask my colleagues to join me in thanking the GPO for a job well done.

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. CRAPO. Mr. President, as we approach the vote tomorrow morning, I know a lot of people are calling it a historic vote. In some contexts, I guess it is. However, many of us are concerned it is a historic mistake rather than a history-making opportunity.

We have had a lot of debate about whether this legislation is the right or wrong way to improve health care for all Americans. We have had hours and hours, in fact, days and weeks of committee hearings and meetings with good bipartisan discussion on options and ways to accomplish this. But now, apparently, we have a mandate by the majority demanding we have a final vote in the Senate before Christmas.

While we debate this, let me say I believe we need to hear more from the

people who are going to be most affected, the American people, because the final details of this bill were not crafted in front of the American public. I think most people in America know the President pledged that this legislation would be crafted around a table that is public, where, in fact, he said C-SPAN cameras could be present—in his words: So people could see the deals people were making and who was working for the American people and who was cutting deals.

The C-SPAN camera was not present, the table was not open, the room was closed, and the bill was negotiated in secret. But we are starting to find out what the deals were, and the deals are outraging the American people as they see specific exemptions from certain burdens in the bill being given to certain States in order to get the votes from the Senators for those States.

We heard about different proposals dealing with the State of Louisiana, the State of Florida, the State of Connecticut, the State of Nebraska, and the list is growing as we have an opportunity to deeply delve into the bill and determine exactly what is in it.

But we will not have time to know all the details of these deals. We will not have time to even know all the details of how the bill works because this 2,700-page bill, 400 pages of which were only disclosed last Saturday, will be voted on at 7 o'clock in the morning.

Three days ago, I asked Idahoans who, similar to most Americans—in fact, all Americans—want health care reform, to sign a petition on the Internet asking the Senate to:

... defeat H.R. 3590 ... because we need reform that will lower costs while increasing quality ... and keeping health care decisions between a patient and their doctor.

The response to this request has been remarkable. In fact, I suspect that, as I am speaking, we have already gotten over 20,000 signatures on the petition on the Internet. I asked people to go to my Internet site, mikecrapo.com, and simply sign the petition. Here is a partial stack. We are still printing out the rest of the names of the people who signed the petition, but somewhere between 19,000 and 20,000—and growing—people signed the petition.

Here is the remarkable thing about it. When I asked the people of Idaho to sign this petition, I asked them to do two things. I asked them, first, to go to the Web site and sign the petition. Then, second, I asked them to contact everyone within their circle of influence—people on their Christmas card list, people on their e-mail contacts list, people on their Facebook, their Facebook friends, everyone who is within their circle of influence—and ask them to also sign the petition and, if they didn't live in Idaho, to contact their Senator and encourage their Senator to oppose this legislation, if they agreed with me that it is not the path our Nation should follow.

Remarkably, more than half the people who have so far signed the petition did not get that information from me. They got the request or encouragement to sign the petition from the friend or relative. A huge proportion of them do not live in Idaho. In fact, we have had people from all over America, in every one of the 50 States, sign this petition.

Why is this happening? By the way, the number is growing. It is happening because the more Americans know about this bill, the more they know it is not the path they want us to take for health care reform. Health care is personal, private, and a sensitive matter among individuals and their doctors and their family. This bill makes health care a public policy decision controlled by a government bureaucracy. Americans don't want that kind of government control over our health care economy. Yet instead Americans see an administration and a congressional majority forcing this bill down their throats in a rush to pass it before public opposition legitimately overwhelms this wrongheaded monstrosity. Thousands are signing this petition because they desperately want Congress to listen, but they know that their collective voice has been ignored. The petition is one way they can make themselves heard in hopes that this Congress will pass needed and sensible reform but not this bill.

In fact, another point about this petition is in addition to getting on the Web site and signing the petition, I have individuals calling my offices and saying: Thank you for giving us an avenue to try to reach out to the Senate and tell the Senate to stop. I think thousands of Idahoans and people from all over America are eager to have an avenue to speak out, and we need to stop and listen. I thank the thousands of Idahoans and Americans across the country for being willing to get involved as citizens and petition their government to respect our rights and to honor our values and to reform health care sensibly. The national polls indicate people oppose this bill. They want commonsense, lower cost action that will reduce the cost of premiums and doctor visits.

This legislation instead raises taxes on the middle class, increases premium costs for many people now carrying insurance, cuts senior programs, and fails to lower health care costs. Simply put, there has not been a piece of legislation this decade that has come forward to meet more opposition than this health care reform bill. The more Idahoans and Americans know about the bill, the more they dislike it. Health care is a personal, private, and sensitive matter, and this bill goes the opposite direction. But the majority is moving full steam ahead in hope that they can pass it before the public can understand what it is and register their opposition. If we will take the time, we

can improve the health care system—without the tax increases, without the massive increase in the growth of government, without the porkbarrel spending and the sweetheart deals, without the Medicare cuts and the unconstitutional burdens on State governments this bill presents.

Among the steps many of us are trying to see enacted are things such as allowing insurance companies to compete across State lines, allowing small businesses to band together to negotiate group rates for insurance, requiring pricing disclosures from health care providers to promote a competitive, consumer-driven health care market, and offering incentives for patients and the private sector to create wellness programs and other efficiencies in health care delivery. In fact, when a bill similar to this was presented as the Republican alternative in the House, with the provisions the House Republicans proposed, it was scored, contrary to the bill we will be voting on, by CBO that it would actually reduce the cost of health care in America by significant percentages. Yet we are now continuing to plow full steam ahead with a vote at 7 o'clock in the morning on a bill that will increase the cost of health care.

The petition I brought forward asks Congress to listen. It registers the fears of many Americans that they are being ignored by the administration and by the majority in Congress. I am going to continue to aggressively push for their wishes on the floor of the Senate.

I wish to take an opportunity now to go ahead and get into a little bit more of the detail we do know about this bill. Why do I say it is the wrong direction for America? To start, let's ask what Americans want in health care reform. If you asked most Americans—and there have actually been a number of polls that have shown this—do they want health care reform, they say yes. When they are asked what they mean by that and what they want, the overwhelming answer is that they want to stop the skyrocketing increases in the cost of their health care insurance, they want to control the skyrocketing increases in the cost of medical care. They also say they want to see increased access for those who don't now have access to quality insurance, both because they are compassionate and want to see that kind of health care for everyone and because they know they are paying for it in their insurance premiums, for those who have insurance, and in their taxes, those who pay taxes. They want to assure that we continue to have the highest quality of health care possible. That is what we are supposed to be doing. That is what this bill should be working on. That is the objective we should be achieving.

Yet what are we achieving? In an earlier discussion of the House bill, I be-

lieve the Wall Street Journal said it was the worst bill ever. We now have a different bill in the Senate, but it is still falls into the same category. Why? Because it drives up the cost of health care. It raises taxes by hundreds of billions of dollars. It cuts Medicare by hundreds of billions of dollars. It grows the government by \$2.5 trillion. It forces the needy uninsured not into a program where most of them can get insurance but into a failing and less robust medical system, Medicaid. It imposes damaging unfunded mandates on our State governments that are already sharing the burden of Medicaid and facing difficult troubled economic times. It means increased taxes not just at the Federal level but at the State level with unfunded mandates. It leaves millions of Americans uninsured, and it establishes massive government controls over our health care economy.

Let me go through a few of those to give more specifics. First, I don't think most Americans, when they talk about health care reform, think that means we need to grow the size of our government by \$2.5 trillion. Although there is some smoke and mirrors in the way this bill is put together, because the first 4 years of its costs are not started until 4 years into the bill, so when you try to count the first 10 years, you only see a smaller number, when you take the first true 10 years of spending in this bill, it increases the cost of this government's health care expenditures by \$2.5 trillion. As we can see on this chart, look at the first 4 years. The spending is basically deferred. Why would that happen? I will explain that when I talk about deficit issues. But what it does is hide the true cost of the bill. If you measure the true cost of the bill in the first full 10 years of spending, it is \$2.5 trillion rather than the \$1.2 trillion it would be if you counted it otherwise.

What we see is a massive growth of the Federal Government. That is not what people were asking for and, frankly, it makes them kind of do a doubletake when you explain to them that we are increasing the size of our government by such massive amounts with health care reform. Those proposing that we adopt this bill often say: Our objective and what the American people want is to drive the cost curve down. I often ask, what cost curve are they talking about? If they are talking about the cost of health care or the cost of health care premiums, they are going up. If they are talking about the size of the Federal Government and the level of Federal Government spending, that is going up.

There is one that they talk about. It is called the deficit. That is whether we are spending more than we are taxing and cutting. They argue that the deficit is going down. There is only one way you can argue that this bill does

not increase the deficit, and that is if you assume that we don't have nearly $\frac{1}{2}$ trillion of Medicare cuts, that we don't have $\frac{1}{2}$ trillion worth of taxes in the first year and \$1.28 trillion of taxes in the first full 10 years of implementation and that we don't have several budget gimmicks.

What are the gimmicks? The first and biggest is the one I showed on the previous chart. They don't count the first 4 years of spending. They stop the spending and don't let it start happening for 4 years so that we have 10 years of taxes, 10 years of Medicare cuts, and 6 years of spending. When you balance that out, you can claim it doesn't increase the deficit because you don't have a full 10 years of spending.

There are other budget gimmicks. We have something called the SGR fix, the adjustments in compensation rates for physicians that we all know on both sides we must do. We must keep the physician compensation comparable and moving up with inflation. That is going to cost \$245 billion, approximately, over the next 10 years. That \$245 billion cost to reform and adjust the Medicare compensation system is absent from the bill. Why? Because they are going to do it in a separate bill and probably not pay for it; in other words, not have offsets. We will see whether they have offsets, but it is not in this bill. If it were, it would drive the deficit numbers by \$245 billion in the wrong direction.

There are other types of gimmicks. For example, there is double counting of the Medicare cuts. The CBO came out with a report today that said that if you cut Medicare by \$465 billion, claiming that you are going to use that \$465 billion to help make the financial situation for Medicare more stable, you can't then take that same \$465 billion and use it to establish a massive new government program, yet a third major government health care entitlement system. You can't spend it on a new one and claim you are saving one that is already facing fiscal collapse. It is these kinds of budget gimmicks that make many of us object to the bill. If you didn't have those budget gimmicks, if you didn't have those tax increases, if you didn't have those Medicare cuts, there is no way you could say this bill is deficit neutral.

One of the things CBO does report—I want to move to the question of the cost of insurance—is that the premiums in the individual market will go up, not down. What does that mean? CBO breaks the insurance market into three categories: the individual market, the small group market, and the large group market. The individual market is the one that is primarily there for small businesses that don't have a large or a small group opportunity or individuals who don't get their insurance through their employer. It represents about 17 percent

or almost 1 in 5 of all insured people in the country. Their insurance rates under this bill—17 percent of all Americans—are going to go up. The amount by which they will go up is about 10 to 13 percent, according to CBO.

The next group is the small group market. They represent about another 13 percent. Again, CBO says under this bill their rates are going to go up, not quite as badly, between 1 and 3 percent, but up, not down.

That brings us to the large group market. The large group market actually fares a little better. This is the remaining 70 percent of those insured in the United States. Basically, the CBO report says that for them there is a chance theirs may go down by a percent or two, but basically, it could be stable, a zero-percent change as well. Because individuals in the large group market, those who get their insurance from larger employers, have less liability of a harmful impact because they have that large group that can continue to negotiate to control their health care costs.

So what do we see? Even under the best scenario—and there have been nine or ten studies of this and the CBO report is the one that is the most favorable toward the bill; most of the other reports have said that the rates are going to go up for everybody—but even if we take CBO's numbers, 30 percent of the people will see their insurance rates go up, not down. The other 70 percent can expect basically the status quo; in other words, not any change at all, maybe a slight decrease.

Is that what Americans were asking for robust health care reform system? No. Americans are asking for true, solid, significant control of the cost of their premiums and their health care costs.

I wish to move next to the question of taxes. This bill increases taxes by about $\frac{1}{2}$ trillion. The President has pledged he wouldn't sign a bill that involved tax increases on the middle class. He defined the middle class to be people who as individuals make less than \$200,000 a year or as a family or a couple making less than \$250,000 a year. Here is the President's pledge:

I can make a firm pledge. No family making less than \$250,000 will see their taxes increase.

He was pushed on this pledge and he clarified it. He said not your income taxes, not your payroll taxes, not your capital gains taxes, not any of your taxes. You will not see any of your taxes increase one single dime.

That is the President's pledge. But what do we have? In the first 10 years, \$493 billion in new taxes. The question is: Do those taxes all fall on the so-called wealthy, those making more than \$250,000? Well, CBO and the Joint Tax Committee have analyzed it, and the answer is clearly no.

But before I get to that, let's see what the taxes do in the first full 10

years of implementation. Remember, the first 4 years are kind of a slow start with the spending, but if you compare the taxes and the spending, count the total amount of taxes starting on the day when the spending kicks into gear, it is not \$493 billion, or whatever the number was, it is \$1.28 trillion in new taxes. That is not what the American people are asking for.

The next question you might ask yourself is: OK, how much of those taxes are going to be paid by people who the President pledged would not be hit? Well, the Joint Tax Committee has analyzed the bill, and by 2019—and the reason they use the year 2019 is that is the end of the first full 10 years of implementation—by the year 2019, at least 73 million American households earning below \$200,000 will face a tax increase. That is not just people making \$200,000, that is everybody who pays taxes who makes any kind of income less than \$200,000 in America. Seventy-three million—not individuals—households will pay taxes under this bill.

One of the things that is interesting, in response to this argument, some of my colleagues on the other side have said: Wait a minute. That is not true. This bill is actually a tax cut. Wait a minute, you have me saying this bill increases taxes and someone on the other side saying this bill cuts taxes. How could that be?

Well, there is a subsidy in this bill for those who are at lower income categories and are provided government dollars or subsidies in order to purchase insurance—the ones who are fortunate enough not to have been pushed into the Medicaid system. That subsidy is about \$400 billion or \$500 billion in the bill, and it is administered by the IRS, so it is claimed to be a tax cut. If you offset that subsidy against tax increases in other parts of the bill, then you can say: Well, there is a tax cut in this bill.

First of all, that is not what the President said. The President did not say: I will not increase your taxes more than I will cut somebody else's taxes. That is not what he said. What he said was: Your taxes will not go up if you are making under \$250,000 as a couple or \$200,000 as an individual.

But even if you accept that argument, 73 percent or \$288 billion of this tax subsidy goes to taxpayers who do not pay any taxes. Their income levels are so low they do not hit the thresholds for incurring a tax liability. They get a pure, straightforward subsidy. The Congressional Budget Office acknowledges this and scores it as Federal spending, not as tax relief.

But either way you want to look at it, let's say you agree it is tax cuts and agree to offset it—which I think is wrong—you still come up with 42 million American households earning less than \$200,000 a year who will face a net tax increase, and the tax increases are not small for these families.

The bill grows the Federal Government. It pushes up every cost curve you could think of. It increases taxes. It increases the cost of health insurance. It increases the cost of health care.

What does it do to Medicare? It cuts Medicare by \$465 billion in the first year and, again, if you want to look at the first full 10 years, by \$953 billion in Medicare cuts. Basically, what we have here in this part of the bill is an absolute transfer—an absolute transfer—from America's senior citizens right over to the new government entitlement program and a redistribution of that wealth to other people.

Senior citizens who have throughout their life paid the Medicare tax, the Medicare payroll tax, will now see the Medicare they thought they were going to get cut. What kinds of cuts are we talking about that we may be dealing with here? The biggest one is Medicare Advantage—\$120 billion of cuts.

About one in four American seniors has Medicare Advantage insurance. This is insurance that was provided in a contract relationship with the private sector. In other words, it was an experiment to see if we could let the private sector deliver Medicare and how they would do at it. They found they can actually, through the Medicare Advantage Program, increase the benefits seniors get.

This is probably the most popular part of the Medicare Program. It is growing rapidly. The reason it is growing rapidly is because it provides better coverage. Those in the Medicare Advantage Program are going to see their benefits cut.

Another pledge the President made was: If you like what you have, you can keep it. Well, not if you have Medicare Advantage. It is also not true about a lot of people who have their insurance through their employers these days because that is going to be lost to millions of Americans too.

But in addition to the Medicare Advantage cuts, you are going to see hospital reimbursements, skilled nursing facilities, home health agencies, hospice, and others cuts to the tune of \$465 billion in the first 10 years. The experts have all told us, what that is going to do is to make impossible for many health care providers in these categories to keep their doors open, or it will cause them to reduce the amount and quality of services they provide.

So senior citizens are going to see their Medicare, particularly their Medicare Advantage, benefits cut and their access to care restricted and reduced under this bill.

In summary, there has been a lot of talk again about how Americans want health care reform. But we need to do it in a smart and sensible way. Many have argued there are no alternatives being put forward by our side. As I indicated earlier in my remarks, that is

simply not true. In fact, the alternative that was put forward in the House and the alternative many of us have been talking about here have been scored to actually achieve the results Americans are asking for.

We do not need to rush this bill through in a claim that we are making history but in a way that will be a huge historical mistake. The American people, in huge numbers, are asking us to slow down and stop it and start working together in ways that do not create a government takeover of health care, that do not drive up the size and reach of the Federal Government, that do not drive up taxes but instead provide the right kind of approaches to medical savings, that do not slash Medicare benefits to our seniors, that do not put massive burdens on our States, and that do not force the neediest of our uninsured into a failing health care system, Medicaid.

We are simply going to have to be back at this in the future if we do not get it right now. Only then we will be facing much worse fiscal circumstances and very difficult problems with sustaining the fiscal stability of the two programs we are now dealing with trying to sustain: Medicare and Medicaid.

I urge my colleagues to listen to the people who signed this petition—people all across this Nation in every one of the 50 States—who are saying: Wait. Do not do this now. Do some sensible reform, but do not make this mistake.

I encourage all my colleagues, as we are literally on the eve of the vote that will determine whether this bill makes it through the Senate, to step back and take a deep breath and evaluate whether it will not be better for all of America for us to move a little slower and start trying to build a bipartisan solution that can have true benefits for the American people.

With that, Mr. President, I yield the remainder of my time.

Mr. HATCH. Mr. President, there is a lot of talk from the majority about why passing this bill is the right thing to do for the American people. It is a decision of conscience for them. Well, let us take a closer look at these decisions of conscience.

After weeks of closed-door clandestine negotiations, Senator REID finally emerged with a 383-page Christmas list. This bill is a dark example of everything that is wrong with Washington today. Despite all the promises of accountability and transparency, this bill is a grab bag of Chicago-style, back-room buy-offs. It is nothing more than the Democratic leadership's own private game of "Let's Make A Deal" with special interest groups financed by American taxpayers.

So who won and who lost in this game? Well let us take a closer look.

AARP issued a strong statement of support for this bill. The Reid bill slashes Medicare by almost \$½ trillion

to finance additional government spending. So, why would the Nation's largest lobbying organization, avowed to protect the interests of seniors, support this legislation? To find the answer, like anything else in Washington, just follow the money.

AARP takes in more than half of its \$1.1 billion budget in royalty fees from health insurers and other vendors. The sale of supplementary Medicare policies, called Medigap plans, make up a major share of this royalty revenue. AARP has a direct interest in selling more Medigap plans. However, there is a strong competitor to Medigap policies—Medicare Advantage plans.

These private plans provide comprehensive coverage, including vision and dental care, at lower premiums for nearly 11 million seniors across the country. Seniors enrolled in Medicare Advantage do not need Medigap policies. So what happens when the Reid bill slashes this program by almost \$120 billion? Just look at the Washington Post front-page story from October 27 questioning whether AARP has a conflict of interest:

Democratic proposals to slash reimbursements for . . . Medicare Advantage are widely expected to drive up demand for private Medigap policies like the ones offered by AARP, according to health-care experts, legislative aides and documents.

One of the most disturbing developments in the Reid bill has been the perpetuation and even doubling of the unconstitutional individual mandate tax from \$8 billion to \$15 billion. You heard me right—this unconstitutional mandate tax actually doubled behind closed doors. I have long argued that forcing Americans to either buy a Washington-defined level of coverage or face a tax penalty collected through the Internal Revenue Service is highly unconstitutional.

We hear a lot of rhetoric from the other side about Republicans defending the big, evil insurance companies while Democrats are the defenders of American families. The insurance mandate is a clear example of this partisan hypocrisy. Let me ask one simple question: Who would benefit the most from this unprecedented mandate to purchase insurance or face a stiff penalty enforced by our friends at the Internal Revenue Service?

The answer is simple. There are two clear winners under this Draconian policy—and neither is the American family. The first winner is the Federal Government, which could easily use this authority to increase the penalty, or impose similar ones, to create new streams of revenue to fund more out-of-control spending. Second, the insurance companies are the most direct winners under this individual insurance mandate because it would force millions of Americans who would not otherwise do so to become their customers. I cannot think of a bigger give-

away for insurance companies than the Federal Government ordering Americans to buy their products. If you do not believe me then just look at the stock prices of the insurance companies that have recently shot to their 52-week highs.

Jane Hamsher, the publisher of the very liberal blog Firedoglake, said the following in a recent posting: "Having to pay 2 percent of their income in annual fines for refusing to comply—with the IRS acting as the collection agency—just might wind up being the most widely hated legislation of the decade. Barack Obama just might achieve the bipartisan unity on health care he always wanted—Democrats and Republicans are coming together to say kill this bill."

Now that we clearly understand the huge windfalls the Reid bill provides AARP and insurance companies, let me take a moment to talk about the winners and losers in the so-called abortion compromise. The language to prevent taxpayer dollars from being used to fund elective abortions is completely unacceptable. The new abortion provisions are significantly weaker than the amendment I introduced with Senator BEN NELSON to ensure that the Hyde amendment, which prohibits use of federal dollars for elective abortions, applies to any new federal health programs created in this bill. The Hyde amendment has been public law since 1976.

The so-called abortion compromise does not stop there. The Reid bill creates a State opt-out charade. However, this provision does nothing about one state's tax dollars from paying for abortions in other states. Tax dollars from Nebraska can pay for abortions in California or New York. This bill also creates a new public option run by the Office of Personnel Management, OPM, that will, for the first time, create a federally funded and managed plan that will cover elective abortions.

When you have Senator BOXER and Speaker PELOSI, two of the largest pro-choice advocates in the Congress, supporting this sham so-called compromise and everyone from the U.S. Conference of Catholic Bishops to the National Right to Life Committee and the Family Research Council opposing it, there is only one clear loser—the majority of Americans who believe in the sanctity of life and oppose the use of federal dollars for elective abortions.

Last but not least, I would like to spend a couple of minutes to talk about the numerous special deals conferred on States in this \$2.5 trillion spending bill. How hefty are the pricetags for decisions of conscience? Here are some highlights: \$300 million for Louisiana; \$600 million for Vermont; \$500 million for Massachusetts; \$100 million for Nebraska.

At a recent news conference, when the authors of this legislation were

asked about the Nebraska earmark for Medicaid funding, the majority leader simply replied, "A number of states are treated differently than other states. That's what legislation is all about. That's compromise."

The next logical question is pretty straightforward—Who will pay for these special deals? The answer is simple. Every other State in the Union, including Utah, who are collectively facing \$200 billion in deficits and are cutting jobs and educational services to survive, will now pay to support these special deals.

According to the Congressional Budget Office, the Medicaid expansion in the Reid bill creates a \$26 billion unfunded mandate on our cash-strapped States. Coincidentally, only one state avoids this unfunded mandate—Nebraska.

Of course, let us not forget about the biggest loser in this bill—the hard-working American taxpayer. This bill imposes over a \$½ trillion worth of new taxes, fees, and penalties on individuals, families, and businesses. The new fees begin in 2010, while the major coverage provisions do not start until 2014. Almost \$57 billion in new taxes are collected before any American sees the major benefits of this bill, which are largely delayed until 2014. It is also no coincidence that through the use of these budget gimmicks the majority can claim this bill reduces our national deficit when we all know these reductions will never be realized.

Based on data from the Joint Committee on Taxation—the nonpartisan congressional scorekeeper—this bill would break another one of President Obama's campaign promises by increasing taxes on 42 million individuals and families making less than \$250,000 a year.

At a time, when we are struggling to fight a double-digit unemployment rate, the Reid bill not only increases payroll taxes by nearly \$87 billion but also imposes \$28 billion in new taxes on employers that do not provide government-approved health plans. These new taxes will ultimately be paid by American workers in the form of reduced wages and lost jobs.

However, it is hard to say we didn't see these new taxes coming. For years now, many of us have warned that the out-of-control spending in Washington will eventually have to be repaid on the backs of American families. In this bill, the repayment comes in the form of stifled economic growth, lost jobs, and new and increasing taxes—and they are just the first installment of what will be a long and painful extortion of taxpayers if Congress doesn't stand up and stop these terrible bills.

According to a recent study of similar proposals by the Heritage Foundation, these new job-killing taxes will place approximately 5.2 million low income workers at risk of losing their

jobs or having their hours reduced and an additional 10.2 million workers could see lower wages and reduced benefits.

Poll after poll tells us about the growing opposition against this tax-and-spend health care bill. The latest Rasmussen poll shows that 55 percent of Americans are now opposed to this bill. The CNN poll has it even higher at 61 percent. Among senior citizens, the group most likely to use the health care system, only 33 percent are in favor while 60 percent are opposed. Independent voters are also opposed almost 2 to 1. Opposition in certain state polls, like Nebraska, is even higher at 67 percent.

So what is the majority doing to address these concerns? Nothing. In fact, despite the efforts by many of us here on this side of the aisle to express our substantive policy disagreements for months, one Senator recently said the following: "They are desperate to break this president. They have ardent supporters who are nearly hysterical at the very election of President Barack Obama. The birthers, the fanatics, the people running around in right-wing militia and Aryan support groups, it is unbearable to them that President Barack Obama should exist."

This statement is outrageous. Instead of listening to the policy concerns of a majority of Americans, the other side is simply dismissing them as rants from the far right. If the majority refuses to listen to what Americans are telling them now—I am sure they will have a rude wake-up call waiting for them later. It should come as no surprise to anyone that this kind of arrogance of power has led to congressional approval ratings rivaling the most hated institutions on the planet at a dismal 22 percent and falling.

One of the biggest tragedies of letting this bill move forward is that it will do nothing to address the fundamental issue of rising health care costs in this country. According to the Congressional Budget Office, this bill will actually raise our national health care costs by \$200 billion. The administration's own actuary at the Centers for Medicare and Medicaid Services, CMS, agrees with this assessment. When this bill fails to work, Americans will no longer have any faith in Congress to effectively address the issue of health care reform. The opportunity to save Medicare and Medicaid from their impending financial collapse will be lost for another generation.

The historic blizzard in Washington earlier this month was a perfect symbol of the anger and frustration brewing in the hearts of the American people against this bill. I urge the majority once again to listen to the voices of the American people. Every vote for this bill is the 60th vote. Let me repeat that again—every vote for this bill is the 60th vote. My Republican col-

leagues and I are united with the American people in our fight against this \$2.5 trillion tax-and-spend bill. I implore my colleagues not to do this to the American people. Don't foreclose on their futures. Don't stick them with even more government spending and government intrusion.

We can fix health care. Many of us have been working to do just that for many years. A truly bipartisan bill that would garner 75 to 80 votes in the Senate, would be fiscally sound and provide the American people with the fixes they are asking for in the health care marketplace is easily achievable. Many of us are standing at the ready, and have been for months, to step forward and pass meaningful health care reform that truly would help American families and please American taxpayers. To date, we have been rebuffed by an unfailing determination by a few to pursue a nearly Socialist agenda. I would ask my colleagues on the other side of the aisle who do not believe in the Europeanization of America, who believe in doing truly bipartisan work here in the Senate, to step forward, vote against advancing this bill and work with those of us on this side of the aisle who are committed to making a difference to craft a health care reform bill they can be proud to support.

THE PRESIDING OFFICER. The Senator from New York.

MR. SCHUMER. Mr. President, it is truly my honor to be here on this historic evening and speak in support of the bill which we will vote on early tomorrow morning, Christmas Eve morning. It is an honor because anyone who looks at this country knows the problems we have, and that two problems caused by the health care system are at the top of the list. One represents a more conservative point of view and one represents a more liberal point of view. But I am proud to say the bill we will pass tomorrow morning, God willing, deals with both.

The more conservative issue is controlling costs. The health care system costs this country a whole lot of money. By and large, we get good health care—not everybody but most people. But it is so expensive, and that has been documented.

What does that mean? It means small businesses cannot grow and actually have less money to pay for wages. It means our large businesses are less competitive globally. We have seen that in the auto industry. It means individuals often have to pay a fortune for health care. It means our government runs deficits that are perilous to the economy. Health care costs are more the cause of our deficits than anything else.

On the other hand, we run a real problem because many people are not covered or covered adequately. The heartwrenching stories told by our fine leader—and I cannot give him enough

kudos for the job he has done here; and I will talk about that in a minute—but the people who are not covered or covered poorly suffer in many ways. They become not only less happy citizens—that is most important—but less productive citizens. The heartwrenching stories of people who do not have coverage for them or their children we all know about. It also, by the way, increases costs because when people delay coverage, when they are ill, it inevitably costs more.

This bill addresses both. I wish to, in my brief amount of time here—and I do not know how much time I have—address both. I wish to talk on the cost side first.

Why do health care costs go up so much more than any other product? Two main reasons. First, we do not have perfect knowledge, as the economists would say. We basically do not know what we are buying. When we go to the doctor, and the doctor says: You need this test, we do not know if we need it. Is the doctor genuinely prescribing a test we need or is there some element that he makes enough money on this test that why not? can't hurt because we do not need it?

In my family, my relatives have all had prostate cancer, and I watch very carefully. But when I go to the doctor and he says I need this kind of a test or this kind of a scan, I say: Of course. If it were a car or a house, I might investigate to see if I needed it.

The second reason costs are so expensive is because fundamentally health care deals with God's most precious gift to us, which is life. Who would not beg, borrow, or steal to find \$100,000—who would not give their right arm if we were told our husband, our wife, our mother, our father, our son, or our daughter was ill and \$100,000 would give them a 25-percent greater chance of living better, of healing? We would do it. But because most of us do not have that \$100,000, we buy insurance. That is the reason there is health care insurance. It is not because it is health care; it is because it is so vital and so expensive. So we are willing to pay \$5,000 a year, so that, God forbid, if that time comes when we need that \$100,000 to cover a loved one, it is there because we have insurance.

So when I go to the doctor and he says I need this special test, special scan, special procedure, not only do I not know whether I need it—because the training is difficult; and you can go online, but you cannot really figure these things out—but, second, I am not paying for it. You put those things together, and the costs go through the roof. We have tried in this bill to finally get a handle on the costs. Most other countries have. In America, we haven't. We must. I believe very deeply in covering everybody, but unless we get a handle on the costs, we will not be able to afford to cover everybody.

Even if we cover them today, we will run out of money in 5 years. We do it in four ways, and I am going to be very brief about them because my time is somewhat limited.

First, we deal with efficiencies. There is one form. If there is IT, as we put in the stimulus bill—information technology—we can save hundreds of billions of dollars. Just one form. You go to a doctor's office, there is a nurse, a doctor, and there are four people filling out forms. If you had one form, you wouldn't need that.

Second, prevention. Early intervention and prevention saves billions, and in this bill that is what we encourage, early intervention and prevention. Right now, amazingly enough, if you get diabetes in the later stages, Medicare or private insurance will pay for dialysis. God forbid someone needs a leg amputation, one of those serious retina operations, they pay. They don't pay for the early stages. They don't pay for the nutrition therapy, the exercise therapy that could arrest diabetes in the early stages. We do that.

The third thing we try to do in this bill is provide competition in the insurance industry, and we do provide competition in the exchanges. We do put some limits on the insurance companies with the medical loss ratio provisions that Senator ROCKEFELLER, Senator FRANKEN, and Senator NELSON helped craft. If we could have had a public option, it would have created more competition. That is one of my great regrets, that we don't. I worked hard for it, but we don't. Nonetheless, we still get some limitation on insurance companies and create more competition.

The fourth is the hardest: fee for service. The fee-for-service system is what drives up the costs. This bill, more than any other provision ever passed in America, begins to grapple with that most difficult issue.

You do those four things, and you will bring costs down.

It is no wonder that CBO has said that in the first 10 years, we save \$127 billion, even though we are covering 31 million more people, and in the second decade, we are going to save over \$1 trillion. I forget the number. I think it is \$1.3 trillion. We are doing whoever becomes President in 2020 a huge favor because with the cost-control provisions in this bill, should they become law, we will get a great handle on costs. It will take a while, but it will do the job. On the other side, we don't cover everybody, but 94 percent of all people will be covered, so it is an amazing feat to both cover many more people and reduce costs, and that is what this bill does.

I wish to say, for my home State of New York, there are lots of good things in this bill. We have 800,000 seniors who would be cut from Medicare who will not be because of provisions we were able to get in the Finance Committee.

Graduate medical education, intermediate medical education—a lifeblood for jobs in New York because training doctors is probably our second biggest industry in New York City—is not cut even though it was proposed to be cut. Money for neighborhood national health services and community health centers will provide physicians in inner cities and in rural areas where they don't have health care. They will get really good health care.

This bill is far from perfect. Had I written it, I would have written it a different way. Had Senator CANTWELL or Senator CASEY or Senator KLOBUCHAR written it, they would have written it differently from me. But if every one of us in this Senate insisted that the bill had to be written exactly our way, we would have 100 bills, each with 1 vote, and no progress. So great progress has been made, and this is a proud moment.

There are many people I wish to thank.

My staff—I do want to mention Meghan Taira, Katie Beirne, and all of the others who worked so hard; Jeff Hamond, who worked so hard and so diligently on this bill.

I thank MAX BAUCUS. He soldiered on and on when things looked bleak and pursued his dream of a bipartisan bill, which would have been a better product. It wasn't to be but not because of lack of his efforts.

Thanks go to Senator DODD and Senator HARKIN on the HELP Committee and my colleagues on the Finance Committee, but at the top of the list is just one person, and I was proud to be one of his lieutenants on this, and that is HARRY REID. I was up close. What an amazing job that man did, modestly, without complaining, without looking to what was good for him. He had a mission, a job: get us 60 votes on this very difficult, complicated proposal. And he did it. He will never get the credit he deserves because he is such a modest man, but I wanted to share that with my colleagues and with the country as I am sure others have done before.

So this bill is a very good bill on both sides of the ledger. It will reduce costs rather significantly and in a smart way, without hurting patient care. It gets rid of the fraud and the waste and the abuse and duplication. At the same time, it will cover many more people.

This is a very fine day for this country, this Senate, and Leader REID. Tomorrow morning, I will be very proud to vote for this piece of legislation, certainly one of the most important I have ever voted on in my 35 years as a legislator.

I yield the floor.

The PRESIDING OFFICER. The Senator from Washington.

Ms. CANTWELL. Mr. President, I am proud to be out on the floor tonight with my colleagues.

I thank the Senator from New York for his comments and his work in the Finance Committee. He literally did work night and day in that committee and then worked with Leader REID on trying to get consensus within our caucus on this legislation. So I appreciate his strong, active support in making reform.

I, too, wish to add my congratulations tonight because we are here to talk about controlling health care costs and what we are going to do to help the American people. I too wish to thank my colleagues, Senator BAUCUS and Senator REID, for their active leadership, as well as Senator DODD and Senator HARKIN.

I add my thanks to the whole Finance Committee staff. I don't think people realize they have worked from January until December, many weekends as well as during the week, many late nights as well as early mornings, and they deserve a lot of credit for the details behind this legislation and making sure the i's are dotted and the t's are crossed.

I wish to thank my staff, all of my staff but in particular Mark Iozzi, who worked on this legislation, as did the rest of the Finance Committee members of the staff, for about the last 11½ months. I was glad to send him off on a plane today to reach his family, and hopefully he will be watching the vote tomorrow morning by television. It should be a proud moment for him.

I also wish to add a particular thanks to President Obama. I wish to say to the President that he started this year with the dedication that this was going to be a year where we got health care reform. He stated that at the beginning of his Presidency and held steady to that during the very raucous debate that happened in the early months regarding the budget and whether we would have the money to do health care reform. He remained committed as we went home over the summer and many things happened at town meetings. He came back and was determined that we would forge ahead. He, as we got legislation out of the Finance Committee and had to combine bills, remained active and intent about this legislation.

It reminds me of a saying my father used to make to me because he was a Navy man and always came up with nautical terms to kind of describe the direction in which he would want his children to go. The President's actions on health care policy for this year remind me of the saying "steady as she goes" because that is what the President has done for the last many months—steady as she goes so that we can get health care reform.

So I wish to add my thanks and congratulations to him and to his administration and to the many members of that administration who were down here on the Hill, including Mr.

Messina, who made many frequent visits, I think, to Members to talk about some of the details.

I am glad I am following my colleague from Idaho, from the Northwest, who spoke earlier, because I think it shows you can be from the same region of the country and have the very same interests but look at this legislation differently—not that I don't share some of his concerns, and I am going to fight to make changes and add to the legislation as it continues to move into conference and in the years after its implementation. I think the Senator has brought up some good points that we need to follow up on.

Controlling health care costs in general is what is driving us to take action tomorrow morning on Christmas Eve. We know we have already seen a 120-percent increase in insurance premiums for the last 10 years; that is, from 1999 to 2009, we have seen a 120-percent increase for Americans and their premium costs. That is something the American people can't afford. And when my colleague from Idaho talks about the increase we are going to see in the next 10 years, he is right. Insurance premiums are going to go up again. This debate is about what we are going to do to try to control those costs, whether this legislation we are discussing today will have an impact in reducing those costs so that maybe premiums aren't going to go up another 120 percent in the next 10 years and make insurance even more unaffordable for the American people.

We know there are organizations that have done multiple studies. We know there is at least \$700 billion in waste each year in our health care system. That is according to the Robert Wood Johnson Foundation. We know that is the kind of money that, if we are smarter about our health care choices, we can reduce the costs of health care and improve the system.

Part of this is reforming Medicare and the cost of Medicare because Medicare dollars are one in every five health care dollars today. The more expensive Medicare is, the end result is the more expensive insurance is in general. So it is very important for us to reform the Medicare system, to have provider reform, which this legislation has, and to change the system.

But we also have to deal with the cost of the uninsured because we know that Americans right now who don't have insurance and who go to the emergency room are adding something like \$43 billion a year in higher premium costs. That is \$1,000 for each family in their premium increases.

I know we can do nothing and have these same costs on the backs of the American people or we can try to change the system, as we are with this legislation, to improve the quality of care and access and to lower the costs for Americans. That is why one of the

main reforms I fought for in this legislation was about paying for value, not for volume; that is, to change the fee-for-service system that rewards physicians for how many procedures they do or how many patients they have seen a day but not for the value of the system. So I know that because of the change we have in this legislation, we are going to reward physicians, starting several years from now—something that has worked in my State and many States in the Pacific Northwest that are more efficient at lowering the costs—by increasing efficiency and thereby rewarding those States with better Medicare payments.

What it actually means for individuals is that they are going to get shorter waiting times, they are going to get better access to doctors, they are going to get more coordinated care, and they are going to get better outcomes. Why? Because that is what we are going to incent in these reforms. That is the kind of system that is working in many parts of the country that are cost-effective, that yield better results for individual patients at lower cost.

I wish to thank my colleague from Minnesota, Senator KLOBUCHAR, because it was her legislation that she introduced early this year that really catalyzed this effort to focus on many of the things done at the Mayo Clinic and things that had been done in Minnesota and things we had done in Washington State that said: Let's change this process and save dollars for everybody in America by getting off the fee-for-service systems and going to a system that will be more cost-effective. So I wish to thank her and her State for that leadership and to thank those in my State who have performed the same way on efficiency to deliver this kind of health care reform.

A second cost control of this legislation that I supported that I think will do well for many people in this country is in the area of long-term care reform.

Some people may know that my colleague, Senator HARKIN, was on the floor and was talking about long-term care in the insurance sector, but part of what we are doing in this bill is also to incent States to move off of nursing home care and on to community-based care.

Home care juxtaposed to nursing home care is 70 percent cheaper and better meets the needs of individuals. I say that because my State implemented this policy to focus on long-term, community-based care decades ago. The end result is that kind of care has been more cost-effective, less expensive, personalized care, and individuals get to stay in their communities.

I do not know any senior in America who would choose to go to a nursing home over staying in their home or in their community. But they have had very little choice up until now on this

legislation to be able to do that because we continue to incentivize nursing home care.

There are some who need nursing home care because they need a higher level of delivery of care, and those people will still go to those facilities. But we will save a lot in our Federal budget, as we look at our Medicare and Medicaid budgets, for the future if we simply take this one action. This bill alone would be worth passing just for this one provision because of how much money it is going to save the Federal Government.

The Basic Health Plan. Many of my colleagues may have heard me talk about the Basic Health Plan as a basis of this legislation that we added in this country. Many people across the country may not understand the Basic Health Plan because they do not have something similar to the Basic Health Plan in their States.

Nearly 20 years ago, the Washington State Legislature passed the Basic Health Plan because it allowed States to negotiate for lower rates. Essentially, it is a public-private partnership. Some people call it a public option. Some people call it a public plan. I call it cost-effective health care delivery. It is cost-effective because we have proven for 20 years that we get 35 to 40 percent lower rates for individuals by grouping into this kind of plan and having the State negotiate the rates. We have been able to have that plan now for 20 years.

This provision of allowing States to do something similar to the Basic Health Plan is a provision we added in the Finance Committee that now will allow every State in America to take money they would get instead for tax credits and use that money in the delivery of negotiated rates for their States. This will allow 70 percent of the uninsured to have full coverage.

What does that mean from a cost-effective perspective? Let's take an example. If this legislation is not passed and we have the current system in America, an individual in 2016 trying to get access to the individual market would have to pay over \$5,850, and the individual would pay everything. The government would be paying nothing; that is, if this bill does not pass. That is what would happen.

Let's look at what will happen if, in fact, this bill does pass. You will have the option of going into the exchange. The estimates are by CBO that you will be able to reduce from where we normally would be, about 11 percent, the cost of health care. In that exchange, an individual who would be covered at 200 percent of poverty would end up paying \$1,200, and the Federal Government would end up paying \$4,000. Already somebody is coming out ahead. They say that sounds good. That sounds like a better deal than me being able to afford this current rate. That

would be \$5,850. It means I would be uninsured.

The Basic Health Plan has been in operation for 20 years, driving down costs through negotiated rates, as I said, by 35 and 40 percent, and it is a far different picture for the individual.

In our State, the individual only pays \$400—\$400—versus \$1,200. Look at the government. The government rate adds to that, \$3,700, but it is cheaper. Why? Because the State has negotiated with insurers and driven down the cost. That is what is missing in the exchange.

While some of my colleagues, I know, think the exchange is going to deliver great clout through the Office of Personnel Management, I hope they are right. I am anxious to see the results of that. But I am unapologetic about the fact that I know the State of Washington has delivered these kinds of savings through negotiated rates and that many States in our country have been the most cost-effective tools for delivering new and efficient health care models, while we at the Federal level still struggle to try to drive those policies.

I know this legislation has cost controls. I know my colleague from Idaho is very concerned about this, and he is right to be concerned. We will be judged by how much we are going to drive down the costs. But the American people should understand that rates are going to go up another 120 percent in the next 10 years if we do nothing. So this legislation is about bending the cost curve. It is about looking at the projected growth, looking at general inflation, and trying to drive health care costs somewhere below what they would be on an annual basis. That is our objective.

We are going to have a challenge in monitoring this legislation, but that is why I am going to fight and cheerlead for the Basic Health Plan and hope that every State in the country takes the option of delivering health care through that kind of negotiated public plan that will allow them to drive down insurance costs.

I hope we can expand the Basic Health Plan in conference to an even more robust plan that would cover more people. It does not make sense to me to continue to subsidize expensive insurance by giving Federal tax credits when I know the bill to the Federal Government and to the individual taxpayer can be cheaper by implementing negotiated rates.

While we have not been able to fully implement that at the Federal level, let's not hold States back. Let States do what they have done best for the last several decades; that is, innovate—innovate more quickly, more effectively, not without a Federal partnership but in a partnership with the Federal Government and in a partnership with a public-private mechanism that I

think has been cost-effective for the last 20 years.

Tomorrow, I will be voting in support of this legislation because I believe in the innovation this legislation enables. I know when we passed the Basic Health Plan in the mid eighties people said the same thing. There were concerns about whether we were going to be able to implement the cost-effectiveness. In fact, at that time, it was said that some stakeholders believed it would be an entitlement. Others saw it as essentially a cost-containment measure that would reduce uncompensated care. Some others thought it would demonstrate the viability of government-subsidized health care. Advocates wanted to implement something quickly so they could develop constituencies.

All these things are similar arguments to what we are hearing today and what this debate has been about. But I know that what happened after 20 years of us putting a plan in place is that hundreds of thousands of Washingtonians got more affordable health care. It has been a plan that has worked effectively. No one has tried to dismantle the program from a political perspective. I think working together with the Federal Government we can show more cost containment for the American public.

I thank the Chair. I yield the floor.

The PRESIDING OFFICER. The Senator from Minnesota.

Ms. KLOBUCHAR. Mr. President, I ask to speak for 12 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. KLOBUCHAR. Mr. President, I come to the floor in support of the Patient Protection and Affordable Care Act. It is an honor to follow my friend from Washington, Senator CANTWELL, who has been such a leader on the Finance Committee in focusing on the very issue that is key in my State; that is, cost reform, delivery system reform, because for too long the people in cost-efficient States, such as Minnesota, Washington, and Wisconsin, have been seeing other States not quite offering that kind of quality care we would like to see all over the country.

I think it always shocks people. If you go to a hotel and you say you want to get a room, usually if you spend more money you have a bigger room and you have a better view. That is not true with health care.

Time and again, we see studies across this country—academic, bipartisan studies—showing, in fact, some of the highest quality health care comes with some of the lowest costs.

As the Senator from Washington talked about how we can save that \$700 billion year that is wasted in our system, a lot of it comes not at the cost of care but actually at getting better care, because if you reduce unnecessary waste, if you stop having people running around to 20 different specialists

who are giving them conflicting advice and not conferring and not knowing about the medications they are taking, when you have those disorganized systems, they not only cost too much money for everyone, they also give worse care. That is why the Mayo model, an integrated care model with one primary care doctor working with a team of specialists is a model we would like to see all across this country.

We cannot simply keep pushing our problems to another day. Rising health care costs are unsustainable, busting the budget of families and businesses alike. If we do not act, these costs are going to break the backs of the American people.

This country spends \$2.4 trillion on health care alone. That is \$1 out of every \$6 in the American economy. It is projected to be 20 percent of our whole economy in 2020 if we do not act. Despite spending 1½ times more per person on health care than any other country, we all know there are many problems in our health care system.

Wages simply do not keep pace with premiums. Peoples' wages have been stagnant or maybe gone up a little, gone down some or they lost their jobs, but health care costs continue to skyrocket.

I always tell the people in my State there are three numbers we need to remember—6, 12, and 24. Ten years ago, the average American family was spending \$6,000 a year on their health care. Now they are spending \$12,000, with many people spending a lot more. What will they be spending in 10 years if we do not act? Mr. President, \$24,000, up to \$36,000 a year on their health care premiums.

When I go around my State, I hear these stories all the time. Granite Gear, a little backpack company up in Two Harbors, MN, makes backpacks for our soldiers. They have done well. They built their business. The guy in charge of it said he would not have started that business if he knew then what he knows now; that is, for his family of four, a small little business in Two Harbors, MN, he is spending \$24,000 a year on his health care.

I have heard from doctors at Gunder-son Lutheran in La Crescent, MN. They told me the story of how at one of their hospitals in their region they had three patients in a 1-month period come into the emergency room with severe stomach problems. They had ruptured appendixes. Do you know what they said as to why it got to that point? For two of them, they worked at small businesses and they were afraid it was going to blow up the premiums for health care coverage for that little company. The third one could not afford the copays. They waited and waited and waited. They got a doctor and that doctor was the emergency room, some of the most expensive care in this country.

I heard from a mom in Bemidji, MN, who has a daughter named Micki. The mom's name is Sheryl. She wrote me a letter. She said:

I just got off the phone with my daughter Micki. At first, I couldn't understand her because she was sobbing so hard. Her husband had just been told by his boss that they wouldn't be carrying health insurance on their employees any longer. They are a small company and it was costing them \$13,000 a month. For her, this is a matter of life and death. She has cystic fibrosis. Her medications can run anywhere from \$7,000 to \$13,000 a month. Because it is a preexisting condition, the insurance companies won't touch her unless it is under a group plan like the one her husband just lost.

She went on to say in her letter:

You need to stand and be my voice, be Micki's voice. Micki is a fighter but she can't keep fighting a system that is so against her. Micki has already lived longer than any of her doctors expected. We need you to be her voice.

That is why this bill is so important. The status quo is simply not sustainable, not for families, not for small businesses, not for big businesses that are trying to compete internationally against other companies and countries that have more efficient health care systems.

Despite claims from my friends on the other side of the aisle, we have spent months debating this issue. The C-SPAN viewers know what I am talking about. If you look at the input the Republicans have had on this bill, you can see that over 160 amendments were accepted in the HELP Committee. Dozens of bipartisan meetings and roundtable discussions were held in the Senate Finance Committee.

They have engaged across this country—so many people, sadly—in a campaign of misinformation. I know a lot of people in Minnesota and across the country are left trying to wade through all the ads, misinformation, and scare tactics to find out what this bill is about. Well, this bill is not perfect, as so many of my colleagues have said. We will work to make changes and work forward. I would like to see more cost reform in this bill. But what we do with this bill is a beginning not an end. We work to reduce cost, we work to expand coverage and increase choice and competition for American consumers.

First, and very important to me and to my mother—who is 82 years old—this bill protects Medicare and our seniors. Medicare is one of the most valued social programs our country has produced in the last half century. Yet it is also a program in dire need of reform if it is to survive on sound financial footing and continue to provide the fine medical care our seniors have come to expect.

By 2011, the first baby boomers will enter the Medicare system. Without action, if we sit and put our heads in the sand, it will go in the red by 2017. So

think of people such as my mom—82 years old. She wants to live well into her 90s and beyond. Think of people who are 55 and who want to be on Medicare when they are 65. It is going to go in the red by 2017 if we don't do something to make sure it is on strong financial footing.

With this bill, we start to do that. We extend Medicare solvency by 10 years. I am encouraged that my legislation can create a value index, which the Senator from Washington discussed, as part of the formula that is used to determine Medicare's fee schedule. That was included in the Senate's bill. This indexing will help reduce unnecessary procedures because those who produce more volume will also need to improve care or the increased volume will negatively impact fees. Doctors will have a financial incentive to maximize the quality and the value of their services instead of just the quantity.

My favorite story along these lines is not from Minnesota but from Geisinger, PA. They were trying to figure out: How do we best treat diabetes. We are not happy with the results. They realized with the routine cases, those were the people they wanted someone to see more often, to check in on them. So they had them assigned to nurses and the more difficult cases to the endocrinologists. The endocrinologists would review the nurses' work and make sure there was proper followup if there had to be adjustments. At the end of year, they had much happier patients. The quality of care went way up, and they saved \$200 per month per patient.

What does our system in America do now? What does the Medicare system do? It punishes them for that good work. So that is what we are talking about, actually getting that higher quality. You can save money if you have the right incentives in place.

With this legislation, we also stop paying for care that doesn't result in quality patient outcomes. Who wants to go into the hospital to be treated and get sick from something else during that hospitalization? When you have to go back again, that is called a hospital readmission. In 1 year, hospital readmissions cost Medicare \$17.4 billion. A 2007 report by the Medicare Payment Advisory Commission found Medicare paid an average of \$7,200 per readmission that was likely preventable. This practice must stop. This isn't good care for patients, and it is not a good investment for taxpayers.

The bill also establishes an independent, 15-member Medicare Commission tasked with presenting Congress with comprehensive proposals to reduce health care costs and improve quality of care for Medicare benefits. The current Medicare payment policies are not working well for patients, doctors, and hospitals. We have to control costs and we have to get that high-

quality care we see in Minnesota throughout the country.

In this bill, we also work to stop fraud and abuse. Law enforcement authorities estimate that Medicare fraud costs taxpayers more than \$60 billion every year—\$60 billion going to con men, \$60 billion going to storefronts that say they are a doctor's office, when all that is behind it is a bunch of fraudsters and rip-off artists who are getting checks meant to go to providers of care to our seniors—\$60 billion a year. Finally, we have a bill that puts the tools in place—enhanced criminal penalties—that allows for direct deposit of those payments from the government to those providers, so we don't have people ripping us off with an antiquated system of bad and false checks. With this change, we put a stop to criminals running phony businesses to steal Medicare checks from our seniors.

We are also working to help our seniors with the cost of their prescription drugs. Millions of Americans depend on prescription drugs to help them manage chronic disease or other illnesses. But drug prices continue to skyrocket. That is why I voted for reimportation, to allow these safe drugs to come in from places such as Canada. We are not afraid of getting our medications from Canada. Canadians come to shop and to vacation and to fish in Minnesota, and we go to Canada to shop and to work and to fish. We don't have a problem with their drugs. Sadly, that proposal did not pass the Senate, but I will continue to advocate for that.

What does this bill do so far? What it does is to help fill that doughnut hole, that point where seniors who had been getting help with paying for their prescription drugs stop getting that help. That doughnut hole is now filled.

This legislation provides relief for our small businesses. Right now, small businesses pay 20 percent more than large businesses for the cost of care. In a recent national survey, nearly three-quarters of small businesses that did not offer benefits cited high premiums as a reason. Beginning in 2011, with this legislation, small businesses will be eligible for tax credits worth up to 35 percent of their contribution to their employees' health insurance plans. In 2014, these tax credits will even increase more.

This legislation, as we all know, also creates insurance exchanges known as small business health option programs—or SHOP programs—where small businesses can finally pool their numbers and do what big businesses do—negotiate for better rates for their insurance.

Beginning with the passage of this bill—and this is one of my favorite parts—kids can't be denied coverage due to preexisting conditions. So if your son or daughter gets sick, an insurance company can't look at you and

say: I am sorry your kid got sick, you don't have any insurance.

Look at the story I just read with Micki, the woman whose husband lost her insurance. She has cystic fibrosis, and she is not sure if she is going to be able to get insurance. This puts an end to that and for kids it does it the minute the bill gets signed into law.

Insurance companies will be barred from limiting the total benefits Americans can use over the course of a year or over their lifetime. Affordable insurance coverage options will also be made immediately available through a high-risk pool for Americans who have been uninsured and have been denied coverage because they have a pre-existing condition.

With this bill, insurance companies immediately must fully cover regular checkups and tests that help prevent illness, such as mammograms or eye and foot exams for diabetics.

In addition, children would continue to be eligible for family coverage through the age of 26.

I see my friend, the Senator from Pennsylvania, is here. Maybe he has four children who will soon be 26. I know many people are glad this bill has contained in it a provision that says you can keep your kids on your insurance until they are 26.

We know this bill isn't perfect, no big piece of legislation ever is. There is still work that needs to be done in conference committee. There are still negotiations that will take place. There are still things that need to be fixed. We know this is only the beginning of reform, not the end, but we must keep looking to the future. For too long, health care costs have been spiraling out of control. That is why we can't afford to hold off any longer on reforming health care.

I am going to close by reading something Vicki Kennedy—Ted Kennedy's widow—wrote for the Washington Post. This is what she wrote this weekend:

The bill before Congress will finally deliver on the urgent need of all Americans. It would make their lives better and do so much good for this country. That, in the end, must be the test of reform. That was always the test for Ted Kennedy. He's not here to urge us not to let this chance slip through our fingers. So I humbly ask his colleagues to finish the work of his life, the work of generations, to allow the vote to go forward and to pass health-care reform now. As Ted always said, "When it's finally done, the people will wonder what took so long."

After all the work and debate that has gone into this bill over the past year, we are finally having the votes the American people deserve. Tomorrow morning, Christmas Eve, will be the vote.

I yield the floor.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. CASEY. Mr. President, I ask unanimous consent to speak for up to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CASEY. Mr. President, I wish to commend my colleague from Minnesota, Senator KLOBUCHAR, for the outline of the bill and the important priorities we are here to debate. This is the last night, the last couple of hours, before we vote on the bill tomorrow morning, and I wish to do two things. One is to highlight, in very brief fashion, some of the main benefits of this bill to the American people—and especially to our families—and then to speak of one particular family from Pennsylvania who I will talk about in a moment.

By way of overview, what we tried to do in this bill, and I believe we have accomplished it, is not only to meet the goals President Obama set forth in the early part of this year as he assumed the Presidency and began to make health care reform a priority, but I also believe we are trying to meet the goals and the objectives of the American people. I think we have reached that point.

This legislation to reform health care will, first, not only be deficit neutral, but over the first 10 years of the bill it will save \$132 billion—reduce the deficit \$132 billion.

Something we haven't talked enough about, although we have had a lot of important debates, but in terms of covering those who don't have any coverage today, this bill will cover 31 million Americans. We know, for example, the Medicaid Program, which is more than 40 years old, covers 61 million Americans, and Medicare covers 45 million. So in this one piece of legislation, not after 10 or 20 or 30 years but once it is fully implemented over the next couple years, it will cover 31 million Americans. That will not only be beneficial to those individuals and their families, but I would argue it is good for our economy. They will be more productive workers and our economy will be stronger because we covered them.

The bill extends Medicare solvency. That is something we hear a lot about. We have heard a lot of discussion about Medicare but what about making sure it is solvent. Our bill does that.

Prescription drugs. A lot of families have benefited from our prescription drug program, but then they fall into a time period where they are paying the whole freight. It has been referred to as the "doughnut hole," but that doesn't capture the gravity of the problem for a family and for an individual, older citizen. When they fall into that so-called doughnut hole, they are in big trouble because they have to carry the whole burden. They have to pay for those prescription drugs all by themselves. This bill addresses that, something that has gone unaddressed for a number of years.

The number of children in our country who are covered by the children's

health insurance and other initiatives has grown, thankfully. We will be growing from 7 million kids covered under the prior legislation to 14 million under the children's health insurance. But a lot of those children who don't have the benefit of the Children's Health Insurance Program might be caught in the preexisting condition problem. Their ability to have coverage will be limited because they have a preexisting condition. What our bill does is to say that upon passage of this bill, within months of the passage of this bill, in 2010, children will be fully protected in this sense: Any kind of act by an insurance company to deny them coverage because of a preexisting condition will be illegal in 2010.

We also, over a number of years, will make it illegal for an insurance company to deny someone coverage due to a preexisting condition for adults. For those who are discriminated against, even before the bill is implemented, we provide a high-risk pool for them.

We protect consumers in other ways. I was holding a copy of the first half of the bill here. Sometimes bills get real complicated, and I know our colleagues on the other side have complained about the size of the bill. But to get it right, you have to put in a lot of detail. On page 78 of the bill, it is very clear. On page 78, the bill deals directly with the preexisting condition problem. Millions of Americans have been denied coverage over the last couple of years because of this one problem—millions of Americans. Here is what it says, very simply, on page 78:

A group health plan and a health insurance issuer offering group or individual health insurance coverage may not impose any preexisting condition exclusion with respect to such a plan or coverage.

It is not long or complicated. It is one sentence—one sentence that, at long last, provides the kind of protection insurance companies have refused to provide to adults and children, and the protection for children goes into effect within a matter of months after enactment.

Let me make two more points, and then I wish to talk about an individual and her family. The Children's Health Insurance Program, as I said, has been extended. But what happened in the earlier versions of the bill was the full funding of it would cut off in 2013. In the bill, we now have added to that. So now the children's health insurance funding will be extended 2 more years. So at least through the end of September 2015, the Children's Health Insurance Program is fully funded.

We need to do more than that. We will have to get to that as we move forward, but we have extended it 2 more years.

We also have done some things in this bill that didn't get a lot of attention.

When we were in the early stages of this bill way back in the summer, in

the Health, Education, Labor, and Pensions Committee, Senator DODD and I and others included provisions in the bill long before it was amended in the original bill we put before our committee this summer.

For example, mandating prevention and screenings for children. No. 2, ensuring pediatric benefits as well as pediatric input into the formation of benefits; vision and oral health care for children, and, finally, in this section, strengthening the pediatric workforce. If we are going to give children the kind of expert help they have a right to expect and we have a right to expect for their care, we have got to make sure we have the workforce, the high-skilled work force, the doctors, who are, in fact, pediatricians; so all kinds of benefits for our children and for our families.

But this isn't just a debate about policy and the provisions of the bill. That is, obviously, part of what we are here to do. What we are here to do is meet the needs of real families in America. I have met a number of them in Pennsylvania, and every Member here, whether they are for or against the bill, whether they are trying to kill the bill on the other side or whether they are trying to support and pass the bill on this side, could tell a story. Each of those Senators could tell a story about many families in their State.

One story is to remain an inspiration for me from day one, going way back in February when I received a letter. This woman in Pennsylvania who wrote to me remains an inspiration. Her name is Trisha Urban, from Berks County, PA, right near Reading and the eastern side of our State. She wrote this letter. I will quote major portions of the letter. She talked about herself and her husband. She said her husband had to leave his job for 1 year to complete an internship requirement to complete his doctorate in psychology. "The internship was unpaid and we could not afford COBRA." She goes on to say that because of preexisting conditions neither her husband's health issues nor her pregnancy—Trisha talked about her pregnancy in the letter—"nor my pregnancy would be covered under private insurance. I worked four part-time jobs and was not eligible for any health benefits. We ended up with a second-rate insurance plan through my husband's university.

"When medical bills started to add up, the health insurance company decided to drop our coverage," stating that the internship didn't qualify us for benefits. It didn't stop there for a second. So within the space of two sentences, she has highlighted at least two, if not three, of the major problems we have heard so much about: the preexisting condition problem that I pointed to in the bill and we have heard about from so many others, and also dropping of coverage, arbitrary ac-

tions by an insurance company to drop coverage when they believe it is in their best interests and not in the interests of the family.

Let me pick up with the letter. I am quoting here again from the letter from Trisha Urban:

We are left with close to \$100,000 worth of medical bills. Concerned with the upcoming financial responsibility of the birth of our daughter and the burden of current medical expenses, my husband missed his last doctor's appointment less than one month ago.

Less than 1 month from February of 2009.

Here is her story, the tragic part of her story, in addition to all of the problems she had with her health insurance company and all of the challenges she and her husband faced getting coverage for her family, her husband's heart condition and in her coverage, as well as her pregnancy, she talks about that night in early 2009 when she was ready to deliver her daughter. She said:

My water broke the night before. We were anxiously awaiting the birth of our first child. A half hour later, two ambulances were in my driveway. As the paramedics were assessing the health of my baby and me the paramedic from the other ambulance told me that my husband could not be revived.

Here's Trisha Urban, having lived through all of those difficulties with her own insurance and her problems with insurance and worrying about her pregnancy and worrying about her husband. She walks up to her driveway the exact day that her baby was born and she finds her husband dead in the driveway.

The chart depicts the headline from the Reading Eagle dated February of this year: "Tilden Township Woman Tends to Baby Born Hours After Her Husband's Death."

I will cite a few facts from the story:

Just after noon, Thursday, Trisha A. Urban's husband, Andrew D. Urban, died. Less than nine hours later, she gave birth to their first child, Cora Catherine.

Because of that tragedy and maybe only because of that tragedy I met Trisha Urban months after she wrote a letter to me, and I met her daughter. They came down to hear the President's speech to a joint session of Congress. I held her daughter Cora. I probably never would have met that beautiful child were it not for this tragedy, were it not for this story.

I am not sure what I would do if I were in her case. I am not sure if I would have remained so saddened by it and so frustrated by what the insurance companies did to her or didn't do for her. Anyone would understand that, if she or I or anyone else who suffers that tragedy would look within themselves and suffer alone with their family. Patricia Urban didn't do that. She didn't just tell us about the problems she had with her insurance company; she didn't just tell us about the tragic death of her husband; she did more than that. She wrote to me.

For those who say, well, we don't need to do anything about this health insurance problem, I would ask them to listen to Trisha Urban. She said at the end of her letter:

I am a working class American and do not have the money or the insight to legally fight the health insurance company. We had no life insurance. I will probably lose my home, my car, and everything we worked so hard to accumulate in our life will be gone in an instant.

But then she says this:

If my story is heard, if legislation can be changed to help other uninsured Americans in a similar situation, I am willing to pay the price of losing everything. I'm asking you to share my story with others in Congress and I'm willing to speak on behalf of my husband so that his death will not be in vain.

So says Trisha Urban in this letter. She challenged me with that letter, or at least I took it as a kind of challenge I wanted to accept. I think she challenges all of us. If Trisha Urban, who lived through all of those problems with the health insurance company, denied coverage because of preexisting condition, dropped coverage, medical bills going through the roof, and then the ultimate tragedy, the death of her husband, if she can endure all that and still stand up and say, I am willing to pay the price of losing everything I need, I am going to do that to try to help pass a health care bill—if she can do that, the least we can do is to do what a lot of us have tried to do over many months, which is to work on this, to debate it, and to fight hard to pass it. So tomorrow morning in the early hours of the morning, when it might still be dark out, it is my hope and prayer there will be a little light in that darkness in the early morning tomorrow when we pass this bill, and we can say that we did our best.

I know we are not done yet to get this bill out of the Senate. I know we are not done yet. We can at least say we did our best, that we tried as best we could to be responsive to, to answer the plea for help and the invocation of hope that Trisha Urban has in her letter.

I have remained ever inspired by her courage, by her willingness to speak up, and by her willingness to be a witness not just to what has been going wrong with our system and not just giving testimony about her husband's death but the way Trisha Urban has been a witness to the hope and the promise of change that will come with this bill. I know tomorrow morning isn't the end of the road. But tomorrow morning is at least the beginning of the end of a lot of these tragedies and a lot of these stories.

So on Trisha's behalf as we say on behalf of so many others, we need to get this legislation passed tomorrow morning and to move forward in a positive new direction in terms of what happens to our health care system.

With that, Mr. President, I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CASEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. CASEY. Mr. President, I ask unanimous consent that the Senate proceed to a period of morning business, with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIVE AMERICAN APOLOGY

Mr. INOUE. Mr. President, I wish today to discuss the Native American apology resolution that was recently passed as part of the fiscal year 2010 Defense appropriations bill.

I believe that it is well known to most Members of this body that the original inhabitants of the lands that now constitute the United States, the aboriginal, indigenous, native people of America, occupied and exercised sovereignty over more than 550 million acres of land prior to the first European contact.

In the early days of our history, well before our Nation was formed, the native people fought alongside our soldiers in the Revolutionary War. The Indian tribes enabled the survival of General George Washington and his troops during the harsh winter at Valley Forge by providing food to the troops.

A few years later, as our Founding Fathers were engaged in the challenge of forming a new nation, they drew upon the democratic model of government that they learned from the Six Nations of the Iroquois Confederacy. There they found the well-institutionalized practice of the fundamental principles of freedom of speech and a system of governmental checks and balances provided through the separation of governmental powers.

In our early days as a nation, we entered into treaties with Native Americans pursuant to the provisions of the U.S. Constitution that recognize them as sovereigns. But later, we abandoned the path of an honorable course of dealings, and turned to war. Thousands lost their lives through these battles and horrific massacres. The native population everywhere was decimated.

Forced marches to relocate the native people from their traditional homelands to areas west of the Mississippi in the dead of winter cost thousands of more lives. Few Americans know that there was not one Trail of Tears—but many.

The treaties could have signaled a return to a course of honorable dealings with the native people had the United States not proceeded to break provisions in every single one of the treaties that were ratified by the United States Senate.

Amazingly, notwithstanding these appalling deeds, the native people of the United States have always been and continue to be staunchly patriotic and loyal to this country. They have volunteered to serve in the defense of our Nation in every military action and war in which we have been engaged and on a per capita basis, more Native Americans have put themselves in harm's way and given their lives to protect the United States than any other ethnic group of Americans. They have made the greatest sacrifice, but their contributions do not end there.

We know that the native people of the United States have made significant contributions to our society in every walk of life, in every profession, in medicine and agriculture and as stewards of the lands and resources we all hold dear. There have been great men and women who have led their native nations out of war, poverty, and despair. Throughout the generations, they have shown us the true meaning of courage in the face of the greatest odds, and the quiet strength to persevere.

This provision signifies a new day, brings a message of hope, and provides a foundation for the future.

Mr. President, I would like to thank Senator BROWNBACK for his leadership on this measure.

LEGISLATIVE WORK OF COMMITTEE ON THE JUDICIARY

Mr. LEAHY. Mr. President, this has been an extraordinary year in the history of the Senate Committee on the Judiciary. Thanks to the members and their work through 87 hearings and 33 business meetings this year we have been productive. Here are some of the legislative highlights:

We have considered and reported to the Senate several important legislative initiatives: We successfully considered and reported to the Senate the Fraud Enforcement and Recovery Act that President Obama signed into law in May. We reported the important Patent Reform Act, which can help our economic recovery and lead to additional American jobs. We reported significant cyber security legislation, including the Personal Data Privacy and Security Act.

We also reported the Improving Assistance to Domestic Violence Victims Act; Public Corruption Prosecution Improvements Act; the Crime Victims Fund Preservation Act; and the Performance Rights Act. We reported the Railroad Antitrust Enforcement Act; the PACT Act on cigarette smuggling;

and the Preserve Access to Affordable Generics Act, to end anticompetitive pay-for-delay schemes in the drug industry.

Mindful of the end of the year deadlines, we worked hard to report with bipartisan support the USA PATRIOT Act Sunset Extension Act and the Satellite Television Modernization Act.

We reported the Juvenile Justice and Delinquency Prevention Reauthorization Act just last week. And after many working sessions, we were finally able to report the historic Free Flow of Information Act to establish a qualified privilege in Federal law for journalists to protect their confidential sources and the public's right to know.

Through the course of the year Senators on this Committee contributed to enactment of the Lilly Ledbetter Fair Pay Act, Matthew Shepard and James Byrd, Jr. Hate Crimes Prevention Act, the Fraud Enforcement and Recovery Act, the OPEN FOIA Act, the Human Rights Enforcement Act, the Webcasters Settlement Act, an extension of the EB-5 program for three years, an end to the "widow penalty" in immigration law, the Judicial Survivors Protection Act, the Reserve Officers Modernization Act, the charter for the Military Officers Association of America, as well as legislation to keep the Patent Office on a financial footing, and legislation to clarify statutory time periods for litigation. We worked to include in the American Recovery and Reinvestment Act provisions to provide needed funding to state and local law enforcement and to protect privacy as we improve healthcare information technology.

Many of us worked for Senate passage of the District of Columbia House Voting Rights Act.

Within the health insurance reform legislation being passed by the Senate this week are provisions we worked on to improve our anti-fraud efforts and to provide recourse for those harmed by health services.

I thank the members of the Senate Judiciary Committee for their contributions and cooperation.

JUDICIAL AND EXECUTIVE NOMINATIONS

Mr. LEAHY. Mr. President, I have been calling on the Republican leadership to end the delays and obstruction of judicial nominations and join with us to make progress in filling some of the many vacancies on Federal circuit and district courts. I have done so repeatedly for most of the year, and several times over this last month. Regrettably, as we head into the winter recess and the end of the first session of the 111th Congress, Republican obstruction is setting a new low for the Senate in our consideration of judicial nominations.

The Senate has been allowed to confirm only one judicial nominee all

month. It is now December 23. By this date in President Bush's first year in office, the Senate with a Democratic majority confirmed 10 nominations just in December to reach a total of 28 confirmed Federal circuit and district court nominees in the first session of the 107th Congress. That is 10 times as many nominations as the Senate has considered and confirmed this month. During the first year of President Bush's tumultuous administration, with the Senate majority changing in the middle of the year and Democrats then in the majority, we worked from July through December to confirm 28 judicial nominees. That was, of course, the year of the September 11 attacks and the anthrax attacks in the Senate, but we continued our work. The Senate proceeded to confirm 6 judicial nominees by voice vote in December 2001, a total of 10 judicial nominees that month, a total of 28 in the last 6 months of that year, and 100 in the 17 months I served as chairman of the Senate Judiciary Committee during President Bush's first term.

By contrast, thus far this month, with 12 judicial nominees now available to the Senate for final consideration, Senate Republicans have only allowed a vote on Judge Jacqueline Nguyen to the Central District of California. She was confirmed unanimously after been delayed 6 weeks. They have even refused to consider the nomination of Beverly Martin of Georgia to the Eleventh Circuit, despite strong support from her home state Senators, both Republicans. Instead of acting of her nomination, which has been awaiting final action since September 10, and that of Judge Greenaway of New Jersey, who has been nominated to the Third Circuit and was reported on October 1, they insist on delaying debate on that nomination for at least a month. I hope we will be able to turn to that nomination when the Senate returns in late January.

The refusal by the Republican minority to enter into customary time agreements to consider non-controversial nominees has led us to fall well short of the confirmations achieved in the first years of other Presidents. On the eve of the end of the session, the Senate has confirmed little more than one-third as many of President Obama's circuit and district court nominees as it confirmed of President George W. Bush's—28—or of President Clinton's—27—in their first years. In fact, President Obama is on pace to have the fewest judicial nominees confirmed by a President in his first year since President Eisenhower, who only made nine nominations in 1953. Of course, all nine were confirmed. The total this year stands to be the fewest confirmed in any President's first year in more than 50 years, and the fewest in any year since the Republican majority confirmed only 17 in the 1996 session, a Presidential election year.

The unprecedented obstruction we have seen by Senate Republicans on issue after issue—over 100 filibusters this year alone, by some calculations, which have affected 70 percent of all Senate action—have ground Senate consideration of judicial nominations to a crawl. Instead of time agreements and the will of the majority, the Senate is faced with filibusters, and anonymous and Republican leadership holds. Those who just a short time ago said that a majority vote is all that should be needed to confirm a nomination, and that filibusters of nominations are unconstitutional, have hypocritically reversed themselves and now employ any delaying tactic they can.

Judicial nominees have been and are available for consideration. This lack of Senate action is attributable to Senate Republicans and no one else. The President has reached across the aisle to consult and has made quality nominations. We have held the hearings, and the Senate Judiciary Committee has favorably reported 12 judicial nominees to the Senate on which action has not been permitted. There are now more judicial nominations stalled on the Senate Executive Calendar—12—than the number that have been confirmed all year. One has been ready for Senate consideration for more than 13 weeks, another more than 10 weeks, and the list goes on. Nor are these controversial nominees. Eight of the 12 were reported from the Judiciary Committee without a single dissenting vote. The majority leader and all Democratic Senators have been ready to proceed. The Republican Senate leadership is not. It has stalled and delayed and obstructed.

Unlike his predecessor, President Obama has reached out and across the aisle to work with Republican Senators in making his judicial nominations. The nomination of Judge Hamilton, which the Republican leadership filibustered, was supported by the most senior Republican in the U.S. Senate, my respected friend from Indiana, Senator LUGAR. Other examples are the nominees to vacancies in Alabama supported by Senators SESSIONS and SHELBY, in South Dakota supported by Senator THUNE, and in Florida, supported by Senators MARTINEZ and LAMIEUX. Still others are the President's nomination to the Eleventh Circuit from Georgia, supported by Senators ISAKSON and CHAMBLISS, which the Senate will not consider until the end of January because of Republican objection, and his nomination to the Sixth Circuit from Tennessee, supported by Senator ALEXANDER.

Last week we held a confirmation hearing for two more well-respected and well-qualified nominees that were the result of President Obama's effort to reach out and consult with home state Senators from both sides of the aisle, Judge James Wynn and Judge Albert Diaz. Judge Wynn and Judge Diaz

have been nominated to fill two long-standing vacancies on the U.S. Court of Appeals for the Fourth Circuit. Both are from North Carolina. Senator BURR and Senator HAGAN worked with each other and with the White House on these nominations. I thank them both for their testimony before the committee last week in strong support of these nominees.

These nominations are just the most recent examples of this President reaching out to home State Senators from both parties to consult before making nominations. Just as I worked last year to end a decade-long impasse on the Sixth Circuit with the confirmations of Judge Helene White and Ray Kethledge of Michigan, I will work to see that these nominations from North Carolina are considered fairly and confirmed expeditiously. With the support of the senior Senator from North Carolina, a Republican, and the determined efforts of Senator HAGAN, a Democrat, North Carolina will finally have the representation on the Fourth Circuit that it deserves.

Instead of praising the President for consulting with Republican Senators, the Republican leadership has doubled back on what they demanded when a Republican was in the White House. No more do they talk about each nominee being entitled to an up-or-down vote. That position is abandoned and forgotten. Instead, they now seek to filibuster and delay judicial nominations. They have also walked back from their position at the start of this Congress, when they threatened to filibuster nominees on which home state Senators were not consulted. We saw with Judge Hamilton that they filibustered a nominee supported by Senator LUGAR.

When President Bush worked with Senators across the aisle, I praised him and expedited consideration of his nominees. When President Obama reaches across the aisle, the Senate Republican leadership delays and obstructs his qualified nominees. It is clear that the Republican leadership has returned to their practices in the 1990s, which resulted in more than doubling circuit court vacancies, and led to the pocket filibuster of more than 60 of President Clinton's nominees. The crisis they created eventually led even to public criticism of their actions by Chief Justice Rehnquist during those years.

The Republican obstruction and delay in considering well-qualified non-controversial nominees comes at a tremendous cost to the ability of our Federal courts to provide justice for all Americans. We have seen a tremendous spike in judicial vacancies. Although there have been nearly 110 judicial vacancies this year on our Federal circuit and district courts around the country, only 10 vacancies have been filled. That is wrong. The American people deserve better.

In only 5 months of President Bush's first year in office when I served as Senate Judiciary Committee chairman and with a Democratic Senate majority, we confirmed 28 judicial nominees. During 17 months of President Bush's first 2 years in office, we confirmed 100 of his judicial nominees. Although two Republicans chaired the Senate Judiciary Committee and Senate Republicans held the Senate majority for more than half of President Bush's time in office, more judges nominated by President Bush were confirmed by the Senate Democratic majority and when I served as Senate Judiciary Committee chairman. During President Bush's last year in office, we had reduced judicial vacancies to as low as 34, even though it was a Presidential election year. When President Bush left office, we had reduced vacancies in 9 of the 13 circuits since President Clinton left office.

As matters stand today, judicial vacancies have spiked and are being left unfilled. We will start 2010 with the highest number of vacancies on article III courts since 1994, when the vacancies created by the last comprehensive judgeship bill were still being filled. While it has been nearly 20 years since we enacted a Federal judgeship bill, judicial vacancies are nearing record levels, with 97 current vacancies and another 23 already announced. If we had proceeded on the judgeship bill recommended by the Judicial Conference to address the growing burden on our Federal judiciary, as we did in 1984 and 1990, in order to provide the resources the courts need, current vacancies would stand at 160 today. That is the true measure of how far behind we have fallen. I know we can do better. Justice should not be delayed or denied to any American because of overburdened courts and the lack of Federal judges.

I, again, urge the Republican minority to allow Senate action on the 12 judicial nominees on the Senate Executive Calendar before the end of the session. We have now wasted weeks having to seek time agreements in order to consider even nominations that were reported by the Judiciary Committee unanimously and confirmed unanimously by the Senate when finally allowed to be considered. The 12 judicial nominees are Beverly Martin of Georgia, nominated to the Eleventh Circuit; Joseph Greenaway of New Jersey, nominated to the Third Circuit; Edward Chen, nominated to the District Court for the Northern District of California; Dolly Gee, nominated to the District Court for the Central District of California; Richard Seeborg, nominated to the District Court for the Northern District of California; Barbara Keenan of Virginia, nominated to the Fourth Circuit; Jane Stranch of Tennessee, nominated to the Sixth Circuit; Thomas Vanaskie of Pennsylvania, nominated to the Third Circuit; Louis Butler, nominated to the District Court for

the Western District of Wisconsin; Denny Chin of New York, nominated to the Second Circuit; Rosanna Malouf Peterson, nominated to the District Court for the Eastern District of Washington; and William Conley, nominated to the District Court for the Western District of Wisconsin.

At the end of the Senate's 2001 session, only four judicial nominations were left on the Senate Executive Calendar, all of which were confirmed soon after the Senate returned in 2002. At the end of the first session of Congress during President Clinton's first term, just one judicial nominee was left on the Senate Executive Calendar. At the end of the President George H.W. Bush's first year in office, a Democratic Senate majority left just two judicial nominations pending on the Senate Executive Calendar. At the end of the first year of President Reagan's first term—a year in which the Senate confirmed 41 of his Federal circuit and district court nominees—not a single judicial nomination was left on the Senate Executive Calendar.

In stark contrast, there are now 12 judicial nominees on the Senate Executive Calendar, and unless there is a burst of cooperation from Republicans, they will remain on the calendar awaiting Senate consideration beyond the end of this session and into next year. That is a significant change from our history and tradition of confirming judicial nominations that have been reported favorably by the Senate Judiciary Committee by the end of a session.

The record of obstruction of the Senate Republicans is just as disappointing when we consider the executive nominations that have been reported by the Judiciary Committee. There are currently an incredible 20 executive nominations that have been reported favorably by the Senate Judiciary Committee pending on the Senate Executive Calendar, including nominations for Assistant Attorneys General to run three of the 11 divisions at the Department of Justice. Each of these nominations has been pending 4 months or longer. An editorial in today's Washington Post entitled "Nominees in Limbo" and subtitled "The Senate should do its job before taking a vacation" describes the Republican obstruction of the nomination of Dawn Johnson to head the Office of Legal Counsel, which has been stalled on the Senate Executive Calendar since March, as "[p]erhaps the greatest nominations travesty." The editorial concludes: "[T]he president should be given deference in choosing executive-branch officials who share his views. Ms. Johnson is highly qualified and should be confirmed. At the very least, senators should have the decency to give her an up-or-down vote."

Senate Democrats treated President Bush's first nominations for these same posts quite differently than Senate Republicans are now treating

President Obama's nominees. We promptly reported the President's nominees to head the Office of Legal Counsel, the Office of Legal Policy, and the Tax Division, and they each received Senate consideration in a matter of days or weeks after they were reported by the committee. We still have heard no explanation for the five months of Republican obstruction of the nomination of Chris Schroeder to head the Office of Legal Policy after his nomination was reported by the committee in July by voice vote without dissent. The Washington Post editorial rightfully calls for Mr. Schroeder's confirmation as well as for the confirmation of the long-pending nomination of Mary Smith to run the Tax Division.

As with the judicial nominations, the Republicans have employed new standards of demanding a supermajority and floor time and delays to consider even nominations that could be confirmed easily, grinding our progress to a halt. I hope that the Republican Senators and leadership will relent and end the year by making progress on these important nominations to put us on a better path for the next session.

THE TORTURE VICTIMS PROTECTION ACT

Mr. LEAHY. Mr. President, the U.S. Supreme Court recently granted certiorari in a case involving the Torture Victim Protection Act of 1991, TVPA, a law I supported from the earliest days following its introduction by Senator SPECTER in the summer of 1986. Senator SPECTER and I worked for years to see this historic human rights bill become law in 1991. Yet today I am concerned that the TVPA's crucial role in protecting human rights may be weakened or even rendered meaningless. The Supreme Court case, *Samantar v. Yousuf*, may decide the fate of this landmark law.

The TVPA provides a Federal cause of action against any individual who subjects any person to torture or extrajudicial killing. This cause of action is available where the individual acts under actual or apparent authority, or under color of law of any foreign nation. Congress passed the TVPA in response to widespread use of official torture and summary executions that took place around the world, despite the universal consensus condemning such practices. Congress recognized that neither Federal nor international law was strong enough to curb such egregious human rights abuses. We enacted the TVPA to ensure accountability for those who commit atrocious violations of human rights.

The case currently before the Supreme Court, *Samantar v. Yousuf*, raises the question of whether the Foreign Sovereign Immunities Act, FSIA, allows an action filed under the TVPA

to be brought against a former government official of a foreign country who is now living in the United States. The answer is clear in the TVPA and its legislative history. The answer is yes. Congress expressly intended the TVPA to apply against former government officials. In enacting the TVPA, Congress made it explicit that the FSIA would almost never provide a defense to such persons. They can be sued under the TVPA to recoup damages caused by their torturous actions.

The Senate clearly stated its intention to ensure that the TVPA operated in concert with existing law, specifically taking into account the FSIA, the Alien Tort Claims Act, and the United Nations Convention Against Torture, which the United States signed in 1988. This point was discussed extensively as we drafted and refined the legislation. The operation of the TVPA was considered in a hearing held by the Judiciary Committee's Subcommittee on Immigration and Refugee Affairs in June 1990. The committee was not oblivious to the concerns raised at the time by the executive branch regarding sovereign immunity. We were cognizant of the role of the executive to manage foreign policy. We addressed each of these concerns in turn, but we were not persuaded that they outweighed the importance of creating a private cause of action under the TVPA. The full Congress agreed when it enacted the TVPA in March 1992.

The TVPA was drafted, in part, in response to gaps in two existing laws: the Alien Tort Claims Act and the Convention Against Torture. In deciding whether the Alien Tort Claims Act could be used by victims of torture committed abroad, one Federal judge expressed concern that separation of powers principles required an explicit grant by Congress of a private right of action for lawsuits that affect foreign relations. The Alien Tort Claims Act did not have such an explicit grant. Congress responded by enacting the TVPA with an unambiguous basis for a cause of action.

Similarly, the United States signature on the Convention Against Torture was an important and symbolic step in the prevention of torture, but the Convention fell short of the TVPA in at least two important respects. First, the Convention required that signatories open their courts to suits for damages caused by torture in their own countries. That policy was welcome but insufficient. The TVPA allows torture victims to sue their abuser without returning to the country of abuse. Congress took this step because it believed that governments that had allowed torture to occur within their jurisdiction would not necessarily provide meaningful redress to victims. Furthermore, torture victims who escaped from the country of abuse

would not eagerly return to that country to file suit. Congress designed the TVPA specifically to respond to that situation by opening U.S. courts to these cases and providing a civil cause of action here in the United States for torture committed abroad.

Second, by creating a Federal cause of action in our own courts, Congress ensured that torturers would no longer have a safe haven in the United States. The legislation served notice to individuals engaged in human rights violations that their actions were anathema to American values and they would not find shelter from accountability here.

Congress explicitly drafted the TVPA to strengthen and expand the scope of action that victims of torture could take in our courts, but Congress was nonetheless conscious of the bill's limits. The TVPA was not meant to override traditional diplomatic immunities or the FSIA's grant of immunity to foreign governments. The act struck a balance. It protected well established notions of sovereign and diplomatic immunities for current political actors without creating a safe haven for the perpetrators of horrible acts after they left their official positions and settled in, or fled to, the United States.

For example, Congress carefully created the cause of action against an "individual" to ensure that foreign states or their entities could not be sued under the act under any circumstances. Similarly, we discussed at length the fact that the legislation would not permit a suit against a former leader of a country merely because an isolated act of torture occurred somewhere in that country. But Congress neither intended nor imagined that the FSIA would provide former officials with a defense to a lawsuit brought under the TVPA. Such an interpretation would undermine the purpose of the law. The TVPA was not intended to cover the torturous acts of private individuals. To the contrary, in order for a defendant to be liable under the TVPA, the torture must have been taken "under actual or apparent authority or under the color of law of a foreign nation." The Judiciary Committee explicitly stated in its report on the bill that, "the FSIA should normally provide no defense to an action taken under the TVPA against a former official."

I hope that the Supreme Court studies this definitive and comprehensive history as it considers the case of *Samantar v. Yousuf*. Congress clearly intended the TVPA to extend to former officials of foreign countries if they choose to come to the United States after leaving their positions of authority. Congress also stated that the FSIA does not extend immunity to such individuals. Claims that a suit brought against a former official would undermine the FSIA and endanger foreign relations are simply inaccurate. Congress properly weighed the foreign policy concerns when it passed the TVPA.

The Supreme Court should not overrule the well-considered judgment of Congress.

DETERIORATING SITUATION IN NEPAL

Mr. LEAHY. Mr. President, over the years, both during and since the end of the monarchy in Nepal, I have urged the Nepal Army to respect human rights and cooperate with civilian judicial authorities in investigations of its members who abuse human rights. I spoke on this subject a few days ago in relation to the horrific case of Maina Sunuwar, a 15-year-old Nepali girl who was tortured to death by Nepal Army officers who then sought to cover up the crime.

I have also, similarly, urged the Maoists to stop committing acts of violence and extortion against civilians, respect human rights, and work to improve the lives of the Nepali people through the political process. The fact that the Maoists laid down their arms and entered into a peace agreement gave the Nepali people the first chance in Nepal's history to build a democratic government that is responsive to their needs.

It is therefore disheartening that the Maoists continue to engage in tactics that serve little purpose but to make the lives of the Nepali people, already difficult, even harder. They have just staged their latest general strike, which for the past 3 days crippled Nepal's economy.

For 3 days, Nepal, already a poor country, neither imported nor exported goods through its land entry points, causing a significant loss of revenue. Tourism, one of Nepal's most important sources of income for hotels, shops, transport, restaurants, and guide services, has been damaged. The garment industry, also among Nepal's largest, was brought to a halt. And there is the risk that foreign companies will decide that Nepal is still too unstable, and look elsewhere to invest.

What possible good does this kind of protest do? It angers and hurts the very people whose interests the Maoists claim to serve. In fact, it hurts poor people the most, because they and their children do not have savings, and go hungry. And it can hardly make other political parties more likely to accede to the Maoists' demands.

The latest news is that the Maoist leaders have threatened an indefinite national strike unless the government puts in place within a month a unity government headed by the Maoists. This kind of ultimatum, which has no place in a democracy, would be disturbing enough if it were not for the fact that the Maoists headed a coalition government last year after winning national elections, only to leave the government in May when it failed to replace the then army chief of staff.

I also felt that Nepal needed a new army chief who was not tainted by past abuses, but for the Maoists to quit the government and then accuse the President of forcing them to do so when their demands were not met, was irresponsible. Today, in fact, Nepal has a new army chief. Time will tell if he is the right person for the job.

As an observer of developments in Nepal, I have been encouraged by the positive steps the country has taken since the events that led to the end of the monarchy. But the desires that led to that courageous demonstration of popular will remain unfulfilled. The institutions of democracy are barely functioning and the political situation continues to deteriorate. Only 5 months remain until the deadline for drafting a new constitution, and growing distrust between the political parties threatens to derail the peace process. Indeed, the political parties have often seemed more concerned with promoting their own interests than with addressing the needs of the Nepali people. The army has yet to reform. Thousands of Maoist ex-combatants need to be demobilized and trained for jobs in the civilian workplace. Unless the political parties take decisive steps to work together to address these issues, the situation will go from bad to worse, and at some point the Nepali people may again take matters into their own hands.

In the meantime, the periodic economic shutdowns and acts of violence and intimidation perpetrated by the Young Communist League, cause one to question whether the Maoist leaders understand or accept the responsibilities that are inherent in a democracy. Rather than orchestrating acts of collective punishment to try to force a result, the Maoists need to earn the public's trust and respect. There is also the responsibility to exercise power in a manner that strengthens, not erodes, popular support. So far, the Maoists have failed to demonstrate a capacity for either.

The Communist Party of Nepal—Maoist—today remains a designated foreign terrorist organization under U.S. law. I am among those who would like to see that designation lifted, as I believe the U.S. could, through technical assistance and exchange programs, help the Maoist leaders to better understand the benefits of working constructively within the democratic process on behalf of the Nepali people. But the fact remains that having engaged in acts that got them onto the list in the first place, they need to demonstrate that they have abandoned those tactics and are accountable to the people. Organizing harmful strikes that serve no logical or legitimate purpose, encouraging acts of violence, refusing to punish its own members who committed atrocities, and making threats, are not consistent with a responsible political organization.

Mr. President, poverty and injustice have been a fact of life in Nepal for centuries. Three and a half years ago the Nepali people rose up against a corrupt, abusive monarchy and demanded something better. They are still waiting, but they will not wait forever. Like Nepal's other political parties, the Maoists will be judged by what they deliver.

FATE OF HMONG REFUGEES

Mr. LEAHY. Mr. President, I want to speak briefly about a worrisome humanitarian situation that is developing in Thailand, which could cause problems for our relations with the Thai military.

Thailand and the United States are longtime friends and allies, and our Armed Forces have developed a cooperative relationship. Many Thai military officers have been trained in the United States, and Thai soldiers have participated in joint U.S.-Thai training exercises such as Operation Cobra Gold. I expect this relationship to continue. But I am very concerned, as I know are other Senators, that the Thai Government may be on the verge of deporting roughly 4,000 ethnic Hmong back to Laos where many fear persecution.

Thailand has a long history of generosity towards refugees from Burma, Laos, Cambodia and Vietnam. It is a history to be proud of. But the Thai Government, which insists that the Hmong are economic migrants who should be repatriated, has reportedly deployed additional troops to Phetchabun province where most of the Hmong are in camps. There is a growing concern that the Thai military may expel the Hmong before the end of the year. There is also concern that a group of 158 Hmong in Nongkhai province, who have been screened and granted United Nations refugee status, could be sent back to Laos. I understand that the United States and several countries have told the U.N. High Commissioner for Refugees and the Thai Government they are prepared to consider this group of refugees for resettlement. Potential resettlement countries should be given an opportunity to interview these individuals in Thailand.

It may be that some of the 4,000 Hmong are economic migrants. It is also likely that some are refugees who have a credible fear of persecution if they were returned to Laos. I am aware that many Hmong fought alongside the U.S. military during the Vietnam war. The U.N. High Commissioner for Refugees, working with Thai authorities, needs to determine who has a legitimate claim for asylum and who does not, in accordance with long-standing principles of refugee law and practice. No one with a valid claim should be returned to Laos except on a voluntary basis. The United States, and other

countries, can help resettle those who do have valid claims but need access and the opportunity to consider relevant cases.

I mention this because I cannot overstate the consternation it would cause here if the Thai Government were to forcibly return the Hmong to Laos in violation of international practice and requirements. The image of Laotian refugees including many who the United Nations and the Thai Government itself have stated are in need of protection being rounded up by Thai soldiers and sent back against their will during the Christmas season, and the possible violence that could result, is very worrisome. On December 17 I joined other Senators in a letter to the Thai Prime Minister about this, and I will ask that a copy be printed in the RECORD at the end of my remarks.

As chairman of the Department of State, Foreign Operations, and Related Programs Subcommittee of the Appropriations Committee which funds international assistance programs, I have supported U.S. military training programs and other assistance to the Thai military. We share common interests and want to continue to work together. But after the deplorable forced repatriation to China of Uighur refugees by Cambodian authorities last week, we expect better of the Thai Government. Should the Hmong be treated similarly it could badly damage the Thai military's reputation, and put our military collaboration at risk.

Mr. President, I ask unanimous consent to have printed in the RECORD the December 17, 2009 letter to which I referred.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, December 17, 2009.

MR. ABHISIT VEJAJIVA,
Prime Minister, Kingdom of Thailand, Wisconsin Ave., N.W., Washington, DC.

DEAR MR. PRIME MINISTER, We are writing to express our concern regarding reports of a possible repatriation to Laos of Lao Hmong from the Huay Nam Khao camp and Nong Khai detention center in Thailand. While we recognize that the Kingdom of Thailand is burdened by the large number of refugees it hosts on its territory, we encourage you to not take steps to repatriate any individuals to Laos at this time. Thailand is a strong ally of the U.S., and the cooperation between our governments, including a history of working together on Laotian and Burmese refugee issues, is greatly valued.

We understand that your government has conducted screenings in the Phetchabun camp in Huay Nam Khao to identify and separate refugees meriting protection from those migrating for primarily economic reasons. We remain concerned, however, regarding the lack of transparency in this screening process, and the absence of a civilian entity to lead it. In July of this year, a group of Senators sent a letter to General Songkitti Jaggabatarat requesting more information about the criteria and methods used in screening Laotian Hmong in the

Phetchabun camp, but a response to this inquiry has not yet been received.

We acknowledge the difficulty that this issue has posed for both your country as well as the inhabitants of the camps. However, we believe that the lack of transparency in the screening and repatriation process only exacerbates these difficulties and heightens international concern regarding these populations. A process that adheres to the core tenets of the refugee convention, and is conducted by an independent third party organization, could resolve much of this concern by helping to ensure that the Lao Hmong are able to provide a full and accurate account that can serve as the basis for an appropriate status determination.

Before repatriating any individuals to Laos, we strongly urge your government to work with an independent third-party organization to conduct a transparent screening process consistent with international standards. Once such a process is in place, we hope that any Hmong determined to have refugee status will be provided opportunities for third country resettlement. This includes the individuals at the Nong Khai center, who have already been screened by the United Nations High Commissioner for Refugees. For those who are not judged to require protection, we encourage you to work with international organizations and the governments of the U.S. and Laos to establish a repatriation process that includes effective third party monitoring.

We also understand that Assistant Secretary of State Eric Schwartz will be visiting Thailand in the very near future. We hope that the U.S. and Thailand can work closely to find a solution that alleviates the burden of this situation on Thailand, as well as the concerns about the repatriation of those in need of protection, and we would be happy to consult with you on this process.

We appreciate your efforts to ensure a transparent process and just resolution to this issue. The Kingdom of Thailand remains a close ally of the United States and we look forward to working with your government to strengthen this important relationship.

Sincerely,

Russell D. Feingold, United States Senator; Barbara Boxer, United States Senator; Sheldon Whitehouse, United States Senator; Richard G. Lugar, United States Senator; Patrick J. Leahy, United States Senator; Lisa Murkowski, United States Senator; Amy Klobuchar, United States Senator; Mark Begich, United States Senator; Al Franken, United States Senator.

TRIBUTE TO LEWIS K. BILLINGS

Mr. HATCH. Mr. President, today I express my deep appreciation to a great Utahn and friend, Provo City Mayor Lewis K. Billings, whose tenure as mayor will soon come to an end. It has been my distinct pleasure to work with Mayor Billings over the past 12 years.

Nestled at the base of the Rocky Mountains, Provo was founded by rugged pioneers in 1849 and is one of the oldest cities in the West. Today, Provo is one of largest cities in the State of Utah. Mayor Billings and his beautiful wife Patti are longtime residents of Provo and raised eight wonderful children there.

Mayor Billings was elected Provo City Mayor in November 1997, after completing 3 years as chief administrative officer and director of community and government relations for the city of Provo. He and I share many of the same conservative values and principles and his service as mayor is a strong reflection of his dedication to those ideals. Mayor Billings will long be remembered for focusing on effective public safety and law enforcement, fiscal responsibility, economic development and job creation, neighborhood and downtown revitalization, the arts, emergency readiness, and a host of other local, regional, and national public policy issues. During his tenure, Provo City has consistently received national recognition for low crime rates, high quality of life, and positive business development.

Mayor Billings has accomplished a great deal during his tenure as Mayor of Provo. His dedicated public service and determination to shape Provo into the wonderful city it is today will be remembered for years to come. I ask my colleagues to join me and the citizens of the great State of Utah in thanking Mayor Billings for his many years of dedicated service. We all appreciate his efforts and service, but none so more than me.

GUN OWNERS SUPPORT GUN SAFETY LAWS

Mr. LEVIN. Mr. President, the debate surrounding gun legislation is often an acrimonious one, creating the perception that Americans are hopelessly divided on this policy issue. After listening to the positions of the National Rifle Association, NRA, a person could conclude that progress toward a national consensus on sensible gun legislation is a long way off. This perception, however, is just that: merely a perception. In reality, Americans of all political stripes share much common ground when it comes to issues of gun safety, and I am hopeful that this consensus will produce tangible legislative results.

In a recent poll conducted by well-known pollster Frank Luntz, NRA members and non-NRA gun owners expressed strong support for a number of proposed gun safety laws. These gun-owning Americans did not see a contradiction between supporting legislative efforts to reduce gun violence and their right to bear arms. Specifically, 85 percent of non-NRA gun owners and 69 percent of NRA gun owners supported closing the "gun show loophole" by requiring all gun sellers at gun shows to conduct a Brady criminal background check on prospective purchasers. In addition, 86 percent of non-NRA gun owners and 82 percent of NRA members favored a proposal to prevent individuals listed on a terrorist watch list from purchasing firearms. Seventy-

four percent of non-NRA gun owners and 69 percent of NRA members also agreed with this statement: “the federal government should not restrict the police’s ability to access, use, and share data that helps them enforce federal, state, and local gun laws.”

At first glance, these polling numbers may not seem very surprising. After all, these gun safety proposals are founded on common sense and are crafted to keep firearms out of the hands of criminals and terrorists. Unfortunately though, the NRA leadership continues to oppose three Federal gun safety bills that, according to the recent poll, their own members support: the Gun Show Background Check Act, S. 843, which would close the “gun show loophole;” the Denying Firearms and Explosives to Dangerous Terrorists Act, S. 1317, which would prevent individuals listed on terrorist watch lists from purchasing a gun; and the Preserving Records of Terrorist and Criminal Transactions Act, S. 2820, which would improve the ability of law enforcement agencies to prevent gun violence by increasing the amount of time gun background check records are kept.

I support these sensible gun safety measures, and as the polling indicates, so do a majority of American gun owners, including NRA members. The NRA is not only out of touch with mainstream America, they also are out of touch with their own members. It is time to set aside the false claims that too often cloud the debate surrounding gun safety. There is an overwhelming consensus in America: the time to pass commonsense gun safety legislation is now.

SMALL BUSINESS LENDING ENHANCEMENT ACT OF 2009

Mr. UDALL of Colorado. Mr. President, as our Nation begins its economic recovery, our unemployment numbers still remain far too high. Too many Americans are unable to find work, which only slows the pace of our emergence from recession. As part of my continuing effort to support tailored, fiscally responsible methods to getting our economy back on track, I am proud to discuss a bipartisan bill that I introduced this week with several of my Senate colleagues from both sides of the aisle.

The bill is the Small Business Lending Enhancement Act of 2009, which is cosponsored by Senator SCHUMER, Senator LIEBERMAN, Senator SNOWE, Senator BOXER, Senator COLLINS, and Senator GILLIBRAND. If enacted, this legislation would immediately allow increased lending for small businesses to the tune of billions of dollars. It would do so in a safe and fiscally responsible way, without calling on the Federal Government to spend a dime. And best of all, it could lead to large-scale job

creation in my home State of Colorado and around the country. For these reasons, I hope that our Senate colleagues join us in urging swift passage of this common-sense legislation.

Small businesses are the engine of our Nation’s economy. In the last 15 years, small businesses have generated nearly two-thirds of all new jobs created in the United States, and they currently employ more than half of the American workforce.

However, small businesses continue to struggle accessing credit, as large banks have significantly cut back on Main Street lending. According to a recent Treasury Department report, the 22 banks that have received the most funding through the Troubled Asset Relief Program, TARP, cut their collective small business loan balances by \$11.6 billion from April through October of this year.

America’s community banks, which by-and-large did not receive Federal bailout funds, are doing all they can to fill the Main Street credit vacuum created by these large financial institutions. While this legislation I have authored is aimed at helping credit unions ramp up their small business lending, I have also joined with many of my colleagues this year in support of a number of initiatives that will help community banks increase lending to small businesses.

The Small Business Lending Enhancement Act will further these efforts to free up credit for small business. Under current statute, credit unions are required to limit member business lending to 12.25 percent of the credit union’s total assets. This bill would raise that cap to 25 percent of total assets, and increase the minimum business loans subject to the cap from \$50,000 to \$250,000. These provisions would increase the amount that credit unions already offering business loans could provide to small businesses, while also encouraging more credit unions to enter the business loan market. Under current law, many credit unions find it difficult to start member business lending programs because the cost of meeting high regulatory and staffing requirements is too expensive relative to the cap. Raising the member business lending cap would make it easier for credit unions to recover costs, and therefore would increase the number of credit unions able to start small business loan programs.

The Credit Union National Association estimates that these sensible reforms would increase small business lending by \$10 billion within the first year of their enactment, including an increase of nearly \$200 million in my home State of Colorado. This new access to credit would likely produce more than 100,000 new jobs nationwide within the first year of the bill’s enactment. That is the sort of pro-business, pro-jobs policy that we need.

Mr. President, these simple statutory changes would not increase Federal outlays one cent, but they would dramatically increase the amount of private capital available to small businesses to help make payroll, buy inventory, and expand and innovate. Moreover, these proposed statutory changes are safe and fully supported by the National Credit Union Administration, the independent Federal regulator with oversight of our Nation’s credit unions. To further ensure the safety and soundness of credit unions, this bill requires the NCUA to submit a semiannual report to Congress on the status of credit union member business lending, including any recommendations for legislative changes. In sum, this is a responsibly drafted bill that could help spur much-needed economic growth and job production.

Mr. President, we have to do all we can to responsibly unlock credit markets for small businesses in Colorado and throughout the country. I believe this legislation is an important piece of that effort. I look forward to working with my colleagues on both sides of the aisle to quickly pass the Small Business Lending Enhancement Act, and allow our nation’s small businesses to again set our country on a path toward job growth and further prosperity.

TAX EXTENDERS

Ms. LANDRIEU. Mr. President, as the Senate moves forward toward ending the debate on health care reform and recessing until the New Year, we leave some important legislation unfinished, including legislation that would extend a number of tax provisions that are set to expire on December 31 of this year. The House has already acted to extend a number of these expiring tax provisions, and I urge my colleagues on the Senate Finance Committee to work with Senator BAUCUS and Senator GRASSLEY to take up this legislation immediately when we come back from recess.

As part of this effort, I urge my colleagues to extend tax provisions, some of which are set to expire this year, that were enacted by Congress to aid the recovery of the gulf coast after the 2005 hurricane season. Hurricane Katrina devastated the gulf coast and recovery efforts to date have been delayed because of a continuing shortage of skilled construction workers, limited financing, and sustained increases in construction and insurance costs. These challenges have been compounded by the current economic crisis.

By extending a number of the tax provisions that were enacted as part of the Gulf Opportunity Zone legislation that Congress passed in 2005, a number of important projects, including low-income housing projects, will have adequate time to overcome development

challenges, and create more opportunities for displaced residents looking to return after the 2005 storms. This will result in more jobs and a faster recovery for the gulf coast. If Congress fails to act to extend the tax provisions of the GO Zone legislation, including the placed-in-service provision of the GO Zone low-income housing tax credit, at least 77 low-income housing projects in the Gulf Coast are at risk of not being completed.

Mr. President, I ask unanimous consent that a letter I wrote requesting an extension of the placed-in-service provision of the GO Zone low-income housing tax credit be included in any tax extenders legislation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,

Washington, DC, December 9, 2009.

Hon. MAX BAUCUS,

Chair, Senate Committee on Finance, Washington, DC.

Hon. CHARLES GRASSLEY,

Ranking Member, Senate Committee on Finance, Washington, DC.

DEAR CHAIRMAN BAUCUS AND RANKING MEMBER GRASSLEY: We write to request your support for extending the placed-in-service date for affordable housing developments in the Gulf Opportunity Zone.

As you know, GO Zone low income housing tax credits have been vital in our effort to restoring the number of affordable housing units along the Gulf Coast. Tough economic conditions, however, have prevented many of these projects from moving forward at the pace necessary to meet the placed-in-service deadline of January 1, 2011.

Together this bipartisan group of Gulf Coast senators has been working to extend this deadline for two years, to allow 77 low income housing projects in Louisiana, Mississippi, and Alabama to move forward and creating more than 13,000 construction-related jobs. This legislation would not allocate any new credits—it would merely provide additional time to take full advantage of the credits that were issued in the aftermath of the 2005 hurricanes.

Extending the place-in-service deadline is critical to improving the availability of affordable housing along the Gulf Coast. FEMA estimates that the 2005 storms destroyed or heavily damaged 82,000 rental units, of which 54,000 served low-income populations. During his August 27 visit to New Orleans, HUD Secretary Shaun Donovan emphasized the need to revitalize this housing and highlighted the importance of a placed-in-service extension.

With an extension, developers will be able to attract investors to their proposed developments, have adequate time to overcome financial barriers triggered by the current economic crisis, and create more opportunities for residents displaced by the 2005 hurricanes to return home. Without an extension, more than 6,000 units are unlikely to be completed. The loss of more than \$1 billion in economic activity—to the construction industry, suppliers, professionals, developers and others—would be a major blow to our states and the region.

Your initiative in helping the Gulf Coast to recover has been invaluable. It is our hope that the Senate Finance Committee will continue this leadership by including a

placed-in-service extension in a tax extenders bill or other legislation this year. We appreciate your consideration of this request.

Sincerely,

MARY L. LANDRIEU,

United States Senator.

DAVID B. VITTER,

United States Senator.

ROGER F. WICKER,

United States Senator.

THAD COCHRAN,

United States Senator.

CHRISTMAS OVERSEAS

Mr. JOHANNIS. Mr. President, I rise today to speak about those Nebraskans who will be overseas, in harm's way, this Christmas.

The job our young men and women in uniform do to protect our safety every day is magnificent. I have met with many of these young service men and women throughout my years of public service, and I know they represent the very best of America. During my time as Governor, it was truly an honor to command Nebraska's National Guard forces. They serve our country with immense valor, at the risk of their own lives. To them, we are all deeply grateful.

Christmas in wartime has always been a difficult time for troops and their families. The contrast is very great between Americans at home celebrating holiday cheer, and those on the front lines going about their regular day of danger. It is a contrast that we should be mindful of this season. I, and many of my fellow Nebraskans, will pause tomorrow to give thanks for the sacrifice of our troops, and pray that they get home safely. Their mission is just, and they are the most capable military in the world. Their presence is missed at this time more than any other but our pride, in them and their friends, is even greater than our sorrow at their absence.

So to those Nebraskans who are in harm's way this Christmas, and to all American forces, those who serve abroad to protect us here at home, I truly thank you. I hope it will be, in some small measure, a comfort on Christmas, to know that so many of your friends, family, and fellow Americans are safe and secure due to your service, and praying for you.

So today, as always, I wish you all a safe return, and a very Merry Christmas.

AMERICAN HIKERS DETAINED BY IRAN

Mrs. BOXER. Mr. President, I rise today to renew my appeal to the Government of Iran to immediately release the three American hikers—Shane Bauer, Sarah Shourd, and Josh Fattal—who were detained by Iranian authorities in July.

According to available information, the three young adults, who are all

graduates of the University of California, Berkeley, inadvertently crossed an unmarked border into Iran while hiking in the Kurdistan region of northern Iraq.

Shane, Sarah and Josh have now been held in semi-isolation for over 140 days without charge, access to legal representation, or information on the current status of their case and future proceedings. This is deeply troubling and incredibly difficult for their families.

I recently spoke to the Iranian Ambassador to the United Nations on behalf of the hikers to reiterate my call for their release. I also asked that they be able to call their families and continue to be visited by Swiss consular officials.

During this holiday season, Americans from all walks of life are celebrating and renewing ties of family, friendship, and good will.

The extended absence of these young Americans from their families is particularly painful during such a festive time. As such, I call upon the Iranian authorities to immediately release Shane, Sarah and Josh so that their families can welcome them home.

20TH ANNIVERSARY OF THE U.S. ARMY SPECIAL OPERATIONS COMMAND

Mrs. HAGAN. Mr. President, this month, the U.S. Army Special Operations Command, USASOC, celebrates 20 years of service to the Army and Nation. Having been at war for over one-third of that time, the men and women of USASOC continue to make great contributions worldwide with an operations tempo that has never been greater. USASOC remains committed to maintaining the world's finest ground special operations force. Its personnel take quiet professional pride in executing each mission with excellence, honor and valor.

I am proud that USASOC's headquarters are in North Carolina. USASOC Commander LTG John Mulholland has done a tremendous job in training, organizing, and equipping Army Special Forces units, capable of conducting global Special Operations missions. Army Special Forces units perform a variety of missions, including special reconnaissance, psychological, civil affairs, unconventional warfare, foreign internal defense, direct action, counterterrorism, and counterinsurgency.

The principle units that make up today's USASOC include the John F. Kennedy Special Warfare Center and School, U.S. Army Special Forces Command, 75th Ranger Regiment, 160th Special Operations Aviation Regiment, 3rd and 7th Special Forces Group, 4th Psychological Operations Group, 95th Civil Affairs Brigade and the 528th Sustainment Brigade.

Since its inception on December 1, 1989, the pace of USASOC's operations has been extraordinary; operating around the world, often behind-the-lines, in some of the most remote and hostile regions on the planet.

At more than 27,000 personnel, USASOC is only 5 percent of the U.S. Army. However, USASOC is the largest of the service components that make up U.S. Special Operations Command, USSOCOM, and provides approximately 70 percent of the special operations personnel in Central Command's theater and approximately 63 percent of America's total overseas military commitments. USASOC provides trained and ready Army special operations forces to support the Geographic Combatant Commanders, GCC, the Theater Special Operations Commands, TSOC, and Ambassadors throughout the world.

Today the operations tempo for Army Special Operations has never been greater, and is unlikely to decrease in the near future. USASOC currently has soldiers deployed on 103 Missions in 56 countries around the world, and is operating across the spectrum of operations.

Currently 222 of the Army's 228 Continental United States-based Special Forces operational detachments "A"—ODA—are committed to supporting operations worldwide, either deployed or preparing for deployment. USASOC's ability to manage the high operations tempo is directly attributable to the caliber of its personnel. The range of skills within USASOC is embraced by a spectrum of Army unconventional units.

I would like to take this opportunity to highlight the great contributions of USASOC units currently in theater, particularly the 3rd and 7th Special Forces Groups in Afghanistan, the 95th Civil Affairs Brigade and the 4th Psychological Operations Group in Iraq and Afghanistan.

President Obama has stated in his agenda for defense, "We must build up our special operations forces, civil affairs, information operations and other units and capabilities." The demand for special operations personnel, skills and training remain high. Faced with often desperate, unconventional enemies, our approaches for defeating them involve unwavering commitment combined with unique unconventional skills.

USASOC's expertise ensures the Army's special operations forces can execute the most lethal, highly complex and sensitive special operations, wage unconventional warfare, conduct high risk helicopter operations, or prosecute civil military and influence operations.

For those in today's USASOC, the pace is fast, the challenges great, but morale and job satisfaction have seldom been greater. The command's motto, "Without Equal", captures the

spirit of its personnel and their commitment to maintaining the world's finest ground special operations force.

The command's missions, however, have not come without a sizable cost in lives lost. In the 8 years since the start of Operation Enduring Freedom and Operation Iraqi Freedom, 244 of USASOC's personnel have made the ultimate sacrifice. Their names are cast in bronze on a wall in USASOC's Memorial Plaza at Fort Bragg, NC.

In closing, the performance and contributions of Army Special Operations Forces in the Central Command theater of operations and around the world have been nothing short of magnificent. Whether in Iraq and Afghanistan, the Philippines, Trans-Sahara Africa or wherever friends and partners find themselves challenged by the forces of disintegration, oppression and extremism, Army Special Operators from across the Command's formations are unquestionably among America's most relevant answer to the threats our Nation faces.

TRIBUTE TO JIM PITCOCK

Mr. PRYOR. Mr. President, today I rise to honor the career of Jim Pitcock, a valuable staff member and more importantly a valuable part of the Arkansas community. Jim has been faithful and selfless in his service to the State of Arkansas, and his contributions will be sorely missed by me, my staff, and the many Arkansans who have had the great fortune of working with this wonderful public servant.

Jim has served on my staff from the very first day of my tenure as a Member of the U.S. Senate. His knowledge of the State of Arkansas and government has guided some of my most important decisions and for that I will be forever grateful. His wise, steady counsel is always held in high esteem. Jim has served several roles on my staff. His most recent role as senior caseworker has benefitted the people of Arkansas by assisting individuals, businesses and organizations that are experiencing difficulties with Federal agencies. Jim's leadership has set an expectation of excellence in constituent services.

Prior his work in the U.S. Senate, Jim was already a legend in Arkansas. He served as news director at Channel 7 in Little Rock for more than 30 years. During this time, Jim established an unprecedented system of archiving news coverage for historical purposes. Jim has witnessed and archived news from Governors Faubus to Huckabee and Presidents Johnson to Clinton. He also provided critical coverage of major events in our State, such as the Damascus missile explosion, the Cuban refugee crisis and the great Arkansas Texas shootout football game of 1969. Following his departure from television, I was privileged to have Jim

join my staff in the Arkansas attorney general's office in 2001 serving as the public information officer.

After so many years of faithful service to the people of Arkansas, Jim Pitcock has made a decision to retire from the Senate and his presence will be missed. He will continue to be a friend and adviser to me and I wish him all the best of luck as he begins this new chapter in his life.

Mr. President, I ask my colleagues to join me in celebrating the outstanding career and service of Jim Pitcock to the U.S. Senate and the State of Arkansas.

THREE SISTERS SCENIC BIKEWAY

Mr. WYDEN. Mr. President, too many of our communities are hemorrhaging jobs. That is especially true in rural areas, where industries have suffered and companies have had to let lots of people go. In Oregon, for example, changes in forest policy have hit rural communities particularly hard in recent years. I am constantly working to find solutions that will help those communities not just survive but thrive.

It is indisputable that many rural communities and small towns in Oregon contain some of the most beautiful scenery in America. When I look at their future, I see that the scenic beauty and solitude of beautiful places like Sisters, OR, which sits in the shadow of the Cascade Mountains, can be a big engine to drive the economy. Investments in amenities like parks and scenic bikeways can be valuable for communities because they aren't fleeting. They build infrastructure that lasts for generations. The beauty of nature, especially out in the countryside, attracts tourists—particularly bicyclists.

The League of American Bicyclists estimates that biking contributes \$133 billion per year to our national economy, provides 1.1 million jobs, and generates \$17.7 billion in Federal, State, and local taxes. They estimate that another \$46.9 billion is spent on meals, transportation, lodging, gifts, and entertainment during bike trips and tours.

Savvy entrepreneurs in Oregon have come together to capitalize on the benefits that being a destination for bicyclists can bring to a community. Cycle Oregon—called "the best bike ride in America"—attracted 2,200 people from 44 States and 11 foreign countries to its 2008 ride, which took hardy bicyclists through some of Oregon's most beautiful sites. But it is not just Oregon entrepreneurs who have figured this out. It is a nationwide phenomenon. Bloomington, Indiana's "Hilly 100 ride," for example, draws 5,000 riders and over \$1 million in lodging and food sales. And in Iowa, the week-long Register's Annual Great Bicycle Ride Across Iowa has become so

popular that last year, they had to turn people away after more than 9,000 applied to cycle across the State.

It is often through outdoor events like bike races that you will find a CEO or company leader visiting Central Oregon on a vacation and having the brainstorm that it would make a great place to locate a new enterprise. Many high-tech companies, for example, are locating in places with unique, scenic beauty to set them apart from their competition in the big cities and to give them an added bonus to attract the talent they need to succeed.

I thought there must be a way to tap the full recreation potential of central Oregon and create a model that could be replicated in other parts of the country. So, 2 years ago I asked recreation leaders in Deschutes County to look at how recreation could add value to its recreation assets, creating the strongest possible engine for economic development.

Since then, the Sisters area has decided that much of its economy is tied to broadening the set of recreation experiences they can offer to visitors. They have developed many miles of new, spectacular mountain bike trails in the cascade foothills of Peterson Ridge as part of that effort. They see the development of a better cycling route to Bend as a vital addition to the menu of recreation opportunities in the area.

Community and business leaders from across Deschutes County have worked for the past two years on ideas like those developed in Sisters. They came together recently to formally launch an effort to create the Three Sisters Scenic Bikeway—a scenic bike route connecting each of the cities in that county, via cycling-friendly routes that take you past spectacular scenery.

Government officials are pitching in too. The Oregon Department of Transportation and the U.S. Forest Service are working together to implement the committee's vision of a paved bike path connecting Bend to Sunriver. The Forest Service is about halfway through their decision making process on a paved path from Sunriver out to Lava Lands Visitors Center, and ODOT is pursuing a variety of funding options to get the work done while crews are still working on the major reconstruction of Highway 97 nearby.

As we rebuild our country's infrastructure and seek new ways to create jobs, we would do well to follow the lesson of Deschutes County and The Three Sisters Scenic Bikeway. It was an idea that was first proposed by concerned members of the community. It answers local needs and they have a lot of confidence it will work. And as representatives of those communities, my colleagues and I have the ability to help water the seeds of those ideas when government can help out.

This kind of collaborative effort by local groups can be the kind of national model other struggling rural communities should consider as they work to rebuild their infrastructure and economies. Cities across America are realizing that investing in outdoor recreation options like bikeways is an affordable way to significantly improve their quality of life and, in the process, improve their competitiveness to attract new businesses and jobs.

It is time to remember that our infrastructure can't just be focused on ways to bring more cars onto our already stressed roads. Fixing highways and bridges is critically important, but for better health, relaxation, and the economic benefits they can bring, bikeways can also be part of the solution to fix our infrastructure and help revive struggling communities back home.

RESPONSE TO SLATE ARTICLE BY JACOB WEISBERG

Mr. GRASSLEY. Mr. President, I would like to address an article written by Jacob Weisberg for Slate magazine on December 12, 2009. This article is entitled, "Are Republicans Serious About Fixing Health Care? No, and here's the proof." In this article, Mr. Weisberg unfairly and misleadingly takes aim at my position in the current health reform debate.

The author reports that I have criticized the Reid bill for creating an "indefensible new entitlement" and that it "expands the deficit, threatens Medicare, and does too little to restrain health care inflation."

I don't dispute Mr. Weisberg attributing these criticisms of the Reid bill to me. But, Mr. Weisberg can't dispute these serious shortcomings of the Reid bill that I and other Members on this side of the aisle have been discussing on the Senate floor for the past weeks. In fact, both the nonpartisan Congressional Budget Office, CBO, and the independent Department of Health and Human Services, HHS, Chief Actuary have confirmed that the Reid bill would not only establish this indefensible new entitlement, but also represent the largest expansion of government-run health care in history. But let me go through each criticism of the Reid bill that Mr. Weisberg has correctly reported.

The Reid bill will expand the deficit. Mr. Weisberg identifies the 10-year CBO score of the bill to be \$848 billion, but that is comprised of 10 years of Medicare cuts and tax increases and only 6 years of outlays. So if he were intellectually honest, Mr. Weisberg would have used the cost of 10 years of outlays, which budget analysts assume to be closer to \$2.5 trillion. But the use of budget gimmickry does not end there when supporters of the Reid bill claim that it is deficit neutral.

One of the biggest problems in Medicare that we have to address in Con-

gress every year is the Medicare physician payment formula or the sustainable growth rate, SGR. Comprehensively fixing the SGR costs well over \$200 billion. Only providing a two-month temporary patch for the problem will result in a more than 20-percent drop in Medicare physician payments beginning in March of next year. To me and many other Members of Congress, health care reform includes fixing the SGR so that physicians can be assured of not facing drastic Medicare payment cuts year after year and so that beneficiaries can be assured of having access to physicians. But there is no SGR fix in the Reid bill. Do the math and you will see why. A comprehensive SGR fix of over \$200 billion would wipe away the \$132 billion in budgetary savings that the Reid bill is currently reported to have.

In fact, the Congressional Budget Office noted that the estimated cost of repealing the SGR and replacing it with a permanent freeze would be about \$207 billion once physician-administered drugs were removed from the calculation of the SGR formula. That was done in the physician rule that CMS finalized on October 30, 2009. However, according to CBO, the removal of those drugs from the SGR formula will increase Medicare's spending for physician services, as well as federal spending under TRICARE by \$78 billion over the 2010-2019 period. The net impact on the budget would be close to \$300 billion over 10 years, none of which is reflected in the Reid bill.

And let's take a look at what is in the bill. I certainly hope Mr. Weisberg did when he wrote his article. A good portion of the budgetary savings in the Reid bill is from the CLASS Act. This program apparently produces budgetary savings during the first 10 years, but only because no benefits pay out for the first 5 years. This makes the revenues outpace the program's outlays. But CBO has stated that outlays will outpace revenues after the first 10 years. This means that the CLASS act will result in deficit spending over the long run. In fact, the chairman of the Budget Committee, a Democrat, called the CLASS Act a massive government ponzi scheme. So this casts serious doubt on those who tout that the Reid bill is deficit neutral or saves money.

The Reid bill also threatens Medicare. I don't think Mr. Weisberg can argue that close to $\frac{1}{2}$ trillion in Medicare cuts won't jeopardize beneficiary access to care. Even the White House's own Chief Actuary confirmed that the Reid bill jeopardizes beneficiary access to care. He raised concerns in particular about two categories of these Medicare cuts. First, the Chief Actuary warned about the permanent productivity adjustments to annual payment updates. Under the Reid bill, these productivity adjustments automatically cut annual Medicare payment updates

based on productivity measures of the entire economy. Referring to these cuts, he wrote that “the estimated savings . . . may be unrealistic.” In his analysis of these provisions, Medicare’s own Chief Actuary stated, “it is doubtful that many could improve their own productivity to the degree achieved by the economy at large,” and that they “are not aware of any empirical evidence demonstrating the medical community’s ability to achieve productivity improvements equal to those of the overall economy.” In fact, the Chief Actuary’s conclusion is that it would be difficult for providers to even remain profitable over time as Medicare payments fail to keep up with the costs of caring for beneficiaries. Ultimately, the Chief Actuary’s conclusion is that providers who rely on Medicare might end their participation in Medicare, “possibly jeopardizing access to care for beneficiaries.”

The Chief Actuary even has numbers to back up these statements. His office ran simulations of the effects of these drastic and permanent cuts. And based on these simulations, the Chief Actuary found that during the first 10 years, “20 percent of Medicare Part A providers would become unprofitable as a result of the productivity adjustments.” That’s one out of five hospitals, nursing homes and hospices. It is for this reason that the Chief Actuary found, “reductions in payment updates based on economy-wide productivity gains, are unlikely to be sustainable on a permanent annual basis.”

The second category of Medicare cuts that the Chief Actuary raised concerns about would be imposed by the new Independent Payment Advisory Board created in the Reid bill. This is the new body of unelected officials that would have broad authority to make even further cuts in Medicare. These additional cuts in Medicare would be driven by arbitrary cost growth targets. This board would have the authority to impose further automatic Medicare cuts even absent any Congressional action. The Chief Actuary gave a reality check to this proposal. He showed how tall an order the Reid bill’s target for health care cost growth actually is. According to the HHS Chief Actuary, limiting cost growth to a level below medical price inflation “would represent an exceedingly difficult challenge.” He pointed out in this analysis that Medicare cost growth was below this target in only 4 of the last 25 years.

The HHS Chief Actuary also pointed out that the backroom deals that carved out certain types of providers would complicate this board’s efforts to cut Medicare cost growth. According to the analysis, “[t]he necessary savings would have to be achieved primarily through changes affecting physician services, Medicare Advantage payments and Part D.” So providers like hospitals will escape from this

board’s cuts at the expenses of doctors, seniors enrolled in Medicare Advantage plans and seniors who will pay higher premiums for their Medicare drug coverage. If we surveyed the nation’s seniors, I doubt very much they would say that raising their premiums for Medicare drug coverage or limiting preventive benefits in Medicare Advantage is what they would call health care reform.

And this board is guaranteed to have to impose these additional Medicare cuts. According to the Chief Actuary’s analysis of the Medicare cuts in the Reid bill, even though the Medicare cuts already in the Reid bill are “quite substantial” they “would not be sufficient to meet the growth rate targets.” So this means the board will be required by law to impose even more Medicare cuts in addition to the massive Medicare cuts already in the Reid bill. And this will make it even harder for our seniors to find providers who will treat them.

Not only does the Reid bill “[do] too little to restrain health care inflation,” it actually increases health care inflation. According to the HHS Chief Actuary, the Reid bill would bend the health care cost curve the wrong way. Over the next 10 years, the Administration’s own Actuary stated that “total national health expenditures under this bill would increase by an estimated total of \$234 billion.” As a result of that increase, health care would then be projected to grow from 17 percent to 20.9 percent of the gross domestic product in 2019. So using the Reid bill to curb health care cost growth would be like putting out a fire with gasoline.

The Chief Actuary also found that a good portion of the increase in national health expenditures would be caused by the so-called fees in this bill on medical devices, on prescription drugs and on health insurance premiums. He stated, that these “fees would be passed through to health consumers in the form of higher drug and device prices and higher insurance premiums.” This would result in, “an associated increase of approximately 11 billion dollars per year in overall national health expenditures.”

Higher premiums from the Reid bill are no trifling matter. In fact, one estimate concluded that the Senate bill would increase premiums by about 50 percent on average for individuals without employer-based coverage, and more than 20 percent for small businesses. And even the Congressional Budget Office’s more conservative analysis predicts that premiums will increase 10 to 13 percent for 14 million Americans as a result of the Reid bill.

But that is where my agreement with Mr. Weisberg ends. He then proceeds to lob several troubling and incorrect claims at me in his attempt to portray me as “incoherent.”

Mr. Weisberg distorts what I said in response to a constituent’s question at a town hall meeting in Iowa last August when he accuses me of playing the “age card.” This is what Mr. Weisberg claims that I said: “There is some fear, because in the House bill, there is counseling at the end of life. And from that standpoint, you have every right to fear.”

But this is what was actually said at that meeting:

Question from Iowan: “Thank you, Senator GRASSLEY, for coming. The Democrats tell us all the time that it’s a right of every American to have health care. Yet it seems this Obama plan will systematically deny those rights to certain groups like the elderly. And I, as a person in my 60’s I’m getting very concerned about the health care that I might be able to have if this bill passes. . . .”

Iowan Restating the Question: “Ok . . . [the question] involves limited coverage because of a person’s background and age, race, physical condition such as that. Basically it was on the lady’s age.”

Senator GRASSLEY: “[V]ery recently in things that we’ve been talking about in our negotiations has been just exactly what you brought up. I won’t name people in Congress or people in Washington, but there’s some people that think that it’s a terrible problem that Grandma’s laying in the hospital bed with tubes in her, and think that there ought to be some government policy that enters into that. I’m just on the opposite. I think that’s a family and a religious and or ethical thing that needs to be dealt with and there’s some fear because in the House bill there’s counseling for end of life. And from that standpoint, you have every right to fear. You shouldn’t have counseling at the end of life. You ought to have counseling 20 years before you’re going to die. You ought to plan these things out. And, you know, I don’t have any problem with things like living wills, but they ought to be done within the family. We should not have a government program that determines you’re going to pull the plug on Grandma. Thank you all very much for coming.”

Mr. Weisberg is not the first who has taken what I said during this exchange and twisted it to attempt to portray me as a fearmonger. And unfortunately he probably won’t be the last. What’s even more unfortunate is that Mr. Weisberg and those like him fail to see the legitimate cause for concern when you have a combination of the expanded role of government in health care generally plus funding for advance care planning consultations alongside cost containment proposals. Some commentators took my comments and twisted them and even quoted me as saying the House health care reform bill would establish death panels, and this was blatantly incorrect. As you can see from what was said at the town meeting, I said no such thing. As I said then, putting end-of-life consultations alongside cost containment and government-run health care causes legitimate concern.

And to address another point that Mr. Weisberg makes, a provision that provided for the option of advance care planning was in a bill I supported. In

2003, Congress enacted a narrow provision to offer coverage for hospice consultation services for Medicare beneficiaries who have been diagnosed as terminally ill. Under this provision, this consultation would be covered only when provided by a health care provider with expertise in end-of-life issues such as a hospice physician. The covered services include a pain and care management evaluation, counseling about hospice care and other optional services such as advice on advance care planning. This provision was designed to assure that advice on advance care planning in this context is only offered by qualified professionals and done in an appropriate manner.

In his article, Mr. Weisberg misses the point. The core of this issue is when it comes to advance care planning, what role, if any, the government should play. When the government attempts to influence these sensitive decisions, it raises the possibility that the government's interests may be different and potentially incompatible with the patient's interests.

When provisions to increase the government role in advance care planning are included alongside cost containment provisions, it raises the concern that the purpose for the proposal is to save money rather than to ensure appropriate care at the end of life. And that is in fact what has already happened. This idea of encouraging living wills was originally proposed by the Carter administration in 1977 as an option to produce both federal and system-wide savings in health expenditures. More recently, the Urban Institute published a paper in July 2009 that identified proposals like advance care planning consultations as a way to help cut costs to offset spending for health care reform. Compassion and Choices, formerly known as the Hemlock Society, has also advocated for the inclusion of advance care planning consultations in health care reform legislation. Minimizing such an important issue or trying to turn it into an amusing story as Mr. Weisberg has done debases the important discussion that needs to occur on this sensitive and personal issue.

Mr. Weisberg then criticizes Medicare Part D, which I championed, in his attempt to question my opposition to the Reid bill. In 2003, Medicare was 37 years old and functioning a lot like it had on day one. It emphasized treatment, not prevention, not disease management. It was a horse-and-buggy version of health care compared with the kind of coverage that other Americans received through their employers. Then, as now, employer-based health plans often covered prescription drugs. Employers realized it was cost-effective to pay for a relatively cheap cholesterol-lowering drug if it meant avoiding a triple bypass down the road.

But Medicare beneficiaries were stuck in 1965 when prescription drugs were less vital than they are today. And because Medicare didn't cover prescription drugs, they often were forced to forgo medications, pay out of pocket, try to find an affordable supplemental policy, or take a bus to Canada to get their medicines.

Republicans and Democrats alike agreed Medicare beneficiaries deserved 21st century health care coverage, including prescription drug coverage. However, there were still differences on how much the government could afford to spend on providing this new benefit. In May of 2002, Republicans put forth a \$350 billion proposal to provide comprehensive drug coverage to America's seniors. The Democrats thought this was insufficient and put forth their own proposal totaling close to \$600 billion. At the end of the day, the fiscal year 2004 budget resolution included a \$400 billion reserve fund for the creation of the drug benefit.

While there was bipartisan support for the drug benefit, Democrats nevertheless continued to argue that Congress should be spending more. For example, former Senator Bob Graham of Florida said, "Some would argue that this budget includes \$400 billion for a Medicare prescription drug benefit. They know full well that \$400 billion is inadequate to provide an affordable, comprehensive, universal prescription drug benefit for America's seniors." The late Senator Edward Kennedy stated, "This budget has far less funding than is necessary to provide a meaningful prescription drug benefit for all seniors." And Senator TOM HARKIN stated, "We need a budget that is balanced, that takes the approach that we need to reduce the debt to take care of the baby boomers and provide for a decent drug benefit for the elderly. Clearly, the \$400 billion proposed for prescription drugs and other medical reforms is far too low for that purpose." Congress eventually passed the Medicare Prescription Drug, Improvement, and Modernization Act of 2003, Medicare Modernization Act, Public Law 108-173, on a bipartisan basis and created the drug benefit that year. In contrast to the process we are witnessing this year on health care reform, the final conference report from the MMA passed the Senate with the support of 11 Democrats and one Independent. And yet I can't help but think that if the Democrats had their way on the total amount of spending almost twice as much on the drug benefit, then far more than this responsible bipartisan amount would have been spent. And certainly despite the criticism that the new drug benefit is often subjected to from the left, not even the most staunch opponents of Part D have proposed repealing the drug benefit for our Nation's seniors.

Now in addition to the bipartisan support for the creation of the benefit,

the vast majority of Medicare beneficiaries also like their prescription drug coverage. Survey after survey consistently shows that the benefit enjoys broad support from beneficiaries. According to Medicare Today, 88 percent of Part D enrollees are satisfied with the program. And the program has come in \$239 billion under budget. When was the last time you could say that about a government program? Furthermore, the fact that Medicare beneficiaries are able to obtain their prescription drugs and afford them means fewer hospitalization and emergency room visits when diseases like diabetes, heart disease, and pulmonary disease are properly managed with modern prescription drug therapy.

How is adding prescription drug coverage to Medicare different from the current health care debate?

Medicare was already 37 years old when Congress added prescription drug coverage. The Medicare structure was well-established. Congress worked in a bipartisan way to set aside the funding to improve the program and do so without disrupting the parts that already worked for tens of millions of people. Don't forget that 76 senators voted in favor of the Senate bill for the drug benefit including 35 Democrats and one Independent. We certainly can't say the same for the current health care reform effort in the Senate.

One key difference is the fact that the prescription drug benefit is purely voluntary, unlike the mandatory system of insurance coverage for everyone proposed in the current health reform bills that is backed up with the imposition of stiff fines on those who don't comply. Under the Medicare benefit, seniors who don't need prescription coverage or who don't see it is a good value for the premium don't have to get it. The drug benefit is provided and administered by private entities, which compete for beneficiaries' business. And this competition between plans has kept the overall cost of the program down.

And let's not forget what we were trying to do back in 2003 compared to what is happening in Congress now. Back in 2003, we were operating on a budget surplus, and there was bipartisan support to address a need by creating the Medicare drug benefit. The Medicare Modernization Act met this need.

The situation is totally different in 2009. We are now operating on record budget deficits. So the goal of any health reform legislation should be to bend the cost curve. But as the HHS Chief Actuary has established, the Reid bill fails to do so.

In response to those who say the drug benefit only added to Medicare's expenses, the Medicare Modernization

Act also expanded coverage of preventive services to emphasize less expensive prevention over more costly treatment. The law created a specific process for overall program review if general revenue spending exceeded a specified threshold. And it took the politically bold step of introducing the concept of income testing into Medicare, with higher income people paying larger Part B premiums beginning in 2007.

Also, Mr. Weisberg makes several additional points about Medicare Part D that are simply wrong. For example, he states that the government prohibition from negotiating drug prices with manufacturers only raises the Medicare Part D pricetag. CBO, the Chief Actuary, and noted economists have all found the exact opposite to be true. The Chief Actuary stated that "direct price negotiation by the Secretary would be unlikely to achieve prescription drug discounts of greater magnitude than those negotiated by Medicare prescription drug plans responding to competitive forces." And CBO has concluded that "the Secretary would be unable to negotiate prices across the broad range of covered Part D drugs that are more favorable than those obtained by PDPs under current law." Even the Washington Post editorial page has stated that "governments are notoriously bad at setting prices, and the U.S. government is notoriously bad at setting prices in the medical realm." What's more, the idea of private negotiation on drug costs originated with none other than President Bill Clinton. Under President Clinton's plan, he proposed that "[p]rices would be determined through negotiations between the private benefit administrators and drug manufacturers." President Clinton's plan was introduced on April 4, 2000 as S. 2342 by the late Senator Moynihan by request.

Mr. Weisberg also uses incorrect data to compare the 10-year cost of Medicare Part D and the Reid bill. Medicare Part D costs do not "dwarf" the Reid bill costs as Mr. Weisberg claims because the true 10-year cost of the Reid bill, as acknowledged by supporters of the bill on the Senate floor, is \$2.5 trillion and not the \$848 billion figure that he uses.

So attempting to portray me as being "incoherent" for opposing the Reid bill even though I championed the Medicare Modernization Act is absolute nonsense.

The Medicare Modernization Act did not impose a \$2½ trillion tab on Americans. It did not kill jobs with taxes and fees that go into effect 4 years before the reforms kick in. It did not kill jobs and lower wages with an employer mandate. It did not impose a half a trillion in higher taxes on premiums, on medical devices, on prescription drugs, and more. It did not jeopardize access to care with massive Medicare cuts. It did not impose higher health

care costs. And it did not raise health premiums for millions of Americans like the Reid bill will do.

Mr. President, I ask unanimous consent to have printed in the RECORD the December 12, 2009, Slate article by Jacob Weisberg.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Slate, Dec. 12, 2009]

ARE REPUBLICANS SERIOUS ABOUT FIXING HEALTH CARE?

(By Jacob Weisberg)

Iowa Sen. Charles Grassley, the top Republican on the Senate finance committee, has emerged as one of the harshest critics of what the right likes to call "Obamacare." After spending the first half of the year working with Democrats to find a bipartisan compromise, Grassley has spent the second half trying to prevent one. He attacks the bill now being debated on the Senate floor as an indefensible new entitlement. He complains that it expands the deficit, threatens Medicare, and does too little to restrain health care inflation. At a town hall meeting in August, the 76-year-old Iowan played the age card. "There is some fear, because in the House bill, there is counseling for end of life. And from that standpoint, you have every right to fear," he told an audience in John Wayne's hometown of Winterset.

One might credit the sincerity, if not the validity, of such concerns were it not for an inconvenient bit of history. Not so long ago, when Republicans controlled the Senate, Grassley was the chief architect of a bill that actually did most of the bad things he now accuses the Democrats of wanting. As chairman of the finance committee, Grassley championed the legislation that created a prescription-drug benefit under Medicare. The contrast between what he and his colleagues said during that debate in 2003 and what they're saying in 2009 exposes the disingenuousness of their current complaints.

Today the Medicare prescription-drug debate is remembered mainly for the political shenanigans Republicans used to get their bill through. Bush officials lied about the numbers and threatened to fire Medicare's chief actuary if he shared honest cost estimates with Congress. House Republicans cut off C-SPAN and kept the roll call open for three hours—as opposed to the requisite 15 minutes—while cajoling the last few votes they needed for passage. Former Majority Leader Tom DeLay was admonished by the House ethics committee for winning the eleventh-hour support of Nick Smith, a Michigan Republican, by threatening to vaporize Smith's son in an upcoming election. It's worth remembering these moments when Republicans criticize Democratic Majority Leader Harry Reid for his hardball tactics.

The real significance of that episode, however, is not their bad manners, but what Republicans ordered the last time health care was on the menu. Their bill, which stands as the biggest expansion of government's role in health care since the creation of Medicare and Medicaid in 1965, created an entitlement for seniors to purchase low-cost drug coverage. Grassleycare, also known as Medicare Part D, employs a complicated structure of deductibles, co-pays, and coverage limits. Thanks to something called the "doughnut hole," drug coverage disappears when out-of-pocket costs reach \$2,400, returning only when they hit \$3,850. Simply stated, the bill cost a fortune, wasn't paid for, is com-

plicated as hell, and doesn't do all that much—though it does include coverage for end-of-life-counseling, or what Grassley now calls "pulling the plug on grandma."

In their 2009 report to Congress, the Medicare trustees estimate the 10-year cost of Medicare D as high as \$1.2 trillion. That figure—just for prescription-drug coverage that people over 65 still have to pay a lot of money for—dwarfs the \$848 billion cost of the Senate bill. The Medicare D price tag continues to escalate because the bill explicitly bars the government from using its market power to negotiate drug prices with manufacturers or establishing a formulary with approved medications.

And unlike the Democratic bills, which won't add to the deficit, the bill George W. Bush signed was financed entirely through deficit spending. While Grassley and his colleagues accuse Democrats of harming Medicare through cost cuts, it is their bill that has done the most to hasten Medicare's coming insolvency. Between now and 2083, Medicare D's unfunded obligations amount to \$7.2 trillion according to the trustees. Numbers like these prompted former Comptroller General David M. Walker to call it "... probably the most fiscally irresponsible piece of legislation since the 1960s."

Grassley is not alone in his incoherence. Of 28 current Republican senators who were in the Senate back in 2003, 24 voted for the Medicare prescription-drug benefit. Of 122 Republicans still in the House, 108 voted for it. There is not space here to fully review this hall of shame, which includes Lamar Alexander of Tennessee, Mike Enzi of Wyoming, Kay Bailey Hutchison of Texas, and Orrin Hatch of Utah, among many others. Here is Kansas Republican Sam Brownback in 2003: "The passage of the Medicare bill fulfills a promise that we made to my parents' generation and keeps a promise to my kids' generation." Here is Brownback in 2009: "This hugely expensive bill will not lower costs and will not cover all uninsured." Here is Jon Kyl of Arizona: "As a member of the bipartisan team that crafted the Part D legislation, I am committed to ensuring its successful implementation. I will fight attempts to erode Part D coverage." Kyl now calls Harry Reid's legislation: "a trillion-dollar bill that raises premiums, increases taxes, and raids Medicare."

The explanation for this vast collective flip-flop is—have you guessed?—politics. Medicare recipients are much more likely to vote Republican than the uninsured who would benefit most from the Democratic bills. In 2003, Karl Rove was pushing the traditional liberal tactic of solidifying senior support with a big new federal benefit, don't worry about how to pay for it. Today, GOP incumbents are more worried about fending off primary challenges from the right, like the one Grassley may face in 2010, or being called traitors by Rush Limbaugh. But what happened the last time they were in charge gives the lie to their claim that they object to expanding government. They only object to expanding government in a way that doesn't help them get re-elected.

JUDICIAL NOMINATIONS

Mr. SESSIONS. Mr. President, as the first session of the 111th Congress comes to a close, I believe it is important to correct the record regarding the Senate's processing of judicial nominations. Despite the statements of some of my Democrat colleagues to the

contrary, the fact is we have been moving nominees at a fair and reasonable pace. The Judiciary Committee has held hearings for every one of President Obama's circuit court nominees and all of his district court nominees that are ripe for a hearing. At this point in President Bush's administration, 30 nominees had yet to even receive a hearing. As the numbers bear out, President Obama's nominees have fared far better.

Allegations that Republicans are delaying confirmation votes ring hollow. Democrats control 60 votes in the Senate and set the agenda for the floor. If my Democrat colleagues are dissatisfied with the pace of nominations, I suggest that they look to their leader. On Tuesday, the majority and minority leaders announced that we will vote on Judge Beverly Martin's nomination to the Eleventh Circuit Court of Appeals on January 20. As I have said many times before, Republicans have been ready and willing to proceed to a roll call vote on this nomination for months. I do not know the majority leader's reasons for not calling up the nomination sooner. Indeed, I do not claim to know the majority leader's reasons for not calling up a number of nominations. Perhaps in some cases it is because my Democrat colleagues do not want to have a debate on the merits and expose to the American people just what types of individuals the President has nominated to serve on the Federal bench and in crucial positions at the Justice Department. Or perhaps, and I sincerely hope that this is not the case, Democrats have been purposefully delaying nominees in order to create the illusion that Republicans are obstructing.

It bears mention that the average time from nomination to confirmation for nominees to the Circuit Courts of Appeal under President Bush was 350 days. And that was just the average. The majority of President Bush's first nominees to the circuit courts waited years for confirmation votes and some of them never even received a hearing, despite being highly qualified, outstanding nominees.

It has been suggested by some that roll call votes should not be required for judicial nominees, as if this is something that has never been done before. In fact, rollcall votes and time agreements for noncontroversial judicial nominees became routine in 2001, at the insistence of Chairman LEAHY and former Majority Leader Daschle. During the Bush administration, of the 327 article III judges confirmed by the Senate, 59 percent were by rollcall vote. The vast majority of those—86 percent—were consensus, noncontroversial nominees who were unanimously approved. In short, in 2001 the Democrats adopted a new standard: a presumption that all lifetime appointments receive a formal recorded

vote. There is no reason that presumption should change now simply because a Democrat is in the White House. Notwithstanding that new standard, I would be remiss if I did not point out that four of the last five judicial nominees that we have confirmed have been confirmed without rollcall votes.

Over the past month, the Senate has been consumed in a debate on a healthcare bill that would create an enormous entitlement program, the likes of which we have never before seen in this country. Tomorrow morning, the Senate will proceed to a vote on this monumental piece of legislation. It can hardly be said that it has been "business as usual" in the Senate. While Senators have been focused on health care, as they should be, Democrats have seen fit to slip through lifetime appointments to the Federal judiciary. Just last week, Chairman LEAHY scheduled a hearing for two Fourth Circuit nominees in the middle of this historic debate. Both Judge Diaz and Judge Wynn were nominated by the President on November 4, 2009. This is a quick turnaround for any circuit court nominee, and it is especially quick for a nominee to the Fourth Circuit. During the 110th Congress, despite the 33 percent vacancy rate and overwhelming need for judges, four nominees to that court were needlessly delayed: Mr. Steve Matthews, Judge Robert Conrad, Judge Glen Conrad, and Mr. Rod Rosenstein.

President Bush nominated Steve Matthews on September 6, 2007, to the same seat on the Fourth Circuit for which Judge Diaz has been nominated. Mr. Matthews had the support of his home state senators and received an ABA rating of Substantial Majority Qualified. He was a graduate of Yale Law School and had a distinguished career in private practice in South Carolina. Despite his exemplary qualifications, Mr. Matthews waited 485 days for a hearing that never came. His nomination was returned on January 2, 2009.

Another of President Bush's nominees, Chief Judge Robert Conrad, was nominated to the seat for which Judge Wynn is now nominated. He had the support of his home state senators and received an ABA rating of Unanimous Well-Qualified. Further, Judge Conrad met Chairman LEAHY's standard for a noncontroversial, consensus nominee because he previously received bipartisan approval by the Judiciary Committee and the Senate when he was confirmed by voice vote to be a U.S. Attorney in North Carolina and later to the District Court for the Western District of North Carolina. On October 2, 2007, Senators BURR and Dole sent a letter to Senator LEAHY requesting a hearing for Judge Conrad, and they spoke on his behalf at a press conference on June 19 that featured a number of Judge Conrad's friends and colleagues who had traveled all the

way from North Carolina to show their support for his nomination. That request was ignored. On April 15, 2008, Senators BURR, Dole, GRAHAM, and DEMINT sent a letter to Senator LEAHY asking for a hearing for Judge Conrad and Mr. Matthews. Despite overwhelming support and exceptional qualifications, Judge Conrad, who was nominated on July 17, 2007, waited 585 days for a hearing that never came. His nomination was returned on January 2, 2009.

Judge Glen Conrad also had the support of his home State Senators—including Democrat Senator JIM WEBB—and received an ABA rating of Majority Well-Qualified. He too met Chairman LEAHY's standard because he was confirmed to the District Court for the Western District of Virginia by a unanimous, bipartisan vote of 89-0 in September 2003. Despite his extensive qualifications, Judge Conrad, who was nominated on May 8, 2008, waited 240 days for a hearing that never came. His nomination was returned on January 2, 2009.

Earlier this year, we confirmed Judge Andre Davis to the "Maryland" seat on the Fourth Circuit. A brief history of that seat bears mention. President Bush nominated Rod Rosenstein to fill this vacancy on November 15, 2007. The ABA rated Mr. Rosenstein Unanimous Well Qualified, and in 2005, he was confirmed by a noncontroversial voice vote to be the United States attorney for the District of Maryland. Prior to his service as U.S. attorney, he held several positions in the Department of Justice under both Republican and Democrat administrations. Despite his stellar qualifications, Mr. Rosenstein waited 414 days for a hearing that never came. His nomination was returned on January 2, 2009. The reason given by his home state senators for why his nomination was blocked was that he was "doing a good job as the U.S. attorney in Maryland and that's where we need him." I think that a 2008 Washington Post editorial painted a more accurate picture: "blocking Mr. Rosenstein's confirmation hearing . . . would elevate ideology and ego above substance and merit, and it would unfairly penalize a man who people on both sides of this question agree is well qualified for a judgeship."

It was only when President Obama nominated Judge Davis to this seat that we heard Democrats' outrage over the fact that the seat had been vacant for 9 years. Ironically, however, Judge Davis fared far better than President Bush's nominees to the Fourth Circuit. He received a hearing a mere 27 days after his nomination, a committee vote just 36 days later, and, finally, confirmation earlier this year. There are other examples of Democrats' unreasonable delay and obstruction but I will not detail them here. Suffice it to

say that Democrats are now capitalizing on their eight years of obstruction by seeking to pack the Fourth Circuit Court of Appeals.

It has been said that the overall federal judiciary vacancy rate is higher than it was when President Bush was in office and therefore we need to confirm more judicial nominees. But, as the story of the Fourth Circuit obstructionism illustrates, that is a specious argument. During the Bush administration, Democrats held up qualified judicial nominees—for years in some cases—denying them an up-or-down vote even though the majority of Senators were ready and willing to confirm them. And, in any event, the need to fill vacancies should not undercut the responsibility of the Senate to properly vet these lifetime appointments. As the minority party, we have a duty and a right to ask the important questions that may not be asked by those who agree with the President's point of view.

In that regard, we can only process nominees that we have before us. President Obama has nominated only 12 circuit court nominees, all of whom have had hearings; there are currently 20 circuit court vacancies. Similarly, President Obama has nominated only 19 district court nominees, all but 6 of whom have had hearings; there are currently 78 district court vacancies. These numbers stand in stark contrast to the 65 nominees President Bush put forth during his first year in office.

I have said many times that I do not wish to engage in a back and forth on this issue but I will not stand by while some in this body attempt to rewrite history in their favor. Facts are stubborn things and despite the statements by some to the contrary, they cannot alter the state of the facts and the evidence.

NOMINATION HOLDS

Mr. GRASSLEY. Mr. President, I, Senator CHUCK GRASSLEY, intend to object to proceeding to the nominations of Lael Brainard to be Under Secretary of the Treasury, Michael Mundaca to be an Assistant Secretary of the Treasury, Mary Miller to be an Assistant Secretary of the Treasury, and Charles Collins to be an Assistant Secretary of the Treasury.

My support for the final confirmation of these nominees will rest on the response to concerns I have with respect to Internal Revenue Code section 6707A. A letter outlining these concerns was sent to both Secretary Geithner and Commissioner Shulman on December 22, 2009, and I ask unanimous consent that my letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, DC, December 22, 2009.

Hon. TIMOTHY F. GEITHNER, Secretary,
U.S. Department of Treasury, Pennsylvania Avenue, NW, Washington, DC.

Hon. DOUGLAS SHULMAN, Commissioner,
Internal Revenue Service, Constitution Avenue, NW, Washington, DC.

DEAR SECRETARY GEITHNER AND COMMISSIONER SHULMAN: I am writing to express my disappointment with actions taken by both the Department of the Treasury (Treasury) and the Internal Revenue Service (IRS) with respect to Internal Revenue Code (IRC) sections 382 and 6707A.

On November 18, 2008, I wrote to then Secretary Paulson regarding Notice 2008-83, which changed the rules governing the deductibility of losses under IRC section 382(h). The facts and circumstances surrounding the issuance of that Notice raised concerns about the independence and merits of the decision.

Treasury's most recent guidance on this same issue, Notice 2010-2, raises the same concerns. Accordingly, I request that you provide the Finance Committee with all records relating to communications pertaining to the issuance of Notice 2010-2 between Treasury officials, Citigroup, Inc., or other Troubled Asset Relief Program (TARP) participants and/or their representatives. Please also provide a timeline for, and documentation of, Treasury and IRS discussions and approvals for Notice 2010-2 as well as any discussions about the impact this notice would have on the tax gap. In cooperating with the Committee's review, no documents, records, data, or other information related to these matters, either directly or indirectly, shall be destroyed, modified, removed, or otherwise made inaccessible to the Committee.

I understand that Treasury believes that Notice 2010-2 was justified, in part, because it would help protect the government's interest in Citigroup, Inc. Yet, it appears that Notice 2010-2 may generate billions of dollars of tax savings for Citigroup, Inc. Please provide documentation of any discussions of impact on the tax gap resulting from Notice 2010-2.

The quick and immediate relief provided to Citigroup, Inc. stands in stark contrast to Treasury and IRS's position on providing relief to small business owners who have been assessed penalties under IRC section 6707A. As you know, Chairman Baucus and I have been working throughout this year with our counterparts in the House of Representatives to provide relief that can only be accomplished through legislation and we expect that legislation to be enacted very soon. As a supporter of closing the tax gap, I very much appreciate the IRS's difficult position with respect to protecting the government's interest in collecting taxes and penalties due and appreciate the IRS's moratorium on collection enforcement activity.

However, according to Commissioner Shulman's letter to Chairman Baucus dated July 17, 2009, 72% of section 6707A penalty assessments were imposed on small businesses and small business owners. The penalty is clearly being assessed disproportionately on small businesses compared to larger taxpayers. In addition, the placement of liens on these taxpayers, even though they are not yet being enforced, is a significant threat to their operations. Many small businesses use business assets or mortgage personal residences to secure lines of credit for the businesses. Imposing liens has significant negative implications for a small business that has limited access to capital.

I discussed this issue with Commissioner Shulman last month. I understand my staff has also discussed this again with IRS staff since then but that the IRS insists that placement of liens is necessary to protect the government's interest. I am troubled and frustrated by this position. It is inconsistent with the administration's publicly expressed concern about the difficulties facing small businesses in accessing capital.

I am also concerned that there is a disconnect between what Treasury and IRS staff in Washington, DC think is happening and what is actually happening in the field. For example, when my staff discussed with your staff the issue of IRC section 6723 being used to justify the placement of liens, your staff denied this was happening. Yet, after providing the name of a specific taxpayer who was subject to such a lien, my staff was informed that there may be a systemic issue in either the Automated Lien System or the Integrated Collection System.

My staff has also informed me that some of the assessments and liens are the result of Treasury and IRS regulations and procedures, such as the decision to disallow disclosures on amended returns and the decision to pursue 6707A assessments while other examination issues remain unresolved. Until Treasury regulations and IRS procedures can be revised to clear up the confusion, I request that IRS remove all liens on small businesses resulting from 6707A assessments unless there is a known risk that the taxpayer will evade payment of the penalties. Since the pending legislation will significantly reduce the 6707A assessment amount, liens may no longer be necessary.

As a supporter of closing the tax gap, I very much appreciate the IRS's difficult position with respect to protecting the government's interest in collecting taxes and penalties. If the IRS believes that removal of a lien would result in the IRS being unable to collect the penalty amount as revised by the pending legislation, please provide a description of these situations. However, I ask you to consider using your discretion as was done for big financial corporate TARP participants who will benefit from Notice 2010-2.

I appreciate your prompt attention to this matter. Please contact my staff with any questions or concerns.

Sincerely,

CHUCK GRASSLEY,
Ranking Member.

Mr. GRASSLEY. Mr. President, I want to explain my position on the nomination of Lael Brainard to be Under Secretary of the Treasury for International Affairs. I voted against Dr. Brainard in the Finance Committee, and I want the record to show that I am opposed to her nomination in the full Senate.

Dr. Brainard was nominated on March 23 of this year, and the Finance Committee's routine vetting began shortly after that. For the past 9 months Dr. Brainard has given evasive, incomplete, and inconsistent answers to questions asked by the Committee minority and majority. I have said this before, but every nominee who passes through the Finance Committee has been treated the same for the nearly 9 years I have been either chairman or ranking member. Dr. Brainard was treated in a manner consistent with how past nominees have been treated,

but she did not respond in a consistent manner. On November 18, the Finance Committee released a memo covering three basic issues that arose during the vetting of Dr. Brainard. The nominee had a chance to review and make comments on this memo before it was released.

The first issue covered in the memo involves responses to questions on the Finance Committee questionnaire pertaining to previous late payments of taxes and whether or not the nominee is current on taxes owed. The nominee had to submit four separate responses to one question as the committee came to gradually discover that Rappahannock County, VA, property taxes had been paid late in 2005, 2006, 2007, and 2008. The issue is not that someone forgot to pay their property taxes on time; the issue here is the difficulty the Finance Committee had in getting complete, accurate, and correct answers out of Dr. Brainard. Committee staff spent most of 2009 attempting to get straight answers from Dr. Brainard, and the whole time this was going on the nominee had not paid her 2008 property taxes. The nominee finally disclosed the late payment of the 2008 property taxes on October 12, 2009, though the taxes had actually been paid in September. Answers on this specific issue from the nominee reflect a troubling aspect that is characteristic of many of Dr. Brainard's answers. Though Dr. Brainard owns the Rappahannock County property with her husband, she has consistently avoided taking any responsibility for the payment of taxes owed.

As I said before, the issue is not that someone forgot to pay county property taxes on time. Though a chronic inability to pay taxes timely is a serious concern, the real problem here is the inability of the nominee to be straight with myself, our staff, and the committee as a whole.

The second issue discussed in the November 18 memo involves the completion of several forms I-9, employment eligibility verification, which is required to document that a new employee is authorized to work in the United States. The nominee will tell you that all of her employees are eligible to work in the United States, and I do not dispute that. As before the issue here is the inability of the nominee to respond in a straightforward manner to questions. Additionally, the number of forms I-9 produced by the nominee with significant irregularities was very unusual. The committee released six different forms I-9 with irregularities. The committee memo discusses each of these, but possibly the most problematic is one form where it appears that dates have been written over to change the year. When questioned by committee staff about these forms I-9 in a meeting with the nominee and her accountant, the accountant asked to

speak to the nominee alone, without committee staff in the room. The nominee sent a letter to myself and Chairman BAUCUS apologizing for the irregularities but offering no substantive explanation for many of them.

The third issue discussed in the Finance Committee memo involves the nominee's deduction of one-sixth of her household expenses from partnership income as an office-in-home deduction. Committee staff simply asked the nominee to show how she determined that one-sixth was the appropriate percentage, and the nominee has provided many different answers to this question. The Finance Committee memo summarizes Dr. Brainard's attempts to explain her office-in-home deduction with a variety of formulas adding up to a variety of answers. As before, the real issue here is not what percentage the nominee should have used to calculate her office-in-home deduction; the issue is the inability of the nominee to respond to what should be simple questions in a straightforward way.

As the committee memo notes, on her 2008 partnership return, the nominee reduced the size of her office-in-home deduction by half from one-sixth to one-twelfth. Dr. Brainard said that this change was made because committee staff had been asking questions regarding her earlier use of the office-in-home deduction. The nominee did not amend her partnership returns for 2005, 2006, and 2007 where an office-in-home deduction of one-sixth was taken. I am not able to say that either number is correct or incorrect because the nominee provided several contradictory answers to this question.

As I have been saying, the larger issue here is not that someone was late in paying county property taxes, or the appropriate size of an office-in-home deduction. The larger issue is the apparent unwillingness or inability of a person, nominated by the President, to answer questions asked by a standing committee of the Senate in a straightforward manner. The reason Dr. Brainard's nomination took a full 9 months to the day to be discharged by the Finance Committee is that she spent 9 months giving evasive, incomplete, and inconsistent answers to committee staff in response to what are generally routine questions.

The only thing that is perhaps even more troubling than a nominee who doesn't seem to take the vetting done by a Senate Committee seriously is the reaction we have seen by others, including some who serve in this body. Some apparently see the due diligence and vetting done on nominees as an assembly line that produces a guaranteed outcome.

We have seen what I believe to be political operatives from outside the Senate selectively leak information in a effort to target the Finance Committee's process of vetting nominees and

even the specific staffers who carry out this work. These political operatives have had a lot of work to do, as Dr. Brainard is the fifth nominee from the current administration to run into significant problems during the Finance Committee vetting process. The Finance Committee vetting process has not changed in the nearly 9 years I have been chairman or ranking member. What has changed are the specific nominees and the apparent willingness of some to tolerate and excuse issues that would have disqualified nominees from the previous administration.

Nominees in the previous administration would have had trouble garnering support if they had these sorts of problems, and I made it clear my job was not to defend a problematic nominee. Most people do not know about these problematic nominees from the past because in some cases they did not get a hearing and in others they were not nominated in the first place.

There is only one person who could tell us why the vetting process for this nominee took so long, and that person is Lael Brainard.

I have been trying to ask her questions for 9 months now without much success, so now my questions are for the critics of the Finance Committee process and those determined to see this nominee confirmed no matter what.

How long should we allow a nominee to provide incomplete and contradictory answers before we simply decide that person ought to be confirmed anyway?

Who is important enough not to be obligated to follow the same rules and obligations as all other nominees?

What high government official is so important that they ought to be exempt from the burden of routine Congressional oversight?

Is knowing the right people a substitute for simple honesty and strength of character?

As for myself, I am going to answer these questions by reiterating my opposition to the nomination.

I, Senator CHUCK GRASSLEY, do not object to proceeding to the nominations of Lael Brainard to be Under Secretary of the Treasury, Michael Mundaca to be an Assistant Secretary of the Treasury, Mary Miller to be an Assistant Secretary of the Treasury, and Charles Collins to be an Assistant Secretary of the Treasury.

ADDITIONAL STATEMENTS

TRIBUTE TO TARAS G. SZMAGALA

• Mr. VOINOVICH. Mr. President, today I wish to recognize Taras G. "Tary" Szmagala, on the occasion of his retirement from the Greater Cleveland Regional Transit Authority in Cleveland, OH. Tary has dedicated his

life to public service and has worked tirelessly to improve the quality of life for the citizens of our community. His career demonstrates a commitment to excellence and exemplary leadership, and has earned him the respect and admiration of his friends and associates.

For 23 years, Tary has served the Greater Cleveland Regional Transit Authority, during which time he has held a number of positions, including: director of governmental relations, manager of communications, deputy general manager, interim general manager, and executive director of external affairs. He has made significant contributions towards procuring Federal and State capital improvement funds for the RTA's major projects, including, but not limited to, the Euclid Corridor Project and the extension of the Waterfront Line, and the Walkway from Tower City to Gateway.

Additionally, Tary's distinguished career in public service includes serving as special assistant to U.S. Senator Robert Taft, teacher and administrator for the Parma Board of Education, and public and personnel coordinator for the Cleveland Regional Sewer District. Moreover, he has served numerous governmental leaders and organizations, and has devoted countless hours to civic organizations, including the Stella Maris Board of Directors, the National Highway Safety Advisory Committee, the Ohio Public Transit Association, St. Ignatius High School and several colleges.

Tary has worked tirelessly to provide many Americans with a tangible connection to their Ukrainian heritage by serving on the Ukrainian Museum Archives Board of Directors, the Ukrainian National Association Board of Directors and as a representative of the Ukrainian-American community in many official capacities, including as Member of Presidential Delegation to Ukraine in 1991.

It is my privilege to recognize Tary for his diligent commitment and dedicated service to the Greater Cleveland Regional Transit Authority, and to the community that he has served for over three decades.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Neiman, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations and a withdrawal which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

NOTIFICATION OF THE PRESIDENT'S INTENTION TO DESIGNATE THE REPUBLIC OF MALDIVES AS A BENEFICIARY DEVELOPING COUNTRY AND TO TERMINATE THE DESIGNATIONS OF CROATIA AND EQUATORIAL NEW GUINEA AS BENEFICIARY DEVELOPING PROGRAMS UNDER THE GENERALIZED SYSTEM OF PREFERENCES PROGRAM—PM 39

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report and papers; which was referred to the Committee on Finance:

To the Congress of the United States:

The Generalized System of Preferences (GSP) offers duty-free treatment to specified products that are imported from designated beneficiary developing countries. The GSP is authorized by title V of the Trade Act of 1974, as amended (the "Act").

In accordance with sections 502(f)(1)(A) and 502(f)(2) of the Act, I am providing notification of my intent to add the Republic of Maldives to the list of beneficiary developing countries under the GSP program and my intent to terminate the designations of Croatia and Equatorial Guinea as beneficiary developing countries under the GSP program.

In Proclamation 6813 of July 28, 1995, the designation of Maldives as a beneficiary developing country for purposes of the GSP program was suspended. After considering the criteria set forth in sections 501 and 502 of the Act, I have determined that the suspension of the designation of Maldives as a GSP beneficiary developing country should be ended.

In addition, I have determined that Croatia and Equatorial Guinea have each become a "high income" country, as defined by the official statistics of the International Bank for Reconstruction and Development. In accordance with section 502(e) of the Act, I have determined that the designations of Croatia and Equatorial Guinea as beneficiary developing countries under the GSP program should be terminated, effective January 1, 2011.

BARACK OBAMA.

THE WHITE HOUSE, December 23, 2009.

MESSAGE FROM THE HOUSE

ENROLLED BILL SIGNED

At 1:42 p.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the Speaker pro tempore (Mr. VAN HOLLEN) has signed the following enrolled bill:

H.R. 4284. An act to extend the Generalized System of Preferences and the Andean Trade Preference Act, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. BYRD).

MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 1242. An act to amend the Emergency Economic Stabilization Act of 2008 to provide for additional monitoring and accountability of the Troubled Asset Relief Program; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 3639. An act to amend the Credit Card Accountability Responsibility and Disclosure Act of 2009 to establish an earlier effective date for various consumer protections, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-4151. A communication from the Under Secretary of Defense (Comptroller), transmitting, pursuant to law, the report of a violation of the Antideficiency Act that occurred within the National Geospatial-Intelligence Agency in fiscal year 2003, and has been assigned National Geospatial-Intelligence Agency case number 08-03; to the Committee on Appropriations.

EC-4152. A communication from the Deputy Secretary, Division of Corporation Finance, Securities and Exchange Commission, transmitting, pursuant to law, the report of a rule entitled "Proxy Disclosure Enhancements" (RIN3235-AK28) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Banking, Housing, and Urban Affairs.

EC-4153. A communication from the Director of Environmental Policy and Compliance, Office of the Secretary, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Implementation of the National Environmental Policy Act (NEPA) of 1969" received in the Office of the President of the Senate on December 17, 2009; to the Committee on Environment and Public Works.

EC-4154. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Tier II Issue: Cost Sharing Stock Based Compensation Directive No. 2" (LMSB-4-1109-040) received in the Office of the President of the Senate on December 10, 2009; to the Committee on Finance.

EC-4155. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the report of a petition to add workers from Oak Ridge Hospital in Oak Ridge, Tennessee, to the Special Exposure Cohort; to the Committee on Health, Education, Labor, and Pensions.

EC-4156. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the report of a petition to add workers from Piqua Organic Moderated Reactor in Piqua, Ohio, to the Special Exposure Cohort; to the Committee on Health, Education, Labor, and Pensions.

EC-4157. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the report of a petition to add workers from the Hanford site in Richland, Washington, to the Special Exposure Cohort; to the Committee on Health, Education, Labor, and Pensions.

EC-4158. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the report of a petition to add workers from the Metals and Controls Corporation in Attleboro, Massachusetts, to the Special Exposure Cohort; to the Committee on Health, Education, Labor, and Pensions.

EC-4159. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the report of a petition to add workers from the Brookhaven National Laboratory in Upton, New York, to the Special Exposure Cohort; to the Committee on Health, Education, Labor, and Pensions.

EC-4160. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report relative to the Community Services Block Act Discretionary Activities: Community Economic Development and Rural Facilities Programs; to the Committee on Health, Education, Labor, and Pensions.

EC-4161. A communication from the Director, Strategic Human Resources Policy Division, Office of Personnel Management, transmitting, pursuant to law, the report of a rule entitled "Adverse Actions" (RIN3206-AL39) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Homeland Security and Governmental Affairs.

EC-4162. A communication from the Director, Strategic Human Resources Policy Division, Office of Personnel Management, transmitting, pursuant to law, the report of a rule entitled "Training; Supervisory, Management, and Executive Development" (RIN3206-AK75) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Homeland Security and Governmental Affairs.

EC-4163. A communication from the Director, Strategic Human Resources Policy Division, Office of Personnel Management, transmitting, pursuant to law, the report of a rule entitled "Examining System" (RIN3206-AL51) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Homeland Security and Governmental Affairs.

EC-4164. A communication from the Chief of the Border Security Regulations Branch, Customs and Border Protection, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Importer Security Filing and Additional Carrier Requirements; Correction" (RIN1651-AA70) received in the Office of the President of the Senate on December 17, 2009; to the Committee on Homeland Security and Governmental Affairs.

EC-4165. A communication from the Assistant Secretary, Bureau of Political-Military Affairs, Department of State, transmitting, pursuant to law, the Uniform Resource Locator (URL) for a report relative to the FY2009 Agency Financial Report; to the Committee on Homeland Security and Governmental Affairs.

EC-4166. A communication from the Secretary of the Department of Energy, transmitting, pursuant to law, a report entitled "Fiscal Year 2009 Agency Financial Report"; to the Committee on Homeland Security and Governmental Affairs.

EC-4167. A communication from the US-VISIT Program Director, National Protection and Programs Directorate, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "United States Visitor and Immigrant Status Indicator Technology Program ("US-

VISIT"); Enrollment of Additional Aliens in US-VISIT; Authority to Collect Biometric Data From Additional Travelers and Expansion to the 50 Most Highly Trafficked Land Border Ports of Entry" (RIN1601-AA35; RIN1600-AA00) received in the Office of the President of the Senate on December 17, 2009; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LIEBERMAN, from the Committee on Homeland Security and Governmental Affairs, without amendment:

S. 69. A bill to establish a fact-finding Commission to extend the study of a prior Commission to investigate and determine facts and circumstances surrounding the relocation, internment, and deportation to Axis countries of Latin Americans of Japanese descent from December 1941 through February 1948, and the impact of those actions by the United States, and to recommend appropriate remedies, and for other purposes (Rept. No. 111-112).

By Mr. DORGAN, from the Committee on Indian Affairs, with amendments:

S. 1178. A bill to extend Federal recognition to the Chickahominy Indian Tribe, the Chickahominy Indian Tribe-Eastern Division, the Upper Mattaponi Tribe, the Rappahannock Tribe, Inc., the Monacan Indian Nation, and the Nansemond Indian Tribe (Rept. No. 111-113).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of nominations were submitted:

By Mr. BAUCUS for the Committee on Finance.

*Lael Brainard, of the District of Columbia, to be an Under Secretary of the Treasury.

*Ellen Gloninger Murray, of Virginia, to be an Assistant Secretary of Health and Human Services.

*Bryan Hayes Samuels, of Illinois, to be Commissioner on Children, Youth, and Families, Department of Health and Human Services.

*Jim R. Esquea, of New York, to be an Assistant Secretary of Health and Human Services.

*Michael W. Punke, of Montana, to be a Deputy United States Trade Representative, with the rank of Ambassador.

*Islam A. Siddiqui, of Virginia, to be Chief Agricultural Negotiator, Office of the United States Trade Representative, with the rank of Ambassador.

*Charles Collins, of Maryland, to be a Deputy Under Secretary of the Treasury.

*Mary John Miller, of Maryland, to be an Assistant Secretary of the Treasury.

*Michael F. Mundaca, of New York, to be an Assistant Secretary of the Treasury.

*Nomination was reported with recommendation that it be confirmed subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first

and second times by unanimous consent, and referred as indicated:

By Mrs. LINCOLN (for herself and Mr. SANDERS):

S. 2926. A bill to amend the XVIII of the Social Security Act to provide for the application of a consistent Medicare part B premium for all Medicare beneficiaries in a budget neutral manner for 2010, to provide an additional round of economic recovery payments to certain beneficiaries, and to assess the need for a consumer price index for elderly consumers to compute cost-of-living increases for certain governmental benefits; to the Committee on Finance.

By Mr. HARKIN (for himself, Mr. SANDERS, Mr. WHITEHOUSE, and Mr. BROWN):

S. 2927. A bill to amend the Internal Revenue Code of 1986 to impose a tax on certain securities transactions to fund job creation and deficit reduction, and for other purposes; to the Committee on Finance.

By Mr. GRASSLEY:

S. 2928. A bill to amend the Internal Revenue Code of 1986 to extend certain disaster tax relief provisions, and for other purposes; to the Committee on Finance.

By Mr. FEINGOLD (for himself and Mr. WHITEHOUSE):

S. 2929. A bill to prohibit secret modifications and revocations of the law, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

By Mr. SPECTER (for himself, Mr. SCHUMER, and Mr. GRAHAM):

S. 2930. A bill to deter terrorism, provide justice for victims, and for other purposes; to the Committee on the Judiciary.

ADDITIONAL COSPONSORS

S. 624

At the request of Mr. DURBIN, the name of the Senator from New Jersey (Mr. LAUTENBERG) was added as a cosponsor of S. 624, a bill to provide 100,000,000 people with first-time access to safe drinking water and sanitation on a sustainable basis by 2015 by improving the capacity of the United States Government to fully implement the Senator Paul Simon Water for the Poor Act of 2005.

S. 891

At the request of Mr. BROWNBACK, the name of the Senator from Ohio (Mr. BROWN) was added as a cosponsor of S. 891, a bill to require annual disclosure to the Securities and Exchange Commission of activities involving columbite-tantalite, cassiterite, and wolframite from the Democratic Republic of Congo, and for other purposes.

S. 1402

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 1402, a bill to amend the Internal Revenue Code of 1986 to increase the amount allowed as a deduction for start-up expenditures.

S. 2824

At the request of Mr. KOHL, the name of the Senator from New Jersey (Mr. MENENDEZ) was added as a cosponsor of S. 2824, a bill to establish a small dollar loan-loss guarantee fund, and for other purposes.

S. 2854

At the request of Mr. KOHL, the name of the Senator from Missouri (Mr. BOND) was added as a cosponsor of S. 2854, a bill to amend the Internal Revenue Code of 1986 to extend and modify the credit for new qualified hybrid motor vehicles, and for other purposes.

S. 2925

At the request of Mr. WYDEN, the name of the Senator from Minnesota (Mr. FRANKEN) was added as a cosponsor of S. 2925, a bill to establish a grant program to benefit victims of sex trafficking, and for other purposes.

AMENDMENT NO. 2995

At the request of Mr. SCHUMER, the name of the Senator from Michigan (Ms. STABENOW) was added as a cosponsor of amendment No. 2995 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3264

At the request of Mr. WYDEN, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of amendment No. 3264 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GRASSLEY:

S. 2928. A bill to amend the Internal Revenue Code of 1986 to extend certain disaster tax relief provisions, and for other purposes; to the Committee on Finance.

Mr. GRASSLEY. Mr. President, today I have introduced a bill to extend deadlines for a number of provisions in the Heartland Disaster Tax Relief Act of 2008, as well as a number of national disaster tax relief provisions, through 2010.

The Heartland Disaster Tax Relief Act has been critical in rebuilding the lives and communities of those affected by the terrible floods and tornadoes from last year.

Because of delays in Federal funding and tighter credit conditions, many individuals, families, and businesses affected by the 2008 floods and storms will be unable to meet the deadline for the tax relief intended to help with recovery.

Louisiana is still rebuilding from Hurricane Katrina in 2005. Congress extended tax incentives for that disaster twice, and might even extend them a third time. I am just proposing a second year of the same kind of tax incentives that have been in effect for Hurricane Katrina victims for over 4 years.

This is especially important when small businesses are struggling to recover, and small businesses create 70 percent of all net new jobs.

It is only fair to extend the deadlines and give these individuals, families, and businesses the chance to recover and rebuild.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 2928

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Heartland Disaster Tax Relief Extension Act of 2009".

TITLE I—HEARTLAND DISASTER AREAS

SEC. 101. CREDIT TO HOLDERS OF TAX CREDIT BONDS.

Section 702(d)(7)(C) of the Heartland Disaster Tax Relief Act of 2008 (Public Law 110-343; 122 Stat. 3918) is amended by striking "January 1, 2010" and inserting "January 1, 2011".

SEC. 102. EDUCATION TAX BENEFITS.

Section 702(d)(8) of the Heartland Disaster Tax Relief Act of 2008 (Public Law 110-343; 122 Stat. 3918) is amended by striking "or 2009" and inserting "2009, or 2010".

SEC. 103. SPECIAL RULES FOR USE OF RETIREMENT FUNDS.

Section 702(d)(10) of the Heartland Disaster Tax Relief Act of 2008 (Public Law 110-343; 122 Stat. 3918) is amended—

(1) by striking "January 1, 2010" both places it appears and inserting "January 1, 2011", and

(2) by striking "December 31, 2009" both places it appears and inserting "December 31, 2010".

SEC. 104. ADJUSTMENTS REGARDING TAXPAYER AND DEPENDENCY STATUS.

Section 702(d)(15) of the Heartland Disaster Tax Relief Act of 2008 (Public Law 110-343; 122 Stat. 3918) is amended by striking "or 2009" and inserting "2009, or 2010".

SEC. 105. EFFECTIVE DATE.

The amendments made by this title shall take effect as if included in the enactment of section 702 of the Heartland Disaster Tax Relief Act of 2008.

TITLE II—NATIONAL DISASTER AREAS

SEC. 201. LOSSES ATTRIBUTABLE TO FEDERALLY DECLARED DISASTERS.

(a) NO LIMIT FOR 2010.—Paragraph (1) of section 165(h) of the Internal Revenue Code of 1986 is amended by striking "\$500 (\$100 for taxable years beginning after December 31, 2009)" and inserting "\$100 (\$0 for taxable years beginning after December 31, 2009, and before January 1, 2011)".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 2009.

SEC. 202. EXPENSING OF QUALIFIED DISASTER EXPENSES.

(a) IN GENERAL.—Subparagraph (A) of section 198A(b)(2) of the Internal Revenue Code of 1986 is amended by striking "January 1, 2010" and inserting "January 1, 2011".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to disasters occurring after December 31, 2009.

SEC. 203. NET OPERATING LOSSES ATTRIBUTABLE TO FEDERALLY DECLARED DISASTERS.

(a) IN GENERAL.—Subclause (I) of section 172(j)(1)(A)(i) of the Internal Revenue Code of

1986 is amended by striking "January 1, 2010" and inserting "January 1, 2011".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to disasters occurring after December 31, 2009.

SEC. 204. WAIVER OF CERTAIN MORTGAGE REVENUE BOND REQUIREMENTS.

(a) IN GENERAL.—Paragraph (11) of section 143(k) of the Internal Revenue Code of 1986 is amended by striking "January 1, 2010" and inserting "January 1, 2011".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to bonds issued after December 31, 2009.

SEC. 205. SPECIAL DEPRECIATION ALLOWANCE FOR QUALIFIED DISASTER PROPERTY.

(a) IN GENERAL.—Subclause (I) of section 168(n)(2)(A)(ii) of the Internal Revenue Code of 1986 is amended by striking "January 1, 2010" and inserting "January 1, 2011".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to disasters occurring after December 31, 2009.

By Mr. FEINGOLD (for himself and Mr. WHITEHOUSE):

S. 2929. A bill to prohibit secret modifications and revocations of the law, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

Mr. FEINGOLD. Mr. President, today Senator WHITEHOUSE and I will introduce the Executive Order Integrity Act of 2009. The bill prevents secret changes to published Executive Orders by requiring the President to place a notice in the Federal Register when he has modified or revoked a published Order. Through this simple measure, the bill takes an important step toward reversing the growth of secret law in the executive branch.

The principle behind this bill is straightforward. It is a basic tenet of democracy that the people have a right to know the law. Indeed, the notion of "secret law" has been described in court opinions and law treatises as "repugnant" and "an abomination." That's why the laws passed by Congress have historically been matters of public record.

But the law that applies in this country includes more than just statutes. It includes regulations, the controlling legal interpretations of courts and the executive branch, and certain Presidential directives. As we learned at a hearing of the Judiciary Committee's Constitution Subcommittee that I chaired last year, some of this body of executive and judicial law was increasingly kept secret from the public, and too often from Congress as well, under the Bush administration. The administration concealed Department of Justice legal opinions and interpretations of the Foreign Intelligence Surveillance Court.

The shroud of secrecy extended to Executive Orders and other Presidential directives that carry the force of law. The Federal Register Act requires the President to publish any Executive Orders that have general applicability and legal effect. But through

the diligent efforts of my colleague Senator WHITEHOUSE, we learned in late 2007 that the Department of Justice took the position that a President can “waive” or “modify” any Executive Order without any notice to the public or Congress—simply by not following it. In other words, even in cases where the President is required to make the public, the President can change the law in secret.

The Office of Legal Counsel memorandum that contains this position is still classified, but Senator WHITEHOUSE convinced the Department of Justice to declassify certain propositions in the memorandum. Among them is the proposition that “[w]henver [the President] wishes to depart from the terms of a previous executive order,” he may do so, because “an executive order cannot limit a President.” And he doesn’t have to change the executive order, or give notice that he is violating it, because by “depart[ing] from the executive order,” the President “has instead modified or waived it.”

Now, no one disputes that a President can withdraw or revise an Executive Order at any time; that is every President’s prerogative. But abrogating a published Executive Order without any public notice works a secret change in the law. Worse, because the published Order stays on the books, it actively misleads Congress and the public as to what the law is.

This is not just a hypothetical problem dreamed up by the Office of Legal Counsel. It has happened, and it could happen again. To list just one example, the Bush administration’s warrantless wiretapping program not only violated the Foreign Intelligence Surveillance Act; it was inconsistent with several provisions of Executive Order 12333, the longstanding executive order governing electronic surveillance and other intelligence activities. Apparently, the administration believed its actions constituted a tacit amendment of that Executive Order. Who knows how many other Executive Orders were secretly revoked or amended by the conduct of the administration over the past 8 years.

The bill that Senator WHITEHOUSE and I are introducing provides a simple solution to this problem. If the President revokes, modifies, waives, or suspends a published Executive Order or similar directive, notice of this change in the law must be placed in the Federal Register within 30 days. The notice must specify the Order or the provision that has been affected; whether the change is a revocation, a modification, a waiver, or a suspension; and the nature and circumstances of the change. If information about the nature and circumstances of the change is classified, it is exempt from the publication requirement, but the information still must be provided to Congress

so that we, as legislators, know how the law has been changed.

That is what our bill does; now let me talk briefly about what our bill does not do. First, it does not expand the existing legal requirements, under the Federal Register Act, that determine which Executive Orders must be published. To the extent the Federal Register Act permits a certain amount of “secret law” in the form of unpublished Executive Orders, our bill leaves that framework in place.

Second, our bill does not require public notice when the President revokes or modifies an unpublished Executive Order—even if the substance of the unpublished order is well-known to Congress and even the American people. This bill is narrowly aimed at the situation in which the American people have been given official notice of one version of the law, but a different version is being implemented.

Third, the bill does not require the President to adhere to the terms of an Executive Order. Many scholars have argued that a President must adhere to a formally promulgated Executive Order unless or until the Order is formally withdrawn or amended, just as the head of an agency must adhere to the agency’s regulations. I happen to agree. But this bill does not take issue with the Bush administration’s assertion that any deviation from the Executive Order by the President is a permissible amendment of that Order. It simply requires public notice that the amendment has occurred.

Fourth, the bill does not require the publication of classified information about intelligence sources and methods or similar information. The basic fact that the published law is no longer in effect, however, cannot be classified. On rare occasions, national security can justify elected officials keeping some information secret, but it can never justify lying to the American people about what the law is. Maintaining two different sets of laws, one public and one secret, is just that—deceiving the American people about what law applies to the Government’s conduct.

It is my hope and my expectation that the Obama administration will not continue the previous administration’s practice of purporting to amend the law in secret. But even if the administration agrees to end this practice, that will not end the need for this legislation. At last year’s Secret Law hearing, the Deputy Assistant Attorney General for OLC testified that during the Iran-Contra scandal in the 1980s, the Reagan Department of Justice took the same position: that the President could secretly modify executive orders simply by not complying with them. We can safely assume that the ability to modify the law in secret will hold as much appeal for a future administration as it did for at least

two administrations in the past. We can’t wait for this to happen in order to act, because we won’t know that it has happened—the entire point of the practice, after all, is to keep Congress and the public in the dark. The time to prevent this eventuality is now.

I commend Senator WHITEHOUSE for his tireless work to bring this issue to light, and I urge all of my colleagues in the Senate to support this modest effort to ensure the integrity of our published laws.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 2929

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Executive Order Integrity Act of 2009”.

SEC. 2. REVOCATIONS, MODIFICATIONS, WAIVERS, AND SUSPENSIONS OF PRESIDENTIAL PROCLAMATIONS AND EXECUTIVE ORDERS.

Section 1505 of title 44, United States Code, is amended by adding at the end the following:

“(d) REVOCATIONS, MODIFICATIONS, WAIVERS, AND SUSPENSIONS OF PRESIDENTIAL PROCLAMATIONS AND EXECUTIVE ORDERS.—

“(1) NOTICE REQUIRED.—If the President, whether formally or informally, and whether through express order, conduct, or other means—

“(A) revokes, modifies, waives, or suspends any portion of a Presidential proclamation, Executive Order, or other Presidential directive that was published in the Federal Register; or

“(B) authorizes the revocation, modification, waiver, or suspension of any portion of such Presidential proclamation, Executive Order, or other Presidential directive; notice of such revocation, modification, waiver, or suspension shall be published in the Federal Register within 30 days after the revocation, modification, waiver, or suspension, in accordance with the terms under paragraph (2).

“(2) CONTENT OF NOTICE.—

“(A) IN GENERAL.—Except as provided under subparagraph (B), the notice required under paragraph (1) shall specify—

“(i) the Presidential proclamation, Executive Order, or other Presidential directive, and any particular portion thereof that is affected;

“(ii) for each affected directive or portion thereof, whether that directive or portion thereof was revoked, modified, waived, or suspended; and

“(iii) except where such information is classified, the specific nature and circumstances of the revocation, modification, waiver, or suspension.

“(B) REVISED EXECUTIVE ORDER.—Where the revocation, modification, waiver, or suspension of a Presidential proclamation, Executive Order, or other Presidential directive is accomplished through the publication in the Federal Register of a revised Presidential proclamation, Executive Order, or other Presidential directive that replaces or amends the one that was revoked, modified, waived, or suspended, that revised Presidential proclamation, Executive Order, or

other Presidential directive shall constitute notice for purposes of paragraph (1).

“(3) CLASSIFIED INFORMATION.—If the information specified under paragraph (2)(A)(iii) is classified, such information shall be provided to Congress, using the security procedures established under section 501(d) of the National Security Act of 1947 (50 U.S.C. 413(d)), in the form of a classified annex delivered to—

“(A) the majority and minority leader of the Senate;

“(B) the Speaker, majority leader, and minority leader of the House of Representatives;

“(C) the Committee on the Judiciary of the Senate and the Committee on the Judiciary of the House of Representatives; and

“(D) if the information pertains to national security matters, the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives.

“(4) RULE OF CONSTRUCTION.—Nothing in this subsection shall be construed as either authorizing or prohibiting the revocation, modification, waiver, or suspension of any Presidential proclamation, Executive Order, or other Presidential directive that was published in the Federal Register through means other than a formal directive issued by the President and published in the Federal Register.”.

By Mr. SPECTER (for himself, Mr. SCHUMER, and Mr. GRAMHAM):

S. 2930. A bill to deter terrorism, provide justice for victims, and for other purposes; to the Committee on the Judiciary.

Mr. SPECTER. Mr. President, I have sought recognition to urge support for the legislation I have just introduced, the Justice Against Sponsors of Terrorism Act. The legislation would amend the Foreign Sovereign Immunities Act, FSIA, and the Anti-Terrorism Act, ATA, to ensure that foreign sponsors of terrorism are held accountable to their American victims in our courts. These amendments are necessary because some lower-court decisions have deprived victims of terrorism, including most recently 9/11's victims, of the legal remedies Congress intended to confer on them when it enacted the FSIA and ATA, and thereby removed a critical deterrent to the financing and sponsorship of terrorism. Congressional inaction would leave the victims of 9/11 without recourse against the sponsors of al-Qaeda and, more importantly perhaps, render the FSIA and the ATA ineffective deterrents to future terrorist attacks.

Recent news reports serve as a reminder that al-Qaeda and other foreign terrorist organizations remain dedicated to their declared goal of carrying out large-scale terrorist attacks within the U.S. In our continuous efforts to prevent such attacks, we have appropriately focused our attention on stemming the flow of money to terrorists through deterrence. As the Treasury Department's Undersecretary for Terrorism and Financial Intelligence has observed, “the terrorist operative who

is willing to strap on a suicide belt is not susceptible to deterrence, but the individual donor who wants to support violent jihad may well be.” Testimony of Stuart Levey, Under Secretary for Terrorism and Financial Intelligence, before the Senate Committee on Finance, April 1, 2008. Holding them liable for civil damages in courts may be the most effective—and, given the absence of effective criminal sanctions, often only—way to deter them from sponsoring terrorist attacks. “Suits against financiers of terrorism can,” as renowned federal judge Richard Posner recently emphasized, “cut the terrorist's lifeline.” *Boim v. Holy Land Foundation for Relief and Development*, 549 F. 3d 685 (7th Cir. 2008).

As carefully written by Congress, the FSIA abrogates the sovereign immunity of foreign countries and permits suit against them in Federal court when, among other things, a foreign country commits terrorists acts or other tortious conduct that results in injury on our soil. The ATA authorizes suit in Federal court by any U.S. national injured “by reason of an act of international terrorism” and permits the recovery of “threefold the damages he or she sustains”, that is, treble damages, as well the costs of suit and attorneys' fees. “18 U.S.C. §2333(a).

But a number of lower Federal courts have frustrated Congress's intent by erecting unfounded jurisdictional barriers to suit. No such decision is more significant in its effect than the Court of Appeals for the Second Circuit's *In re Terrorist Attacks* on September 11, 2001, 538 F. 3d 71 (2d Cir. 2009). That decision arose from litigation brought by the victims of the 9/11 attacks, including family members of the nearly 3,000 innocent people killed and commercial entities that suffered in excess of \$10 billion in damage to their property. The plaintiffs sought damages against, among other defendants, the Kingdom of Saudi Arabia, several Saudi officials, and a purported charity under the control of the Kingdom known as the Saudi High Commission for Relief of Bosnia and Herzegovina. Substantial evidence establishes that these defendants had provided funding and sponsorship to al-Qaeda without which it could not have carried out the 9/11 attacks. Even the Second Circuit acknowledged that plaintiffs had offered a “wealth of detail, conscientiously cited to published and unpublished sources,” as to the defendants' sponsorship of al-Qaeda.

None of the plaintiffs had their day in court, however, for the Second Circuit ruled that the Federal courts have no jurisdiction over the principal defendants. As for Saudi Arabia and its official state agencies, the Second Circuit held that they were not subject to suit under the FSIA's tort exception because, having not been designated by the United States as a state sponsor of

terrorism, Saudi Arabia was not covered by a separate FSIA exception for suits against designated state sponsors of terrorism. Suits arising from terrorist activities, the court concluded, can only be brought under the FSIA's exception governing designated state sponsors of terrorism. As for the Saudi princes, the Second Circuit held that the courts lacked personal jurisdiction over them because, though they “could and did foresee [that] the recipients of their donations would attack targets in the United States,” they did not themselves “direct” any terrorist attacks or “command” any “agent” to “commit them.”

Both conclusions are wrong. The former is especially troubling because it establishes an immunity from suit under the FSIA that Congress did not intend. A foreign state is subject to suit for its terrorist activities under the FSIA's tort exception without regard to whether it is subject to suit under the separate exception for designated state sponsors of terrorism—that is, without regard to whether the United States has designated it as a state sponsor of terrorism. The Second Circuit effectively read into the tort exception an exception for terrorist-related torts. Even the Solicitor General, who has adopted an unduly restrictive interpretation of the FSIA's exceptions, concluded that the Second Circuit misread the statute on this critical point.

The Second Circuit's and other lower courts' decisions on these seemingly technical jurisdictional points not only deprive the victims of terrorism the compensation to which they are entitled but also remove a powerful weapon in our arsenal against foreign terrorism. We can no longer wait for the Supreme Court to correct these errant decisions. The Court's refusal earlier this year to hear the plaintiffs' appeal of the Second Circuit's decision in *In re Terrorist Attacks*, despite the importance of the case and the conflicts among the lower courts on the key issues it presents, suggests that the Court may well never do so.

That is why I have introduced the Justice Against Sponsors of Terrorism Act. The act's main provisions would amend FSIA to make clear that, as Congress originally intended, a foreign state may be sued under the torts exception if it sponsors terrorists who commit terrorist attacks on our soil, without regard to whether it is a state-designated sponsor of terrorism, and amend the ATA to ensure that its anti-terrorism provisions, like FSIA's, are given the meaning Congress intended. I urge my colleagues to support these modest, but critical, amendments.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FINANCE

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on December 23, 2009, at 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGES OF THE FLOOR

Mr. CRAPO. Mr. President, I ask unanimous consent that Marques Chavez be granted the privilege of the floor for the remainder of today's session.

The PRESIDING OFFICER. Without objection, it is so ordered.

NUCLEAR FORENSICS AND ATTRIBUTION ACT

Mr. CASEY. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 244, H.R. 730.

The PRESIDING OFFICER. The clerk will report the bill by title.

The bill clerk read as follows:

A bill (H.R. 730) to strengthen efforts in the Department of Homeland Security to develop nuclear forensics capabilities to permit attribution of the source of nuclear material, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Homeland Security and Governmental Affairs with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Nuclear Forensics and Attribution Act".

SEC. 2. FINDINGS.

Congress finds the following:

(1) The threat of a nuclear terrorist attack on American interests, both domestic and abroad, is one of the most serious threats to the national security of the United States. In the wake of an attack, attribution of responsibility would be of utmost importance. Because of the destructive power of a nuclear weapon, there could be little forensic evidence except the radioactive material in the weapon itself.

(2) Through advanced nuclear forensics, using both existing techniques and those under development, it may be possible to identify the source and pathway of a weapon or material after it is interdicted or detonated. Though identifying intercepted smuggled material is now possible in some cases, pre-detonation forensics is a relatively undeveloped field. The post-detonation nuclear forensics field is also immature, and the challenges are compounded by the pressures and time constraints of performing forensics after a nuclear or radiological attack.

(3) A robust and well-known capability to identify the source of nuclear or radiological material intended for or used in an act of terror could also deter prospective proliferators. Furthermore, the threat of effective attribution could compel improved security at material storage facilities, preventing the unwitting transfer of nuclear or radiological materials.

(4)(A) In order to identify special nuclear material and other radioactive materials con-

fidently, it is necessary to have a robust capability to acquire samples in a timely manner, analyze and characterize samples, and compare samples against known signatures of nuclear and radiological material.

(B) Many of the radioisotopes produced in the detonation of a nuclear device have short half-lives, so the timely acquisition of samples is of the utmost importance. Over the past several decades, the ability of the United States to gather atmospheric samples—often the preferred method of sample acquisition—has diminished. This ability must be restored and modern techniques that could complement or replace existing techniques should be pursued.

(C) The discipline of pre-detonation forensics is a relatively undeveloped field. The radiation associated with a nuclear or radiological device may affect traditional forensics techniques in unknown ways. In a post-detonation scenario, radiochemistry may provide the most useful tools for analysis and characterization of samples. The number of radiochemistry programs and radiochemists in United States National Laboratories and universities has dramatically declined over the past several decades. The narrowing pipeline of qualified people into this critical field is a serious impediment to maintaining a robust and credible nuclear forensics program.

(5) Once samples have been acquired and characterized, it is necessary to compare the results against samples of known material from reactors, weapons, and enrichment facilities, and from medical, academic, commercial, and other facilities containing such materials, throughout the world. Some of these samples are available to the International Atomic Energy Agency through safeguards agreements, and some countries maintain internal sample databases. Access to samples in many countries is limited by national security concerns.

(6) In order to create a sufficient deterrent, it is necessary to have the capability to positively identify the source of nuclear or radiological material, and potential traffickers in nuclear or radiological material must be aware of that capability. International cooperation may be essential to catalogue all existing sources of nuclear or radiological material.

SEC. 3. SENSE OF CONGRESS ON INTERNATIONAL AGREEMENTS FOR FORENSICS COOPERATION.

It is the sense of the Congress that the President should—

(1) pursue bilateral and multilateral international agreements to establish, or seek to establish under the auspices of existing bilateral or multilateral agreements, an international framework for determining the source of any confiscated nuclear or radiological material or weapon, as well as the source of any detonated weapon and the nuclear or radiological material used in such a weapon;

(2) develop protocols for the data exchange and dissemination of sensitive information relating to nuclear or radiological materials and samples of controlled nuclear or radiological materials, to the extent required by the agreements entered into under paragraph (1); and

(3) develop expedited protocols for the data exchange and dissemination of sensitive information needed to publicly identify the source of a nuclear detonation.

SEC. 4. RESPONSIBILITIES OF DOMESTIC NUCLEAR DETECTION OFFICE.

(a) ADDITIONAL RESPONSIBILITIES.—Section 1902 of the Homeland Security Act of 2002 (as redesignated by Public Law 110-53; 6 U.S.C. 592) is amended—

(1) in subsection (a)—

(A) in paragraph (9), by striking "and" after the semicolon;

(B) by redesignating paragraph (10) as paragraph (14); and

(C) by inserting after paragraph (9) the following:

"(10) lead the development and implementation of the national strategic five-year plan for improving the nuclear forensic and attribution capabilities of the United States required under section 1036 of the National Defense Authorization Act for Fiscal Year 2010;

"(11) establish, within the Domestic Nuclear Detection Office, the National Technical Nuclear Forensics Center to provide centralized stewardship, planning, assessment, gap analysis, exercises, improvement, and integration for all Federal nuclear forensics and attribution activities—

"(A) to ensure an enduring national technical nuclear forensics capability to strengthen the collective response of the United States to nuclear terrorism or other nuclear attacks; and

"(B) to coordinate and implement the national strategic five-year plan referred to in paragraph (10);

"(12) establish a National Nuclear Forensics Expertise Development Program, which—

"(A) is devoted to developing and maintaining a vibrant and enduring academic pathway from undergraduate to post-doctorate study in nuclear and geochemical science specialties directly relevant to technical nuclear forensics, including radiochemistry, geochemistry, nuclear physics, nuclear engineering, materials science, and analytical chemistry;

"(B) shall—

"(i) make available for undergraduate study student scholarships, with a duration of up to 4 years per student, which shall include, if possible, at least 1 summer internship at a national laboratory or appropriate Federal agency in the field of technical nuclear forensics during the course of the student's undergraduate career;

"(ii) make available for doctoral study student fellowships, with a duration of up to 5 years per student, which shall—

"(I) include, if possible, at least 2 summer internships at a national laboratory or appropriate Federal agency in the field of technical nuclear forensics during the course of the student's graduate career; and

"(II) require each recipient to commit to serve for 2 years in a post-doctoral position in a technical nuclear forensics-related specialty at a national laboratory or appropriate Federal agency after graduation;

"(iii) make available to faculty awards, with a duration of 3 to 5 years each, to ensure faculty and their graduate students have a sustained funding stream; and

"(iv) place a particular emphasis on reinvigorating technical nuclear forensics programs while encouraging the participation of undergraduate students, graduate students, and university faculty from historically Black colleges and universities, Hispanic-serving institutions, Tribal Colleges and Universities, Asian American and Native American Pacific Islander-serving institutions, Alaska Native-serving institutions, and Hawaiian Native-serving institutions; and

"(C) shall—

"(i) provide for the selection of individuals to receive scholarships or fellowships under this section through a competitive process primarily on the basis of academic merit and the nuclear forensics and attribution needs of the United States Government;

"(ii) provide for the setting aside of up to 10 percent of the scholarships or fellowships awarded under this section for individuals who are Federal employees to enhance the education of such employees in areas of critical nuclear forensics and attribution needs of the United States Government, for doctoral education under the scholarship on a full-time or part-time basis;

“(iii) provide that the Secretary may enter into a contractual agreement with an institution of higher education under which the amounts provided for a scholarship under this section for tuition, fees, and other authorized expenses are paid directly to the institution with respect to which such scholarship is awarded;

“(iv) require scholarship recipients to maintain satisfactory academic progress; and

“(v) require that—

“(I) a scholarship recipient who fails to maintain a high level of academic standing, as defined by the Secretary, who is dismissed for disciplinary reasons from the educational institution such recipient is attending, or who voluntarily terminates academic training before graduation from the educational program for which the scholarship was awarded shall be liable to the United States for repayment within 1 year after the date of such default of all scholarship funds paid to such recipient and to the institution of higher education on the behalf of such recipient, provided that the repayment period may be extended by the Secretary if the Secretary determines it necessary, as established by regulation; and

“(II) a scholarship recipient who, for any reason except death or disability, fails to begin or complete the post-doctoral service requirements in a technical nuclear forensics-related specialty at a national laboratory or appropriate Federal agency after completion of academic training shall be liable to the United States for an amount equal to—

“(aa) the total amount of the scholarship received by such recipient under this section; and

“(bb) the interest on such amounts which would be payable if at the time the scholarship was received such scholarship was a loan bearing interest at the maximum legally prevailing rate;

“(13) provide an annual report to Congress on the activities carried out under paragraphs (10), (11), and (12); and”;

(2) by adding at the end the following new subsection:

“(b) DEFINITIONS.—In this section:

“(1) ALASKA NATIVE-SERVING INSTITUTION.—The term ‘Alaska Native-serving institution’ has the meaning given the term in section 317 of the Higher Education Act of 1965 (20 U.S.C. 1059d).

“(2) ASIAN AMERICAN AND NATIVE AMERICAN PACIFIC ISLANDER-SERVING INSTITUTION.—The term ‘Asian American and Native American Pacific Islander-serving institution’ has the meaning given the term in section 320 of the Higher Education Act of 1965 (20 U.S.C. 1059g).

“(3) HAWAIIAN NATIVE-SERVING INSTITUTION.—The term ‘Hawaiian native-serving institution’ has the meaning given the term in section 317 of the Higher Education Act of 1965 (20 U.S.C. 1059d).

“(4) HISPANIC-SERVING INSTITUTION.—The term ‘Hispanic-serving institution’ has the meaning given that term in section 502 of the Higher Education Act of 1965 (20 U.S.C. 1101a).

“(5) HISTORICALLY BLACK COLLEGE OR UNIVERSITY.—The term ‘historically Black college or university’ has the meaning given the term ‘part B institution’ in section 322(2) of the Higher Education Act of 1965 (20 U.S.C. 1061(2)).

“(6) TRIBAL COLLEGE OR UNIVERSITY.—The term ‘Tribal College or University’ has the meaning given that term in section 316(b) of the Higher Education Act of 1965 (20 U.S.C. 1059c(b)).”.

(b) JOINT INTERAGENCY ANNUAL REPORTING REQUIREMENT TO CONGRESS AND THE PRESIDENT.—

(1) IN GENERAL.—Section 1907(a)(1) of the Homeland Security Act of 2002 (6 U.S.C. 596a(a)(1)) is amended—

(A) in subparagraph (A)(ii), by striking “; and” and inserting a semicolon;

(B) in subparagraph (B)(iii), by striking the period at the end and inserting “; and”; and

(C) by adding at the end the following new subparagraph:

“(C) the Director of the Domestic Nuclear Detection Office and each of the relevant departments that are partners in the National Technical Forensics Center—

“(i) include, as part of the assessments, evaluations, and reviews required under this paragraph, each office’s or department’s activities and investments in support of nuclear forensics and attribution activities and specific goals and objectives accomplished during the previous year pursuant to the national strategic five-year plan for improving the nuclear forensic and attribution capabilities of the United States required under section 1036 of the National Defense Authorization Act for Fiscal Year 2010;

“(ii) attaches, as an appendix to the Joint Interagency Annual Review, the most current version of such strategy and plan; and

“(iii) includes a description of new or amended bilateral and multilateral agreements and efforts in support of nuclear forensics and attribution activities accomplished during the previous year.”.

Mr. CASEY. I ask unanimous consent that the committee substitute amendment be agreed to, the bill, as amended, be read a third time and passed, the motions to reconsider be laid upon the table, with no intervening action or debate, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendment in the nature of a substitute was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 730), as amended, was read the third time and passed.

EXTENDING THE COMMERCIAL SPACE TRANSPORTATION LIABILITY REGIME

Mr. CASEY. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 249, H.R. 3819, an act to extend the commercial space transportation liability regime.

The PRESIDING OFFICER. The clerk will report the bill by title.

The bill clerk read as follows:

A bill (H.R. 3819) to extend the commercial space transportation liability regime.

There being no objection, the Senate proceeded to consider the bill.

Mr. CASEY. Mr. President, I ask unanimous consent that the bill be read a third time, passed, and the motion to reconsider be laid upon the table and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 3819) was ordered to be read a third time, was read the third time, and passed.

DISCHARGE AND REFERRAL—EXECUTIVE NOMINATION

Mr. CASEY. Mr. President, as in executive session, I ask unanimous con-

sent that the Committee on Environment and Public Works be discharged from further consideration of the following nomination and that the nomination be referred to the Committee on Commerce, Science, and Transportation:

Timothy McGee, of Louisiana, to be an Assistant Secretary of Commerce.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR THURSDAY, DECEMBER 24, 2009

Mr. CASEY. I ask unanimous consent that when the Senate completes its business today, it adjourn until 6:45 a.m., Thursday, December 24; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of H.R. 3590, with the time until 7 a.m. equally divided and controlled between the two leaders or their designees, and the Senate proceed to vote on passage of the bill at 7 a.m., as provided for under the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. CASEY. Mr. President, there will be two rollcall votes beginning at 7 a.m. tomorrow. The first vote will be on passage of H.R. 3590. The second vote will be on passage of H.R. 4314. Senators are encouraged to be in the Chamber at the beginning of the first vote and to vote from their desks.

ADJOURNMENT UNTIL 6:45 A.M. TOMORROW

Mr. CASEY. If there is no further business to come before the Senate, I ask unanimous consent that it adjourn under the previous order.

There being no objection, the Senate, at 8:15 p.m., adjourned until Thursday, December 24, 2009, at 6:45 a.m.

NOMINATIONS

Executive nominations received by the Senate:

STATE JUSTICE INSTITUTE

DANIEL J. BECKER, OF UTAH, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE STATE JUSTICE INSTITUTE FOR A TERM EXPIRING SEPTEMBER 17, 2010, VICE ROBERT NELSON BALDWIN, TERM EXPIRED.

JAMES R. HANNAH, OF ARKANSAS, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE STATE JUSTICE INSTITUTE FOR A TERM EXPIRING SEPTEMBER 17, 2010, VICE JOSEPH FRANCIS BACA, TERM EXPIRED.

GAYLE A. NACHTIGAL, OF OREGON, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE STATE JUSTICE INSTITUTE FOR A TERM EXPIRING SEPTEMBER 17, 2012, VICE SOPHIA H. HALL, TERM EXPIRED.

JOHN B. NALBANDIAN, OF KENTUCKY, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE STATE JUSTICE INSTITUTE FOR A TERM EXPIRING SEPTEMBER 17, 2010, VICE KEITH MCNAMARA, TERM EXPIRED.

DEPARTMENT OF JUSTICE

ANDRE BIROTTE, JR., OF CALIFORNIA, TO BE UNITED STATES ATTORNEY FOR THE CENTRAL DISTRICT OF

CALIFORNIA FOR THE TERM OF FOUR YEARS, VICE THOMAS P. O'BRIEN.

DAVID A. CAPP, OF INDIANA, TO BE UNITED STATES ATTORNEY FOR THE NORTHERN DISTRICT OF INDIANA FOR THE TERM OF FOUR YEARS, VICE JOSEPH S. VAN BOKKELEN, RESIGNED.

RICHARD S. HARTUNIAN, OF NEW YORK, TO BE UNITED STATES ATTORNEY FOR THE NORTHERN DISTRICT OF NEW YORK FOR THE TERM OF FOUR YEARS, VICE GLENN T. SUDDABY, RESIGNED.

WILLIAM JOSEPH HOCHUL, JR., OF NEW YORK, TO BE UNITED STATES ATTORNEY FOR THE WESTERN DISTRICT OF NEW YORK FOR THE TERM OF FOUR YEARS, VICE TERRANCE P. FLYNN, RESIGNED.

RONALD C. MACHEN, JR., OF THE DISTRICT OF COLUMBIA, TO BE UNITED STATES ATTORNEY FOR THE DISTRICT OF COLUMBIA FOR THE TERM OF FOUR YEARS, VICE KENNETH L. WAINSTEIN, RESIGNED.

ANNE M. TOMPKINS, OF NORTH CAROLINA, TO BE UNITED STATES ATTORNEY FOR THE WESTERN DISTRICT OF NORTH CAROLINA FOR THE TERM OF FOUR YEARS, VICE GRETCHEN C.F. SHAPPERT, RESIGNED.

SALLY QUILLIAN YATES, OF GEORGIA, TO BE UNITED STATES ATTORNEY FOR THE NORTHERN DISTRICT OF GEORGIA FOR THE TERM OF FOUR YEARS, VICE DAVID E. NAHMIA, RESIGNED.

NOEL CULVER MARCH, OF MAINE, TO BE UNITED STATES MARSHAL FOR THE DISTRICT OF MAINE FOR THE TERM OF FOUR YEARS, VICE DAVID DONALD VILES.

GEORGE WHITE, OF MISSISSIPPI, TO BE UNITED STATES MARSHAL FOR THE SOUTHERN DISTRICT OF MISSISSIPPI FOR THE TERM OF FOUR YEARS, VICE NEHEMIAH FLOWERS.

BEATRICE A. HANSON, OF NEW YORK, TO BE DIRECTOR OF THE OFFICE FOR VICTIMS OF CRIME, VICE JOHN W. GILLIS.

DISCHARGED NOMINATION

The Senate Committee on Environment and Public Works was discharged from further consideration of the following nomination by unanimous consent to be re-referred to the Committee on Commerce, Science, and Transportation and the nomination was referred to the Committee on Commerce,

Science, and Transportation by unanimous consent under authority of the order of the Senate of 12/23/2009:

TIMOTHY MCGEE, OF LOUISIANA, TO BE AN ASSISTANT SECRETARY OF COMMERCE.

WITHDRAWAL

Executive Message transmitted by the President to the Senate on December 23, 2009 withdrawing from further Senate consideration the following nomination:

SUEDEEN G. KELLY, OF NEW MEXICO, TO BE A MEMBER OF THE FEDERAL ENERGY REGULATORY COMMISSION FOR THE TERM EXPIRING JUNE 30, 2014, (REAPPOINTMENT), WHICH WAS SENT TO THE SENATE ON JULY 28, 2009.

EXTENSIONS OF REMARKS

HONORING THE LIFE OF JIM CLARKE

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 23, 2009

Mr. WOLF. Madam Speaker, I rise to share with our colleagues today the recent passing of Jim Clarke. He died on December 21, 2009 at his home in Annandale, Virginia, at the age of 75.

In 1962 Jim joined WMAL, the predecessor of WJLA (ABC Channel 7), where he served as a dedicated television journalist for more than 40 years. Jim did an outstanding job for Channel 7 and served our region well before retiring just a few years ago. Jim was a man of integrity and will be sorely missed by all who had the pleasure of knowing him. My thoughts and prayers go out to his wife, Lizbe, and the rest of his family during these difficult times.

I would like to share an obituary for Jim that ran in the Washington Post on December 22.

[From the Washington Post, Dec. 22, 2009]

JIM CLARKE, EMMY-WINNING WJLA ANCHOR AND REPORTER, DIES

(By T. Rees Shapiro)

Jim Clarke, 75, an Emmy Award-winning television journalist for more than 40 years at what became WJLA (Channel 7), died Dec. 21 at his home in Annandale. Mr. Clarke had a heart attack in his sleep after shoveling snow for most of the day before.

In 1962, Mr. Clarke joined WMAL, the predecessor to WJLA, as an evening news anchor and reporter. During his career at the ABC News affiliate, his work included covering the race riots after the assassination of the Rev. Martin Luther King, Jr., the trial of the failed presidential assassin John Hinckley, Jr., and the Iran-Contra hearings.

Mr. Clarke focused many of his investigations on consumer advocacy stories and government corruption. He won numerous awards for his work, including nine local Emmy Awards, the Ted Yates award for courageous journalism and the National Headliner Award for an investigative report on abuses at St. Elizabeths Hospital, where several psychiatric patients died from neglect.

Mr. Clarke was in Norway when the news broke in 1998 about the sex scandal surrounding President Bill Clinton and former White House intern Monica Lewinsky, and he caught the first flight back to begin his coverage. To get a head start during the plane ride home, he wrote his script for the next newscast on the back of an airsickness bag.

James Davis Clarke, a native of Auxier, Ky., was a 1956 communication arts graduate of Fordham University in New York. One of his earliest jobs in the news business was as a copyboy for NBC newscaster John Cameron Swayze.

Mr. Clarke's big break came in the early 1960s as a radio reporter for WGH radio in Newport News, Va. He secured a taped inter-

view at the home of Francis Gary Powers, the U-2 spy plane pilot who had been shot down over Russia. The report made news across the country as a rare first-person account of the crash and eventually reached the ears of the WMAL newsman Ed Meyer, who recruited Mr. Clarke to join the ABC affiliate in Washington.

Mr. Clarke retired from WJLA in 2003 as a national affairs reporter.

Survivors include his wife of 48 years, Lizbe Schuster Clarke of Annandale; four children, Christopher Clarke of Washington, Kimberly Allen of Albuquerque, Katie Adamson of Arlington County and Suzanne Sprague of Portland, Ore.; and eight grandchildren.

Among colleagues, Mr. Clarke was known to be intrepid. One evening during the 1970s, Mr. Clarke had been out late in Virginia covering a story that was in danger of not making the 6 o'clock evening news.

According to his co-worker John Corcoran, rather than not make the broadcast, Mr. Clarke hopped a ride on the station's helicopter and ordered an assignment editor and intern to pick up an emergency blanket and meet him on the roof of the station. The problem was, there was no helicopter landing pad.

Leaning outside the hovering helicopter, Mr. Clarke dropped the tape from his report into the outstretched blanket below, and the segment made it into the editing bays for that evening's news.

INTRODUCING DECABROMINE ELIMINATION AND CONTROL ACT

HON. CHELLIE PINGREE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 23, 2009

Ms. PINGREE of Maine. Madam Speaker, I am very proud to introduce the Decabromine Elimination and Control Act today.

Since 2005 there have been 44 state-based initiatives to ban brominated flame retardants (PBDEs), but only four have been signed into law, including one in my home state of Maine. That bill was sponsored by my daughter, Maine Speaker of the House Hannah Pingree, and passed by the Maine legislature.

Today, I am honored to continue the long tradition of bringing good ideas from Maine to Washington.

PBDEs are known endocrine disruptors, interfering with the transmission and regulation of thyroid and reproductive hormones. Exposure of infants to PBDEs is of particular concern because these chemicals have produced developmental neurotoxicity in laboratory animals, impairing memory, learning and behavior. Even more worrisome is the fact that breastfeeding infants are exposed to higher concentrations of PBDEs because of the presence of these chemicals in mother's milk. The time has come to remove this chemical from our children's toys and clothing. We must take

immediate steps to ban this toxic and dangerous chemical.

This bill phases out, and ultimately bans, the last hazardous type of PBDE, Decabromine, by 2013. It mandates disclosure of products containing Decabromine to the Environmental Protection Agency and requires safer alternatives to be created to replace this toxic chemical. I have worked closely with the International Association of Fire Fighters, the Environmental Working Group, Maine Department of Environmental Protection and Environmental Health Strategy Center to develop this important piece of legislation, and I greatly appreciate the contributions of each of these groups in getting us to this critical point.

I look forward to working with my colleagues in the 111th Congress to pass this vital legislation and finally enact a long overdue ban on Decabromine.

RECOGNIZING THE MIRAMAR HIGH SCHOOL PATRIOTS

HON. ALCEE L. HASTINGS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 23, 2009

Mr. HASTINGS of Florida. Madam Speaker, I rise today to honor the Miramar High School Patriots' football team of my hometown, Miramar, Florida. On Friday, December 18, 2009, Miramar beat the DeLand Bulldogs 42-20 to become the first team from Broward County to win a 6A championship. Their 14-1 record and their convincing win in the title game are two things of which all Broward County citizens and all true football fans can be proud.

I congratulate Coach Damon Cogdell and the entire team for a job well done. I especially want to praise quarterback Ryan Williams, who passed for five touchdowns in the game, and receiver Ivan McCartney, who caught three of them. I am delighted to laud a team that has achieved great success.

The Miramar High School Patriots are fine examples of young men who have excelled at athletics and academics. By working hard and focusing on the tasks at hand, they have reached the pinnacle of their sport. They are people of whom their peers and everyone can be justifiably proud. I look forward to more championships from them in future years.

CELEBRATING THE NEVADA COUNTY ASSOCIATION OF REALTORS' 75TH ANNIVERSARY

HON. TOM McCLINTOCK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 23, 2009

Mr. McCLINTOCK. Madam Speaker, I rise to honor the Nevada County Association of

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Realtors' 75th anniversary. For 75 years the Nevada County Association of Realtors has been dedicated to helping protect the investment Americans place in their homes.

In 1935, a group of local real estate agents established the Nevada County Association of Realtors with the goal of offering clients and their families the highest level of professional real estate service.

The Nevada County Association of Realtors seeks to maintain and enhance programs, products and volunteer participation as well as develop new services and relationships to meet the demands of its members, clients and the community. The Association promotes the preservation of real property rights and is a tremendous asset to its community.

Madam Speaker, I would like to thank the Nevada County Association of Realtors and also ask my colleagues to join me in recognizing its 75 years of continued service to its community as well as the State of California.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees

to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, December 24, 2009 may be found in the Daily Digest of today's RECORD.

SENATE—Thursday, December 24, 2009

The Senate met at 6:45 a.m. and was called to order by the Vice President.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

O Lord our Heavenly Father, source of light, truth, and goodness, on this Christmas Eve, transform this time of decision into a season of vision and inspiration. Continue to show our lawmakers Your mercy as You shed light on their thoughts and offer them Your salvation. Lord, give them strength, understanding, and humility as they seek to honor You by serving their Nation. Provide them with the power to match great needs with great deeds. Today, tune their hearts to the infinite that perplexity may be removed by Your wisdom and peace. As You protect them from vanity and pride, give them the strength to concentrate, to think objectively, and to see Your will clearly. Remind us all this is the day that You have made so we should rejoice and be glad in it. We pray in Your great Name. Amen.

RESERVATION OF LEADER TIME

The VICE PRESIDENT. Under the previous order, the leadership time is reserved.

SERVICE MEMBERS HOME OWNERSHIP TAX ACT OF 2009

The VICE PRESIDENT. Under the previous order, the Senate will resume consideration of H.R. 3590 which the clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3590) to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

The VICE PRESIDENT. The majority leader is recognized.

Mr. REID. Mr. President, first let me take a minute to express my appreciation on behalf of the entire Senate to a number of people, not the least of which is ADM Barry Black who every morning leads this institution in prayer. His prayers are meaningful. They are beautiful. He is a brilliant man and adds so much to the Senate family.

I wish to offer my appreciation to the Parliamentarians who have been through a very intense, difficult decisionmaking time the last several months. Alan Frumin, Elizabeth MacDonough, Peter Robinson, and Leigh Hildebrand, we all appreciate you very much.

To the journal clerks led by Scott Sanborn, we appreciate your work. The legislative clerk, Kathie Alvarez, and all of her assistants; very difficult, tense times, and we appreciate what you do for us every day.

I also wish to express my appreciation to the court reporters, the doorkeepers, and the Sergeant at Arms. Chief Gainer is a good person. He does a wonderful job with the many responsibilities he has. But I do say this—and there is a lot of personal pride in this—as good as he is, he is better as a result of one of my former staffers, Drew Willison, who we all know is the Assistant Sergeant at Arms and does a remarkable job at protecting this institution.

Nancy Erickson, a wonderful person, is the Secretary of the Senate. She is someone I have great admiration and respect for. But again, with some personal pride, I suggest that one reason she has done such a good job is because of her assistant, the Assistant Secretary of the Senate, Sheila Dwyer, who again is one of my protégés.

I say with pride the tremendous, terrific, powerful work that has been done by Lula Davis, the Secretary of the Majority. There have been, as with all of us, a lot of difficult times, and she has held up remarkably well, giving me and the entire Senate the information they ask for constantly. She is assisted by Tim Mitchell. Of course, this place would not run as well without her working with the Secretary of the Minority, David Schiappa and his entire crew. They are wonderful people to work with. Even though sometimes this place becomes very partisan, the work done by Lula Davis and David Schiappa is never partisan as it appears to the American public.

Finally, Mr. President, I wish to say a word about the people who work in the cloakrooms. They are the people who are unseen but instrumental to the operation of the Senate. I say finally, but I have to say with a lot of pride, having been one of them, how much I appreciate and acknowledge the attention and the protection of the Capitol Police. They are throughout this building. Some are in uniform, some aren't. But with all of the evil in the world, they have a very difficult job and they do extremely well.

Mr. President, we are happy to see the Vice President of the United States here in his capacity as President of the U.S. Senate. For 36 years you have graced these halls with your brilliance and I think it is fair to say that we miss you very much, but we are glad you are where you are.

Mr. President, following any leader remarks, the time until we finish our remarks will be divided between my counterpart and my friend from Kentucky, the senior Senator from Kentucky, and after we complete our remarks, we will proceed to a series of two rollcall votes in relation to the following items: passage of H.R. 3590, the health care reform legislation; and passage of H.R. 4314, an act to permit continued financing of government operations.

The VICE PRESIDENT. The Republican leader is recognized.

Mr. MCCONNELL. Mr. President, I want to associate myself with the entirely appropriate remarks the majority leader has made about all of the people who work here at the Capitol at this difficult and intense time that we have been through. We thank you very much for your outstanding service.

It is early and I will be brief. The most obvious problem with the bill before us is that it doesn't do what it was supposed to do. The one test for any bill is whether it will lower costs. This bill fails that test. It is also clear that even many of the people on this side who are going to support this bill don't like it; otherwise, the Democratic leaders wouldn't have had such a tough time rounding up the votes; otherwise, Democratic leaders would not have had to have votes in the middle of the night or at the crack of dawn or over the weekend or even during a blizzard; otherwise, they wouldn't be rushing it through Congress on Christmas Eve, the first time this body has had a vote the day before Christmas in more than a century.

This debate was supposed to produce a bill that reformed health care in America. Instead, we are left with party-line votes in the middle of the night, a couple of sweetheart deals to get it over the finish line, and a truly outraged public. A problem they were told would be fixed wasn't. I guarantee you that the people who voted for this bill are going to get an earful when they finally get home for the first time since Thanksgiving. They know there is widespread opposition to this monstrosity.

I want to assure you, Mr. President, this fight isn't over. In fact, this fight is long from over. My colleagues and I will work to stop this bill from becoming law. That is the clear will of the American people and we are going to continue to fight on their behalf.

The VICE PRESIDENT. The majority leader is recognized.

Mr. REID. Mr. President, like so many endeavors that have benefited so

many Americans, making health insurance more affordable and health insurance companies more accountable is a process. It is one that has required us to find common ground, as we should. That is why we have a piece of legislation that over the next decade will reduce the deficit by \$132 billion and, over the next decade, as much as \$1.3 trillion.

Everyone knows we have had votes in the middle of the night and on Christmas Eve because the Republicans wouldn't allow us to have votes at any other hour. It is true when we go home we are going to hear an earful. I am going to hear an earful I bet from young Caleb, a boy who was born with legs that stopped here, right above his knees, who has needed a set of new prosthetic devices because the rest of his body is growing, but the insurance company says no because he had a pre-existing disability. I will get an earful from Caleb and especially his parents—an earful of joy and happiness. Because, you see, from this day forward, insurance companies will not be able to deny coverage because of a preexisting disability. For people such as Caleb and parents who have children with diabetes and other problems, it is over. So, yes, we will hear an earful, but it is going to be an earful of wonderment and happiness that people have waited for for a long time.

This morning is not the end of the process. It is merely the beginning. We will continue to build on this success to improve our health system even more and to further ease the terrible burdens on American families and businesses.

But that process cannot begin unless we start today. The American people and the American economy cannot afford for us to wait for the next time because, you see, there may not be a next time.

Nearly 65 years ago, Harry Truman condemned a system that condemns its citizens to the devastating economic side effects of sickness. Nearly 65 years later, we still suffer from the same. Just months after World War II came to a close, President Harry S. Truman wrote in a letter to Congress to this body:

We should resolve now that the health of this Nation is a national concern; that financial barriers in the way of attaining health shall be removed; that the health of all of its citizens deserves the help of all the Nation.

Decades have passed and these financial barriers have grown taller, but we will never solve the problem unless we find the resolve which we haven't found until today.

This is how long we have waited. Think of those who were 1 year old in 1945, the day Truman issued his call to this body for action, of those—and there are many, far too many—who have lived their entire lives without the ability to afford any type of health

care—any type of health care. Coverage got more and more expensive each year. Insurance companies found more and more excuses to leave them out in the cold. For those who worked in a small business or owned one or moved from job to job, the peace of mind health care can provide was merely a dream.

Today, on the verge of the year 2010, those Americans are finally just months away from qualifying for Medicare. That is a long time for a citizen to wait for health care in the greatest and richest Nation the world has ever known. How much longer? How much longer can we afford to put this off or ask the uninsured for their patience? Until health care costs consume not just a sixth of our economy, but a third, or a half? Until premiums consume more than half of a family's income?

We certainly don't have the luxury of waiting until America becomes the only developed Nation on Earth where you can die for lack of health insurance. We already bear that blemish. That is why we are bringing security and stability to millions who have health insurance and bringing health insurance to millions who have none.

What we will do is ensure consumers have more choices and insurance companies face more competition.

We will stand up to those greedy insurance companies that deny health care to the sick and drive millions into bankruptcy, foreclosure, and sometimes even worse.

We will add years to the life of Medicare, which will add years to the life of our seniors.

We will trade a system that demands you pay more and get less for one in which you will pay less and get more.

As we do all this, we will slash our children's deficit in dramatic fashion. We may not completely cure this crisis today or tomorrow, but we must start toward that end. We must strive for progress and not surrender for want of purity. Our charge is to move forward. This is a tradition as old as this Republic, one that has always comprised interests and opinions as diverse as the people who populate it. Our Founding Fathers did not promise to form an infallible new Nation; they promised instead to promote the general welfare as we move toward a more perfect Union. They valued progress.

Our Nation's earliest leaders promised not absolute happiness but only the pursuit of that goal. They valued opportunity. Similar to other new programs that improve the lives of many and were since strengthened to improve even more—programs such as Medicare, Medicaid, and Social Security—progress and opportunity are what this historic bill represents.

To those who so admirably care so much for their fellow man that they demand more, I say: This is just the be-

ginning. With Senator Ted Kennedy's voice booming in our ears—with his passion in our hearts—we say as he said: The work goes on, the cause endures.

Opponents of this bill have used every trick in the book to delay this day, this moment. Yet here we are, minutes away from doing what many have tried but none have ever achieved.

We are here because facts will always defeat fear. Although one might slow the progress, they can't stop it, and although one might slow the speed of progress, its force cannot be stopped.

I am sorry to say that, for the first time in American history, a political party has chosen to stand on the sidelines rather than participate in great—and greatly needed—social change.

I am sorry to see that many on the other side have resorted to myths and misinformation and continue to rely on them long after they were debunked.

It is regrettable they view our citizens' health care crisis through a political lens, because affording to live a healthy life isn't about politics or partisanship or polling.

It is about people. It is about life and death in America. It is a question of morality, of right and wrong. It is about human suffering. Given the chance to relieve this suffering, we must take this chance and deliver on a promise the American people have deserved for six and a half decades.

The VICE PRESIDENT. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read the third time.

The bill was read the third time.

Mr. DURBIN. Mr. President, I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second?

There is a sufficient second.

The bill having been read the third time, the question is, Shall the bill pass?

The clerk will call the roll.

Mr. KYL. The following Senator is necessarily absent: the Senator from Kentucky (Mr. BUNNING).

Further, if present and voting, the Senator from Kentucky (Mr. BUNNING) would have voted "nay."

The VICE PRESIDENT. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 60, nays 39, as follows:

[Rollcall Vote No. 396 Leg.]

YEAS—60

Sec. 1515. Offering of Exchange-participating qualified health plans through cafeteria plans.

Subtitle G—Miscellaneous Provisions

Sec. 1551. Definitions.

Sec. 1552. Transparency in government.

Sec. 1553. Prohibition against discrimination on assisted suicide.

Sec. 1554. Access to therapies.

Sec. 1555. Freedom not to participate in Federal health insurance programs.

Sec. 1556. Equity for certain eligible survivors.

Sec. 1557. Nondiscrimination.

Sec. 1558. Protections for employees.

Sec. 1559. Oversight.

Sec. 1560. Rules of construction.

Sec. 1561. Health information technology enrollment standards and protocols.

Sec. 1562. Conforming amendments.

Sec. 1563. Sense of the Senate promoting fiscal responsibility.

TITLE II—ROLE OF PUBLIC PROGRAMS**Subtitle A—Improved Access to Medicaid**

Sec. 2001. Medicaid coverage for the lowest income populations.

Sec. 2002. Income eligibility for nonelderly determined using modified gross income.

Sec. 2003. Requirement to offer premium assistance for employer-sponsored insurance.

- Sec. 2004. Medicaid coverage for former foster care children.
- Sec. 2005. Payments to territories.
- Sec. 2006. Special adjustment to FMAP determination for certain States recovering from a major disaster.
- Sec. 2007. Medicaid Improvement Fund rescission.
- Subtitle B—Enhanced Support for the Children's Health Insurance Program*
- Sec. 2101. Additional federal financial participation for CHIP.
- Sec. 2102. Technical corrections.
- Subtitle C—Medicaid and CHIP Enrollment Simplification*
- Sec. 2201. Enrollment Simplification and coordination with State Health Insurance Exchanges.
- Sec. 2202. Permitting hospitals to make presumptive eligibility determinations for all Medicaid eligible populations.
- Subtitle D—Improvements to Medicaid Services*
- Sec. 2301. Coverage for freestanding birth center services.
- Sec. 2302. Concurrent care for children.
- Sec. 2303. State eligibility option for family planning services.
- Sec. 2304. Clarification of definition of medical assistance.
- Subtitle E—New Options for States to Provide Long-Term Services and Supports*
- Sec. 2401. Community First Choice Option.
- Sec. 2402. Removal of barriers to providing home and community-based services.
- Sec. 2403. Money Follows the Person Rebalancing Demonstration.
- Sec. 2404. Protection for recipients of home and community-based services against spousal impoverishment.
- Sec. 2405. Funding to expand State Aging and Disability Resource Centers.
- Sec. 2406. Sense of the Senate regarding long-term care.
- Subtitle F—Medicaid Prescription Drug Coverage*
- Sec. 2501. Prescription drug rebates.
- Sec. 2502. Elimination of exclusion of coverage of certain drugs.
- Sec. 2503. Providing adequate pharmacy reimbursement.
- Subtitle G—Medicaid Disproportionate Share Hospital (DSH) Payments*
- Sec. 2551. Disproportionate share hospital payments.
- Subtitle H—Improved Coordination for Dual Eligible Beneficiaries*
- Sec. 2601. 5-year period for demonstration projects.
- Sec. 2602. Providing Federal coverage and payment coordination for dual eligible beneficiaries.
- Subtitle I—Improving the Quality of Medicaid for Patients and Providers*
- Sec. 2701. Adult health quality measures.
- Sec. 2702. Payment Adjustment for Health Care-Acquired Conditions.
- Sec. 2703. State option to provide health homes for enrollees with chronic conditions.
- Sec. 2704. Demonstration project to evaluate integrated care around a hospitalization.
- Sec. 2705. Medicaid Global Payment System Demonstration Project.
- Sec. 2706. Pediatric Accountable Care Organization Demonstration Project.
- Sec. 2707. Medicaid emergency psychiatric demonstration project.
- Subtitle J—Improvements to the Medicaid and CHIP Payment and Access Commission (MACPAC)*
- Sec. 2801. MACPAC assessment of policies affecting all Medicaid beneficiaries.
- Subtitle K—Protections for American Indians and Alaska Natives*
- Sec. 2901. Special rules relating to Indians.
- Sec. 2902. Elimination of sunset for reimbursement for all Medicare part B services furnished by certain Indian hospitals and clinics.
- Subtitle L—Maternal and Child Health Services*
- Sec. 2951. Maternal, infant, and early childhood home visiting programs.
- Sec. 2952. Support, education, and research for postpartum depression.
- Sec. 2953. Personal responsibility education.
- Sec. 2954. Restoration of funding for abstinence education.
- Sec. 2955. Inclusion of information about the importance of having a health care power of attorney in transition planning for children aging out of foster care and independent living programs.
- TITLE III—IMPROVING THE QUALITY AND EFFICIENCY OF HEALTH CARE**
- Subtitle A—Transforming the Health Care Delivery System*
- PART I—LINKING PAYMENT TO QUALITY OUTCOMES UNDER THE MEDICARE PROGRAM**
- Sec. 3001. Hospital Value-Based purchasing program.
- Sec. 3002. Improvements to the physician quality reporting system.
- Sec. 3003. Improvements to the physician feedback program.
- Sec. 3004. Quality reporting for long-term care hospitals, inpatient rehabilitation hospitals, and hospice programs.
- Sec. 3005. Quality reporting for PPS-exempt cancer hospitals.
- Sec. 3006. Plans for a Value-Based purchasing program for skilled nursing facilities and home health agencies.
- Sec. 3007. Value-based payment modifier under the physician fee schedule.
- Sec. 3008. Payment adjustment for conditions acquired in hospitals.
- PART II—NATIONAL STRATEGY TO IMPROVE HEALTH CARE QUALITY**
- Sec. 3011. National strategy.
- Sec. 3012. Interagency Working Group on Health Care Quality.
- Sec. 3013. Quality measure development.
- Sec. 3014. Quality measurement.
- Sec. 3015. Data collection; public reporting.
- PART III—ENCOURAGING DEVELOPMENT OF NEW PATIENT CARE MODELS**
- Sec. 3021. Establishment of Center for Medicare and Medicaid Innovation within CMS.
- Sec. 3022. Medicare shared savings program.
- Sec. 3023. National pilot program on payment bundling.
- Sec. 3024. Independence at home demonstration program.
- Sec. 3025. Hospital readmissions reduction program.
- Sec. 3026. Community-Based Care Transitions Program.
- Sec. 3027. Extension of gainsharing demonstration.
- Subtitle B—Improving Medicare for Patients and Providers*
- PART I—ENSURING BENEFICIARY ACCESS TO PHYSICIAN CARE AND OTHER SERVICES**
- Sec. 3101. Increase in the physician payment update.
- Sec. 3102. Extension of the work geographic index floor and revisions to the practice expense geographic adjustment under the Medicare physician fee schedule.
- Sec. 3103. Extension of exceptions process for Medicare therapy caps.
- Sec. 3104. Extension of payment for technical component of certain physician pathology services.
- Sec. 3105. Extension of ambulance add-ons.
- Sec. 3106. Extension of certain payment rules for long-term care hospital services and of moratorium on the establishment of certain hospitals and facilities.
- Sec. 3107. Extension of physician fee schedule mental health add-on.
- Sec. 3108. Permitting physician assistants to order post-Hospital extended care services.
- Sec. 3109. Exemption of certain pharmacies from accreditation requirements.
- Sec. 3110. Part B special enrollment period for disabled TRICARE beneficiaries.
- Sec. 3111. Payment for bone density tests.
- Sec. 3112. Revision to the Medicare Improvement Fund.
- Sec. 3113. Treatment of certain complex diagnostic laboratory tests.
- Sec. 3114. Improved access for certified nurse-midwife services.
- PART II—RURAL PROTECTIONS**
- Sec. 3121. Extension of outpatient hold harmless provision.
- Sec. 3122. Extension of Medicare reasonable costs payments for certain clinical diagnostic laboratory tests furnished to hospital patients in certain rural areas.
- Sec. 3123. Extension of the Rural Community Hospital Demonstration Program.
- Sec. 3124. Extension of the Medicare-dependent hospital (MDH) program.
- Sec. 3125. Temporary improvements to the Medicare inpatient hospital payment adjustment for low-volume hospitals.
- Sec. 3126. Improvements to the demonstration project on community health integration models in certain rural counties.
- Sec. 3127. MedPAC study on adequacy of Medicare payments for health care providers serving in rural areas.
- Sec. 3128. Technical correction related to critical access hospital services.
- Sec. 3129. Extension of and revisions to Medicare rural hospital flexibility program.
- PART III—IMPROVING PAYMENT ACCURACY**
- Sec. 3131. Payment adjustments for home health care.
- Sec. 3132. Hospice reform.
- Sec. 3133. Improvement to Medicare disproportionate share hospital (DSH) payments.
- Sec. 3134. Misvalued codes under the physician fee schedule.
- Sec. 3135. Modification of equipment utilization factor for advanced imaging services.
- Sec. 3136. Revision of payment for power-driven wheelchairs.
- Sec. 3137. Hospital wage index improvement.
- Sec. 3138. Treatment of certain cancer hospitals.
- Sec. 3139. Payment for biosimilar biological products.
- Sec. 3140. Medicare hospice concurrent care demonstration program.
- Sec. 3141. Application of budget neutrality on a national basis in the calculation of the Medicare hospital wage index floor.

Sec. 3142. HHS study on urban Medicare-dependent hospitals.

Sec. 3143. Protecting home health benefits.

Subtitle C—Provisions Relating to Part C

Sec. 3201. Medicare Advantage payment.

Sec. 3202. Benefit protection and simplification.

Sec. 3203. Application of coding intensity adjustment during MA payment transition.

Sec. 3204. Simplification of annual beneficiary election periods.

Sec. 3205. Extension for specialized MA plans for special needs individuals.

Sec. 3206. Extension of reasonable cost contracts.

Sec. 3207. Technical correction to MA private fee-for-service plans.

Sec. 3208. Making senior housing facility demonstration permanent.

Sec. 3209. Authority to deny plan bids.

Sec. 3210. Development of new standards for certain Medigap plans.

Subtitle D—Medicare Part D Improvements for Prescription Drug Plans and MA–PD Plans

Sec. 3301. Medicare coverage gap discount program.

Sec. 3302. Improvement in determination of Medicare part D low-income benchmark premium.

Sec. 3303. Voluntary de minimis policy for subsidy eligible individuals under prescription drug plans and MA–PD plans.

Sec. 3304. Special rule for widows and widowers regarding eligibility for low-income assistance.

Sec. 3305. Improved information for subsidy eligible individuals reassigned to prescription drug plans and MA–PD plans.

Sec. 3306. Funding outreach and assistance for low-income programs.

Sec. 3307. Improving formulary requirements for prescription drug plans and MA–PD plans with respect to certain categories or classes of drugs.

Sec. 3308. Reducing part D premium subsidy for high-income beneficiaries.

Sec. 3309. Elimination of cost sharing for certain dual eligible individuals.

Sec. 3310. Reducing wasteful dispensing of outpatient prescription drugs in long-term care facilities under prescription drug plans and MA–PD plans.

Sec. 3311. Improved Medicare prescription drug plan and MA–PD plan complaint system.

Sec. 3312. Uniform exceptions and appeals process for prescription drug plans and MA–PD plans.

Sec. 3313. Office of the Inspector General studies and reports.

Sec. 3314. Including costs incurred by AIDS drug assistance programs and Indian Health Service in providing prescription drugs toward the annual out-of-pocket threshold under part D.

Sec. 3315. Immediate reduction in coverage gap in 2010.

Subtitle E—Ensuring Medicare Sustainability

Sec. 3401. Revision of certain market basket updates and incorporation of productivity improvements into market basket updates that do not already incorporate such improvements.

Sec. 3402. Temporary adjustment to the calculation of part B premiums.

Sec. 3403. Independent Medicare Advisory Board.

Subtitle F—Health Care Quality Improvements

Sec. 3501. Health care delivery system research; quality improvement technical assistance.

Sec. 3502. Establishing community health teams to support the patient-centered medical home.

Sec. 3503. Medication management services in treatment of chronic disease.

Sec. 3504. Design and implementation of regionalized systems for emergency care.

Sec. 3505. Trauma care centers and service availability.

Sec. 3506. Program to facilitate shared decision-making.

Sec. 3507. Presentation of prescription drug benefit and risk information.

Sec. 3508. Demonstration program to integrate quality improvement and patient safety training into clinical education of health professionals.

Sec. 3509. Improving women's health.

Sec. 3510. Patient navigator program.

Sec. 3511. Authorization of appropriations.

Subtitle G—Protecting and Improving Guaranteed Medicare Benefits

Sec. 3601. Protecting and improving guaranteed Medicare benefits.

Sec. 3602. No cuts in guaranteed benefits.

TITLE IV—PREVENTION OF CHRONIC DISEASE AND IMPROVING PUBLIC HEALTH
Subtitle A—Modernizing Disease Prevention and Public Health Systems

Sec. 4001. National Prevention, Health Promotion and Public Health Council.

Sec. 4002. Prevention and Public Health Fund.

Sec. 4003. Clinical and community preventive services.

Sec. 4004. Education and outreach campaign regarding preventive benefits.

Subtitle B—Increasing Access to Clinical Preventive Services

Sec. 4101. School-based health centers.

Sec. 4102. Oral healthcare prevention activities.

Sec. 4103. Medicare coverage of annual wellness visit providing a personalized prevention plan.

Sec. 4104. Removal of barriers to preventive services in Medicare.

Sec. 4105. Evidence-based coverage of preventive services in Medicare.

Sec. 4106. Improving access to preventive services for eligible adults in Medicaid.

Sec. 4107. Coverage of comprehensive tobacco cessation services for pregnant women in Medicaid.

Sec. 4108. Incentives for prevention of chronic diseases in Medicaid.

Subtitle C—Creating Healthier Communities

Sec. 4201. Community transformation grants.

Sec. 4202. Healthy aging, living well; evaluation of community-based prevention and wellness programs for Medicare beneficiaries.

Sec. 4203. Removing barriers and improving access to wellness for individuals with disabilities.

Sec. 4204. Immunizations.

Sec. 4205. Nutrition labeling of standard menu items at chain restaurants.

Sec. 4206. Demonstration project concerning individualized wellness plan.

Sec. 4207. Reasonable break time for nursing mothers.

Subtitle D—Support for Prevention and Public Health Innovation

Sec. 4301. Research on optimizing the delivery of public health services.

Sec. 4302. Understanding health disparities: data collection and analysis.

Sec. 4303. CDC and employer-based wellness programs.

Sec. 4304. Epidemiology-Laboratory Capacity Grants.

Sec. 4305. Advancing research and treatment for pain care management.

Sec. 4306. Funding for Childhood Obesity Demonstration Project.

Subtitle E—Miscellaneous Provisions

Sec. 4401. Sense of the Senate concerning CBO scoring.

Sec. 4402. Effectiveness of Federal health and wellness initiatives.

TITLE V—HEALTH CARE WORKFORCE

Subtitle A—Purpose and Definitions

Sec. 5001. Purpose.

Sec. 5002. Definitions.

Subtitle B—Innovations in the Health Care Workforce

Sec. 5101. National health care workforce commission.

Sec. 5102. State health care workforce development grants.

Sec. 5103. Health care workforce assessment.

Subtitle C—Increasing the Supply of the Health Care Workforce

Sec. 5201. Federally supported student loan funds.

Sec. 5202. Nursing student loan program.

Sec. 5203. Health care workforce loan repayment programs.

Sec. 5204. Public health workforce recruitment and retention programs.

Sec. 5205. Allied health workforce recruitment and retention programs.

Sec. 5206. Grants for State and local programs.

Sec. 5207. Funding for National Health Service Corps.

Sec. 5208. Nurse-managed health clinics.

Sec. 5209. Elimination of cap on commissioned corps.

Sec. 5210. Establishing a Ready Reserve Corps.

Subtitle D—Enhancing Health Care Workforce Education and Training

Sec. 5301. Training in family medicine, general internal medicine, general pediatrics, and physician assistantship.

Sec. 5302. Training opportunities for direct care workers.

Sec. 5303. Training in general, pediatric, and public health dentistry.

Sec. 5304. Alternative dental health care providers demonstration project.

Sec. 5305. Geriatric education and training; career awards; comprehensive geriatric education.

Sec. 5306. Mental and behavioral health education and training grants.

Sec. 5307. Cultural competency, prevention, and public health and individuals with disabilities training.

Sec. 5308. Advanced nursing education grants.

Sec. 5309. Nurse education, practice, and retention grants.

Sec. 5310. Loan repayment and scholarship program.

Sec. 5311. Nurse faculty loan program.

Sec. 5312. Authorization of appropriations for parts B through D of title VIII.

Sec. 5313. Grants to promote the community health workforce.

Sec. 5314. Fellowship training in public health.

Sec. 5315. United States Public Health Sciences Track.

Subtitle E—Supporting the Existing Health Care Workforce

Sec. 5401. Centers of excellence.

Sec. 5402. Health care professionals training for diversity.

Sec. 5403. Interdisciplinary, community-based linkages.

- Sec. 5404. Workforce diversity grants.
 Sec. 5405. Primary care extension program.
 Subtitle F—Strengthening Primary Care and Other Workforce Improvements
 Sec. 5501. Expanding access to primary care services and general surgery services.
 Sec. 5502. Medicare Federally qualified health center improvements.
 Sec. 5503. Distribution of additional residency positions.
 Sec. 5504. Counting resident time in nonprovider settings.
 Sec. 5505. Rules for counting resident time for didactic and scholarly activities and other activities.
 Sec. 5506. Preservation of resident cap positions from closed hospitals.
 Sec. 5507. Demonstration projects To address health professions workforce needs; extension of family-to-family health information centers.
 Sec. 5508. Increasing teaching capacity.
 Sec. 5509. Graduate nurse education demonstration.
 Subtitle G—Improving Access to Health Care Services
 Sec. 5601. Spending for Federally Qualified Health Centers (FQHCs).
 Sec. 5602. Negotiated rulemaking for development of methodology and criteria for designating medically underserved populations and health professions shortage areas.
 Sec. 5603. Reauthorization of the Wakefield Emergency Medical Services for Children Program.
 Sec. 5604. Co-locating primary and specialty care in community-based mental health settings.
 Sec. 5605. Key National indicators.
 Subtitle H—General Provisions
 Sec. 5701. Reports.
 TITLE VI—TRANSPARENCY AND PROGRAM INTEGRITY
 Subtitle A—Physician Ownership and Other Transparency
 Sec. 6001. Limitation on Medicare exception to the prohibition on certain physician referrals for hospitals.
 Sec. 6002. Transparency reports and reporting of physician ownership or investment interests.
 Sec. 6003. Disclosure requirements for in-office ancillary services exception to the prohibition on physician self-referral for certain imaging services.
 Sec. 6004. Prescription drug sample transparency.
 Sec. 6005. Pharmacy benefit managers transparency requirements.
 Subtitle B—Nursing Home Transparency and Improvement
 PART I—IMPROVING TRANSPARENCY OF INFORMATION
 Sec. 6101. Required disclosure of ownership and additional disclosable parties information.
 Sec. 6102. Accountability requirements for skilled nursing facilities and nursing facilities.
 Sec. 6103. Nursing home compare Medicare website.
 Sec. 6104. Reporting of expenditures.
 Sec. 6105. Standardized complaint form.
 Sec. 6106. Ensuring staffing accountability.
 Sec. 6107. GAO study and report on Five-Star Quality Rating System.
 PART II—TARGETING ENFORCEMENT
 Sec. 6111. Civil money penalties.
 Sec. 6112. National independent monitor demonstration project.
 Sec. 6113. Notification of facility closure.
 Sec. 6114. National demonstration projects on culture change and use of information technology in nursing homes.
 PART III—IMPROVING STAFF TRAINING
 Sec. 6121. Dementia and abuse prevention training.
 Subtitle C—Nationwide Program for National and State Background Checks on Direct Patient Access Employees of Long-term Care Facilities and Providers
 Sec. 6201. Nationwide program for National and State background checks on direct patient access employees of long-term care facilities and providers.
 Subtitle D—Patient-Centered Outcomes Research
 Sec. 6301. Patient-Centered Outcomes Research.
 Sec. 6302. Federal coordinating council for comparative effectiveness research.
 Subtitle E—Medicare, Medicaid, and CHIP Program Integrity Provisions
 Sec. 6401. Provider screening and other enrollment requirements under Medicare, Medicaid, and CHIP.
 Sec. 6402. Enhanced Medicare and Medicaid program integrity provisions.
 Sec. 6403. Elimination of duplication between the Healthcare Integrity and Protection Data Bank and the National Practitioner Data Bank.
 Sec. 6404. Maximum period for submission of Medicare claims reduced to not more than 12 months.
 Sec. 6405. Physicians who order items or services required to be Medicare enrolled physicians or eligible professionals.
 Sec. 6406. Requirement for physicians to provide documentation on referrals to programs at high risk of waste and abuse.
 Sec. 6407. Face to face encounter with patient required before physicians may certify eligibility for home health services or durable medical equipment under Medicare.
 Sec. 6408. Enhanced penalties.
 Sec. 6409. Medicare self-referral disclosure protocol.
 Sec. 6410. Adjustments to the Medicare durable medical equipment, prosthetics, orthotics, and supplies competitive acquisition program.
 Sec. 6411. Expansion of the Recovery Audit Contractor (RAC) program.
 Subtitle F—Additional Medicaid Program Integrity Provisions
 Sec. 6501. Termination of provider participation under Medicaid if terminated under Medicare or other State plan.
 Sec. 6502. Medicaid exclusion from participation relating to certain ownership, control, and management affiliations.
 Sec. 6503. Billing agents, clearinghouses, or other alternate payees required to register under Medicaid.
 Sec. 6504. Requirement to report expanded set of data elements under MMIS to detect fraud and abuse.
 Sec. 6505. Prohibition on payments to institutions or entities located outside of the United States.
 Sec. 6506. Overpayments.
 Sec. 6507. Mandatory State use of national correct coding initiative.
 Sec. 6508. General effective date.
 Subtitle G—Additional Program Integrity Provisions
 Sec. 6601. Prohibition on false statements and representations.
 Sec. 6602. Clarifying definition.
 Sec. 6603. Development of model uniform report form.
 Sec. 6604. Applicability of State law to combat fraud and abuse.
 Sec. 6605. Enabling the Department of Labor to issue administrative summary cease and desist orders and summary seizures orders against plans that are in financially hazardous condition.
 Sec. 6606. MEWA plan registration with Department of Labor.
 Sec. 6607. Permitting evidentiary privilege and confidential communications.
 Subtitle H—Elder Justice Act
 Sec. 6701. Short title of subtitle.
 Sec. 6702. Definitions.
 Sec. 6703. Elder Justice.
 Subtitle I—Sense of the Senate Regarding Medical Malpractice
 Sec. 6801. Sense of the Senate regarding medical malpractice.
 TITLE VII—IMPROVING ACCESS TO INNOVATIVE MEDICAL THERAPIES
 Subtitle A—Biologics Price Competition and Innovation
 Sec. 7001. Short title.
 Sec. 7002. Approval pathway for biosimilar biological products.
 Sec. 7003. Savings.
 Subtitle B—More Affordable Medicines for Children and Underserved Communities
 Sec. 7101. Expanded participation in 340B program.
 Sec. 7102. Improvements to 340B program integrity.
 Sec. 7103. GAO study to make recommendations on improving the 340B program.
 TITLE VIII—CLASS ACT
 Sec. 8001. Short title of title.
 Sec. 8002. Establishment of national voluntary insurance program for purchasing community living assistance services and support.
 TITLE IX—REVENUE PROVISIONS
 Subtitle A—Revenue Offset Provisions
 Sec. 9001. Excise tax on high cost employer-sponsored health coverage.
 Sec. 9002. Inclusion of cost of employer-sponsored health coverage on W-2.
 Sec. 9003. Distributions for medicine qualified only if for prescribed drug or insulin.
 Sec. 9004. Increase in additional tax on distributions from HSAs and Archer MSAs not used for qualified medical expenses.
 Sec. 9005. Limitation on health flexible spending arrangements under cafeteria plans.
 Sec. 9006. Expansion of information reporting requirements.
 Sec. 9007. Additional requirements for charitable hospitals.
 Sec. 9008. Imposition of annual fee on branded prescription pharmaceutical manufacturers and importers.
 Sec. 9009. Imposition of annual fee on medical device manufacturers and importers.
 Sec. 9010. Imposition of annual fee on health insurance providers.
 Sec. 9011. Study and report of effect on veterans health care.
 Sec. 9012. Elimination of deduction for expenses allocable to Medicare Part D subsidy.
 Sec. 9013. Modification of itemized deduction for medical expenses.
 Sec. 9014. Limitation on excessive remuneration paid by certain health insurance providers.

- Sec. 9015. Additional hospital insurance tax on high-income taxpayers.
 Sec. 9016. Modification of section 833 treatment of certain health organizations.
 Sec. 9017. Excise tax on elective cosmetic medical procedures.

Subtitle B—Other Provisions

- Sec. 9021. Exclusion of health benefits provided by Indian tribal governments.
 Sec. 9022. Establishment of simple cafeteria plans for small businesses.
 Sec. 9023. Qualifying therapeutic discovery project credit.

TITLE X—STRENGTHENING QUALITY, AFFORDABLE HEALTH CARE FOR ALL AMERICANS

Subtitle A—Provisions Relating to Title I

- Sec. 10101. Amendments to subtitle A.
 Sec. 10102. Amendments to subtitle B.
 Sec. 10103. Amendments to subtitle C.
 Sec. 10104. Amendments to subtitle D.
 Sec. 10105. Amendments to subtitle E.
 Sec. 10106. Amendments to subtitle F.
 Sec. 10107. Amendments to subtitle G.
 Sec. 10108. Free choice vouchers.
 Sec. 10109. Development of standards for financial and administrative transactions.

Subtitle B—Provisions Relating to Title II

PART I—MEDICAID AND CHIP

- Sec. 10201. Amendments to the Social Security Act and title II of this Act.
 Sec. 10202. Incentives for States to offer home and community-based services as a long-term care alternative to nursing homes.
 Sec. 10203. Extension of funding for CHIP through fiscal year 2015 and other CHIP-related provisions.

PART II—SUPPORT FOR PREGNANT AND PARENTING TEENS AND WOMEN

- Sec. 10211. Definitions.
 Sec. 10212. Establishment of pregnancy assistance fund.
 Sec. 10213. Permissible uses of Fund.
 Sec. 10214. Appropriations.

PART III—INDIAN HEALTH CARE IMPROVEMENT

- Sec. 10221. Indian health care improvement.

Subtitle C—Provisions Relating to Title III

- Sec. 10301. Plans for a Value-Based purchasing program for ambulatory surgical centers.
 Sec. 10302. Revision to national strategy for quality improvement in health care.
 Sec. 10303. Development of outcome measures.
 Sec. 10304. Selection of efficiency measures.
 Sec. 10305. Data collection; public reporting.
 Sec. 10306. Improvements under the Center for Medicare and Medicaid Innovation.
 Sec. 10307. Improvements to the Medicare shared savings program.
 Sec. 10308. Revisions to national pilot program on payment bundling.
 Sec. 10309. Revisions to hospital readmissions reduction program.
 Sec. 10310. Repeal of physician payment update.
 Sec. 10311. Revisions to extension of ambulance add-ons.
 Sec. 10312. Certain payment rules for long-term care hospital services and moratorium on the establishment of certain hospitals and facilities.
 Sec. 10313. Revisions to the extension for the rural community hospital demonstration program.
 Sec. 10314. Adjustment to low-volume hospital provision.
 Sec. 10315. Revisions to home health care provisions.

- Sec. 10316. Medicare DSH.
 Sec. 10317. Revisions to extension of section 508 hospital provisions.
 Sec. 10318. Revisions to transitional extra benefits under Medicare Advantage.
 Sec. 10319. Revisions to market basket adjustments.
 Sec. 10320. Expansion of the scope of, and additional improvements to, the Independent Medicare Advisory Board.
 Sec. 10321. Revision to community health teams.
 Sec. 10322. Quality reporting for psychiatric hospitals.
 Sec. 10323. Medicare coverage for individuals exposed to environmental health hazards.
 Sec. 10324. Protections for frontier States.
 Sec. 10325. Revision to skilled nursing facility prospective payment system.
 Sec. 10326. Pilot testing pay-for-performance programs for certain Medicare providers.
 Sec. 10327. Improvements to the physician quality reporting system.
 Sec. 10328. Improvement in part D medication therapy management (MTM) programs.
 Sec. 10329. Developing methodology to assess health plan value.
 Sec. 10330. Modernizing computer and data systems of the Centers for Medicare & Medicaid services to support improvements in care delivery.
 Sec. 10331. Public reporting of performance information.
 Sec. 10332. Availability of Medicare data for performance measurement.
 Sec. 10333. Community-based collaborative care networks.
 Sec. 10334. Minority health.
 Sec. 10335. Technical correction to the hospital value-based purchasing program.
 Sec. 10336. GAO study and report on Medicare beneficiary access to high-quality dialysis services.

Subtitle D—Provisions Relating to Title IV

- Sec. 10401. Amendments to subtitle A.
 Sec. 10402. Amendments to subtitle B.
 Sec. 10403. Amendments to subtitle C.
 Sec. 10404. Amendments to subtitle D.
 Sec. 10405. Amendments to subtitle E.
 Sec. 10406. Amendment relating to waiving co-insurance for preventive services.
 Sec. 10407. Better diabetes care.
 Sec. 10408. Grants for small businesses to provide comprehensive workplace wellness programs.
 Sec. 10409. Cures Acceleration Network.
 Sec. 10410. Centers of Excellence for Depression.
 Sec. 10411. Programs relating to congenital heart disease.
 Sec. 10412. Automated Defibrillation in Adam's Memory Act.
 Sec. 10413. Young women's breast health awareness and support of young women diagnosed with breast cancer.

Subtitle E—Provisions Relating to Title V

- Sec. 10501. Amendments to the Public Health Service Act, the Social Security Act, and title V of this Act.
 Sec. 10502. Infrastructure to Expand Access to Care.
 Sec. 10503. Community Health Centers and the National Health Service Corps Fund.
 Sec. 10504. Demonstration project to provide access to affordable care.

Subtitle F—Provisions Relating to Title VI

- Sec. 10601. Revisions to limitation on Medicare exception to the prohibition on certain physician referrals for hospitals.

- Sec. 10602. Clarifications to patient-centered outcomes research.
 Sec. 10603. Striking provisions relating to individual provider application fees.
 Sec. 10604. Technical correction to section 6405.
 Sec. 10605. Certain other providers permitted to conduct face to face encounter for home health services.
 Sec. 10606. Health care fraud enforcement.
 Sec. 10607. State demonstration programs to evaluate alternatives to current medical tort litigation.
 Sec. 10608. Extension of medical malpractice coverage to free clinics.
 Sec. 10609. Labeling changes.
Subtitle G—Provisions Relating to Title VIII
 Sec. 10801. Provisions relating to title VIII.
Subtitle H—Provisions Relating to Title IX
 Sec. 10901. Modifications to excise tax on high cost employer-sponsored health coverage.
 Sec. 10902. Inflation adjustment of limitation on health flexible spending arrangements under cafeteria plans.
 Sec. 10903. Modification of limitation on charges by charitable hospitals.
 Sec. 10904. Modification of annual fee on medical device manufacturers and importers.
 Sec. 10905. Modification of annual fee on health insurance providers.
 Sec. 10906. Modifications to additional hospital insurance tax on high-income taxpayers.
 Sec. 10907. Excise tax on indoor tanning services in lieu of elective cosmetic medical procedures.
 Sec. 10908. Exclusion for assistance provided to participants in State student loan repayment programs for certain health professionals.
 Sec. 10909. Expansion of adoption credit and adoption assistance programs.

TITLE I—QUALITY, AFFORDABLE HEALTH CARE FOR ALL AMERICANS

Subtitle A—Immediate Improvements in Health Care Coverage for All Americans

SEC. 1001. AMENDMENTS TO THE PUBLIC HEALTH SERVICE ACT.

Part A of title XXVII of the Public Health Service Act (42 U.S.C. 300gg et seq.) is amended—

(1) by striking the part heading and inserting the following:

“PART A—INDIVIDUAL AND GROUP MARKET REFORMS”;

(2) by redesignating sections 2704 through 2707 as sections 2725 through 2728, respectively;

(3) by redesignating sections 2711 through 2713 as sections 2731 through 2733, respectively;

(4) by redesignating sections 2721 through 2723 as sections 2735 through 2737, respectively; and

(5) by inserting after section 2702, the following:

“Subpart II—Improving Coverage

“SEC. 2711. NO LIFETIME OR ANNUAL LIMITS.

“(a) IN GENERAL.—A group health plan and a health insurance issuer offering group or individual health insurance coverage may not establish—

“(1) lifetime limits on the dollar value of benefits for any participant or beneficiary; or

“(2) unreasonable annual limits (within the meaning of section 223 of the Internal Revenue Code of 1986) on the dollar value of benefits for any participant or beneficiary.

“(b) PER BENEFICIARY LIMITS.—Subsection (a) shall not be construed to prevent a group health plan or health insurance coverage that is not required to provide essential health benefits under section 1302(b) of the Patient Protection and Affordable Care Act from placing annual or lifetime per beneficiary limits on specific covered

benefits to the extent that such limits are otherwise permitted under Federal or State law.

“SEC. 2712. PROHIBITION ON RESCISSIONS.

“A group health plan and a health insurance issuer offering group or individual health insurance coverage shall not rescind such plan or coverage with respect to an enrollee once the enrollee is covered under such plan or coverage involved, except that this section shall not apply to a covered individual who has performed an act or practice that constitutes fraud or makes an intentional misrepresentation of material fact as prohibited by the terms of the plan or coverage. Such plan or coverage may not be cancelled except with prior notice to the enrollee, and only as permitted under section 2702(c) or 2742(b).

“SEC. 2713. COVERAGE OF PREVENTIVE HEALTH SERVICES.

“(a) *IN GENERAL.*—A group health plan and a health insurance issuer offering group or individual health insurance coverage shall, at a minimum provide coverage for and shall not impose any cost sharing requirements for—

“(1) evidence-based items or services that have in effect a rating of ‘A’ or ‘B’ in the current recommendations of the United States Preventive Services Task Force;

“(2) immunizations that have in effect a recommendation from the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention with respect to the individual involved; and

“(3) with respect to infants, children, and adolescents, evidence-informed preventive care and screenings provided for in the comprehensive guidelines supported by the Health Resources and Services Administration.

“(4) with respect to women, such additional preventive care and screenings not described in paragraph (1) as provided for in comprehensive guidelines supported by the Health Resources and Services Administration for purposes of this paragraph.

“(5) for the purposes of this Act, and for the purposes of any other provision of law, the current recommendations of the United States Preventive Services Task Force regarding breast cancer screening, mammography, and prevention shall be considered the most current other than those issued in or around November 2009.

Nothing in this subsection shall be construed to prohibit a plan or issuer from providing coverage for services in addition to those recommended by United States Preventive Services Task Force or to deny coverage for services that are not recommended by such Task Force.

“(b) *INTERVAL.*—

“(1) *IN GENERAL.*—The Secretary shall establish a minimum interval between the date on which a recommendation described in subsection (a)(1) or (a)(2) or a guideline under subsection (a)(3) is issued and the plan year with respect to which the requirement described in subsection (a) is effective with respect to the service described in such recommendation or guideline.

“(2) *MINIMUM.*—The interval described in paragraph (1) shall not be less than 1 year.

“(c) *VALUE-BASED INSURANCE DESIGN.*—The Secretary may develop guidelines to permit a group health plan and a health insurance issuer offering group or individual health insurance coverage to utilize value-based insurance designs.

“SEC. 2714. EXTENSION OF DEPENDENT COVERAGE.

“(a) *IN GENERAL.*—A group health plan and a health insurance issuer offering group or individual health insurance coverage that provides dependent coverage of children shall continue to make such coverage available for an adult child (who is not married) until the child turns 26 years of age. Nothing in this section shall require a health plan or a health insurance issuer

described in the preceding sentence to make coverage available for a child of a child receiving dependent coverage.

“(b) *REGULATIONS.*—The Secretary shall promulgate regulations to define the dependents to which coverage shall be made available under subsection (a).

“(c) *RULE OF CONSTRUCTION.*—Nothing in this section shall be construed to modify the definition of ‘dependent’ as used in the Internal Revenue Code of 1986 with respect to the tax treatment of the cost of coverage.

“SEC. 2715. DEVELOPMENT AND UTILIZATION OF UNIFORM EXPLANATION OF COVERAGE DOCUMENTS AND STANDARDIZED DEFINITIONS.

“(a) *IN GENERAL.*—Not later than 12 months after the date of enactment of the Patient Protection and Affordable Care Act, the Secretary shall develop standards for use by a group health plan and a health insurance issuer offering group or individual health insurance coverage, in compiling and providing to enrollees a summary of benefits and coverage explanation that accurately describes the benefits and coverage under the applicable plan or coverage. In developing such standards, the Secretary shall consult with the National Association of Insurance Commissioners (referred to in this section as the ‘NAIC’), a working group composed of representatives of health insurance-related consumer advocacy organizations, health insurance issuers, health care professionals, patient advocates including those representing individuals with limited English proficiency, and other qualified individuals.

“(b) *REQUIREMENTS.*—The standards for the summary of benefits and coverage developed under subsection (a) shall provide for the following:

“(1) *APPEARANCE.*—The standards shall ensure that the summary of benefits and coverage is presented in a uniform format that does not exceed 4 pages in length and does not include print smaller than 12-point font.

“(2) *LANGUAGE.*—The standards shall ensure that the summary is presented in a culturally and linguistically appropriate manner and utilizes terminology understandable by the average plan enrollee.

“(3) *CONTENTS.*—The standards shall ensure that the summary of benefits and coverage includes—

“(A) uniform definitions of standard insurance terms and medical terms (consistent with subsection (g)) so that consumers may compare health insurance coverage and understand the terms of coverage (or exception to such coverage);

“(B) a description of the coverage, including cost sharing for—

“(i) each of the categories of the essential health benefits described in subparagraphs (A) through (J) of section 1302(b)(1) of the Patient Protection and Affordable Care Act; and

“(ii) other benefits, as identified by the Secretary;

“(C) the exceptions, reductions, and limitations on coverage;

“(D) the cost-sharing provisions, including deductible, coinsurance, and co-payment obligations;

“(E) the renewability and continuation of coverage provisions;

“(F) a coverage facts label that includes examples to illustrate common benefits scenarios, including pregnancy and serious or chronic medical conditions and related cost sharing, such scenarios to be based on recognized clinical practice guidelines;

“(G) a statement of whether the plan or coverage—

“(i) provides minimum essential coverage (as defined under section 5000A(f) of the Internal Revenue Code 1986); and

“(ii) ensures that the plan or coverage share of the total allowed costs of benefits provided under the plan or coverage is not less than 60 percent of such costs;

“(H) a statement that the outline is a summary of the policy or certificate and that the coverage document itself should be consulted to determine the governing contractual provisions; and

“(I) a contact number for the consumer to call with additional questions and an Internet web address where a copy of the actual individual coverage policy or group certificate of coverage can be reviewed and obtained.

“(c) *PERIODIC REVIEW AND UPDATING.*—The Secretary shall periodically review and update, as appropriate, the standards developed under this section.

“(d) *REQUIREMENT TO PROVIDE.*—

“(1) *IN GENERAL.*—Not later than 24 months after the date of enactment of the Patient Protection and Affordable Care Act, each entity described in paragraph (3) shall provide, prior to any enrollment restriction, a summary of benefits and coverage explanation pursuant to the standards developed by the Secretary under subsection (a) to—

“(A) an applicant at the time of application;

“(B) an enrollee prior to the time of enrollment or reenrollment, as applicable; and

“(C) a policyholder or certificate holder at the time of issuance of the policy or delivery of the certificate.

“(2) *COMPLIANCE.*—An entity described in paragraph (3) is deemed to be in compliance with this section if the summary of benefits and coverage described in subsection (a) is provided in paper or electronic form.

“(3) *ENTITIES IN GENERAL.*—An entity described in this paragraph is—

“(A) a health insurance issuer (including a group health plan that is not a self-insured plan) offering health insurance coverage within the United States; or

“(B) in the case of a self-insured group health plan, the plan sponsor or designated administrator of the plan (as such terms are defined in section 3(16) of the Employee Retirement Income Security Act of 1974).

“(4) *NOTICE OF MODIFICATIONS.*—If a group health plan or health insurance issuer makes any material modification in any of the terms of the plan or coverage involved (as defined for purposes of section 102 of the Employee Retirement Income Security Act of 1974) that is not reflected in the most recently provided summary of benefits and coverage, the plan or issuer shall provide notice of such modification to enrollees not later than 60 days prior to the date on which such modification will become effective.

“(e) *PREEMPTION.*—The standards developed under subsection (a) shall preempt any related State standards that require a summary of benefits and coverage that provides less information to consumers than that required to be provided under this section, as determined by the Secretary.

“(f) *FAILURE TO PROVIDE.*—An entity described in subsection (d)(3) that willfully fails to provide the information required under this section shall be subject to a fine of not more than \$1,000 for each such failure. Such failure with respect to each enrollee shall constitute a separate offense for purposes of this subsection.

“(g) *DEVELOPMENT OF STANDARD DEFINITIONS.*—

“(1) *IN GENERAL.*—The Secretary shall, by regulation, provide for the development of standards for the definitions of terms used in health insurance coverage, including the insurance-related terms described in paragraph (2) and the medical terms described in paragraph (3).

“(2) *INSURANCE-RELATED TERMS.*—The insurance-related terms described in this paragraph

are premium, deductible, co-insurance, co-payment, out-of-pocket limit, preferred provider, non-preferred provider, out-of-network co-payments, UCR (usual, customary and reasonable) fees, excluded services, grievance and appeals, and such other terms as the Secretary determines are important to define so that consumers may compare health insurance coverage and understand the terms of their coverage.

“(3) **MEDICAL TERMS.**—The medical terms described in this paragraph are hospitalization, hospital outpatient care, emergency room care, physician services, prescription drug coverage, durable medical equipment, home health care, skilled nursing care, rehabilitation services, hospice services, emergency medical transportation, and such other terms as the Secretary determines are important to define so that consumers may compare the medical benefits offered by health insurance and understand the extent of those medical benefits (or exceptions to those benefits).

“SEC. 2716. PROHIBITION OF DISCRIMINATION BASED ON SALARY.

“(a) **IN GENERAL.**—The plan sponsor of a group health plan (other than a self-insured plan) may not establish rules relating to the health insurance coverage eligibility (including continued eligibility) of any full-time employee under the terms of the plan that are based on the total hourly or annual salary of the employee or otherwise establish eligibility rules that have the effect of discriminating in favor of higher wage employees.

“(b) **LIMITATION.**—Subsection (a) shall not be construed to prohibit a plan sponsor from establishing contribution requirements for enrollment in the plan or coverage that provide for the payment by employees with lower hourly or annual compensation of a lower dollar or percentage contribution than the payment required of similarly situated employees with a higher hourly or annual compensation.

“SEC. 2717. ENSURING THE QUALITY OF CARE.

“(a) **QUALITY REPORTING.**—

“(1) **IN GENERAL.**—Not later than 2 years after the date of enactment of the Patient Protection and Affordable Care Act, the Secretary, in consultation with experts in health care quality and stakeholders, shall develop reporting requirements for use by a group health plan, and a health insurance issuer offering group or individual health insurance coverage, with respect to plan or coverage benefits and health care provider reimbursement structures that—

“(A) improve health outcomes through the implementation of activities such as quality reporting, effective case management, care coordination, chronic disease management, and medication and care compliance initiatives, including through the use of the medical homes model as defined for purposes of section 3602 of the Patient Protection and Affordable Care Act, for treatment or services under the plan or coverage;

“(B) implement activities to prevent hospital readmissions through a comprehensive program for hospital discharge that includes patient-centered education and counseling, comprehensive discharge planning, and post discharge reinforcement by an appropriate health care professional;

“(C) implement activities to improve patient safety and reduce medical errors through the appropriate use of best clinical practices, evidence based medicine, and health information technology under the plan or coverage; and

“(D) implement wellness and health promotion activities.

“(2) **REPORTING REQUIREMENTS.**—

“(A) **IN GENERAL.**—A group health plan and a health insurance issuer offering group or individual health insurance coverage shall annually submit to the Secretary, and to enrollees under

the plan or coverage, a report on whether the benefits under the plan or coverage satisfy the elements described in subparagraphs (A) through (D) of paragraph (1).

“(B) **TIMING OF REPORTS.**—A report under subparagraph (A) shall be made available to an enrollee under the plan or coverage during each open enrollment period.

“(C) **AVAILABILITY OF REPORTS.**—The Secretary shall make reports submitted under subparagraph (A) available to the public through an Internet website.

“(D) **PENALTIES.**—In developing the reporting requirements under paragraph (1), the Secretary may develop and impose appropriate penalties for non-compliance with such requirements.

“(E) **EXCEPTIONS.**—In developing the reporting requirements under paragraph (1), the Secretary may provide for exceptions to such requirements for group health plans and health insurance issuers that substantially meet the goals of this section.

“(b) **WELLNESS AND PREVENTION PROGRAMS.**—For purposes of subsection (a)(1)(D), wellness and health promotion activities may include personalized wellness and prevention services, which are coordinated, maintained or delivered by a health care provider, a wellness and prevention plan manager, or a health, wellness or prevention services organization that conducts health risk assessments or offers ongoing face-to-face, telephonic or web-based intervention efforts for each of the program's participants, and which may include the following wellness and prevention efforts:

“(1) Smoking cessation.

“(2) Weight management.

“(3) Stress management.

“(4) Physical fitness.

“(5) Nutrition.

“(6) Heart disease prevention.

“(7) Healthy lifestyle support.

“(8) Diabetes prevention.

“(c) **REGULATIONS.**—Not later than 2 years after the date of enactment of the Patient Protection and Affordable Care Act, the Secretary shall promulgate regulations that provide criteria for determining whether a reimbursement structure is described in subsection (a).

“(d) **STUDY AND REPORT.**—Not later than 180 days after the date on which regulations are promulgated under subsection (c), the Government Accountability Office shall review such regulations and conduct a study and submit to the Committee on Health, Education, Labor, and Pensions of the Senate and the Committee on Energy and Commerce of the House of Representatives a report regarding the impact the activities under this section have had on the quality and cost of health care.

“SEC. 2718. BRINGING DOWN THE COST OF HEALTH CARE COVERAGE.

“(a) **CLEAR ACCOUNTING FOR COSTS.**—A health insurance issuer offering group or individual health insurance coverage shall, with respect to each plan year, submit to the Secretary a report concerning the percentage of total premium revenue that such coverage expends—

“(1) on reimbursement for clinical services provided to enrollees under such coverage;

“(2) for activities that improve health care quality; and

“(3) on all other non-claims costs, including an explanation of the nature of such costs, and excluding State taxes and licensing or regulatory fees.

The Secretary shall make reports received under this section available to the public on the Internet website of the Department of Health and Human Services.

“(b) **ENSURING THAT CONSUMERS RECEIVE VALUE FOR THEIR PREMIUM PAYMENTS.**—

“(1) **REQUIREMENT TO PROVIDE VALUE FOR PREMIUM PAYMENTS.**—A health insurance issuer

offering group or individual health insurance coverage shall, with respect to each plan year, provide an annual rebate to each enrollee under such coverage, on a pro rata basis, in an amount that is equal to the amount by which premium revenue expended by the issuer on activities described in subsection (a)(3) exceeds—

“(A) with respect to a health insurance issuer offering coverage in the group market, 20 percent, or such lower percentage as a State may by regulation determine; or

“(B) with respect to a health insurance issuer offering coverage in the individual market, 25 percent, or such lower percentage as a State may by regulation determine, except that such percentage shall be adjusted to the extent the Secretary determines that the application of such percentage with a State may destabilize the existing individual market in such State.

“(2) **CONSIDERATION IN SETTING PERCENTAGES.**—In determining the percentages under paragraph (1), a State shall seek to ensure adequate participation by health insurance issuers, competition in the health insurance market in the State, and value for consumers so that premiums are used for clinical services and quality improvements.

“(3) **TERMINATION.**—The provisions of this subsection shall have no force or effect after December 31, 2013.

“(c) **STANDARD HOSPITAL CHARGES.**—Each hospital operating within the United States shall for each year establish (and update) and make public (in accordance with guidelines developed by the Secretary) a list of the hospital's standard charges for items and services provided by the hospital, including for diagnosis-related groups established under section 1886(d)(4) of the Social Security Act.

“(d) **DEFINITIONS.**—The Secretary, in consultation with the National Association of Insurance Commissioners, shall establish uniform definitions for the activities reported under subsection (a).

“SEC. 2719. APPEALS PROCESS.

“A group health plan and a health insurance issuer offering group or individual health insurance coverage shall implement an effective appeals process for appeals of coverage determinations and claims, under which the plan or issuer shall, at a minimum—

“(1) have in effect an internal claims appeal process;

“(2) provide notice to enrollees, in a culturally and linguistically appropriate manner, of available internal and external appeals processes, and the availability of any applicable office of health insurance consumer assistance or ombudsman established under section 2793 to assist such enrollees with the appeals processes;

“(3) allow an enrollee to review their file, to present evidence and testimony as part of the appeals process, and to receive continued coverage pending the outcome of the appeals process; and

“(4) provide an external review process for such plans and issuers that, at a minimum, includes the consumer protections set forth in the Uniform External Review Model Act promulgated by the National Association of Insurance Commissioners and is binding on such plans.”.

SEC. 1002. HEALTH INSURANCE CONSUMER INFORMATION.

Part C of title XXVII of the Public Health Service Act (42 U.S.C. 300gg–91 et seq.) is amended by adding at the end the following:

“SEC. 2793. HEALTH INSURANCE CONSUMER INFORMATION.

“(a) **IN GENERAL.**—The Secretary shall award grants to States to enable such States (or the Exchanges operating in such States) to establish, expand, or provide support for—

“(1) offices of health insurance consumer assistance; or

“(2) health insurance ombudsman programs.

“(b) ELIGIBILITY.—

“(1) IN GENERAL.—To be eligible to receive a grant, a State shall designate an independent office of health insurance consumer assistance, or an ombudsman, that, directly or in coordination with State health insurance regulators and consumer assistance organizations, receives and responds to inquiries and complaints concerning health insurance coverage with respect to Federal health insurance requirements and under State law.

“(2) CRITERIA.—A State that receives a grant under this section shall comply with criteria established by the Secretary for carrying out activities under such grant.

“(c) DUTIES.—The office of health insurance consumer assistance or health insurance ombudsman shall—

“(1) assist with the filing of complaints and appeals, including filing appeals with the internal appeal or grievance process of the group health plan or health insurance issuer involved and providing information about the external appeal process;

“(2) collect, track, and quantify problems and inquiries encountered by consumers;

“(3) educate consumers on their rights and responsibilities with respect to group health plans and health insurance coverage;

“(4) assist consumers with enrollment in a group health plan or health insurance coverage by providing information, referral, and assistance; and

“(5) resolve problems with obtaining premium tax credits under section 36B of the Internal Revenue Code of 1986.

“(d) DATA COLLECTION.—As a condition of receiving a grant under subsection (a), an office of health insurance consumer assistance or ombudsman program shall be required to collect and report data to the Secretary on the types of problems and inquiries encountered by consumers. The Secretary shall utilize such data to identify areas where more enforcement action is necessary and shall share such information with State insurance regulators, the Secretary of Labor, and the Secretary of the Treasury for use in the enforcement activities of such agencies.

“(e) FUNDING.—

“(1) INITIAL FUNDING.—There is hereby appropriated to the Secretary, out of any funds in the Treasury not otherwise appropriated, \$30,000,000 for the first fiscal year for which this section applies to carry out this section. Such amount shall remain available without fiscal year limitation.

“(2) AUTHORIZATION FOR SUBSEQUENT YEARS.—There is authorized to be appropriated to the Secretary for each fiscal year following the fiscal year described in paragraph (1), such sums as may be necessary to carry out this section.”

SEC. 1003. ENSURING THAT CONSUMERS GET VALUE FOR THEIR DOLLARS.

Part C of title XXVII of the Public Health Service Act (42 U.S.C. 300gg–91 et seq.), as amended by section 1002, is further amended by adding at the end the following:

“SEC. 2794. ENSURING THAT CONSUMERS GET VALUE FOR THEIR DOLLARS.

“(a) INITIAL PREMIUM REVIEW PROCESS.—

“(1) IN GENERAL.—The Secretary, in conjunction with States, shall establish a process for the annual review, beginning with the 2010 plan year and subject to subsection (b)(2)(A), of unreasonable increases in premiums for health insurance coverage.

“(2) JUSTIFICATION AND DISCLOSURE.—The process established under paragraph (1) shall require health insurance issuers to submit to the Secretary and the relevant State a justification for an unreasonable premium increase prior to the implementation of the increase. Such issuers

shall prominently post such information on their Internet websites. The Secretary shall ensure the public disclosure of information on such increases and justifications for all health insurance issuers.

“(b) CONTINUING PREMIUM REVIEW PROCESS.—

“(1) INFORMING SECRETARY OF PREMIUM INCREASE PATTERNS.—As a condition of receiving a grant under subsection (c)(1), a State, through its Commissioner of Insurance, shall—

“(A) provide the Secretary with information about trends in premium increases in health insurance coverage in premium rating areas in the State; and

“(B) make recommendations, as appropriate, to the State Exchange about whether particular health insurance issuers should be excluded from participation in the Exchange based on a pattern or practice of excessive or unjustified premium increases.

“(2) MONITORING BY SECRETARY OF PREMIUM INCREASES.—

“(A) IN GENERAL.—Beginning with plan years beginning in 2014, the Secretary, in conjunction with the States and consistent with the provisions of subsection (a)(2), shall monitor premium increases of health insurance coverage offered through an Exchange and outside of an Exchange.

“(B) CONSIDERATION IN OPENING EXCHANGE.—In determining under section 1312(f)(2)(B) of the Patient Protection and Affordable Care Act whether to offer qualified health plans in the large group market through an Exchange, the State shall take into account any excess of premium growth outside of the Exchange as compared to the rate of such growth inside the Exchange.

“(c) GRANTS IN SUPPORT OF PROCESS.—

“(1) PREMIUM REVIEW GRANTS DURING 2010 THROUGH 2014.—The Secretary shall carry out a program to award grants to States during the 5-year period beginning with fiscal year 2010 to assist such States in carrying out subsection (a), including—

“(A) in reviewing and, if appropriate under State law, approving premium increases for health insurance coverage; and

“(B) in providing information and recommendations to the Secretary under subsection (b)(1).

“(2) FUNDING.—

“(A) IN GENERAL.—Out of all funds in the Treasury not otherwise appropriated, there are appropriated to the Secretary \$250,000,000, to be available for expenditure for grants under paragraph (1) and subparagraph (B).

“(B) FURTHER AVAILABILITY FOR INSURANCE REFORM AND CONSUMER PROTECTION.—If the amounts appropriated under subparagraph (A) are not fully obligated under grants under paragraph (1) by the end of fiscal year 2014, any remaining funds shall remain available to the Secretary for grants to States for planning and implementing the insurance reforms and consumer protections under part A.

“(C) ALLOCATION.—The Secretary shall establish a formula for determining the amount of any grant to a State under this subsection. Under such formula—

“(i) the Secretary shall consider the number of plans of health insurance coverage offered in each State and the population of the State; and

“(ii) no State qualifying for a grant under paragraph (1) shall receive less than \$1,000,000, or more than \$5,000,000 for a grant year.”

SEC. 1004. EFFECTIVE DATES.

(a) IN GENERAL.—Except as provided for in subsection (b), this subtitle (and the amendments made by this subtitle) shall become effective for plan years beginning on or after the date that is 6 months after the date of enactment of this Act, except that the amendments

made by sections 1002 and 1003 shall become effective for fiscal years beginning with fiscal year 2010.

(b) SPECIAL RULE.—The amendments made by sections 1002 and 1003 shall take effect on the date of enactment of this Act.

Subtitle B—Immediate Actions to Preserve and Expand Coverage

SEC. 1101. IMMEDIATE ACCESS TO INSURANCE FOR UNINSURED INDIVIDUALS WITH A PREEXISTING CONDITION.

(a) IN GENERAL.—Not later than 90 days after the date of enactment of this Act, the Secretary shall establish a temporary high risk health insurance pool program to provide health insurance coverage for eligible individuals during the period beginning on the date on which such program is established and ending on January 1, 2014.

(b) ADMINISTRATION.—

(1) IN GENERAL.—The Secretary may carry out the program under this section directly or through contracts to eligible entities.

(2) ELIGIBLE ENTITIES.—To be eligible for a contract under paragraph (1), an entity shall—

(A) be a State or nonprofit private entity;

(B) submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require; and

(C) agree to utilize contract funding to establish and administer a qualified high risk pool for eligible individuals.

(3) MAINTENANCE OF EFFORT.—To be eligible to enter into a contract with the Secretary under this subsection, a State shall agree not to reduce the annual amount the State expended for the operation of one or more State high risk pools during the year preceding the year in which such contract is entered into.

(c) QUALIFIED HIGH RISK POOL.—

(1) IN GENERAL.—Amounts made available under this section shall be used to establish a qualified high risk pool that meets the requirements of paragraph (2).

(2) REQUIREMENTS.—A qualified high risk pool meets the requirements of this paragraph if such pool—

(A) provides to all eligible individuals health insurance coverage that does not impose any preexisting condition exclusion with respect to such coverage;

(B) provides health insurance coverage—

(i) in which the issuer's share of the total allowed costs of benefits provided under such coverage is not less than 65 percent of such costs; and

(ii) that has an out of pocket limit not greater than the applicable amount described in section 223(c)(2) of the Internal Revenue Code of 1986 for the year involved, except that the Secretary may modify such limit if necessary to ensure the pool meets the actuarial value limit under clause (i);

(C) ensures that with respect to the premium rate charged for health insurance coverage offered to eligible individuals through the high risk pool, such rate shall—

(i) except as provided in clause (ii), vary only as provided for under section 2701 of the Public Health Service Act (as amended by this Act and notwithstanding the date on which such amendments take effect);

(ii) vary on the basis of age by a factor of not greater than 4 to 1; and

(iii) be established at a standard rate for a standard population; and

(D) meets any other requirements determined appropriate by the Secretary.

(d) ELIGIBLE INDIVIDUAL.—An individual shall be deemed to be an eligible individual for purposes of this section if such individual—

(1) is a citizen or national of the United States or is lawfully present in the United States (as determined in accordance with section 1411);

(2) has not been covered under creditable coverage (as defined in section 2701(c)(1) of the Public Health Service Act as in effect on the date of enactment of this Act) during the 6-month period prior to the date on which such individual is applying for coverage through the high risk pool; and

(3) has a pre-existing condition, as determined in a manner consistent with guidance issued by the Secretary.

(e) **PROTECTION AGAINST DUMPING RISK BY INSURERS.**—

(1) **IN GENERAL.**—The Secretary shall establish criteria for determining whether health insurance issuers and employment-based health plans have discouraged an individual from remaining enrolled in prior coverage based on that individual's health status.

(2) **SANCTIONS.**—An issuer or employment-based health plan shall be responsible for reimbursing the program under this section for the medical expenses incurred by the program for an individual who, based on criteria established by the Secretary, the Secretary finds was encouraged by the issuer to disenroll from health benefits coverage prior to enrolling in coverage through the program. The criteria shall include at least the following circumstances:

(A) In the case of prior coverage obtained through an employer, the provision by the employer, group health plan, or the issuer of money or other financial consideration for disenrolling from the coverage.

(B) In the case of prior coverage obtained directly from an issuer or under an employment-based health plan—

(i) the provision by the issuer or plan of money or other financial consideration for disenrolling from the coverage; or

(ii) in the case of an individual whose premium for the prior coverage exceeded the premium required by the program (adjusted based on the age factors applied to the prior coverage)—

(I) the prior coverage is a policy that is no longer being actively marketed (as defined by the Secretary) by the issuer; or

(II) the prior coverage is a policy for which duration of coverage from issue or health status are factors that can be considered in determining premiums at renewal.

(3) **CONSTRUCTION.**—Nothing in this subsection shall be construed as constituting exclusive remedies for violations of criteria established under paragraph (1) or as preventing States from applying or enforcing such paragraph or other provisions under law with respect to health insurance issuers.

(f) **OVERSIGHT.**—The Secretary shall establish—

(1) an appeals process to enable individuals to appeal a determination under this section; and

(2) procedures to protect against waste, fraud, and abuse.

(g) **FUNDING; TERMINATION OF AUTHORITY.**—

(1) **IN GENERAL.**—There is appropriated to the Secretary, out of any moneys in the Treasury not otherwise appropriated, \$5,000,000,000 to pay claims against (and the administrative costs of) the high risk pool under this section that are in excess of the amount of premiums collected from eligible individuals enrolled in the high risk pool. Such funds shall be available without fiscal year limitation.

(2) **INSUFFICIENT FUNDS.**—If the Secretary estimates for any fiscal year that the aggregate amounts available for the payment of the expenses of the high risk pool will be less than the actual amount of such expenses, the Secretary shall make such adjustments as are necessary to eliminate such deficit.

(3) **TERMINATION OF AUTHORITY.**—

(A) **IN GENERAL.**—Except as provided in subparagraph (B), coverage of eligible individuals

under a high risk pool in a State shall terminate on January 1, 2014.

(B) **TRANSITION TO EXCHANGE.**—The Secretary shall develop procedures to provide for the transition of eligible individuals enrolled in health insurance coverage offered through a high risk pool established under this section into qualified health plans offered through an Exchange. Such procedures shall ensure that there is no lapse in coverage with respect to the individual and may extend coverage after the termination of the risk pool involved, if the Secretary determines necessary to avoid such a lapse.

(4) **LIMITATIONS.**—The Secretary has the authority to stop taking applications for participation in the program under this section to comply with the funding limitation provided for in paragraph (1).

(5) **RELATION TO STATE LAWS.**—The standards established under this section shall supersede any State law or regulation (other than State licensing laws or State laws relating to plan solvency) with respect to qualified high risk pools which are established in accordance with this section.

SEC. 1102. REINSURANCE FOR EARLY RETIREES.

(a) **ADMINISTRATION.**—

(1) **IN GENERAL.**—Not later than 90 days after the date of enactment of this Act, the Secretary shall establish a temporary reinsurance program to provide reimbursement to participating employment-based plans for a portion of the cost of providing health insurance coverage to early retirees (and to the eligible spouses, surviving spouses, and dependents of such retirees) during the period beginning on the date on which such program is established and ending on January 1, 2014.

(2) **REFERENCE.**—In this section:

(A) **HEALTH BENEFITS.**—The term “health benefits” means medical, surgical, hospital, prescription drug, and such other benefits as shall be determined by the Secretary, whether self-funded, or delivered through the purchase of insurance or otherwise.

(B) **EMPLOYMENT-BASED PLAN.**—The term “employment-based plan” means a group health benefits plan that—

(i) is—

(I) maintained by one or more current or former employers (including without limitation any State or local government or political subdivision thereof), employee organization, a voluntary employees' beneficiary association, or a committee or board of individuals appointed to administer such plan; or

(II) a multiemployer plan (as defined in section 3(37) of the Employee Retirement Income Security Act of 1974); and

(ii) provides health benefits to early retirees.

(C) **EARLY RETIREES.**—The term “early retirees” means individuals who are age 55 and older but are not eligible for coverage under title XVIII of the Social Security Act, and who are not active employees of an employer maintaining, or currently contributing to, the employment-based plan or of any employer that has made substantial contributions to fund such plan.

(b) **PARTICIPATION.**—

(1) **EMPLOYMENT-BASED PLAN ELIGIBILITY.**—A participating employment-based plan is an employment-based plan that—

(A) meets the requirements of paragraph (2) with respect to health benefits provided under the plan; and

(B) submits to the Secretary an application for participation in the program, at such time, in such manner, and containing such information as the Secretary shall require.

(2) **EMPLOYMENT-BASED HEALTH BENEFITS.**—An employment-based plan meets the requirements of this paragraph if the plan—

(A) implements programs and procedures to generate cost-savings with respect to participants with chronic and high-cost conditions;

(B) provides documentation of the actual cost of medical claims involved; and

(C) is certified by the Secretary.

(c) **PAYMENTS.**—

(1) **SUBMISSION OF CLAIMS.**—

(A) **IN GENERAL.**—A participating employment-based plan shall submit claims for reimbursement to the Secretary which shall contain documentation of the actual costs of the items and services for which each claim is being submitted.

(B) **BASIS FOR CLAIMS.**—Claims submitted under subparagraph (A) shall be based on the actual amount expended by the participating employment-based plan involved within the plan year for the health benefits provided to an early retiree or the spouse, surviving spouse, or dependent of such retiree. In determining the amount of a claim for purposes of this subsection, the participating employment-based plan shall take into account any negotiated price concessions (such as discounts, direct or indirect subsidies, rebates, and direct or indirect remunerations) obtained by such plan with respect to such health benefit. For purposes of determining the amount of any such claim, the costs paid by the early retiree or the retiree's spouse, surviving spouse, or dependent in the form of deductibles, co-payments, or co-insurance shall be included in the amounts paid by the participating employment-based plan.

(2) **PROGRAM PAYMENTS.**—If the Secretary determines that a participating employment-based plan has submitted a valid claim under paragraph (1), the Secretary shall reimburse such plan for 80 percent of that portion of the costs attributable to such claim that exceed \$15,000, subject to the limits contained in paragraph (3).

(3) **LIMIT.**—To be eligible for reimbursement under the program, a claim submitted by a participating employment-based plan shall not be less than \$15,000 nor greater than \$90,000. Such amounts shall be adjusted each fiscal year based on the percentage increase in the Medical Care Component of the Consumer Price Index for all urban consumers (rounded to the nearest multiple of \$1,000) for the year involved.

(4) **USE OF PAYMENTS.**—Amounts paid to a participating employment-based plan under this subsection shall be used to lower costs for the plan. Such payments may be used to reduce premium costs for an entity described in subsection (a)(2)(B)(i) or to reduce premium contributions, co-payments, deductibles, co-insurance, or other out-of-pocket costs for plan participants. Such payments shall not be used as general revenues for an entity described in subsection (a)(2)(B)(i). The Secretary shall develop a mechanism to monitor the appropriate use of such payments by such entities.

(5) **PAYMENTS NOT TREATED AS INCOME.**—Payments received under this subsection shall not be included in determining the gross income of an entity described in subsection (a)(2)(B)(i) that is maintaining or currently contributing to a participating employment-based plan.

(6) **APPEALS.**—The Secretary shall establish—

(A) an appeals process to permit participating employment-based plans to appeal a determination of the Secretary with respect to claims submitted under this section; and

(B) procedures to protect against fraud, waste, and abuse under the program.

(d) **AUDITS.**—The Secretary shall conduct annual audits of claims data submitted by participating employment-based plans under this section to ensure that such plans are in compliance with the requirements of this section.

(e) **FUNDING.**—There is appropriated to the Secretary, out of any moneys in the Treasury not otherwise appropriated, \$5,000,000,000 to carry out the program under this section. Such funds shall be available without fiscal year limitation.

(f) **LIMITATION.**—The Secretary has the authority to stop taking applications for participation in the program based on the availability of funding under subsection (e).

SEC. 1103. IMMEDIATE INFORMATION THAT ALLOWS CONSUMERS TO IDENTIFY AFFORDABLE COVERAGE OPTIONS.

(a) **INTERNET PORTAL TO AFFORDABLE COVERAGE OPTIONS.**—

(1) **IMMEDIATE ESTABLISHMENT.**—Not later than July 1, 2010, the Secretary, in consultation with the States, shall establish a mechanism, including an Internet website, through which a resident of any State may identify affordable health insurance coverage options in that State.

(2) **CONNECTING TO AFFORDABLE COVERAGE.**—An Internet website established under paragraph (1) shall, to the extent practicable, provide ways for residents of any State to receive information on at least the following coverage options:

(A) Health insurance coverage offered by health insurance issuers, other than coverage that provides reimbursement only for the treatment or mitigation of—

(i) a single disease or condition; or
(ii) an unreasonably limited set of diseases or conditions (as determined by the Secretary);

(B) Medicaid coverage under title XIX of the Social Security Act.

(C) Coverage under title XXI of the Social Security Act.

(D) A State health benefits high risk pool, to the extent that such high risk pool is offered in such State; and

(E) Coverage under a high risk pool under section 1101.

(b) **ENHANCING COMPARATIVE PURCHASING OPTIONS.**—

(1) **IN GENERAL.**—Not later than 60 days after the date of enactment of this Act, the Secretary shall develop a standardized format to be used for the presentation of information relating to the coverage options described in subsection (a)(2). Such format shall, at a minimum, require the inclusion of information on the percentage of total premium revenue expended on nonclinical costs (as reported under section 2718(a) of the Public Health Service Act), eligibility, availability, premium rates, and cost sharing with respect to such coverage options and be consistent with the standards adopted for the uniform explanation of coverage as provided for in section 2715 of the Public Health Service Act.

(2) **USE OF FORMAT.**—The Secretary shall utilize the format developed under paragraph (1) in compiling information concerning coverage options on the Internet website established under subsection (a).

(c) **AUTHORITY TO CONTRACT.**—The Secretary may carry out this section through contracts entered into with qualified entities.

SEC. 1104. ADMINISTRATIVE SIMPLIFICATION.

(a) **PURPOSE OF ADMINISTRATIVE SIMPLIFICATION.**—Section 261 of the Health Insurance Portability and Accountability Act of 1996 (42 U.S.C. 1320d note) is amended—

(1) by inserting “uniform” before “standards”; and

(2) by inserting “and to reduce the clerical burden on patients, health care providers, and health plans” before the period at the end.

(b) **OPERATING RULES FOR HEALTH INFORMATION TRANSACTIONS.**—

(1) **DEFINITION OF OPERATING RULES.**—Section 1171 of the Social Security Act (42 U.S.C. 1320d) is amended by adding at the end the following:

“(9) **OPERATING RULES.**—The term ‘operating rules’ means the necessary business rules and guidelines for the electronic exchange of information that are not defined by a standard or its implementation specifications as adopted for purposes of this part.”.

(2) **TRANSACTION STANDARDS; OPERATING RULES AND COMPLIANCE.**—Section 1173 of the So-

cial Security Act (42 U.S.C. 1320d–2) is amended—

(A) in subsection (a)(2), by adding at the end the following new subparagraph:

“(J) Electronic funds transfers.”;

(B) in subsection (a), by adding at the end the following new paragraph:

“(4) **REQUIREMENTS FOR FINANCIAL AND ADMINISTRATIVE TRANSACTIONS.**—

“(A) **IN GENERAL.**—The standards and associated operating rules adopted by the Secretary shall—

“(i) to the extent feasible and appropriate, enable determination of an individual’s eligibility and financial responsibility for specific services prior to or at the point of care;

“(ii) be comprehensive, requiring minimal augmentation by paper or other communications;

“(iii) provide for timely acknowledgment, response, and status reporting that supports a transparent claims and denial management process (including adjudication and appeals); and

“(iv) describe all data elements (including reason and remark codes) in unambiguous terms, require that such data elements be required or conditioned upon set values in other fields, and prohibit additional conditions (except where necessary to implement State or Federal law, or to protect against fraud and abuse).

“(B) **REDUCTION OF CLERICAL BURDEN.**—In adopting standards and operating rules for the transactions referred to under paragraph (1), the Secretary shall seek to reduce the number and complexity of forms (including paper and electronic forms) and data entry required by patients and providers.”; and

(C) by adding at the end the following new subsections:

“(g) **OPERATING RULES.**—

“(1) **IN GENERAL.**—The Secretary shall adopt a single set of operating rules for each transaction referred to under subsection (a)(1) with the goal of creating as much uniformity in the implementation of the electronic standards as possible. Such operating rules shall be consensus-based and reflect the necessary business rules affecting health plans and health care providers and the manner in which they operate pursuant to standards issued under Health Insurance Portability and Accountability Act of 1996.

“(2) **OPERATING RULES DEVELOPMENT.**—In adopting operating rules under this subsection, the Secretary shall consider recommendations for operating rules developed by a qualified nonprofit entity that meets the following requirements:

“(A) The entity focuses its mission on administrative simplification.

“(B) The entity demonstrates a multi-stakeholder and consensus-based process for development of operating rules, including representation by or participation from health plans, health care providers, vendors, relevant Federal agencies, and other standard development organizations.

“(C) The entity has a public set of guiding principles that ensure the operating rules and process are open and transparent, and supports nondiscrimination and conflict of interest policies that demonstrate a commitment to open, fair, and nondiscriminatory practices.

“(D) The entity builds on the transaction standards issued under Health Insurance Portability and Accountability Act of 1996.

“(E) The entity allows for public review and updates of the operating rules.

“(3) **REVIEW AND RECOMMENDATIONS.**—The National Committee on Vital and Health Statistics shall—

“(A) advise the Secretary as to whether a nonprofit entity meets the requirements under paragraph (2);

“(B) review the operating rules developed and recommended by such nonprofit entity;

“(C) determine whether such operating rules represent a consensus view of the health care stakeholders and are consistent with and do not conflict with other existing standards;

“(D) evaluate whether such operating rules are consistent with electronic standards adopted for health information technology; and

“(E) submit to the Secretary a recommendation as to whether the Secretary should adopt such operating rules.

“(4) **IMPLEMENTATION.**—

“(A) **IN GENERAL.**—The Secretary shall adopt operating rules under this subsection, by regulation in accordance with subparagraph (C), following consideration of the operating rules developed by the non-profit entity described in paragraph (2) and the recommendation submitted by the National Committee on Vital and Health Statistics under paragraph (3)(E) and having ensured consultation with providers.

“(B) **ADOPTION REQUIREMENTS; EFFECTIVE DATES.**—

“(i) **ELIGIBILITY FOR A HEALTH PLAN AND HEALTH CLAIM STATUS.**—The set of operating rules for eligibility for a health plan and health claim status transactions shall be adopted not later than July 1, 2011, in a manner ensuring that such operating rules are effective not later than January 1, 2013, and may allow for the use of a machine readable identification card.

“(ii) **ELECTRONIC FUNDS TRANSFERS AND HEALTH CARE PAYMENT AND REMITTANCE ADVICE.**—The set of operating rules for electronic funds transfers and health care payment and remittance advice transactions shall—

“(I) allow for automated reconciliation of the electronic payment with the remittance advice; and

“(II) be adopted not later than July 1, 2012, in a manner ensuring that such operating rules are effective not later than January 1, 2014.

“(iii) **HEALTH CLAIMS OR EQUIVALENT ENCOUNTER INFORMATION, ENROLLMENT AND DISENROLLMENT IN A HEALTH PLAN, HEALTH PLAN PREMIUM PAYMENTS, REFERRAL CERTIFICATION AND AUTHORIZATION.**—The set of operating rules for health claims or equivalent encounter information, enrollment and disenrollment in a health plan, health plan premium payments, and referral certification and authorization transactions shall be adopted not later than July 1, 2014, in a manner ensuring that such operating rules are effective not later than January 1, 2016.

“(C) **EXPEDITED RULEMAKING.**—The Secretary shall promulgate an interim final rule applying any standard or operating rule recommended by the National Committee on Vital and Health Statistics pursuant to paragraph (3). The Secretary shall accept and consider public comments on any interim final rule published under this subparagraph for 60 days after the date of such publication.

“(h) **COMPLIANCE.**—

“(1) **HEALTH PLAN CERTIFICATION.**—

“(A) **ELIGIBILITY FOR A HEALTH PLAN, HEALTH CLAIM STATUS, ELECTRONIC FUNDS TRANSFERS, HEALTH CARE PAYMENT AND REMITTANCE ADVICE.**—Not later than December 31, 2013, a health plan shall file a statement with the Secretary, in such form as the Secretary may require, certifying that the data and information systems for such plan are in compliance with any applicable standards (as described under paragraph (7) of section 1171) and associated operating rules (as described under paragraph (9) of such section) for electronic funds transfers, eligibility for a health plan, health claim status, and health care payment and remittance advice, respectively.

“(B) **HEALTH CLAIMS OR EQUIVALENT ENCOUNTER INFORMATION, ENROLLMENT AND**

DISENROLLMENT IN A HEALTH PLAN, HEALTH PLAN PREMIUM PAYMENTS, HEALTH CLAIMS ATTACHMENTS, REFERRAL CERTIFICATION AND AUTHORIZATION.—Not later than December 31, 2015, a health plan shall file a statement with the Secretary, in such form as the Secretary may require, certifying that the data and information systems for such plan are in compliance with any applicable standards and associated operating rules for health claims or equivalent encounter information, enrollment and disenrollment in a health plan, health plan premium payments, health claims attachments, and referral certification and authorization, respectively. A health plan shall provide the same level of documentation to certify compliance with such transactions as is required to certify compliance with the transactions specified in subparagraph (A).

“(2) DOCUMENTATION OF COMPLIANCE.—A health plan shall provide the Secretary, in such form as the Secretary may require, with adequate documentation of compliance with the standards and operating rules described under paragraph (1). A health plan shall not be considered to have provided adequate documentation and shall not be certified as being in compliance with such standards, unless the health plan—

“(A) demonstrates to the Secretary that the plan conducts the electronic transactions specified in paragraph (1) in a manner that fully complies with the regulations of the Secretary; and

“(B) provides documentation showing that the plan has completed end-to-end testing for such transactions with their partners, such as hospitals and physicians.

“(3) SERVICE CONTRACTS.—A health plan shall be required to ensure that any entities that provide services pursuant to a contract with such health plan shall comply with any applicable certification and compliance requirements (and provide the Secretary with adequate documentation of such compliance) under this subsection.

“(4) CERTIFICATION BY OUTSIDE ENTITY.—The Secretary may designate independent, outside entities to certify that a health plan has complied with the requirements under this subsection, provided that the certification standards employed by such entities are in accordance with any standards or operating rules issued by the Secretary.

“(5) COMPLIANCE WITH REVISED STANDARDS AND OPERATING RULES.—

“(A) IN GENERAL.—A health plan (including entities described under paragraph (3)) shall file a statement with the Secretary, in such form as the Secretary may require, certifying that the data and information systems for such plan are in compliance with any applicable revised standards and associated operating rules under this subsection for any interim final rule promulgated by the Secretary under subsection (i) that—

“(i) amends any standard or operating rule described under paragraph (1) of this subsection; or

“(ii) establishes a standard (as described under subsection (a)(1)(B)) or associated operating rules (as described under subsection (i)(5)) for any other financial and administrative transactions.

“(B) DATE OF COMPLIANCE.—A health plan shall comply with such requirements not later than the effective date of the applicable standard or operating rule.

“(6) AUDITS OF HEALTH PLANS.—The Secretary shall conduct periodic audits to ensure that health plans (including entities described under paragraph (3)) are in compliance with any standards and operating rules that are described under paragraph (1) or subsection (i)(5).

“(i) REVIEW AND AMENDMENT OF STANDARDS AND OPERATING RULES.—

“(1) ESTABLISHMENT.—Not later than January 1, 2014, the Secretary shall establish a review committee (as described under paragraph (4)).

“(2) EVALUATIONS AND REPORTS.—

“(A) HEARINGS.—Not later than April 1, 2014, and not less than biennially thereafter, the Secretary, acting through the review committee, shall conduct hearings to evaluate and review the adopted standards and operating rules established under this section.

“(B) REPORT.—Not later than July 1, 2014, and not less than biennially thereafter, the review committee shall provide recommendations for updating and improving such standards and operating rules. The review committee shall recommend a single set of operating rules per transaction standard and maintain the goal of creating as much uniformity as possible in the implementation of the electronic standards.

“(3) INTERIM FINAL RULEMAKING.—

“(A) IN GENERAL.—Any recommendations to amend adopted standards and operating rules that have been approved by the review committee and reported to the Secretary under paragraph (2)(B) shall be adopted by the Secretary through promulgation of an interim final rule not later than 90 days after receipt of the committee's report.

“(B) PUBLIC COMMENT.—

“(i) PUBLIC COMMENT PERIOD.—The Secretary shall accept and consider public comments on any interim final rule published under this paragraph for 60 days after the date of such publication.

“(ii) EFFECTIVE DATE.—The effective date of any amendment to existing standards or operating rules that is adopted through an interim final rule published under this paragraph shall be 25 months following the close of such public comment period.

“(4) REVIEW COMMITTEE.—

“(A) DEFINITION.—For the purposes of this subsection, the term ‘review committee’ means a committee chartered by or within the Department of Health and Human Services that has been designated by the Secretary to carry out this subsection, including—

“(i) the National Committee on Vital and Health Statistics; or

“(ii) any appropriate committee as determined by the Secretary.

“(B) COORDINATION OF HIT STANDARDS.—In developing recommendations under this subsection, the review committee shall ensure coordination, as appropriate, with the standards that support the certified electronic health record technology approved by the Office of the National Coordinator for Health Information Technology.

“(5) OPERATING RULES FOR OTHER STANDARDS ADOPTED BY THE SECRETARY.—The Secretary shall adopt a single set of operating rules (pursuant to the process described under subsection (g)) for any transaction for which a standard had been adopted pursuant to subsection (a)(1)(B).

“(j) PENALTIES.—

“(1) PENALTY FEE.—

“(A) IN GENERAL.—Not later than April 1, 2014, and annually thereafter, the Secretary shall assess a penalty fee (as determined under subparagraph (B)) against a health plan that has failed to meet the requirements under subsection (h) with respect to certification and documentation of compliance with—

“(i) the standards and associated operating rules described under paragraph (1) of such subsection; and

“(ii) a standard (as described under subsection (a)(1)(B)) and associated operating rules (as described under subsection (i)(5)) for any other financial and administrative transactions.

“(B) FEE AMOUNT.—Subject to subparagraphs (C), (D), and (E), the Secretary shall assess a

penalty fee against a health plan in the amount of \$1 per covered life until certification is complete. The penalty shall be assessed per person covered by the plan for which its data systems for major medical policies are not in compliance and shall be imposed against the health plan for each day that the plan is not in compliance with the requirements under subsection (h).

“(C) ADDITIONAL PENALTY FOR MISREPRESENTATION.—A health plan that knowingly provides inaccurate or incomplete information in a statement of certification or documentation of compliance under subsection (h) shall be subject to a penalty fee that is double the amount that would otherwise be imposed under this subsection.

“(D) ANNUAL FEE INCREASE.—The amount of the penalty fee imposed under this subsection shall be increased on an annual basis by the annual percentage increase in total national health care expenditures, as determined by the Secretary.

“(E) PENALTY LIMIT.—A penalty fee assessed against a health plan under this subsection shall not exceed, on an annual basis—

“(i) an amount equal to \$20 per covered life under such plan; or

“(ii) an amount equal to \$40 per covered life under the plan if such plan has knowingly provided inaccurate or incomplete information (as described under subparagraph (C)).

“(F) DETERMINATION OF COVERED INDIVIDUALS.—The Secretary shall determine the number of covered lives under a health plan based upon the most recent statements and filings that have been submitted by such plan to the Securities and Exchange Commission.

“(2) NOTICE AND DISPUTE PROCEDURE.—The Secretary shall establish a procedure for assessment of penalty fees under this subsection that provides a health plan with reasonable notice and a dispute resolution procedure prior to provision of a notice of assessment by the Secretary of the Treasury (as described under paragraph (4)(B)).

“(3) PENALTY FEE REPORT.—Not later than May 1, 2014, and annually thereafter, the Secretary shall provide the Secretary of the Treasury with a report identifying those health plans that have been assessed a penalty fee under this subsection.

“(4) COLLECTION OF PENALTY FEE.—

“(A) IN GENERAL.—The Secretary of the Treasury, acting through the Financial Management Service, shall administer the collection of penalty fees from health plans that have been identified by the Secretary in the penalty fee report provided under paragraph (3).

“(B) NOTICE.—Not later than August 1, 2014, and annually thereafter, the Secretary of the Treasury shall provide notice to each health plan that has been assessed a penalty fee by the Secretary under this subsection. Such notice shall include the amount of the penalty fee assessed by the Secretary and the due date for payment of such fee to the Secretary of the Treasury (as described in subparagraph (C)).

“(C) PAYMENT DUE DATE.—Payment by a health plan for a penalty fee assessed under this subsection shall be made to the Secretary of the Treasury not later than November 1, 2014, and annually thereafter.

“(D) UNPAID PENALTY FEES.—Any amount of a penalty fee assessed against a health plan under this subsection for which payment has not been made by the due date provided under subparagraph (C) shall be—

“(i) increased by the interest accrued on such amount, as determined pursuant to the underpayment rate established under section 6621 of the Internal Revenue Code of 1986; and

“(ii) treated as a past-due, legally enforceable debt owed to a Federal agency for purposes of section 6402(d) of the Internal Revenue Code of 1986.

“(E) ADMINISTRATIVE FEES.—Any fee charged or allocated for collection activities conducted by the Financial Management Service will be passed on to a health plan on a pro-rata basis and added to any penalty fee collected from the plan.”.

(c) PROMULGATION OF RULES.—

(1) UNIQUE HEALTH PLAN IDENTIFIER.—The Secretary shall promulgate a final rule to establish a unique health plan identifier (as described in section 1173(b) of the Social Security Act (42 U.S.C. 1320d-2(b))) based on the input of the National Committee on Vital and Health Statistics. The Secretary may do so on an interim final basis and such rule shall be effective not later than October 1, 2012.

(2) ELECTRONIC FUNDS TRANSFER.—The Secretary shall promulgate a final rule to establish a standard for electronic funds transfers (as described in section 1173(a)(2)(J) of the Social Security Act, as added by subsection (b)(2)(A)). The Secretary may do so on an interim final basis and shall adopt such standard not later than January 1, 2012, in a manner ensuring that such standard is effective not later than January 1, 2014.

(3) HEALTH CLAIMS ATTACHMENTS.—The Secretary shall promulgate a final rule to establish a transaction standard and a single set of associated operating rules for health claims attachments (as described in section 1173(a)(2)(B) of the Social Security Act (42 U.S.C. 1320d-2(a)(2)(B))) that is consistent with the X12 Version 5010 transaction standards. The Secretary may do so on an interim final basis and shall adopt a transaction standard and a single set of associated operating rules not later than January 1, 2014, in a manner ensuring that such standard is effective not later than January 1, 2016.

(d) EXPANSION OF ELECTRONIC TRANSACTIONS IN MEDICARE.—Section 1862(a) of the Social Security Act (42 U.S.C. 1395y(a)) is amended—

(1) in paragraph (23), by striking the “or” at the end;

(2) in paragraph (24), by striking the period and inserting “; or”; and

(3) by inserting after paragraph (24) the following new paragraph:

“(25) not later than January 1, 2014, for which the payment is other than by electronic funds transfer (EFT) or an electronic remittance in a form as specified in ASC X12 835 Health Care Payment and Remittance Advice or subsequent standard.”.

SEC. 1105. EFFECTIVE DATE.

This subtitle shall take effect on the date of enactment of this Act.

Subtitle C—Quality Health Insurance Coverage for All Americans

PART I—HEALTH INSURANCE MARKET REFORMS

SEC. 1201. AMENDMENT TO THE PUBLIC HEALTH SERVICE ACT.

Part A of title XXVII of the Public Health Service Act (42 U.S.C. 300gg et seq.), as amended by section 1001, is further amended—

(1) by striking the heading for subpart 1 and inserting the following:

“Subpart I—General Reform”;

(2)(A) in section 2701 (42 U.S.C. 300gg), by striking the section heading and subsection (a) and inserting the following:

“SEC. 2704. PROHIBITION OF PREEXISTING CONDITION EXCLUSIONS OR OTHER DISCRIMINATION BASED ON HEALTH STATUS.

“(a) IN GENERAL.—A group health plan and a health insurance issuer offering group or individual health insurance coverage may not impose any preexisting condition exclusion with respect to such plan or coverage.”; and

(B) by transferring such section (as amended by subparagraph (A)) so as to appear after the section 2703 added by paragraph (4);

(3)(A) in section 2702 (42 U.S.C. 300gg-1)—

(i) by striking the section heading and all that follows through subsection (a);

(ii) in subsection (b)—

(I) by striking “health insurance issuer offering health insurance coverage in connection with a group health plan” each place that such appears and inserting “health insurance issuer offering group or individual health insurance coverage”; and

(II) in paragraph (2)(A)—

(aa) by inserting “or individual” after “employer”; and

(bb) by inserting “or individual health coverage, as the case may be” before the semicolon; and

(iii) in subsection (e)—

(I) by striking “(a)(1)(F)” and inserting “(a)(6)”;

(II) by striking “2701” and inserting “2704”; and

(III) by striking “2721(a)” and inserting “2735(a)”;

(B) by transferring such section (as amended by subparagraph (A)) to appear after section 2705(a) as added by paragraph (4); and

(4) by inserting after the subpart heading (as added by paragraph (1)) the following:

“SEC. 2701. FAIR HEALTH INSURANCE PREMIUMS.

“(a) PROHIBITING DISCRIMINATORY PREMIUM RATES.—

“(1) IN GENERAL.—With respect to the premium rate charged by a health insurance issuer for health insurance coverage offered in the individual or small group market—

“(A) such rate shall vary with respect to the particular plan or coverage involved only by—

“(i) whether such plan or coverage covers an individual or family;

“(ii) rating area, as established in accordance with paragraph (2);

“(iii) age, except that such rate shall not vary by more than 3 to 1 for adults (consistent with section 2707(c)); and

“(iv) tobacco use, except that such rate shall not vary by more than 1.5 to 1; and

“(B) such rate shall not vary with respect to the particular plan or coverage involved by any other factor not described in subparagraph (A).

“(2) RATING AREA.—

“(A) IN GENERAL.—Each State shall establish 1 or more rating areas within that State for purposes of applying the requirements of this title.

“(B) SECRETARIAL REVIEW.—The Secretary shall review the rating areas established by each State under subparagraph (A) to ensure the adequacy of such areas for purposes of carrying out the requirements of this title. If the Secretary determines a State’s rating areas are not adequate, or that a State does not establish such areas, the Secretary may establish rating areas for that State.

“(3) PERMISSIBLE AGE BANDS.—The Secretary, in consultation with the National Association of Insurance Commissioners, shall define the permissible age bands for rating purposes under paragraph (1)(A)(iii).

“(4) APPLICATION OF VARIATIONS BASED ON AGE OR TOBACCO USE.—With respect to family coverage under a group health plan or health insurance coverage, the rating variations permitted under clauses (iii) and (iv) of paragraph (1)(A) shall be applied based on the portion of the premium that is attributable to each family member covered under the plan or coverage.

“(5) SPECIAL RULE FOR LARGE GROUP MARKET.—If a State permits health insurance issuers that offer coverage in the large group market in the State to offer such coverage through the State Exchange (as provided for under section 1312(f)(2)(B) of the Patient Protection and Affordable Care Act), the provisions of this subsection shall apply to all coverage offered in such market in the State.

“SEC. 2702. GUARANTEED AVAILABILITY OF COVERAGE.

“(a) GUARANTEED ISSUANCE OF COVERAGE IN THE INDIVIDUAL AND GROUP MARKET.—Subject to subsections (b) through (e), each health insurance issuer that offers health insurance coverage in the individual or group market in a State must accept every employer and individual in the State that applies for such coverage.

“(b) ENROLLMENT.—

“(1) RESTRICTION.—A health insurance issuer described in subsection (a) may restrict enrollment in coverage described in such subsection to open or special enrollment periods.

“(2) ESTABLISHMENT.—A health insurance issuer described in subsection (a) shall, in accordance with the regulations promulgated under paragraph (3), establish special enrollment periods for qualifying events (under section 603 of the Employee Retirement Income Security Act of 1974).

“(3) REGULATIONS.—The Secretary shall promulgate regulations with respect to enrollment periods under paragraphs (1) and (2).

“SEC. 2703. GUARANTEED RENEWABILITY OF COVERAGE.

“(a) IN GENERAL.—Except as provided in this section, if a health insurance issuer offers health insurance coverage in the individual or group market, the issuer must renew or continue in force such coverage at the option of the plan sponsor or the individual, as applicable.

“SEC. 2705. PROHIBITING DISCRIMINATION AGAINST INDIVIDUAL PARTICIPANTS AND BENEFICIARIES BASED ON HEALTH STATUS.

“(a) IN GENERAL.—A group health plan and a health insurance issuer offering group or individual health insurance coverage may not establish rules for eligibility (including continued eligibility) of any individual to enroll under the terms of the plan or coverage based on any of the following health status-related factors in relation to the individual or a dependent of the individual:

“(1) Health status.

“(2) Medical condition (including both physical and mental illnesses).

“(3) Claims experience.

“(4) Receipt of health care.

“(5) Medical history.

“(6) Genetic information.

“(7) Evidence of insurability (including conditions arising out of acts of domestic violence).

“(8) Disability.

“(9) Any other health status-related factor determined appropriate by the Secretary.

“(j) PROGRAMS OF HEALTH PROMOTION OR DISEASE PREVENTION.—

“(1) GENERAL PROVISIONS.—

“(A) GENERAL RULE.—For purposes of subsection (b)(2)(B), a program of health promotion or disease prevention (referred to in this subsection as a ‘wellness program’) shall be a program offered by an employer that is designed to promote health or prevent disease that meets the applicable requirements of this subsection.

“(B) NO CONDITIONS BASED ON HEALTH STATUS FACTOR.—If none of the conditions for obtaining a premium discount or rebate or other reward for participation in a wellness program is based on an individual satisfying a standard that is related to a health status factor, such wellness program shall not violate this section if participation in the program is made available to all similarly situated individuals and the requirements of paragraph (2) are complied with.

“(C) CONDITIONS BASED ON HEALTH STATUS FACTOR.—If any of the conditions for obtaining a premium discount or rebate or other reward for participation in a wellness program is based on an individual satisfying a standard that is related to a health status factor, such wellness program shall not violate this section if the requirements of paragraph (3) are complied with.

“(2) **WELLNESS PROGRAMS NOT SUBJECT TO REQUIREMENTS.**—If none of the conditions for obtaining a premium discount or rebate or other reward under a wellness program as described in paragraph (1)(B) are based on an individual satisfying a standard that is related to a health status factor (or if such a wellness program does not provide such a reward), the wellness program shall not violate this section if participation in the program is made available to all similarly situated individuals. The following programs shall not have to comply with the requirements of paragraph (3) if participation in the program is made available to all similarly situated individuals:

“(A) A program that reimburses all or part of the cost for memberships in a fitness center.

“(B) A diagnostic testing program that provides a reward for participation and does not base any part of the reward on outcomes.

“(C) A program that encourages preventive care related to a health condition through the waiver of the copayment or deductible requirement under group health plan for the costs of certain items or services related to a health condition (such as prenatal care or well-baby visits).

“(D) A program that reimburses individuals for the costs of smoking cessation programs without regard to whether the individual quits smoking.

“(E) A program that provides a reward to individuals for attending a periodic health education seminar.

“(3) **WELLNESS PROGRAMS SUBJECT TO REQUIREMENTS.**—If any of the conditions for obtaining a premium discount, rebate, or reward under a wellness program as described in paragraph (1)(C) is based on an individual satisfying a standard that is related to a health status factor, the wellness program shall not violate this section if the following requirements are complied with:

“(A) The reward for the wellness program, together with the reward for other wellness programs with respect to the plan that requires satisfaction of a standard related to a health status factor, shall not exceed 30 percent of the cost of employee-only coverage under the plan. If, in addition to employees or individuals, any class of dependents (such as spouses or spouses and dependent children) may participate fully in the wellness program, such reward shall not exceed 30 percent of the cost of the coverage in which an employee or individual and any dependents are enrolled. For purposes of this paragraph, the cost of coverage shall be determined based on the total amount of employer and employee contributions for the benefit package under which the employee is (or the employee and any dependents are) receiving coverage. A reward may be in the form of a discount or rebate of a premium or contribution, a waiver of all or part of a cost-sharing mechanism (such as deductibles, copayments, or coinsurance), the absence of a surcharge, or the value of a benefit that would otherwise not be provided under the plan. The Secretaries of Labor, Health and Human Services, and the Treasury may increase the reward available under this subparagraph to up to 50 percent of the cost of coverage if the Secretaries determine that such an increase is appropriate.

“(B) The wellness program shall be reasonably designed to promote health or prevent disease. A program complies with the preceding sentence if the program has a reasonable chance of improving the health of, or preventing disease in, participating individuals and it is not overly burdensome, is not a subterfuge for discriminating based on a health status factor, and is not highly suspect in the method chosen to promote health or prevent disease.

“(C) The plan shall give individuals eligible for the program the opportunity to qualify for

the reward under the program at least once each year.

“(D) The full reward under the wellness program shall be made available to all similarly situated individuals. For such purpose, among other things:

“(i) The reward is not available to all similarly situated individuals for a period unless the wellness program allows—

“(I) for a reasonable alternative standard (or waiver of the otherwise applicable standard) for obtaining the reward for any individual for whom, for that period, it is unreasonably difficult due to a medical condition to satisfy the otherwise applicable standard; and

“(II) for a reasonable alternative standard (or waiver of the otherwise applicable standard) for obtaining the reward for any individual for whom, for that period, it is medically inadvisable to attempt to satisfy the otherwise applicable standard.

“(ii) If reasonable under the circumstances, the plan or issuer may seek verification, such as a statement from an individual's physician, that a health status factor makes it unreasonably difficult or medically inadvisable for the individual to satisfy or attempt to satisfy the otherwise applicable standard.

“(E) The plan or issuer involved shall disclose in all plan materials describing the terms of the wellness program the availability of a reasonable alternative standard (or the possibility of waiver of the otherwise applicable standard) required under subparagraph (D). If plan materials disclose that such a program is available, without describing its terms, the disclosure under this subparagraph shall not be required.

“(K) **EXISTING PROGRAMS.**—Nothing in this section shall prohibit a program of health promotion or disease prevention that was established prior to the date of enactment of this section and applied with all applicable regulations, and that is operating on such date, from continuing to be carried out for as long as such regulations remain in effect.

“(L) **WELLNESS PROGRAM DEMONSTRATION PROJECT.**—

“(1) **IN GENERAL.**—Not later than July 1, 2014, the Secretary, in consultation with the Secretary of the Treasury and the Secretary of Labor, shall establish a 10-State demonstration project under which participating States shall apply the provisions of subsection (j) to programs of health promotion offered by a health insurance issuer that offers health insurance coverage in the individual market in such State.

“(2) **EXPANSION OF DEMONSTRATION PROJECT.**—If the Secretary, in consultation with the Secretary of the Treasury and the Secretary of Labor, determines that the demonstration project described in paragraph (1) is effective, such Secretaries may, beginning on July 1, 2017 expand such demonstration project to include additional participating States.

“(3) **REQUIREMENTS.**—

“(A) **MAINTENANCE OF COVERAGE.**—The Secretary, in consultation with the Secretary of the Treasury and the Secretary of Labor, shall not approve the participation of a State in the demonstration project under this section unless the Secretaries determine that the State's project is designed in a manner that—

“(i) will not result in any decrease in coverage; and

“(ii) will not increase the cost to the Federal Government in providing credits under section 36B of the Internal Revenue Code of 1986 or cost-sharing assistance under section 1402 of the Patient Protection and Affordable Care Act.

“(B) **OTHER REQUIREMENTS.**—States that participate in the demonstration project under this subsection—

“(i) may permit premium discounts or rebates or the modification of otherwise applicable co-

payments or deductibles for adherence to, or participation in, a reasonably designed program of health promotion and disease prevention;

“(ii) shall ensure that requirements of consumer protection are met in programs of health promotion in the individual market;

“(iii) shall require verification from health insurance issuers that offer health insurance coverage in the individual market of such State that premium discounts—

“(I) do not create undue burdens for individuals insured in the individual market;

“(II) do not lead to cost shifting; and

“(III) are not a subterfuge for discrimination;

“(iv) shall ensure that consumer data is protected in accordance with the requirements of section 264(c) of the Health Insurance Portability and Accountability Act of 1996 (42 U.S.C. 1320d–2 note); and

“(v) shall ensure and demonstrate to the satisfaction of the Secretary that the discounts or other rewards provided under the project reflect the expected level of participation in the wellness program involved and the anticipated effect the program will have on utilization or medical claim costs.

“(M) **REPORT.**—

“(1) **IN GENERAL.**—Not later than 3 years after the date of enactment of the Patient Protection and Affordable Care Act, the Secretary, in consultation with the Secretary of the Treasury and the Secretary of Labor, shall submit a report to the appropriate committees of Congress concerning—

“(A) the effectiveness of wellness programs (as defined in subsection (j)) in promoting health and preventing disease;

“(B) the impact of such wellness programs on the access to care and affordability of coverage for participants and non-participants of such programs;

“(C) the impact of premium-based and cost-sharing incentives on participant behavior and the role of such programs in changing behavior; and

“(D) the effectiveness of different types of rewards.

“(2) **DATA COLLECTION.**—In preparing the report described in paragraph (1), the Secretaries shall gather relevant information from employers who provide employees with access to wellness programs, including State and Federal agencies.

“(N) **REGULATIONS.**—Nothing in this section shall be construed as prohibiting the Secretaries of Labor, Health and Human Services, or the Treasury from promulgating regulations in connection with this section.

“SEC. 2706. NON-DISCRIMINATION IN HEALTH CARE.

“(a) **PROVIDERS.**—A group health plan and a health insurance issuer offering group or individual health insurance coverage shall not discriminate with respect to participation under the plan or coverage against any health care provider who is acting within the scope of that provider's license or certification under applicable State law. This section shall not require that a group health plan or health insurance issuer contract with any health care provider willing to abide by the terms and conditions for participation established by the plan or issuer. Nothing in this section shall be construed as preventing a group health plan, a health insurance issuer, or the Secretary from establishing varying reimbursement rates based on quality or performance measures.

“(b) **INDIVIDUALS.**—The provisions of section 1558 of the Patient Protection and Affordable Care Act (relating to non-discrimination) shall apply with respect to a group health plan or health insurance issuer offering group or individual health insurance coverage.

“SEC. 2707. COMPREHENSIVE HEALTH INSURANCE COVERAGE.

“(a) **COVERAGE FOR ESSENTIAL HEALTH BENEFITS PACKAGE.**—A health insurance issuer that offers health insurance coverage in the individual or small group market shall ensure that such coverage includes the essential health benefits package required under section 1302(a) of the Patient Protection and Affordable Care Act.

“(b) **COST-SHARING UNDER GROUP HEALTH PLANS.**—A group health plan shall ensure that any annual cost-sharing imposed under the plan does not exceed the limitations provided for under paragraphs (1) and (2) of section 1302(c).

“(c) **CHILD-ONLY PLANS.**—If a health insurance issuer offers health insurance coverage in any level of coverage specified under section 1302(d) of the Patient Protection and Affordable Care Act, the issuer shall also offer such coverage in that level as a plan in which the only enrollees are individuals who, as of the beginning of a plan year, have not attained the age of 21.

“(d) **DENTAL ONLY.**—This section shall not apply to a plan described in section 1302(d)(2)(B)(ii)(I).

“SEC. 2708. PROHIBITION ON EXCESSIVE WAITING PERIODS.

“A group health plan and a health insurance issuer offering group or individual health insurance coverage shall not apply any waiting period (as defined in section 2704(b)(4)) that exceeds 90 days.”.

PART II—OTHER PROVISIONS**SEC. 1251. PRESERVATION OF RIGHT TO MAINTAIN EXISTING COVERAGE.**

(a) **NO CHANGES TO EXISTING COVERAGE.**—

(1) **IN GENERAL.**—Nothing in this Act (or an amendment made by this Act) shall be construed to require that an individual terminate coverage under a group health plan or health insurance coverage in which such individual was enrolled on the date of enactment of this Act.

(2) **CONTINUATION OF COVERAGE.**—With respect to a group health plan or health insurance coverage in which an individual was enrolled on the date of enactment of this Act, this subtitle and subtitle A (and the amendments made by such subtitles) shall not apply to such plan or coverage, regardless of whether the individual renews such coverage after such date of enactment.

(b) **ALLOWANCE FOR FAMILY MEMBERS TO JOIN CURRENT COVERAGE.**—With respect to a group health plan or health insurance coverage in which an individual was enrolled on the date of enactment of this Act and which is renewed after such date, family members of such individual shall be permitted to enroll in such plan or coverage if such enrollment is permitted under the terms of the plan in effect as of such date of enactment.

(c) **ALLOWANCE FOR NEW EMPLOYEES TO JOIN CURRENT PLAN.**—A group health plan that provides coverage on the date of enactment of this Act may provide for the enrolling of new employees (and their families) in such plan, and this subtitle and subtitle A (and the amendments made by such subtitles) shall not apply with respect to such plan and such new employees (and their families).

(d) **EFFECT ON COLLECTIVE BARGAINING AGREEMENTS.**—In the case of health insurance coverage maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers that was ratified before the date of enactment of this Act, the provisions of this subtitle and subtitle A (and the amendments made by such subtitles) shall not apply until the date on which the last of the collective bargaining agreements relating to the coverage terminates. Any coverage amendment made pursuant to a collective bargaining agreement relating to the

coverage which amends the coverage solely to conform to any requirement added by this subtitle or subtitle A (or amendments) shall not be treated as a termination of such collective bargaining agreement.

(e) **DEFINITION.**—In this title, the term “grandfathered health plan” means any group health plan or health insurance coverage to which this section applies.

SEC. 1252. RATING REFORMS MUST APPLY UNIFORMLY TO ALL HEALTH INSURANCE ISSUERS AND GROUP HEALTH PLANS.

Any standard or requirement adopted by a State pursuant to this title, or any amendment made by this title, shall be applied uniformly to all health plans in each insurance market to which the standard and requirements apply. The preceding sentence shall also apply to a State standard or requirement relating to the standard or requirement required by this title (or any such amendment) that is not the same as the standard or requirement but that is not preempted under section 1321(d).

SEC. 1253. EFFECTIVE DATES.

This subtitle (and the amendments made by this subtitle) shall become effective for plan years beginning on or after January 1, 2014.

Subtitle D—Available Coverage Choices for All Americans**PART I—ESTABLISHMENT OF QUALIFIED HEALTH PLANS****SEC. 1301. QUALIFIED HEALTH PLAN DEFINED.**

(a) **QUALIFIED HEALTH PLAN.**—In this title:

(1) **IN GENERAL.**—The term “qualified health plan” means a health plan that—

(A) has in effect a certification (which may include a seal or other indication of approval) that such plan meets the criteria for certification described in section 1311(c) issued or recognized by each Exchange through which such plan is offered;

(B) provides the essential health benefits package described in section 1302(a); and

(C) is offered by a health insurance issuer that—

(i) is licensed and in good standing to offer health insurance coverage in each State in which such issuer offers health insurance coverage under this title;

(ii) agrees to offer at least one qualified health plan in the silver level and at least one plan in the gold level in each such Exchange;

(iii) agrees to charge the same premium rate for each qualified health plan of the issuer without regard to whether the plan is offered through an Exchange or whether the plan is offered directly from the issuer or through an agent; and

(iv) complies with the regulations developed by the Secretary under section 1311(d) and such other requirements as an applicable Exchange may establish.

(2) **INCLUSION OF CO-OP PLANS AND COMMUNITY HEALTH INSURANCE OPTION.**—Any reference in this title to a qualified health plan shall be deemed to include a qualified health plan offered through the CO-OP program under section 1322 or a community health insurance option under section 1323, unless specifically provided for otherwise.

(b) **TERMS RELATING TO HEALTH PLANS.**—In this title:

(1) **HEALTH PLAN.**—

(A) **IN GENERAL.**—The term “health plan” means health insurance coverage and a group health plan.

(B) **EXCEPTION FOR SELF-INSURED PLANS AND MEWAS.**—Except to the extent specifically provided by this title, the term “health plan” shall not include a group health plan or multiple employer welfare arrangement to the extent the plan or arrangement is not subject to State in-

surance regulation under section 514 of the Employee Retirement Income Security Act of 1974.

(2) **HEALTH INSURANCE COVERAGE AND ISSUER.**—The terms “health insurance coverage” and “health insurance issuer” have the meanings given such terms by section 2791(b) of the Public Health Service Act.

(3) **GROUP HEALTH PLAN.**—The term “group health plan” has the meaning given such term by section 2791(a) of the Public Health Service Act.

SEC. 1302. ESSENTIAL HEALTH BENEFITS REQUIREMENTS.

(a) **ESSENTIAL HEALTH BENEFITS PACKAGE.**—In this title, the term “essential health benefits package” means, with respect to any health plan, coverage that—

(1) provides for the essential health benefits defined by the Secretary under subsection (b);

(2) limits cost-sharing for such coverage in accordance with subsection (c); and

(3) subject to subsection (e), provides either the bronze, silver, gold, or platinum level of coverage described in subsection (d).

(b) **ESSENTIAL HEALTH BENEFITS.**—

(1) **IN GENERAL.**—Subject to paragraph (2), the Secretary shall define the essential health benefits, except that such benefits shall include at least the following general categories and the items and services covered within the categories:

(A) Ambulatory patient services.

(B) Emergency services.

(C) Hospitalization.

(D) Maternity and newborn care.

(E) Mental health and substance use disorder services, including behavioral health treatment.

(F) Prescription drugs.

(G) Rehabilitative and habilitative services and devices.

(H) Laboratory services.

(I) Preventive and wellness services and chronic disease management.

(J) Pediatric services, including oral and vision care.

(2) **LIMITATION.**—

(A) **IN GENERAL.**—The Secretary shall ensure that the scope of the essential health benefits under paragraph (1) is equal to the scope of benefits provided under a typical employer plan, as determined by the Secretary. To inform this determination, the Secretary of Labor shall conduct a survey of employer-sponsored coverage to determine the benefits typically covered by employers, including multiemployer plans, and provide a report on such survey to the Secretary.

(B) **CERTIFICATION.**—In defining the essential health benefits described in paragraph (1), and in revising the benefits under paragraph (4)(H), the Secretary shall submit a report to the appropriate committees of Congress containing a certification from the Chief Actuary of the Centers for Medicare & Medicaid Services that such essential health benefits meet the limitation described in paragraph (2).

(3) **NOTICE AND HEARING.**—In defining the essential health benefits described in paragraph (1), and in revising the benefits under paragraph (4)(H), the Secretary shall provide notice and an opportunity for public comment.

(4) **REQUIRED ELEMENTS FOR CONSIDERATION.**—In defining the essential health benefits under paragraph (1), the Secretary shall—

(A) ensure that such essential health benefits reflect an appropriate balance among the categories described in such subsection, so that benefits are not unduly weighted toward any category;

(B) not make coverage decisions, determine reimbursement rates, establish incentive programs, or design benefits in ways that discriminate against individuals because of their age, disability, or expected length of life;

(C) take into account the health care needs of diverse segments of the population, including

women, children, persons with disabilities, and other groups;

(D) ensure that health benefits established as essential not be subject to denial to individuals against their wishes on the basis of the individuals' age or expected length of life or of the individuals' present or predicted disability, degree of medical dependency, or quality of life;

(E) provide that a qualified health plan shall not be treated as providing coverage for the essential health benefits described in paragraph (1) unless the plan provides that—

(i) coverage for emergency department services will be provided without imposing any requirement under the plan for prior authorization of services or any limitation on coverage where the provider of services does not have a contractual relationship with the plan for the providing of services that is more restrictive than the requirements or limitations that apply to emergency department services received from providers who do have such a contractual relationship with the plan; and

(ii) if such services are provided out-of-network, the cost-sharing requirement (expressed as a copayment amount or coinsurance rate) is the same requirement that would apply if such services were provided in-network;

(F) provide that if a plan described in section 1311(b)(2)(B)(ii) (relating to stand-alone dental benefits plans) is offered through an Exchange, another health plan offered through such Exchange shall not fail to be treated as a qualified health plan solely because the plan does not offer coverage of benefits offered through the stand-alone plan that are otherwise required under paragraph (1)(J); and

(G) periodically review the essential health benefits under paragraph (1), and provide a report to Congress and the public that contains—

(i) an assessment of whether enrollees are facing any difficulty accessing needed services for reasons of coverage or cost;

(ii) an assessment of whether the essential health benefits needs to be modified or updated to account for changes in medical evidence or scientific advancement;

(iii) information on how the essential health benefits will be modified to address any such gaps in access or changes in the evidence base;

(iv) an assessment of the potential of additional or expanded benefits to increase costs and the interactions between the addition or expansion of benefits and reductions in existing benefits to meet actuarial limitations described in paragraph (2); and

(H) periodically update the essential health benefits under paragraph (1) to address any gaps in access to coverage or changes in the evidence base the Secretary identifies in the review conducted under subparagraph (G).

(5) **RULE OF CONSTRUCTION.**—Nothing in this title shall be construed to prohibit a health plan from providing benefits in excess of the essential health benefits described in this subsection.

(c) **REQUIREMENTS RELATING TO COST-SHARING.**—

(1) **ANNUAL LIMITATION ON COST-SHARING.**—

(A) 2014.—The cost-sharing incurred under a health plan with respect to self-only coverage or coverage other than self-only coverage for a plan year beginning in 2014 shall not exceed the dollar amounts in effect under section 223(c)(2)(A)(ii) of the Internal Revenue Code of 1986 for self-only and family coverage, respectively, for taxable years beginning in 2014.

(B) 2015 AND LATER.—In the case of any plan year beginning in a calendar year after 2014, the limitation under this paragraph shall—

(i) in the case of self-only coverage, be equal to the dollar amount under subparagraph (A) for self-only coverage for plan years beginning in 2014, increased by an amount equal to the product of that amount and the premium ad-

justment percentage under paragraph (4) for the calendar year; and

(ii) in the case of other coverage, twice the amount in effect under clause (i).

If the amount of any increase under clause (i) is not a multiple of \$50, such increase shall be rounded to the next lowest multiple of \$50.

(2) **ANNUAL LIMITATION ON DEDUCTIBLES FOR EMPLOYER-SPONSORED PLANS.**—

(A) **IN GENERAL.**—In the case of a health plan offered in the small group market, the deductible under the plan shall not exceed—

(i) \$2,000 in the case of a plan covering a single individual; and
